1. Document Control

Date	Version	Author & Business Unit Info	Reviewed By & Business Unit Info	Approved By & Business Unit Info	Change History
04 October 2026	1.1	iorta TechNXT			Compliance officer and DPO curricula; new modules in every role (My Work, Help panel, go-live kits, integrations, branding, distribution, onboarding and screening, BIR forms, payables and fixed assets); schedule for four sizes

2. Acronyms

Acronym / Symbol	Definition / Meaning
OOTB	Out of the box
TTT	Train the trainer
UAT	User acceptance test
OR	Official receipt
JV	Journal voucher
PV	Payment voucher
KYC	Know your customer
EDD	Enhanced due diligence
AML/CFT	Anti-money laundering and countering the financing of terrorism
AMLC	Anti-Money Laundering Council
CTR	Covered transaction report
STR	Suspicious transaction report
PEP	Politically exposed person

DPO	Data protection officer
NPC	National Privacy Commission
IC	Insurance Commission
BIR	Bureau of Internal Revenue
EOPT	Ease of Paying Taxes
EIS	Electronic Invoicing System
CAS	Computerized Accounting System
SAWT	Summary Alphalist of Withholding Taxes
QAP	Quarterly Alphalist of Payees
SLSP	Summary List of Sales and Purchases
COC	Certificate of cover
CTPL	Compulsory Third Party Liability
LOA	Letter of authority
PM	Project manager

3. Introduction

3.1 Purpose

This plan sets out how the broker's people learn to use BrokerVerse OOTB and how the change in their daily work is managed: the training per role, the curriculum and durations, the train-the-trainer approach, the materials, the assessment, and the change management activities around go-live.

3.2 Approach in brief

- **Role-based.** Training follows the eight delivered roles, plus a module for the broker's data protection officer. Each user is trained in the screens of the role the user will hold, as the menus differ by role.
- **Train the trainer.** iorta TechNXT trains the broker's key users. The key users then train their teams, with iorta TechNXT present at the first sessions. The System Administrator, the Accounting Manager, the compliance officer and the DPO are trained by iorta TechNXT directly.
- **Hands on.** At least two thirds of each session is practice on the training environment, following the steps of the user manual.
- **Assessed.** Every user completes a practical assessment before receiving production access.
- **Just in time.** End-user training takes place in the weeks before go-live, so the learning is fresh on day one.

3.3 Version history

Version	Date	Change
1.0	03 October 2026	Initial issue: seven roles, curriculum, train-the-trainer, assessment, change management
1.1	04 October 2026	Compliance Officer (AML/CFT) curriculum and assessment; DPO module; new modules for My Work, the Help panel, masking of personal identifiers, the go-live configuration and migration kits, integrations and message templates, theme and branding and e-signatures, distribution (lead assignment, channels, dealer programmes, fleets, open covers, facultative, campaigns, Report Builder), client onboarding and screening, cover notes, computed cancellations, CTPL authentication, claim document checklist and motor repairs, post-dated cheques and instalments, bank payment files, BIR forms and files, EOPT invoices, EIS and CAS books, payables and fixed assets, insurer overrides, IC registers and complaints; schedule for small, medium, large and enterprise brokers; the note on screens missing from the manual removed (the manual now covers them)

3.4 Roles trained

Role in BrokerVerse	Who in the broker	Role material
System Administrator (Super Admin Access)	IT or system owner; at most a few people	BrokerVerse_System_Administrator_Guide.pptx; manual chapters System Administrator and Go-Live Data Load
Sales & Marketing (Account Executive)	Account executives, marketing staff	BrokerVerse_Sales_and_Marketing_Guide.pptx; manual chapters Sales & Marketing and Distribution, programmes and products
Processing Team (Placement & Policy Processing)	Placement, underwriting support and policy processing staff	BrokerVerse_Processing_Team_Guide.pptx; manual chapter Processing Team
Operations (Client Servicing)	Client servicing and customer care staff	BrokerVerse_Operations_Guide.pptx; manual chapter Operations
Claims	Claims officers and approvers	BrokerVerse_Claims_Guide.pptx ; manual chapter Claims

Role in BrokerVerse	Who in the broker	Role material
Accounting	Billing, collection, disbursement, remittance, tax and general ledger staff	BrokerVerse_Accounting_Guide.pptx; manual chapter Accounting
Accounting Manager	Finance manager, controller; inherits Accounting	BrokerVerse_Accounting_Manager_Guide.pptx; manual chapter Accounting Manager
Compliance Officer (AML/CFT)	The broker's compliance officer and deputy	No role deck in this release: manual chapters Compliance Officer (AML/CFT) and Compliance
Data protection officer (no own role)	The DPO, working through the privacy permissions of the System Administrator or Operations role	Manual sections Data privacy, Personal data breach register and masking of personal identifiers

4. Training materials

Material	Use
BrokerVerse User Manual (docs/package/05_Delivery/BrokerVerse_User_Manual.pdf)	Reference for every screen, with one chapter per role; the end-to-end business process; module reference; reports, dashboards, schedules and notifications; troubleshooting, FAQ and glossary
Help panel in the application	F1 , or ? outside a text box, opens the manual section of the screen in use, the user manual download, the support contacts and Raise a support ticket
Role decks (docs/decks)	One PowerPoint per role for the seven original roles
Getting started guide (docs/onboarding/GETTING_STARTED.md)	First sign-in, password rules, two-step verification, menus per role, how to ask for help; handed to every user
UAT scripts (docs/onboarding/UAT_SCRIPTS.md) and the broker's UAT scenarios	Basis for the practical exercises and the assessment
Go-live kits and upload templates	Exercises for users who load data (System Administrator, Accounting, Sales & Marketing, Processing Team)
Training environment	UAT, or a training copy, with training users (one per trainee). Training uses the configuration accepted in UAT and either the delivered sample data or data masked with the masking tool; never unmasked production data
Exercise book (prepared by the key users with iorta TechNXT)	The broker's own examples: products, insurers, a typical motor and fire risk, a typical month-end, a juridical client with owners, a screening hit

Training users and their passwords are handed to trainees privately, as for production users. Trainees never use production for practice.

5. Curriculum by role

Durations are in hours of classroom time; a day is 7 hours. The chapters named are those of the BrokerVerse User Manual.

5.1 All roles: common module (1.5 hours)

Topic	Content	Manual
Signing in	First sign-in, password change, password rules (8 characters, upper and lower case, digit, symbol, history 5, expiry 90 days), logout after 5 wrong passwords, idle sign-out after 30 minutes, forgotten password; two-step verification	Getting started
Finding your way	The side menu by role and its sections, dashboards, notifications, lists, search and filters; the Help panel (F1)	Getting started
My Work	My Items, My Team (by reporting line), My Tasks, Calendar: the daily worklist of every user	Operations, My Work
The broking cycle	The steps from lead to month-end and who does each; maker-checker points	The business process end to end
Personal data	Masked identifiers for roles without view:pii; what is recorded when a value is revealed; consent before a message	Data privacy
Getting help	Key user first, then the System Administrator; what to put in a report: screen, record number, time, request ID; Raise a support ticket	Getting started; Troubleshooting

5.2 System Administrator (24.5 hours, 3.5 days)

Module	Hours	Content	Manual
Common module	1.5	As above	
User management	3	Users, roles, role permissions (including view:pii), temporary passwords, locking, two-step verification resets; User Access Matrix, Authority Matrix, Delegations, Segregation of Duties, Access Reviews; reporting lines	System Administrator
Organisation, letterhead and branding	2	Company, branches, departments; Theme and Branding (theme, sign-in page, documents, e-mail, name and images); signatories and e-signatures, document signature mapping; brand packs	System Administrator
Masters	2	Insurance, location (PSGC), employee and finance masters; operational masters	System Administrator
Go-Live Data Load	3.5	Configuration and migration kits: download, upload and validate, errors workbook, load, history, reconciliation, promotion of configuration with Current data, go-live lock	Go-Live Data Load
Configuration and numbering	3	Master > Configuration groups and the effect of a change; Document Numbering and the	System Administrator

Module	Hours	Content	Manual
Schedules, E-mail Outbox, integrations	3	invoice serial range The scheduled jobs, Run now, history; the outbox; connectors, test mode and live, outbox and inbox; message templates and consent; insurer integration	System Administrator
Data privacy	1	Consent register, data subject requests, export and anonymisation; masking settings	System Administrator
Posting rules and account determination (overview)	1	Account roles, posting rules, Simulate, Configuration Approvals	Accounting Manager
Audit Trail and first-line support	2.5	Audit Trail filters; access reviews; triage of user reports; raising tickets to iorta TechNXT	System Administrator
Practice	2	The exercise book	

5.3 Sales & Marketing (14 hours, 2 days)

Module	Hours	Content	Manual
Common module	1.5	As above	
Dashboards and My Work	0.5	Executive Dashboard, Sales Dashboard; quotations with the customer	Sales & Marketing
Prospects and lead assignment	2	Create, edit, bulk upload; lead assignment rules, team view, reassignment	Sales & Marketing; Distribution
Quotations	3	Motor quotation: vehicle class, CTPL, covers, taxes; acceptance rules (refer, decline, loading); sending for customer approval; Quick Quote and Compare Insurers for package products	Sales & Marketing
Requests for quotation	0.5	Passing a commercial risk to the Processing Team for a broker slip	Processing Team
Clients and payment capture	1.5	Onboard client before the first policy (identification, PEP, expected business); Proceed to Payment; Accounting verifies	Operations; Sales & Marketing
Distribution	2	Distribution channels, dealer programmes and their sales uploads, comparison reports, campaigns and segments	Distribution, programmes and products
Renewals and reports	2	Renewal Queue, At-Risk Policies, Negotiations; Commission Dashboard; production reports; Report Builder	Sales & Marketing; Distribution
Practice	1	The exercise book	

5.4 Processing Team (24.5 hours, 3.5 days)

Module	Hours	Content	Manual
Common module	1.5	As above	
Dashboards and placement journey	1.5	Processing Dashboard; journey per line of business	Processing Team
Requests for quotation (broker slips)	3	New broker slip, submit to market, record offers and declines, compare offers;	Processing Team; Compliance

Module	Hours	Content	Manual
		insurer authority warnings	
Quotation and placement slips, co-insurance	4	Quotation slip from the chosen offer; firm order to the lead and co-insurers, shares totalling 100%, confirmations	Processing Team
Policy issue	3	Issue from the placement slip or the motor quotation; KYC, screening and EDD checks; vehicle identifiers; Record Issued Policy; insurer issuance requests	Processing Team; System Administrator (Insurer integration)
Endorsements and renewals	2.5	Endorsement types and premium recalculation; approving renewal terms	Processing Team
Product Configurator	3.5	Product templates and the governing template, coverage builder, rating factors, acceptance rules with refer, decline and loading and the authority to override, document templates with merge fields, market and risk mapping	Processing Team (Product Configurator)
Fleets, open covers, facultative	2	Fleet schedules, marine open covers (certificates, declarations), facultative placements	Distribution, programmes and products
Reinsurance and reports	2	Treaties, cession tracking, claims recovery; placement and production reports	Processing Team
Practice	1.5	The exercise book	

5.5 Operations (17.5 hours, 2.5 days)

Module	Hours	Content	Manual
Common module	1.5	As above	
My Work	1	My Items, My Team, My Tasks, Calendar; expiring policies, pending payments and quotations	Operations
Clients and onboarding	2.5	Onboard client (individual and juridical), signatories and beneficial owners, KYC documents; preparing EDD reviews	Operations; Compliance Officer
Policies, endorsement requests, cover notes	2.5	Policy details and documents; endorsement requests; cover notes (binders)	Operations
Cancellations	1	Computed return premium: pro-rata and short-period	Operations
Payments	1.5	Capturing the client's payment with proof	Operations
CTPL authentication	1.5	COC series, authentication at issue, Authenticate now, vehicle details, enter code from the provider portal, unauthenticated report	Operations
Renewals	1.5	Renewal Policy, renewal	Operations

Module	Hours	Content	Manual
Complaints, licences and privacy	2.5	notices, lapse management Complaints register and letters; licence register and fit and proper; consent, data subject requests, breach register	Compliance; System Administrator (Data privacy)
Practice	2	The exercise book	

5.6 Claims (10.5 hours, 1.5 days)

Module	Hours	Content	Manual
Common module	1.5	As above	
Registering a claim	1.5	New claim on an active policy; checks on loss date and unpaid premium	Claims
Documents, checklist and letters	1.5	Claim document checklist, uploads, acknowledgement and other claim letters	Claims
Motor repairs	1.5	Repair shops, estimates, letters of authority	Claims
Insurer follow-up	1	Insurer reference, adjuster report, claim status from the insurer, SMS claim updates	Claims
Settlement	1.5	Assessment and settlement, maker-checker approval; screening of the payee; settlement paid through the broker	Claims
Complaints, dashboard and reports	1	Logging and resolving complaints about claims; Claims Dashboard, recovery, reports	Compliance; Claims
Practice	1	The exercise book	

5.7 Accounting (35 hours, 5 days)

Module	Hours	Content	Manual
Common module	1.5	As above	
Receipts and payment verification	3	Official receipts against open bills, verifying captured payments, bulk receipts, returned cheques	Accounting
Collections, credit control, instalments, post-dated cheques	3	Collections and ageing; instalment plans and separate instalment invoices, premium warranty, credit limits; post-dated cheques	Accounting
Disbursement, payables, petty cash	3	Payment vouchers and cheques; supplier invoices and accounts payable; petty cash	Accounting
Bank payment files	1.5	Batches, approval, write and download, status file, record result; payee bank accounts	Accounting
Remittance and direct bill	4	Remittance processing and approval levels, electronic transfer records, reconciliation; direct bill debit notes	Accounting
Commission, overrides, incentives	3	Referrer accounts, payout after full collection, withholding, licence check; overriding and	Accounting

Module	Hours	Content	Manual
		contingent commission from insurers; incentives	
Journals, matching, fixed assets	3.5	Journal, correction and reversal JV, open entry matching, Accounting Query; fixed assets and depreciation	Accounting
Bank and insurer reconciliation	3	Statement import, matching, bank items, reconciliation; insurer statements	Accounting
Tax and BIR	4.5	Tax codes; Form 2307; VAT Summary, SAWT, QAP, SLSP; withholding returns 0619-E and 1601-EQ with filing records; 1604-E; 2551Q; DAT files; sales invoices (EOPT) and payment acknowledgements; E-Invoicing (EIS); CAS books and documents	Accounting
Period end	2	Period Management, Month-End Close run and checklist, recurring journals, financial statements	Accounting
Reports and practice	3	Financial reports, Report Builder; the exercise book	Accounting; Distribution

5.8 Accounting Manager (10.5 hours, 1.5 days, after the Accounting curriculum)

Module	Hours	Content	Manual
Approvals	1.5	What only the Accounting Manager approves; maker-checker; delegations; bank payment batches within the authority limit	Accounting Manager
Month-end and year-end close	2	Reviewing and approving the close run; year-end close and carry forward	Accounting Manager
Period control	1	Reopening a period with remarks; soft-closed periods	Accounting Manager
Bank and insurer reconciliation approval; credit control decisions	1	Approving and locking reconciliations; credit control items	Accounting Manager
Configuration approvals	1	Account determination and posting rule changes; tax codes and GL accounts	Accounting Manager
Supplier invoices and fixed assets	1	Approving supplier invoices; asset register review	Accounting Manager; Accounting
BIR returns and CAS books review	1.5	Reviewing the returns and their reconciliation before filing; filing records; printed books	Accounting
IC annual statement and production report	1.5	Checks and confirmations, account mapping, workbook; production report by insurer and line	Compliance

5.9 Compliance Officer (17.5 hours, 2.5 days)

Module	Hours	Content	Manual
Common module	1.5	As above	
The programme in BrokerVerse	1	Role, menus, daily and periodic tasks; AML Dashboard	Compliance Officer
Client due diligence and risk rating	2	Onboarding of individual and juridical clients, signatories and beneficial owners; risk factors and score; KYC status; override with reason	Compliance Officer; Operations
EDD reviews and KYC refresh	1.5	Preparing, submitting, approving or rejecting an EDD review; refresh periods and Complete KYC refresh	Compliance Officer
Screening	2	Screening events; hits: clear, escalate, confirm; Screen a name; screening lists, versions and rescreen; the screening provider	Compliance Officer
Transaction alerts and AML cases	2	Monitoring rules and alerts; closing with reason; CTR and STR cases; due dates in working days	Compliance Officer
AMLC reports	1.5	Generate CTR file, report files, download, record filing	Compliance Officer
AML settings	2	General settings, risk factors, monitoring rules; confirming the delivered values	Compliance Officer
Insurance Commission registers	1.5	Licence register and reminders, commission check; fit and proper records; insurer authority	Compliance
Complaints and IC reports	1.5	Complaints register, deadlines, letters, escalation, regulator report; IC annual statement and production report (with the Accountant)	Compliance
Breach register (with the DPO)	1	Logging, assessment, NPC notification, data subjects, annual report	Compliance

5.10 Data protection officer (3.5 hours, half a day)

Module	Hours	Content	Manual
Consent and data subject requests	1.5	Consent register; logging a request, due dates, export, anonymisation dry run and its limits (retention, AML records)	System Administrator (Data privacy)
Personal data breach register	1	72-hour clock, assessment criteria, NPC notification and data subjects, reminders, annual report	Compliance
Masking and copies	1	Masking by role (view:pii), reveal modes and their audit; approval of masked copies for training, testing and the rehearsal	Getting started; Data masking procedure

5.11 Summary of durations

Role	Key users (TTT) or direct training	End users
System Administrator	3.5 days	Not applicable (trained by iorta TechNXT)
Sales & Marketing	2 days plus 0.5 day trainer skills	2 days
Processing Team	3.5 days plus 0.5 day trainer skills	3.5 days
Operations	2.5 days plus 0.5 day trainer skills	2.5 days
Claims	1.5 days plus 0.5 day trainer skills	1.5 days
Accounting	5 days plus 0.5 day trainer skills	5 days
Accounting Manager	1.5 days after Accounting	Not applicable (trained by iorta TechNXT)
Compliance Officer	2.5 days	Not applicable (trained by iorta TechNXT)
Data protection officer	0.5 day	Not applicable (trained by iorta TechNXT)

The training days included in the implementation fee are those of the size (Small 4, Medium 6, Large 10, Enterprise 15 days of iorta TechNXT trainers). Where the roles the broker uses need more trainer days than included, the additional days are agreed at mobilisation as an optional service.

6. Train the trainer

6.1 Who

One key user per team (two for teams of more than 15 users), named at mobilisation. Key users take part in discovery and UAT, so they reach training already knowing the configuration.

6.2 Programme

1. **Role curriculum** delivered by an iorta TechNXT consultant, on the training environment with the broker's configuration.
2. **Trainer skills** (half a day): structuring a session, demonstrating then letting trainees practise, handling questions, using the exercise book and the Help panel, running the assessment.
3. **Exercise book** prepared by each key user with the consultant: the broker's own examples for each module.
4. **Teach-back**: each key user delivers one module to the consultant and peers and gets feedback.
5. **Co-delivery**: the key user leads the first end-user session with the consultant in the room.
6. **Solo delivery**: the key user runs the remaining sessions; the consultant is on call.

6.3 Exit criteria for a key user

- Passed the role assessment with at least 90%.
- Delivered a teach-back to the consultant's satisfaction.
- Knows how to raise a support ticket and what to include.

7. Delivery

7.1 Schedule

The weeks follow the task-level plan of the Implementation Approach and Plan.

Plan	Train the trainer	Compliance officer and DPO	End-user training
Small (8 weeks)	Weeks 4 and 5	Week 4	Weeks 5 and 6
Medium (12 weeks)	Week 7	Week 6	Weeks 8 and 9
Large (20 weeks)	Weeks 10 and 11	Week 8	Weeks 12 to 14 (head office, then branches)
Enterprise (26 weeks)	Weeks 13 to 15	Week 10	Weeks 16 to 19

End-user training is on the critical path of a medium broker and within one day of it for small and large brokers: a late train-the-trainer moves the go-live.

7.2 Sessions

- At most 10 trainees per session, each with a computer and a training user for the role.
- Sessions run on site or online in Philippine business hours, in English; key users may explain in Filipino. The screens are in English in this release.
- Users holding two roles attend both curricula.
- Attendance is recorded per session; a missed module is taken in a catch-up session before go-live.
- Users who join after go-live are trained by their key user with the same curriculum and assessment.

7.3 Training environment readiness

Before each training wave: training users created per trainee, configuration equal to the UAT-accepted configuration (promoted with the configuration kit), branding applied, training data present (prospects, quotations, policies, open bills, a bank statement to reconcile, a juridical client, a screening list with a test entry), connectors in test mode, e-mail and SMS going to internal addresses only, data masked or synthetic, and the exercise book printed.

8. Assessment

8.1 Method

Each user completes a practical assessment at the end of the role curriculum, on the training environment, without help. It uses the scenarios of UAT_SCRIPTS.md for the role and the broker's UAT scenarios, with the broker's data, plus a short written check.

Role	Practical tasks	Written check
System Administrator	A1 to A7; validate and load a configuration kit with one error corrected	10 questions
Sales & Marketing	S1, S3, S4, S5, S6; onboard a client	10 questions
Processing Team	P1 to P6; a quotation referred by an acceptance rule	10 questions
Operations	O1 to O5; onboard a juridical client with an owner; authenticate a COC	10 questions
Claims	C1 to C5; complete a document checklist	10 questions
Accounting	F1 to F8; a bank payment batch; a sales invoice	15 questions
Accounting Manager	M1 to M5; review a withholding return	10 questions
Compliance Officer	Decide a screening hit; approve an EDD review; close an alert or open an STR case; generate a CTR file; record a licence	10 questions
Data protection officer	Log and assess a breach; complete a data subject request	5 questions

8.2 Pass criteria

- End users: at least 80% overall, and every task marked critical for the role done correctly. Critical tasks: issuing an official receipt (Accounting), approving as checker (Accounting Manager), issuing a policy with KYC (Processing Team), registering a claim (Claims), capturing a payment (Operations, Sales & Marketing), creating a user with the right role (System Administrator), deciding a screening hit (Compliance Officer).
- Key users, the System Administrator, the Accounting Manager and the compliance officer: at least 90%.
- A user who does not pass attends a refresher and takes the assessment again before receiving production access.

8.3 Evaluation of the training

Each trainee fills in a short evaluation (content, pace, trainer, materials, confidence to do the job). Key users and the iorta TechNXT consultant review the results after each wave and adjust the next sessions.

9. Change management

9.1 What changes for users

The main changes users meet are rules the system now enforces. Each is explained in training and in the go-live communication.

Change	Who is affected	What it means in daily work
Only Accounting posts official receipts	Sales & Marketing, Operations, Processing Team, Accounting	Other roles record how the client paid; Accounting verifies and issues the receipt
Maker-checker	Accounting, Accounting Manager, Claims, Processing Team, Compliance Officer	The person who enters a quotation, voucher, remittance, settlement, journal, payment batch, EDD review or close cannot approve it
Client onboarding and screening before the first policy	Sales & Marketing, Operations, Processing Team	Identification, PEP and expected business are recorded; a High-risk client needs an approved EDD review and a client with an open screening hit gets no policy, refund or claim payment
KYC and vehicle identifiers before a motor policy	Sales & Marketing, Processing Team, Operations	Government ID, chassis, motor and plate or MV file number are needed before issue
CTPL authentication	Operations, Processing Team	Every CTPL cover is authenticated before release; the COC number and code print on the schedule
Acceptance rules from the Product Configurator	Sales & Marketing, Processing Team	A risk can be referred, declined or loaded; an override needs the authority
Placement journey per line	Processing Team, Sales & Marketing	Fire, IAR, marine, casualty and engineering need a placement slip confirmed by every insurer before issue
Insurer authority check	Processing Team	A warning (or a block, once switched) when an insurer's IC certificate of authority is expired or missing
Commission paid after full collection and to licensed agents	Accounting, Sales & Marketing	Commission becomes payable only when the premium is fully collected, a bank account is on file and the agent's licence is in force
Sales invoices under the EOPT Act	Accounting	Commission and fees are invoiced on the sales invoice series; receipts are supplementary documents
Complaints deadlines	Operations, Claims, Sales & Marketing	Every complaint is logged, acknowledged and resolved within the configured days
Masked personal identifiers	Every role without view:pii	TIN, ID numbers, mobile, e-mail, bank account and birth date show partially masked; a reveal is recorded
My Work	Everyone	One worklist per user and per team replaces the former

Change	Who is affected	What it means in daily work
		Open Items screen
Period control	Accounting, Accounting Manager	Closed periods take no postings; soft-closed periods take postings only from the Accounting Manager
Security	Everyone	Personal user IDs, password rules, two-step verification for the roles set, automatic sign-out after 30 minutes idle; every action is in the Audit Trail

9.2 Stakeholders and communication

Audience	Message	Channel	When
Management	Why the change, what it delivers, what is asked of the teams	Steering committee, management meeting	Mobilisation, monthly
Team leaders	Timeline, their key user, release of staff for training and UAT	Briefing by the broker PM	Mobilisation, before training
All users	What changes, training dates, go-live date, where to get help (Help panel, key user)	E-mail from the sponsor, team meetings, getting started guide	Four weeks and one week before go-live, go-live day
Insurers	Go-live date, changes in documents (remittance advice, debit notes, sales invoices), API or file contacts	Letter or e-mail from Accounting	Two weeks before go-live
Banks and providers	Go-live date of payment files, SMS, CTPL authentication; contacts during hypercare	E-mail from the IT head	Two weeks before go-live
Clients (where affected)	New receipt, invoice or billing statement layout, payment links, SMS notices	Account executives	At go-live

9.3 Readiness

The broker PM checks readiness two weeks before go-live and again at the go/no-go: users trained and assessed per team, key users in place, user IDs issued, the compliance officer and DPO trained, procedures updated for the changes above, and team leaders' confirmation that their teams are ready. Gaps are actions in the RAID log.

9.4 Support at go-live and reinforcement

- Key users act as floor walkers in their teams during the first week; iorta TechNXT consultants are on site or on call during hypercare.
- A daily 15-minute check-in in the first week collects questions; answers go into the knowledge base and a short tips note to users.

- Refresher sessions are offered at the end of the first month, before the first month-end close for Accounting, before the first BIR and AMLC filings, and on topics the support tickets show users find hard.
- Key users keep the exercise book and train newcomers with the same curriculum and assessment.

10. Document Sign-Off

Serial Number	Description	Owner	Status
