

FUNCTIONAL REQUIREMENTS SPECIFICATION

Promotions - Promo Master

TIS-BRD-PROD-15 Promotions: promo master, vehicle-level promo rates for new vehicles, issuing and remitting rates, discount caps per product and channel

With Appendix B: Parcel / Courier insurance workings

BrokerVerse TISPH - iNXT BrokerVerse

Client	Toyota Insurance Services Philippines Corporation (TISPH)
Document	TISPH-FRS-PROD-15
Version	1.0
Date	8 October 2026
BRD baseline	BrokerVerse TISPH BRD v2.2 (signed), Module 02 Product Configurator & Rating, CR-01
Status	Issued for TISPH review
Classification	Confidential

Prepared by iorta TechNXT for TISPH

This document is confidential to Toyota Insurance Services Philippines Corporation and iorta TechNXT.

1 Introduction

1.1 Purpose

This Functional Requirements Specification (FRS) describes how BrokerVerse TISPH delivers BRD requirement **TIS-BRD-PROD-15 Promotions**, end to end: from setting up a promotion and its discount caps, through selecting the promotion on the Motor risk block of a quotation, to the premium, approval, placement, issuance, collection, remittance, commission, endorsement, cancellation, renewal and reporting of a policy that carries a promotion.

It is written for the TISPH business owners who sign it off (TIS Sales, Operations, FGA and Cash Control), for the iorta TechNXT build and test teams, and for User Acceptance Testing. Every functional requirement (FR) traces back to the signed BRD v2.2 and forward to its screens, messages and acceptance criteria.

The BRD requirement reads as below. It was first raised in Gap Analysis Session 2 (18 August 2026), where TISPH Sales confirmed the same wording, and the promo customisation was logged as action item 36 for iorta TechNXT.

TIS-BRD-PROD-15 Promotions (Customization, Phase 1, CR-01). Promo Master (code, description, period start/end, applicable vehicle variants, rates) applying at vehicle level, for new vehicles only, with flexible issuing and remitting rates; the risk block selects the promo and auto-fetches the mapped rate; discounts capped min/max per product and channel, applied to gross premium.

1.2 Scope

In scope

- Promo Master: create, maintain, approve (maker-checker), version, suspend, resume and withdraw promotions with code, description, period, products, insurers, channels, vehicle condition, quota, lock-in and combinability.
- Vehicle variant mapping per promotion (make, model, variant, year model range, FMV range, insurer) with promo issuing rate, minimum issuing rate and promo remitting rate, or a gross premium discount %, entered on screen or uploaded from Excel.
- Discount Caps master: minimum and maximum discount % per product and channel, the minimum issuing rate (rate floor) and the approval threshold, with effectivity and maker-checker.
- Validation of every promo line against the caps when the promo is set up, and again at rating.
- Motor risk block: eligibility check (brand-new vehicle, product, insurer, channel, variant, year model, FMV, period, quota), selection of the promo, automatic fetch of the mapped rates, flexible rate change by authorised users within the promo floor, discount computed on gross premium and capped.
- Approval routing of quotations whose discount is above the approval threshold, re-validation on new quotation versions, extension and conversion to policy.
- Downstream effects: placement file, policy booking, collection, net remittance at the promo remitting rate, commission spread and sharing, endorsements, cancellations and renewals (lock-in).
- Promo Utilisation Report, promo columns on the production, net remittance and SOA reports, notifications, audit trail and access rights.

Out of scope

- Promotions on non-Motor lines (Personal Accident, Credit Life, Parcel / Courier). The Parcel / Courier pricing is documented in Appendix B for reference only, as requested by TISPH.
- Bundled dealer schemes (Scheme 1 and Scheme 2) - covered by TIS-BRD-SCHM-01 and SCHM-02. This FRS only defines how a promo and a scheme interact (not combinable by default).

- Generic discounts and loadings (TIS-BRD-PROD-09) and the No-Claims Bonus (PROD-14), except for the combinability rule.
- Marketing campaign management, vouchers, customer-facing promo codes and loyalty points.
- Insurer API integration (held for a later phase per BRD section 5.13): promo data reaches the insurer on the placement file.

1.4 Definitions and acronyms

Table 2: Definitions and acronyms

Term	Meaning in this FRS
Promo	A promotion held on the Promo Master: a time-bound reduced rate or discount offered on new vehicles of selected variants, products, insurers and channels.
Promo line	One row of the variant mapping of a promo: a vehicle variant (with year model, FMV range and insurer) and its promo rates or discount %.
Standard issuing rate	The rate charged to the customer without a promo: the Motor default issuing rate of 2.00% on Own Damage / Theft and Acts of Nature (PROD-12), or the rate card of the insurer (PROD-13).
Standard remitting rate	The net rate TISPH remits to the insurer without a promo: 1.70% (COMM-06), from the commission rules (PROD-16).
Promo issuing rate	The reduced rate charged to the customer on the promo perils when the promo is selected.
Minimum issuing rate (line)	The lowest issuing rate an authorised user may apply on a promo line ("flexible issuing rate"). Equal to the promo issuing rate when no flexibility is given.
Promo remitting rate	The net rate remitted to the insurer on the promo perils when the promo is used, as agreed with the insurer ("flexible remitting rate").

Term	Meaning in this FRS
Rate spread	Issuing rate minus remitting rate on the promo perils x FMV: the TISPH commission before sharing (COMM-06).
Gross premium	Basic premium (Own Damage / Theft, Acts of Nature, VTPL-BI, VTPL-PD and other covers) plus DST, VAT and LGT.
Discount (promo)	Standard gross premium minus gross premium with the promo. Shown in PHP and as a % of the standard gross premium.
Rate discount %	(standard issuing rate - minimum issuing rate of the line) / standard issuing rate x 100. The worst-case discount used to check a promo line against the caps when it is set up.
Discount cap	Minimum and maximum discount % allowed for a product through a channel, with the minimum issuing rate (floor) and the approval threshold.
Brand-new vehicle	A vehicle whose condition is Brand New, whose year model is not older than the inception year minus the tolerance (default 1) and that has no previous policy on record (section 4.3).
Lock-in promo	A promo whose rate is kept on renewal for a set number of years (TIS-BRD-SCHM-03, RPT-SLS-05).
AON / OD / TH	Acts of Nature / Own Damage / Theft (Motor perils).
DST / VAT / LGT	Documentary Stamp Tax / Value Added Tax / Local Government Tax.
FMV / SRP	Fair Market Value / Suggested Retail Price.
TFS / TFSPH	Toyota Financial Services Philippines.
VTPL-BI / VTPL-PD	Voluntary Third Party Liability - Bodily Injury / Property Damage.
FGA / CCD	Finance and General Accounting Department / Cash Control Department.

1.5 How to read the functional requirements

Each FR in chapter 4 has the same parts:

- A header table with the **BRD trace**, the **actor**, the **priority**, the **fit** (BRD fitment: Available, Configuration or Customization), the **screens** and the **API** that implement it.
- **Description, preconditions, main flow and alternate and exception flows.**
- **Business rules.** Configurable rules are maintained by the Product Administrator, the Business Administrator or the System Administrator in BrokerVerse (parameter, list of values or master, chapter 9). Fixed rules are part of the system and change only through a change request.
- **Validations and messages:** the check, the message the user sees and its code. Text in angle brackets (<code>) is filled in by the system. The complete list is in chapter 15.
- **Notifications, audit and numbered acceptance criteria.** The acceptance criteria are the basis of the PROD-15 test cases (TC-PRM-nnn-n, where nnn is the FR number and n the criterion).

Note. Values marked "default" (rates, caps, thresholds, days, list entries) and all amounts in the examples are illustrative values delivered with the build or used for testing. They are configuration, so a different TISPH value does not need a new build. Insurer names in examples are placeholders (Insurer A, B, C).

Table 3: Priorities

Priority	Meaning
Must have	Required for Phase 1 go-live (all PROD-15 FRs; CR-01 priority Must)
Should have	Required for Phase 1 but a manual workaround exists for go-live

2 Business context and process overview

2.1 Business context

TISPH is an insurance broker for the Toyota ecosystem: about 95% of its Motor leads come from Toyota Financial Services with the loan account and vehicle details attached. To support vehicle launches and sales campaigns, Toyota, TISPH and the insurer panel agree time-bound promotional insurance rates for selected new vehicle variants - for example a launch rate of 1.50% instead of the standard 2.00% issuing rate on Own Damage / Theft and Acts of Nature for a new model. The insurer agrees the net rate it receives (the remitting rate), so the TISPH commission spread changes with the promo.

In Gap Analysis Session 2 TISPH also confirmed that when a promo applies, the Motor excess is no longer 5% of the sum insured but a fixed amount: PHP 2,000 for a Private Car and PHP 3,000 for a Commercial Vehicle. Placement is direct to one insurer per quotation, so a promo is always quoted with a single insurer in mind.

Today these promos are tracked outside the system. Sales applies them by manual rate override, which the BRD restricts to about 20 internal users (PROD-12) and locks for external agents. There is no central control of which variants, channels and dates a promo covers, no consistent cap on the discount, and no reliable report of promo usage and cost. PROD-15 replaces this with a controlled Promo Master linked to the Motor rating engine.

The business objectives are:

- Offer each promo exactly as agreed - right variants, products, insurers, channels and dates - without manual rate overrides.
- Keep every discount within the minimum and maximum agreed per product and channel, with approval for large discounts.
- Remit the right net premium to the insurer and compute the right commission and sharing when a promo is used.
- Know at any time how many units used each promo and what it cost.

2.2 Process overview

Figure 1 shows the end-to-end process by role. Set-up happens once per promo; the quotation-to-renewal path runs for every vehicle that carries a promo.

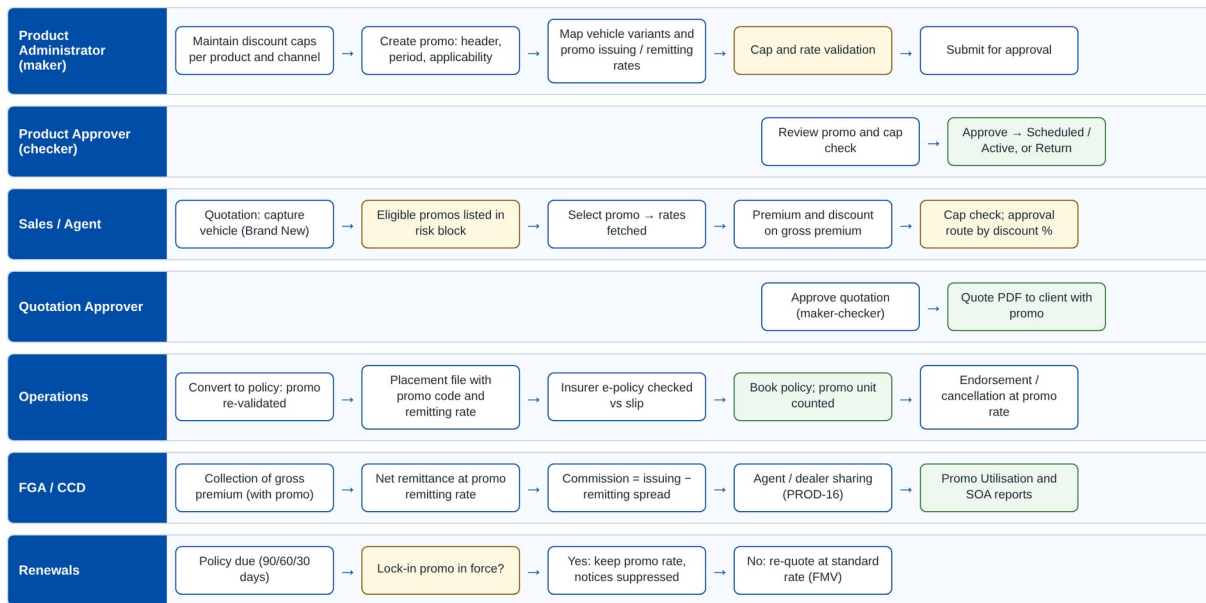

Figure 1: End-to-end promo process by role

Table 4: Process steps

Step	Who	What happens	FR
1	Product Administrator	Sets up or reviews the discount caps per product and channel (min / max discount, minimum issuing rate, approval threshold).	FR-PRM-010
2	Product Administrator	Creates the promo: code, description, period, products, insurers, channels, quota, lock-in, combinability.	FR-PRM-001, 002
3	Product Administrator	Maps the vehicle variants with promo issuing, minimum issuing and remitting rates (screen or Excel upload). The system checks each line against the caps.	FR-PRM-003, 011
4	Product Approver	Approves or returns the promo (maker-checker). Approved promos become Scheduled, then Active on the start date.	FR-PRM-004, 005
5	Sales / Agent	On a Motor quotation for a brand-new vehicle, the risk block lists the eligible promos; the user selects one and the mapped rates are fetched.	FR-PRM-020, 021
6	System	Rates the vehicle, computes the discount on gross premium, checks the caps and decides the approval route.	FR-PRM-022, 023
7	Quotation Approver	Approves the quotation; the quote PDF shows the promo and the discount.	FR-PRM-024, 026
8	Operations	Converts the quotation to a policy (promo re-validated), sends the placement file with the promo code and remitting rate, checks the insurer e-policy and books it.	FR-PRM-024, 030
9	FGA / CCD	Collects the gross premium, remits at the promo remitting rate, computes commission and sharing.	FR-PRM-031
10	Operations / Renewals	Endorsements and cancellations keep the promo rate; renewal re-quotes at the standard rate unless a lock-in applies.	FR-PRM-032, 033, 034
11	All	Promo Utilisation Report, notifications, audit.	FR-PRM-040 - 043

2.3 Products, channels and perils covered

Table 5: Promo dimensions

Dimension	Values in Phase 1	Source
Products	Motor - Private Car, Motor - Commercial Vehicle, Motor - Motorcycle (Comprehensive cover only)	PROD-03 Product Master
Insurers	The four panel insurers (two more to be confirmed by PM)	MAS-04 Insurer Panel
Channels	TFS, Toyota dealer network, Direct, Online, Referral, Agent	MAS-07 Channels & Source of Business
Vehicles	Make / model / variant / body type from the Vehicle Master; brand-new only	MAS-09 Vehicle Master
Perils a promo rate applies to	Own Damage / Theft and Acts of Nature (default); VTPL-BI, VTPL-PD and Auto PA stay at their rate-card premium	PROD-12, COMM-06
Business types	New business (first-year policy) only; renewal only under a lock-in promo	PROD-15, SCHM-03

3 Personas and roles

3.1 Personas

Table 6: Personas

Persona	Unit	What they do with promos
Product Administrator	TIS Sales / Product (Configuration Studio maker)	Maintains promos, variant mappings and discount caps; submits them for approval; monitors usage
Product Approver	TIS Sales Head / Product Head	Approves or returns promos and caps; suspends, resumes and withdraws promos
Sales Officer / Telesales (internal)	TIS Sales	Selects promos on quotations; authorised users (rate override list, about 20 users) may use the flexible rate range
Agent / TFS team member / Referral (external)	Agents and dealers	Selects promos on quotations; cannot change any rate (PROD-12)
Quotation Approver	Sales Supervisor / Sales Head	Approves quotations; quotations above the approval threshold go to the role named on the cap
Operations (Policy Issuance)	Operations	Converts quotations to policies, sends placements, books policies, processes endorsements and cancellations
FGA / Cash Control	Finance	Collections, net remittance, commission and sharing; uses the promo reports
System Administrator	DTID - IT App Support	Parameters, roles and permissions
Auditor	Internal Audit / Compliance	Read-only access to promos, caps, history and reports

3.2 Permissions

Table 7: Permissions

Permission	Allows
PROMO_VIEW	Open the Promo Master list and records, export the list
PROMO_MAINTAIN	Create, edit, amend and submit promos; upload variant mappings
PROMO_APPROVE	Approve or return promos submitted by another user
PROMO_LIFECYCLE	Suspend, resume and withdraw active or scheduled promos
DISCOUNT_CAP_MAINTAIN	Create, end-date and submit discount caps
DISCOUNT_CAP_APPROVE	Approve or return discount caps submitted by another user
PROMO_SELECT	Select or remove a promo on the Motor risk block
PROMO_RATE_OVERRIDE	Change the issuing rate of a selected promo within the line minimum (flexible issuing rate)
PROMO_REPORT_VIEW	Run and download the Promo Utilisation Report

3.3 Permissions matrix

Table 8: Permissions by persona (Y = granted by default)

Permission	Prod. Admin	Prod. Approver	Sales (int.)	Agent (ext.)	Quote Approver	Ops	FGA / CCD	Sys. Admin	Auditor
PROMO_VIEW	Y	Y	Y	-	Y	Y	Y	Y	Y
PROMO_MAINTAIN	Y	-	-	-	-	-	-	-	-

Permission	Prod. Admin	Prod. Approver	Sales (int.)	Agent (ext.)	Quote Approver	Ops	FGA / CCD	Sys. Admin	Auditor
PROMO_APPROVE	-	Y	-	-	-	-	-	-	-
PROMO_LIFECYCLE	-	Y	-	-	-	-	-	-	-
DISCOUNT_CAP_MAINTAIN	Y	-	-	-	-	-	-	-	-
DISCOUNT_CAP_APPROVE	-	Y	-	-	-	-	-	-	-
PROMO_SELECT	-	-	Y	Y	Y	Y	-	-	-
PROMO_RATE_OVERRIDE	-	-	Listed users	-	Y	-	-	-	-
PROMO_REPORT_VIEW	Y	Y	Y	-	Y	Y	Y	-	Y

Segregation of duties. The maker of a promo or cap can never approve it, even if the same user holds both permissions (TIS-BRD-SEC-03). The System Administrator grants permissions through the role profiles of TIS-BRD-SEC-01; the defaults above are configuration.

4 Functional requirements

Twenty-five FRs implement PROD-15. They are grouped by the part of the process they serve: the Promo Master (4.1), the discount caps (4.2), the eligibility rule for new vehicles (4.3), the Motor risk block and rating (4.4), the policy life cycle after the quotation (4.5) and the cross-cutting reports, notifications, audit and access (4.6).

4.1 Promo Master

FR-PRM-001 Create a promo with its code, description and period

BRD trace	PROD-15 (p.23) "Promo Master (code, description, period start/end ...)" ; PROD-01; MOM Session 2	Actor	Product Administrator
Priority	Must have	Fit	Customization
Screens	SCR-PRM-01 Promo Master list; SCR-PRM-02 Promo Master record - General tab	API	POST /api/v1/catalog/promos; PUT /api/v1/catalog/promos/{id}

Description

The Product Administrator creates a promo on the Promo Master. The General tab holds the identity and the period of the promo; the Applicability tab (FR-PRM-002) and the Vehicle Variants & Rates tab (FR-PRM-003) complete it. A new promo is saved as **Draft, version 1** and can be saved as often as needed before it is submitted (FR-PRM-004).

The promo code is entered by the user (for example PRM-VELOZ26) because Sales and the insurers refer to promos by their campaign name; it is unique across all versions and statuses and cannot be changed after the first save. The period is inclusive: a promo with period 01-Oct-2026 to 31-Dec-2026 is offered on quotations created from 01-Oct-2026 00:00 to 31-Dec-2026 23:59 (Philippine time).

Preconditions

- The user has PROMO_MAINTAIN.
- At least one Motor product, insurer and channel exist on their masters.

Main flow

1. The user opens Product Configurator > Promo Master and clicks **+ New Promo**.
2. The user enters the promo code, description, period start and end, the promo benefit type (Promo rate or Gross premium discount %), the fixed promo excess per product, the optional unit quota, lock-in period and remarks.
3. The user clicks **Save Draft**. The system validates the fields, assigns version 1 and status Draft, and shows "Promo <code> v<n> saved as draft".
4. The user continues with the Applicability and Vehicle Variants & Rates tabs.

Alternate and exception flows

- **Copy promo:** from the list the user opens any promo and clicks Copy; the system creates a new Draft with all tabs copied, a blank code and blank period.
- **Cancel:** unsaved changes are discarded after confirmation.
- **Delete draft:** a Draft version 1 that was never submitted can be deleted by its maker; any other version cannot be deleted (only withdrawn).

Business rules

Rule	Statement	Kind	Maintained in
R1	Promo code: capital letters, digits and hyphens, 3 to 20 characters, unique across all promos. Not editable after the first save.	Fixed	-
R2	Period start must be today or later when the promo is submitted and approved; promos are never retroactive.	Fixed	-
R3	Period length at most PRM_MAX_PERIOD_MONTHS (default 12 months). A lock-in promo still has a normal sales period; the lock-in applies to renewals.	Configurable	Parameter PRM_MAX_PERIOD_MONTHS
R4	Promo benefit type: Promo rate (replaces the issuing rate on the promo perils) or Gross premium discount % (a % taken off the gross premium). One type per promo.	Configurable list	LOV PROMO_BENEFIT_TYPE
R5	Unit quota (optional): the number of vehicles that may be booked with the promo. Blank = no quota.	Configurable per promo	Promo Master
R6	Promo excess: a fixed excess amount per product replaces the 5% compulsory excess while the promo applies. Defaults from Gap Analysis Session 2: Private Car PHP 2,000, Commercial Vehicle PHP 3,000; Motorcycle to be confirmed (Q-14).	Configurable per promo	Promo Master (General tab)
R7	Lock-in period (optional): 1 to PRM_MAX_LOCKIN_YEARS (default 3) years. When set, renewals within the lock-in keep the promo rate (FR-PRM-034).	Configurable per promo	Promo Master; parameter PRM_MAX_LOCKIN_YEARS

Validations and messages

Check	Message shown	Code
Code blank	Enter the promo code	PROMO_CODE_REQUIRED
Code format	The promo code may contain only capital letters, numbers and hyphens, up to 20 characters	PROMO_CODE_FORMAT
Code already used	Promo code <code> already exists	PROMO_CODE_DUPLICATE
Description blank	Enter the promo description	PROMO_DESC_REQUIRED
End before start	The period end must be on or after the period start	PROMO_PERIOD_INVALID
Start before today	The period start cannot be before today	PROMO_START_IN_PAST
Period too long	A promo period cannot be longer than <n> months	PROMO_PERIOD_TOO_LONG
Quota not a positive whole number	The unit quota must be a whole number of 1 or more	PROMO_QUOTA_INVALID
Lock-in out of range	The lock-in period must be between 1 and <n> years	PROMO_LOCKIN_RANGE

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. A promo saved with code PRM-VELOZ26, period 01-Oct-2026 to 31-Dec-2026 and type Promo rate is listed as Draft v1.
2. Saving a second promo with code PRM-VELOZ26 is refused with PROMO_CODE_DUPLICATE.

3. A period start of yesterday is refused with PROMO_START_IN_PAST; a period of 13 months is refused with PROMO_PERIOD_TOO_LONG.
4. The code field is read-only after the first save.
5. Copy of PRM-VELOZ26 creates a Draft with the same applicability and variant lines and a blank code and period.

FR-PRM-002 Define where a promo applies: products, insurers, channels and conditions

BRD trace	PROD-15 "discounts capped min/max per product and channel"; MAS-04, MAS-07; SCHM-01; PROD-09	Actor	Product Administrator
Priority	Must have	Fit	Customization
Screens	SCR-PRM-02 Promo Master record - Applicability tab	API	PUT /api/v1/catalog/promos/{id}

Description

The Applicability tab says to whom and on what a promo is offered. Each dimension is a multi-select on its master; the risk block offers the promo only when every dimension matches the quotation (FR-PRM-020).

Vehicle condition is fixed to Brand New for every promo: the BRD restricts promos to new vehicles. The promo also says whether it can be combined with a dealer scheme (SCHM-01) and with a generic discount (PROD-09); both default to No.

Preconditions

- The promo is in Draft.

Main flow

1. The user opens the Applicability tab.
2. The user selects the products (Motor - Private Car, Commercial Vehicle, Motorcycle), the insurers and the channels.
3. Optionally the user restricts the promo to offices / branches (blank = all offices).
4. The user sets **Combinable with scheme** and **Combinable with additional discount** (default No) and the perils the promo rate applies to (default Own Damage / Theft and Acts of Nature).
5. The user saves. For each product x channel selected, the system checks that an approved discount cap exists for the promo period (FR-PRM-011).

Alternate and exception flows

- If a channel has no approved cap, the promo can be saved as Draft but cannot be submitted (PROMO_CAP_NOT_DEFINED).
- Removing an insurer that is named on a variant line removes the insurer from that line after confirmation; a line left with no insurer applies to all insurers of the promo.

Business rules

Rule	Statement	Kind	Maintained in
R1	Products must be Motor products with Comprehensive cover. TPL-only policies never carry a promo.	Fixed	-
R2	Vehicle condition is Brand New and business type is New Business. Not editable.	Fixed	-
R3	Promo perils default to Own Damage / Theft and Acts of Nature, in line with the issuing-vs-remitting perils of COMM-06. Other perils can be added only if TISPH confirms (Q-08).	Configurable	Promo Master; LOV MOTOR_PERILS

Rule	Statement	Kind	Maintained in
R4	A promo with Combinable with scheme = No is not offered on a vehicle under Scheme 1 or Scheme 2.	Configurable per promo	Promo Master
R5	A promo with Combinable with additional discount = No blocks a generic discount (PROD-09) on the same vehicle; when Yes, promo and generic discount together must stay within the maximum cap.	Configurable per promo	Promo Master
R6	Offices blank = all offices.	Fixed	-

Validations and messages

Check	Message shown	Code
No product	Select at least one product	PROMO_PRODUCT_REQUIRED
Non-Motor product	Promos apply to Motor products only	PROMO_PRODUCT_NOT_MOTOR
No insurer	Select at least one insurer	PROMO_INSURER_REQUIRED
No channel	Select at least one channel	PROMO_CHANNEL_REQUIRED
Product x channel without approved cap (on submit)	No approved discount cap is set up for <product> through <channel>	PROMO_CAP_NOT_DEFINED

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. A promo for Motor - Private Car, Insurer A and B, channels TFS and Direct is offered only on quotations matching all three.
2. Selecting Personal Accident is refused with PROMO_PRODUCT_NOT_MOTOR.
3. With channel Online selected and no Online cap, submit is refused with PROMO_CAP_NOT_DEFINED.
4. The Vehicle condition shows Brand New and cannot be changed.
5. A promo with Combinable with scheme = No is not listed on a Scheme 1 vehicle.

FR-PRM-003 Map vehicle variants and their promo issuing and remitting rates

BRD trace	PROD-15 "applicable vehicle variants, rates ... flexible issuing and remitting rates"; MAS-09; PROD-04; COMM-06; BULK-01	Actor	Product Administrator
Priority	Must have	Fit	Customization
Screens	SCR-PRM-02 - Vehicle Variants & Rates tab; SCR-PRM-05 Upload Variant Mapping	API	PUT /api/v1/catalog/promos/{id}/lines; POST /api/v1/catalog/promos/{id}/lines/upload

Description

The variant mapping lists the vehicles a promo applies to and the rates of each. A line is one variant of the Vehicle Master with a year model range, an optional FMV range and an optional insurer (blank = every insurer of the promo). Different variants of the same model can carry different rates.

For a **Promo rate** promo each line holds three rates on the promo perils: the **promo issuing rate** (charged to the customer), the **minimum issuing rate** (the lowest rate an authorised user may apply - the "flexible issuing rate"; equal to the promo rate when there is no flexibility) and the **promo remitting rate** (the net rate agreed with the insurer - the "flexible remitting rate"). For a **Gross premium discount %** promo each line holds the discount % (and an optional maximum %, for flexibility) and the remitting rate stays the standard one unless a promo remitting rate is entered.

For every line the system shows the reference standard issuing and remitting rates of the product and insurer (PROD-12, PROD-13, PROD-16), computes the **rate discount %** and shows the cap check result per channel (FR-PRM-011).

Preconditions

- The promo is in Draft. Applicability is saved.
- The variants are active on the Vehicle Master (MAS-09).

Main flow

1. The user opens the Vehicle Variants & Rates tab and clicks **+ Add variant**.
2. The user picks make, model and variant from the Vehicle Master (type-ahead), enters the year model from / to, the FMV from / to (optional) and the insurer (optional).
3. The user enters the promo issuing rate, minimum issuing rate and promo remitting rate (or the discount %).
4. The system computes the rate discount % and the cap check per channel and shows them on the line.
5. The user repeats for each variant, or uploads the mapping from Excel (FR-PRM-003 alternate flow), and saves.

Alternate and exception flows

- **Upload:** the user clicks Upload, downloads the Promo Variant Mapping template (chapter 18), fills it and uploads it. Valid rows are added to the Draft (or replace all lines, if the user chooses Replace); rejected rows are listed in a result file with the row number and message. Only .xlsx is accepted (BULK-01).
- **Apply to all variants of a model:** the user picks a model and "All variants"; the system creates one line per active variant with the same rates, which the user can then edit.
- **Variant later inactivated** on the Vehicle Master: the line stays on the promo but is not offered; the promo record shows a warning icon on the line.

Business rules

Rule	Statement	Kind	Maintained in
R1	Rates are percentages with up to 4 decimals, more than 0 and at most 100.	Fixed	-
R2	Promo remitting rate <= promo issuing rate; minimum issuing rate <= promo issuing rate; minimum issuing rate >= promo remitting rate.	Fixed	-
R3	Rate discount % = (standard issuing rate - minimum issuing rate) / standard issuing rate x 100, rounded to 2 decimals. For a discount % promo it is the maximum discount % of the line.	Fixed	-
R4	Two lines may not overlap on the same variant, year model and insurer.	Fixed	-
R5	A promo issuing rate equal to or higher than the standard rate gives a warning, not an error (the promo may exist only for its remitting rate).	Fixed	-
R6	Upload: .xlsx only, at most PRM_UPLOAD_MAX_ROWS rows (default 2,000).	Configurable	Parameter PRM_UPLOAD_MAX_ROWS

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. A line Toyota Veloz 1.5 V CVT, 2026-2027, promo issuing 1.50, minimum 1.50, remitting 1.30 shows a rate discount of 25.00% against a standard rate of 2.00%.
2. A remitting rate of 1.60 with an issuing rate of 1.50 is refused with PROMO_REMIT_ABOVE_ISSUE.
3. Two lines for Veloz 1.5 V CVT with year models 2026-2027 and 2027-2028 for the same insurer are refused with PROMO_VARIANT_DUPLICATE.
4. An upload of 10 rows with 2 invalid rows loads 8 lines and returns a result file with the 2 rows and their messages.
5. A .csv upload is refused with UPLOAD_FILE_TYPE.

FR-PRM-004 Submit, approve or return a promo (maker-checker)

BRD trace	PROD-03 maker-checker on registers; SEC-03; PROD-15	Actor	Product Administrator (maker), Product Approver (checker)
Priority	Must have	Fit	Customization

Screens	SCR-PRM-02; SCR-PRM-03 Promo approval (My Approvals)	API	POST /api/v1/catalog/promos/{id}/submit /approve /return
----------------	--	------------	--

Description

A promo, and every new version of it, needs approval by a Product Approver other than its maker before it can be offered. On submit the system runs all validations of FR-PRM-001 to 003 and the cap check of FR-PRM-011; a promo with any error cannot be submitted.

On approval the promo becomes **Scheduled** when its start date is in the future, or **Active** when the start date is today. A returned promo goes back to Draft with the approver's remark.

Preconditions

- The promo is in Draft and has passed all validations.

Main flow

- The maker clicks **Submit for Approval**. The status becomes Pending Approval; the record is read-only; the approvers are notified (NT-PRM-01).
- The approver opens the item from My Approvals. SCR-PRM-03 shows the promo, its lines with the cap check, and for an amended version the differences with the previous version highlighted.
- The approver clicks **Approve** (optional remark) or **Return** (remark mandatory).
- On approval the system sets Scheduled or Active, records the approver and time, and notifies the maker (NT-PRM-02) and, when Active, the Sales distribution list (NT-PRM-03).

Alternate and exception flows

- The approval page is opened after the start date has passed: Approve is refused (PROMO_APPROVE_START_PASSED); the approver returns the promo so the maker can correct the period.
- The maker recalls a submitted promo before it is approved: the status goes back to Draft.

Business rules

Rule	Statement	Kind	Maintained in
R1	The maker (creator or last editor of the version) can never approve or return it.	Fixed	-
R2	Only one version of a promo can be in Draft or Pending Approval at a time.	Fixed	-
R3	Approval routing: any user with PROMO_APPROVE. An optional second level (for example promos with a rate discount above 20%) can be added in the workflow configuration.	Configurable	Configuration Studio - workflow PROMO_APPROVAL

Validations and messages

Check	Message shown	Code
Self-approval	You cannot approve or return a promo you created or amended	PROMO_SELF_APPROVAL
Return without remark	Enter the reason for returning the promo	PROMO_RETURN_REMARK
Start date passed	The period start <date> has passed. Return the promo so the maker can correct the period	PROMO_APPROVE_START_PASSED
Pending version exists	Promo <code> already has version <n> in Draft or Pending Approval	PROMO_PENDING_VERSION_EXISTS

Notifications

- NT-PRM-01 Promo awaiting approval - to Product Approvers.
- NT-PRM-02 Promo approved / returned - to the maker.
- NT-PRM-03 Promo now active - to the Sales distribution list.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. A promo submitted by user A cannot be approved by user A (PROMO_SELF_APPROVAL), even when A holds PROMO_APPROVE.
2. Approving on 25-Sep-2026 a promo starting 01-Oct-2026 sets it to Scheduled; approving a promo starting today sets it to Active.
3. Return without a remark is refused; with a remark the promo goes back to Draft and the maker is notified.
4. A promo with a line above the maximum cap cannot be submitted.

FR-PRM-005 Run the promo life cycle: scheduled, active, suspended, expired, withdrawn

BRD trace	PROD-15 "period start/end"; NOTIF-01	Actor	System (daily job); Product Approver
Priority	Must have	Fit	Customization
Screens	SCR-PRM-01; SCR-PRM-02 lifecycle dialogs	API	POST /api/v1/catalog/promos/{id}/suspend /resume /withdraw

Description

A daily job at 00:05 moves Scheduled promos whose start date is today to Active and Active promos whose end date has passed to Expired. A promo whose quota is fully used also moves to Expired. The Product Approver can suspend an active promo (for example while a rate is renegotiated with the insurer), resume it, or withdraw it (the end date becomes today).

Only **Active** promos are offered on the risk block. A quotation that already carries a promo keeps it until the quotation validity ends, even if the promo is later suspended, withdrawn or expired (FR-PRM-024).

Preconditions

- The promo is approved (Scheduled or Active).

Main flow

1. The daily job evaluates every Scheduled and Active promo and changes the status where the date or quota rule is met.
2. The job sends NT-PRM-04 (promo ending in 7 days), NT-PRM-05 (expired) and NT-PRM-06 (quota at 90% / reached) where they apply.
3. For a manual action the approver opens the promo, clicks Suspend, Resume or Withdraw, enters the reason and confirms. When open quotations carry the promo the system warns with their number (PROMO_OPEN_QUOTES).

Alternate and exception flows

- Withdraw on a Scheduled promo: the promo becomes Withdrawn and is never offered.
- Resume after the end date: not possible; the promo is Expired.

Business rules

Rule	Statement	Kind	Maintained in
R1	Status set: Draft, Pending Approval, Scheduled, Active, Suspended, Expired, Withdrawn (chapter 5).	Fixed	-
R2	A promo counts one unit for each vehicle booked as a policy with the promo; cancelled-from-inception policies give the unit back.	Fixed	-
R3	Expiry notice lead time PRM_EXPIRY_ALERT_DAYS (default 7) and quota alert PRM_QUOTA_ALERT_PCT (default 90%).	Configurable	Parameters
R4	Open quotations keep the promo after suspension, withdrawal or expiry until the end of their 30-day validity (QUOT-04).	Configurable	Parameter PRM_HONOUR_ON_QUOTE_VALIDITY (default Yes)

Validations and messages

Check	Message shown	Code
Reason blank	Enter the reason	PROMO_ACTION_REMARK
Open quotations exist	<n> open quotation(s) carry this promo. They keep it until their validity ends	PROMO_OPEN_QUOTES

Notifications

- NT-PRM-03 active, NT-PRM-04 ending soon, NT-PRM-05 expired, NT-PRM-06 quota, NT-PRM-07 suspended / withdrawn.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

- A Scheduled promo with start date 01-Oct-2026 is Active after the job of 01-Oct-2026.
- An Active promo with end date 31-Dec-2026 is Expired after the job of 01-Jan-2027.
- A promo with quota 500 becomes Expired when the 500th policy with the promo is booked.
- A suspended promo is not listed on the risk block of a new quotation; a quotation rated with it before the suspension keeps it.
- Withdraw sets the end date to today and the status to Withdrawn.

FR-PRM-006 Amend an approved promo as a new version

BRD trace	PROD-01 versioned configuration; PROD-15	Actor	Product Administrator, Product Approver
Priority	Must have	Fit	Customization
Screens	SCR-PRM-02	API	POST /api/v1/catalog/promos/{id}/amend

Description

An approved promo is never edited in place. **Amend** creates version n+1 in Draft, copied from the current version. The current version stays in force until the new one is approved; on approval the new version replaces it from the approval time (or from its own start date if later).

Quotations already rated keep the version they used. A new version of a quotation (QUOT-04) re-fetches the current version and shows PROMO_VERSION_CHANGED when the rates changed.

Preconditions

- The promo is Scheduled, Active or Suspended. No other version is in Draft or Pending Approval.

Main flow

- The user clicks **Amend**. The system creates the Draft version and opens it.
- The user changes the end date, applicability, lines or rates and submits; approval follows FR-PRM-004.
- On approval the previous version becomes Superseded (history only).

Alternate and exception flows

- The user discards the Draft version: the current version is unchanged.

Business rules

Rule	Statement	Kind	Maintained in
R1	The code and the benefit type cannot be amended; the start date can be amended only while the promo is Scheduled.	Fixed	-
R2	The period end may be shortened or extended (within the maximum period).	Fixed	-
R3	The unit count carries over across versions of the same promo.	Fixed	-

Validations and messages

Check	Message shown	Code
Edit of an approved version	Promo <code> is <status> and cannot be changed. Use Amend to create a new version	PROMO_NOT_EDITABLE
Second pending version	Promo <code> already has version <n> in Draft or Pending Approval	PROMO_PENDING_VERSION_EXISTS

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

- Amending PRM-VELOZ26 v1 creates v2 Draft; v1 stays Active and offered until v2 is approved.
- After v2 is approved, a new quotation uses v2 rates; a quotation rated on v1 still shows v1.
- The approval page of v2 highlights the lines and fields that differ from v1.

FR-PRM-007 Search, view and export promos

BRD trace	PROD-15; RPT-01	Actor	Any user with PROMO_VIEW
Priority	Must have	Fit	Customization
Screens	SCR-PRM-01	API	GET /api/v1/catalog/promos

Description

The Promo Master list shows every promo with code, description, products, insurers, channels, period, number of variant lines, current version, status and units used / quota. Tabs filter by status; filters cover code or description, product, insurer, channel, status and "active on date". The list exports to Excel with the lines of each promo.

Main flow

1. The user opens Promo Master, sets filters and clicks Search.
2. The user opens a promo; the Approval & History tab lists every version with maker, approver, dates and remarks.
3. The user clicks Export to download the list and lines (.xlsx).

Business rules

Rule	Statement	Kind	Maintained in
R1	Default sort: status (Active first), then start date descending; 25 rows per page.	Fixed	-

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. Filter "active on date" 15-Nov-2026 lists only promos whose period covers that date and whose status is Active or Scheduled.
2. Export produces one sheet of promos and one sheet of lines with the same filters.

4.2 Discount caps

FR-PRM-010 Maintain discount caps per product and channel

BRD trace	PROD-15 "discounts capped min/max per product and channel"; PROD-09 (TISPH remark: approval hierarchy based on minimum issuing rate)	Actor	Product Administrator (maker), Product Approver (checker)
Priority	Must have	Fit	Customization
Screens	SCR-PRM-04 Discount Caps	API	GET/POST /api/v1/catalog/discount-caps; POST .../{id}/approve

Description

The Discount Caps master holds, per **product x channel** and effective period: the **minimum discount %** and **maximum discount %** a promo may give on the gross premium, the **minimum issuing rate %** (the rate floor below which no promo or override may go) and the **approval threshold %** with the **approver role** for quotations whose discount is above the threshold.

Caps are dated: a change is a new cap record with a new effective from date, approved by a checker. The cap in force on the quotation date applies at rating.

Preconditions

- Products and channels exist.

Main flow

1. The user opens Discount Caps and clicks **+ New Cap**.
2. The user enters product, channel, min %, max %, minimum issuing rate, approval threshold and approver role, effective from (and optional effective to).

3. The system validates and lists the active promo lines that would fall outside the new cap (CAP_AFFECTS_PROMOS).
4. The user submits; a Product Approver approves or returns it (maker-checker).

Alternate and exception flows

- End-dating a cap: the user enters an effective to date on an approved cap; this also needs approval.
- No cap for a product x channel: no promo can be submitted or used for it.

Business rules

Rule	Statement	Kind	Maintained in
R1	0 <= min % <= max % <= 100; min % <= threshold <= max %.	Fixed	-
R2	Only one approved cap per product x channel may cover any date.	Fixed	-
R3	Default caps delivered for testing (to be confirmed by TIS Sales, Q-07): Private Car - TFS 0-25%, floor 1.40%, threshold 15%; Dealer 0-20%, floor 1.50%, threshold 10%; Direct 0-25%, floor 1.40%; Referral 0-15%, floor 1.60%; Online 0-10%, floor 1.70%.	Configurable	Discount Caps master
R4	A new cap applies to ratings from its effective date; promo lines outside it are not offered from that date and the Product Administrator is notified (NT-PRM-09).	Fixed	-

Validations and messages

Check	Message shown	Code
Mandatory fields	Enter the product, channel, minimum and maximum discount, minimum issuing rate and effective from date	CAP_REQUIRED_FIELDS
Range	Discount caps must be between 0% and 100%	CAP_RANGE
Min above max	The minimum discount cannot be higher than the maximum discount	CAP_MIN_ABOVE_MAX
Threshold	The approval threshold must be between the minimum and the maximum discount	CAP_THRESHOLD_RANGE
Overlap	An approved cap for <product> through <channel> already covers <date>	CAP_OVERLAP
Backdated	The effective from date cannot be before today	CAP_FROM_IN_PAST
Self-approval	You cannot approve a cap you created or changed	CAP_SELF_APPROVAL
Impact on promos	<n> line(s) of active promos would be outside the new cap: <list>. These lines will not be offered from <date>	CAP_AFFECTS_PROMOS

Notifications

- NT-PRM-08 Cap awaiting approval / approved.
- NT-PRM-09 Active promo lines outside a new cap.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. A cap Private Car - TFS 0-25%, floor 1.40%, threshold 15% -> Sales Head is saved, approved by another user and listed as Approved.
2. A cap with min 30% and max 25% is refused with CAP_MIN_ABOVE_MAX.

3. A second approved cap for Private Car - TFS covering the same date is refused with CAP_OVERLAP.
4. Lowering the TFS maximum to 20% warns that PRM-VELOZ26 lines 1 and 2 (25%) will not be offered from the effective date.

FR-PRM-011 Check every promo line against the caps at set-up

BRD trace	PROD-15; BRD 7.1 "cap validation"	Actor	System
Priority	Must have	Fit	Customization
Screens	SCR-PRM-02; SCR-PRM-03	API	POST /api/v1/catalog/promos/{id}/validate

Description

On save (as information) and on submit (as a blocking check) the system checks each promo line against the cap of every product x channel of the promo, using the cap in force on the promo start date (and on any later cap effective date within the period). It uses the **rate discount %** - the worst case for the line - so that a promo that passes set-up cannot exceed the cap at rating for any FMV.

Main flow

1. For each line and each product x channel the system reads the cap.
2. It checks: minimum issuing rate of the line $\geq$ cap floor; rate discount % $\leq$ cap max; rate discount % $\geq$ cap min.
3. It shows a Within cap / Above max / Below min / Below floor tag per line and channel and the message for each failure.

Business rules

Rule	Statement	Kind	Maintained in
R1	Rate discount % is an upper bound of the discount on gross premium: VTPL and other covers at full premium only dilute the % (Appendix A.3).	Fixed	-
R2	For a Gross premium discount % promo the line maximum discount % is checked directly against the cap.	Fixed	-

Validations and messages

Check	Message shown	Code
Above max	Line <n>: the rate discount of <x>% is above the maximum discount of <max>% for <product> through <channel>	PROMO_CAP_MAX_EXCEEDED
Below min	Line <n>: the rate discount of <x>% is below the minimum discount of <min>% for <product> through <channel>	PROMO_CAP_MIN_NOT_MET
Below floor	Line <n>: the rate of <r>% is below the minimum issuing rate of <floor>% for <product> through <channel>	PROMO_BELOW_MIN_ISSUING
No cap	No approved discount cap is set up for <product> through <channel>	PROMO_CAP_NOT_DEFINED

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

- Line Veloz 1.5 E CVT with minimum issuing 1.40% (rate discount 30%) on a promo open to TFS (max 25%) shows Above max 25.00% (TFS) and blocks submit.
- The same line on a promo open to Direct only, with floor 1.40% and max 25%, still fails (30% > 25%).
- A line with minimum issuing rate 1.45% against a Dealer floor of 1.50% fails with PROMO_BELOW_MIN_ISSUING.

4.3 New vehicles only

FR-PRM-020 Decide whether a vehicle is eligible for promos

BRD trace	PROD-15 "applying at vehicle level, for new vehicles only"; LEAD-01 (TFS feed); KYC-03	Actor	System
Priority	Must have	Fit	Customization
Screens	SCR-QOT-MTR Motor risk block	API	GET /api/v1/catalog/promos/eligible

Description

Eligibility is decided per vehicle (risk item). A vehicle is **brand new** when all three conditions hold: (1) Vehicle condition = Brand New; (2) year model $\geq$ inception year - PRM_NEW_VEHICLE_YEAR_TOLERANCE (default 1), so a 2026 or 2027 model is new for a policy starting in 2026 or 2027; (3) business type New Business and no earlier policy on record for the same chassis number.

For a brand-new vehicle the system then lists the promos that are Active on the quotation date and match the product, cover (Comprehensive), insurer, channel, office, variant, year model and FMV of the vehicle, whose quota is not used up and which are combinable with any scheme or discount on the vehicle.

Preconditions

- The vehicle details are captured: variant, year model, condition, FMV, chassis number (or TBA).

Main flow

- The user enters or changes the vehicle details, cover, insurer or channel.
- The system evaluates the brand-new rule and calls the eligibility service.
- The risk block shows the number of eligible promos and fills the Promo list (FR-PRM-021). If none, it shows PROMO_NONE_ELIGIBLE and the Promo field is disabled.

Alternate and exception flows

- TFS-fed leads: vehicle condition, year model and SRP come from the TFS account feed (LEAD-01) and are read-only on the quotation.
- Chassis number TBA at quotation: condition (3) is re-checked at conversion to policy, when the chassis number is mandatory (ISSUE-02).
- A renewal quotation never lists promos, except the lock-in promo carried by the policy (FR-PRM-034).

Business rules

Rule	Statement	Kind	Maintained in
R1	Brand-new rule as above; tolerance PRM_NEW_VEHICLE_YEAR_TOLERANCE (default 1 year).	Configurable	Parameter

Rule	Statement	Kind	Maintained in
R2	Vehicle condition list: Brand New, Used / Second-hand, Repossessed (ROPA).	Configurable	LOV VEHICLE_CONDITION
R3	The quotation date (creation of version 1) decides whether the promo period covers the quotation.	Fixed	-

Check	Message shown	Code
Not brand new and promo selected	Promos apply to brand-new vehicles only	PROMO_NOT_NEW_VEHICLE
Cover not Comprehensive	Promos apply to Comprehensive cover only	PROMO_COVER_NOT_COMPREHENSIVE
No promo	No promo is open to this vehicle	PROMO_NONE_ELIGIBLE

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. A 2026 Veloz 1.5 V CVT, Brand New, FMV 1,200,000, TFS, Insurer A, on 08-Oct-2026 lists PRM-VELOZ26.
2. The same vehicle with condition Used lists no promo and shows PROMO_NONE_ELIGIBLE.
3. A 2024 model marked Brand New for a 2026 inception is not eligible (tolerance 1 year).
4. A chassis number already on an earlier policy makes the vehicle ineligible at conversion; the promo is removed with PROMO_REMOVED_RERATED.

4.4 Risk block and rating

FR-PRM-021 Select the promo on the risk block and fetch its mapped rates

BRD trace	PROD-15 "the risk block selects the promo and auto-fetches the mapped rate"; PROD-07; QUOT-02	Actor	Sales Officer, Agent, Quotation Approver
Priority	Must have	Fit	Customization
Screens	SCR-QOT-MTR Motor risk block - Promotion section	API	POST /api/v1/catalog/rating/quote (promold, promoLineId)

Description

The Motor risk block has a **Promotion** section under the vehicle details. The Promo field lists the eligible promos as "code - description (version)". When the user selects one, the system finds the promo line that matches the variant, year model, FMV and insurer and fetches its rates automatically: promo issuing rate, promo remitting rate and minimum issuing rate (or discount %). The fields are read-only for users without PROMO_RATE_OVERRIDE. The promo end date and the discount are shown next to them.

Selecting, changing or removing the promo re-rates the vehicle immediately. In a quotation with several vehicles (fleet), each vehicle has its own Promotion section; promos are never applied at policy level.

Preconditions

- The vehicle is eligible (FR-PRM-020). The user has PROMO_SELECT.

Main flow

- The user opens the Promo list and selects a promo.
- The system fetches the line rates, shows PROMO_RATE_FETCHED and re-rates (FR-PRM-022).
- The system checks the caps and shows the discount and, if above the threshold, the approval route (FR-PRM-023).
- The user saves the quotation.

Alternate and exception flows

- Only one promo eligible and PRM_AUTO_SELECT_SINGLE = Yes: the promo is pre-selected; the user can remove it.
- The user selects "No promo": rates go back to the standard rates.
- The lead was captured with source "Promo" (LEAD-04) and a promo code: that promo is pre-selected when eligible.

Business rules

Rule	Statement	Kind	Maintained in
R1	One promo per vehicle; promos never stack.	Fixed	-
R2	When several promos are eligible the list is sorted by lowest promo issuing rate; the user chooses.	Fixed	-
R3	Auto-select of a single eligible promo PRM_AUTO_SELECT_SINGLE (default No).	Configurable	Parameter
R4	The promo code, version, line and the fetched rates are stored on the risk item and carried to every later version, the policy and the reports.	Fixed	-

Validations and messages

Check	Message shown	Code
Promo no longer matches after a vehicle change	Promo <code> is not open to this vehicle, product, insurer or channel	PROMO_NOT_ELIGIBLE
FMV outside the line range	The FMV of <fmv> is outside the range of promo <code> for this variant	PROMO_FMV_OUT_OF_RANGE
Promo suspended	Promo <code> is suspended and cannot be selected	PROMO_SUSPENDED_QUOTE
Quota reached	Promo <code> has reached its quota of <n> units	PROMO_QUOTA_REACHED
Not combinable	Promo <code> cannot be combined with <scheme or discount>	PROMO_NOT_COMBINABLE
Rates fetched	Rates of promo <code> v<n> applied: issuing <r>%, remitting <r>%	PROMO_RATE_FETCHED

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. Selecting PRM-VELOZ26 on a Veloz 1.5 V CVT fills promo issuing 1.50, remitting 1.30 and valid until 31-Dec-2026 and re-rates the vehicle.
2. Changing the variant to a variant without a line removes the promo with PROMO_REMOVED_RERATED.
3. In a two-vehicle quotation, vehicle 1 carries PRM-VELOZ26 and vehicle 2 no promo; each is rated separately.
4. An agent sees the rates read-only.

FR-PRM-022 Compute the premium with the promo and the discount on gross premium

BRD trace	PROD-15 "applied to gross premium"; PROD-10, PROD-11, PROD-12; COMM-06; MOM Session 2 (promo excess)	Actor	System
Priority	Must have	Fit	Customization
Screens	SCR-QOT-MTR - Premium breakdown	API	POST /api/v1/catalog/rating/quote

Description

The rating engine computes two premiums for every vehicle with a promo: the **standard premium** (standard issuing rate) and the **premium with promo**. Both are shown side by side in the premium breakdown. The customer pays the premium with promo.

Promo rate promo: $\text{promo peril premium} = \text{FMV} \times \text{promo issuing rate (or the overridden rate)}$; other covers at their rate-card premium; $\text{basic premium} = \text{sum of covers}$; DST 12.5%, VAT 12% and LGT (rate of the locality) on the basic premium; $\text{gross premium} = \text{basic premium} + \text{taxes}$. $\text{Discount} = \text{standard gross premium} - \text{gross premium with promo}$; $\text{discount \%} = \text{discount} / \text{standard gross premium} \times 100$.

Gross premium discount % promo: the premium is computed at the standard rate; $\text{discount} = \text{standard gross premium} \times \text{discount \%}$; $\text{amount payable} = \text{standard gross premium} - \text{discount}$. Taxes are not recomputed (Q-02).

Excess: while a promo applies, the compulsory excess of the vehicle is the fixed promo excess of the product (Private Car PHP 2,000, Commercial Vehicle PHP 3,000 by default) instead of 5% of the sum insured. Removing the promo brings back the 5% excess. EBI and PD limits are not affected (default PHP 200,000, up to PHP 1,000,000 per PROD-10).

The remitting side is computed at the same time: $\text{net remittance on the promo perils} = \text{FMV} \times \text{promo remitting rate}$, and the rate spread (TISPH commission before sharing) $= \text{FMV} \times (\text{issuing rate} - \text{remitting rate})$ (FR-PRM-031). Appendix A gives worked examples.

Preconditions

- A promo is selected; the FMV and covers are captured.

Main flow

1. The engine computes the standard premium.
2. The engine computes the premium with promo and the discount.
3. The engine stores both breakdowns with the quotation version.

Business rules

Rule	Statement	Kind	Maintained in
R1	Amounts in PHP rounded to 2 decimals at each tax line (half up). Discount % rounded to 2 decimals.	Fixed	-

Rule	Statement	Kind	Maintained in
R2	Tax rates DST 12.5%, VAT 12%, LGT per locality are maintained on Charges & Taxes (PROD-11); the same rules apply with or without promo.	Configurable	Charges & Taxes
R3	Pro-rata and short-period bases (PROD-06) apply to the promo premium in the same way as to the standard premium.	Fixed	-
R4	FMV depreciation (10% default) and FMV edits (PROD-12) are applied before the promo rate.	Fixed	-

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. Veloz 1.5 V CVT, FMV 1,200,000, VTPL-BI 600.00, VTPL-PD 1,200.00, LGT 0.75%: standard gross premium 32,314.50; with PRM-VELOZ26 (1.50%) gross premium 24,799.50; discount 7,515.00 = 23.26%.
2. Hilux, FMV 1,800,000, 10% gross premium discount: standard gross 47,908.13, discount 4,790.81, payable 43,117.32 (Appendix A.2).
3. Removing the promo shows only the standard breakdown.
4. With the promo the excess of the Veloz (Private Car) shows PHP 2,000.00 instead of PHP 60,000.00 (5% of 1,200,000); without it, 5% applies again.

FR-PRM-023 Apply the caps, the flexible issuing rate and the approval route at rating

BRD trace	PROD-15 "flexible issuing ... rates", "discounts capped min/max per product and channel"; PROD-09 remark; PROD-12 (override restricted to about 20 users, locked for agents); SEC-01 approval limits	Actor	Sales Officer (authorised), System, Quotation Approver
Priority	Must have	Fit	Customization
Screens	SCR-QOT-MTR	API	POST /api/v1/catalog/rating/quote

Description

After every rating the system checks the discount of the vehicle against the cap of the product and channel of the quotation in force on the quotation date: discount % $\leq$ max, discount % $\geq$ min, issuing rate $\geq$ cap floor. A discount above the max or a rate below the floor blocks the quotation; it cannot be submitted.

Flexible issuing rate: a user with PROMO_RATE_OVERRIDE may lower the issuing rate of the selected promo down to the minimum issuing rate of the line (never below), with a mandatory reason. The rate can never be raised above the promo rate while the promo is selected (the user removes the promo instead). The remitting rate is never editable on the quotation.

Approval route: when the discount % is above the approval threshold of the cap, the quotation is routed on submit to the approver role named on the cap (for example Sales Head) instead of the normal quotation approver, in line with the approval limits per persona (SEC-01).

Main flow

1. The authorised user clicks the pencil next to the promo issuing rate, enters the new rate and the reason.
2. The system checks the line minimum and re-rates.

3. The system checks the caps and shows PROMO_APPROVAL_ROUTED when the threshold is passed.
4. On submit the quotation goes to the approver role; the approval page shows the promo, the standard and promo premiums, the discount and the override reason.

Alternate and exception flows

- Agent or user without PROMO_RATE_OVERRIDE clicks the rate: PROMO_RATE_LOCKED.
- A combinable generic discount (PROD-09) is also entered: the cap check uses the total discount.

Business rules

Rule	Statement	Kind	Maintained in
R1	Cap check at rating uses the actual discount % on gross premium (not the rate discount %).	Fixed	-
R2	Overrides are allowed only between the line minimum issuing rate and the promo issuing rate.	Fixed	-
R3	Approval threshold and approver role per product x channel are on the cap (FR-PRM-010).	Configurable	Discount Caps master

Validations and messages

Check	Message shown	Code
Rate locked	Only authorised users can change the promo rate	PROMO_RATE_LOCKED
Below line minimum	The issuing rate cannot be lower than <min>% for this promo	PROMO_RATE_BELOW_MIN
Above promo rate	The issuing rate cannot be higher than the promo rate of <r>%. Remove the promo to use the standard rate	PROMO_RATE_ABOVE_PROMO
Reason blank	Enter the reason for changing the promo rate	PROMO_OVERRIDE_REASON
Above max cap	The discount of <x>% is above the maximum of <max>% for <product> through <channel>	PROMO_CAP_EXCEEDED_QUOTE
Below min cap	The discount of <x>% is below the minimum of <min>% for <product> through <channel>	PROMO_CAP_MIN_QUOTE
Approval routed	The discount of <x>% is above <t>%. The quotation will go to <role> for approval	PROMO_APPROVAL_ROUTED

Notifications

- The existing quotation approval notice goes to the approver role on the cap.

Audit

- The override (old rate, new rate, reason, user) is stored on the risk item and in the audit trail.

Acceptance criteria

1. On line Veloz 1.5 E MT (promo 1.60%, minimum 1.55%) an authorised user can set 1.55%; 1.50% is refused with PROMO_RATE_BELOW_MIN.
2. An agent cannot change the rate (PROMO_RATE_LOCKED).
3. A TFS quotation with a discount of 23.26% (threshold 15%) goes to the Sales Head on submit.
4. After the TFS max cap is lowered to 20%, a new rating of the Veloz example (23.26%) is refused with PROMO_CAP_EXCEEDED_QUOTE.

FR-PRM-024 Re-validate the promo on new quotation versions, extension, approval and conversion

BRD trace	QUOT-03, QUOT-04 (versions, 30-day validity, one extension); ISSUE-02	Actor	System
Priority	Must have	Fit	Customization
Screens	SCR-QOT-MTR; quotation approval; conversion to policy	API	POST /api/v1/quotations/{id}/versions /extend /convert

Description

A promo selected on a quotation is checked again at every later step. The rule is: the promo is honoured for the life of the quotation version it was rated on (30 days); a new version, an extension or the conversion re-check it.

Main flow

1. **New version** (v2, v3): the system re-runs eligibility with the current promo version. If the promo is still Active the line rates of the current promo version are fetched (PROMO_VERSION_CHANGED when they differ). If not, the promo is removed and the vehicle re-rated (PROMO_REMOVED_RERATED).
2. **Approval**: the approver sees the promo; approval is allowed even if the promo expired after the version was rated.
3. **Extension** (one 30-day extension): when the promo has ended, extending removes the promo after confirmation (PROMO_EXTENSION_ENDED).
4. **Conversion to policy**: the system re-checks the brand-new rule (chassis number now mandatory), the caps and the quota. The promo is kept if the quotation is within its validity, even if the promo period has ended.

Business rules

Rule	Statement	Kind	Maintained in
R1	Promo honoured on extension after the promo end: PRM_HONOUR_ON_EXTENSION (default No, Q-04).	Configurable	Parameter
R2	Quota is checked and reserved at conversion; the unit is counted at booking.	Fixed	-

Validations and messages

Check	Message shown	Code
Version changed	Promo <code> changed since the last version of this quotation (v<old> to v<new>). The new version uses v<new>	PROMO_VERSION_CHANGED
Promo removed	Promo <code> was removed and the vehicle was re-rated at the standard rate	PROMO_REMOVED_RERATED
Extension after end	Promo <code> ended on <date>. Extending the quotation removes the promo and re-rates it at the standard rate	PROMO_EXTENSION_ENDED
Expired on new version	Promo <code> ended on <date>. Remove it or select another promo	PROMO_EXPIRED

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

- A quotation rated on 30-Dec-2026 with PRM-VELOZ26 can be converted on 20-Jan-2027 within its validity, with the promo.
- A v2 created on 05-Jan-2027 removes the expired promo and re-rates at 2.00%.
- Extending on 30-Jan-2027 warns PROMO_EXTENSION_ENDED and re-rates at the standard rate.

FR-PRM-025 Apply promos on fleet and bulk quotations

BRD trace	PROD-15 "applying at vehicle level"; BULK-01; LEAD-02 (TFS fleet accounts)	Actor	Sales Officer
Priority	Must have	Fit	Customization
Screens	Bulk / fleet quotation upload; SCR-QOT-MTR	API	POST /api/v1/quotations/bulk

Description

The fleet / bulk quotation template gets an optional column **Promo Code**. For each vehicle row the system runs the eligibility check and, when the code is eligible, fetches the line rates; otherwise the row is rated at the standard rate and the result file explains why. When the column is blank and exactly one promo is eligible, PRM_AUTO_SELECT_SINGLE decides.

Main flow

- The user uploads the fleet file with Promo Code per row.
- The system rates each vehicle; rows with an ineligible promo get the message of FR-PRM-021 in the result file.
- The fleet quotation shows the promo per vehicle and the total discount.

Business rules

Rule	Statement	Kind	Maintained in
R1	Each vehicle row is checked independently; one ineligible row does not reject the file.	Fixed	-

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

- A fleet file of 3 Veloz and 2 Hilux with code PRM-VELOZ26 on all rows applies the promo to the 3 Veloz and rates the 2 Hilux at standard, with the reason in the result file.

FR-PRM-026 Show the promo on quotation and insurer documents

BRD trace	QUOT-03; ISSUE-01; DOC (module 20)	Actor	System
Priority	Must have	Fit	Customization

Screens	Quotation PDF; placement slip / file	API	-
----------------	--------------------------------------	------------	---

Description

The quotation PDF shows, per vehicle with a promo, the promo description, the premium at the standard rate, the discount and the premium with promo, with the line "Promo valid for quotations created up to <end date>; subject to the insurer's acceptance." The placement slip and file to the insurer carry the promo code, the promo issuing rate and the promo remitting rate (chapter 17).

Business rules

Rule	Statement	Kind	Maintained in
R1	The promo remitting rate and the commission spread are never printed on customer documents.	Fixed	-
R2	The promo wording on the quotation template is external-facing, so Marketing approves it before go-live (MOM Session 2, templates).	Configurable	Document templates

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. The PDF of the Veloz quotation shows "Veloz launch rate 1.50%", 32,314.50, discount 7,515.00 and 24,799.50.
2. The placement file row of the policy carries PRM-VELOZ26, 1.50 and 1.30.

4.5 Policy life cycle after the quotation

FR-PRM-030 Carry the promo to placement, issuance and booking

BRD trace	ISSUE-01, ISSUE-02 (encode-back of premium and commission)	Actor	Operations
Priority	Must have	Fit	Customization
Screens	Placement; e-policy check; policy record (Promo panel)	API	-

Description

Booking an accepted quotation raises the placement; the promo code, version and rates go with the risk item. When the insurer's e-policy comes back, the encode-back check compares the insurer premium with the premium with promo; a difference above the tolerance of the e-policy check stops booking as for any other policy. The booked policy shows a read-only Promo panel and counts one unit against the promo quota.

Business rules

Rule	Statement	Kind	Maintained in
R1	The policy keeps the promo version and rates for its whole term.	Fixed	-

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. The booked policy shows PRM-VELOZ26 v2, 1.50 / 1.30, discount 7,515.00, and the promo units used increase by 1.
2. An e-policy at the standard premium is flagged as a mismatch at the check against the slip.

FR-PRM-031 Remit at the promo remitting rate and compute commission and sharing

BRD trace	PROD-15 "flexible ... remitting rates"; PROD-16; COMM-04, COMM-05, COMM-06; RPT-OPS-05/07/08	Actor	System; FGA / CCD
Priority	Must have	Fit	Customization
Screens	Remittance run; commission; SOA	API	-

Description

For a policy with a promo, the weekly remittance run (fully paid policies only) uses the promo remitting rate on the promo perils instead of the standard remitting rate: net remittance = gross premium collected - rate spread, where rate spread = FMV x (promo issuing rate or overridden rate - promo remitting rate). The rate spread is the TISPH commission on which the agent / dealer / referral sharing of PROD-16 applies (COMM-05).

For a Gross premium discount % promo with the standard remitting rate, the insurer receives the standard net remittance and the discount reduces the TISPH commission (default, Q-01).

Business rules

Rule	Statement	Kind	Maintained in
R1	Promo remitting rate applies only to the perils of the promo; other covers keep their remitting basis.	Fixed	-
R2	Commission on instalment policies is paid only once the full premium is settled, and no commission receivable is raised for a cancelled policy (COMM-06; MOM Session 4).	Fixed	-
R3	Remittance runs every Monday for the fully paid policies of the previous Monday to Friday, per insurer and product line, under maker-checker (MOM Session 4). Promo policies follow the same run.	Fixed	-
R4	Funding of a gross premium discount: PRM_GROSS_DISCOUNT_FUNDING = TISPH commission (default) insurer (reduced remitting rate) - Q-01.	Configurable	Parameter

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. Veloz example: gross premium 24,799.50; rate spread $1,200,000 \times 0.20\% = 2,400.00$; net remittance 22,399.50 (standard would be 3,600.00 and 28,714.50).
2. Hilux 10% example: net remittance 42,508.13; TISPH commission $5,400.00 - 4,790.81 = 609.19$.
3. The SOA per insurer shows the promo code and the remitting rate used per policy.

FR-PRM-032 Process endorsements on a policy with a promo

BRD trace	ENDT-01, ENDT-02, ENDT-03	Actor	Operations
Priority	Must have	Fit	Customization
Screens	Endorsement screen	API	-

Description

Financial endorsements on a promo policy recompute the premium pro-rata over the unexpired days at the **policy's promo rate** (for example an FMV increase for accessories). A change of vehicle (replacement unit) removes the promo: the new vehicle is rated at the standard rate unless it is itself eligible, and the user is warned (PROMO_ENDORSE_VEHICLE_CHANGE). Non-financial endorsements do not touch the promo.

Business rules

Rule	Statement	Kind	Maintained in
R1	A promo is never added to a policy by endorsement.	Fixed	-

Validations and messages

Check	Message shown	Code
Vehicle change	Changing the vehicle removes promo <code>; the premium of the new vehicle is rated at the standard rate	PROMO_ENDORSE_VEHICLE_CHANGE

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. An FMV increase of 100,000 with 180 days unexpired is rated at 1.50% pro-rata: $100,000 \times 1.50\% \times 180/365 = 739.73$ before taxes.
2. Replacing the vehicle warns and rates the new vehicle at 2.00%.

FR-PRM-033 Cancel a policy with a promo

BRD trace	CANC module 11; FR-PRM-005 (quota)	Actor	Operations
Priority	Must have	Fit	Customization
Screens	Cancellation	API	-

Description

Cancellation follows the normal rules; the return premium is computed on the premium with promo actually charged. A cancellation from inception (flat cancellation) gives the promo unit back to the quota; any other cancellation does not.

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. A flat cancellation reduces the units used of the promo by 1.
2. A mid-term cancellation returns premium pro-rata on 24,799.50, not on the standard premium.

FR-PRM-034 Renew a policy that carried a promo

BRD trace	RENEW-02, RENEW-03; SCHM-03 (lock-in); RPT-SLS-05	Actor	System; Renewals
Priority	Must have	Fit	Customization
Screens	Renewal work queue; renewal quotation	API	-

Description

Promos are for new vehicles, so a renewal is re-quoted at the standard rate on the current FMV (RENEW-03); the renewal quotation shows "Promo <code> ended with the first policy year".

For a **lock-in promo** (lock-in period set) the renewal within the lock-in keeps the promo rates of the version on the original policy; renewal notices to the customer are suppressed as for lock-in accounts (RENEW-02, SCHM-03) and the policy appears on the Lock-in / Scheme 2 Expiry Report 60 days before expiry (RPT-SLS-05). After the lock-in, the standard rate applies.

Business rules

Rule	Statement	Kind	Maintained in
R1	Lock-in year count starts with the first policy year; year n is in lock-in when $n \leq \text{lock-in years}$.	Fixed	-
R2	The caps in force at renewal still apply; if the promo rate now breaches them, the renewal is routed to the Product Approver.	Fixed	-

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. A Veloz policy without lock-in renews at 2.00%.
2. A Raize policy under PRM-RAIZE-LOCK3 (3 years) renews in years 2 and 3 at the promo rate and appears on RPT-SLS-05; year 4 renews at 2.00%.

4.6 Reports, notifications, audit and access

FR-PRM-040 Promo Utilisation Report and promo columns on existing reports

BRD trace	BRD 7.1 "promo report counted with the reports"; MOM action item 6 (promo report template from TISPH); RPT-SLS-02, RPT-SLS-05, RPT-OPS-05, RPT-OPS-08	Actor	Product Administrator, Sales, FGA
Priority	Must have	Fit	Customization
Screens	Reports > Sales > Promo Utilisation (RPT-PRM-01)	API	GET /api/v1/reports/promo-utilisation

Description

RPT-PRM-01 lists, for a date range and filters (promo, product, insurer, channel, office, status), every quotation and policy with a promo: promo code and version, quotation / policy number, client, variant, FMV, channel, agent, insurer, standard gross premium, gross premium with promo, discount, discount %, rate override (Y/N and reason), promo remitting rate, rate spread, status (quoted, approved, converted, booked, cancelled). A summary tab gives per promo: quotes, conversions, conversion %, units booked vs quota, total discount, total rate spread.

TISPH has not yet sent its promo report template (MOM action item 6). The columns above are the proposed layout; when the template arrives the layout is adjusted as configuration, without changing the data behind it.

The production report per product line (RPT-SLS-02), the net remittance report (RPT-OPS-05) and the SOA per insurer (RPT-OPS-08) get a Promo Code column and a filter "with / without promo".

Business rules

Rule	Statement	Kind	Maintained in
R1	Downloads in Excel, CSV and PDF; scheduled monthly run on the first working day.	Configurable	Report scheduler

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. The report for October 2026, promo PRM-VELOZ26 lists the Veloz example with discount 7,515.00 and spread 2,400.00.
2. The summary shows units booked 37 of quota 500.

FR-PRM-041 Send the promo notifications

BRD trace	NOTIF-01, NOTIF-02	Actor	System
Priority	Must have	Fit	Customization
Screens	In-app notifications; e-mail	API	-

Description

The notifications of chapter 16 are sent in-app and by e-mail from templates maintained in the notification engine (NOTIF-01).

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. Submitting a promo notifies every Product Approver except the maker.
2. Seven days before the end date the Product Administrator and Sales Head receive NT-PRM-04.

FR-PRM-042 Keep a complete audit trail of promos, caps and their use

BRD trace	Section 5.14; NFR-17.x audit; SEC-03	Actor	System
Priority	Must have	Fit	Customization
Screens	SCR-PRM-02 Approval & History tab; audit log report	API	-

Description

The audit trail records every create, update, submit, approve, return, suspend, resume, withdraw, amend and upload on promos and caps, every promo selection, removal and rate override on quotations, with the user, timestamp, before and after values and remark. Logs are retained per NFR (minimum 12 months online).

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. The history of PRM-VELOZ26 lists v1 creation, approval, the amendment to v2 and its approval with users and times.
2. A rate override on a quotation is shown in the audit log with old and new rate and reason.

FR-PRM-043 Control access to promo functions

BRD trace	SEC-01, SEC-02, SEC-03; PROD-12	Actor	System Administrator
Priority	Must have	Fit	Customization
Screens	User and role administration	API	-

Description

The permissions of section 3.2 are added to the role catalogue and mapped to the personas as in section 3.3. The PROMO_RATE_OVERRIDE list is the same controlled list of internal users as the Motor rate override of PROD-12.

Notifications

- None.

Audit

- Every create, update and status change is written to the audit trail with the user, timestamp, before and after values and remark (FR-PRM-042).

Acceptance criteria

1. A user without PROMO_VIEW does not see the Promo Master menu.
2. An external agent role cannot be granted PROMO_RATE_OVERRIDE (the role administration refuses it).

5 Workflow and status model

5.1 Promo (PROMO)

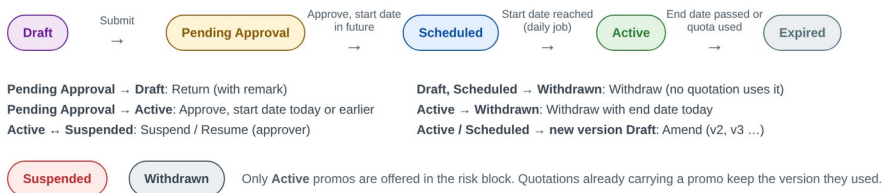

Figure 2: Promo status model

Table 9: Promo status transitions

From	Action / event	To	Who	Condition
(new)	Save Draft	Draft	Product Administrator	Mandatory fields of the General tab
Draft	Submit for Approval	Pending Approval	Product Administrator	All validations pass, including the cap check
Pending Approval	Recall	Draft	Maker	Not yet actioned by an approver
Pending Approval	Return	Draft	Product Approver	Remark mandatory; approver is not the maker
Pending Approval	Approve	Scheduled	Product Approver	Start date in the future
Pending Approval	Approve	Active	Product Approver	Start date is today
Scheduled	Start date reached	Active	System (daily job 00:05)	-
Active	End date passed, or quota used up	Expired	System (daily job, or at booking for quota)	-
Active	Suspend	Suspended	Product Approver	Reason mandatory
Suspended	Resume	Active	Product Approver	End date not passed
Suspended	End date passed	Expired	System	-
Draft, Scheduled, Active, Suspended	Withdraw	Withdrawn	Product Approver	Reason mandatory; end date set to today
Scheduled, Active, Suspended	Amend	New version in Draft	Product Administrator	No other version pending; current version stays in force
Active (old version)	New version approved	Superseded	System	History only

5.2 Discount cap (DISCOUNT_CAP)

Draft -> Pending Approval -> Approved (in force from the effective from date) -> Ended (effective to date passed). A returned cap goes back to Draft. Approved caps are never edited; a change is a new cap with a later effective date, and the old one is end-dated in the same request.

5.3 Promo on a quotation and policy

Table 10: Promo along the policy life cycle

Quotation / policy event	Effect on the promo of each vehicle
Vehicle captured or changed	Eligibility re-run; promo kept, swapped or removed (FR-PRM-020, 021)

Quotation / policy event	Effect on the promo of each vehicle
Quotation saved / submitted	Cap and threshold checked; route to the cap approver if above the threshold (FR-PRM-023)
Quotation approved and sent	Promo printed on the quotation PDF (FR-PRM-026)
New quotation version	Promo re-fetched from the current promo version or removed (FR-PRM-024)
Extension	Promo kept if still active; otherwise removed after confirmation (FR-PRM-024)
Lapse / spoil after 30 days	Nothing counted against the promo
Conversion to policy	Brand-new rule, caps and quota re-checked; quota unit reserved (FR-PRM-024)
Policy booked	Unit counted; promo frozen on the policy (FR-PRM-030)
Endorsement	Promo rate used pro-rata; vehicle change removes it (FR-PRM-032)
Flat cancellation	Unit given back (FR-PRM-033)
Renewal	Standard rate, or promo rate within a lock-in (FR-PRM-034)

5.4 SLA and escalation

Promo and cap approvals use the SLA register of NOTIF-02. The default target is one working day; an item still pending after two working days is escalated to the Head of Sales. Both values are configuration and follow the holiday calendar (MAS-08).

6 Reports and documents

6.1 Reports

Table 11: Reports

Report	Content	Users	FR
RPT-PRM-01 Promo Utilisation Report (new)	Detail of every quotation and policy with a promo; summary per promo with conversions, units vs quota, total discount, total rate spread	Product Administrator, Sales, FGA, Auditor	FR-PRM-040
Promo Master export	Promos and their lines with the filters of the list	PROMO_VIEW	FR-PRM-007
RPT-SLS-02 Production per product line	Adds Promo Code column and a with / without promo filter	Sales	FR-PRM-040
RPT-SLS-05 Lock-in / Scheme 2 Expiry Report	Includes policies under a lock-in promo 60 days before expiry	Sales, Renewals	FR-PRM-034
RPT-OPS-05 Net remittance - fully paid	Shows the remitting rate used and the promo code per policy	FGA	FR-PRM-031
RPT-OPS-07 Agents / dealers commission sharing	Sharing computed on the promo rate spread	FGA	FR-PRM-031
RPT-OPS-08 SOA per insurance partner	Promo code and remitting rate per policy in the Remitting section	FGA	FR-PRM-031
Audit log report	All promo, cap and override events	Auditor, System Administrator	FR-PRM-042

6.2 Documents

Table 12: Documents

Document	Promo content
Motor quotation PDF	Promo description, standard premium, discount, premium with promo, promo excess, validity line
Placement slip / placement file to the insurer	Promo code, promo issuing rate, promo remitting rate, promo excess
Policy schedule (from the insurer)	Checked against the slip at encode-back; not generated by BrokerVerse
Billing statement / SOA	Premium with promo; remitting rate used

7 Interfaces and integration

Table 13: Interfaces

Interface	Direction	Promo data	Note
TFS account feed (LEAD-01)	Inbound	Vehicle make / model / variant, year model, vehicle condition (new / used), SRP	Vehicle condition must be in the feed for the brand-new rule. If TFS cannot send it, a TFS lead is treated as new when the loan booking date is within 90 days (Q-03).
Vehicle Master import (MAS-09)	Inbound (upload)	Variants behind the promo lines	Source PIRA FMV checker workbook
Placement file / e-mail to insurer (ISSUE-01)	Outbound	Promo code, promo issuing and remitting rates, promo excess	File-based; insurer API is a later phase
Insurer e-policy encode-back (ISSUE-02)	Inbound	Premium and commission as issued	Compared with the premium with promo
SAP GL file (daily 11:59 PM)	Outbound	No new fields; premium, remittance and commission amounts already reflect the promo	Optional promo code in the reference text (Q-13)
E-mail notification engine (NOTIF-01)	Outbound	NT-PRM-01 to 09	Templates in chapter 16

8 Non-functional requirements

Table 14: Non-functional requirements

Area	Requirement for PROD-15	BRD NFR
Performance	Eligibility list returned in 1 second or less for 95% of calls; re-rating with a promo in 2 seconds or less; variant upload of 2,000 rows in 60 seconds or less.	NFR-07
Accuracy	Premium, discount, remittance and spread computed to the centavo with the rounding rule of FR-PRM-022; the same input always gives the same result.	NFR-08.1
Security	Role-based access per section 3.3; the remitting rate and spread are hidden from external agents.	NFR-02, SEC-01
Segregation of duties	Maker can never approve a promo, a cap or their own quotation.	SEC-03
Audit and retention	All events of FR-PRM-042 logged with before / after values; logs kept at least 12 months online and per the retention policy afterwards.	NFR-17, NFR-11
Availability	The daily status job is idempotent and can be re-run after an outage without double counting.	NFR-15
Usability	Screens follow the BrokerVerse standards; messages as in chapter 15.	NFR-10
Configurability	All values marked Configurable in chapter 9 can be changed without a release.	PROD-01

9 Configuration items owned by the business and the System Administrator

9.1 Parameters

Table 15: Parameters

Parameter	Meaning	Default	Owner
PRM_MAX_PERIOD_MONTHS	Longest promo period	12	Product Administrator
PRM_MAX_LOCKIN_YEARS	Longest lock-in period	3	Product Administrator
PRM_NEW_VEHICLE_YEAR_TOLERANCE	Year model tolerance of the brand-new rule	1	Product Administrator
PRM_AUTO_SELECT_SINGLE	Pre-select the promo when only one is eligible	No	Product Administrator
PRM_HONOUR_ON_QUOTE_VALIDITY	Keep the promo on an open quotation after the promo ends	Yes	Product Administrator
PRM_HONOUR_ON_EXTENSION	Keep the promo when an ended promo's quotation is extended	No	Product Administrator
PRM_EXPIRY_ALERT_DAYS	Days before the end date for NT-PRM-04	7	Product Administrator
PRM_QUOTA_ALERT_PCT	Quota % for NT-PRM-06	90	Product Administrator
PRM_UPLOAD_MAX_ROWS	Rows per variant upload	2,000	System Administrator
PRM_GROSS_DISCOUNT_FUNDING	Who bears a gross premium discount	TISPH commission	FGA (Q-01)
PRM_STATUS_JOB_TIME	Time of the daily status job	00:05	System Administrator

9.2 Lists of values

Table 16: Lists of values

List	Values
PROMO_BENEFIT_TYPE	Promo rate; Gross premium discount %
PROMO_STATUS	Draft; Pending Approval; Scheduled; Active; Suspended; Expired; Withdrawn; Superseded
VEHICLE_CONDITION	Brand New; Used / Second-hand; Repossessed (ROPA)
PROMO_SUSPEND_REASON	Rate renegotiation with insurer; Budget reached; Campaign paused by Toyota / TFS; Error in set-up; Other
PROMO_RETURN_REASON	Rates not as agreed; Wrong variants; Wrong period; Cap breach; Other
PROMO_OVERRIDE_REASON	Dealer negotiation; Fleet account; Competitive match; Management approval; Other

9.3 Masters and rules maintained by the business

Table 17: Masters

Master	Owner	Approval
Promo Master (promos, variant lines, rates, excess, quota, lock-in)	Product Administrator	Product Approver
Discount Caps (min / max %, floor, threshold, approver role)	Product Administrator	Product Approver
Vehicle Master (MAS-09)	Operations	Per MAS-09
Standard issuing and remitting rates (PROD-12, 13, 16)	Product Administrator / FGA	Per CR-01
Notification templates (chapter 16)	System Administrator with Sales	Marketing for customer-facing text

10 Assumptions, dependencies and open questions

10.1 Assumptions

- Promos apply to Motor Comprehensive only, as confirmed in Gap Analysis Session 2. Personal Accident, Credit Life and Parcel / Courier have no promos.
- The standard issuing rate (2.00%) and remitting rate (1.70%) on Own Damage / Theft and Acts of Nature are delivered under PROD-12 and PROD-16 in the same CR-01, and the promo rates work on the same perils.
- Each quotation goes to one insurer (Session 2: direct placement only, no co-insurance), so a promo line is matched to that one insurer.
- TISPH and the insurer agree the promo remitting rate before the promo is set up; BrokerVerse does not send the promo to the insurer for approval.
- Taxes and charges are the same for every transaction (Session 2), so DST, VAT and LGT are applied to the premium with promo exactly as to any other premium.
- Amounts, caps and rates used in the examples are illustrative until TISPH sends the discount structure (MOM action item 4).

10.2 Dependencies

Table 18: Dependencies

Dependency	Owner	Needed for	MOM ref.
Product-based discount structure: min / max % per product and channel, floor, approval threshold and approver	TISPH Sales	Discount Caps master (FR-PRM-010)	Action 4
Promo report template	TISPH Sales	RPT-PRM-01 layout (FR-PRM-040)	Action 6
Rating reference list per insurer (rate, formula, perils)	TISPH	Standard rates shown next to the promo rates	Action 1
Vehicle makes / models / variants List of Values and FMV table	TISPH Operations	Variant mapping (FR-PRM-003)	Actions 2, 8
Motor scheme details (Scheme 1 and 2) and the renewal scheme rules	TISPH Sales	Combinability and lock-in (FR-PRM-002, 034)	Actions 6, 32
Quotation template with the promo wording, approved by Marketing	TISPH	Quotation PDF (FR-PRM-026)	Action 30
Promo customisation scope and effort logged	iorta TechNXT	This FRS	Action 36 (answered by this FRS)

10.3 Open questions

The build follows the default answer in the last column until TISPH answers. Every default is configuration, so a different answer does not need a new build unless the column says otherwise.

Table 19: Open questions

No.	Question	Raised to	Default in the build
Q-01	For a gross premium discount % promo, who bears the discount: TISPH (lower commission), the insurer (lower remitting rate) or both?	TISPH FGA, Sales	TISPH commission; insurer remittance unchanged

No.	Question	Raised to	Default in the build
Q-02	For a gross premium discount, are DST, VAT and LGT recomputed on the discounted premium (so the insurer policy shows it), or does the discount only reduce what the customer pays?	TISPH FGA	Taxes not recomputed; policy premium unchanged
Q-03	Is "new vehicle" Brand New condition plus year model tolerance 1 plus no earlier policy? Can the TFS feed carry the vehicle condition?	TISPH Sales, TFS	As stated; if missing on the feed, loan booking within 90 days
Q-04	Is a promo honoured when a quotation is extended after the promo has ended?	TISPH Sales	No
Q-05	Is the "lock-in promo" of the renewal notices (Session 6) the same as the lock-in on the promo master, and how many years?	TISPH Sales	Yes; up to 3 years
Q-06	Can two promos be active at the same time for the same variant, insurer and channel?	TISPH Sales	Yes; the user chooses one
Q-07	What are the caps per product and channel, the approval threshold and the approver?	TISPH Sales (action 4)	Values in FR-PRM-010
Q-08	Does a promo rate ever apply to perils other than OD / Theft and AON (e.g. VTPL, Auto PA)?	TISPH Sales	No
Q-09	Do promo rates differ by insurer for the same variant?	TISPH Sales	Supported through the insurer column of the line
Q-10	Is a unit quota used on promos?	TISPH Sales	Optional field
Q-11	Should the promo code appear on the customer quotation, or only the description?	TISPH Marketing	Description only
Q-12	Can external agents select promos (they cannot change rates per PROD-12)?	TISPH Sales	Yes, select only
Q-13	Does Finance want the promo code in the SAP GL reference text?	TISPH FGA	No
Q-14	What is the fixed promo excess for Motorcycle (Session 2 gave Private Car PHP 2,000 and Commercial Vehicle PHP 3,000)?	TISPH Sales	5% excess kept for Motorcycle until confirmed

14 End-to-end walkthroughs

The walkthroughs follow one case through the screens, persona by persona. They use the illustrative data of the examples and are the script of the PROD-15 SIT and UAT sessions.

14.1 WT-A Launch a promo

Table 25: WT-A steps

Step	Who	Does	Sees / result
1	Product Administrator	Checks Discount Caps for Private Car - TFS and Direct	TFS 0-25%, floor 1.40%, threshold 15% -> Sales Head; Direct 0-25%
2	Product Administrator	Creates PRM-VELOZ26 "Veloz launch rate 1.50%", 01-Oct to 31-Dec-2026, Promo rate, excess PC 2,000, quota 500	Draft v1 saved
3	Product Administrator	Applicability: Private Car; Insurer A and B; TFS and Direct	Saved; caps found
4	Product Administrator	Uploads 4 Veloz variant lines	4 lines loaded; line 4 (1.40%) flagged Above max 25.00% (TFS)
5	Product Administrator	Changes line 4 to 1.50 / 1.50 / 1.30 and submits	Pending Approval; NT-PRM-01 to approvers
6	Product Approver	Opens My Approvals, reviews and approves on 25-Sep-2026	Scheduled; NT-PRM-02 to maker
7	System	Daily job on 01-Oct-2026	Active; NT-PRM-03 to Sales

14.2 WT-B Quote, issue, collect and remit a vehicle with a promo

Table 26: WT-B steps

Step	Who	Does	Sees / result
1	Sales Officer	Opens the TFS lead of Juan Dela Cruz and creates a Motor quotation with Insurer A	Vehicle from TFS: Veloz 1.5 V CVT, 2026, Brand New, FMV 1,200,000
2	Sales Officer	Opens the Promo list	PRM-VELOZ26 and two other promos listed
3	Sales Officer	Selects PRM-VELOZ26	Rates 1.50 / 1.30 fetched; excess 2,000; standard 32,314.50, with promo 24,799.50; discount 7,515.00 (23.26%); routed to Sales Head
4	Sales Officer	Submits	Pending approval with the Sales Head (discount above 15%)
5	Sales Head	Approves	Quotation PDF e-mailed to the client with the promo
6	Operations	Records acceptance and converts to policy with chassis and engine numbers	Brand-new rule passed; quota unit reserved
7	Operations	Sends the placement file; receives and checks the e-policy; books	Policy shows PRM-VELOZ26 v1; units used +1; premium 24,799.50
8	Cash Control	Records the payment	Policy fully paid
9	FGA	Runs the Monday remittance	Net remittance 22,399.50; rate spread 2,400.00; sharing per PROD-16

14.3 WT-C Exceptions

Table 27: WT-C exception cases

Case	Who	Does	Sees / result
C1 Used vehicle	Sales Officer	Quotes a 2024 Fortuner, condition Used	PROMO_NONE_ELIGIBLE; Promo field disabled
C2 Agent tries to change rate	External agent	Clicks the promo issuing rate	PROMO_RATE_LOCKED
C3 Flexible rate	Authorised Sales Officer	On Veloz 1.5 E MT (promo 1.60%, min 1.55%) enters 1.50%, then 1.55% with reason "Fleet account"	PROMO_RATE_BELOW_MIN, then accepted and logged
C4 Extension after promo end	Sales Officer	Extends a 20-Dec-2026 quotation on 19-Jan-2027	PROMO_EXTENSION_ENDED; re-rated at 2.00% on confirmation
C5 Vehicle replaced by endorsement	Operations	Replaces the insured unit	PROMO_ENDORSE_VEHICLE_CHANGE; new unit at 2.00%
C6 Renewal	System	Renewal run 90 days before expiry of the Veloz policy	Renewal quotation at 2.00% on current FMV; 5% excess
C7 Cap lowered	Product Administrator	Submits TFS max 20% from 01-Dec-2026	CAP_AFFECTS_PROMOS lists PRM-VELOZ26 lines; after approval new ratings above 20% are refused

14.4 WT-D Gross premium discount promo

Table 28: WT-D steps

Step	Who	Does	Sees / result
1	Product Administrator	Sets up PRM-HILUX-Q4: Commercial Vehicle, TFS and Dealer, Gross premium discount 10%, excess CV 3,000	Line max 10% within both caps; approved
2	Sales Officer	Quotes a new Hilux, FMV 1,800,000, through TFS	Standard gross 47,908.13; discount 4,790.81; payable 43,117.32
3	FGA	Remits after payment	Net remittance 42,508.13 (standard); TISPH commission 5,400.00 - 4,790.81 = 609.19 (Q-01 default)

15 Messages catalogue

Every message a user can see for PROD-15, grouped by the screen or dialog that shows it. 77 messages: 9 confirmation, 35 error, 3 information, 23 validation, 7 warning. Text in angle brackets is filled in by the system. Server messages also show the code as the Reference.

15.1 SCR-PRM-02 Promo Master record

ID	Code (Reference)	Message	Type	What the user does
MSG-PRM-001	PROMO_CODE_REQUIRED	Enter the promo code	Validation	Enter a code.
MSG-PRM-002	PROMO_CODE_FORMAT	The promo code may contain only capital letters, numbers and hyphens, up to 20 characters	Validation	Correct the code.
MSG-PRM-003	PROMO_CODE_DUPLICATE	Promo code <code> already exists	Error	Use another code, or amend the existing promo.
MSG-PRM-004	PROMO_DESC_REQUIRED	Enter the promo description	Validation	Enter a description.
MSG-PRM-005	PROMO_PERIOD_INVALID	The period end must be on or after the period start	Validation	Correct the dates.
MSG-PRM-006	PROMO_START_IN_PAST	The period start cannot be before today	Error	Enter today or a later date. Promos are never retroactive.
MSG-PRM-007	PROMO_PERIOD_TOO_LONG	A promo period cannot be longer than <n> months	Error	Shorten the period or ask the System Administrator to review the parameter.
MSG-PRM-008	PROMO_PRODUCT_REQUIRED	Select at least one product	Validation	Select the Motor product(s).
MSG-PRM-009	PROMO_PRODUCT_NOT_MOTOR	Promos apply to Motor products only	Error	Remove the non-Motor product.
MSG-PRM-010	PROMO_INSURER_REQUIRED	Select at least one insurer	Validation	Select the insurer(s) that agreed the promo rates.
MSG-PRM-011	PROMO_CHANNEL_REQUIRED	Select at least one channel	Validation	Select the channel(s).
MSG-PRM-012	PROMO_VARIANT_REQUIRED	Add at least one vehicle variant	Validation	Add a variant line or upload the mapping.
MSG-PRM-013	PROMO_VARIANT_INACTIVE	Variant <variant> is inactive in the Vehicle Master	Error	Remove the line or ask for the variant to be re-activated.
MSG-PRM-014	PROMO_VARIANT_DUPLICATE	Variant <variant> is listed more than once for overlapping year models and insurers	Error	Merge or correct the lines.
MSG-PRM-015	PROMO_YEAR_RANGE_INVALID	Line <n>: the year model to must be on or after the year model from	Validation	Correct the year models.
MSG-PRM-016	PROMO_FMV_RANGE_INVALID	Line <n>: the FMV to must be higher than the FMV from	Validation	Correct the FMV range.
MSG-PRM-017	PROMO_RATE_REQUIRED	Enter the promo issuing and remitting rates of line <n>	Validation	Enter both rates.
MSG-PRM-018	PROMO_RATE_RANGE	Line <n>: rates must be more than 0% and at most 100%, with up to 4 decimals	Validation	Correct the rate.
MSG-PRM-019	PROMO_REMIT_ABOVE_ISSUE	Line <n>: the promo remitting rate cannot be higher than the promo issuing rate	Error	Correct the remitting rate with the insurer-agreed value.

ID	Code (Reference)	Message	Type	What the user does
MSG-PRM-020	PROMO_MIN_ABOVE_ISSUE	Line <n>: the minimum issuing rate cannot be higher than the promo issuing rate	Error	Lower the minimum issuing rate or leave it equal to the promo rate.
MSG-PRM-021	PROMO_ISSUE_NOT_BELOW_STANDARD	Line <n>: the promo issuing rate is not lower than the standard issuing rate of <rate>%	Warning	Check the rate; the promo gives no discount on this line.
MSG-PRM-022	PROMO_DISCOUNT_PCT_REQUIRED	Line <n>: enter the gross premium discount %	Validation	Enter the discount.
MSG-PRM-023	PROMO_CAP_NOT_DEFINED	No approved discount cap is set up for <product> through <channel>	Error	Ask the Product Administrator to set up the cap, or remove the channel.
MSG-PRM-024	PROMO_CAP_MAX_EXCEEDED	Line <n>: the rate discount of <x>% is above the maximum discount of <max>% for <product> through <channel>	Error	Correct the rate or remove the channel before submitting.
MSG-PRM-025	PROMO_CAP_MIN_NOT_MET	Line <n>: the rate discount of <x>% is below the minimum discount of <min>% for <product> through <channel>	Error	Correct the rate or remove the channel.
MSG-PRM-026	PROMO_BELOW_MIN_ISSUING	Line <n>: the rate of <r>% is below the minimum issuing rate of <floor>% for <product> through <channel>	Error	Raise the rate to the floor or above.
MSG-PRM-027	PROMO_QUOTA_INVALID	The unit quota must be a whole number of 1 or more	Validation	Correct the quota or leave it blank for no quota.
MSG-PRM-028	PROMO_LOCKIN_RANGE	The lock-in period must be between 1 and <n> years	Validation	Correct the lock-in period.
MSG-PRM-029	PROMO_NOT_EDITABLE	Promo <code> is <status> and cannot be changed. Use Amend to create a new version	Error	Click Amend.
MSG-PRM-030	PROMO_PENDING_VERSION_EXISTS	Promo <code> already has version <n> in Draft or Pending Approval	Error	Open and finish that version first.
MSG-PRM-031	PROMO_SAVED	Promo <code> v<n> saved as draft	Confirmation	No action.
MSG-PRM-032	PROMO_SUBMITTED	Promo <code> v<n> submitted for approval	Confirmation	No action. The approvers are notified.

15.2 SCR-PRM-03 Promo approval

ID	Code (Reference)	Message	Type	What the user does
MSG-PRM-033	PROMO_SELF_APPROVAL	You cannot approve or return a promo you created or amended	Error	Leave it to another approver.
MSG-PRM-034	PROMO_RETURN_REMARK	Enter the reason for returning the promo	Validation	Enter a remark.
MSG-PRM-035	PROMO_APPROVE_START_PASSED	The period start <date> has passed. Return the promo so the maker can correct the period	Error	Return the promo.
MSG-PRM-036	PROMO_APPROVED	Promo <code> v<n> approved. Status: <status>	Confirmation	No action.
MSG-PRM-037	PROMO_RETURNED	Promo <code> v<n> returned to <maker>	Confirmation	No action.

15.3 SCR-PRM-02 Lifecycle dialogs

ID	Code (Reference)	Message	Type	What the user does
MSG-PRM-038	PROMO_ACTION_REMARK	Enter the reason	Validation	Enter a remark.
MSG-PRM-039	PROMO_SUSPENDED	Promo <code> suspended. It is no longer offered in the risk block	Confirmation	No action.
MSG-PRM-040	PROMO_RESUMED	Promo <code> resumed	Confirmation	No action.
MSG-PRM-041	PROMO_WITHDRAWN	Promo <code> withdrawn with end date <date>	Confirmation	No action.
MSG-PRM-042	PROMO_OPEN_QUOTES	<n> open quotation(s) carry this promo. They keep it until their validity ends	Warning	Confirm, or cancel and review the quotations first.

15.4 SCR-PRM-05 Upload Variant Mapping

ID	Code (Reference)	Message	Type	What the user does
MSG-PRM-043	UPLOAD_FILE_TYPE	Upload an Excel (.xlsx) file	Validation	Save the file as .xlsx and upload again.
MSG-PRM-044	UPLOAD_TEMPLATE_INVALID_ID	The file does not match the Promo Variant Mapping template: <column> is missing	Error	Download the template and copy the rows into it.
MSG-PRM-045	UPLOAD_MAX_ROWS	The file has more than <max> rows	Error	Split the file.
MSG-PRM-046	UPLOAD_ROW_ERROR	Row <n>: <message>	Error	Correct the row in the result file and upload the corrected rows.
MSG-PRM-047	UPLOAD_DONE	<n> line(s) loaded, <m> rejected. Download the result file for the rejected rows	Confirmation	Download the result file when rows were rejected.

15.5 SCR-PRM-04 Discount Caps

ID	Code (Reference)	Message	Type	What the user does
MSG-PRM-048	CAP_REQUIRED_FIELDS	Enter the product, channel, minimum and maximum discount, minimum issuing rate and effective from date	Validation	Complete the fields.
MSG-PRM-049	CAP_RANGE	Discount caps must be between 0% and 100%	Validation	Correct the value.
MSG-PRM-050	CAP_MIN_ABOVE_MAX	The minimum discount cannot be higher than the maximum discount	Validation	Correct the values.
MSG-PRM-051	CAP_THRESHOLD_RANGE	The approval threshold must be between the minimum and the maximum discount	Validation	Correct the threshold.
MSG-PRM-052	CAP_OVERLAP	An approved cap for <product> through <channel> already covers <date>	Error	End-date the existing cap first, or start the new cap after it.
MSG-PRM-053	CAP_FROM_IN_PAST	The effective from date cannot be before today	Error	Enter today or a later date.
MSG-PRM-054	CAP_SELF_APPROVAL	You cannot approve a cap you created or changed	Error	Leave it to another approver.
MSG-PRM-055	CAP_AFFECTS_PROMOS	<n> line(s) of active promos would be outside the new cap: <list>. These lines will not be offered from <date>	Warning	Confirm, or amend the promos first.
MSG-PRM-056	CAP_SAVED	Discount cap for <product> through <channel> submitted for approval	Confirmation	No action.

15.6 SCR-QOT-MTR Motor risk block

ID	Code (Reference)	Message	Type	What the user does
MSG-PRM-057	PROMO_NONE_ELIGIBLE	No promo is open to this vehicle	Information	No action. The vehicle is rated at the standard rate.
MSG-PRM-058	PROMO_NOT_NEW_VEHICLE	Promos apply to brand-new vehicles only	Error	Remove the promo, or correct the vehicle condition and year model if they are wrong.
MSG-PRM-059	PROMO_COVER_NOT_COMPREHENSIVE	Promos apply to Comprehensive cover only	Error	Remove the promo or change the cover.
MSG-PRM-060	PROMO_NOT_ELIGIBLE	Promo <code> is not open to this vehicle, product, insurer or channel	Error	Select another promo or none.
MSG-PRM-061	PROMO_FMV_OUT_OF_RANGE	The FMV of <fmv> is outside the range of promo <code> for this variant	Error	Select another promo or none.
MSG-PRM-062	PROMO_EXPIRED	Promo <code> ended on <date>. Remove it or select another promo	Error	Remove the promo; the vehicle is re-rated at the standard rate.
MSG-PRM-063	PROMO_SUSPENDED_QUOTE	Promo <code> is suspended and cannot be selected	Error	Select another promo or none.
MSG-PRM-064	PROMO_QUOTA_REACHED	Promo <code> has reached its quota of <n> units	Error	Select another promo or none.
MSG-PRM-065	PROMO_NOT_COMBINABLE	Promo <code> cannot be combined with <scheme or discount>	Error	Remove the scheme or additional discount, or the promo.
MSG-PRM-066	PROMO_RATE_FETCHED	Rates of promo <code> v<n> applied: issuing <r>%, remitting <r>%	Information	No action.
MSG-PRM-067	PROMO_RATE_LOCKED	Only authorised users can change the promo rate	Error	Ask an authorised user.
MSG-PRM-068	PROMO_RATE_BELOW_MIN	The issuing rate cannot be lower than <min>% for this promo	Error	Enter the minimum rate or above.
MSG-PRM-069	PROMO_RATE_ABOVE_PROMO	The issuing rate cannot be higher than the promo rate of <r>%. Remove the promo to use the standard rate	Error	Correct the rate or remove the promo.
MSG-PRM-070	PROMO_OVERRIDE_REASON	Enter the reason for changing the promo rate	Validation	Enter a reason.
MSG-PRM-071	PROMO_CAP_EXCEEDED_QUOTE	The discount of <x>% is above the maximum of <max>% for <product> through <channel>	Error	Raise the rate or remove the promo.
MSG-PRM-072	PROMO_CAP_MIN_QUOTE	The discount of <x>% is below the minimum of <min>% for <product> through <channel>	Error	Remove the promo.
MSG-PRM-073	PROMO_APPROVAL_ROUTED	The discount of <x>% is above <t>%. The quotation will go to <role> for approval	Information	No action. Submit the quotation.
MSG-PRM-074	PROMO_VERSION_CHANGED	Promo <code> changed since the last version of this quotation (v<old> to v<new>). The new version uses v<new>	Warning	Check the premium before submitting.
MSG-PRM-075	PROMO_REMOVED_RERATED	Promo <code> was removed and the vehicle was re-rated at the standard rate	Warning	Check the premium; inform the client if the quotation was already sent.
MSG-PRM-076	PROMO_EXTENSION_ENDED	Promo <code> ended on <date>. Extending the quotation removes the promo and re-rates it at the standard rate	Warning	Confirm the extension or leave the quotation to lapse.

15.7 Endorsement screen

ID	Code (Reference)	Message	Type	What the user does
MSG-PRM-077	PROMO_ENDORSE_VEHICL E_CHANGE	Changing the vehicle removes promo <code>; the premium of the new vehicle is rated at the standard rate	Warning	Confirm, or cancel the change.

16 Notifications catalogue

Table 29: Notifications

ID	Trigger	To	Channel	Subject / content
NT-PRM-01	Promo or amendment submitted	Product Approvers except the maker	In-app, e-mail	Promo <code> v<n> is waiting for your approval
NT-PRM-02	Promo approved or returned	Maker	In-app, e-mail	Promo <code> v<n> approved / returned: <remark>
NT-PRM-03	Promo becomes Active	Sales distribution list, agents of the channels	E-mail	New promo <description> from <start> to <end> for <variants>
NT-PRM-04	End date in PRM_EXPIRY_ALERT_DAYS	Product Administrator, Sales Head	In-app, e-mail	Promo <code> ends on <end>
NT-PRM-05	Promo expired	Product Administrator	In-app	Promo <code> expired; <n> units used
NT-PRM-06	Quota at PRM_QUOTA_ALERT_PCT or reached	Product Administrator, Sales Head	In-app, e-mail	Promo <code> has used <n> of <quota> units
NT-PRM-07	Promo suspended or withdrawn	Sales, users with open quotations carrying it	In-app, e-mail	Promo <code> suspended / withdrawn: <reason>. Open quotations keep it until their validity ends
NT-PRM-08	Cap submitted / approved / returned	Product Approvers / maker	In-app	Discount cap <product> - <channel> <status>
NT-PRM-09	Approved cap puts active promo lines outside	Product Administrator	In-app, e-mail	<n> lines of <promo codes> are outside the new cap from <date>

17 Document outputs

17.1 Quotation PDF - promo block

Table 30: Quotation PDF promo block

Element	Content
Position	Under the premium table of each vehicle with a promo
Title	Promotion: <promo description>
Lines	Premium at standard rate; Promo discount; Total premium with promo; Excess: PHP <amount> (promo)
Footnote	Promo valid for quotations created up to <end date>. Subject to the insurer's acceptance.
Not printed	Promo remitting rate, rate spread, override reason

17.2 Placement file - promo columns

Table 31: Placement file promo columns

Column	Format	Example
PROMO_CODE	Text 20	PRM-VELOZ26
PROMO_VERSION	Number	1
PROMO_ISSUING_RATE	Decimal 4	1.5000
PROMO_REMITTING_RATE	Decimal 4	1.3000
PROMO_EXCESS	Amount	2000.00
STANDARD_GROSS_PREMIUM / PROMO_DISCOUNT	Amount	32314.50 / 7515.00

18 Upload screens

18.1 Promo Variant Mapping template

Table 32: Upload template columns

Column	Mand.	Format	Rule
PROMO_CODE	Y	Text	Existing promo in Draft
MAKE / MODEL / VARIANT	Y	Text	Must match an active Vehicle Master entry
YEAR_FROM / YEAR_TO	Y	YYYY	YEAR_TO >= YEAR_FROM
FMV_FROM / FMV_TO	N	Amount	FMV_TO > FMV_FROM
INSURER_CODE	N	Text	One of the promo insurers; blank = all
PROMO_ISSUING_RATE	Cond.	Decimal 4	Promo rate type
MIN_ISSUING_RATE	N	Decimal 4	Blank = promo issuing rate
PROMO_REMITTING_RATE	Cond.	Decimal 4	<= issuing rate
DISCOUNT_PCT / MAX_DISCOUNT_PCT	Cond.	Decimal 2	Discount type

Rules: .xlsx only, first sheet, header row exactly as above, at most 2,000 rows. Each row is validated with the messages of FR-PRM-003; the result file repeats the rejected rows with a RESULT column.

19 Cross-module dependencies and interface contract

Table 33: Interface contract

Module / requirement	PROD-15 gives	PROD-15 needs
Product Configurator (PROD-03, 12, 13)	Promo rate and excess to the rating engine	Standard rates, FMV, rating hook
Commission rules (PROD-16, COMM-05/06)	Promo remitting rate and rate spread per policy	Sharing schedule per channel
Quotation (QUOT-02 to 04)	Promo on the risk item, approval route	Version, extension and conversion events
Issuance (ISSUE-01/02)	Promo columns on the placement file	Booking event (unit count)
Endorsement / Cancellation	Promo rate for pro-rata	Vehicle change and flat cancellation events
Renewals (RENEW-02/03), Schemes (SCHM-01/03)	Lock-in flag, combinability	Scheme on the vehicle; renewal run
Reports (RPT-SLS-02/05, RPT-OPS-05/07/08)	Promo code and rates per policy	-

20 Sign-off and change control

20.1 What is signed

TISPH signs this FRS for TIS-BRD-PROD-15: the functional requirements (chapter 4), the workflow (chapter 5), screens, messages, notifications, documents and uploads (chapters 12 to 18). Values marked default and the open questions of section 10.3 are not frozen.

20.2 Change after sign-off

A change to anything signed is raised through the change control route of BRD section 8. The project team assesses its effect, including on PROD-12 and PROD-16 in the same CR-01, and a new version of this FRS is issued for delta sign-off.

20.3 Signatures

Table 34: Sign-off

Role	Name	Unit	Signature	Date
Business owner		TIS Sales		
Business reviewer		TISPH Operations		
Business reviewer		TISPH FGA / Cash Control		
Project Manager		TISPH DTID		
Delivery lead		iorta TechNXT		

Appendix A Premium computation examples

All rates, limits and amounts are illustrative. DST 12.5%, VAT 12% and LGT 0.75% on the basic premium; each tax rounded to 2 decimals.

A.1 Promo rate - Veloz 1.5 V CVT, FMV 1,200,000, TFS

Table 35: Promo rate example

Item	Standard (2.00%)	With PRM-VELOZ26 (1.50%)
OD / Theft + AON (FMV x rate)	24,000.00	18,000.00
VTPL-BI (limit 200,000)	600.00	600.00
VTPL-PD (limit 200,000)	1,200.00	1,200.00
Basic premium	25,800.00	19,800.00
DST 12.5%	3,225.00	2,475.00
VAT 12%	3,096.00	2,376.00
LGT 0.75%	193.50	148.50
Gross premium	32,314.50	24,799.50
Discount on gross premium	-	7,515.00 (23.26%)
Excess	60,000.00 (5% of FMV)	2,000.00 (promo, Private Car)
Remitting rate on OD / Theft + AON	1.70%	1.30%
Rate spread (TISPH commission before sharing)	3,600.00	2,400.00
Net remittance to insurer	28,714.50	22,399.50

A.2 Gross premium discount - Hilux, FMV 1,800,000, 10%

Table 36: Gross premium discount example

Item	Amount
OD / Theft + AON 2.00%	36,000.00
VTPL-BI / VTPL-PD	750.00 / 1,500.00
Basic premium	38,250.00
DST / VAT / LGT	4,781.25 / 4,590.00 / 286.88
Standard gross premium	47,908.13
Discount 10% of gross premium	4,790.81
Payable by the customer	43,117.32
Net remittance (standard 1.70%, spread 5,400.00)	42,508.13
TISPH commission after discount (Q-01 default)	609.19

A.3 Why the rate discount is the worst case

The rate discount of a line is $(2.00 - 1.50) / 2.00 = 25.00\%$. The discount on gross premium in A.1 is only 23.26%, because VTPL-BI and VTPL-PD are charged in full and taxes apply in proportion. The discount on gross premium can therefore never be higher than the rate discount, so a line that passes the cap at set-up cannot breach it at rating, unless the cap itself is lowered later (FR-PRM-023 checks that case).

Appendix B Parcel / Courier insurance workings

TISPH asked for the Parcel / Courier workings to sit alongside this FRS. They are reference material for TIS-BRD-PJRN-09, which gets its own FRS; nothing in this appendix changes PROD-15.

B.1 Sources

- BRD v2.2, TIS-BRD-PJRN-09 Parcel / Courier (Customization, Phase 1, confirmed a priority by TIS Sales on 14 Sep).
- Gap Analysis Session 9 (28 Aug 2026), MOM section 28: certificate per customer under an Open Policy with a daily Declaration; flat PHP 2,500 charge to the customer; default flat premium PHP 500 per customer inclusive of tax, levies and other charges; AXA gives 3% commission; the full premium is remitted to AXA, who pays the commission back to TISPH. Open item (action 33): the breakdown of the PHP 2,500 and the declaration format to AXA.
- Gap Analysis Session 8: Marine Cargo (Inland) open policy - declarations are made daily and sent to the insurer monthly by bulk upload; Parcel / Courier replaces Marine Hull in scope.
- PARCEL_INSURANCE_BREAKDOWN.xlsx from TISPH: the cost breakdown per customer, which answers part of action 33.

B.2 The TISPH workbook as received

Table 37: Workbook values

Item	Sum insured	Amount (PHP)
Customer charge - Rush delivery	-	2,500.00
Customer charge - Regular delivery	-	2,000.00
of which courier fee (LBC)	-	not given
of which notary	-	not given
of which insurance	-	500.00
Amount Due to TISPH (as labelled in the workbook)	-	500.00
Cover: Personal Accident	50,000.00	50.00
Cover: Marine Hull (Parcel)	10,000.00	12.00
Total premium	-	62.00
TIS income (500 - 62)	-	438.00
Commission Personal Accident 30%	-	15.00
Commission Marine Hull (Parcel) 30%	-	3.60
Total TIS income	-	456.60

B.3 Workings per certificate

The workbook reads as follows: of the amount charged to the customer, PHP 500 is the insurance part. Out of that PHP 500, PHP 62 is the actual premium for the two covers and is remitted in full to AXA; the PHP 438 left is kept by TISPH as its margin. AXA then pays commission on the PHP 62. The table shows the result both at the 30% in the workbook and at the 3% agreed in Session 9 and written in the BRD.

Table 38: Income per certificate

Line	Commission at 30% (workbook)	Commission at 3% (MOM / BRD)
Insurance part of the customer charge	500.00	500.00
Premium remitted to AXA (PA 50.00 + Parcel 12.00)	62.00	62.00
TISPH margin (500 - 62)	438.00	438.00
Commission from AXA - Personal Accident	15.00	1.50
Commission from AXA - Parcel	3.60	0.36
Total TISPH income per certificate	456.60	439.86
Effective premium rate - PA (50 / 50,000)	0.10%	0.10%
Effective premium rate - Parcel (12 / 10,000)	0.12%	0.12%

B.4 Daily declaration example

An illustrative day with 25 rush and 15 regular deliveries (40 certificates). The same figures go on the daily declaration to AXA; the month is the sum of the days.

Table 39: Daily and monthly view

Line	Per certificate	Day (40 certificates)	Month (22 working days)
Customer charges (rush 2,500 / regular 2,000)	-	92,500.00	2,035,000.00
Insurance part	500.00	20,000.00	440,000.00
Sum insured declared - PA	50,000.00	2,000,000.00	44,000,000.00
Sum insured declared - Parcel	10,000.00	400,000.00	8,800,000.00
Premium remitted to AXA	62.00	2,480.00	54,560.00
TISPH margin	438.00	17,520.00	385,440.00
Commission at 30%	18.60	744.00	16,368.00
Commission at 3%	1.86	74.40	1,636.80
TISPH income at 30%	456.60	18,264.00	401,808.00
TISPH income at 3%	439.86	17,594.40	387,076.80

B.5 Points TISPH needs to confirm

The workbook and the meeting notes do not say the same thing on some points. We have kept both figures above and need TISPH to confirm the following before the PJRN-09 FRS is written.

Table 40: Parcel points to confirm

No.	Point	Workbook	MOM Session 9 / BRD
P-01	AXA commission rate	30% on each cover	3%
P-02	What the PHP 500 is	Insurance part of the charge: PHP 62 premium plus PHP 438 TISPH margin	Default flat premium of PHP 500, inclusive of taxes and charges, remitted in full to AXA
P-03	Customer charge	Rush 2,500 and Regular 2,000	Flat 2,500
P-04	Courier fee (LBC) and notary amounts	Listed, no amounts	Breakdown still open (action 33)
P-05	"Amount Due to TFSPH" of 500	Label only	Not covered: is this the amount TFSPH passes to TISPH, or the amount TISPH owes TFSPH?

No.	Point	Workbook	MOM Session 9 / BRD
P-06	Taxes	Premium shown without taxes	PHP 500 inclusive of tax, levies and other charges; VAT on TISPH margin and commission to be confirmed by FGA
P-07	Covers per certificate	PA 50,000 and Parcel 10,000	Not stated; confirm both covers apply to every customer
P-08	Declaration and reporting to AXA	-	Daily declaration; monthly bulk upload as for Marine Cargo inland; format from TISPH (action 33)

Workbook attached. The same workings, with formulas, are in the Excel file Parcel_Insurance_Workings.xlsx delivered with this FRS. Change the commission rate or the daily counts there and every total updates.
