CAS	Computerized accounting system
EIS	Electronic Invoicing System
SoD	Segregation of duties

DPO	Data protection officer
UAT	User acceptance test

3. Introduction

3.1 Purpose

This document states what a Philippine non-life insurance broker needs from its broking system, area by area, and for each requirement the screen or module of BrokerVerse OOTB that meets it and the test that shows it is met. It is the reference for the discovery and fit-gap workshops of an implementation, for the acceptance of the system in UAT, and for the change requests that follow.

The requirements are those of a typical broker (one to many branches, retail and corporate clients, motor and non-motor lines, broker billed and direct bill, co-insurance, agents and referrers). The broker confirms, deletes or adds requirements in discovery; each change is recorded in the Fit-Gap Register.

3.2 Audience

Reader	Use
Broker management and process owners	Confirm the requirements and their priority; sign the BRD at the end of discovery
Compliance officer, DPO, tax adviser	Confirm the regulatory requirements and the settings that carry them
iorta TechNXT business analysts and consultants	Run the workshops; class each requirement Fit, Configure, Procedure or Gap
Testers	Turn the acceptance criteria into UAT scripts
Developers and support	Read the chapter Functional specification by module

3.3 How to read the requirements

Column	Meaning
ID	BR-xx-nnn: xx is the process area (01 to 15, the areas of the PH Fit and ASEAN Rollout Assessment), nnn a running number. NFR-xx-nn for non-

Column	Meaning
	functional requirements. IDs are never reused.
Requirement and acceptance	What the business needs, then Accepted when: the observable result that proves it in UAT.
Pri	M must have for go-live, S should have, C could have. The delivered priority is a proposal; the broker sets its own in discovery.
Source	IC (Insurance Code RA 10607 and IC rules), BIR (NIRC, EOPT Act and BIR regulations), NPC (DPA and NPC rules), AMLC (AMLA, its rules and the IC guidelines for covered persons), LTO (motor registration), Bus. (business need, no regulator). The source names the authority, not a legal citation; the broker's compliance officer and tax adviser confirm the rules in force.
Met by	The menu path, screen or module of BrokerVerse OOTB that meets the requirement. Settings are named by their key in Master > Configuration with the delivered value.

3.4 Related documents

Document	Folder	Relationship
Process Flow Document	05_Delivery	The flows F01 to F19 that run through these requirements, with swimlane diagrams
User Manual	05_Delivery	The procedure, fields and messages of every screen named in "Met by"
Fit-Gap Register	05_Delivery	Records the class (Fit, Configure, Procedure, Gap) of each requirement of the broker and the product gaps closed in this release
Philippine Regulatory Compliance Matrix	05_Delivery	The regulation behind the requirements with source IC, BIR, NPC and AMLC
Product Functionality	01_Sales	The product module by module
Implementation Statement of Work	03_Contracts	What the implementation delivers; requirements outside OOTB follow the change request procedure
Test Cases workbook	05_Delivery	The test cases of the release test

3.5 Version history

Version	Date	Change
1.0	04 October 2026	Initial issue. Requirements of the 15 process areas, with the modules of the current release (AML/CFT, IC and NPC compliance, BIR returns, cover notes, computed cancellation, post-dated cheques, instalment invoices, claim documents, motor repairs, accounts payable, fixed assets, distribution channels, dealer programmes, fleets, marine open covers, facultative reinsurance, campaigns, Report Builder, integrations, branding and e-signatures, go-live data workbench, environment comparison and data masking). The chapter Functional specification by module.
1.0.1	04 October 2026	Client brand packs: basis is the client's contract with iorta TechNXT (management decision of 04 October 2026)

4. Business context

4.1 The Philippine non-life broker

An insurance broker licensed by the Insurance Commission acts for the client: it finds the cover the client needs, presents the risk to insurers authorised to do business in the Philippines, places it with one insurer or several in co-insurance, issues or records the policy, collects the premium (broker billed) or lets the client pay the insurer (direct bill), remits the premium net of its commission, services the policy, assists with claims and renews the business. An insurance agent working for one insurer, or a captive agency of a dealer group, runs the same cycle with fewer insurers.

The broker earns brokerage commission from the insurers, shares part of it with agents, sub-agents and referrers (comsub), and may earn overriding, profit or contingent commission. It keeps premium collected for insurers apart from its own funds.

4.2 Regulators and obligations

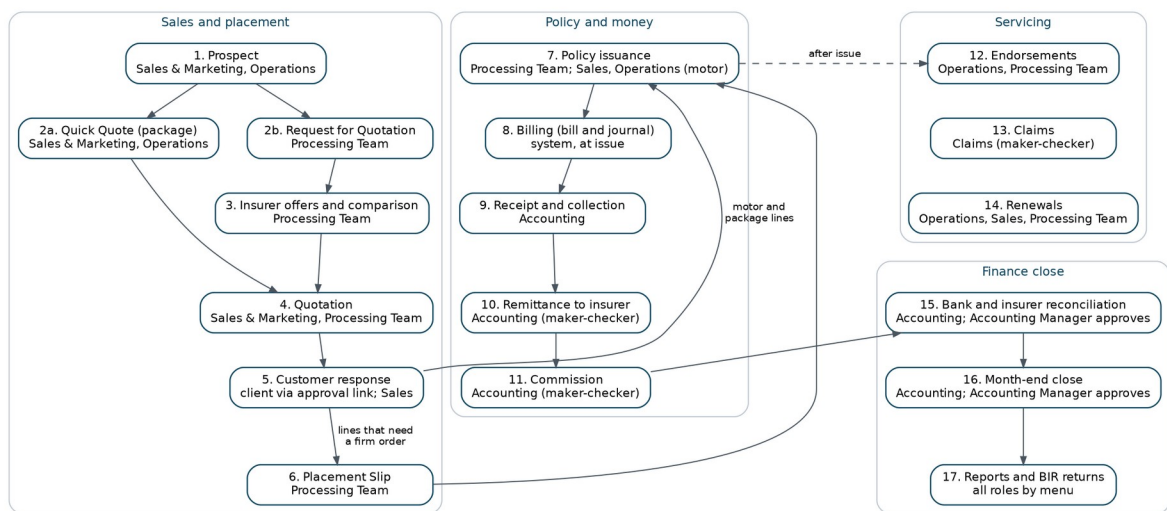

Authority	What it expects from the broker	Where the BRD covers it
Insurance Commission	Licence of the firm and of the persons who solicit; fit and proper directors and officers; placement with authorised insurers; premium held for insurers; records of business; annual statement and reports; complaints handling (RA 11765); CTPL tariff and COC authentication	Areas 05, 09, 10, 14
Bureau of Internal Revenue	Books of accounts and CAS; invoices and receipts under the EOPT Act; VAT or percentage tax on commission; withholding on payments made (0619-E, 1601-EQ, 1604-E, BIR Form 2307); alphalists and DAT files; e-invoicing for those named	Areas 08, 12, 13
National Privacy Commission	Lawful processing and consent; security measures; data subject rights; breach notification within 72 hours; retention and disposal	Areas 01, 14, 15
Anti-Money Laundering Council	Customer due diligence and beneficial ownership; risk rating and EDD; sanctions and PEP screening; covered and suspicious transaction reports; record keeping	Area 01
Land Transportation Office	CTPL cover authenticated for motor registration	Area 05

4.3 Business objectives

No.	Objective	How it is measured in BrokerVerse
01	One system for the whole broking cycle and the broker's own accounting	Every step of flows F01 to F10 done on BrokerVerse screens; no re-keying into a separate accounting package
02	Faster placement and issue	Processing Dashboard cycle time; quotation to policy conversion on the Sales Dashboard
03	Premium collected and remitted on time	Receivables Ageing, Remittance Ageing, Premium Warranty Monitor
04	Retention of the book	Renewal rate, premium retention and

No.	Objective	How it is measured in BrokerVerse
		cycle time against dashboard . targets and the renewal targets (85%, 90%, 15 days)
O5	Regulatory compliance evidenced from the system	Registers, returns and report files of areas 01, 13 and 14; audit trail
O6	Controlled finance	Maker-checker on every payment, journal and approval; month-end close approved by the Accounting Manager
O7	Fast, safe go-live	Configuration and migration loaded with the go-live data workbench and reconciled; configuration proved identical between environments

4.4 The broking cycle

The broking cycle in BrokerVerse, with the persona responsible for each step

5. Stakeholders and personas

5.1 Stakeholders

Stakeholder	Interest	Role in the project
Broker owner, president or general manager	Growth, control, compliance, cost	Sponsor; chairs the steering committee; signs the BRD and the acceptance certificates
Head of operations or placement	Fast placement and servicing	Process owner of areas 02 to 07
Head of claims	Claims service to clients	Process owner of area 11
Finance head and Accounting Manager	Money trail, close, tax	Process owner of areas 08, 09, 10, 12, 13
Compliance officer	IC rules, AMLA programme, complaints	Process owner of areas 01 (AML) and 14
Data protection officer	DPA and NPC obligations	Process owner of the privacy requirements; approves masking refreshes
Tax adviser (external)	Correct tax treatment	Confirms tax codes, ATC, rates and invoice documents
IT head and System Administrator	Security, availability, users	Process owner of area 15; owns the configuration
Insurers, banks, dealers, reinsurers	Correct placements, remittances and documents	Counterparties of the flows; certify interfaces (bank files, insurer API, CTPL provider)
iorta TechNXT	Delivery and support	Project manager, consultants, migration lead, DevOps, support

5.2 Personas (roles in BrokerVerse)

Persona	BrokerVerse role	Goals	Key screens
Account executive	Sales & Marketing (Account Executive)	Win and keep clients; quote quickly; see own production and commission	Prospects, Quick Quote, Quotations, Comparison Reports, Campaigns, My Work, Sales Dashboard, Commission Dashboard
Sales manager	Sales & Marketing with lead assignment permissions	Give every prospect an owner; watch the team	Lead Assignment (team view, rules, queue), Sales Dashboard, Dealer Production
Placement officer	Processing Team (Placement & Policy Processing)	Market risks; bind and issue correctly; approve referrals and renewal terms	Requests for Quotation, Placement Slips, Product Configurator, Reinsurance, Facultative Placements
Client service officer	Operations (Client Servicing)	Service clients: onboarding, endorsements, cancellations, renewals, payments, CTPL	Clients (Onboard client), Policy, Policy Cancellation, Cover Notes, CTPL Authentication, Renewals, Fleet Schedules, Marine Open Covers, My Work
Claims officer	Claims	Register and follow claims; approve colleagues' settlements	Claims, Claim Documents, Motor Claim Repairs, Claims Dashboard
Accountant	Accounting	Receipts, collections, remittance,	Accounts menu, Commission, Tax

Persona	BrokerVerse role	Goals	Key screens
		commission, payables, reconciliations, close, BIR	
Accounting Manager	Accounting Manager	Approve the close and the reconciliations; control periods, credit and posting rules	Period End, Bank and Insurer Reconciliation, Credit Control, Configuration Approvals
Compliance officer (AML/CFT)	Compliance Officer (AML/CFT)	Run the AMLA programme: ratings, screening, EDD, alerts, cases, AMLC reports	Compliance > AML screens; Clients
IC compliance and complaints officer	Users with read:compliance, write:compliance, approve:complaints	Keep licences, fit and proper records and insurer authorities; resolve complaints on time; IC reports	Compliance > Insurance Commission
Data protection officer	Users with read:privacy, write:privacy	Consents, data subject requests, breaches	Master > Data Privacy; Compliance > Data Privacy (NPC) > Breach Register
System Administrator	System Administrator (Super Admin Access)	Users, access, configuration, masters, go-live data, integrations, branding	Master menu; Go-Live Data Load; Integrations
Client, claimant, complainant	No sign-in	Clear quotations and documents; quick claims and answers	Approval link, e-mails, SMS, printed documents

The roles are deny by default: each menu item and each server action is granted by permission (Master > Users and Access > Role Permissions). Segregation of Duties rules stop conflicting roles being given to one person (SOD-CLM-ACCT, SOD-PROC-ACCT, SOD-PROC-MGR block; SOD-SALES-ACCT, SOD-SALES-CLM warn).

6. Scope

6.1 In scope

The OOTB edition, configured for the broker:

No.	Process area	Main modules
01	Client onboarding, KYC and AML	Clients, Onboard client, Compliance (AML)
02	Prospecting and sales pipeline	Prospects, Lead Assignment, Distribution Channels, Campaigns, Sales Dashboard, My Work
03	Quotation and insurer comparison	Quick Quote, Compare Insurers, Quotations, Comparison Reports, Product Configurator
04	RFQ, placement, co-insurance and reinsurance	Requests for Quotation, Placement Slips, Cover Notes, Reinsurance, Facultative Placements
05	Policy issuance, documents and motor	Policy, CTPL Authentication, Dealer Programmes, Fleet Schedules, Marine Open Covers, documents and e-signatures
06	Endorsements and cancellations	Endorsements, Policy Cancellation, Short-Period Rates, Cancellation Reasons
07	Renewals and retention	Renewals menu
08	Billing, collection, credit control and receipts	Receipts, Collections, Credit Control, Post-Dated Cheques, Payment Gateways
09	Remittance, direct bill and insurer reconciliation	Remittance, Direct Bill Processing, Bank Payment Files, Insurer Reconciliation, Insurer Integration
10	Commission, referrers and incentives	Commission, Insurer Overrides, Incentive, Licence Register
11	Claims assistance	Claims, Claim Documents, Motor Claim Repairs, Claims Settlements
12	Accounting, general ledger, period end and audit	Journals, Disbursement, Petty Cash, Payables, Fixed Assets, Bank Reconciliation, Period End, Posting Rules
13	Taxes and BIR compliance	Tax menu, Taxation, Premium Taxes & LGU Rates
14	IC and Data Privacy compliance	Compliance > Insurance Commission, Data Privacy (NPC); Master > Data Privacy; masking and encryption
15	Reporting, administration, security and go-live	Reports, Report Builder, dashboards, Master, Users and Access, Audit Trail, Go-Live Data Load, Integrations, Theme and Branding

6.2 Out of scope

- Filing with government systems: BIR eFPS and eBIRForms, the AMLC portal, IC submissions and NPC notifications are done by the broker outside BrokerVerse; BrokerVerse prepares the returns, files and registers.
- Customisation of screens, workflows, printed layouts or the database; new reports beyond the Report Builder; translation of the screens into Filipino.
- Interfaces not covered by the delivered adapters (SMS, Viber, CTPL authentication and LTO feed, insurer API, bank payment files, EIS, screening provider, payment gateways), and the certification of each interface with its partner beyond onboarding support.

- Migration of closed policies, history and documents, and more than the opening balances of one fiscal year.
- A client or agent self-service portal (clients act through approval links, e-mails and printed documents).

Items outside the OOTB scope follow the change request procedure (Implementation Statement of Work).

6.3 Delivered in release 1.1

Four capabilities that earlier issues of this document listed as in development are delivered in release 1.1 and covered by the requirements below: the sales activity log on prospects, quotations and clients (Operations > Sales & Marketing > Sales Activities), the quote wizard covers and risk fields driven by the Product Configurator (Operations > Sales & Marketing > Quotations), BIR Form 2307 for supplier payments (Accounts > Payables > Supplier 2307), and the disposal of fixed assets (Accounts > Fixed Assets > Disposals).

7. Business requirements

7.1 01 Client onboarding, KYC and AML

The broker identifies each client before or at its first policy, keeps one record per client across all its business, and runs its AMLA programme as a covered person: risk rating, enhanced due diligence, screening, transaction monitoring and reports to the AMLC. Flows F01 and F11.

ID	Requirement and acceptance	Pri	Source	Met by
BR-01-001	Record individual clients with Philippine address, mobile number and TIN. Accepted when: a client is onboarded with PSGC region, province, city or municipality and barangay, a mobile number in 09XXXXXXXXX or +639XXXXXXXXX form and a TIN; a wrong format is refused with a message.	M	Bus.	Operations > Clients > Onboard client
BR-01-002	Record juridical clients (company, cooperative, partnership, sole proprietorship) with registration, TIN and authorised signatories. Accepted when: a juridical client is saved with SEC, DTI or CDA registration and each signatory with the board resolution or secretary's certificate (number, date).	M	AMLC	Onboard client, Add signatory
BR-01-003	Capture the government ID presented, with type, number, expiry and image. Accepted when: the ID type comes from the Government ID Type master; a motor policy is refused without the fields of <code>policy.kyc_required_fields</code> .	M	AMLC	Onboard client; Proceed to Policy (KYC)
BR-01-004	Record the beneficial owners of juridical clients. Accepted when: owners at or above <code>aml.beneficial_owner_threshold</code> (25%) or in control are recorded, or the senior managing official; the profile warns when no owner is declared or shares exceed 100%.	M	AMLC	Onboard client, Add beneficial owner ; Compliance > Client Due Diligence
BR-01-005	Rate every client Low, Normal or High from configurable risk factors. Accepted when: the rating is computed at onboarding, at each policy issue, at the KYC refresh and on demand, from client type, nationality, PEP, line, payment mode, premium and geography; a PEP is always High; the history shows each rating and its trigger.	M	AMLC	Compliance > Client Due Diligence; AML Settings > Risk factors
BR-01-006	Require enhanced due diligence for High-risk clients before a policy is issued. Accepted when: a High-risk client gets an EDD review (EDD-); issue is refused until a compliance officer other than the submitter approves it (<code>aml.block_issue_pending_edd</code>).	M	AMLC	Compliance > EDD Reviews
BR-01-007	Screen clients, owners and signatories against sanctions, PEP and negative lists. Accepted when: screening runs at onboarding, at issue, at payouts and after each list version; matches from <code>aml.match_threshold</code> (0.85) enter the hits queue; issue and payouts are refused while a hit is open, escalated or confirmed.	M	AMLC	Compliance > Screening Hits, Screening Lists
BR-01-008	Load and version the screening lists the broker is entitled to use. Accepted when: a UN consolidated list (XML) or a CSV or XLSX list is uploaded as a version with checksum and entry count, and every client is rescreened.	M	AMLC	Compliance > Screening Lists
BR-01-009	Monitor transactions for covered and suspicious patterns. Accepted when: the daily job raises alerts (AMA-) for cash above <code>aml.covered_threshold</code> (PHP 500,000) in one banking day, structuring, early cancellation with return premium, third-party payouts,	M	AMLC	Compliance > Transaction Alerts; AML Settings > Monitoring rules

ID	Requirement and acceptance	Pri	Source	Met by
	overpayment refunds and payer different from the client.			
BR-01-010	Manage AML cases and produce the CTR and STR files. Accepted when: a case (AMC-) holds the grounds, narrative and due date in working days; the report file (AMR-, BV-AMLC-TXN 1.0) is generated, downloaded and its filing recorded; covered transactions cannot be closed without a report.	M	AMLC	Compliance > AML Cases, AMLC Reports
BR-01-011	Refresh KYC periodically by risk rating. Accepted when: the refresh dates follow aml.kyc_refresh_months (Low 36, Normal 24, High 12); the weekly job lists the clients due; Complete KYC refresh rates the client again.	S	AMLC	Compliance > KYC Refresh
BR-01-012	Keep KYC and transaction records for at least five years. Accepted when: AML records are kept aml.record_retention_years (5) years after the last policy, transaction or case, and anonymisation is refused before then.	M	AMLC	AML Settings; Master > Data Privacy
BR-01-013	One view of the client across policies, claims, renewals and endorsements. Accepted when: the client view shows the tabs Policy, Claim, Renewal, Endorsement and Data privacy.	M	Bus.	Operations > Clients
BR-01-014	Record consent per purpose with the privacy notice at onboarding. Accepted when: consent for processing, marketing and sharing with insurers is recorded with channel, evidence and notice version; a withdrawal keeps the history.	M	NPC	Client and prospect Data privacy ; Master > Data Privacy > Consent Register

7.2 02 Prospecting and sales pipeline

Prospects come from account executives, uploads, dealers, banks, affinity partners and campaigns. Each gets an owner, is followed up and converted. Flows F01 and F16.

ID	Requirement and acceptance	Pri	Source	Met by
BR-02-001	Capture prospects by line (motor, fire, IAR, employee benefits, package), retail or corporate. Accepted when: a prospect is saved with its number (LD-) and status New; a corporate prospect requires company name and TIN; age 18 to 100.	M	Bus.	Operations > Sales & Marketing > Prospects
BR-02-002	Upload many prospects from a template. Accepted when: a .xlsx or .csv file up to 10 MB loads the valid rows and reports the failed rows with the reason.	S	Bus.	Prospects > Bulk Upload
BR-02-003	Follow the prospect pipeline and the conversion funnel. Accepted when: statuses New, Contacted, Qualified, QuoteGenerated, Converted, Lost are shown and the Lead Conversion Funnel report counts them.	M	Bus.	Prospects; Reports > Lead Conversion Funnel
BR-02-004	Give every new prospect an account executive by rule. Accepted when: the first matching rule (line, channel, province, city, branch, source, category) assigns by round robin, fewest open prospects or a fixed person; unmatched prospects follow leads.assignment_fallback; the assignment history records each change.	S	Bus.	Operations > Sales & Marketing > Lead Assignment
BR-02-005	Let a manager see the team's prospects and reassign them. Accepted when: the team view lists the reporting line with open, converted and lost counts; Reassign and Send to queue work for one or many prospects with a reason; prospects untouched beyond	S	Bus.	Lead Assignment (Team View, Queue)

ID	Requirement and acceptance	Pri	Source	Met by
	leads.assignment_sla_hours go to the queue.			
BR-02-006	Record dealers, financing banks and affinity partners as channels with their referrer and comsub. Accepted when: a channel (group, branch, bank, bank branch, affinity) is saved; the channel is carried from prospect to quotation to policy (channels.inherit_from_lead); Dealer Production reports per channel.	S	Bus.	Master > Insurance > Distribution Channels; Reports > Dealer Production
BR-02-007	Send marketing campaigns only to people whose marketing consent is in force. Accepted when: a segment preview shows who is reached and who is left out and why; every e-mail carries an opt-out link that records a refusal in the consent register.	S	NPC	Operations > Sales & Marketing > Campaigns
BR-02-008	Track sales targets and the pipeline. Accepted when: the Sales Dashboard shows prospects, quotations, conversion, policies issued, premium and open pipeline per person and period.	S	Bus.	Dashboard > Sales Dashboard
BR-02-009	Give each user one worklist of what is waiting. Accepted when: My Work lists the user's open items by category with overdue and due-today counts, tasks with reminders, the team view for managers and a calendar.	S	Bus.	Operations > My Work
BR-02-010	Log sales activities (calls, meetings, e-mails, visits) on prospects, quotations and clients, with the outcome and the next step. Accepted when: an activity is recorded on the prospect with a next step date that appears as a follow-up task in My Work, and the activity report by account executive lists it.	C	Bus.	Operations > Sales & Marketing > Sales Activities; Activities tab of Prospects, Quotations and Clients; My Work tasks today

7.3 03 Quotation and insurer comparison

Quotations are priced on the server from the configured rates, taxes and product rules, approved by the client and compared across insurers. Flows F01 and F02.

ID	Requirement and acceptance	Pri	Source	Met by
BR-03-001	Quote package products on the spot from insurer rate tables. Accepted when: Quick Quote prices a package product; Compare Insurers lists each insurer's premium for a product, sum insured, location and date.	M	Bus.	Quick Quote; Compare Insurers; Master > Finance > Insurer Rate Tables
BR-03-002	Price motor risks: own damage, acts of nature, excess BI and PD, personal accident, APPA per seat, accessories, CTPL. Accepted when: the five-step wizard prices every cover; CTPL equals the IC tariff of the vehicle class, is not taxed again and never discounted.	M	IC	Create Quote (motor wizard); Product Configurator motor template
BR-03-003	Compute premium taxes on the server. Accepted when: VAT 12% (or premium tax by product regime), DST PHP 0.50 per PHP 4.00 or fraction, LGT at the city or municipality rate, FST on fire lines are applied; a premium changed in the browser is ignored.	M	BIR	Master > Finance > Premium Taxes & LGU Rates
BR-03-004	Apply the insurer's underwriting guidelines to each quotation. Accepted when: acceptance rules of the governing product template refer, decline or load the quotation; a referred quotation cannot be sent, approved, placed or issued until a user of the rule's authority role approves it within the Underwriting referral limit.	S	Bus.	Product Configurator > Acceptance Rules, Rating Engine; Authority Matrix
BR-03-005	Limit discounts by role and take them from the broker's commission. Accepted when: a discount above the role's limit in the Authority Matrix is refused.	M	Bus.	Master > Users and Access > Authority Matrix
BR-03-006	Let the client approve the quotation online or record the answer received.	M	Bus.	Quotations

ID	Requirement and acceptance	Pri	Source	Met by
	Accepted when: Send for Customer Approval e-mails a link valid 7 days; approval sets Customer Accepted; Record customer response records Accepted, Declined or Revise with channel, date and evidence.			
BR-03-007	Control quotation validity and approval. Accepted when: a quotation expires after limits.quote_validity_days (30); the creator cannot approve it (workflow.quote_maker_checker); every change is in its Audit Trail tab.	M	Bus.	Quotations
BR-03-008	Give the client a printed comparison of the insurers' offers with the broker's recommendation. Accepted when: the report ranks the options by premium, names the recommended option and the reasons, never shows commission, prints on the letterhead and records the client's choice.	S	IC	Operations > Sales & Marketing > Comparison Reports
BR-03-009	Keep products, covers, rating factors, rules, documents and markets in one configurator. Accepted when: product templates have versions and statuses; only active templates price quotations; the governing template of a record is the one named, else the motor pricing template, else the newest active one of the product or line.	S	Bus.	Product Configurator
BR-03-010	Drive the quote wizard covers and risk fields from the Product Configurator. Accepted when: the covers of the governing template's Coverage Builder (mandatory always included, optional ticked or unticked, each priced on its quotation premium) and the risk fields its acceptance rules and rating factors test appear in the quote wizard, and every rule is evaluated on them.	C	Bus.	Operations > Sales & Marketing > Quotations (Start quote); Product Configurator > Coverage Builder, Acceptance Rules, Rating Engine

7.4 04 RFQ, placement, co-insurance and reinsurance

Risks are presented to several insurers, offers compared, the security chosen and bound with every participant's confirmation. The broker can also act as reinsurance broker. Flows F02 and F19.

ID	Requirement and acceptance	Pri	Source	Met by
BR-04-001	Send a request for quotation to several insurers. Accepted when: a broker slip (BS-) with risk details, covers and insurers is submitted; one offer record per insurer is created and each insurer is e-mailed.	M	Bus.	Operations > Sales & Marketing > Requests for Quotation
BR-04-002	Record insurers' offers and declines with their terms. Accepted when: net premium, rate, line offered, taxes, validity, deductibles, special terms and the insurer's letter are recorded; declines carry a reason.	M	Bus.	Requests for Quotation > Market responses
BR-04-003	Compare offers and choose the security. Accepted when: offers are ranked by gross premium with the best marked and the market capacity shown; the selected shares must total exactly 100% with one lead.	M	Bus.	Requests for Quotation > Compare offers
BR-04-004	Place with the lead and co-insurers and record each confirmation. Accepted when: each participant receives a slip of its own share; the slip is Bound only when every participant has confirmed with its policy or certificate number.	M	Bus.	Placement Slips
BR-04-005	Split premium, taxes, commission and payables per co-insurer. Accepted when: the bill journal, remittance, claims and the Co-insurance Register show each insurer's share; the rounding goes to the lead.	M	IC	Policy > Premium Accounting Entries; Co-insurance Register
BR-04-006	Set the placement journey per line. Accepted when: each step (RFQ, quotation slip, placement slip, record issued policy) is Required, Optional or Not used per line (placement.journey); a	S	Bus.	Master > Configuration (Sales, Quotations & Placement)

ID	Requirement and acceptance	Pri	Source	Met by
	required step cannot be skipped.			
BR-04-007	Issue cover notes while the policy is pending. Accepted when: a cover note (CVN-) is issued from an accepted quotation or a sent or bound placement slip for cover_note.validity_days (30), printed and e-mailed, superseded when the policy is issued and expired after its period.	S	IC	Operations > Cover Notes
BR-04-008	Place only with insurers authorised by the IC. Accepted when: the insurer's certificate of authority and validity are checked when an RFQ is sent, a firm order is sent and a policy is issued (compliance.insurer_authority_check warn or block); the Insurer Authority report lists valid, expiring and expired certificates.	M	IC	Compliance > Insurance Commission > Insurer Authority; Master > Insurance > Insurance Company
BR-04-009	Restrict the insurers approached to the product's market. Accepted when: with product.market_panel_enforced on, an insurer outside the market mapping of the product is refused.	C	Bus.	Product Configurator > Market Mapping
BR-04-010	Place facultative reinsurance for a cedant. Accepted when: a slip with the 100% terms and share offered is sent to reinsurers meeting the security rating; it is Placed at 100% of the share; binding posts the amounts due from the cedant, to each reinsurer and the brokerage; cover note, debit note, credit notes and bordereau print.	C	Bus.	Reinsurance > Facultative Placements
BR-04-011	Record treaties, cessions, recoveries and reinsurer statement reconciliations. Accepted when: a treaty needs a second user's approval; cessions and bordereaux are produced; recoveries are registered; variances above 1% need review.	C	Bus.	Reinsurance menu; Master > Insurance > Reinsurance Treaty

7.5 05 Policy issuance, documents and motor

Policies are issued from the placement or quotation, or recorded when the insurer issued them; motor policies carry the CTPL authentication; bulk business comes from dealer programmes, fleets and open covers. Flows F01, F02, F16 to F18.

ID	Requirement and acceptance	Pri	Source	Met by
BR-05-001	Issue the policy from a bound placement or an accepted quotation, creating the client and the bill. Accepted when: issue gives POL-, creates CL- from the prospect, copies participants, raises the bill or books the direct-bill commission and posts the journal.	M	Bus.	Placement Slips > Issue Policy; Quotations > Proceed to Policy
BR-05-002	Record a policy already issued by the insurer. Accepted when: Record Issued Policy creates the policy, bill and commission in one step where the line's journey allows it.	M	Bus.	Placement Slips > Record Issued Policy
BR-05-003	Choose broker billed or direct bill per policy. Accepted when: the billing mode defaults from the insurer, else direct_bill.default_billing_mode, and can be changed before premium is collected.	M	Bus.	Proceed to Policy; Direct Bill Processing > Billing Mode
BR-05-004	Capture motor identifiers and photos. Accepted when: motor, chassis, plate or MV file number, mortgagee and five photos are captured; issue is refused without the KYC fields.	M	LTO	Proceed to Policy
BR-05-005	Authenticate every CTPL certificate of cover with the IC-accredited provider. Accepted when: at issue the next COC of the insurer's series is allocated, the request is sent, the authentication code is stored and printed on the schedule; unauthenticated covers are flagged after 24 hours; a code from the provider's portal can be keyed in; the LTO feed is sent when switched on.	M	IC	Operations > CTPL Authentication; Integrations (CTPL_AUTH, LTO_FEED)
BR-05-006	Print the policy schedule and documents on the letterhead and e-mail them.	M	IC	Product Configurator > Document

ID	Requirement and acceptance	Pri	Source	Met by
	Accepted when: documents carry the letterhead of the company, the e-signatures mapped to the document type and, when a product document template exists, its layout with merge fields.			Manager; Master > System Settings > Theme and Branding
BR-05-007	Upload the insurer's policy document. Accepted when: a PDF or image up to 10 MB is attached to the policy and viewable from Policy Details.	M	Bus.	Policy Details > Documents & Billing
BR-05-008	Run brand-new vehicle programmes with dealers and financing banks. Accepted when: a dealer upload creates prospects, quotations or policies with the bank as mortgagee, bills each payer, and prints or e-mails the bank endorsement letters.	S	Bus.	Operations > Sales & Marketing > Dealer Programmes
BR-05-009	Insure a fleet on one policy with a premium per vehicle. Accepted when: each vehicle is priced with its CTPL; vehicles added or removed mid-term are endorsements at the pro-rata premium; the schedule prints.	S	Bus.	Operations > Fleet Schedules
BR-05-010	Run marine open covers with certificates and declarations. Accepted when: certificates are refused over the conveyance limit or outside the period; declarations are billed on the open policy.	C	Bus.	Operations > Marine Open Covers
BR-05-011	Upload the in-force book at go-live without bills or journals. Accepted when: migrated policies keep their old numbers and post nothing (F14).	M	Bus.	Master > Go-Live Data Load (migration workbook)

7.6 06 Endorsements and cancellations

ID	Requirement and acceptance	Pri	Source	Met by
BR-06-001	Endorse motor policies: personal details, motor details, coverage change, extension, cancellation. Accepted when: each type is raised from the policy, sent to the insurer and completed with its document; a personal details change updates the client.	M	Bus.	Operations > Policy > More actions > Endorsement
BR-06-002	Endorse non-motor policies: premium change and cancellation. Accepted when: a fire endorsement changes risk, cover or premium.	M	Bus.	Endorsement
BR-06-003	Price a coverage change on the server with its taxes. Accepted when: net premium, VAT, DST, LGT, gross and premium change are recomputed; CTPL stays as issued.	M	BIR	Endorsement Request
BR-06-004	Compute the return premium of a cancellation from the days left. Accepted when: pro-rata when the insurer cancels, short-period scale when the insured cancels, flat from inception; partial cancellation on the part cancelled; the server recomputes at completion (endorsements.compute_cancellation_return).	M	IC	Operations > Policy Cancellation; Master > Insurance > Short-Period Rates, Cancellation Reasons
BR-06-005	Return the premium taxes and take back the commission on a cancellation. Accepted when: the taxes in endorsements.cancellation_returned_taxes are returned (DST not by default) and the journal reverses the premium due, taxes and commission (policy.cancel).	M	BIR	Policy Cancellation
BR-06-006	Handle return premium on premium already paid or remitted. Accepted when: the bill is credited, the client's payment becomes a refund payable, the insurer's refund is netted on its next remittance and the comsub is clawed back.	M	Bus.	Endorsement completion; Remittance
BR-06-007	Prevent endorsements on policies that cannot be changed. Accepted when: Endorsement is greyed out while	M	Bus.	Operations > Policy

ID	Requirement and acceptance	Pri	Source	Met by
	payment is Pending or Reviewing and not offered for expired, lapsed, cancelled or renewed policies.			
BR-06-008	Start a cancellation for non-payment from the warranty monitor. Accepted when: a cancellation request creates a draft cancellation endorsement; nothing is cancelled automatically.	S	IC	Accounts > Credit Control > Premium Warranty Monitor

7.7 07 Renewals and retention

ID	Requirement and acceptance	Pri	Source	Met by
BR-07-001	Put every policy into a renewal pipeline before expiry and send notices. Accepted when: policies enter the queue <code>renewals.pipeline_days</code> (90) before expiry; notices are e-mailed 60, 30 and 15 days before (<code>limits.renewal_notice_days</code>).	M	Bus.	Operations > Renewals; Renewal pipeline and notices jobs
BR-07-002	Send renewal notices by SMS or Viber to clients who allow it. Accepted when: with the job on and the connector live, SMS go out 30 and 7 days before expiry after the consent check; refused messages are logged Not sent.	S	NPC	Master > System Configuration > Message Templates, Integrations
BR-07-003	Re-rate the renewal and negotiate it. Accepted when: the renewal quotation applies the current base rates, a claims loading of 10% per claim up to 30% and a loyalty discount of 2% per renewal up to 10%; negotiations record contacts and next actions.	M	Bus.	Renewal Policy > Renew ; Negotiations
BR-07-004	Approve renewal terms by a second user. Accepted when: terms requested for approval go to the Processing Team; the maker cannot approve.	M	Bus.	Negotiations > Request approval ; <code>renewals.maker_checker</code>
BR-07-005	Renew many policies in one batch. Accepted when: a batch of up to 500 policies expiring within 30 days sends notices or quotes in the background.	S	Bus.	Renewals > Renewal Batch
BR-07-006	Score retention risk and win back lapsed clients. Accepted when: at-risk scores and levels are shown; lapsed and grace-period policies are listed; win-back campaigns are set up.	S	Bus.	At-Risk Policies; Lapse Management
BR-07-007	Measure retention. Accepted when: renewal rate, premium retention and cycle time are shown against the targets (85%, 90%, 15 days) by product and sales person.	S	Bus.	Retention Analytics; Performance; Renewal Retention report
BR-07-008	Renew placed and co-insured risks through the placement journey. Accepted when: with <code>placement.journey_applies_to_renewals</code> on, a renewal of such a line goes through its placement slip.	C	Bus.	Renewals; Placement Slips

7.8 08 Billing, collection, credit control and receipts

ID	Requirement and acceptance	Pri	Source	Met by
BR-08-001	Bill premium on issue, endorsement and renewal and send the invoice. Accepted when: a bill (INV-) is raised with its due date from the insurer's premium payment warranty (else 30 days) and e-mailed with the PDF when <code>billing.email_on_issue</code> is on.	M	Bus.	Policy; Accounts > Collections > E-mail invoice
BR-08-002	Let non-accounting roles record how the client paid, for Accounting to verify. Accepted when: Record payment sets the payment to Reviewing and notifies Accounting, which confirms or rejects it with a reason.	M	Bus.	Policy > Proceed to Payment ; notifications
BR-08-003	Post official receipts only from Accounting, against	M	BIR	Accounts > Receipts

ID	Requirement and acceptance	Pri	Source	Met by
	open bills. Accepted when: the receipt takes the next OR number, cannot exceed the bill balance, posts Dr cash / Cr Premiums Receivable and sets the bill Partial or Paid; receipts are cancelled with a reason, never deleted.			
BR-08-004	Keep receipt numbering in line with the BIR registration. Accepted when: the OR series continues the old system's numbering (Set next number), only moves forward and prints on the letterhead with TIN; the document title follows <code>receipts.document_title</code> .	M	BIR	Master > Document Numbering
BR-08-005	Follow up unpaid premium by age and remind clients. Accepted when: collections show ageing buckets; reminders are e-mailed 7 days before due and every 7 days; SMS reminders 3 days before and on the due date when switched on.	M	Bus.	Accounts > Collections; Collection reminders job
BR-08-006	Monitor premium payment warranties per insurer. Accepted when: policies past or within 7 days of the warranty are listed; extensions up to 90 days after inception are approved by the Accounting Manager.	M	IC	Credit Control > Premium Warranty Monitor
BR-08-007	Bill by instalments with an invoice per instalment. Accepted when: a plan of up to 12 instalments is generated; Issue instalment invoices replaces the bill with one bill per instalment, each with its own number, due date, taxes, commission and journal.	S	Bus.	Credit Control > Instalment Plans
BR-08-008	Keep a register of post-dated cheques and deposit them on their date. Accepted when: cheques are registered against a bill (not above its balance), listed when due within 3 days, deposited with an OR, cleared or bounced (receipt cancelled, bill reopened, client e-mailed), replaced or returned.	S	Bus.	Accounts > Post-Dated Cheques
BR-08-009	Set and watch client credit limits. Accepted when: a policy over the client's limit is issued with a warning that Accounting acknowledges; limits are set by the Accounting Manager.	S	Bus.	Credit Control > Client Credit Limits
BR-08-010	Accept online payments with automatic receipt. Accepted when: a payment link (PL-) paid through the gateway creates the official receipt; card details are entered only on the gateway's page.	S	Bus.	Master > Finance > Payment Gateways
BR-08-011	Return a bounced cheque on the bank statement to the client's account. Accepted when: a returned cheque cancels the receipt and reopens the bill.	M	Bus.	Bank Reconciliation; Post-Dated Cheques

7.9 09 Remittance, direct bill and insurer reconciliation

ID	Requirement and acceptance	Pri	Source	Met by
BR-09-001	Remit collected premium to each insurer net of commission and by co-insurer share. Accepted when: draft remittances per insurer are created from collected, unremitted premium; settlement computes premium less commission less tax plus or minus adjustments.	M	IC	Accounts > Remittance (Automated Processing, Settlement)
BR-09-002	Remit within the terms agreed with each insurer. Accepted when: due dates follow the insurer's remittance terms (else 30 days); Remittance Ageing lists what is overdue.	M	IC	Insurance Company master; Credit Control > Remittance Ageing
BR-09-003	Approve remittances within authority limits. Accepted when: the initiator cannot approve; an Accounting user approves up to PHP 1,000,000.00 and the Accounting Manager without limit (Authority Matrix); delegations cover leave.	M	Bus.	Remittance > Approval Workflow; Authority Matrix; Delegations
BR-09-004	Pay insurers and referrers by bank file. Accepted when: vouchers are grouped in a batch for the bank's layout (bulk credit, InstaPay up to PHP	S	Bus.	Accounts > Bank Payment Files; Master > Finance >

ID	Requirement and acceptance	Pri	Source	Met by
	50,000, PESONet), approved by a user who did not prepare it, written, uploaded and closed with the bank's status file, which posts each paid payment.			Bank File Layouts
BR-09-005	Bill direct-bill commission to insurers with VAT and collect it net of EWT. Accepted when: a debit note (DN-) adds 12% VAT, shows the 10% EWT and net cash, is approved by a second user, printed and e-mailed; the collection posts cash and CWT.	M	BIR	Remittance > Direct Bill Processing
BR-09-006	Bill agencies by statement. Accepted when: agency bills are loaded, validated and processed.	C	Bus.	Remittance > Agency Bill Processing
BR-09-007	Reconcile insurers' statements of account. Accepted when: a statement (ISR-) is imported, matched within the tolerance (PHP 1.00), each difference resolved, and approved by the Accounting Manager.	M	Bus.	Accounts > Insurer Reconciliation > Insurer Statements
BR-09-008	Exchange policy, premium and claim data with insurers' systems. Accepted when: an insurer mapping sends the issuance request and reads the answer; premium differences above the tolerance are flagged; claim statuses update claims by API or CSV file.	C	Bus.	Master > System Configuration > Insurer Integration

7.10 10 Commission, referrers and incentives

ID	Requirement and acceptance	Pri	Source	Met by
BR-10-001	Keep brokerage rates by insurer, product, line and policy type with dates. Accepted when: the most specific active rate applies; Find rate shows which rate a placement gets and why; the default is 15% (commission.default_rate).	M	Bus.	Master > Finance > Commission Rate Matrix
BR-10-002	Record commission income per insurer on each policy. Accepted when: each insurer's commission is a separate journal line.	M	IC	Posting rules; Premium Accounting Entries
BR-10-003	Pay agents and referrers their comsub only when the premium is collected. Accepted when: lines move Accrued, Eligible (on full payment), Approved (by another user), Paid; return premium claws back the comsub.	M	Bus.	Commission > Agents/Referrer Accounts
BR-10-004	Withhold tax on commission paid by payee type and ATC. Accepted when: WHT at 5% for agents and sub-agents and 10% for external referrers is posted at payout and appears on BIR Form 2307 and the QAP.	M	BIR	commission.wht_rate_by_type; Accounts > Tax
BR-10-005	Pay commission only to agents whose IC licence is in force. Accepted when: for the referrer types in compliance.licence_required_referrer_types, approval and payout are refused (block) or warned (warn) without a licence in force on the day, with the reason on the referrer account.	M	IC	Compliance > Insurance Commission > Licence Register; compliance.referrer_licence_check
BR-10-006	Pay commission by voucher, in bulk or by bank file, with a bank account on file. Accepted when: Generate payout creates the voucher; a referrer without a bank account cannot be paid.	M	Bus.	Agents/Referrer Accounts; Disbursement
BR-10-007	Compute overriding, profit and contingent commission from insurer agreements. Accepted when: an agreement with tiers on production, loss ratio or growth is computed per period (OVC-), approved by a second user, invoiced and settled against the insurer's statement.	S	Bus.	Commission > Insurer Overrides
BR-10-008	Run incentive programmes for account executives. Accepted when: programmes with targets are calculated per period, approved by another user and shown on the statement.	C	Bus.	Accounts > Incentive; Master > Finance > Incentive Programs

ID	Requirement and acceptance	Pri	Source	Met by
BR-10-009	Show commission to the people who earn and pay it. Accepted when: the Commission Dashboard and the Broker Commission Statement show income, comsub, margin, payable and WHT.	S	Bus.	Commission > Commission Dashboard

7.11 11 Claims assistance

ID	Requirement and acceptance	Pri	Source	Met by
BR-11-001	Register a claim under the policy with incident, driver, third party and documents. Accepted when: the claim (CLM-) is refused for a loss date outside the policy period or in the future and while premium is unpaid.	M	Bus.	Operations > Policy > Claim
BR-11-002	Advise the insurer at once. Accepted when: the Preliminary Loss Advice is e-mailed to the insurer when the claim is saved.	M	Bus.	claims.pla_enabled
BR-11-003	Collect the documents each claim needs and remind the claimant. Accepted when: the checklist comes from the master by line and claim type; documents are received or waived; reminders are sent; submission to the insurer is refused while a required document is missing.	S	Bus.	Operations > Claim Documents; Master > Insurance > Claim Document Checklist
BR-11-004	Follow the adjuster, the insurer's claim number and the handling time. Accepted when: the adjuster report is recorded; claims past 20 days (claims.sla_days) are overdue on the Claims Dashboard; Claims Position and Claims Ageing report them.	M	Bus.	Operations > Claims; Claims Dashboard
BR-11-005	Approve settlements by a second Claims user and print the claim letters. Accepted when: the maker cannot approve; the letters print on the letterhead.	M	Bus.	Claims (Settlement, approval)
BR-11-006	Handle motor repairs with estimates and letters of authority. Accepted when: estimates of accredited shops are approved by the adjuster; the LOA shows the participation and depreciation; supplementary estimates get supplementary letters; the vehicle release is recorded.	S	Bus.	Operations > Motor Claim Repairs; Master > Insurance > Repair Shops
BR-11-007	Pay claims through the broker. Accepted when: settlement books the amount recoverable per insurer and payable to the claimant; Accounting records the funds and pays the claimant with a CPV and the release and quitclaim.	S	Bus.	Accounts > Claims Settlements
BR-11-008	Show each co-insurer's share of claims and settlements. Accepted when: a co-insured claim shows each insurer's share.	M	Bus.	Claims
BR-11-009	Keep claimants informed. Accepted when: status changes in messaging.claim_update_statuses send an SMS when the connector is live.	C	NPC	Message Templates (CLAIM_UPDATE)

7.12 12 Accounting, general ledger, period end and audit

ID	Requirement and acceptance	Pri	Source	Met by
BR-12-001	Keep a double-entry ledger fed by every business event. Accepted when: each event posts a balanced journal from its posting rule; each journal points to its source document; unbalanced journals, inactive accounts and closed periods are refused.	M	BIR	Master > Finance > Posting Rules, Account Determination, Accounting Flow
BR-12-002	Change posting rules and account determination only with a second user's approval. Accepted when: a change waits on Configuration	M	Bus.	Master > Finance > Configuration Approvals

ID	Requirement and acceptance	Pri	Source	Met by
	Approvals; the requester cannot approve; Simulate shows the journal before approval.			
BR-12-003	Use a Philippine broker chart of accounts with a premium trust account. Accepted when: the delivered chart includes Cash in Bank - Premium Trust Account and separate payables to insurers per premium tax.	M	IC	Master > Finance > Main Account, Sub Account
BR-12-004	Post manual, correction and reversal journals under approval. Accepted when: each needs a second user (journal.require_approval); a soft-closed period accepts only the Accounting Manager.	M	Bus.	Accounts > Journal Voucher, Correction JV, Reversal JV
BR-12-005	Pay by payment voucher and cheque, and run petty cash, with maker-checker. Accepted when: vouchers move Draft, For approval, Approved, Paid; the maker cannot approve; petty cash requests need approval.	M	Bus.	Accounts > Disbursement; Petty Cash
BR-12-006	Record supplier invoices with input VAT and EWT, and pay suppliers. Accepted when: an invoice approved by another user posts expense, input VAT, EWT and payable; one invoice number per supplier; AP ageing by due date.	S	BIR	Accounts > Payables
BR-12-007	Keep a fixed asset register with monthly depreciation. Accepted when: assets from supplier invoices or registered by hand are depreciated straight-line once per period, also as a step of the month-end close; a sale or write-off posts the disposal journal (gain or loss), issues the sales invoice to the buyer and prints the disposal voucher, and the disposal register lists the period's disposals.	S	BIR	Accounts > Fixed Assets; Accounts > Fixed Assets > Disposals; Master > Finance > Asset Classes
BR-12-008	Reconcile each bank account monthly. Accepted when: statements are imported (balanced, no duplicates), auto-matched, adjusted, and the reconciliation (difference PHP 0.00) is approved by the Accounting Manager.	M	Bus.	Accounts > Bank Reconciliation
BR-12-009	Close each month with a checklist and approval. Accepted when: the close run executes accruals, recurring journals, deferral, FX revaluation and depreciation, the checklist passes or is signed off, and the Accounting Manager approves.	M	Bus.	Accounts > Period End > Month-End Close
BR-12-010	Close the year and carry balances forward. Accepted when: closing entries post in period 13, opening balances of the next year are written, periods are locked; reversible until the first period of the next year closes.	M	BIR	Accounts > Period End > Year-End Close
BR-12-011	Produce financial statements for any dates. Accepted when: income statement, balance sheet and trial balance (opening, movement, closing) export to Excel and PDF.	M	IC	Accounts > Period End > Financial Statements; Reports
BR-12-012	Handle multi-currency transactions. Accepted when: foreign currency balances are revalued at month end with the exchange rates of the master.	C	Bus.	Master > Finance > Currency, Exchange Rate; Month-End Close

7.13 13 Taxes and BIR compliance

ID	Requirement and acceptance	Pri	Source	Met by
BR-13-001	Keep tax codes with rate, ATC, GL account and effective dates. Accepted when: VAT, EWT, final withholding, DST, LGT and premium tax codes are maintained and used by the postings.	M	BIR	Master > Finance > Taxation
BR-13-002	Book output VAT on commission and produce the VAT working paper. Accepted when: the VAT Summary gives vatable revenue, output and input VAT and net VAT per month or quarter.	M	BIR	Accounts > Tax > VAT Summary

ID	Requirement and acceptance	Pri	Source	Met by
BR-13-003	Produce the percentage tax working paper for a non-VAT broker or agent. Accepted when: 2551Q shows gross sales per month at <code>bir.percentage_tax_rate</code> (3%) with print, Excel and filing record.	S	BIR	Accounts > Tax > Percentage Tax 2551Q
BR-13-004	Issue BIR Form 2307 for tax withheld and track forms received. Accepted when: certificates per payee and quarter (CWT-) print on the BIR layout; forms received from insurers are listed; SAWT is produced; the certificates for the expanded withholding tax withheld from suppliers are issued per supplier and quarter from the supplier invoices (ATC of the tax code) and printed on the same layout.	M	BIR	Accounts > Tax > BIR Form 2307, SAWT; Accounts > Payables > Supplier 2307
BR-13-005	Prepare 0619-E and 1601-EQ on the BIR layout, reconciled with the ledger. Accepted when: the returns show Part I and II by ATC, less earlier remittances, reconcile with the QAP and the withholding accounts, print and export, and keep the filing record.	M	BIR	Accounts > Tax > Withholding Returns
BR-13-006	Prepare the annual information return 1604-E with the alphalist. Accepted when: schedules 3 and 4 and the DAT file are produced.	M	BIR	Accounts > Tax > Annual Alphalist 1604-E
BR-13-007	Produce the alphalists and SLSP with their DAT files. Accepted when: QAP, SAWT, SLSP sales and purchases and 1604-E DAT files follow the BIR layouts, with warnings for missing TINs.	M	BIR	Accounts > Tax > BIR DAT Files, QAP, SLSP
BR-13-008	Issue sales invoices under the EOPT Act. Accepted when: invoices for debit notes, overriding commission, broker-billed commission and fees carry every required field, are numbered within the registered serial range, cancelled with a reason, and payments are acknowledged by a supplementary document.	M	BIR	Accounts > Tax > Sales Invoices
BR-13-009	Support the registration of the computerized accounting system. Accepted when: the loose-leaf books print per month with running page numbers and a print register; the system description, backup procedure and audit trail extract are produced.	M	BIR	Accounts > Tax > CAS Books and Documents
BR-13-010	Report invoices to the BIR Electronic Invoicing System when required. Accepted when: invoices queue to the EIS with retry, test mode works without network, payloads can be exported for a manual upload.	C	BIR	Accounts > Tax > E-Invoicing (EIS)
BR-13-011	Apply the premium taxes billed to the client and passed to the insurer. Accepted when: DST, VAT or premium tax, LGT by city or municipality and FST are booked to their own payables per insurer (<code>accounting.split_premium_taxes</code>).	M	BIR	Premium Taxes & LGU Rates; posting rules

7.14 14 Insurance Commission and Data Privacy compliance

ID	Requirement and acceptance	Pri	Source	Met by
BR-14-001	Track the licences of the firm, its officers and agents and their renewals. Accepted when: licences show Valid, Expiring (90 days), Expired; renewals are recorded as new terms; reminders go out at 90, 60, 30, 15 and 7 days; the expiry calendar covers 12 months.	M	IC	Compliance > Insurance Commission > Licence Register
BR-14-002	Keep fit and proper records of directors and officers. Accepted when: declarations are answered, documents attached, the review outcome recorded and the next review due 12 months later is reminded.	M	IC	Compliance > Insurance Commission > Fit and Proper
BR-14-003	Prepare the IC annual statement from the ledger. Accepted when: the workbook gives the cover,	M	IC	Compliance > Insurance

ID	Requirement and acceptance	Pri	Source	Met by
	balance sheet, income statement, premiums and commission by insurer and line, premiums held in trust, the checks and the accountant confirmation sheet, with a configurable account mapping.			Commission > IC Annual Statement
BR-14-004	Report premiums placed by insurer and IC line. Accepted when: the IC Production Report gives premiums by insurer and line by month, quarter or year, with the detail, in Excel.	M	IC	Compliance > Insurance Commission > IC Production Report
BR-14-005	Handle complaints within set periods (RA 11765). Accepted when: complaints (CMP-) get acknowledgement (2 days) and resolution (7 or 45 days) deadlines, reminders, automatic escalation, letters, IC referral and a regulator report.	M	IC	Compliance > Insurance Commission > Complaints
BR-14-006	Keep records of business available for IC examination with the licence number on documents. Accepted when: placements, policies, endorsements, claims and renewals are numbered and audited; the licence number prints on documents.	M	IC	Company master; Audit Trail; reports
BR-14-007	Hold premium collected for insurers apart from own funds. Accepted when: premiums payable to insurers are separate from commission income; the IC annual statement checks premiums held against the trust account.	M	IC	Chart of accounts; IC Annual Statement
BR-14-008	Answer data subject requests on time. Accepted when: requests (DSR-) are due 15 days after receipt; personal data exports in JSON or Excel; anonymisation runs a dry run and is refused while records must be kept.	M	NPC	Master > Data Privacy > Data Subject Requests
BR-14-009	Keep a breach register and meet the 72-hour notification. Accepted when: incidents (PDB-) are assessed against the NPC criteria, the clock and reminders run, NPC and data subject notifications are recorded, and the annual report is produced.	M	NPC	Compliance > Data Privacy (NPC) > Breach Register
BR-14-010	Mask personal identifiers by role on screens and exports. Accepted when: users without view:pii see TIN, ID numbers, mobile, e-mail, bank account and birth date partially masked in lists, views, Excel, CSV and PDF; unmasking on request is audited.	M	NPC	privacy.masking_enabled, privacy.pii_reveal_mode; Role Permissions
BR-14-011	Encrypt TIN, ID numbers and bank account numbers at rest. Accepted when: these fields are stored encrypted with the environment key (PII_ENCRYPTION_KEY) while an exact-value search still finds them.	M	NPC	Field encryption; deploy/REFERENCE.md key rotation
BR-14-012	Never use real personal data in test, training or support copies. Accepted when: a production copy is masked with the masking command before use, verified, and the evidence approved by the DPO.	M	NPC	npm run mask:data (docs/onboarding/DATA_MASKING.md)
BR-14-013	Keep personal data only as long as needed. Accepted when: operational logs are deleted after their retention days; business records are kept; anonymisation is allowed after privacy.retention_years (10).	M	NPC	Housekeeping job; Data Subject Requests
BR-14-014	Host in the Philippines when the broker requires it. Accepted when: the deployment options include a Philippine partner data centre or on-premise.	S	NPC	Deployment options

7.15 15 Reporting, administration, security and go-live

ID	Requirement and acceptance	Pri	Source	Met by
BR-15-001	Run every report from one screen in Excel, CSV and PDF. Accepted when: the 39 catalogue reports run with criteria, preview and download up to 50,000 rows; PDFs print on the letterhead; the daily reports are	M	Bus.	Reports > All Reports

ID	Requirement and acceptance	Pri	Source	Met by
	produced at 05:00.			
BR-15-002	Give each role its dashboard. Accepted when: Executive, Sales, Processing, Claims and Commission dashboards show live figures; migrated policies are not counted as premium written.	M	Bus.	Dashboard menu
BR-15-003	Answer ad hoc questions without new programming, and feed a BI tool. Accepted when: the Report Builder builds, saves and shares reports on curated datasets within the user's data scope; the BI extract writes one CSV per dataset daily.	S	Bus.	Reports > Report Builder
BR-15-004	Control access by role, deny by default, checked on every server action. Accepted when: a screen outside the role is refused even by its address.	M	NPC	Master > Users and Access
BR-15-005	Apply maker-checker, authority limits, delegations, SoD and access reviews. Accepted when: the controls of the user manual's maker-checker table hold; SoD blocks conflicting roles; quarterly access reviews are recorded.	M	Bus.	Authority Matrix, Delegations, Segregation of Duties, Access Reviews
BR-15-006	Enforce password rules, lockout and two-step verification. Accepted when: 8 characters with four classes, history 5, expiry 90 days, lockout after 5 failures, idle sign-out after 30 minutes, two-step verification for the roles in security.require_2fa_roles.	M	NPC	Sign-in; My Profile; Configuration (Security & Access)
BR-15-007	Keep an audit trail with before and after values that administrators can search. Accepted when: Master > Audit Trail finds actions by record type, record ID, user and dates.	M	NPC	Master > System > Audit Trail
BR-15-008	Organise the menu by role and task with help on every screen. Accepted when: the side menu groups Master in sections; F1 opens the Help panel with the manual section of the screen and the support contacts.	S	Bus.	Side menu; Help panel
BR-15-009	Number every document from controlled series. Accepted when: each series has prefix, format, digits, reset and next number; the counter only moves forward.	M	BIR	Master > System > Document Numbering
BR-15-010	Brand the system, documents, reports and e-mails for the broker, with e-signatures. Accepted when: the theme, logo, sign-in picture, document and e-mail branding are saved after the contrast check; signatures captured with consent print on the mapped documents; brand packs move branding between environments.	S	Bus.	Master > System Settings > Theme and Branding; My Profile > My e-signature
BR-15-011	Use Philippine reference masters. Accepted when: regions, provinces, cities and municipalities with ZIP codes and barangays of the PSGC, banks, ID types, salutations, holidays and the IC insurer list are delivered.	M	Bus.	Master > Location; other masters
BR-15-012	Load the go-live configuration and migration with validation and reconciliation. Accepted when: the two workbooks validate as a trial run, give an errors workbook, load in one transaction and reconcile the migrated totals; the go-live lock ends the migration.	M	Bus.	Master > Go-Live and Data > Go-Live Data Load
BR-15-013	Prove that two environments hold the same configuration. Accepted when: Compare environments returns Mirrored or the differences field by field, with environment-specific fields listed apart; a comparison workbook is kept.	S	Bus.	Go-Live Data Load > Compare environments; npm run compare:environments
BR-15-014	Remove test transactions before go-live without touching the configuration. Accepted when: the transaction reset empties business records and keeps masters, settings and users, and refuses to run once goLive.locked is on.	M	Bus.	npm run reset:transactions
BR-15-015	Connect to third parties with test mode and monitoring.	S	Bus.	Master > System > Integrations

ID	Requirement and acceptance	Pri	Source	Met by
	Accepted when: each connector shows its mode, credentials (by environment variable name), outbox, inbox, retries and resend; test mode works with nothing leaving the system.			
BR-15-016	Send e-mails and in-app notifications for every action and approval. Accepted when: approval requests go to the users who may approve; e-mails queue in the outbox with their PDF attachments and are retried.	M	Bus.	Notifications; Master > System > E-mail Outbox
BR-15-017	Release changes through controlled environments. Accepted when: the same build moves Dev, SIT, UAT, Pre-Prod, Production with approvals, backup, forward-only migrations, smoke test and rollback.	M	Bus.	deploy/ RELEASE_PIPELINE.m d

8. Non-functional requirements

ID	Requirement and acceptance	Pri	Source	Met by
NFR-01-01	Security: named users with hashed passwords, rate-limited sign-in, sessions ended on password or role change. Accepted when: the sign-in tests of the release test pass.	M	NPC	Authentication module
NFR-01-02	Security: application controls against the OWASP Top 10 (parameterised SQL, validation, security headers, upload type check by content, signed document links of 30 minutes, CSV formula-injection guard). Accepted when: the security tests pass and the API refuses to start with weak secrets.	M	NPC	Architecture, Infrastructure, Security and Privacy
NFR-02-01	Privacy: personal identifiers masked by role and encrypted at rest; consent and data subject rights supported. Accepted when: BR-14-008 to BR-14-013 pass.	M	NPC	Privacy and compliance modules
NFR-03-01	Availability: stateless API on two or more instances, jobs run once across instances, health checks. Accepted when: /api/health reports the database and pending migrations; an instance failure does not stop the service.	S	Bus.	Deployment
NFR-03-02	Recovery: automated backups with point-in-time restore, recovery objectives agreed (recommended RPO 15 minutes or less and RTO 4 hours or less for logical corruption). Accepted when: a restore test is done before go-live.	M	Bus.	Business Continuity and Disaster Recovery Plan
NFR-04-01	Performance: screens open within 3 seconds for the reference load (200 named users, 80 concurrent, 50,000 policies a year). Accepted when: a load test on the production-sized environment meets it (recommended before go-live).	S	Bus.	Release test; load test
NFR-04-02	Capacity: reports up to 50,000 rows per file; imports up to 20,000 rows; lists paged by the server. Accepted when: a report and an import at the limits complete.	S	Bus.	Reports; uploads
NFR-05-01	Audit: every create, update, approval, report run and sign-in recorded with user, time, IP and before and after values, never deleted by housekeeping. Accepted when: the audit trail shows the maker and checker of a sample of approvals.	M	BIR	Audit Trail
NFR-05-02	Document control: financial documents cancelled or reversed, never deleted. Accepted when: no delete is offered on receipts, vouchers, journals or policies.	M	BIR	All finance screens
NFR-06-01	Usability: browser application, English screens, Philippine formats for money (PHP), dates (DD/MM/YYYY), mobile numbers, ZIP codes and IDs, Asia/Manila time; skeleton loading and Help on every screen. Accepted when: UAT users complete their scripts without workarounds.	M	Bus.	Front end
NFR-07-01	Maintainability: forward-only migrations, automated tests on every pull request, OpenAPI documentation of the API. Accepted when: CI passes on the release tag.	S	Bus.	Technical Reference
NFR-08-01	Data residency and outsourcing: the hosting location is agreed and documented; a Philippine option is available. Accepted when: the Order Form names the hosting option and the data processing agreement is signed.	M	NPC	Hosting Agreement; Data Processing Agreement
NFR-09-01	Configurability: business parameters in Master > Configuration applied at once and audited; posting configuration under second-user approval. Accepted when: a setting change shows in the audit trail with old and new value.	M	Bus.	Master > Configuration

9. Functional specification by module

No separate functional specification is issued for BrokerVerse OOTB: this chapter is it. For each module it gives the records and their numbers, the main fields, the rules and validations the server applies, the statuses and the settings (Master > Configuration key and delivered value). The User Manual gives the screen-by-screen procedure and the messages; the Data Dictionary gives every table and column.

9.1 Common rules

Topic	Rule
Permissions	Every menu item and API action needs a permission (read:, write:, approve:, view:pII); roles hold permissions (Master > Users and Access > Role Permissions); deny by default
Data scope	Roles in security.scoped_roles see only their own records (prospects, quotations, policies, commission)
Numbering	{PREFIX}-{YYYY}-{SEQ} with five digits, reset every calendar year, from Master > Document Numbering; tokens {PREFIX}, {YYYY}, {YY}, {MM}, {FY}, {BRANCH}, {LOB}, {SEQ}; the counter only moves forward; a prefix used by another active series is refused
Money and dates	PHP with two decimals; each tax rounded on its own; dates shown DD/MM/YYYY (general.date_format) in Asia/Manila (general.timezone)
Philippine formats	Mobile 0917 123 4567 or +63 917 123 4567; landline with area code; ZIP code 4 digits; TIN 9 to 12 digits with branch code
Lists	Server paging 20, 50 or 100 rows; search and filters apply to the whole list; export where offered
Uploads	Images and PDF checked by content (uploads.allowed_types); claim documents 2 MB; policy documents 10 MB; bulk files .xlsx or .csv up to 10 MB and 20,000 rows (receipts 1,000, limits.bulk_upload_max_rows)
Maker-checker	The maker of a record cannot approve it (quotation, renewal terms, settlement, journal, voucher, payout, remittance, debit note, incentive batch, close, reconciliation, posting configuration, treaty, EDD, supplier invoice, override computation, bank file batch)
Authority Matrix	Largest amount or percentage per role and transaction type (access.authority_enforced true); personal limits; changes approved by a second administrator; delegations by date range
Audit	Create, update, approval, report run and sign-in recorded with before and after values; housekeeping.audit_log_days 0 keeps them
Masking	Users without view:pII see TIN, ID numbers, mobile, e-mail, bank account and birth date masked (privacy.masking_enabled); privacy.pII_reveal_mode on-request records each unmasking

9.2 Prospects, lead assignment and channels

Item	Specification
Records	Prospect LD-; assignment history; assignment rule; distribution channel
Fields	Category (Retail, Corporate), first and last name, preferred name, date of birth, gender, e-mail, mobile, country, province, city, barangay, street, ZIP code; corporate: company name, TIN; line; distribution channel; source
Validations	Age between leads.min_age_years and leads.max_age_years (18 to 100); Philippine mobile; ZIP 4 digits; corporate TIN required
Statuses	New, Contacted, Qualified, QuoteGenerated, Converted, Lost
Assignment	Rules by priority; methods round robin, fewest open prospects, fixed; conditions line, channel, province, city, branch, source, category; active users only; leads.assignment_enabled, leads.assignment_fallback (creator or queue), leads.assignment_sla_hours, leads.assignment_notify; job lead-assignment-sla
Channels	Types dealer group, dealer branch, financing bank, bank branch, affinity partner; branch belongs to its group or bank; referrer and comsub %; bank mortgagee clause with {{bankName}}; a used channel is made inactive, not

Item	Specification
	deleted; channels.inherit_from_lead
Permissions	read:leads, write:leads, read/write:lead-assignment, read/write:channels

9.3 Quotations, Quick Quote and comparison

Item	Specification
Records	Quotation and Quotation Slip QT-; comparison report; payment link PL-
Motor wizard	Policy and vehicle details (co-insurance, insurer, policy type Comprehensive, Own Damage / Theft or Third Party Liability, referrer, payment type, vehicle class, brand, model, variant, model year within 20 years up to next year, colour, seats 1 to 99); plan; covers with Calculate; accessories and limits; order summary with discount, referrer, signatory
Pricing	Server re-pricing on save; net premium = sum of covers without CTPL; VAT 12% on the net premium for VAT-regime products; DST PHP 0.50 per PHP 4.00 or fraction; LGT 0.75% or the city rate; CTPL tariff, never taxed again or discounted; gross = net + taxes + CTPL + other - discount; brokerage from the Commission Rate Matrix, insurer default, then commission.default_rate 15%; comsub by level (commission.comsub_rate_by_level L1 8%, L2 5%)
Product rules	Governing template (record's template, motor.pricing_template_code, newest active of the product or line); acceptance rules on risk fields (vehicle age, use, class, sum insured, fair market value, driver age, claims in 3 years, NCB years, fleet size, members, modifications, flood-prone, construction) with operators and actions Auto-Accept, Refer, Decline, Apply Loading, per insurer or all; rating factors multiplicative, discount or additive; referral approved within the Underwriting referral limit
Statuses	Draft, Pending Customer, Customer Accepted, Approved, Rejected, Dropped, Expired, Converted to Policy; customer response Accepted, Declined, Revise (quotations.customer_response_status)
Rules	Validity limits.quote_validity_days 30 (Quotation expiry job 00:30); approval link quotations.approval_link_ttl_hours 168; maker-checker workflow.quote_maker_checker; discount within the Authority Matrix; only Draft can be sent
Comparison report	Source a request for quotation or two or more quotations of the same party; options ranked by total premium; recommendation and reasons (comparison.default_reasons); disclaimer; never commission; client choice closes it as Accepted

9.4 Requests for quotation, placement and cover notes

Item	Specification
Records	Broker slip BS-, offer OFR-, placement slip PS-, cover note CVN-
Broker slip	Customer (client, prospect, new prospect), product, insured, inception, expiry, response due, risk details (item and value), covers (sum insured, deductible), insurers to approach (required), remarks; statuses Draft, Submitted, Responses in, Closed, Cancelled
Offers	Pending, Offered, Declined; net premium (100%), rate or derived, line offered, taxes and gross or computed, valid until, deductibles, special terms, insurer reference, offer letter
Placement	Participants with share above 0%, each insurer once, exactly one lead, shares total exactly 100%; statuses Draft, Sent to insurer, Bound, Declined, Policy issued, Cancelled; sources From quotation slip, From broker slip, Direct placement, Recorded policy
Journey	placement.journey per line: each step Required, Optional or Not used; placement.journey_applies_to_renewals
Checks	Insurer authority at submission, firm order and issue (compliance.insurer_authority_check warn, block or off); product market (product.market_panel_enforced); acceptance rules per insurer
Cover notes	From quotations in cover_note.quote_statuses or slips in cover_note.placement_statuses without a policy or active cover note; period

Item	Specification
	cover_note.validity_days 30, at most cover_note.max_validity_days; wording cover_note.wording; statuses Active, Superseded, Expired, Cancelled; reminder cover_note.reminder_days_before 7 days

9.5 Policies, CTPL and documents

Item	Specification
Records	Policy POL-, client CL-, bill INV-, journal JV-, COC series, CTPL cover
Issue	From a bound slip, an accepted quotation or Record Issued Policy; client created from the prospect; participants copied; billing mode broker billed or direct bill (direct_bill.default_billing_mode)
KYC	policy.kyc_required_fields (motor by default); policy.kyc_id_types; vehicle photos left, right, front, rear, interior
Statuses	Active, Expired (00:15 job), Renewed, Lapsed (renewals.grace_period_days 30), Cancelled; payment Pending, Reviewing, Partial, Completed, Refunded
CTPL	COC series per insurer and branch (prefix, range, digits, no overlap, low-stock warning, Used up); allocation at issue (ctpl.register_on_issue); authentication (ctpl.authenticate_on_issue); vehicle ids required (ctpl.require_vehicle_ids); alert after ctpl.unauthenticated_alert_hours 24; keyed-in code; LTO feed ctpl.lto_feed
Documents	PDFs on the letterhead of the letterhead company with the theme's print colours and footer; product document templates (print as policy schedule, CTPL certificate, quotation slip, member enrolment) with a text layout of merge fields ({{PolicyNumber}}, {{InsuredName}} and others) and blocks ({{#Premium}}), unknown names refused; signature slots per document type
E-signatures	Signatory signatures captured by an administrator, user signatures only by the user; consent statement (signatures.consent_text_user, signatures.consent_text_signatory); versions with effective dates; revocation with reason; drafts print UNSIGNED DRAFT (signatures.draft_watermark)

9.6 Dealer programmes, fleets and marine open covers

Item	Specification
Dealer programmes	Dealer, financing bank, insurer, OD and AoN rates, excess BI and PD, default class, CTPL included and years, free first year or subsidy (dealer or bank; percent, fixed or full), upload creates quotation or policy, effective dates; upload rows checked (required fields, class, chassis unique); one bill per payer; bank letter (motor_programmes.email_bank_letter, motor_programmes.bank_letter_subject, motor_programmes.bank_letter_body)
Fleet	Client, insurer, period, rates; vehicles with plate or conduction sticker, chassis, engine, make, model, year, colour, class, usage, sum insured, mortgagee; at least fleet.minimum_vehicles; upload up to fleet.max_upload_rows; changes pro-rata (fleet.pro_rata_basis), return premium on delete (fleet.return_premium_on_delete)
Marine open cover	Goods, voyages, clauses, conveyances (marine.conveyances) with rate and limit, mark-up (marine.default_markup_percent), minimum premium, declaration frequency; certificate wording marine.certificate_wording; declarations due marine.declaration_due_days; nil declarations allowed

9.7 Endorsements and cancellations

Item	Specification
Records	Endorsement END-; cancellation endorsement; short-period rate scale; cancellation reasons (initiated by insured or insurer, method)
Types	Motor: Personal Details Change, Motor Details Change, Coverage Change, Policy Extend, Policy Cancel; Fire: regular or premium change, cancellation

Item	Specification
	full, partial, pro-rata, pro-rata partial
Statuses	Draft, Pending Customer (Waiting for Update), Completed, Initiate Cancel, Cancelled, Rejected
Cancellation	endorsements.compute_cancellation_return true; pro-rata = net x days left / days of period; short-period (endorsements.short_period_for_insured) from Short-Period Rates scaled to a year; flat; part of cover by percent or amount; taxes returned per endorsements.cancellation_returned_taxes (DST not by default); recomputed on the server at completion
Postings	endorsement.additional_premium, endorsement.return_premium, policy.cancel, commission.clawback; refund due from insurer netted on its next remittance

9.8 Renewals

Item	Specification
Rules	Pipeline renewals.pipeline_days 90; notices limits.renewal_notice_days 60, 30, 15; grace renewals.grace_period_days 30; lapsed renewal renewals.lapsed_renewal_days 90; batch up to renewals.batch_max_policies 500 within renewals.batch_window_days 30; re-rating renewals.rating_rates, claims loading 10% per claim up to 30%, loyalty 2% per renewal up to 10%; maker-checker renewals.maker_checker, approvers renewals.approver_roles; billing renewals.create_receivable
Risk score	Weights renewals.risk_weights (claims 25, unpaid premium 20, increase above 10% 20, first renewal 15, expiry within 15 days 10, no contact 10); levels renewals.risk_thresholds 30, 55, 75
Statuses	Pending, First Notice Sent, Second Notice Sent, Final Notice Sent, Quote Sent, Approved, Renewed, Lapsed

9.9 Receipts, collections, credit control and post-dated cheques

Item	Specification
Records	Receipt OR- and RT-, acknowledgement receipt AR-, instalment plan, PDC, payment link PL-
Receipt fields	Receipt date and type (Payment, Refund), branch, department, customer, policy, currency, transaction code OR, receipt mode and reference, bill and amount, remarks
Rules	Amount not above the bill balance; posting receipt.apply; commission eligible on full payment (commission.auto_eligible_on_full_payment); e-mail on record (receipts.email_on_record); title receipts.document_title; bulk upload up to 1,000 rows
Collections	Due date from the insurer's warranty or collections.default_credit_days 30; buckets Current, 1-30, 31-60, 61-90, over 90; reminders collections.reminder_days_before 7 and collections.reminder_repeat_days 7 at 08:00; statuses Pending, Committed, Overdue
Instalments	4 proposed, up to 12; monthly, quarterly, semi-annual; payments applied in order; invoices per instalment (credit.instalment_invoices_on_save) before any payment; an invoiced plan cannot be cancelled
Warranty and limits	At risk 7 days before the warranty; extension up to credit.max_warranty_extension_days 90 after inception, approved by the Accounting Manager; credit limit exceptions acknowledged
PDC	Cheques on hand not above the bill balance; due window pdc.due_window_days 3; deposit creates the OR on the bank account (pdc.default_deposit_account); bounced reverses the receipt, reopens the bill and e-mails the client (pdc.notify_client_on_bounce); replace, return, cancel

9.10 Remittance, direct bill, bank files and insurer reconciliation

Item	Specification
Records	Remittance REM-, settlement SET-, adjustment ADJ-, payment voucher PV- and DT-, debit note DN-, bank payment batch BPB-, insurer statement ISR-
Remittance	Due date from the insurer's remittance terms or <code>remittance.default_due_days</code> 30; approvals within the Authority Matrix (Remittance approval, Remittance settlement); bank reconciliation tolerance <code>remittance.reconciliation_tolerance</code> PHP 0.50; schedules run by <code>remittance-schedules</code>
Direct bill	Commission + VAT 12% (<code>direct_bill.commission_vat_code</code> VAT12-OUT); EWT 10% (<code>direct_bill.insurer_ewt_rate</code> , code WC139); due <code>direct_bill.debit_note_due_days</code> 30; statuses Draft, Pending Approval, Open, Partially Collected, Collected; billing mode change refused after collection, remittance or debit note
Bank files	Layouts delimited or fixed width with header, payment and trailer records and a status file; starter layouts BDO, BPI, Metrobank, Landbank, UnionBank and generic CSV in test mode until validated; channels bulk credit, InstaPay (<code>bank_payments.instapay_limit</code> PHP 50,000), PESONet; payee bank accounts; approver not the maker of the batch or its vouchers and within the payment voucher limit
Insurer statements	Statement types premium remittance confirmation and commission statement; formats per insurer; tolerance <code>insurer_reconciliation.amount_tolerance</code> PHP 1.00; all differences resolved before submission (<code>insurer_reconciliation.require_resolved</code>); approval by the Accounting Manager

9.11 Commission, insurer overrides and incentives

Item	Specification
Records	Commission line; payout PV-; override agreement and computation OVC-; incentive programme INC-, calculation CALC-
Rules	Statuses Accrued, Eligible, Approved, Paid, Reversed; <code>commission.require_full_payment</code> ; <code>commission.require_bank_account</code> ; WHT <code>commission.wht_rate_by_type</code> (Agent 5%, Sub-agent 5%, External 10%), ATC <code>bir.atc_by_payee</code> ; licence check <code>compliance.referrer_licence_check</code> block for <code>compliance.licence_required_referrer_types</code>
Overrides	Types Overriding, Profit, Contingent; basis production volume, loss ratio, growth; period monthly to annual; premium net or gross; tiers slab or banded; claims statuses <code>commission.override_claims_statuses</code> ; approval <code>commission.override_requires_approval</code> ; settlement tolerance <code>commission.override_settlement_tolerance</code> ; postings <code>override_commission.accrual</code> and settlement
Incentives	Types Target Based, Commission Based, Hybrid, Contest; eligible roles <code>incentive.eligible_roles</code> ; batches approved by another user; postings <code>incentive.accrual</code> , <code>incentive.payout</code>

9.12 Claims

Item	Specification
Records	Claim CLM-, LOA-, claim payment voucher CPV-
Fields	Date and time of incident, location, city, province, cause (<code>claims.loss_causes</code>), estimate, insurer claim number, driver (motor, <code>claims.lob_fields</code>), third party; adjuster, dates, place; settlement type (<code>claims.settlement_types</code>), amount, issue and settlement dates
Validations	Loss date in the policy period and not in the future (<code>claims.validate_loss_date</code>); premium paid (<code>claims.block_unpaid_premium</code>); reported date not before the loss date; settlement amount above zero; settlement date not before the issue date

Item	Specification
Statuses	Pending, Processing, Pending Approval, Approved, Settled, Rejected, Closed
Rules	PLA e-mail (claims.pla_enabled); due date claims.sla_days 20; maker-checker claims.settlement_maker_checker; auto settle claims.auto_settle_on_approval; documents checklist, reminders claims.document_reminder_days 3, submission rule claims.require_documents_before_submission
Motor repairs	Estimates of active accredited shops; one estimate waiting at a time; approved amount at most the estimate; participation motor_claims.participation (PHP 2,000 or 0.5% of the sum insured, whichever higher, original letter only); parts depreciation motor_claims.parts_depreciation_percent; LOA validity motor_claims.loa_validity_days
Paid through broker	claim.settlement.paid_through_broker, claim.funds_received (never above the insurer's share), claim.paid_to_claimant

9.13 Accounting, payables, fixed assets and period end

Item	Specification
Ledger	Posting rules per event with versions, effective dates, simulation and history; account roles mapped in Account Determination; changes approved on Configuration Approvals (accounting.configuration_maker_checker); premium taxes on own accounts (accounting.split_premium_taxes)
Journals	Must balance; approval journal.require_approval; correction and reversal of posted vouchers; write-off reasons with limits
Disbursement	Payee types Customer, Insurer, Agent/Referrer, Supplier; criteria Specific or Payall; statuses Draft, For approval, Approved, Paid, Cancelled; finance_maker_checker_enabled
Payables	Supplier TIN, VAT registration, EWT code, terms, default expense account; input VAT at payables.input_vat_code; EWT on the amount net of VAT; maker-checker payables_maker_checker; postings ap.invoice, ap.payment; asset lines registered on approval
Fixed assets	Asset classes with useful life and accounts; straight-line from fixed_assets.first_month; last month takes the rounding to salvage; once per asset and period; fa.depreciation; month-end step fixed_assets.depreciation_in_month_end
Bank reconciliation	Formats per bank; balanced statement (bank_reconciliation.require_balanced_statement); duplicates refused; auto-match on import, date window bank_reconciliation.date_window_days 5, groups up to bank_reconciliation.group_max_lines 6; stale cheques after bank_reconciliation.stale_cheque_days 180
Period end	Periods Open, Soft-closed, Closed, Locked; period 13 for year-end; close run steps accruals, recurring journals, commission deferral (accounting.defer_commission), FX revaluation, depreciation, checklist (blocking or warning, manual items); approval accounting.period_close_requires_approval; year-end reversible until the first period of the next year closes

9.14 Tax (BIR)

Item	Specification
Settings	bir.withholding_agent_tin, bir.registered_name, bir.registered_address, bir.zip_code, bir.tin_branch_code, bir.trade_name, bir.withholding_due_day 10, bir.withholding_ledger_accounts, bir.percentage_tax_rate 3, bir.percentage_tax_atc PT010, bir.sawt_form 1702Q, bir.atc_by_payee
Returns	0619-E, 1601-EQ (per ATC, less 0619-E), 1604-E (schedules 3 and 4), 2551Q; reconciliation with QAP and ledger; print, Excel; filing record with amended returns
DAT files	QAP, SAWT, SLSP sales, SLSP purchases, 1604-E; header, detail and control records; capitals in quotes; two decimals; CR LF
Sales invoices	Series SI- never reset, stopped at invoice.serial_to; ATP or CAS permit

Item	Specification
	(invoice.atp_number, invoice.cas_permit_number); buyer details from invoice.buyer_details_threshold 1,000; payment acknowledgement PAR-(invoice.payment_document_title, invoice.supplementary_note); postings sales_invoice.issue and payment for manual invoices
EIS	eis.enabled off; eis.mode test or live; endpoint and credential variable names; retry eis.retry_minutes doubled up to eis.max_attempts; rejection final
CAS	Books General Journal, General Ledger, Cash Receipts, Cash Disbursements, Sales, Purchase; cas.books_form loose-leaf; cas.enforce_print_order; print once, reprint marked REPRINT, void of the latest print with reason

9.15 AML/CFT

Item	Specification
Records	EDD review EDD-, alert AMA-, case AMC-, report file AMR-, screening list version, screening hit
Settings	aml.covered_threshold 500,000; aml.covered_aggregation banking-day; aml.covered_payment_modes cash; aml.ctr_due_working_days 5; aml.str_due_working_days 1; aml.match_threshold 0.85; aml.risk_low_max_score 2; aml.risk_high_min_score 8; aml.pep_always_high; aml.kyc_refresh_months 36, 24, 12; aml.kyc_refresh_notice_days 30; aml.beneficial_owner_threshold 25; aml.record_retention_years 5; aml.screening_block_events policy-issue, payout; aml.block_issue_pending_edd; aml.amlc_institution_code; aml.amlc_transaction_codes; aml.screening_provider
KYC statuses	Incomplete, Complete, EDD required, Refresh due, Blocked
Hit decisions	Clear (auto-cleared again later), Escalate (to a case), Confirm (Blocked, High)
Report file	BV-AMLC-TXN 1.0, pipe-delimited: H header, D detail per transaction, N narrative for STR, T trailer
Jobs	aml-transaction-monitoring (daily), aml-kyc-refresh-due (weekly), aml-provider-retry

9.16 IC compliance, complaints and data privacy

Item	Specification
Licences	Holder types firm, officer, licensed individual, agent or referrer; types compliance.licence_types; states Valid, Expiring (compliance.licence_expiring_days 90), Expired, No expiry date; renewal Filed with the IC; superseded on renewal; reminders compliance.licence_reminder_days 90, 60, 30, 15, 7
Fit and proper	Categories Director, Officer, Compliance officer, Key person; declarations compliance.fit_proper_declarations; outcome Fit and proper, Conditional, Not fit and proper; review every compliance.fit_proper_review_months 12; reminder compliance.fit_proper_reminder_days 30
Insurer authority	IC Certificate of Authority No. and Valid Until on the insurer; states Valid, Expiring (compliance.insurer_authority_expiring_days 60), Expired, No certificate, No validity date
IC reports	Annual statement form set compliance.ic_statement_form; account mapping by longest prefix; optional compliance.ic_minimum_net_worth; production report lines compliance.ic_lines_of_business and compliance.ic_line_map
Complaints	CMP-; channels and categories lists; simple or complex; complaints.ack_days 2, complaints.resolution_days_simple 7, complaints.resolution_days_complex 45; complaints.auto_escalate; letters complaints.ack_letter_text, complaints.resolution_letter_text; outcomes Upheld, Partially upheld, Not upheld, Withdrawn
Breaches	PDB-; nature confidentiality, integrity, availability; data categories privacy.breach_data_categories; privacy.breach_notify_hours 72; privacy.breach_reminder_hours 48, 24, 6; notifiable breach closed only after NPC notification
Data subject	DSR-; types Access, Rectification, Erasure or blocking, Objection, Data

Item	Specification
requests	portability, Withdraw consent; due privacy.request_due_days 15; export JSON or Excel; anonymisation refused while in force, open items or within privacy.retention_years 10
Consent	Purposes Processing, Marketing, Sharing with insurers; Given or Refused; channels Form, E-mail, Phone, Portal, In person; notice privacy.notice_version; SMS consent messaging.service_consent
Permissions	read:compliance, write:compliance, read:complaints, write:complaints, approve:complaints, read:privacy, write:privacy, read:aml, write:aml, approve:aml, view:pii

9.17 Administration, integrations, reports and go-live

Item	Specification
Users	Username, e-mail, display name, branch, designation, reporting to, roles; temporary password shown once; dormant after access.dormant_days 90; SoD Block or Warn; access reviews Keep or Revoke
Security settings	security.password_min_length 8; history security.password_history_count 5; expiry security.password_max_age_days 90; limits.max_login_attempts 5; security.login_rate_limit 10 in 5 minutes; limits.session_idle_minutes 30; security.require_2fa_roles; reset code 15 minutes, 5 attempts
My Work	Tabs My Items, My Team, My Tasks, Calendar; myWork.due_soon_days; myWork.auto_tasks; myWork.overdue_task_alert
Integrations	Connectors SMS_SEMAPHORE, SMS_GLOBE_LABS, SMS_GENERIC, VIBER_BUSINESS, CTPL_AUTH, LTO_FEED, INSURER_API, BANK_FILES; mode test or live (live refused without endpoint and credential variables); retry with backoff; signed inbound messages; job integration-outbox every 2 minutes; templates RENEWAL_NOTICE, PAYMENT_REMINDER, CLAIM_UPDATE, CTPL_AUTHENTICATED, RENEWAL_NOTICE_VIBER with consent check
Reports	39 catalogue reports; reports.max_rows 50,000; links 72 hours; files kept 90 days; Report Builder datasets Policies, Clients, Bills, Claims, Commissions with report_builder.preview_rows, report_builder.max_rows; BI extract bi.extract_datasets, bi.extract_folder, bi.extract_keep_runs
Branding	Theme presets and custom colours; WCAG AA contrast refused below 4.5:1 for the main pairs; safe font list; images uploaded (SVG without scripts); brand packs .zip or .json; a client brand pack carries the marks of a client of iorta TechNXT and is applied only in that client's environments, under the client's contract with iorta TechNXT, which covers the use of its marks there
Go-live data	Configuration and migration workbooks with Instructions and Lists sheets; row 2 sample; natural keys; trial run in a rolled-back transaction; load in one transaction; migration refused without goLive.cutover_date and after goLive.locked; reconciliation workbook; comparison of environments with environment-specific fields excluded
Release and masking	Pipeline ci, deploy, rollback; environments Dev, SIT, UAT, Pre-Prod, Production; transaction reset npm run reset:transactions refused after the go-live lock; masking npm run mask:data with the safety guards of the masking procedure

10. Assumptions, constraints and dependencies

10.1 Assumptions

- The broker uses the OOTB screens and adapts its procedures where they differ (configure first); a requirement not met by configuration is a gap handled by change request.
- The broker's compliance officer, DPO and tax adviser confirm the delivered settings (thresholds, deadlines, tax codes, ATC, rates, letter texts, IC lines, the IC statement form set) against the rules in force before go-live.
- The insurers confirm the motor tariff, the premium tax treatment and rounding they apply, and their statement and API formats.
- The broker provides the data of the migration workbook in the agreed form and signs the control figures.
- One fiscal year of opening balances is loaded; closed business stays in the old system.

10.2 Constraints

- Filings with the BIR, AMLC, IC and NPC are made outside BrokerVerse.
- Interfaces with partners (bank files, CTPL provider, LTO, insurer APIs, SMS and Viber, EIS, screening provider, payment gateways) need the partner's contract, credentials and certification; until then they run in test mode or by file.
- Secrets (database, e-mail, gateway, encryption key) are set in the environment's secret store, never on screen or in a workbook.
- Screens are in English.

10.3 Dependencies

- SMTP mailbox for e-mail; payment gateway merchant account; SMS gateway; CTPL authentication provider; bank file specifications; screening lists or provider.
- Hosting provisioned with backups before the first mock load; Pre-Prod for the rehearsal.
- Named key users, process owners and approvers available for workshops, UAT and sign-off.

11. Requirement summary

Area	Requirements	Must	Should	Could	IC	BIR	NP C	AML C
01 Client onboarding, KYC and AML	14	13	1	0	0	0	1	11
02 Prospecting and sales pipeline	10	2	7	1	0	0	1	0
03 Quotation and insurer comparison	10	6	3	1	2	1	0	0
04 RFQ, placement, co-insurance and reinsurance	11	6	2	3	3	0	0	0
05 Policy issuance, documents and motor	11	8	2	1	2	0	0	0
06 Endorsements and cancellations	8	7	1	0	2	2	0	0
07 Renewals and retention	8	3	4	1	0	0	1	0
08 Billing, collection, credit control and receipts	11	7	4	0	1	2	0	0
09 Remittance, direct bill and insurer reconciliation	8	5	1	2	2	1	0	0
10 Commission, referrers and incentives	9	6	2	1	2	1	0	0
11 Claims assistance	9	5	3	1	0	0	1	0
12 Accounting, general ledger, period end and audit	12	9	2	1	2	4	0	0
13 Taxes and BIR compliance	11	9	1	1	0	11	0	0
14 Insurance Commission and Data Privacy compliance	14	13	1	0	7	0	7	0
15 Reporting, administration, security and go-live	17	12	5	0	0	1	3	0
Total	163	111	39	13	23	23	14	11

The table counts the business requirements (BR); the 13 non-functional requirements (NFR) are counted apart. Source counts each requirement once by its main authority; the others are business needs (Bus.) or motor registration (LTO).

12. Document Sign-Off

Serial Number	Description	Owner	Status
