1. Document Control

Date	Version	Author & Business Unit Info	Reviewed By & Business Unit Info	Approved By & Business Unit Info	Change History
03 October 2026	1.0	iorta TechNXT			Initial issue

2. Acronyms

Acronym / Symbol	Definition / Meaning
OOTB	Out of the box
IC	Insurance Commission
BIR	Bureau of Internal Revenue
NPC	National Privacy Commission
DPA	Data Privacy Act of 2012 (RA 10173)
EOPT	Ease of Paying Taxes Act (RA 11976)
CTPL	Compulsory Third Party Liability
LTO	Land Transportation Office
DST	Documentary stamp tax
LGT	Local government tax
FST	Fire service tax
LGU	Local government unit
VAT	Value-added tax
EWT	Expanded withholding tax
CWT	Creditable withholding tax
ATC	Alphanumeric tax code
SAWT	Summary Alphalist of Withholding Taxes
QAP	Quarterly Alphalist of Payees
SLSP	Summary List of Sales and Purchases

KYC	Know your customer
RFQ	Request for quotation
OR	Official receipt
PV	Payment voucher
JV	Journal voucher
GL	General ledger
SoD	Segregation of duties
TOTP	Time-based one-time password
API	Application programming interface
AMC	Annual Maintenance Contract
CR	Change request
Dev	Development environment
Pre-Prod	Pre-production environment
SIT	System integration test
UAT	User acceptance test

3. About this release

3.1 Release identification

Item	Value
Product	iNXT BrokerVerse OOTB, insurance broking platform for Philippine non-life brokers
Release	1.0
Build	Branch brokerverse-platform of 03 October 2026; backend package version 1.0.0. The repository carries tag v1.0.0 (29 September 2026); the tag of the

Item	Value
	final 1.0 build is [to confirm]
Technology	React 18 web application, Node.js 22 API, PostgreSQL 16 database
Release test	03 to 04 October 2026; see the Test Summary Report
Audience	Broker management, key users, System Administrator, auditors, and the iorta TechNXT support team

3.2 Release in figures

Item	Count
Delivered roles	7 (System Administrator, Sales & Marketing, Processing Team, Operations, Claims, Accounting, Accounting Manager)
Menu screens checked per role in the release test	173
Catalogue reports in Excel, CSV and PDF	39, plus dashboards and printed documents
Registered API routes	868, documented in OpenAPI, Postman and an Excel touchpoint list
Scheduled jobs (Asia/Manila time)	18, of which 7 are delivered switched off (including the remittance schedules and the overdue data subject request reminder)
Document number series	61, counters that only move forward
Upload templates for go-live data	About 40, each verified against its importer
Test cases	497 prepared: 486 passed, 2 failed, 3 blocked, 6 not run after the re-test of 03 October 2026 (first run: 480 passed, 8 failed)
Automated business-rule tests	634, all passed
End-to-end UAT cycle	371 business steps, 0 failed

4. What is delivered

4.1 Sales and placement

Capability	Main screens
Prospects with contact details, address and status, bulk upload	Operations > Sales & Marketing > Prospects
Quick Quote of packaged products from insurer rate tables; Compare Insurers	Quick Quote; Compare Insurers
Request for Quotation to several insurers on a broker slip; insurer offers and declines	Request for Quotation
Quotations with premium taxes and commission; customer response recorded on screen or through an approval link; maker-checker on quotations	Quotations
Placement Slips with lead insurer and co-insurers, shares totalling 100%	Placement Slips
Placement journey per line of business (placement.journey), shown as a progress bar	Master > Configuration

4.2 Policy, servicing, claims and renewals

Capability	Main screens
Policy issue for package and non-package business, motor with CTPL and Auto Passenger PA, KYC checks before motor issue, co-insurance	Operations > Policy
Endorsements (additional premium, return premium, changes of details, extension) and cancellations, with taxes following the premium	Operations > Policy
Claims from notification to settlement and closure, preliminary loss advice, claim letters, settlement maker-checker, SLA ageing	Operations > Claims
Renewals: pipeline 90 days before expiry, notices at 60, 30 and 15 days, renewal batch and queue, at-risk policies, retention analytics, lapse management, win-back campaigns	Operations > Renewals
Clients with their policies and accounting position	Operations > Clients

4.3 Money and accounting

Capability	Main screens
Open items, payment capture by sales and operations, acknowledgement receipts	Operations > Open Items; Payments
Billing, official receipts, receipt and invoice e-mails with PDF	Accounts > Receipts
Collections, reminders, credit control: instalment plans, premium warranty monitor, client credit limits, remittance ageing	Accounts > Collections; Credit Control
Disbursement and payment vouchers, petty cash from request to replenishment	Accounts > Disbursement; Petty Cash
Remittance to insurers by share, with tracking, statements, settlement, approval within the Authority Matrix limits, schedules run by the remittance-schedules job, exceptions, electronic transfer records, agency bill and direct bill processing	Accounts > Remittance
Commission: referrer and sub-agent accounts, commission rate matrix, payout after collection with withholding	Commission
Incentive programmes, calculations, approvals and statements	Accounts > Incentive

Capability	Main screens
General ledger from posting rules; Journal Voucher, Correction JV, Reversal JV; open entry matching	Accounts
Period End: period management, month-end close with checklist and sub-ledger tie-out, year-end close, recurring journals, financial statements	Accounts > Period End
Bank reconciliation with statement import (BDO, BPI, Metrobank and generic formats) and matching rules	Accounts > Bank Reconciliation
Insurer statement reconciliation with column mapping per insurer	Accounts > Insurer Reconciliation
Reinsurance: treaties, cessions, recoveries, bordereaux, reconciliation	Reinsurance

4.4 Configuration, controls and reporting

Capability	Main screens
Product Configurator: product templates, coverage builder, rating engine, acceptance rules, document manager, market and risk mapping	Product Configurator
Masters for organisation, insurers, lines of business, products, covers, vehicles, locations, designations and hierarchy, finance	Master > Generals; Master > Finance
System Settings, Configuration by business area, Document Numbering, Schedules, E-mail Outbox, Audit Trail	Master
User management: users, roles, User Access Matrix, Role Permissions, Authority Matrix, Delegations, Segregation of Duties, Access Reviews	Master > Generals > User Management
Security: password policy, logout, TOTP two-step verification by role, session rotation and idle sign-out, permission check on every API route	Master > Configuration
Data privacy: Consent Register, Data Subject Requests, personal data export, anonymisation with dry run	Master > Data Privacy
Approval notifications in every maker-checker flow: the request to the approvers and the decision to the maker (notification.approval_requests)	Notifications (bell)
Reports: operational and financial reports, co-insurance register, due to insurers by co-insurer; dashboards for executives, claims, processing, sales and commission	Reports; Dashboard
Payment links through PayMongo and Dragonpay (sandbox provider for testing); a confirmed payment posts the official receipt	Master > Finance > Payment Gateways

4.5 Philippine rules built in

Area	Rule as delivered
Premium taxes	DST of PHP 0.50 on each PHP 4.00 of premium, a fraction counting as a whole unit (NIRC section 184), VAT 12% for products under the VAT regime, LGT by the client's city or municipality (0.75% delivered default), FST 2% on fire lines; set in Master > Finance > Premium Taxes & LGU Rates
CTPL	1-year and 3-year CTPL per vehicle class from the motor template MOT-003-2025; inclusive of taxes and fees, never discounted; certificate number and authentication code on the policy
KYC	Government ID type, number and image, chassis, motor and plate or MV file number required before motor issue; accepted IDs include PhilSys ID, UMID, passport and driver's licence

Area	Rule as delivered
Commission tax	Output VAT on commission (VAT12-OUT); EWT on referrer commission by payee type (WI515 5% for agents and sub-agents, WC515 10% for external referrers, delivered); insurer EWT on direct-bill commission (WC139 10%) to Creditable Withholding Tax
BIR working papers	BIR Form 2307 issued and received, VAT Summary, SAWT, QAP, SLSP Sales and SLSP Purchases, in the BIR column order
Invoices and receipts	Number series for invoices, official receipts, debit notes and Form 2307; next numbers can continue the old system's numbering; cancelled documents kept with a reason
Local formats	Asia/Manila time zone, PHP base currency, +63 mobile numbers, Philippine provinces and cities with all NCR LGUs, Philippine banks
Data privacy	Consent per purpose with notice version; data subject requests due in 15 calendar days; anonymisation refused within 10 years of the last policy expiry

4.6 Changes after the release test

These changes were made on the release branch after the release test of 03 and 04 October 2026. The cases they touch are re-run in the next manual cycle.

Change	Effect for users
Data privacy module (Master > Data Privacy)	Consents, data subject requests, export and anonymisation in the system instead of outside it
E-mail attachments	Official receipt, premium invoice, policy schedule and commission debit note e-mailed with the PDF attached; attachments listed in the E-mail Outbox
Approval notifications	Every maker-checker request and decision notified under the bell
Remittance approvals in the Authority Matrix	Transaction types Remittance approval and Remittance settlement; delivered limits Accounting PHP 1,000,000.00, Accounting Manager without limit; remittance.approval_levels only as a fallback; cover through User Management > Delegations (the separate remittance delegation tab is removed)
Remittance schedules job	The schedules of Accounts > Remittance > Scheduling run daily through remittance-schedules on Master > Schedules (delivered switched off)
Duplicate masters retired	Remittance Master keeps automated remittance, statement templates, settlement parameters, bulk processing, exceptions, agency bill, adjustments and notifications; the tabs Reconciliation Rule, Electronic Transfer, History, Analytics, Direct Bill and Report Template are removed (their values are in Master > Configuration). The Commission, Employee and Petty Cash masters are removed from the menu: commission rates are in Master > Finance > Commission Rate Matrix, staff details on the user form (branch, designation, reporting to), petty cash fund size and limits on Accounts > Petty Cash > Initiate. Product Configurator > Approval Workflows is removed
One source for currency, exchange rates and premium taxes	One base currency in the Currency master; dated rates only from the Exchange Rate master; premium taxes only from Premium

Change	Effect for users
	Taxes & LGU Rates
Screen stability	Lists paged by the server (20, 50 or 100 rows), Prospects shown as a table, description paragraphs removed from working screens, steadier loading

5. Known limitations and open items

5.1 Defects and observations from the release test

ID	Item	Severity	Workaround	Target
BV-DEF-001	react-router carries a moderate security advisory (open redirect)	Medium	Navigation targets come from the application's own routes; web server allows only the application origin	Next minor release
BV-DEF-002	Data privacy features were not built at the release test	Medium	Closed: delivered (Master > Data Privacy) and re-tested on 03 October 2026	Closed
BV-DEF-003	Application-level encryption covers only two-step verification secrets	Medium	Encrypted database storage and backups; restricted database access	Product backlog
BV-DEF-004	Product configurator component lists did not show the template	Low	Closed: Template column added and re-tested on 03 October 2026	Closed
BV-OBS-005	Renewal refused for a policy expired beyond grace plus lapsed-renewal days	Low	Closed as by design: quote as new business	Closed
BV-DEF-006	Premium Taxes & LGU Rates: charges calculator product list empty for Accounting roles	Low	Closed: fixed and re-tested on 03 October 2026	Closed
BV-OBS-007	Address of the menu group Master > Generals > Organization opened "Page not found"	Low	Closed: menu groups carry no address	Closed
BV-OBS-008	Incentive > My Programs: Achievement Overview card cut off at 1440 px	Low	Closed: fixed and re-tested on 03 October 2026	Closed

Cases not run or blocked in the release test (SMTP-dependent checks, idle sign-out timing, some screen-only negative checks) are listed in the Test Summary Report and are planned for the next manual cycle.

5.2 Limits of the OOTB scope

Topic	Release 1.0 behaviour	Route
Insurer systems	No insurer API; slips, statements and debit notes by file and e-mail	Change request per insurer
IC report formats	Figures from financial statements and production reports; no IC-format report	Change request
Percentage tax	No working paper for a non-VAT broker	Ledger by insurer; change request
Anti-money laundering	No transaction monitoring, sanctions or PEP screening	Outside OOTB
Report schedules	Scheduled e-mail of reports exists in the API; no screen to set it up	System Administrator through the API
Bank payments	Transfers approved and recorded; no bank payment file	Change request per bank format
Two-step enrolment	Shows the key and a link, not a QR code	Users type the key into the authenticator app
Session tokens	Kept in browser local storage	Move to httpOnly cookie on the roadmap
Masters without Upload button	Templates loaded by the System Administrator through the API route	Upload buttons on the roadmap
Claim settlement cash	Settlement cash panel is on the claim screens; the System Administrator records funds on Accounting's instruction	Accounting menu extension on the roadmap
Mobile	Web application for desktop and	See roadmap

Topic	Release 1.0 behaviour	Route
	laptop browsers (current Chrome, Edge or Firefox)	
Language	English screens; no Filipino translation file	Change request
Load test	Not run; single-server timings only	Run on the production-sized environment before go-live
External penetration test	Not run	Commission before go-live

5.3 Before go-live at a broker

- Set `security.require_2fa_roles` to at least System Administrator, Accounting and Accounting Manager.
- Replace the default authority limits with the board-approved signing authority.
- Fill the BIR settings (registered name, address, TIN of the withholding agent).
- Confirm premium tax rules, LGU rates, ATC and GL accounts with the broker's tax adviser.
- Switch off the Sandbox payment gateway in production; enter live gateway keys in the secret store.
- Switch on "Send e-mails" only after the SMTP mailbox is tested.

6. Upgrade and versioning policy

6.1 Version numbers

Releases are numbered MAJOR.MINOR.PATCH and tagged in the repository (for example v1.0.0); GET /api/version shows the commit that is running.

Type	Example	Content	Frequency (standard)
Patch	1.0.1	Defect fixes and security fixes; no change to how users work	As needed; emergency release for P1 or security
Minor	1.1.0	New functions, new reports, regulatory form updates, upgrades of components; existing data and settings kept	Planned releases, monthly when there are fixes or changes
Major	2.0.0	Changes that need a migration project, retraining or a change of hosting components	Announced at least 6 months ahead [to confirm]

6.2 Rules for every release

- Database changes only add to the schema; they are applied automatically when the API starts, under a lock, and recorded. The previous release runs on the newer schema, so a release can be rolled back by redeploying the previous image.
- Settings and master data changed by the broker are kept: the seed inserts only what is missing.
- Every release has release notes: fixes, changes, migrations and anything the System Administrator must do by hand.
- Each release is installed in Dev, then in SIT for a large broker, then in UAT, before production; a major release is also rehearsed in a temporary Pre-Prod restored from a production backup; the broker runs the UAT scripts for the changed areas; iorta TechNXT runs the regression; the CAB approves.
- A database snapshot is taken before deployment; deployment happens in the agreed maintenance window, announced at least 5 business days ahead.

6.3 Entitlement and support of versions

- Updates of the OOTB version and regulatory form updates released for all customers are included while the subscription or the AMC is in force.
- Support covers the current release and the two planned releases before it (assumption in the Production Support Approach). A broker that stays further behind is asked to upgrade before a defect is fixed.
- Broker-specific changes made under a change request are carried forward into later releases only where the change request says so [to confirm the standard clause].

7. Product roadmap

Indicative and not contractual. The roadmap shows iorta TechNXT's current intentions. Content, order and timing may change. It is not a commitment to deliver any function, it is not part of any licence, subscription or support agreement, and a purchase decision should be based on the functions in the release delivered. Items a broker needs by a date are agreed as change requests.

7.1 Near term: next patch and minor release (indicative: within 3 months)

Item	Why
Upgrade react-router to the fixed major version (BV-DEF-001)	Close the moderate advisory
Re-run of the blocked SMTP cases and the cases not run	Close the release test
QR code for two-step enrolment	Easier enrolment
Upload buttons on the masters that only have an API route	Self-service go-live loads
Automated dependency and image scanning in the pipeline; tests restored in the deployment workflow; branch protection	Secure development lifecycle gaps of the architecture review

7.2 Mid term (indicative: 3 to 9 months)

Item	Why
Session refresh in an httpOnly cookie	Remove tokens from browser local storage
Field-level encryption of personal identifiers (TIN, ID numbers) (BV-DEF-003)	Defence in depth for sensitive personal information
Move of the front-end build from Create React App to Vite	Maintained build tooling; clears build-time advisories
Screen to set up scheduled report e-mails	Today only through the API
Claim settlement cash on the Accounting menu	Accounting records claim funds directly
Rate limits shared across API instances	Consistent limits with several instances
Load test results and sizing confirmation on a production-sized environment	Evidence for larger brokers

7.3 Later (indicative: beyond 9 months)

Item	Why
IC report formats	Reduce manual preparation of IC reports
Percentage tax working paper for non-VAT brokers	Complete the BIR working papers
Bank payment files for the main Philippine banks	Remittance and payouts without re-keying in bank portals
Insurer API connectors, starting with insurers that publish an API	Fewer files and e-mails with insurers
Mobile-friendly screens for sales and claims	Field use
Filipino screen translation	Users who prefer Filipino
Screening support for anti-money laundering checks	Brokers covered by the AMLA

Brokers can propose roadmap items through their account manager. iorta TechNXT reviews the roadmap with customers at least once a year [to confirm the forum, for example a customer advisory meeting].

8. Document Sign-Off

Serial Number	Description	Owner	Status
1	Release tag of the final 1.0 build to be confirmed; re-test of the data privacy cases after the release test; roadmap dates indicative	iorta TechNXT	Open
