1. Document Control

Date	Version	Author & Business Unit Info	Reviewed By & Business Unit Info	Approved By & Business Unit Info	Change History
03 October 2026	1.0	iorta TechNXT Corp.	Legal counsel (to be completed)	To be completed	Template for discussion; subject to review by the parties' legal counsel

2. Acronyms

Acronym / Symbol	Definition / Meaning
AMC	Annual Maintenance Contract
BIR	Bureau of Internal Revenue
CSV	Comma-separated values
DPA	Data Processing Agreement
DPO	Data protection officer
MSA	Master Services Agreement
NPC	National Privacy Commission
OOTB	Out of the box
PDF	Portable Document Format
PHP	Philippine peso
SaaS	Software as a service
VAT	Value-added tax
XLSX	Excel workbook

3. About this plan

Template for discussion; subject to review by the parties' legal counsel.

This Exit and Transition Plan (the **Exit Plan**) sets out how iorta TechNXT Corp. (**iorta TechNXT**) returns the Client Data, supports the move to another system or provider, and deletes the Client Data when a subscription or a hosting service of iNXT BrokerVerse OOTB ends. It is an annex to the Order Form under the Master Services Agreement (the **MSA**) between iorta TechNXT and [Client legal name] (the **Client**).

It puts into practice, in one place, the exit terms of these documents, which remain the binding terms:

Document	Clause
MSA	Effect of termination
Software Subscription Agreement	Client Data on exit (Data return, Data deletion)
Hosting and Infrastructure Services Agreement	Exit and transition; Backup and recovery
Data Processing Agreement	Return and deletion

If this Exit Plan conflicts with one of those clauses, the clause prevails. Capitalised terms have the meaning given in the MSA. Text in [square brackets] is a placeholder or an option.

4. Where it applies

Commercial model	Applies	Notes
Subscription, hosted by iorta TechNXT (Standard package)	Yes, in full	Subscription and hosting both end
Subscription, hosted by the Client (Essentials package)	Yes, for the data return formats, the transition assistance and the end of the right of use	The Client already holds its database; iorta TechNXT deletes the Client Data it holds from support and migration work
Perpetual licence, hosted by iorta TechNXT (Ownership and Ownership Plus packages)	Yes, for the hosting service	The licence continues. The Client may move the Platform to its own hosting under the Hosting Agreement
Perpetual licence, hosted by the Client	Only the deletion of Client Data that iorta TechNXT holds from support work	The licence and the Client Data stay with the Client; end of AMC only stops updates and support

4.1 Exit triggers

1. Expiry after a notice of non-renewal given at least 90 days before the end of the current term (subscription, hosting).
2. Termination for cause under the MSA, including for non-payment.
3. Termination for convenience where the Order Form allows it, with the early termination fee stated there.
4. A planned move requested by the Client during the term, for example from hosting by iorta TechNXT to hosting by the Client under a perpetual licence.

5. Exit timeline

Day 0 is the date on which the subscription or the hosting service ends (the **End Date**). The timeline below assumes expiry after notice of non-renewal; on termination for cause, the steps before Day 0 are compressed into the notice period.

When	Step	Owner
Day minus 90 or earlier	Written notice of non-renewal, or notice of a planned move	Either Party
Within 10 Business Days of the notice	Exit kick-off meeting; exit contacts named; this Exit Plan confirmed with dates (Annex A)	Both
Day minus 60	Client confirms the export scope, the formats, the delivery method and any transition assistance it wants	Client
Day minus 30 [optional]	Trial export delivered for the Client to test the load into its new system [counted as the included export / charged at day rates]	iorta TechNXT
Day 0	End Date. The right of use ends. Read-only access for the System Administrator may continue under the next row	Both
Day 0 to Day 60	Request window: the Client requests the full export. iorta TechNXT keeps the Client Data and may keep read-only access open for the System Administrator at [no charge / the Monthly Fee prorated]	Client
Within 30 days of the request	Full export delivered	iorta TechNXT
Up to Day 90 [hosting]	If the Client asks, iorta TechNXT keeps the hosted environment running at the monthly hosting fee prorated, for parallel running and cutover	iorta TechNXT
Within 10 Business Days of delivery	Client confirms receipt and readability of the export (Annex C), or lists the defects	Client
Within 30 days of the Client's confirmation, or within 30 days after Day 60 if no request is made	Deletion of the Client Data from production and non-production environments	iorta TechNXT
Within 10 Business Days of completing deletion	Certificate of deletion signed by the iorta TechNXT DPO (Annex D)	iorta TechNXT
Up to 12 months after Day 0 (longer only for year-end copies the Client instructed)	Backups expire under the backup retention; they are not restored except to comply with law	iorta TechNXT

If the Client does not confirm or reject the export within 10 Business Days of delivery, the export is treated as confirmed for the purpose of the deletion timeline. This is a proposal of this Exit Plan and should be confirmed by legal counsel.

6. Data return

6.1 What is returned

Item	Format	Notes
Database	PostgreSQL 16 dump of the Client's database in custom format, restorable with the standard PostgreSQL tools	Complete Client Data, including the audit trail, users and configuration
Uploaded documents	Archive of the uploaded files (documents, ID images, reports produced by the system) in their original formats, with the folder structure of the file store	Personal data of the Client's clients included
Register extracts	CSV extracts of the main registers listed in the Documentation, with the data dictionary	For loading into another system without PostgreSQL
Configuration	Configuration export of the Platform (hosting): settings, masters, number series, posting rules	Hosting Agreement, Exit and transition clause
Self-service reports	XLSX, CSV and PDF reports and exports run by the Client's users before the End Date	Available at any time during the term

6.2 What is not returned

1. The Platform, its source code, the Documentation, the upload templates and other materials of iorta TechNXT. These remain iorta TechNXT's property under the MSA.
2. Application secrets and encryption keys of the iorta TechNXT environments. Two-step verification secrets in the dump are encrypted; a new system cannot use them, and users enrol again in the new system.
3. Monitoring data, logs and tickets of iorta TechNXT, except the audit trail inside the Client's database and the ticket history that the Client asks for.

6.3 Delivery

1. The export is delivered by secure file transfer or on encrypted media, at the Client's choice. The decryption password is sent by a separate channel to the Client's named exit contact. [Recommended practice; confirm with the Client's DPO.]
2. Each file comes with a manifest listing the file names, sizes, row counts of the CSV extracts and a checksum.
3. One full export is included. Further exports and a trial export (unless counted as the included export) are charged at the day rates of the Order Form.
4. Under a planned move of a perpetual licence to the Client's own hosting, iorta TechNXT also supplies the deployment guide and the container images or build artefacts of the current release, and supports the move at day rates. The application secrets are handed over under dual control so that users keep their two-step verification.

7. Transition assistance and deletion

7.1 Transition assistance

7.1.1 Included

Model	Included at no charge
Hosting by iorta TechNXT	Handover meeting with the Client's new provider, and answers to questions, up to [5] man-days in total
Subscription	One full export; no other transition assistance

7.1.2 At day rates

Further assistance is provided at the day rates of the Order Form (list rates in the Service Catalogue and Rate Annex), after the Client approves an estimate:

Assistance	Typical role	Unit
Further exports or extracts in another layout	Developer	Man-day
Mapping of the Client Data to the new system's layouts	Business analyst	Man-day
Answers to the new provider beyond the included days	Business analyst or developer	Man-day
Parallel running support	Business analyst	Man-day
Project management of the exit	Project manager	Man-day
Hosted environment kept running after Day 0	Not applicable	Monthly hosting fee, prorated by day, up to Day 90

The assistance is limited to the Client Data and the Platform as delivered. iorta TechNXT does not build, configure or test the new system.

7.2 Deletion

1. iorta TechNXT deletes the Client Data from the production and non-production environments it operates, including the UAT and any additional environments, the file store and copies made for support or data migration work.
2. Backups that contain Client Data are not deleted one by one. They expire under the retention of the Hosting Agreement: at most 35 days for daily backups and point-in-time recovery, 12 months for monthly copies and monthly logical dumps, and 10 years for year-end copies only if the Client has instructed that retention. They are not restored in the meantime, except to comply with law.
3. iorta TechNXT may keep Client Data longer only where Philippine law requires, under the Data Processing Agreement, and keeps it confidential and protected.
4. The Client remains responsible for keeping its own records for the periods required by law, including the Insurance Code and the tax laws, after it receives the export.

8. Responsibilities and fees during exit

8.1 Responsibilities during exit

Activity	iorta TechNXT	Client
Notice of non-renewal or move	Either Party	Either Party
Exit contacts and Annex A dates	Proposes	Confirms
Export scope, formats and delivery method	Advises	Decides
Export and manifest	Produces and delivers	Receives
Test of the export in the new system	Answers questions (included days)	Performs
Confirmation of the export (Annex C)	Requests	Signs
Deletion and certificate (Annex D)	Performs and signs	Receives
Records retention after exit	Not applicable	Keeps its records as the law requires
Notices to its clients, insurers and the NPC where needed	Not applicable	Gives them

8.2 Fees during exit

1. Subscription and hosting fees are payable up to the End Date. Fees for read-only access and for running the hosted environment after the End Date are as stated in the Exit timeline.
2. Transition assistance beyond the included items is invoiced monthly in arrears at actual man-days, up to the approved estimate.
3. iorta TechNXT may withhold the export only for undisputed amounts that remain unpaid after the notice under the MSA. It does not withhold the deletion or the certificate of deletion.

9. Annexes

9.1 Annex A: exit schedule

Item	Entry
Order Form no. and services ending	[number]; [subscription / hosting / both]
Notice given by and on	[Party], [date]
End Date (Day 0)	[date]
Exit contacts	iorta TechNXT: [name, e-mail]; Client: [name, e-mail]; Client DPO: [name, e-mail]
Export scope and formats	[as in the Data return chapter / changes]
Delivery method	[secure transfer / encrypted media]
Trial export	[Yes, on date / No]
Read-only access after Day 0	[Yes, until date, at no charge or fee / No]
Hosted environment after Day 0	[Yes, until date (at most Day 90) / No]
Transition assistance estimate	[man-days by role; amount PHP]
Planned deletion date	[date]

9.2 Annex B: export manifest

File	Content	Format	Size	Rows	Checksum
[file name]	Database dump	PostgreSQL custom format	[size]	Not applicable	[checksum]
[file name]	Uploaded documents archive	Archive	[size]	[files]	[checksum]
[file name]	[register] extract	CSV	[size]	[rows]	[checksum]
[file name]	Data dictionary	XLSX	[size]	Not applicable	[checksum]
[file name]	Configuration export	[format]	[size]	Not applicable	[checksum]

9.3 Annex C: confirmation of data return

Field	Entry
Client	[Client legal name]
Export delivered on	[date], manifest ref. [reference]
Checks made by the Client	[checksums verified; dump restored into PostgreSQL 16; row counts compared; documents opened]
Result	[Export received and readable / Defects listed below]
Defects, if any	[list]
Confirmed by (Client)	[name, title, signature, date]

9.4 Annex D: certificate of deletion

Field	Entry
Certificate no.	[DEL-year-number]
Controller	[Client legal name]
Processor	iorta TechNXT Corp.
Services ended	[subscription / hosting], Order Form no. [number], End Date [date]
Environments deleted	[production, UAT, additional environments], [provider and region]
Other copies deleted	[support and migration copies, file store]
Date deletion completed	[date]

Field	Entry
Method	[Deletion of the database instances and storage volumes; deletion of file store and object storage; provider confirmation reference]
Backups remaining and their expiry	[daily backups expire by date; monthly copies expire by date; year-end copies expire by date, if instructed]
Data kept because the law requires it	[None / description and legal basis]
Statement	iorta TechNXT certifies that the Client Data in the environments listed above has been deleted as stated, and that the remaining backups will expire as stated and will not be restored except to comply with law.
Signed by the iorta TechNXT data protection officer	[name, signature, date]
Received by the Client's data protection officer	[name, signature, date]

10. Document Sign-Off

Serial Number	Description	Owner	Status
1	Review and completion by the parties' legal counsel and data protection officers before signature	iorta TechNXT	Closed

Sign Off Date	Signature	Approved By	Department & Project Role
