Authorized by the Insurance Commission to act as an Insurance Agent

Toyota Insurance Services Philippines – User Manual

Version: **1.3**

Date: **10 October 2026**

Status: **Draft**

Classification: **Internal**

TABLE OF CONTENTS

Document Control **12**

1. About this manual **13**

1.1 Purpose 13

1.2 How the manual is organised 13

1.3 Conventions 13

2. Getting started **15**

2.1 Signing in 15

2.2 The screen layout 17

2.3 My Work 19

2.4 Notifications 21

2.5 My Profile 22

2.6 Working with lists 24

2.7 Working with forms 26

2.8 Uploads and templates 29

2.9 Approvals and maker-checker 30

2.10 Where the audit trail is 33

2.11 Personal data masking 34

2.12 The Help panel 35

2.13 When the system refuses an action 35

3. The TISPH process end to end **37**

3.1 The chain at a glance 37

3.2 Leads from TFS, dealers and walk-in clients 38

3.3 Dealer programme policies 39

3.4 Quotation and request for quotation 41

3.5 Placement with the insurer 43

3.6 Policy, billing and endorsements 45

3.7 Collection by Cash Control 47

3.8 Remittance to the insurers 50

3.9 Commission and incentives 51

3.10 Claims 52

3.11 Renewals 53

3.12 Month-end and tax 54

4. TIS Sales Associate **57**

4.1 Role summary 57

4.2 Menus available 57

4.3 What you can view, change and approve 58

4.4 Approvals 60

4.5 Segregation of duties 60

4.6 Daily and periodic tasks 61

4.7 Procedures 61

5. TIS Sales Officer **65**

Change log

Version	Date	Author	Change
1.0	10 October 2026	iorta TechNXT	First TISPH edition: TISPH roles, process and screens (Draft for TISPH review)
1.3	10 October 2026	iorta TechNXT	Edition of release 2026.1.3: the Help panel shows the release, the environment, the build and release date and the approvers of the release (Draft for TISPH review)

1. About this manual

1.1 Purpose

This manual tells the staff of Toyota Insurance Services Philippines how to do their work in the system: Sales, Operations, Cash Control, Finance and General Accounting, IT AppSupport and the General Manager. It covers the work from the first contact with a client (a TFS referral, a dealer lead, a walk-in client or a renewal) to the quotation, the placement with the panel insurers, the policy, the collection, the remittance to the insurer, the commission, the claims, the renewals and the month-end close.

1.2 How the manual is organised

Chapter	Content
Getting started	Signing in with your Microsoft 365 account, the screen layout, My Work, lists, forms, approvals and maker-checker, the audit trail and the Help panel.
The TISPH process end to end	Each step of the work, from the lead to the month-end close, with the roles that do it and the screen where it is done.
One chapter per role	The thirteen roles of TISPH by department: Sales, Operations, Cash Control, Finance and Accounting, IT and Management. Each chapter lists the menus of the role, what it can view, change and approve, who approves its work, its segregation-of-duties rules, its tasks and its procedures.
Screen reference	Every screen of the TISPH menus, in menu order, with the roles that open it.
Reports	The report menus and the Report Builder.
Glossary	The insurance, accounting and system terms and the abbreviations used on the screens and in this manual.

The chapters and their sections are numbered in the same way on the help page and in the Word and PDF files. A reference to another section gives its number in the Word and PDF files, for example "see Menu search (2.2.1)", and the screenshots are numbered by chapter (Figure 4.2).

Read Getting started and The TISPH process end to end first, then the chapter of your role. In the system, open Help (F1) on any screen: **Open this section** opens the section of that screen, and **Open my role chapter** opens the chapter of your role.

The menus, access levels, approvals and segregation-of-duties rules in the role chapters are produced from the delivered configuration of the system. They describe the roles as delivered. The access in force for a person is on Master > Users and Access > User Access Matrix.

1.3 Conventions

Convention	Meaning
Operations > Sales & Marketing > Prospects	A menu path: open each item in the side bar in turn.
Create Prospect	A button, tab, field or status, written exactly as it appears on the screen.
Choose	Opening a menu path ("Choose Operations > Policy"), or taking a value from a list or a calendar ("choose the **Due date**").
Select	Clicking a button, tab, link, icon, check box or row ("Select **Save**").
PHP 1,250,000.00	Amounts in Philippine pesos. The screens show the peso sign, for example ₱1,250,000.00.
03/10/2026	The screens show dates as DD/MM/YYYY, in Manila time.

Convention	Meaning
Maker and checker	The maker enters a record; a different user, the checker, approves it.

> *The screenshots show fictional sample data of a test system: clients, vehicles, policies and amounts are not real. Your screens show your own data, and your menu shows only the screens of your role.*

2. Getting started

This chapter explains what every user of the system needs, whatever the role: signing in, finding your way around the screens, your work list, your profile, and the rules that apply on every screen (lists, forms, uploads, approvals, the audit trail and the masking of personal data).

2.1 Signing in

Every person has his or her own account. Never share an account: every action is recorded against the user in the audit trail.

1. Open the address of the system given by IT AppSupport in Chrome or Edge.
2. Choose **Sign in with Microsoft**. The page says **Sign in with your Microsoft 365 account.**
3. Sign in with your Toyota Insurance Services Philippines Microsoft 365 account, and complete the verification that Microsoft asks for (see Two-step verification (2.1.3)).
4. The system opens My Work (2.3).

The first time you sign in, the system links your Microsoft account to your user: the e-mail address of the Microsoft account must be the e-mail address or the user ID that IT AppSupport entered for you. From then on only that Microsoft account opens your user.

2.1.1 When the sign-in is refused

Message	What to do
The Microsoft sign-in was cancelled or refused. Try again, or contact the administrator.	You closed the Microsoft window or did not complete the verification. Choose **Sign in with Microsoft** again.
Your Microsoft account is not set up for this application.	No user has the e-mail address of your Microsoft account. Ask IT AppSupport to create your user or correct its e-mail address.
Your Microsoft account matches more than one user.	Two users share your e-mail address. Ask IT AppSupport to correct them.
Your user is linked to another Microsoft account.	Your user was first opened with a different Microsoft account. Ask IT AppSupport.
Account locked. / Account inactive.	IT AppSupport has locked or deactivated your user. Ask IT AppSupport.

2.1.2 Sign in with a user ID and password

Some accounts are set up by IT AppSupport to sign in with a user ID and password instead of Microsoft. On the sign-in page, select **Sign in with a user ID and password** if the password form is not already shown.

1. In **User ID**, type your user ID.
2. In **Password**, type your password. The eye icon shows the password while you type.
3. Select **Sign in**.

A password must have at least 8 characters, an upper-case letter (A-Z), a lower-case letter (a-z), a digit (0-9) and a symbol (for example ! @ # $), and must not be one of your

last 5 passwords. Every screen where you choose a password lists these rules and ticks each rule as soon as the new password meets it.

One more step can follow the password:

Screen after the password	When it appears
Change password	You signed in with a temporary password from IT AppSupport, or your password is older than 90 days. Type the password you signed in with in **Current password**, the new password in **New password** and **Confirm new password**, then select **Change password and continue**.
Two-step verification	Two-step verification is on for your user: type the 6-digit code of your authenticator app.

Forgotten password. Select **Forgot password?**, type your **User ID or e-mail address** and select **Send code**. The system e-mails a 6-digit code to the e-mail address of your user. Type it in **Verification code (from the e-mail)**, choose the new password and select **Reset password**. The code is valid for 15 minutes and is withdrawn after 5 wrong entries; **Send a new code** sends another.

Locked account. After 5 wrong passwords in a row your user is locked. IT AppSupport unlocks it on Master > Users and Access > User, or gives you a temporary password that you change at the next sign-in.

2.1.3 Two-step verification

With **Sign in with Microsoft**, the second step is Microsoft's own verification (for example a code or an approval in Microsoft Authenticator), as the Microsoft 365 policy of Toyota Insurance Services Philippines requires. The system asks for nothing more.

A user who signs in with a user ID and password can add a second step of the system itself:

1. Select your initials at the top right, then **Two-step verification** (or **Two-step verification** on My Profile (2.5)). The dialog says **Two-step verification is off.**
2. Select **Turn on**.
3. Install an authenticator app on your phone if you do not have one, for example Google Authenticator or Microsoft Authenticator.
4. In the app, add an account and scan the QR code. If you cannot scan it, type the key shown under **Can't scan? Enter this key instead:**.
5. In **Authentication code**, type the 6-digit code the app now shows, and select **Turn on**. The dialog says **Two-step verification is on.**

From then on the sign-in page asks for the current code after the password (**Authentication code**, then **Verify**). The page waits 5 minutes for the code; after that select **Back to sign in** and start again. To turn the second step off, open **Two-step verification**, select **Turn off** and type a current code. If you lose your phone, IT AppSupport turns two-step verification off for your user and you set it up again.

2.1.4 Signing out

Select your initials at the top right, then **Sign out**. The system also signs you out after 30 minutes without activity, and when your password is changed or reset, your user is

deactivated or your role changes. Anything not saved on the screen is lost, so save before you leave your desk.

2.2 The screen layout

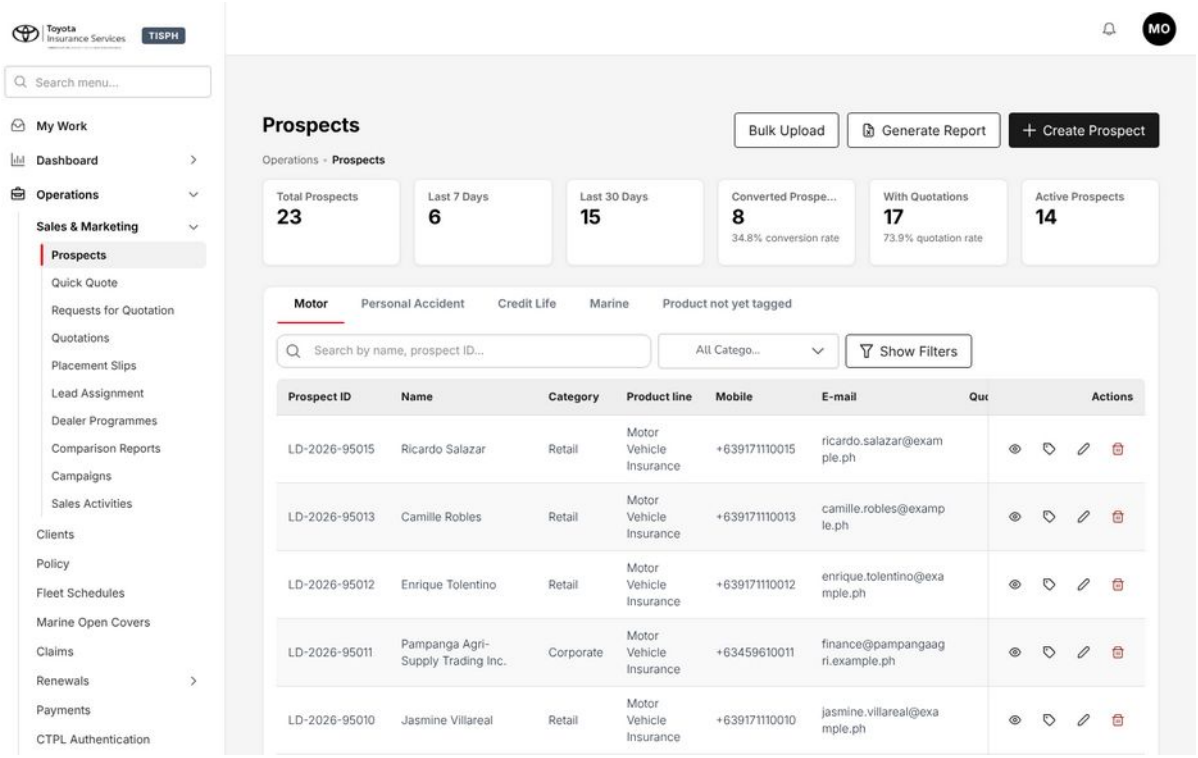

Figure 2.1: Operations > Sales & Marketing > Prospects: the side bar on the left, the page title, breadcrumb and actions on the right

Area	What it does
Logo	The Toyota Insurance Services logo and the **TISPH** tag.
Search menu...	Finds a screen of your menus by name: see Menu search (2.2.1).
Side bar	The menus of your role, in business order: My Work, Dashboard, Operations, Accounts, Commission, Reports, Master and Product Configurator. You see only the menus and screens your role may open. Select a menu to open its items; the screen you are on is marked in red.
Bell	Your notifications, with the number unread: see Notifications (2.4).
Your initials	The account menu: see The account menu (2.2.2).
Page title and breadcrumb	The name of the screen and where it sits in the menus (for example Operations • Prospects).
Page actions	The main actions of the screen, at the top right: the black button is the main one (for example **Create Prospect**).

To return to your work list at any time, choose **My Work** at the top of the side bar.

2.2.1 Menu search

1. Select **Search menu...** above the side bar, or press **/** outside a text field.
2. Type part of the screen name, for example quot.
3. The list shows each matching screen of your menus with its menu path. Select one, or move with the arrow keys and press **Enter**. **Esc** clears the search.

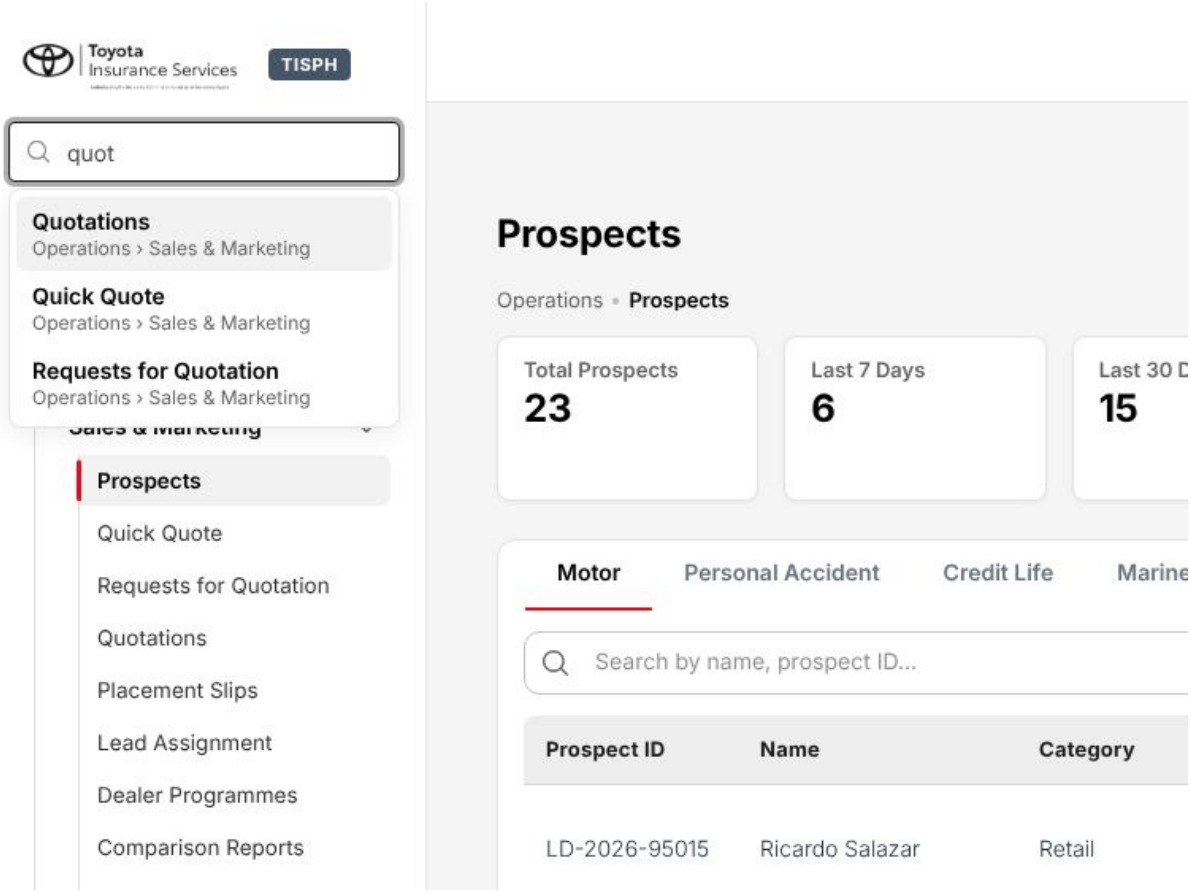

Figure 2.2: Search menu with "quot" typed: Quotations, Quick Quote and Requests for Quotation of Operations > Sales & Marketing

2.2.2 The account menu

Select your initials at the top right. The menu shows your name and your role, then:

Item	What it does
Profile	Opens My Profile (2.5).
Change password	Changes the password of a user who signs in with a password: see My Profile (2.5).
Two-step verification	Turns the second sign-in step on or off: see Two-step verification (2.1.3).
Help	Opens the Help panel (2.12).
Show full identifiers	Shown to the roles that see personal identifiers in full: see Personal data masking (2.11).
Sign out	Ends your session.

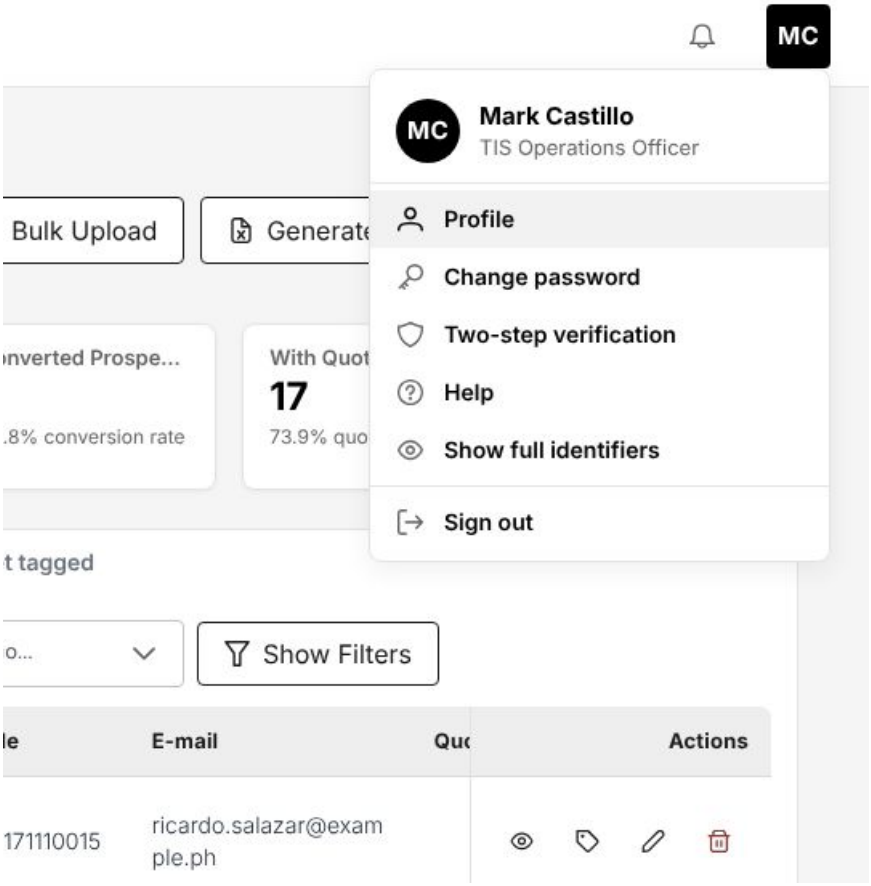

Figure 2.3: The account menu of a TIS Operations Officer

2.3 My Work

Menu: My Work

Role	Access
TIS Sales Associate	View
TIS Sales Officer	View
TIS Sales Unit Head	View
TIS Operations Associate	View
TIS Operations Officer	View
TIS Operations Unit Head	View
CCD-PDU (Post-Dated Cheques)	View
CCD-PDC / CCD-ADA	View
CCD-BP / QRPh (Receipting)	View
CCD-Recon (Reconciliation and Reversals)	View
TIS Finance & General Accounting	View
TIS IT AppSupport / Admin	View
TIS General Manager	View

My Work is the first screen after sign-in and the one place where you find what is waiting for you. The line under the title shows your role, today's date and the company.

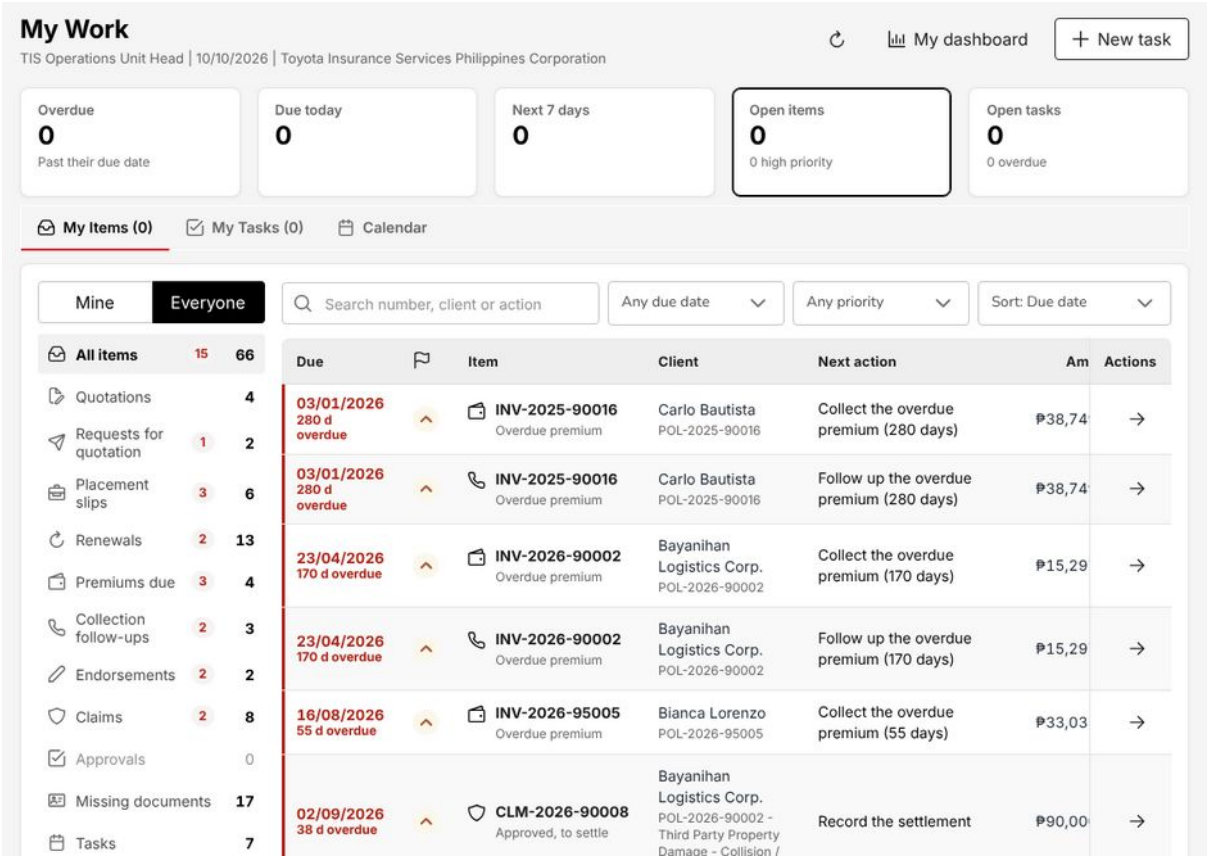

Figure 2.4: My Work of the TIS Operations Unit Head with Everyone selected

Part	What it shows
Overdue, **Due today**, **Next 7 days**, **Open items**, **Open tasks**	The number of your items in each group. Select a figure to filter the list.
My Items	Every open item you own or may act on, by category on the left: Quotations, Requests for quotation, Placement slips, Renewals, Premiums due, Collection follow-ups, Endorsements, Claims, Approvals, Missing documents and Tasks, and for finance and IT roles Bank reconciliations, Period close, Users and access and System health. You see only the categories your role may read. The red badge is the number overdue.
My Team	Shown only to a user to whom other employees report: one row per person with open, overdue and due-today counts, and **Reassign** to move an item to yourself or to someone in the team.
My Tasks	Your work diary: tasks you created, tasks given to you and tasks you gave to others.
Calendar	Your tasks and items by due date, for one day or a week, with the overdue ones above.
My dashboard	Opens the first dashboard of your role.

To work your items:

1. Choose **My Work**. **My Items** opens on **Mine**. Select **Everyone** to see the items of all users within your access, or **My team** if people report to you.
2. Choose a category on the left, or use **Search number, client or action**, **Any due date**, **Any priority** and **Sort**.
3. Select the arrow at the end of a row to open the record (quotation, renewal, claim, receipt) and act on it there. The item leaves the list when the record no longer needs your action.

To add a task:

1. Select **New task**. The task form opens on the right.
2. In **Task**, type what is to be done, and choose the **Due date** (today by default).
3. Optionally choose a **Time**, the **Priority** (Normal by default) and the **Reminder** (1 hour before by default).
4. Optionally choose the **Related record** type and find the record by number or name in **Record**, and type **Notes**.
5. Select **Save**. The reminder arrives as a notification at the time chosen.

Mark a task **Mark done** when finished; **Reopen** reopens it. The system also creates follow-up tasks by itself (for example from a client's promise to pay, a renewal next step or a claim follow-up date) and closes them when the record is closed. An overdue task sends one notification to its owner.

2.4 Notifications

The system notifies you when something needs your action or concerns your work, for example:

- a quotation, renewal, claim settlement or other record waiting for your approval (approval requests go only to the users who may approve them);
- a claim assigned to you, a task given to you, a task due or overdue;
- post-dated cheques due for deposit, a bounced cheque, a cover note about to expire, a policy renewed or lapsed;
- a month-end close still open, an access review waiting for decisions.

Select the bell at the top right. The **Notifications** panel shows your six latest notifications, newest first, with the number unread. A dot marks an unread notification.

- Select a notification to mark it as read. Open the record from My Work (2.3) or from its screen.
- Select the X on a notification to remove it (**Remove notification**).
- Select **Mark all as read** to clear the badge.
- Select **View all notifications** for the **Notification** page with every notification you received.

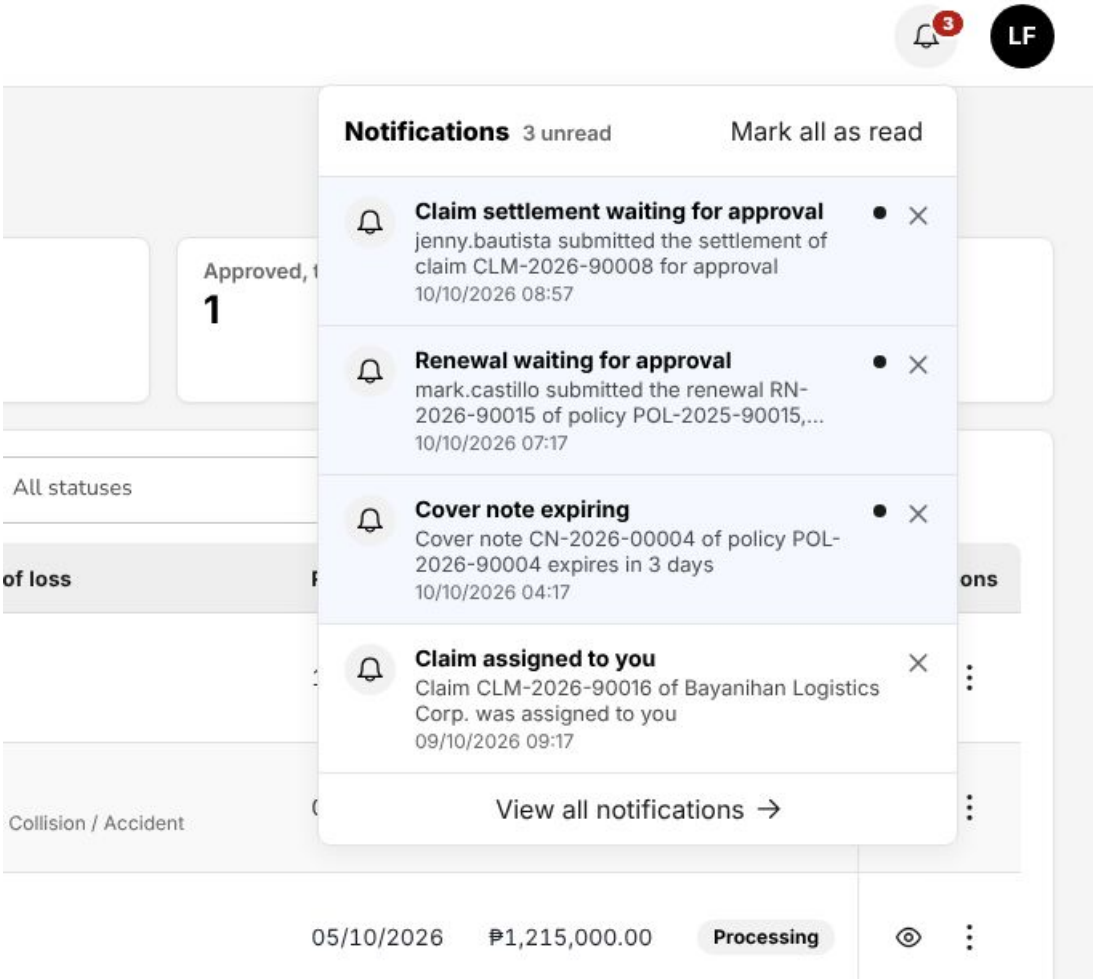

Figure 2.5: The Notifications panel of the bell with Mark all as read and View all notifications

2.5 My Profile

Select your initials, then **Profile**. **My Profile** (Home • My Account • My Profile) has two parts.

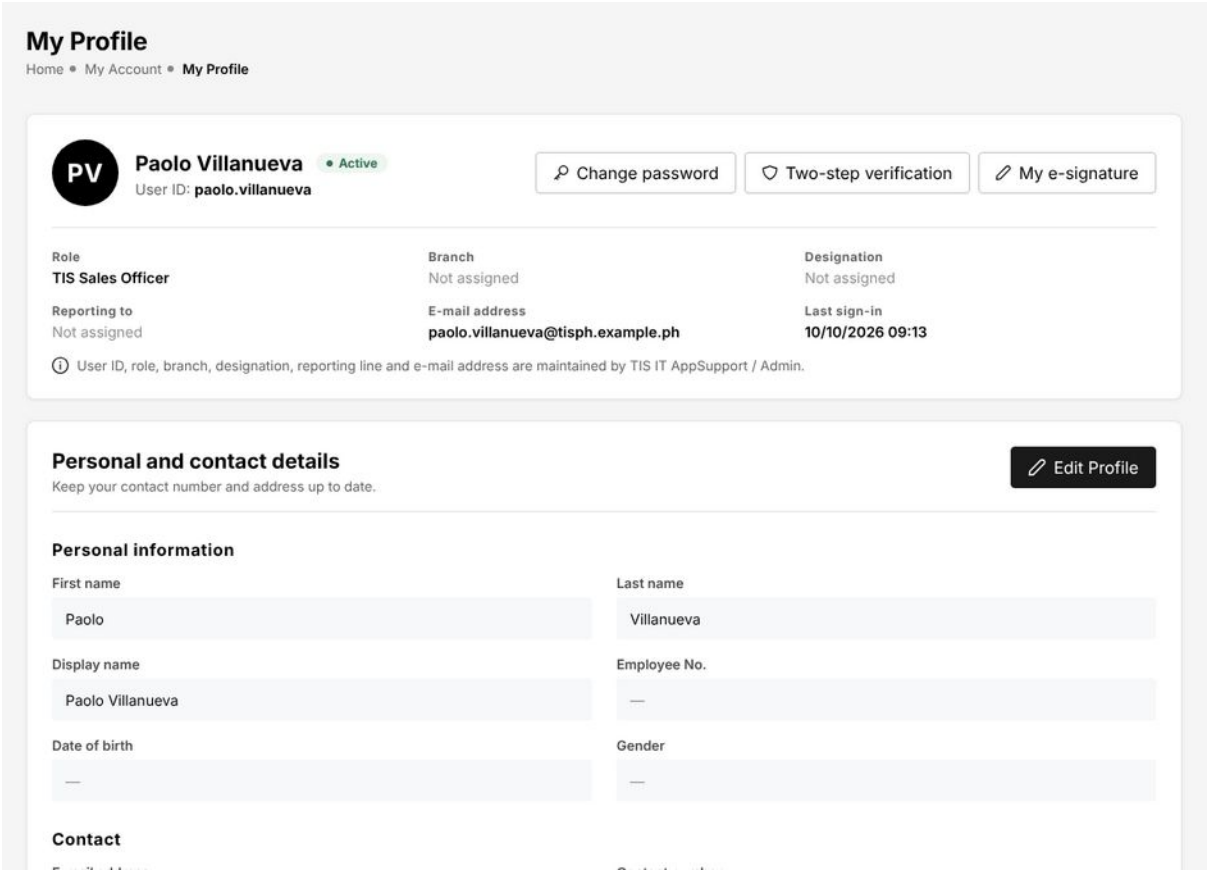

Figure 2.6: My Profile of a TIS Sales Officer: the account summary and Personal and contact details

The account summary shows your name, status (**Active**), **User ID**, **Role**, **Branch**, **Designation**, **Reporting to**, **E-mail address** and **Last sign-in**. IT AppSupport maintains these; you cannot change them here. The buttons **Change password**, **Two-step verification** and **My e-signature** are at the top right.

Personal and contact details shows **Personal information** (**First name**, **Last name**, **Display name**, **Employee No.**, **Date of birth**, **Gender**), **Contact** (**E-mail address**, **Contact number**) and **Address** (**House No. / Unit No. / Street**, **Barangay / Subdivision**, **City / Municipality**, **Province**, **Region**, **ZIP code**, **Country**).

To change them:

1. Select **Edit Profile**. The fields you may change open; fields marked * are required.
2. Correct the fields. Choose the address from the top down: **Country**, then **Province**, then **City / Municipality**, then **Barangay / Subdivision**. Choosing a barangay fills an empty **ZIP code**.
3. Select **Save changes**. The system shows **Your profile has been updated.** The new display name appears at once at the top right. **Cancel** closes the form without saving.

Message	Meaning
Enter your first name. / Enter the name to display.	**First name** or **Display name** is empty.
Enter a Philippine number, for example 0917 123 4567 or (02) 8123 4567.	The contact number is not a Philippine mobile number (0917 123 4567 or +63 917 123 4567) or a landline with its area code.
Enter a valid date of birth in the past.	The date of birth is in the future or not a date.

Message	Meaning
A Philippine ZIP code has 4 digits.	The ZIP code does not have 4 digits.

Your **Display name** is the name shown at the top right, in My Work and on the audit trail. The activity log of some records (for example the timeline of a renewal) shows your user ID instead. To change your e-mail address, ask IT AppSupport.

Change password (users who sign in with a password): type **Current password**, then **New password** and **Confirm new password**, and select **Change password**. The system shows **Password changed. Your other sessions have been signed out.**

My e-signature records the signature printed on the documents you issue or approve, where Document Signatures (21.23) maps it:

1. Select **My e-signature**.
2. **Draw** the signature on screen, or **Upload image** (PNG or JPEG, up to 512 KB).
3. Choose **Effective from**, tick the confirmation that this is your own signature, and select **Save signature**.

Versions lists every signature you saved. **Revoke** stops a version from being printed, with the reason; documents printed before keep the signature they were printed with.

2.6 Working with lists

Most screens open on a list. The lists work the same way everywhere.

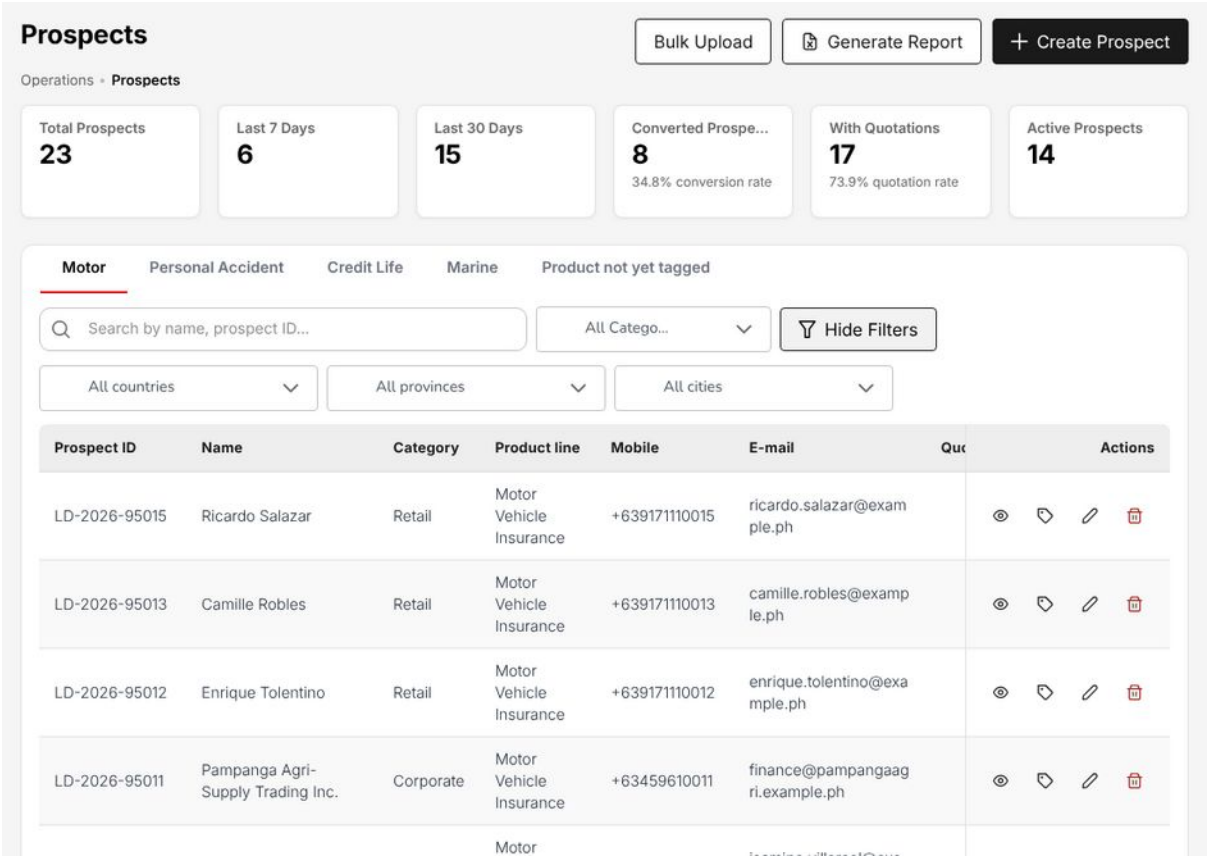

Figure 2.7: Prospects with the filters open: tabs by line of business, search box, category and address filters

- **Figures**: many lists show figure cards at the top (for example **Total Prospects** and **Last 7 Days** on Prospects). Some cards filter the list when selected.
- **Tabs**: some lists are split by tab, for example by line of business on Prospects (**Motor**, **Personal Accident**, **Credit Life**, **Marine**, **Product not yet tagged**).
- **Search**: type in the search box above the list; the placeholder says what is searched (for example **Search by name, prospect ID...**).
- **Filters**: choose values in the filter lists next to the search box (for example **All Status**). Where the screen has **Show Filters**, select it for more filters and **Hide Filters** to close them. The list follows at once.
- **Sorting**: select a column heading to sort by it; select it again to reverse the order.
- **Paging**: the list shows 20 rows per page; change the number at the bottom right. The arrows go to the first, previous, next and last page, and the text next to them shows the rows on screen and the total (for example 1 - 16 of 16). Search and filters apply to the whole list, not only to the page on screen.
- **Row actions**: at the end of the row. **View** (the eye) opens the record and **Edit** (the pencil) changes it; on lists with more actions, the three dots open the row menu, with **View** first. An action your role may not use is not shown; an action that cannot be taken now is greyed out in the menu with the reason.
- **Export**: lists that can be exported have **Generate Report**, **Export** or **Excel** and **CSV**. The file downloads to your computer and contains the rows of the search and filters.

Statuses show as coloured tags: green for completed, active or paid; amber for pending or waiting; red for rejected, overdue or lost.

2.7 Working with forms

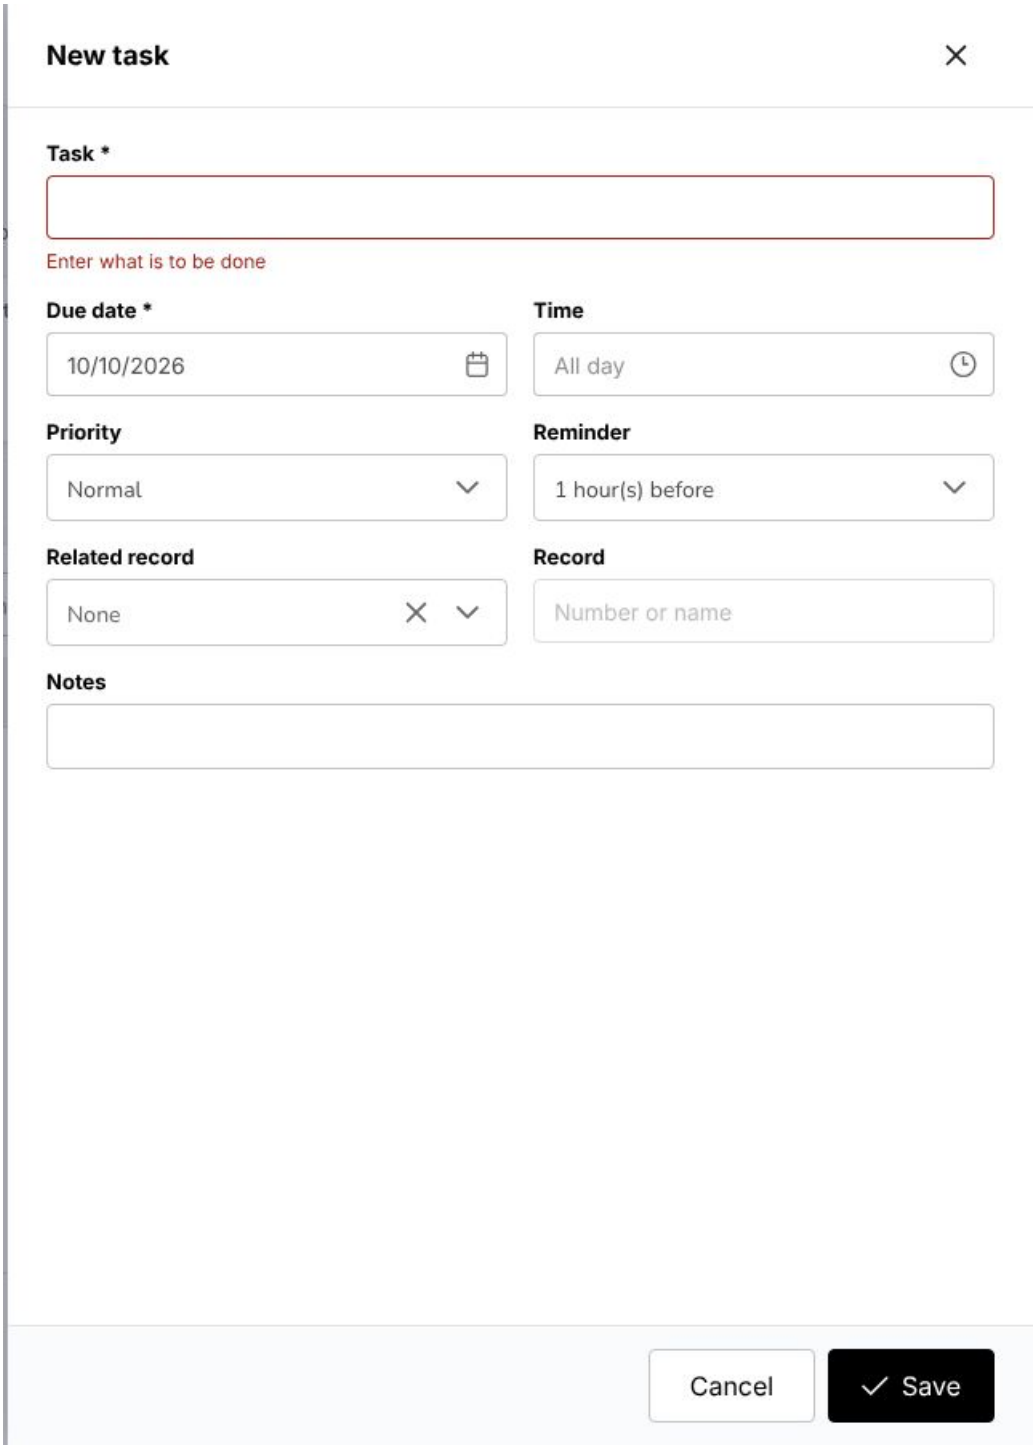

Figure 2.8: New task with Task left empty: the field outlined in red with Enter what is to be done

- Required fields are marked with an asterisk (*). The form is not saved until every required field is filled in.

- When a value breaks a rule, the field is outlined in red and the message under it says what to correct, for example **Enter what is to be done**. Messages about the whole record appear at the top right. Correct the field and save again.
- Short forms open as a panel on the right of the screen; longer forms (a quotation, a placement slip, a receipt) open as a page of their own.
- Lists in a form offer only active records of the masters. Where one list depends on another, choose the first one first: province, then city; vehicle brand, then model.
- Dates are entered and shown as DD/MM/YYYY; amounts are in pesos with two decimals, for example PHP 1,250,000.00.
- **Save**, or the action named on the button (for example **Create Placement Slip**), stores the record. **Cancel** or the X closes the form without saving. Nothing is stored until you save.
- After a save the system shows a confirmation at the top right and, for most records, the number it issued.
- An action that changes or removes a record asks for confirmation first (see Confirmations (2.7.1)).

2.7.1 Confirmations

A confirmation says in one sentence what is about to happen, lists the facts of the record it applies to (amounts in pesos on the right, dates as DD/MM/YYYY) and says what follows. The button names the action, for example **Submit 3 remittances**, **Send for approval** or **Escalate**; **Cancel** or the X closes the confirmation and changes nothing.

- A rejection, return, reversal, cancellation or escalation asks for the **Reason**, chosen from the list of reasons that TIS IT AppSupport / Admin keeps on Reason Codes (21.6). The reason **Other** also needs a **Note**.
- The button shows that the action is running. The confirmation closes when the action is done; if the system refuses it, the confirmation stays open with the message, and nothing is changed.

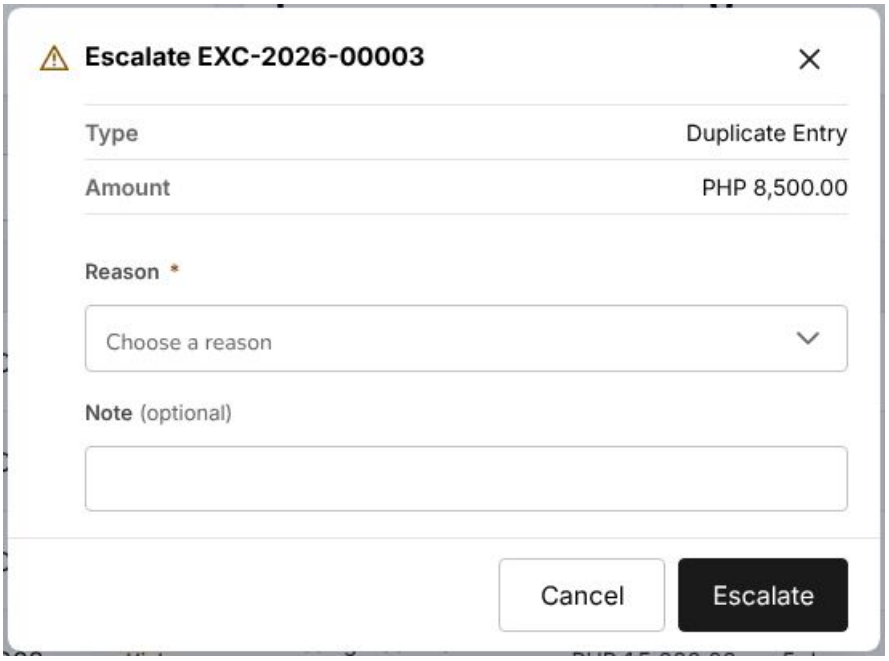

Figure 2.9: Escalate a remittance exception: the facts of the exception and the reason chosen from the list

2.7.2 Record details

View in a list opens the details of the record, in a window or on a page of its own. The details show the number, the status and the main facts at the top, then the facts in groups (label above, value below), and the record's activity. **Close** closes the window; **Edit** is shown to the roles that may change the record. Personal data is masked as in Personal data masking (2.11).

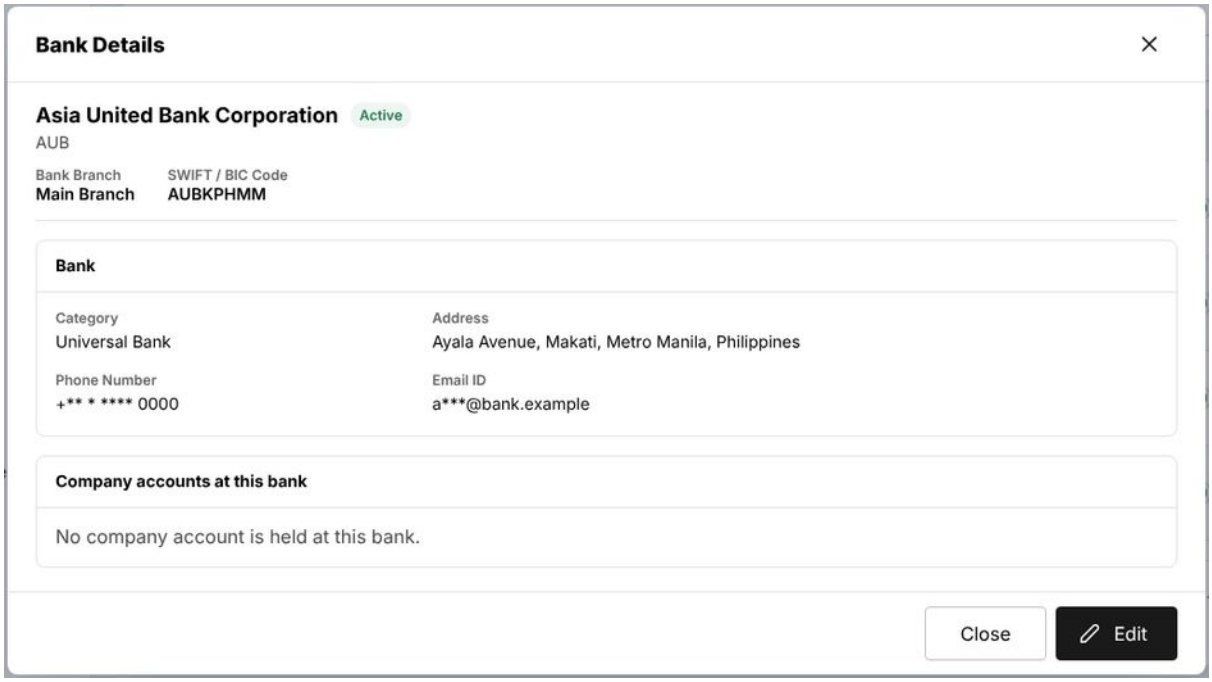

Figure 2.10: Bank details opened from the bank list: the facts in groups, Close and Edit

2.7.3 Printing

Print prints the document of the record (receipt, voucher, debit note, schedule), on the letterhead of Toyota Insurance Services Philippines, and never the screen: the browser's print window opens with the document only. Where the browser cannot print from the page, the document opens in a new tab to print from there. While a print is being prepared its button shows that it is working. Documents such as the remittance schedule and advice are downloaded as PDF or XLSX files instead. A print is recorded in the activity of the record; repeated prints show as one entry.

2.8 Uploads and templates

Some screens load many records at once from a spreadsheet, for example **Bulk Upload** on Prospects or **Import open items** on Collections. The upload works the same way on every screen.

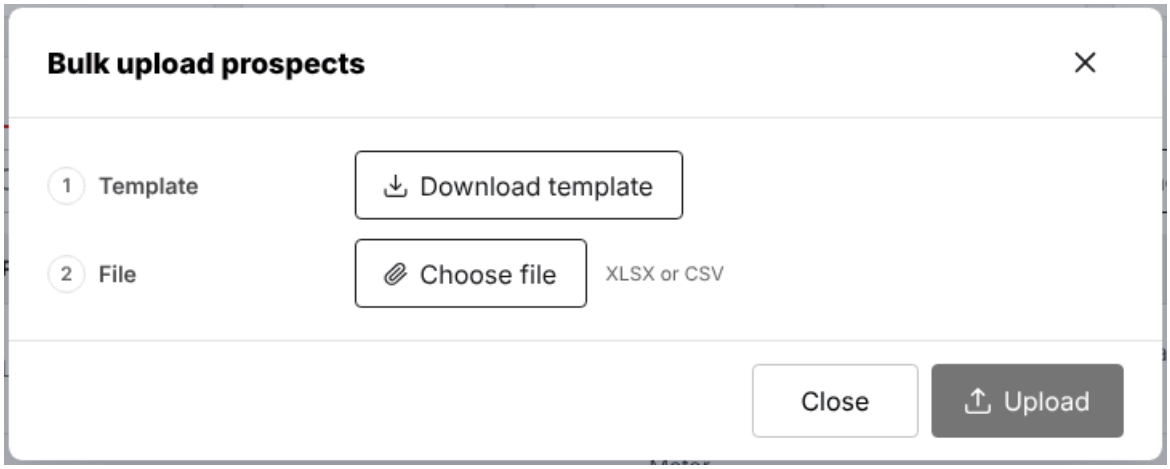

Figure 2.11: Bulk upload prospects: Download template and Choose file

1. Select the upload button of the screen (**Bulk Upload**, **Import**, **Upload**). The upload dialog opens.
2. Select **Download template** and fill in the template. Keep its columns and headings as they are: the template has the exact columns the system reads.
3. Select **Choose file** and choose the filled template (XLSX or CSV). The dialog shows the file name and size; the X removes it.
4. Where the dialog offers **Validate**, select it first. The **Validation result** shows the number of rows and the errors, with the row, the column and the message. Nothing is saved at this step.
5. Select **Upload**. The **Upload result** shows the rows loaded and the rows refused, each with its row, column and message.
6. Correct the refused rows in the file and upload them again.

A file may not be larger than 10 MB. Uploads of receipts, payment vouchers, journal vouchers and authority limits accept up to 1,000 rows per file.

Documents attached to a record (for example the documents of a claim) are uploaded on the record itself, in the formats and size shown next to the upload button.

2.9 Approvals and maker-checker

The user who enters a record never approves it: a different user, holding the approval of that record, approves it. The system refuses the approval of your own record (for example **Maker-checker: the approver must be different from the user who created the quotation**) and notifies the users who may approve. Your role chapter lists what your role approves and who approves your work.

Record	Approved by
Quotation	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Check of a placement against the slip	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Endorsement with return premium, and policy cancellation	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Quotation referred by an acceptance rule of the product (underwriting referral)	TIS Operations Unit Head

Record	Approved by
Renewal terms	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Claim decisions and settlement	TIS Operations Unit Head or TIS General Manager
Supplier invoice	TIS Sales Unit Head, TIS Operations Unit Head, TIS Finance & General Accounting or TIS General Manager
Journal voucher, payment voucher and cheque	Another TIS Finance & General Accounting user
Remittance to an insurer, and its settlement or adjustment	TIS Finance & General Accounting or TIS General Manager, within the approval limit, never the user who prepared or submitted it
Bank reconciliation	TIS Finance & General Accounting
Insurer statement reconciliation	CCD-Recon (Reconciliation and Reversals)
Credit control decisions	TIS Finance & General Accounting
Incentive calculation batch	TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Month-end and year-end close	TIS Finance & General Accounting
Posting rules and account determination	TIS Finance & General Accounting
Role access changes and authority limits	TIS IT AppSupport / Admin

Approval limits. The Authority Matrix (21.10) sets the largest amount each role may approve per transaction. As delivered:

- a remittance, and its settlement or adjustment, is approved by TIS Finance & General Accounting up to PHP 1,000,000.00 and by the TIS General Manager without limit. A user without a remittance limit cannot approve or reject a remittance;
- the other transactions hold no limit, which the role chapters show as "Not set": a claim settlement, for example, is approved by the approver whatever its amount.

To approve:

1. Choose **My Work** and the category **Approvals**. Each row shows the record, the client, the amount and **Approve or reject**.
2. Select the arrow at the end of the row. The record opens with its approval actions.
3. Check the record, then choose **Approve**, or the decline action of the screen (**Reject** or **Return**) with the reason. The decision is recorded in the activity of the record.

When you may not decide a record (you entered or submitted it, or its amount is above your limit), the decision buttons are greyed out or not shown, and a line next to them says why and, where the system knows them, who can decide. The system applies the same rule when the decision is sent.

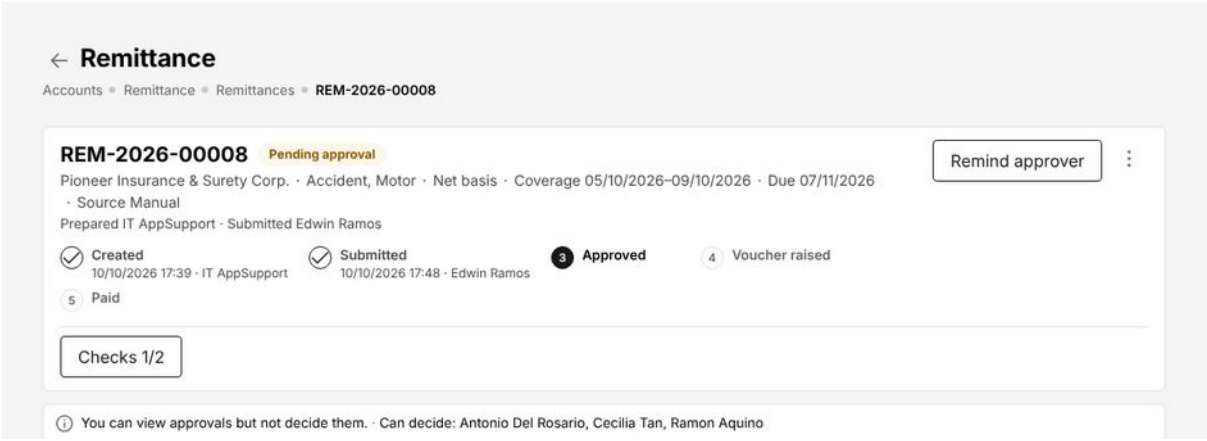

Figure 2.12: A remittance submitted by the user: the line under the steps says that another user decides, and who can

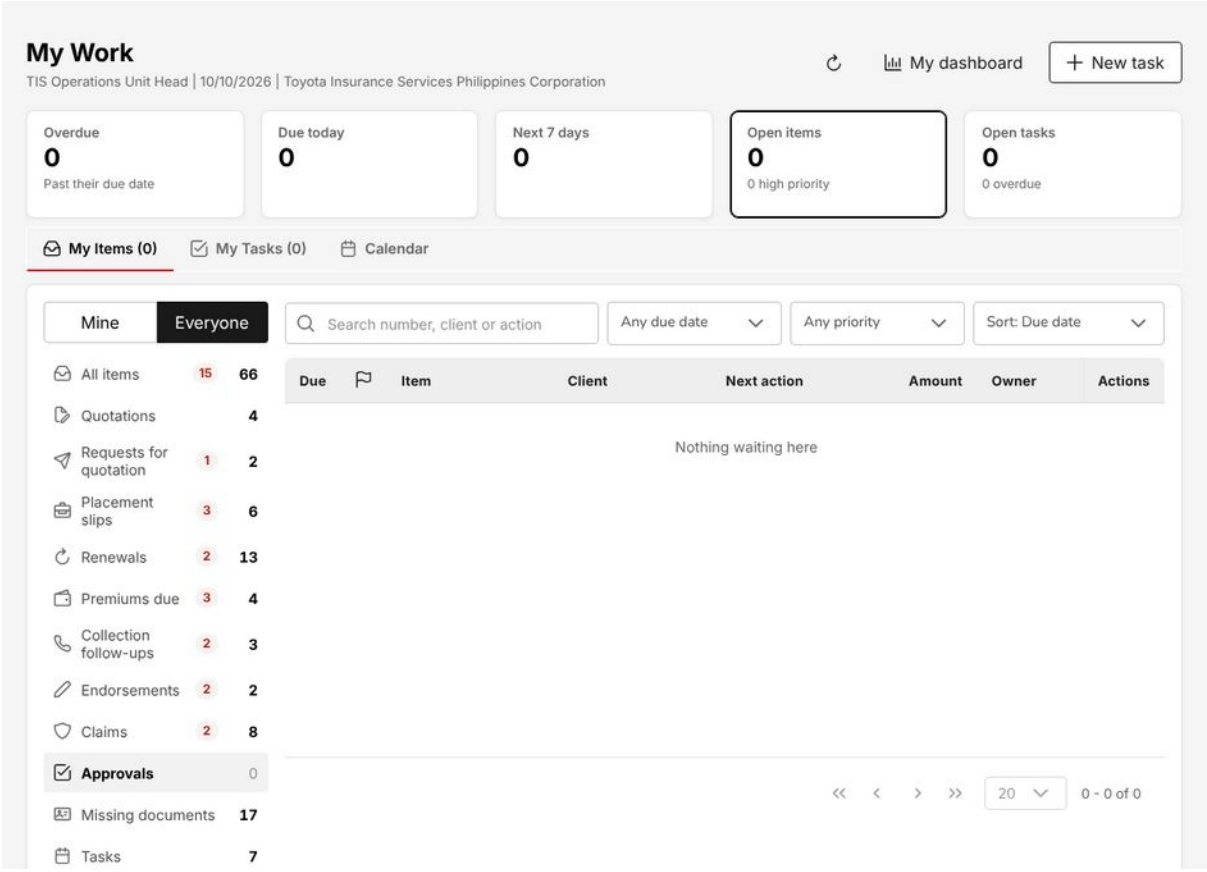

Figure 2.13: Approvals in My Work of the TIS Operations Unit Head: a renewal premium and a claim settlement

On top of maker-checker:

- once a limit is set on the Authority Matrix (21.10), an approval above the approver's limit is refused;
- the Segregation of Duties (21.12) rules warn or block when one person is given roles that should stay apart;
- a Delegation (21.11) lends your approval limit to the person who covers for you during an absence, for the transactions and dates chosen; it applies once TIS IT AppSupport / Admin approves it.

2.10 Where the audit trail is

The system records every creation, change, approval and sign-in with the user, the time and the values before and after.

Where	What you see	Who
Master > System > Audit Trail	Every recorded action of every user	TIS Finance & General Accounting, TIS IT AppSupport / Admin, TIS General Manager or TIS Audit (read only)
The **Audit Trail**, **History** or **Activity** tab of a record (quotation, policy, endorsement, claim, prospect, receipt, collection, voucher, period)	The events of that record	Users who may open the record
Sign-in history of a user (Master > Users and Access > User)	Every sign-in attempt with its result and method	TIS IT AppSupport / Admin

To search the audit trail:

1. Choose Master > System > Audit Trail.
2. Narrow the list with **Date range**, **All users**, **All record types**, **Record number** and **All actions**.
3. Each row shows **Date & Time**, **User** (name and role), **Record**, **Event**, **Changes** (the fields changed) and **Source** (the screen or the job that made the change). Select a row to see each field with its value before and after.
4. Select **Export** to download the rows of the search.

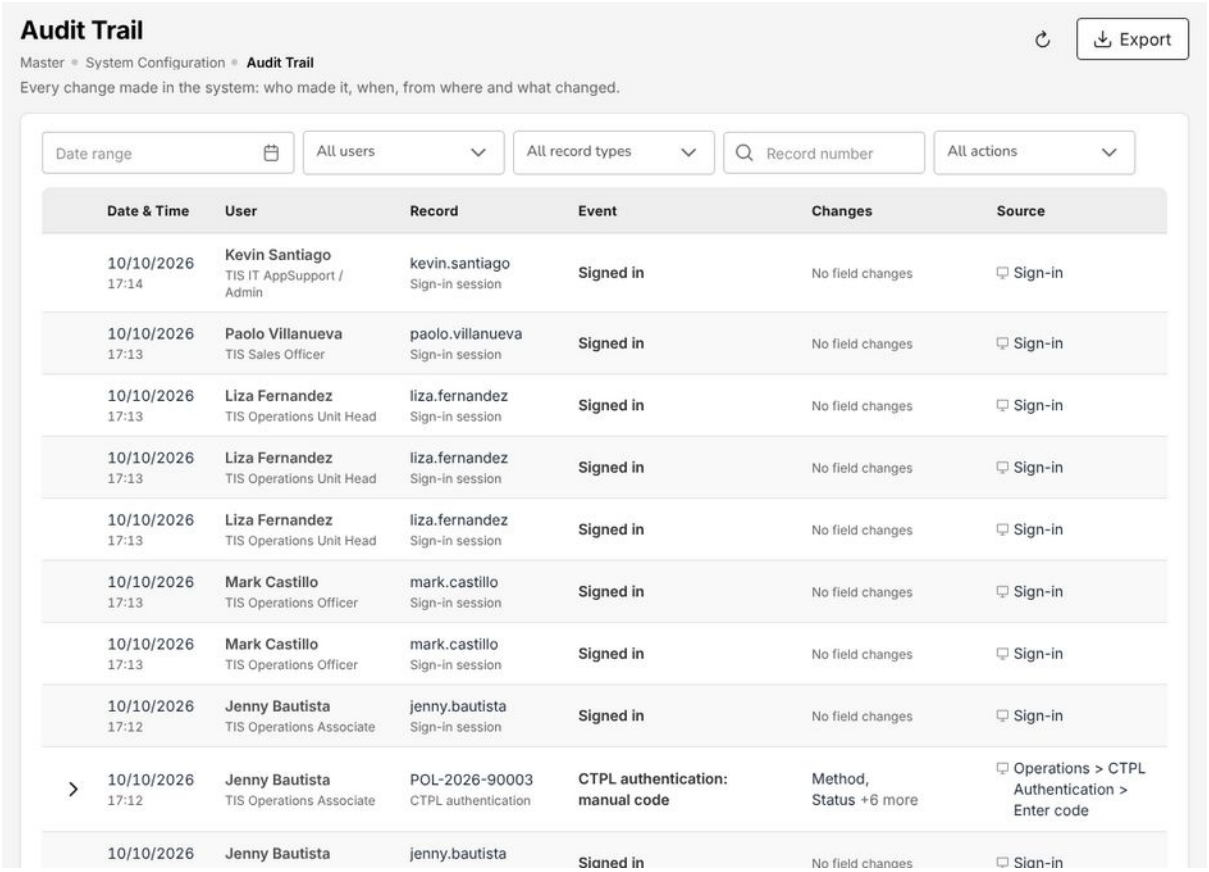

Figure 2.14: Master > System > Audit Trail with the sign-ins of the day

On a record, the activity log (the **Activity**, **History** or **Audit Trail** tab) lists the events newest first, grouped by day. Each event shows what was done, the date and time, the user's name and role, the status before and after, the remarks or reason given and, under **What changed**, each field changed with its value **Before** and **After**. Masked personal data stays masked. Where the record offers them, search the events, filter by **User** and **Kind of event**, or export them (**Export**, **Download log (XLSX)**).

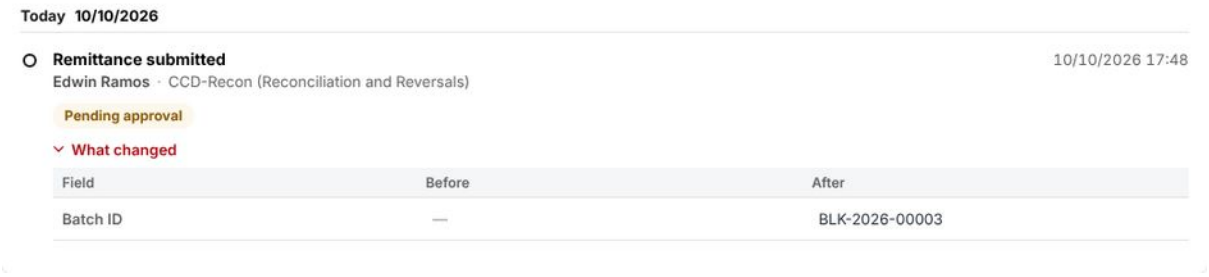

Figure 2.15: Activity of a remittance: submitted by the CCD-Recon user, with What changed open

2.11 Personal data masking

Personal identifiers of clients and prospects are protected under Republic Act No. 10173. On every screen, export and report, the system shows them in full only to a user of one of the roles that need them: the Sales roles, the Operations roles, TIS Finance & General Accounting or TIS General Manager.

For the other roles the identifiers are masked:

Identifier	Shown as
E-mail address	First letter and the domain, for example j***@example.ph
Mobile and telephone number	The last 4 digits, for example +****0015
TIN, government ID number, bank account number	The last 4 characters
Date of birth	The year only

Your own details on My Profile are always shown in full. When you save a form that shows a masked value, the masked value is ignored and the stored value is kept. **Show full identifiers** appears in the account menu of the roles that see full identifiers; with the set-up of Toyota Insurance Services Philippines these roles see them at all times.

2.12 The Help panel

Press F1, or **?** outside a text field, or choose **Help** in the account menu. The panel shows:

- **Help for this screen**: the section of this manual for the screen you are on (**Open this section**);
- **Download user manual (PDF)**, **Download user manual (Word)** and **Browse the whole user manual**;
- **Your role**: your role and **Open my role chapter**;
- **Contact support**: the support e-mail address, telephone number, hours and portal that TIS IT AppSupport / Admin sets up on Master > System > Configuration. Until they are set up, the panel says **Support contacts not set up. Contact TIS IT AppSupport / Admin.**;
- **Keyboard shortcuts**: F1 or ? opens the panel, / goes to the menu search, the arrows and Enter open a menu search result, Esc closes the panel or clears the search;
- **About Toyota Insurance Services**: the version of the system, the environment, the build and release date, the version of this manual, and who approved the requirements and the release of this version. TIS IT AppSupport / Admin keeps these on Master > System > Configuration (Release).

2.13 When the system refuses an action

Message or situation	Reason	What to do
Not authorised: Your role does not give access to this screen	The link (for example from a notification or My Work) leads to a screen that is not in the menus of your role	Ask a user of the role that works on the record; see the chapter of your role for your menus
A decision button (for example **Confirm check**, **Approve**) is greyed out, or the system says the approver must be different	You entered the record: the decision is made by another user (maker-checker)	Ask a user of the approving role named in your role chapter
An error on a claim decision (**Proceed to adjuster report**, **Proceed to settlement**, **Reject claim**)	Claim decisions are made by TIS Operations Unit Head or TIS General Manager	Hand the claim to a user of that role
An approval is refused for its amount	The amount is above your limit on the Authority Matrix	Ask an approver with a higher limit

Message or situation	Reason	What to do
A cancellation or a return premium cannot be completed	Money going back to the client is completed by another user	A user who approves policy checks completes it (see Approvals and maker-checker (2.9))
Endorsement or **Claim** is not offered on a policy	The policy's payment is **Pending** or **Reviewing**, or the policy is no longer in force	Check the policy's payment on Payments (18.19)

3. The TISPH process end to end

The work of Toyota Insurance Services Philippines follows one chain: a lead becomes a quotation, the quotation is placed with a panel insurer, the insurer's policy is booked and billed, Cash Control collects the premium, the premium is remitted to the insurer, the commission is earned and paid, claims are followed up with the insurer, the policy is renewed, and Finance closes the month and files the BIR returns. Each section below names the roles that do the step, as delivered, and the screens where it is done.

The chapter follows two policies through the chain:

- **A motor policy financed by Toyota Financial Services (TFS).** TFS refers the buyer of a financed Toyota. The account executive quotes the car, the client accepts, the placement slip goes to the panel insurer, the insurer's e-policy is checked and booked with TFS as mortgagee, and the client pays TISPH.
- **A dealer programme policy.** A Toyota dealer sells brand-new cars under a programme agreed with TISPH (and, for financed cars, with TFS). The dealer's sales file creates the prospects and quotations, or issues the policies at once, with the free or subsidised first-year premium billed to the dealer or the bank.

From the booking onwards both policies follow the same steps.

3.1 The chain at a glance

Step	Who does it	Screen	Result
Prospect	the Sales roles or TIS General Manager	Prospects (18.1)	Prospect **New**, assigned to an account executive
Dealer sales	TIS IT AppSupport / Admin	Dealer Programmes (18.7)	Prospects and quotations, or booked policies
Quotation	the Sales roles, the Operations roles or TIS General Manager	Quotations (18.4), Quick Quote (18.2)	Quotation **Pending Customer**, then **Customer Accepted**
Request for quotation	the Sales roles, the Operations roles or TIS General Manager	Requests for Quotation (18.3)	Insurers' offers compared
Placement	the Sales roles, the Operations roles or TIS General Manager	Placement Slips (18.5)	**Sent to insurer**, **Acknowledged**, **e-Policy received**
Check of the e-policy	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager	Placement Slips (18.5)	**Checked against slip**
Booking	the Sales roles, the Operations roles or TIS General Manager	Placement Slips (18.5)	Policy, bill, journal and commission; **Insurer issued (Booked)**
Collection	CCD-BP / QRPh (Receipting)	Receipts (19.1), Post-Dated Cheques (19.5)	Official receipt; policy payment **Completed**
Remittance	CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting	Remittance to insurers (19.10)	Remittance approved, settled and paid to the insurer
Commission	TIS Finance & General Accounting	Commission to agents and referrers (20.4)	Commission lines **Approved**, then **Paid**
Endorsement	the Sales roles, the Operations roles or TIS General Manager	Policies (18.10)	Policy changed; additional premium billed
Claim	the Operations roles or TIS General Manager	The claims list (18.13)	Claim **Pending** to **Closed**
Renewal	the Sales roles, the Operations roles or TIS General Manager	Renewal Queue (18.16)	Renewal quotation, then a new placement

Step	Who does it	Screen	Result
Month-end and tax	TIS Finance & General Accounting	Period end (19.21), Tax: BIR forms and returns (19.18)	Period **Closed**; returns filed

Work that waits for you appears in My Work (2.3). Each approval in the chain is made by another user than the one who entered the record (see Approvals and maker-checker (2.9)).

3.2 Leads from TFS, dealers and walk-in clients

Prospects are entered by the Sales roles or TIS General Manager, on Prospects (18.1). Leads are assigned to the sales team on Lead Assignment (18.6) by TIS Sales Officer, TIS Sales Unit Head or TIS General Manager.

TISPH receives its leads from four sources:

- **Toyota Financial Services.** TFS refers the buyers of the Toyota cars it finances. The prospect carries the TFS office as its channel (TFS Head Office or a TFS branch) and the lead source of the referral (for example **Bundling**, **Promo**, **Used-Cars - SCR** or **Used-Cars - UCFP**).
- **Toyota dealers.** A dealer sale under a dealer programme creates the prospect itself, with the dealer branch as its channel (see Dealer programme policies (3.3)).
- **Walk-in clients and referrals.** A client who walks in at a Toyota showroom or is referred by an agent, with the lead source **Walk-In**, **Referral** or **Agent**.
- **Renewals.** An expiring policy comes back through the Renewals (3.11) step, not as a new prospect.

The lead sources are those of Master > Insurance > Lead Sources.

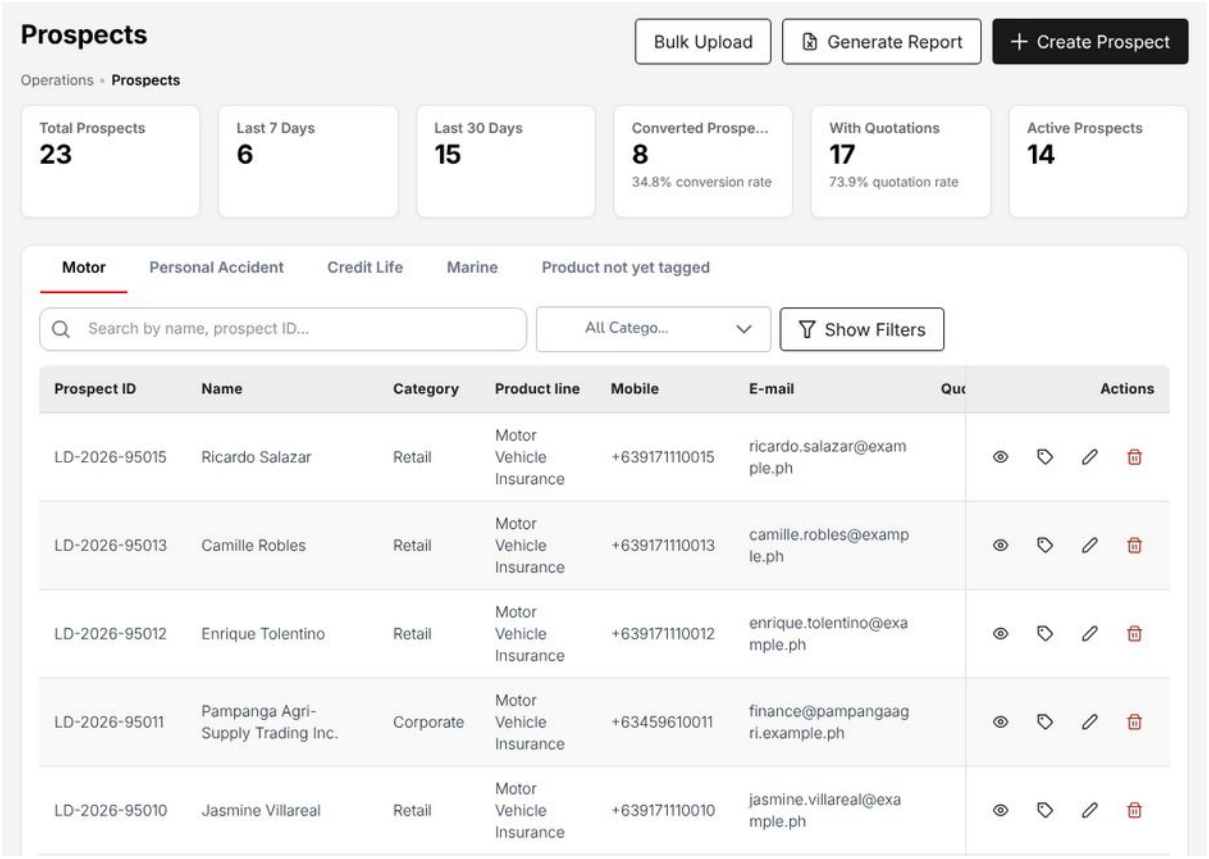

Figure 3.1: Operations > Sales & Marketing > Prospects, with the prospects by status and product line

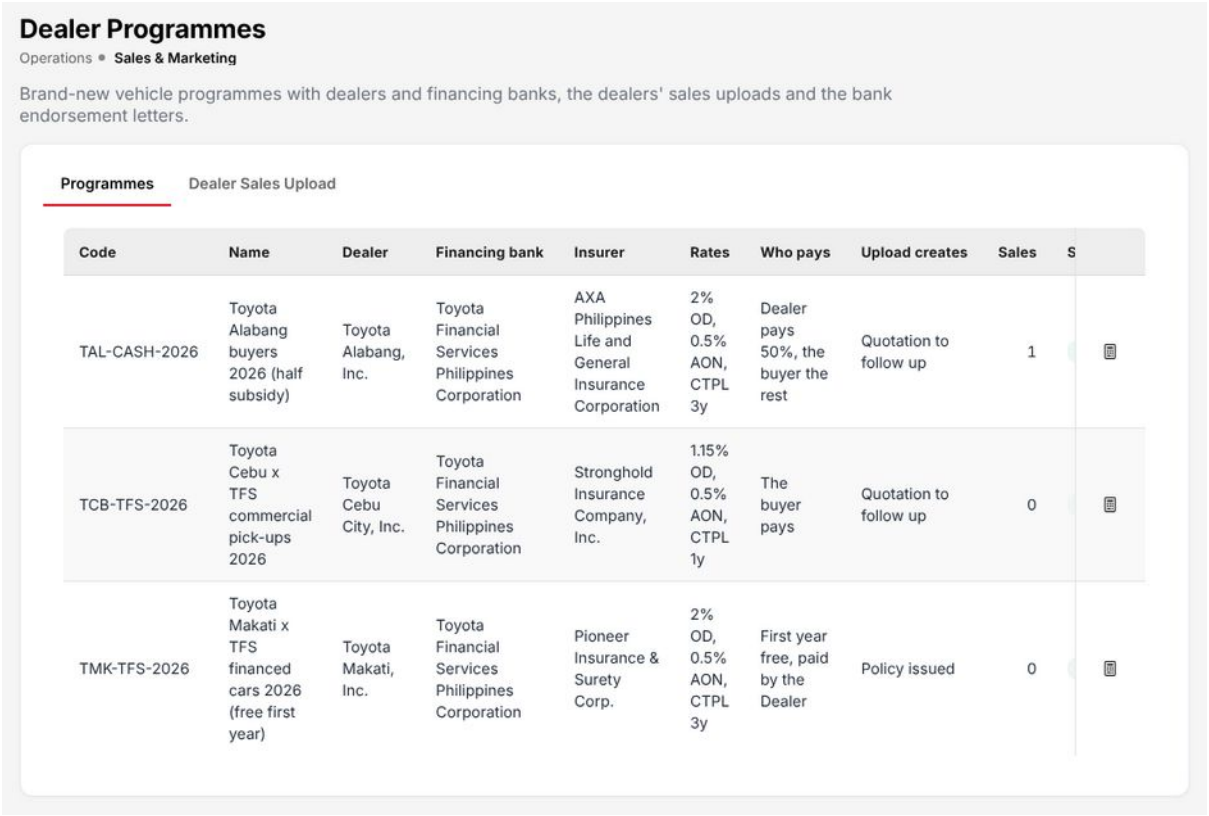

To record a TFS referral:

1. Choose Operations > Sales & Marketing > Prospects.
2. Select **Create Prospect**.
3. Enter the buyer's name, mobile number and e-mail, the category (**Retail** or **Corporate**) and the product line (Motor for a financed car).
4. Select the TFS office as the channel and the lead source of the referral.
5. Save the prospect. It is created with the status **New**.

The assignment rules of Lead Assignment (18.6) give the prospect to an account executive of the sales team; a prospect that no rule can assign waits in the **Reassignment Queue** for TIS Sales Officer, TIS Sales Unit Head or TIS General Manager. The account executive follows the prospect up from My Work (2.3) and logs the calls and visits on Sales activities (18.8). Logging the first activity marks the prospect **Contacted**. The prospect becomes **Quote Generated** with its first quotation, **Converted** when the policy is booked, or **Lost**.

3.3 Dealer programme policies

A dealer programme holds the terms agreed with a Toyota dealer and, for financed cars, the financing bank: the insurer, the own damage and acts of nature rates, the excess liability limits, the CTPL term, whether the first year is free or subsidised and who pays it, and what the dealer's sales upload creates.

Dealer Programmes

Operations • **Sales & Marketing**

Brand-new vehicle programmes with dealers and financing banks, the dealers' sales uploads and the bank endorsement letters.

Programmes | Dealer Sales Upload

Code	Name	Dealer	Financing bank	Insurer	Rates	Who pays	Upload creates	Sales	S
TAL-CASH-2026	Toyota Alabang buyers 2026 (half subsidy)	Toyota Alabang, Inc.	Toyota Financial Services Philippines Corporation	AXA Philippines Life and General Insurance Corporation	2% OD, 0.5% AON, CTPL 3y	Dealer pays 50%, the buyer the rest	Quotation to follow up	1	
TCB-TFS-2026	Toyota Cebu x TFS commercial pick-ups 2026	Toyota Cebu City, Inc.	Toyota Financial Services Philippines Corporation	Stronghold Insurance Company, Inc.	1.15% OD, 0.5% AON, CTPL 1y	The buyer pays	Quotation to follow up	0	
TMK-TFS-2026	Toyota Makati x TFS financed cars 2026 (free first year)	Toyota Makati, Inc.	Toyota Financial Services Philippines Corporation	Pioneer Insurance & Surety Corp.	2% OD, 0.5% AON, CTPL 3y	First year free, paid by the Dealer	Policy issued	0	

Figure 3.2: Operations > Sales & Marketing > Dealer Programmes, with the programmes of three Toyota dealers

As delivered, the programmes are set up, and the dealers' sales files uploaded, by TIS IT AppSupport / Admin. Every sales and operations role can open the programmes and print the bank endorsement letters.

To upload a dealer's sales:

1. Choose Operations > Sales & Marketing > Dealer Programmes.
2. Open the **Dealer Sales Upload** tab.
3. Select the programme of the dealer. The programme must be **Active**.
4. Upload the dealer's file of vehicle sales (sale date, invoice number, buyer, vehicle, chassis and engine numbers, invoice price and, for a financed car, the loan amount).
5. Check the result: each row is processed on its own. A row with an error (for example a missing chassis number) is kept with its error and creates nothing.

For each sale the system creates the prospect, with the dealer branch as its channel, and the motor quotation priced on the programme's rates, with CTPL at the tariff of the vehicle class. A financed car carries the bank as mortgagee with its mortgagee clause. What follows depends on the programme's **Upload creates** column:

- **Quotation to follow up**: the quotation stays in **Draft** and the account executive follows it up with the buyer like any other quotation, from Quotation and request for quotation (3.4) onwards.
- **Policy issued**: the buyer becomes a client and the policy is booked at once, starting on the sale date. The premium is billed to who pays it: the buyer, the dealer

or the bank. With a free first year the dealer (or the bank) receives the whole bill; with a subsidy, the dealer's share and the buyer's share are billed separately.

From the bill onwards the policy follows Collection by Cash Control (3.7).

3.4 Quotation and request for quotation

Quotations and requests for quotation to the panel insurers are prepared by the Sales roles, the Operations roles or TIS General Manager. A quotation is approved by another user: TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager.

Which steps a product needs is set per product: every TISPH line of business needs a placement slip; a motor policy and the package products (for example Compulsory Credit Life, Personal Accident and Parcel / Courier Insurance) need a quotation; a request for quotation to several insurers is optional.

3.4.1 Motor quotation for a TFS-financed car

1. Choose Operations > Sales & Marketing > Quotations.
2. Select **Create Quote** and choose the motor product.
3. Select the prospect, the Toyota model, variant and year of the vehicle master, the vehicle type and the insurer.
4. Enter the sum insured (the invoice price) and the covers. The premium is computed on the motor tariff: own damage and acts of nature at the rate of the vehicle class, the excess bodily injury and property damage limits, auto passenger personal accident per seat, and CTPL at the tariff amount for 1 or 3 years. DST, VAT and LGT are added to give the gross premium.
5. Save the quotation. It is created as **Draft**.
6. Open the quotation (**View Details**, the eye icon) and select **Send for Customer Approval**. The status becomes **Pending Customer**.

For a package product, Quick Quote (18.2) prices the quotation from the product's rates in one screen.

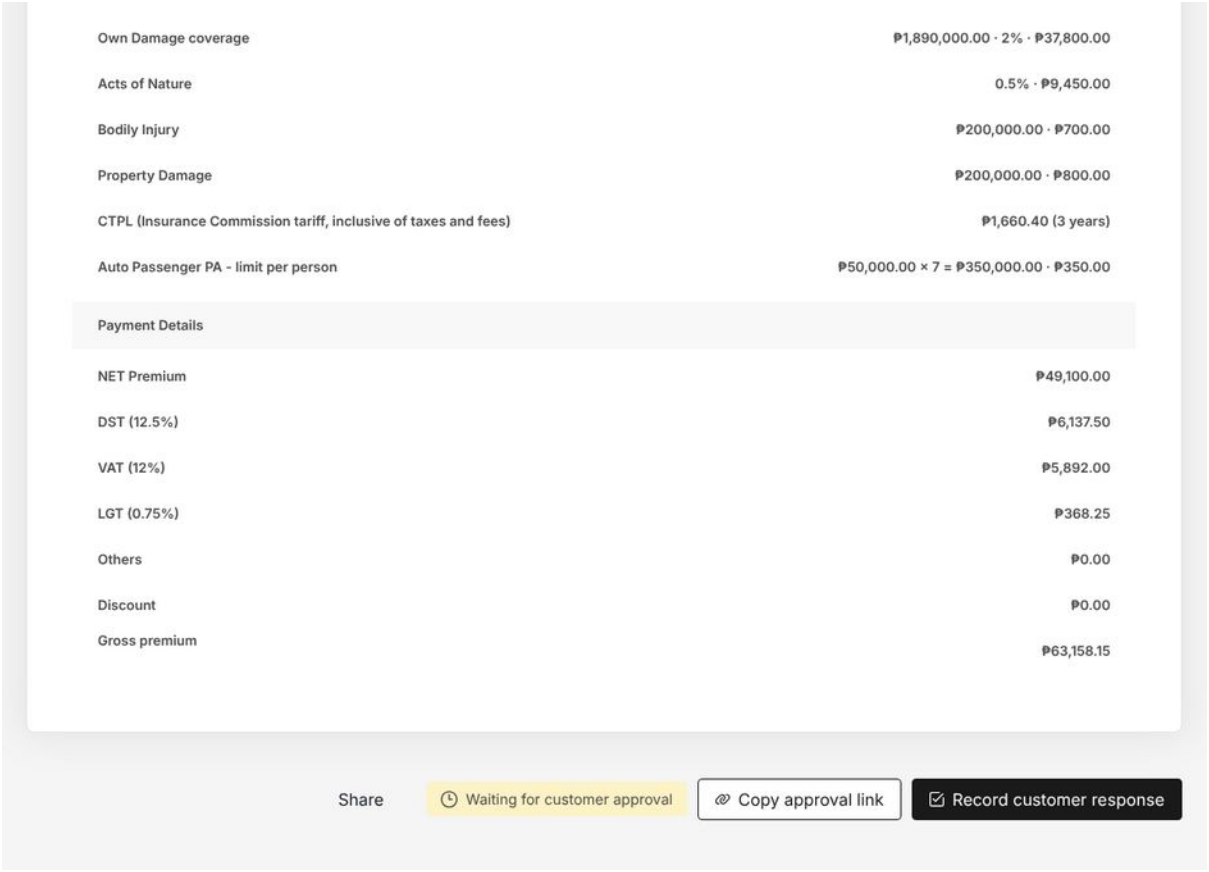

Figure 3.3: Quotation of a financed Fortuner waiting for the client, with Copy approval link and Record customer response

3.4.2 The client's answer

The client accepts the quotation through the approval link, or you record the answer:

1. Open the quotation from Operations > Sales & Marketing > Quotations (**View Details**, the eye icon).
2. Select **Copy approval link** to send the link to the client again, or **Record customer response** when the client answered by phone, e-mail or in person.
3. Record the acceptance. The status becomes **Customer Accepted**.

When the quotation is accepted, the system raises the placement slip at once (status **Placement raised**) and stores the slip PDF. If the slip cannot be raised, the quotation's owner receives the notification "Placement slip not raised" with the reason. A quotation that the client turns down is set to **Rejected** or **Dropped** with a reason.

The status **Approved** is set only by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, and never by the user who created the quotation.

3.4.3 Request for quotation to the panel insurers

For a risk that needs the insurers' own terms (for example a fleet or a group personal accident), ask several insurers first:

1. Choose Operations > Sales & Marketing > Requests for Quotation.

2. Select **New Request for Quotation**, enter the risk and choose the insurers to approach.
3. Select **Save and submit to market**. The request is **Submitted** and each insurer receives it by e-mail.
4. As each insurer answers, select **Record response** (premium, rate, taxes, deductibles, validity and the share it writes) or **Record decline**. With the answers in, the request is **Responses in**.
5. Compare the offers and select **Prepare Quotation Slip** for the offer the client takes, or **Prepare Placement Slip** where the product needs no quotation.

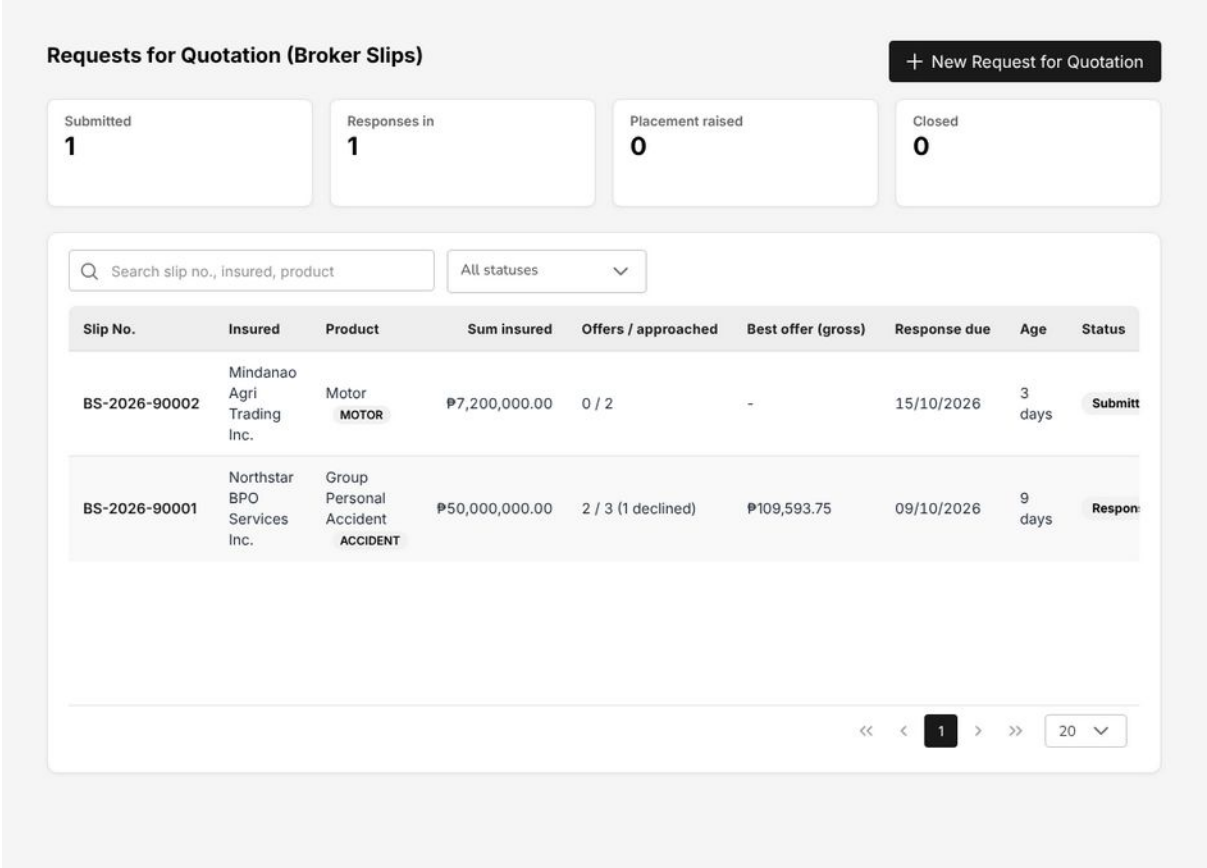

Figure 3.4: Operations > Sales & Marketing > Requests for Quotation, with the offers received per request

3.5 Placement with the insurer

The placement slip goes to the insurer, which returns the e-policy. The check of the e-policy against the slip is decided by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, never by the user who recorded the e-policy. See Placement Slips (18.5).

The placement slip is a firm order to the insurer. TISPH never issues the cover itself: a policy exists only once the insurer's e-policy has been received, checked against the slip and booked.

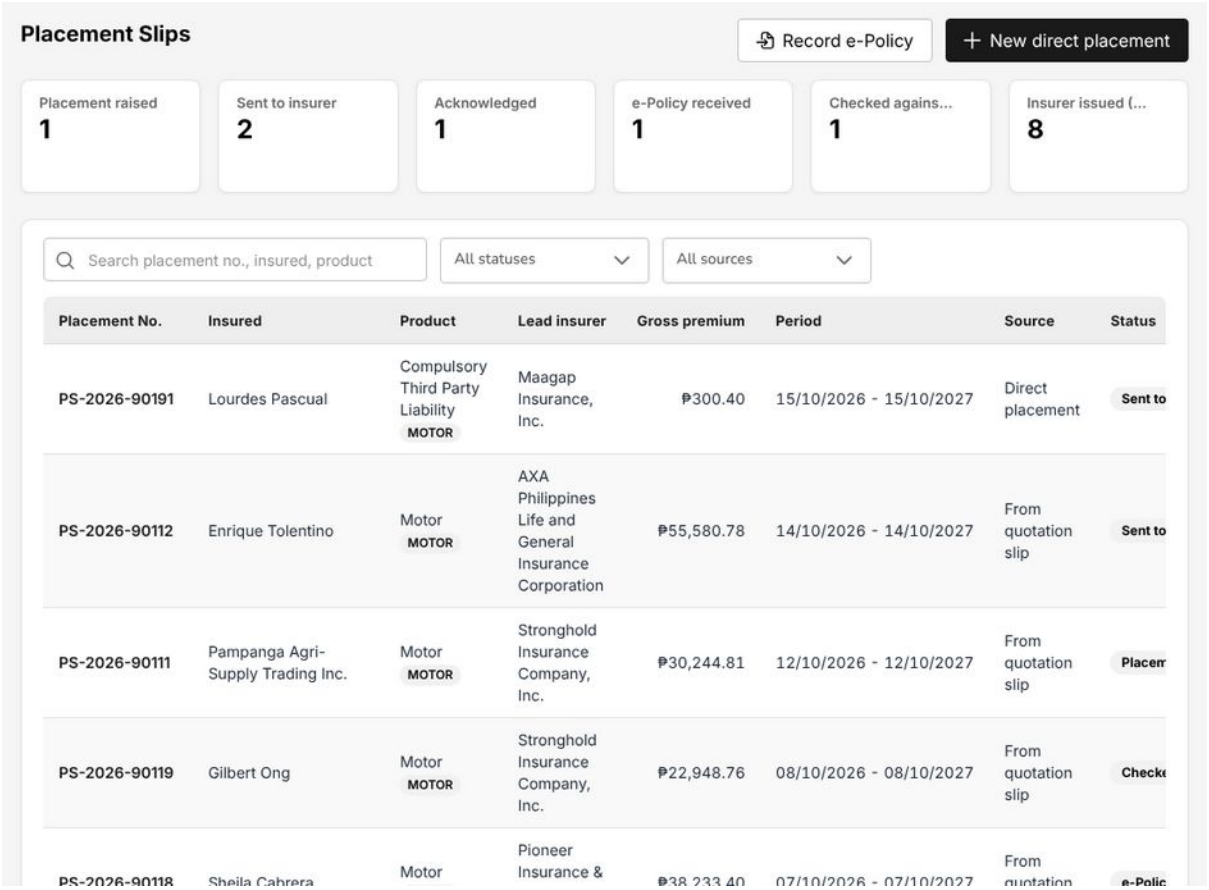

Figure 3.5: Operations > Sales & Marketing > Placement Slips, with the count of placements at each step

Placement is done by the Sales roles, the Operations roles or TIS General Manager:

1. Choose Operations > Sales & Marketing > Placement Slips and open the placement slip (status **Placement raised**).
2. Check the insurer, the participants and the premium. For co-insurance, select **Edit participants**: one lead insurer, and the shares must total 100%.
3. Select **Send to insurer(s)**. Each insurer receives the slip of its share by e-mail (a direct CTPL also with the LTO document). The status becomes **Sent to insurer**.
4. When the insurer confirms the order, select **Record acknowledgement** and enter the insurer's reference. The status becomes **Acknowledged**.
5. When the e-policy arrives, select **Upload e-policy**, attach the e-policy file and enter what it says: the insurer policy number, the participant name, the sum insured, the net and gross premium, the commission, and the issue, issuance, effective and production dates. For a motor policy, correct the chassis, engine and plate numbers to those of the e-policy: the plate number or the MV file number is required, even where the quotation said TBA. The status becomes **e-Policy received**.

The system compares the e-policy with the slip at once. Amounts within PHP 1.00 of the slip match.

If the insurer declines the placement, select **Record decline**; to stop a placement, select **Cancel slip**.

3.5.1 Check the e-policy against the slip

The check is made by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, a user other than the one who uploaded the e-policy:

1. Open the placement slip (status **e-Policy received**).
2. Select **Check against slip**. The dialog lists each item (premiums, sum insured, commission, dates, insured, vehicle identifiers) on the slip and on the e-policy, with the difference and the result **Matches** or **Differs**.
3. Decide:
   - **Confirm check** when every item matches.
   - **Accept differences** when the e-policy differs but is right. A reason is required; accepting differences also needs the right to record policies.
   - **Return to insurer** when the e-policy is wrong. A reason is required. The lead insurer receives the discrepancy by e-mail and the placement waits for the corrected e-policy, which is uploaded again.

After **Confirm check** or **Accept differences** the status is **Checked against slip**.

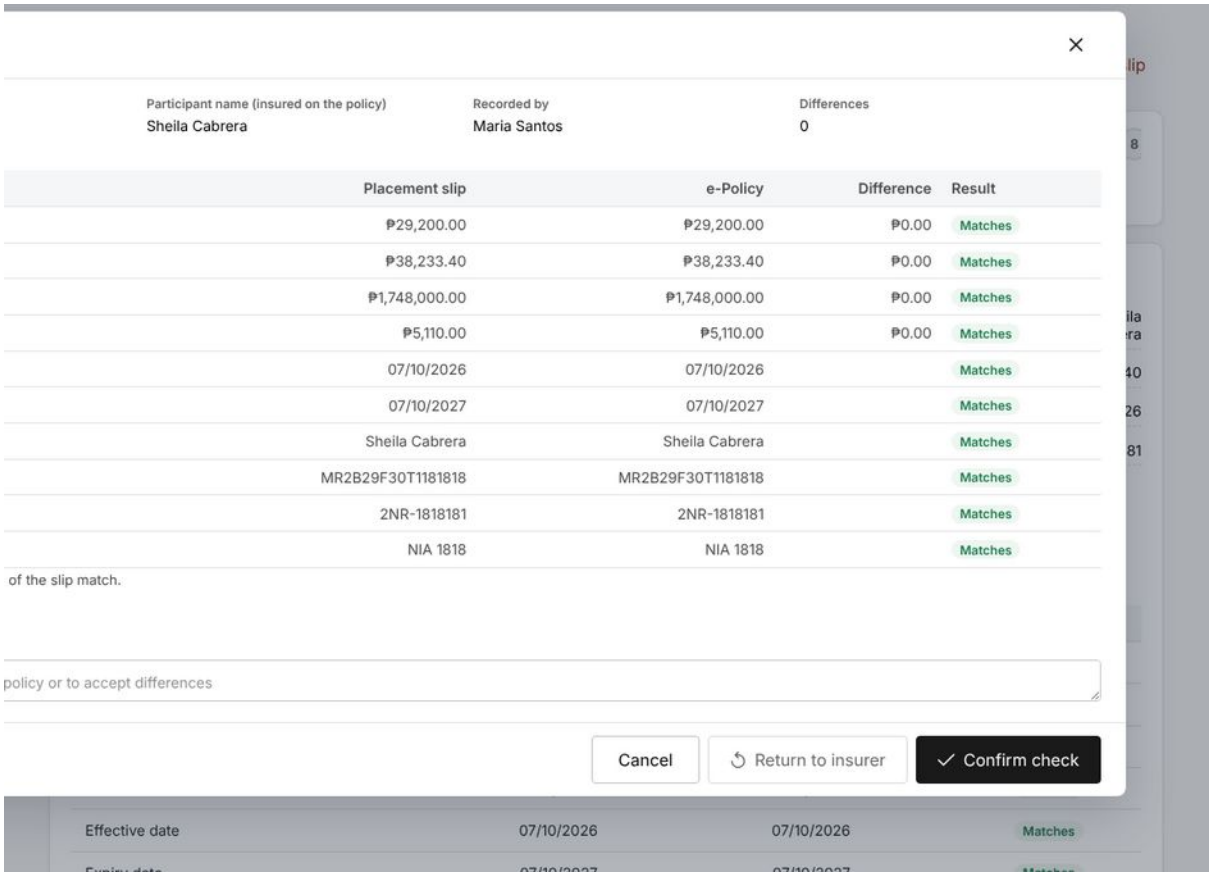

Figure 3.6: Check against slip: every item of the e-policy matches the placement slip

3.6 Policy, billing and endorsements

Policies, cover notes and CTPL certificates are recorded by the Sales roles, the Operations roles or TIS General Manager; endorsements and cancellations by the Sales roles, the Operations roles or TIS General Manager. See Policies (18.10).

3.6.1 Book the policy

1. Open the placement slip (status **Checked against slip**).
2. Select **Book (Insurer issued)**.
3. For a motor policy, complete the client's ID details the client file lacks: ID type, ID number and the ID card image. The chassis number, engine number and plate or MV file number are also required.
4. Confirm the booking.

Booking creates the policy, the bill (or, for a direct-bill insurer, the commission receivable from the insurer), the journal and the commission lines, ends the cover notes of the risk and e-mails the policy schedule with the e-policy to the client. The placement becomes **Insurer issued (Booked)** and the quotation **Converted to Policy**. For the TFS-financed car, the policy shows TFS in **Mortgage**.

When the client needs proof of cover before the e-policy arrives, issue a cover note on Cover Notes (18.20).

3.6.2 Billing statement

The booked policy appears on Operations > Policy with its payment status in the **Payment** column (**Pending**, **Reviewing**, **Partial** or **Completed**). The billing statement of the policy is printed or e-mailed to the client from the policy, and the bill is collected by Cash Control.

3.6.3 Endorsements and cancellations

A change to a policy in force (insured details, vehicle, cover, an extension) is an endorsement:

1. Choose Operations > Policy.
2. In the row of the policy, select **More actions** (the three dots), then **Endorsement**. The action is not available while the policy's payment is **Pending** or **Reviewing**, or once the policy has expired, lapsed, was cancelled or renewed.
3. Enter the change and upload the endorsement document.
4. Complete the endorsement. The system applies the change and the premium difference to the policy, bills an additional premium to the client and notifies the policy owner.

An endorsement that returns premium, and a cancellation, is completed by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, a user other than the one who entered it. The return premium of a cancellation is computed on Cancel a policy: computed return premium (18.21). Commission already paid on the returned premium is clawed back from the referrer.

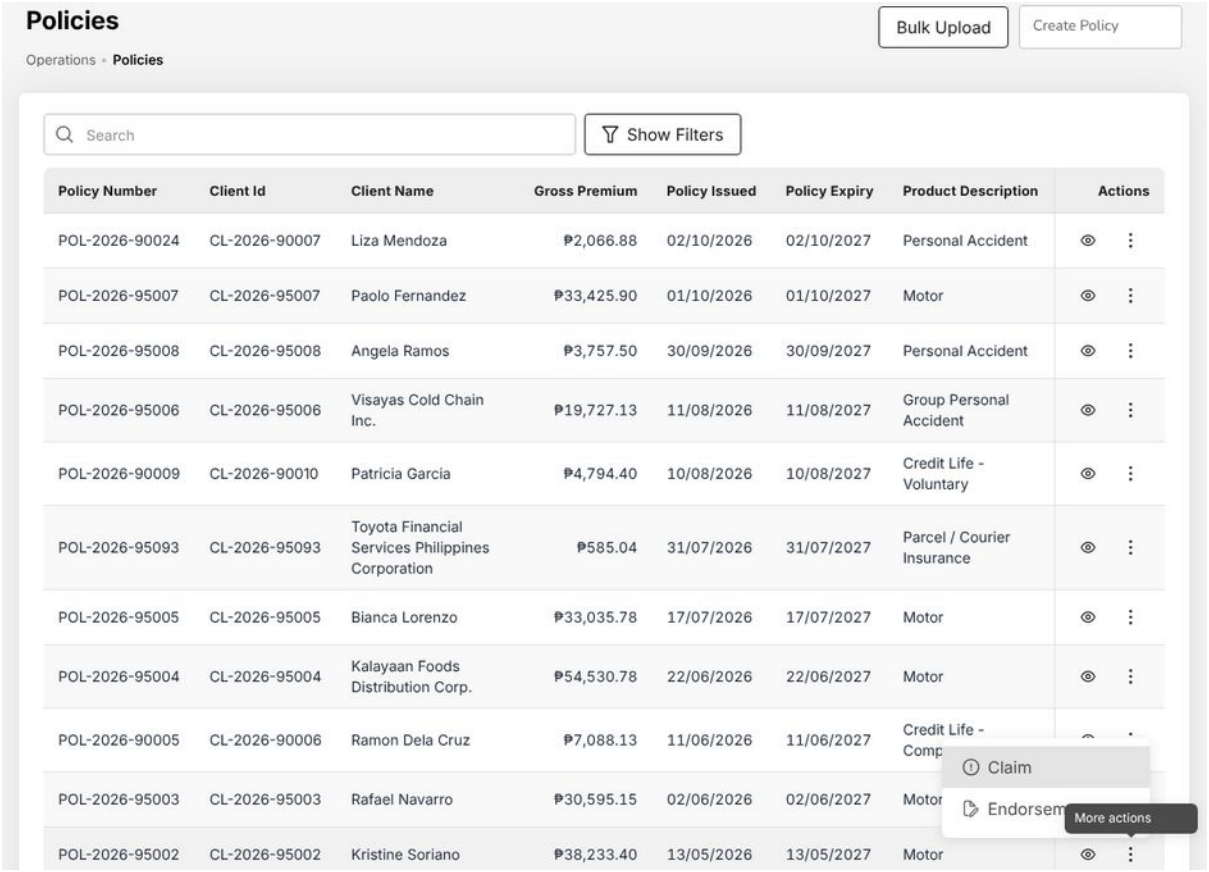

Figure 3.7: Operations > Policy, with the actions Claim and Endorsement of a paid policy

3.7 Collection by Cash Control

Cash Control (CCD) collects the premium of every bill. The work is split between the four Cash Control roles; each role works only on its own part:

Collection	Role	Screen
Over-the-counter payments, bank transfers, bills payment and QRPh	CCD-BP / QRPh (Receipting) (chapter 12)	Receipts (19.1)
Post-dated cheques	CCD-PDU (Post-Dated Cheques) (chapter 10), CCD-PDC / CCD-ADA (chapter 11)	Post-dated cheques (19.5)
Auto-debit arrangements	CCD-PDC / CCD-ADA (chapter 11)	Receipts (19.1)
Daily reconciliation, reversals and adjustments	CCD-Recon (Reconciliation and Reversals) (chapter 13)	Bank reconciliation (19.16), Receipts (19.1)

The roles that issue receipts do not cancel or reverse them: see Reconciliation and reversals (3.7.3).

3.7.1 Official receipt for a payment

1. Choose Accounts > Receipts.
2. Select **Receipt**. The **Add Receipts** screen opens with today's date as **Receipt Date**.
3. In **Customer Code**, select the client. **Customer Name** is filled in.
4. In **Policy Number**, select the policy paid.
5. Keep **Transaction Code** at **OR – Official Receipt**.

6. In **Receipt Mode**, select how the client paid: **Dollar/Peso** (cash), **Cheque**, **Managers Check/Demand Draft**, **Direct Credit/Transfer to Account**, **Telegraphic Transfer**, **Authority to Debit** (auto-debit), **Online Banking** or **Credit Ticket-Inter Office**. A cheque asks for the cheque details.
7. Select **Record payment**.

The system issues the official receipt number, posts the payment (cash in the bank account of the receipt mode against the premium receivable) and reduces the bill. When the bill is fully paid the policy's payment becomes **Completed**. Print the receipt or e-mail it to the client from the confirmation.

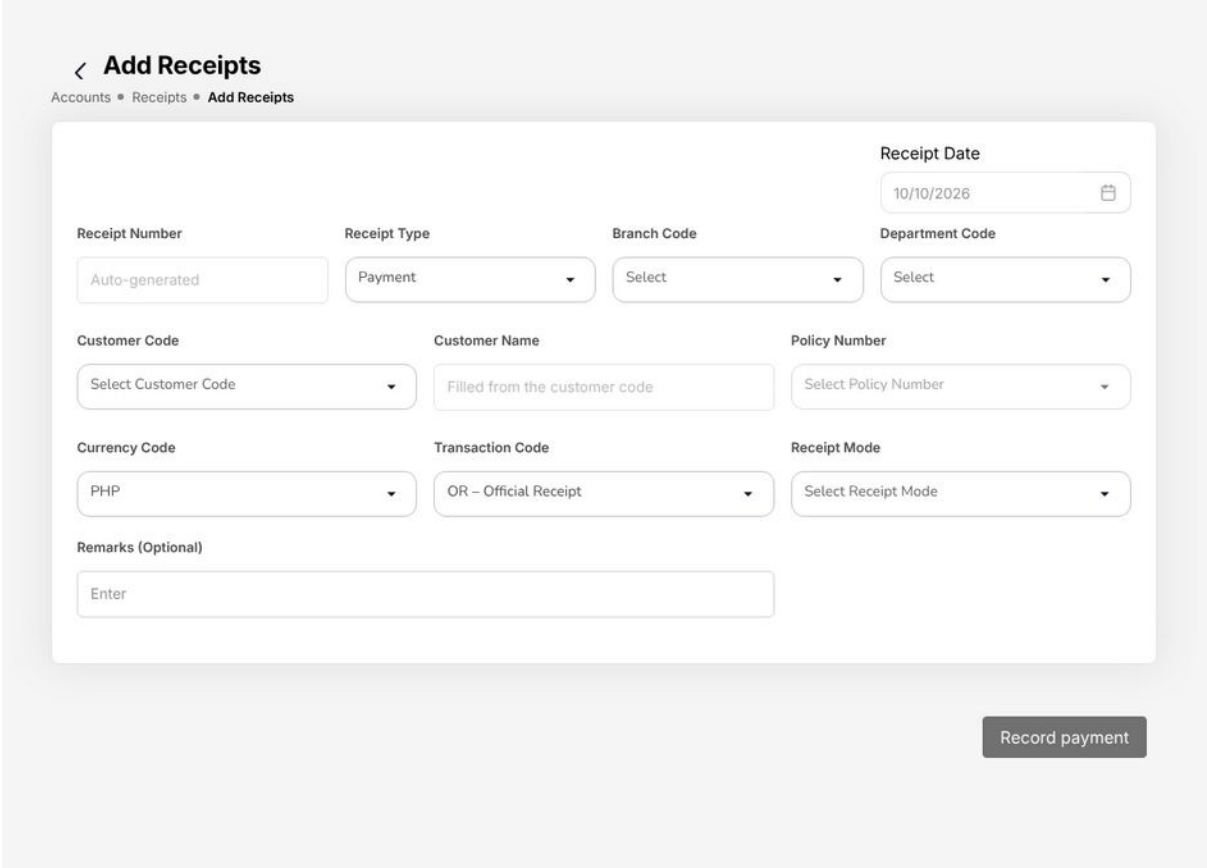

Figure 3.8: Accounts > Receipts > Add Receipts, the official receipt form of CCD-BP / QRPh (Receipting)

Collections received in a file (bills payment and QRPh settlement reports) are receipted together with **Bulk Upload** on Receipts: each row pays a policy.

3.7.2 Post-dated cheques

A client who pays the instalments by post-dated cheques hands them to Cash Control. Nothing is posted when they are received.

1. CCD-PDU (Post-Dated Cheques) chooses Accounts > Post-Dated Cheques and encodes the cheques as a set against the instalments of the bill (**Encode PDCs**), then prints the acknowledgement receipt for the client.
2. Cheques payable to the Insurance Partner are forwarded with a transmittal and warehoused by the partner. When the partner advises that a cheque was paid

(**Partner cleared**), its acknowledgement receipt is posted and the instalment is paid; a bounced cheque re-opens the instalment for a replacement.

3. Cheques payable to TISPH are deposited on their dates to the one collection account; the official receipt is posted.
4. A cancellation is asked for with a reason and approved by another user; a replacement keeps the instalment.

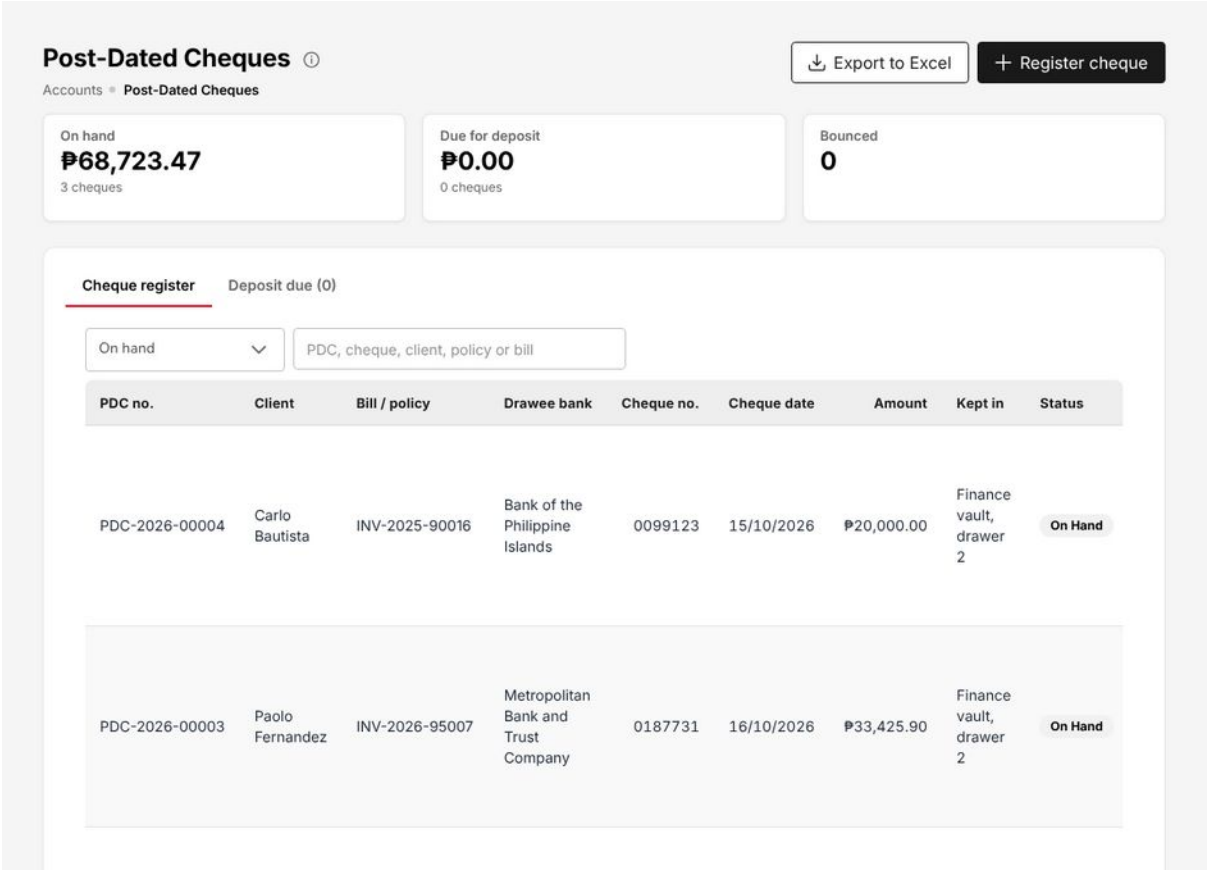

Figure 3.9: Accounts > Post-Dated Cheques, with the cheques at TIS

3.7.3 Reconciliation and reversals

Each day the bank statements are matched by CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting with the receipts on Bank reconciliation (19.16), and the reconciliation is approved by TIS Finance & General Accounting.

A receipt is reversed from the receipt page by CCD-Recon (Reconciliation and Reversals) with a reason, and another user approves the reversal: CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting (see Reverse a receipt (19.1.1)). On approval the payment journals are reversed and the bill is open again. The receipt of a cheque that the bank returns is also cancelled on the Reconciliation Workspace (adjustment **RCHQ – Returned cheque**) or, for a post-dated cheque, by recording the bounce on Post-Dated Cheques. CCD-BP / QRPh (Receipting), who issues the receipts, does not reverse them.

Premium warranty extensions, instalment plans and client credit limits are handled on Credit control (19.4) and approved by TIS Finance & General Accounting.

3.8 Remittance to the insurers

Remittances to the insurers are prepared and submitted by CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting, and approved by TIS Finance & General Accounting or TIS General Manager within their approval limit, never by the user who prepared or submitted them. See Remittance to insurers (19.10).

TISPH collects the premium from the client and remits it to the insurer net of its commission: the remittance pays the premium collected, less the commission and the output VAT on it, plus the withholding tax the insurer deducts from the commission. For an insurer and product remitted gross, the whole premium is remitted and the commission is billed to the insurer separately on Insurer billing (19.11).

1. Every Monday at 06:15 the weekly run creates the draft remittances of the policies paid in the Monday to Friday before, one per insurer and product line (Setup: remittance schedules (19.10.7)). An off-cycle remittance is created from a list of policies with Import policy list (19.10.2).
2. Choose Accounts > Remittance > Remittances. On **My work**, check each draft (policies and amounts), tick it and select **Submit for approval (n)**.
3. The approver decides on Accounts > Remittance > Approvals: **Approve**, or **Reject** with a reason, which returns the remittance to its maker as **Returned**.
4. The approved remittance is settled on Accounts > Remittance > Settlement. The approved settlement raises the insurer's payment voucher on Disbursement (19.8) and the remittance shows **Settled (voucher raised)**.
5. The voucher is paid from Insurer payments (19.10.5): by a bank payment batch on Bank payment files (19.9) or by cheque on Disbursement. The payment posts the journal and the remittance reaches the step **Paid**.
6. The remittance schedule (XLSX and PDF) and, once the voucher is raised, the remittance advice are downloaded from the remittance and sent to the insurer.

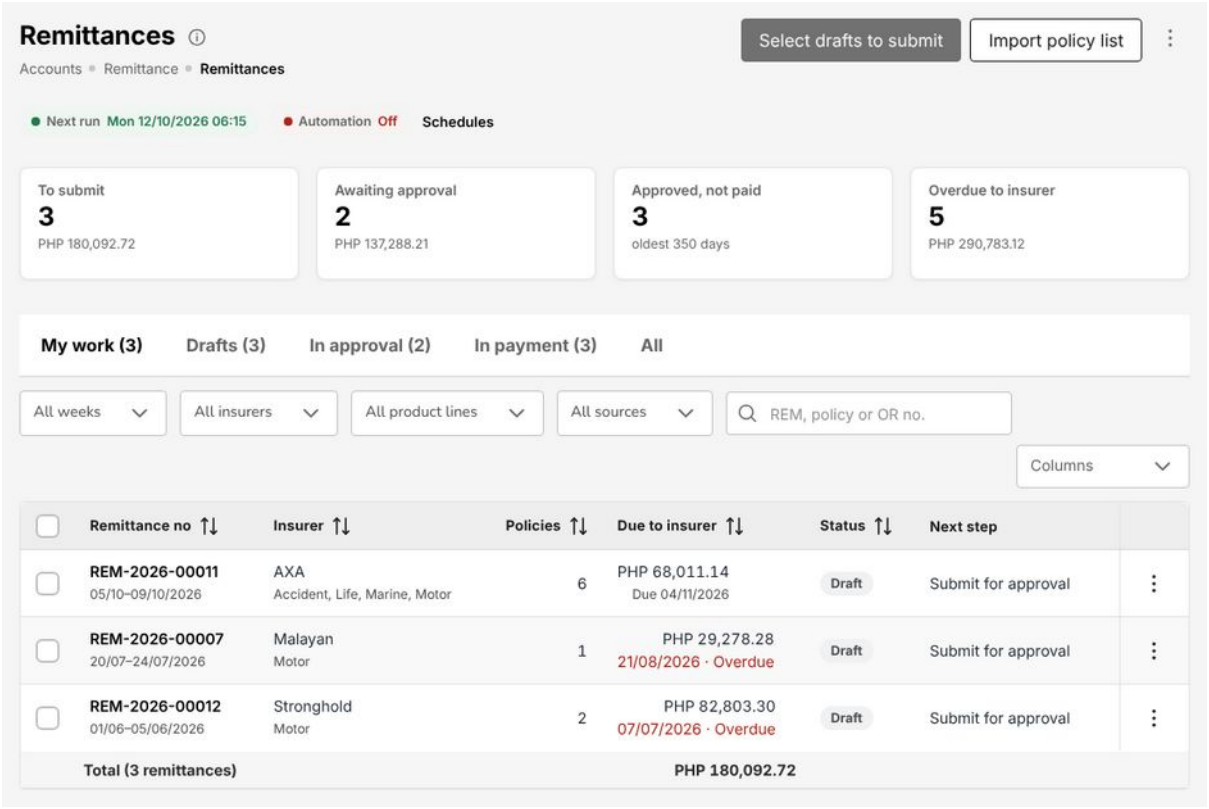

Figure 3.10: Accounts > Remittance > Remittances of TIS Finance & General Accounting: the drafts to submit, the next run and Automation Off

Each month the insurers' statements are matched with TISPH's records on Insurer statement reconciliation (19.17); the reconciliation and its adjustments are approved by CCD-Recon (Reconciliation and Reversals).

3.9 Commission and incentives

Commission is processed by TIS Finance & General Accounting. The telesales incentive is calculated by a TIS Sales Unit Head user and approved by another user of that role: the user who runs a calculation never approves it. See Commission to agents and referrers (20.4) and Incentives (19.23).

TISPH earns its brokerage commission from the insurer: it is kept when the premium is remitted net, or billed to the insurer for gross and direct-bill business.

TISPH shares part of the commission with the agents, sub-agents and dealers who referred the business: the referrer commission (shown as **Comsub** on the screens). The referrer commission lines of each policy move through four statuses:

Status	When
Accrued	At the booking of the policy
Eligible	When the client's premium is collected
Approved	When a user of Finance, other than the maker, approves the eligible lines (the accrual journal is posted)
Paid	When the approved lines are paid on a payment voucher, net of withholding tax

To pay a referrer:

1. Choose Commission > Agents/Referrer Accounts and open the referrer.

2. Approve the **Eligible** lines.
3. Generate the payout: the approved lines go to a payment voucher on Disbursement (19.8), with the withholding tax of the referrer (5% for an individual, 10% for a company in the delivered setup).

When premium is returned (an endorsement or a cancellation), the referrer commission of a paid line is clawed back from the referrer.

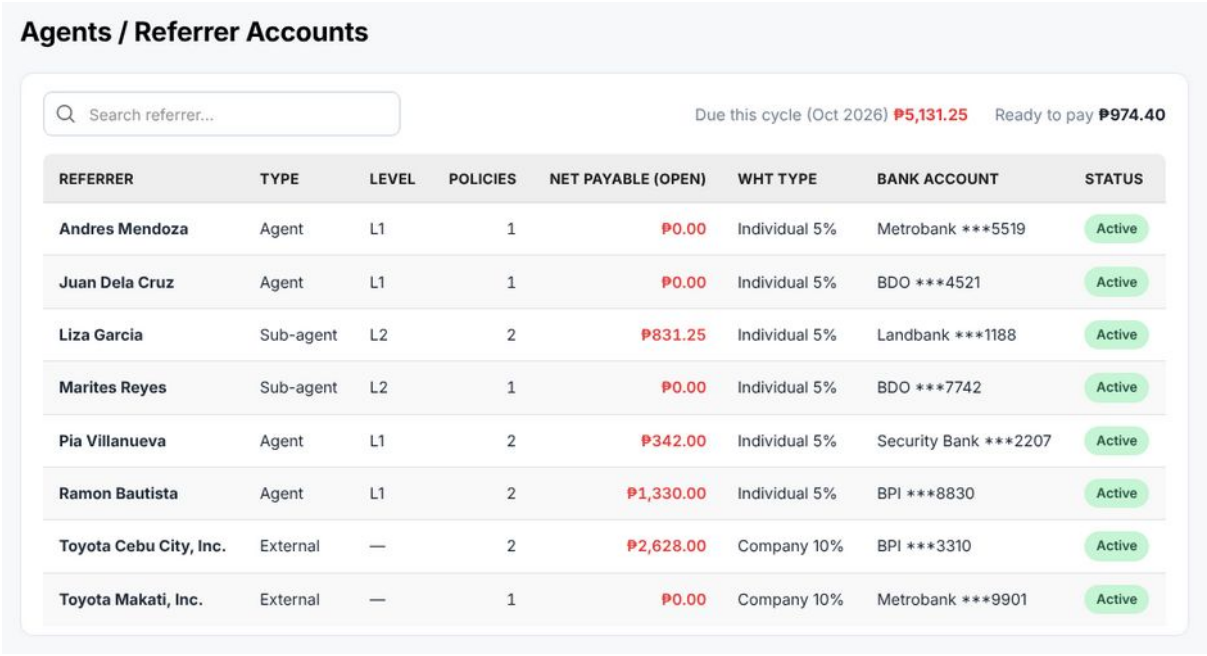

Figure 3.11: Commission > Agents/Referrer Accounts, with the net payable of each referrer

3.10 Claims

Claims are registered and followed up by the Operations roles or TIS General Manager. Claim decisions and settlement approvals are made by TIS Operations Unit Head or TIS General Manager. See Claims (18.13).

TISPH registers the client's claim, advises the insurer and follows the claim up to the settlement; the insurer decides and pays.

1. Choose Operations > Policy, select **More actions** on the policy, then **Claim**. The action is not available while the policy's payment is **Pending** or **Reviewing**.
2. Enter the date, time and place of the loss and the cause of loss (for a motor claim: own damage, theft, third party property damage and the other causes of the line), with the driver and vehicle for a motor claim.
3. Save the claim. The claim is **Pending**. The system refuses a claim on a policy whose premium is unpaid or whose loss date is outside the policy period, and sends the Preliminary Loss Advice to the insurer by e-mail.
4. Collect the claim documents of the checklist of the line; claims still missing documents are listed on Claims awaiting documents (18.22). The claim goes **Processing** while the insurer reviews it.
5. Record the adjuster's report when it arrives.

6. For a motor claim, follow the repair on Motor claim repairs and letters of authority (18.23): the shop's estimate, the insurer adjuster's decision, the letter of authority to the shop and the release of the vehicle.
7. Enter the settlement agreed by the insurer and submit it. The claim is **Pending Approval**.
8. The approver (TIS Operations Unit Head or TIS General Manager) approves or returns the settlement; the approver must be another user than the one who submitted it. As delivered, the approval also releases the settlement: the claim is **Settled** at once.
9. Close the claim when the claimant has been paid. A claim the insurer repudiates is **Rejected**, with a reason, and then closed.

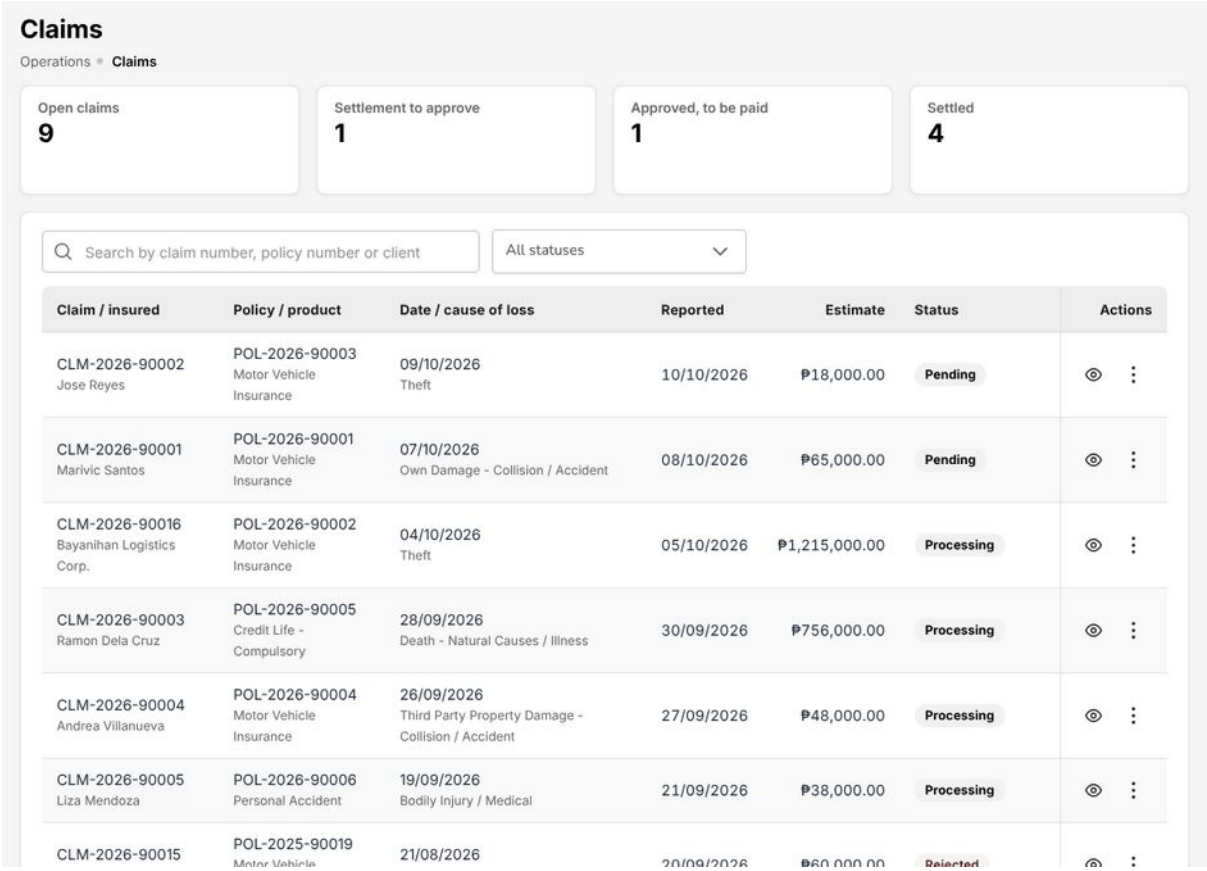

Figure 3.12: Operations > Claims, with the open claims, the settlement to approve and the settled claims

3.11 Renewals

Renewals are prepared by the Sales roles, the Operations roles or TIS General Manager; renewal terms are approved by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager. See Renewal Queue (18.16).

Policies come into the renewal pipeline 90 days before their expiry.

1. Choose Operations > Renewals > Renewal Queue. The queue lists the policies due for renewal with their stage, their risk of not renewing and the account executive.
2. Send the renewal notices in order (**First Notice Sent**, **Second Notice Sent**, **Final Notice Sent**), one by one or for many policies at once with Renewal Batch (18.15).

3. Prepare the renewal terms: open the policy on Renewal Policy (18.14) and complete the renewal (cover, dates, premium). The renewal quotation is linked to the expiring policy, is valid for 30 days and is sent to the client: the renewal is **Quote Sent**. Price and cover discussions with the client or the insurer are followed on Negotiations (18.18).
4. When the terms are agreed, select **Submit for approval** on Negotiations. The renewal is **Pending Approval**.
5. The approver (TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager) approves the terms (**Approved**) or returns them (back to **Quote Sent**, to revise); the approver must be another user than the one who submitted them.
6. With the terms approved and accepted by the client, the renewal is completed like a new policy: placement slip, insurer's e-policy, check against the slip and booking. The booked policy is **Renewed** and its bill is collected by Cash Control.

A policy not renewed by its expiry stays **In Grace Period** for 30 days and is then **Lapsed**; a lapsed policy can still be renewed within 90 days on Lapse Management (18.15).

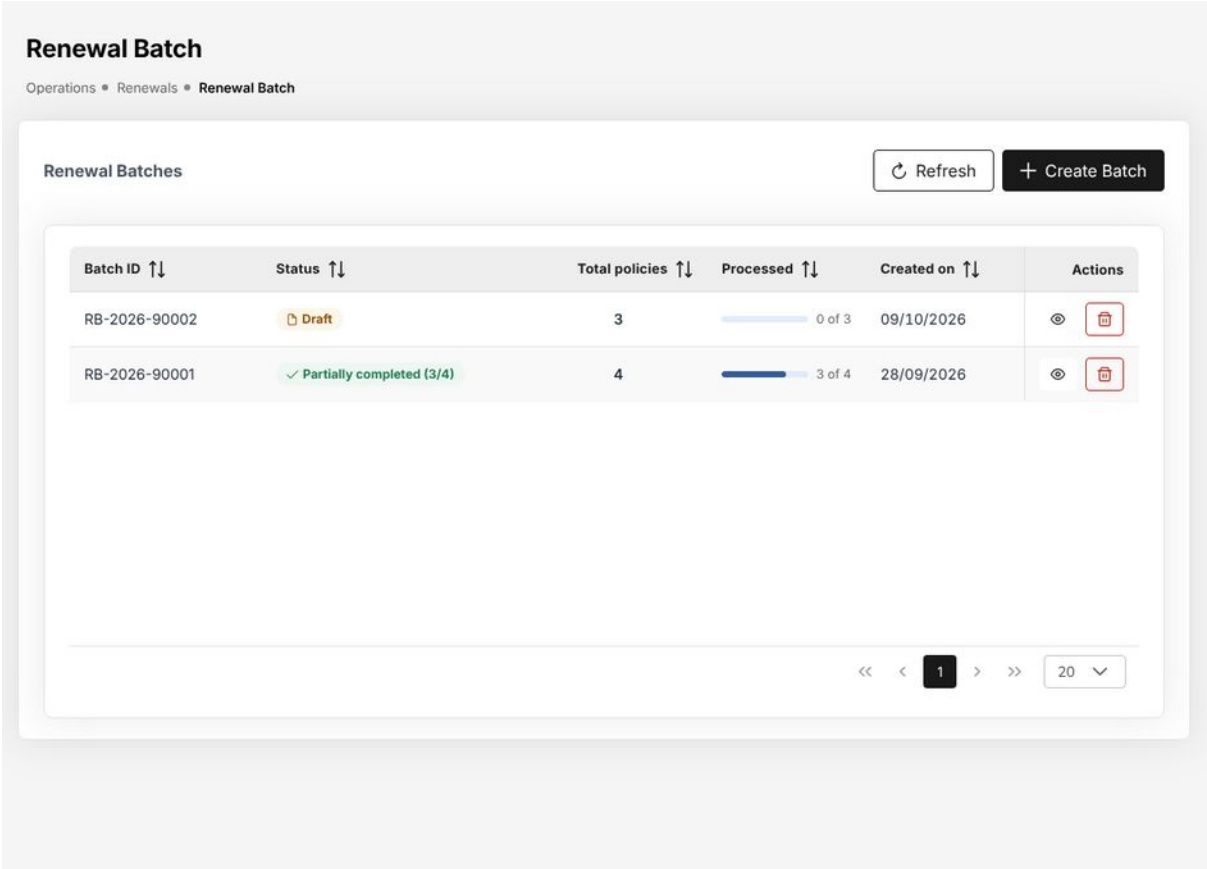

Figure 3.13: Operations > Renewals > Renewal Batch, with a batch of renewal notices in preparation

3.12 Month-end and tax

The month-end and year-end steps and the BIR returns are run by TIS Finance & General Accounting; the close is approved by TIS Finance & General Accounting. See Period end (19.21) and Tax: BIR forms and returns (19.18).

The TISPH fiscal year runs from April to March (FY2027: 01/04/2026 to 31/03/2027), with twelve monthly periods and an adjustment period 13.

3.12.1 Every day

- The day's journals are sent to SAP in the SAP GL export (19.13) file.
- Cash Control reconciles the bank accounts (see Reconciliation and reversals (3.7.3)).

3.12.2 Month-end

1. Make sure the month's work is posted: receipts, remittances, payment vouchers, commission, journal vouchers.
2. Finish the bank reconciliations of the month and have them approved.
3. Choose Accounts > Period End > Month-End Close and select **New close run** for the period.
4. Execute the run: the accruals, the recurring journals, the commission deferral, the revaluation and the close checklist. Executing again first reverses the run's own journals, so the result is the same.
5. Sign off the manual items of the checklist and submit the run.
6. A second user of TIS Finance & General Accounting approves the run. The period is **Closed**.

A period can first be **Soft-closed** on Accounts > Period End > Period Management: only TIS Finance & General Accounting can then still post into it. Closing and reopening a period need a reason. A period becomes **Locked** only with the year-end close.

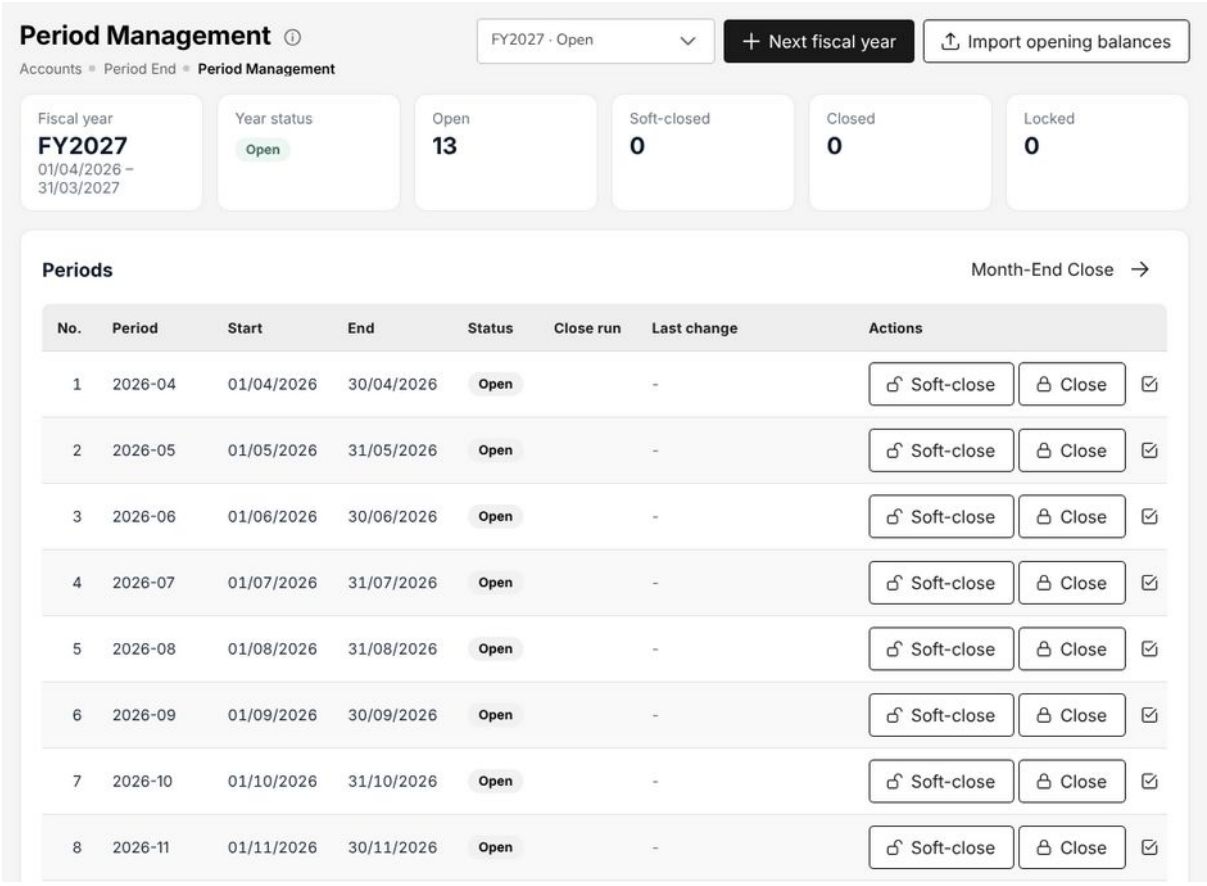

Figure 3.14: Accounts > Period End > Period Management, the twelve periods of the fiscal year with their status

3.12.3 BIR returns

The BIR forms and returns are prepared on Accounts > Tax from the payment vouchers and the ledger:

Return	When	Screen
BIR Form 2307 to suppliers	With each payment subject to withholding	BIR Form 2307 for suppliers (19.7)
VAT Summary, SAWT, SLSP Sales and Purchases	Each quarter	Tax: BIR forms and returns (19.18)

3.12.4 Year-end

After the twelve periods are closed, a user of TIS Finance & General Accounting starts the year-end close on Year-end close (19.22). The pre-checks must pass (periods closed, no unposted journal in the year, suspense account nil, trial balance balanced, closing accounts set up, previous year closed); the adjustments of period 13 are posted and approved. A user of TIS Finance & General Accounting other than the one who started the run then closes the year: the system posts the closing entries, carries the balances forward as the opening balances of the next year, locks the year and creates the next one.

4. TIS Sales Associate

4.1 Role summary

Department: Sales. Leads, clients, quotations, placements, policies, endorsements and renewals; no approvals.

The TIS Sales Associate is the account executive who turns a lead into a policy. You work the prospects referred by Toyota Financial Services (TFS), the Toyota dealers and walk-in clients, quote them, follow the client's answer, and see the business through placement with the panel insurer up to the booked policy. You keep your clients' records, raise the endorsements they ask for and follow up their renewals.

You work with the TIS Sales Officer and the TIS Sales Unit Head, who assign the prospects, check the insurer's e-policy against the placement slip and approve your renewal terms, and with the TIS Operations roles, who share the placement and policy work and handle the claims. Cash Control collects the premiums of the policies you book. You approve nothing: every decision on your work is made by another user.

4.2 Menus available

The menus of this role as delivered. Access: View (open and read), Create and edit (enter and change records), Approve (decide the records of other users).

4.4 Approvals

This role approves nothing.

Who approves the work of this role:

Work	Approval	Approved by
Policies	Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Quotations and placement	Approve a quotation created by another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Renewals	Approve or return renewal terms of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Operations > Sales & Marketing > Quotations > Underwriting referral	Underwriting referral approval within the approver's limit	TIS Operations Unit Head

The user who enters a record never approves it: the approval is always another user's.

4.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Policies (create and edit), Quotations and placement (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Placing and paying insurers	Quotations and placement (create and edit), Policies (create and edit) with Remittance and insurer reconciliation (create and edit), Disbursements and petty cash (create and edit) held by the same person	Warning	The person who places business with an insurer should not also prepare the payments to insurers
Receipting and selling	Quotations and placement (create and edit), Policies (create and edit) with Receipts (create and edit) held by the same person	Warning	The person who issues receipts and posts cash should not also sell or issue the policies paid for

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

4.6 Daily and periodic tasks

Task	When	Screen
Work through your prospects, quotations, placement slips and renewals	Every morning and through the day	My Work (2.3)
Contact the new prospects assigned to you and log each call, meeting, e-mail or visit	Daily	Prospects (18.1), Sales Activities (18.8)
Record walk-in clients and referrals as prospects	As they come in	Prospects (18.1)
Prepare motor and package quotations and send them to the client	Daily	Quotations (18.4), Quick Quote (18.2)
Record the client's answer to a quotation	As the client answers	Quotations (18.4)
Ask the panel insurers for terms on fleet and corporate risks	As needed	Requests for Quotation (18.3)
Send the placement slips, record the acknowledgements and upload the e-policies	Daily	Placement Slips (18.5)
Book the policies checked against the slip	Daily	Placement Slips (18.5)
Issue cover notes and CTPL certificates while the insurer's policy is pending	As needed	Cover Notes (18.20)
Raise the endorsements and cancellations your clients ask for	As requested	Policy (18.10), Policy Cancellation (18.21)
Send the renewal notices and prepare the renewal terms	Weekly, for policies expiring in the next 90 days	Renewal Queue (18.16), Negotiations (18.18)
Follow up policies in their grace period and lapsed policies	Weekly	Lapse Management (18.15)
Check your pipeline and your incentive progress	Weekly and at month-end	Incentive (19.23)

4.7 Procedures

4.7.1 Start the day from My Work

1. Choose **My Work**. **Mine** lists the records you own.
2. Select a category on the left (**Quotations**, **Requests for quotation**, **Placement slips**, **Renewals**, **Endorsements**) to narrow the list. The **Next action** column says what each record waits for, for example "Obtain and upload the e-policy" or "Follow up the client".
3. Select the arrow at the end of a row to open the record on its screen.

See My Work (2.3) for the filters, tasks and calendar.

4.7.2 Work a new prospect

A prospect from TFS or a dealer reaches you through the assignment rules of Lead Assignment (18.6): it appears in My Work and you receive a notification. When no rule matches a prospect, it stays with the user who created it. A walk-in client or a referral you record yourself is yours.

1. Choose Operations > Sales & Marketing > Prospects. To record a new prospect, select **Create Prospect** and follow Create a prospect (18.1.1).
2. Contact the prospect. Choose Operations > Sales & Marketing > Sales Activities and log the call, meeting, e-mail or visit with its outcome and, where there is one,

the next step and its follow-up date. Logging the first activity marks a **New** prospect **Contacted**.

3. When the prospect wants cover, prepare the quotation (next procedure). The prospect becomes **Quote Generated**.
4. If the prospect does not go ahead, set it to **Lost**.

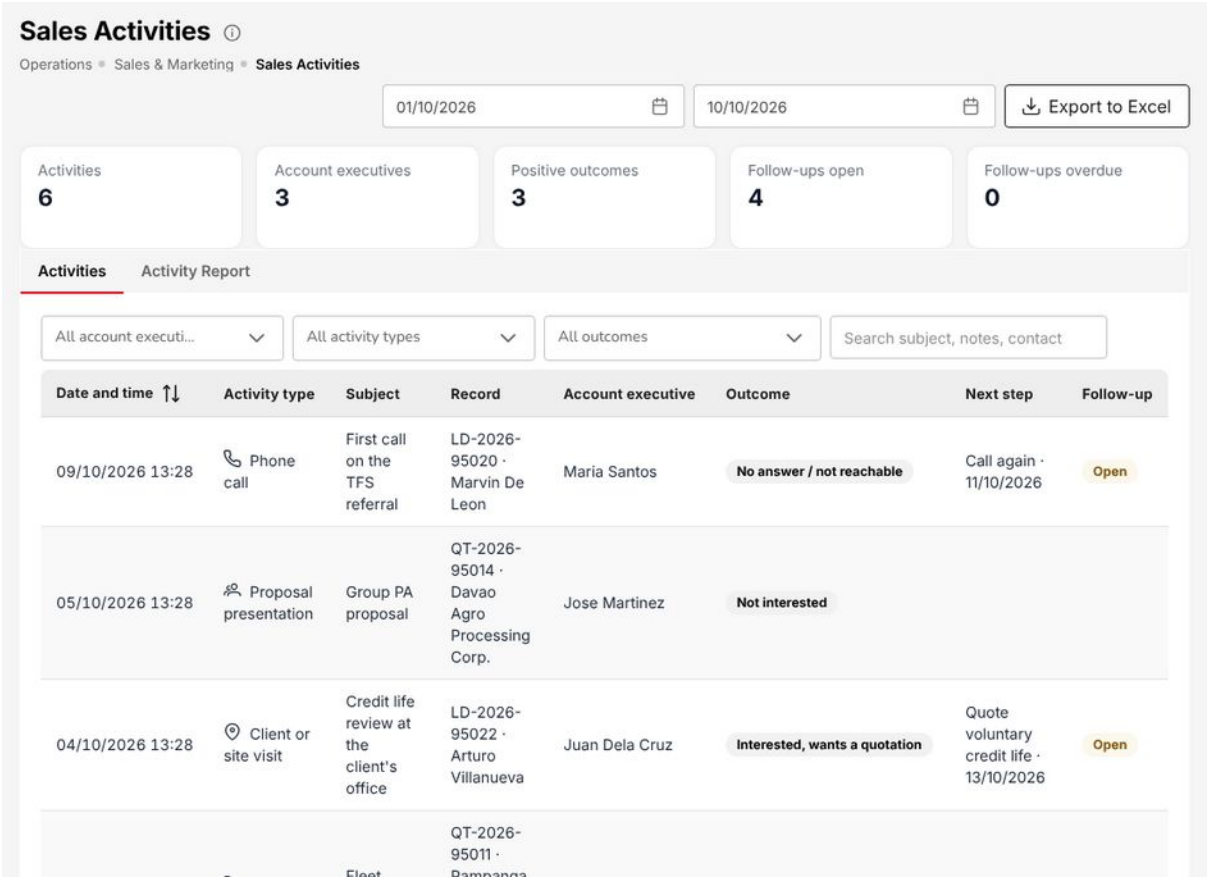

Figure 4.1: Operations > Sales & Marketing > Sales Activities, with the activities of the sales team and their open follow-ups

Open follow-ups are counted on the Sales Activities screen; follow them up on the date you set.

4.7.3 Quote and close the sale

1. Choose Operations > Sales & Marketing > Quotations and select **Create Quote**, or use Operations > Sales & Marketing > Quick Quote for a package product priced from its rates in one screen. See Create a motor quotation (18.4.1) for the fields of a motor quotation.
2. Save the quotation. It is **Draft**.
3. Open the quotation (**View Details**, the eye icon) and select **Send for Customer Approval**. The status becomes **Pending Customer** and the client receives the quotation by e-mail with its approval link.
4. When the client answers by phone, e-mail or in person, open the quotation and select **Record customer response**. On acceptance the status becomes **Customer Accepted** and the system raises the placement slip at once (**Placement raised**).

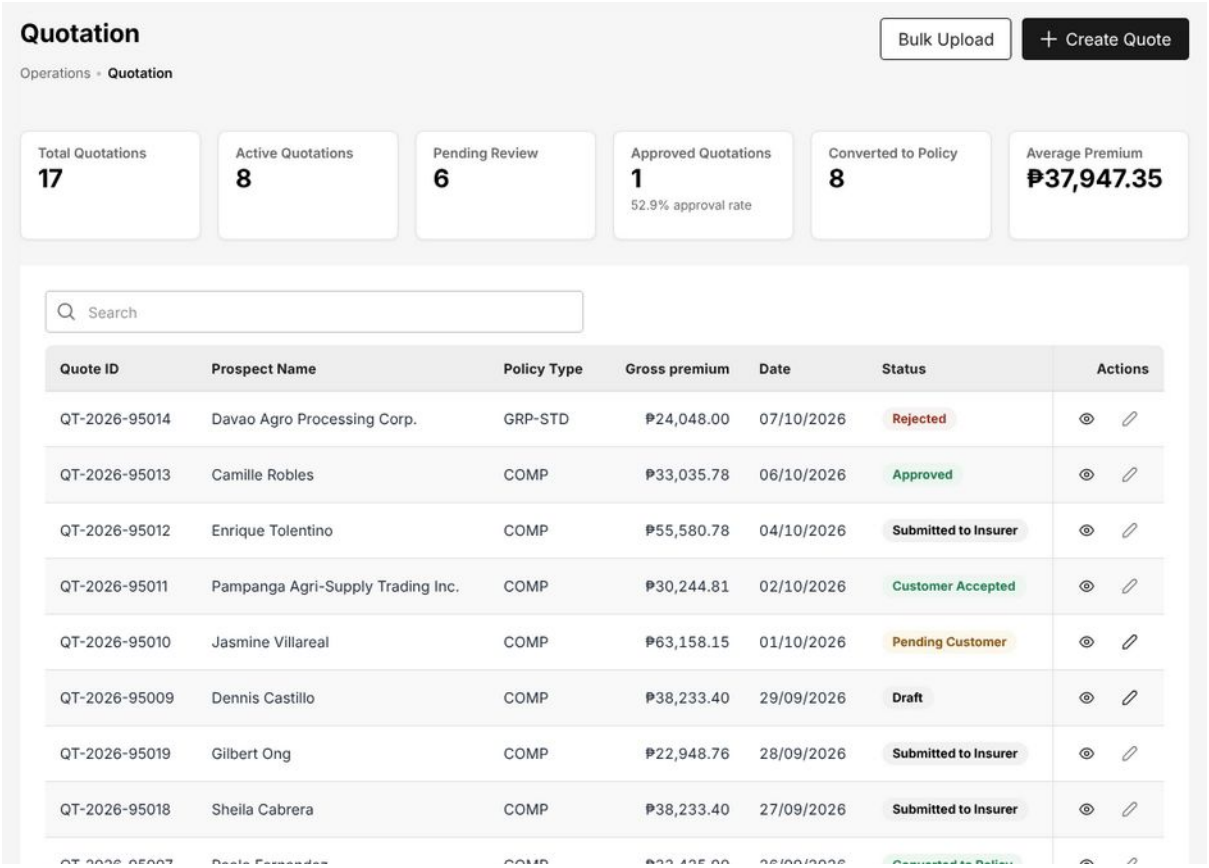

Figure 4.2: Operations > Sales & Marketing > Quotations, with the quotations of the sales team and their status

> *A quotation referred by an acceptance rule of the product shows **Referred: awaiting approval**. It cannot be sent to the client, placed or issued until the TIS Operations Unit Head approves the referral.*

For a risk that needs the insurers' own terms, send a request for quotation to the panel insurers first: see Request for quotation to the panel insurers (3.4.3).

4.7.4 Place the business and book the policy

1. Choose Operations > Sales & Marketing > Placement Slips and open the placement slip of the quotation (**Placement raised**).
2. Select **Send to insurer(s)**. The status becomes **Sent to insurer**.
3. When the insurer confirms the order, select **Record acknowledgement** and enter the insurer's reference (**Acknowledged**).
4. When the e-policy arrives, select **Upload e-policy**, attach the file and enter what it says. For a motor policy the chassis, engine and plate (or MV file) numbers must be those of the e-policy. The status becomes **e-Policy received**.
5. Wait for the check: a TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, other than you, compares the e-policy with the slip and confirms it (**Checked against slip**) or returns it to the insurer. You can open **Check against slip** to see the differences, but the decision is not yours.
6. Open the checked placement slip and select **Book (Insurer issued)**. Complete the client's ID details if the client file lacks them and confirm.

Booking creates the policy and its bill, and e-mails the policy schedule with the e-policy to the client. The placement becomes **Insurer issued (Booked)** and the quotation **Converted to Policy**. See Placement Slips (18.5) and Book the policy (3.6.1).

4.7.5 Raise an endorsement for your client

1. Choose Operations > Policy.
2. In the row of the policy, select **More actions** (the three dots), then **Endorsement**. The action is not offered while the policy's payment is **Pending** or **Reviewing**, or once the policy has expired, lapsed, was cancelled or renewed.
3. Enter the change, upload the endorsement document and complete the endorsement.

An endorsement that adds premium is billed to the client at once. An endorsement that returns premium, and a cancellation, is completed by a TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager. See Raise an endorsement request (18.10.1) and Endorsements and cancellations (3.6.3).

4.7.6 Renew your clients' policies

Policies enter the renewal pipeline 90 days before they expire.

1. Choose Operations > Renewals > Renewal Queue. Filter on your name in **All account executives**.
2. In the row of a policy, select **More actions** and send the next notice: **Send First Notice**, then **Send Second Notice**, then the final notice. The notices go in this order. Use **Record reminder** for a reminder given by phone or in person.
3. Prepare the renewal terms on Renewal Policy (18.14.1). The renewal quotation is valid for 30 days and is sent to the client (**Quote Sent**).
4. Choose Operations > Renewals > Negotiations, select **View** on the renewal and record the discussions with **Log communication** or **Add update**.
5. When the terms are agreed, select **Submit for approval**. The renewal is **Pending Approval** until another user approves or returns the terms; returned terms come back to **Quote Sent** for you to revise.
6. Once the terms are approved and the client accepts, the renewal goes through placement like a new policy.

A policy not renewed by its expiry stays **In Grace Period** for 30 days and is then **Lapsed**. See Renewals (3.11).

5. TIS Sales Officer

5.1 Role summary

Department: Sales. As the Sales Associate, plus lead allocation, campaigns and approving the work of others.

The TIS Sales Officer leads a sales team. You do the work of the TIS Sales Associate on your own accounts and, for the team, you keep the lead assignment rules, move prospects between account executives, prepare the e-mail campaigns to clients and prospects, and make the checker's decisions of the sales chain: the check of the insurer's e-policy against the placement slip, the renewal terms and the return premiums prepared by other users.

You work with the TIS Sales Associates of your team, with the TIS Sales Unit Head, who heads the unit, and with the TIS Operations roles, who share the placement and policy work. You never decide a record you entered yourself: the system refuses it and another approver decides it.

5.2 Menus available

The menus of this role as delivered. Access: View (open and read), Create and edit (enter and change records), Approve (decide the records of other users).

5.4 Approvals

This role approves the work of other users:

- Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user
- Approve a quotation created by another user
- Approve or return renewal terms of another user

Who approves the work of this role:

Work	Approval	Approved by
Policies	Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Quotations and placement	Approve a quotation created by another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Renewals	Approve or return renewal terms of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Operations > Sales & Marketing > Quotations > Underwriting referral	Underwriting referral approval within the approver's limit	TIS Operations Unit Head

The user who enters a record never approves it: the approval is always another user's.

5.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Policies (create and edit), Quotations and placement (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Placing and paying insurers	Quotations and placement (create and edit), Policies (create and edit) with Remittance and insurer reconciliation (create and edit), Disbursements and petty cash (create and edit) held by the same person	Warning	The person who places business with an insurer should not also prepare the payments to insurers
Receipting and selling	Quotations and placement (create and edit), Policies (create and edit) with Receipts (create and edit) held by the same person	Warning	The person who issues receipts and posts cash should not also sell or issue the policies paid for

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

5.6 Daily and periodic tasks

Task	When	Screen
Work through your own records and the work waiting for you	Every morning and through the day	My Work (2.3)
Check the e-policies received against their placement slips	Daily	Placement Slips (18.5)
Approve or return the renewal terms submitted by your team	Daily	Negotiations (18.18)
Complete the endorsements and cancellations that return premium, raised by other users	As notified	Policy (18.10), Policy Cancellation (18.21)
Check the team's open prospects and reassign those not worked	Daily	Lead Assignment (18.6)
Assign the prospects waiting in the reassignment queue	Daily	Lead Assignment (18.6)
Review the team's activities and open follow-ups	Weekly	Sales Activities (18.8)
Keep the assignment rules in line with the team and the TFS offices	When the team or the channels change	Lead Assignment (18.6)
Review the team's pipeline, conversion and renewals	Weekly and at month-end	Renewal Queue (18.16)

The sales work on your own accounts (prospects, quotations, placement, booking, endorsements, renewals) follows the procedures of the TIS Sales Associate (4.7).

5.7 Procedures

5.7.1 Check an e-policy against the placement slip

The placement slips waiting for the check have the status **e-Policy received**. You cannot check an e-policy that you uploaded yourself.

1. Choose Operations > Sales & Marketing > Placement Slips and select the count **e-Policy received** to list them.
2. Open the placement slip and select **Check against slip**. The dialog shows the insurer policy number, who recorded the e-policy and, for each item (premiums,

sum insured, commission, dates, insured, chassis, engine and plate numbers), the slip, the e-policy, the difference and the result **Matches** or **Differs**.

3. Decide:
   - **Confirm check** when every item matches. Amounts within PHP 1.00 of the slip match.
   - **Accept differences** when the e-policy differs but is right. Enter the reason.
   - **Return to insurer** when the e-policy is wrong. Enter the reason. The lead insurer receives the differences by e-mail and the placement goes back to **Acknowledged** until the corrected e-policy is uploaded.

After **Confirm check** or **Accept differences** the placement is **Checked against slip** and can be booked. See Check the e-policy against the slip (3.5.1).

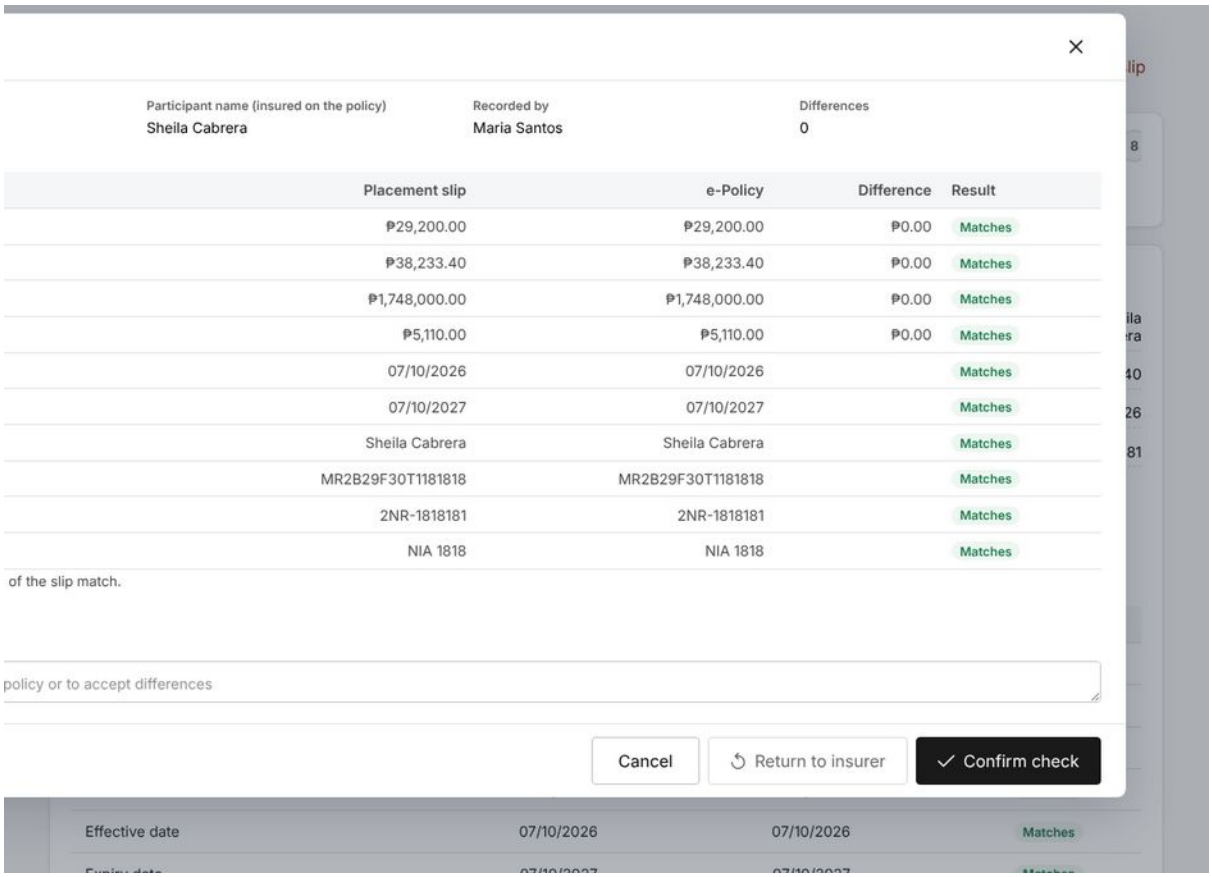

Figure 5.1: Check against slip: the e-policy of a motor placement matches the placement slip on every item

5.7.2 Approve renewal terms

Renewal terms submitted by an account executive are **Pending Approval**. The approver must be another user than the one who submitted them.

1. Choose Operations > Renewals > Negotiations and select the count **Pending approval**.
2. Select **View** on the renewal. The panel shows the product, insurer, expiry, current and proposed premium, the premium change and the timeline of the negotiation.

3. Check the proposed premium against the current one and the reasons in the timeline.
4. Select **Approve** to approve the terms, or **Reject** to return them to the account executive for revision.

Approved terms show **Approved**; the account executive then completes the renewal with the client. Returned terms go back to **Quote Sent**. The account executive is notified of your decision.

> *The renewal terms waiting for approval are listed in the My Work of the TIS Sales Unit Head and the TIS Operations Unit Head. As TIS Sales Officer you find them on Negotiations.*

5.7.3 Complete a return of premium

An endorsement that returns premium, and a policy cancellation, is completed by an approver other than the user who raised it. When one is raised, every approver receives the notification **Return premium** or **Cancellation** with the endorsement number, the policy and the amount.

1. Select the bell and open the notification. The endorsement opens.
2. Check the change, the return premium and the endorsement document.
3. Complete the endorsement. The system applies the change and the return premium to the policy. Commission already paid on the returned premium is clawed back from the referrer.

See Endorsements and cancellations (3.6.3) and Cancel a policy: computed return premium (18.21).

5.7.4 Reassign prospects

1. Choose Operations > Sales & Marketing > Lead Assignment. The **Team View** tab lists the team members with their open, new, converted and lost prospects.
2. In the first list, select the account executive whose team you want to see, or keep **My team**. The **Prospects of the team** list shows each prospect with its status, line, territory, channel, account executive and assignment.
3. Select the prospects to move (tick box), or select the reassign icon at the end of a row. The clock icon shows the assignment history of the prospect.
4. In **To account executive**, choose the new account executive. The account executives of the assignment rule of the prospect are listed first.
5. In **Reason**, choose the reason of the reassignment and add a note where the reason asks for one.
6. Select **Reassign**. The new account executive is notified and the move is kept in the prospect's history.

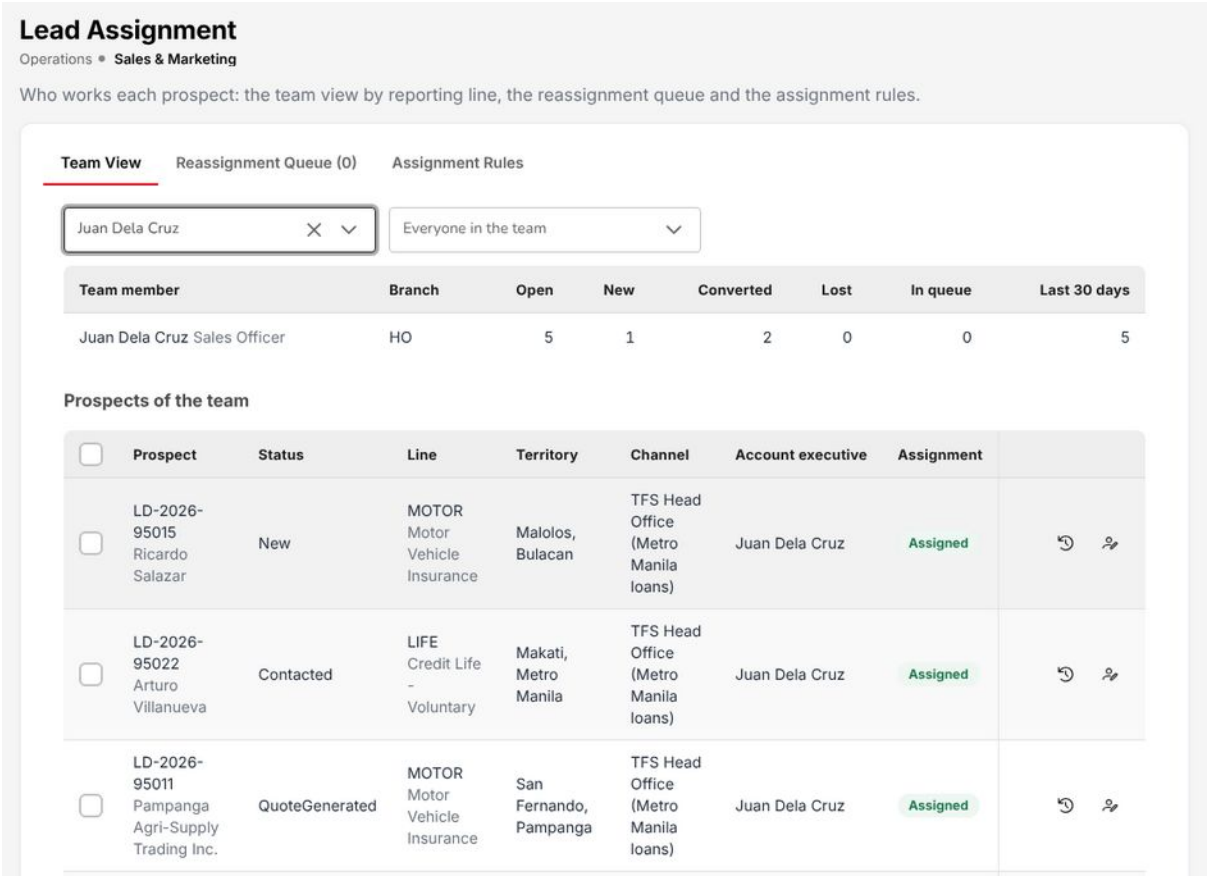

Figure 5.2: Operations > Sales & Marketing > Lead Assignment, the Team View of an account executive with the prospects to reassign

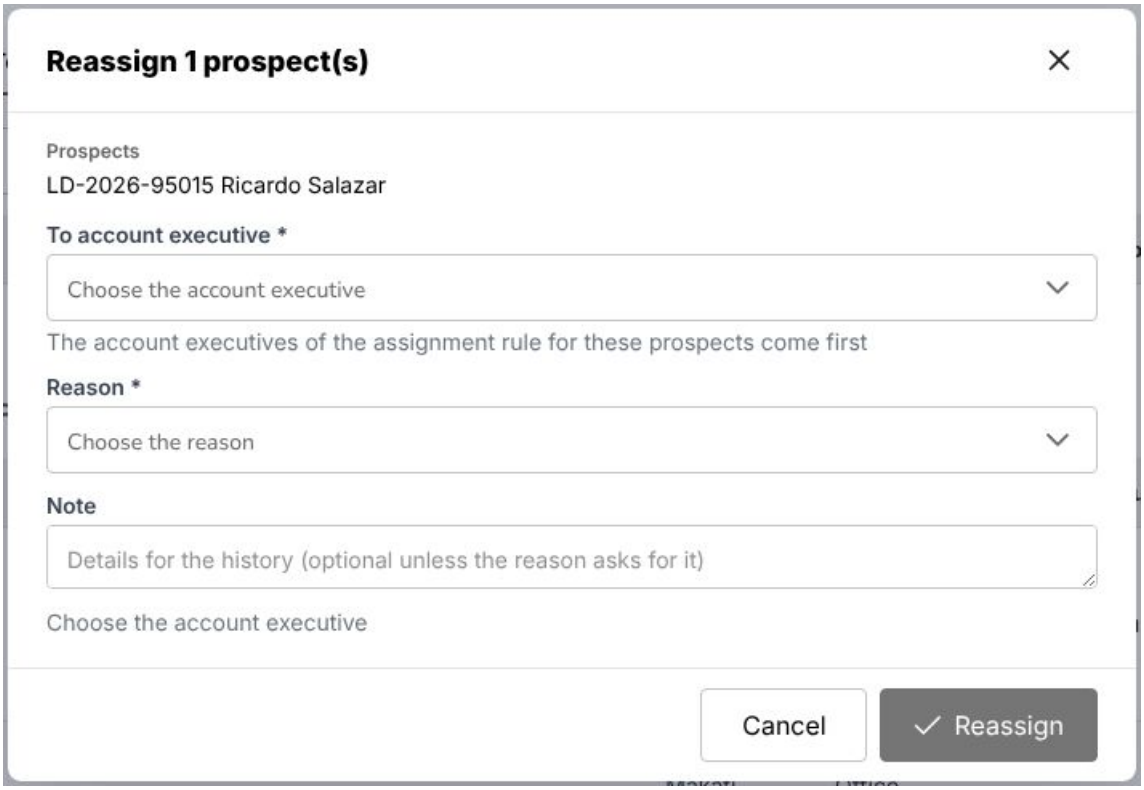

Figure 5.3: Reassign a prospect: the new account executive and the reason are required

The **Reassignment Queue** tab lists the prospects waiting for an account executive, with the reason they are there (for example, no active account executive in the matching rule). Assign them the same way.

5.7.5 Maintain the assignment rules

The first active rule, by priority, whose conditions match a new prospect gives it an account executive. A rule with empty conditions matches every prospect. When no rule matches, the prospect stays with the user who created it.

1. Choose Operations > Sales & Marketing > Lead Assignment and open the **Assignment Rules** tab.
2. Select **Add rule**, or the pencil icon of a rule to change it.
3. Enter the name and the conditions: branch, line of business, product, lead source, category, distribution channel (for example **TFS Head Office (Metro Manila loans)** or a TFS branch), province and city. Choose the method: **Round robin** (the next account executive in turn), the account executive with the fewest open prospects, or always the first account executive. Select the account executives who receive the prospects.
4. Save the rule. Use the arrows to change its priority and the **Active** switch to stop or restart it.

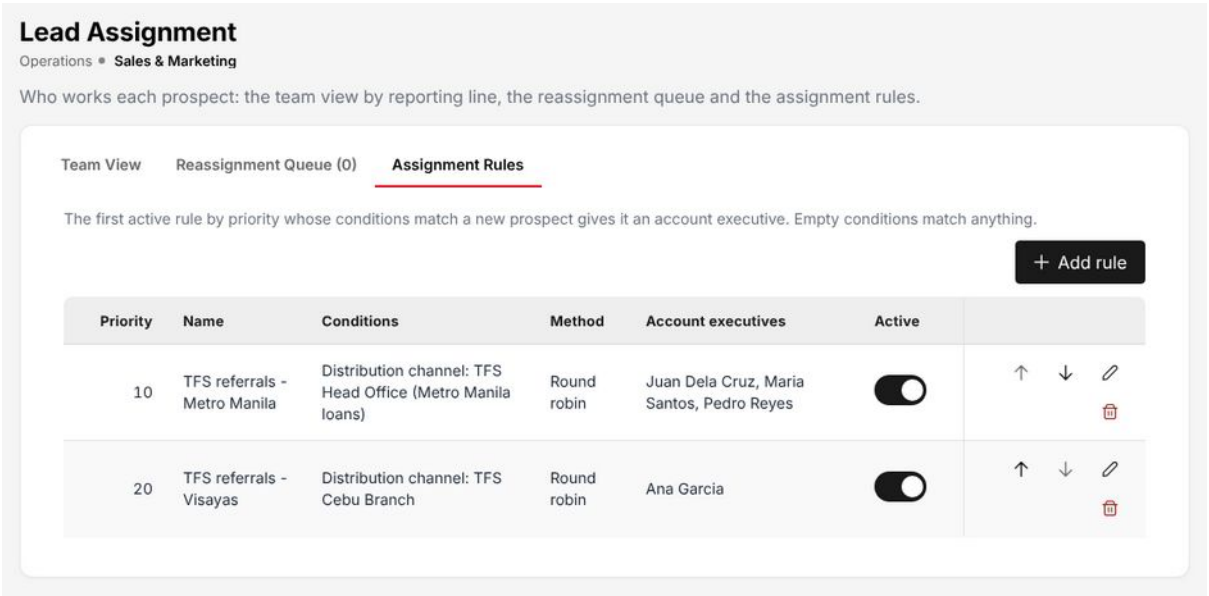

Figure 5.4: Operations > Sales & Marketing > Lead Assignment, the assignment rules of the TFS referrals by TFS office

6. TIS Sales Unit Head

6.1 Role summary

Department: Sales. As the Sales Officer, plus telesales incentives and supplier invoice approval.

The TIS Sales Unit Head heads the sales unit. You have every right of the TIS Sales Officer (the sales work, lead assignment, campaigns and the checker's decisions of the sales chain) and, in addition, you run and approve the telesales incentives of the sales force and approve the supplier invoices of the unit before they are posted.

You work with the TIS Sales Officers and TIS Sales Associates of the unit, with the TIS Operations Unit Head on the renewals escalated to you, and with TIS Finance & General Accounting, who records the supplier invoices you approve and pays them. You never decide a record you entered yourself.

6.2 Menus available

The menus of this role as delivered. Access: View (open and read), Create and edit (enter and change records), Approve (decide the records of other users).

6.4 Approvals

This role approves the work of other users:

- Approve or reject an incentive calculation batch submitted by another user
- Approve supplier invoices (not the preparer)
- Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user
- Approve a quotation created by another user
- Approve or return renewal terms of another user

Who approves the work of this role:

Work	Approval	Approved by
Incentives	Approve or reject an incentive calculation batch submitted by another user	TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager

The user who enters a record never approves it: the approval is always another user's.

6.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Policies (create and edit), Quotations and placement (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Placing and paying insurers	Quotations and placement (create and edit), Policies (create and edit) with Remittance and insurer reconciliation (create and edit), Disbursements and petty cash (create and edit) held by the same person	Warning	The person who places business with an insurer should not also prepare the payments to insurers
Receipting and selling	Quotations and placement (create and edit), Policies (create and edit) with Receipts (create and edit) held by the same person	Warning	The person who issues receipts and posts cash should not also sell or issue the policies paid for

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

6.6 Daily and periodic tasks

Task	When	Screen
Work through the approvals and the records waiting for you	Every morning and through the day	My Work (2.3)
Approve or return the renewal terms submitted by the unit	Daily	Negotiations (18.18)
Check the e-policies received against their placement slips	Daily	Placement Slips (18.5)
Follow up the renewals escalated to you	As notified	At-Risk Policies (18.16)
Approve or reject the supplier invoices recorded by Finance	As notified	Payables (19.6)
Review the team assignment and the reassignment queue	Weekly	Lead Assignment (18.6)
Run the incentive calculation of the month and submit it	Month-end, after the month's policies are booked	Incentive (19.23)
Approve or reject the incentive calculation submitted by another user	Month-end	Incentive (19.23)
Mark the approved incentives as paid	When paid	Incentive (19.23)
Run the incentive and production reports	Month-end	Incentive (19.23), All Reports (23.1)

The sales work, lead assignment, campaigns, the check of the e-policies and the approval of renewal terms follow the procedures of the TIS Sales Associate (4.7) and the TIS Sales Officer (5.7).

6.7 Procedures

6.7.1 Follow an escalated renewal

An account executive escalates an at-risk renewal from At-Risk Policies. The escalation goes to the account executive's manager (the reporting line of the user); when the

account executive reports to no one, it goes to the TIS Sales Unit Head and the TIS Operations Unit Head. You receive the notification "Renewal … escalated".

1. Open the notification. At-Risk Policies opens.
2. Check the risk factors of the renewal (premium increase, claims, unpaid premium, no contact, expiry) and the suggested actions.
3. Agree the next step with the account executive and record it on the renewal timeline on Negotiations (18.18).

6.7.2 Run the incentive calculation

The incentive programmes give the sales force (TIS Sales Associates, Sales Officers and Sales Unit Heads) a payout by the tier their achievement reaches. A program is calculated once per calculation period (month, quarter, half or year); a quarterly program is run in the last month of its quarter.

1. Choose Accounts > Incentive > Calculations and select **New Calculation**.
2. Choose the month and the programs to calculate. The system computes each account executive's achievement over the program's period and the payout of the tier reached. A run with no agent line is refused.
3. Open the batch (**View Details**) and check the agent lines. Select **Adjust** on a line to change its payout: the adjustment takes a reason of the reason list and a note, and the user who adjusted it is kept.
4. Select **Submit for approval**. The batch is **Pending Approval**.

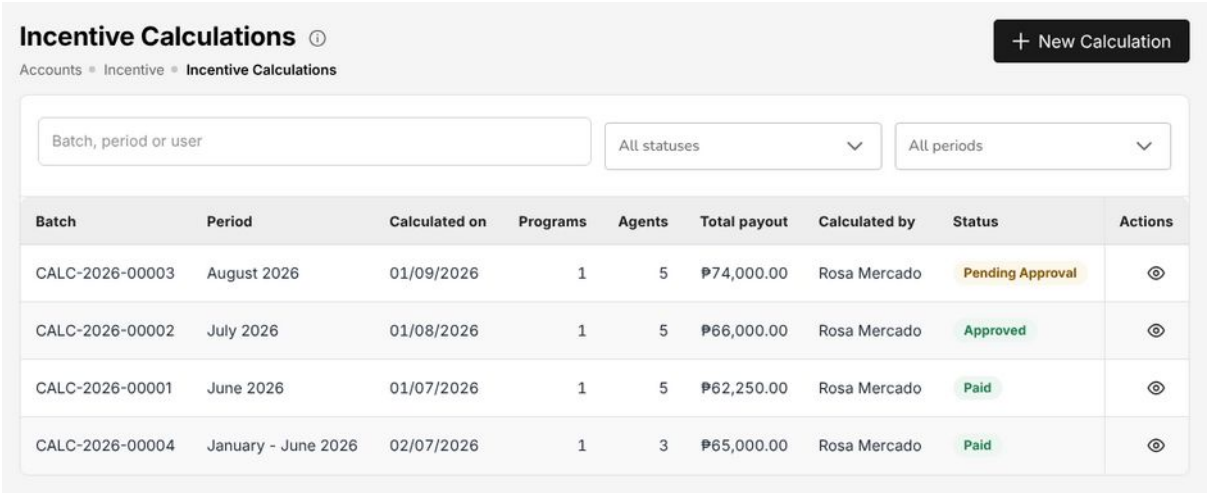

Figure 6.1: Accounts > Incentive > Calculations, the monthly batches with their payout, the user who calculated them and their status

6.7.3 Approve an incentive calculation

A batch is approved or rejected by a user other than the one who ran it, adjusted its lines or submitted it. The batches waiting for you are also listed in My Work.

1. Choose Accounts > Incentive > Approvals. The board shows the batches pending approval, the pending amount and how long each has been waiting.

2. Select **View Details** on the batch. Check the period, the programs, the total payout and the agent results (achievement, tier, adjustment and payout of each account executive).
3. Select **Approve batch**, or **Reject** and give the reason of the rejection.

The approval posts the incentive accrual. The batch is then **Approved**; when the incentives have been paid, open the batch on Calculations and select **Mark as paid**, which posts the payment.

> *Only the TIS Sales Unit Head runs and approves incentive calculations, and never the same batch: one Sales Unit Head runs and submits the batch, another approves it.*

Each account executive follows their own progress on Accounts > Incentive > My Programs and their earnings and payments on Accounts > Incentive > Statement.

7. TIS Operations Associate

7.1 Role summary

Department: Operations. Placements, policies, endorsements, renewals and claims; no approvals.

The TIS Operations Associate does the day-to-day operations work after the sale. You send the placement slips to the insurers, record their acknowledgements, upload the insurers' e-policies and book the policies once they have been checked. You issue cover notes and CTPL certificates, raise endorsements and cancellations, prepare renewals, and register and follow up claims, their documents and motor repairs up to the insurer's settlement.

You work with the TIS Sales Associate and TIS Sales Officer, who quote and close the business, and with the TIS Operations Unit Head, who checks the e-policies, decides the claims and approves your renewal terms, cancellations and return premiums. Cash Control (the CCD roles) collects the premiums that your bookings bill to the client.

7.2 Menus available

The menus of this role as delivered. Access: View (open and read), Create and edit (enter and change records), Approve (decide the records of other users).

7.4 Approvals

This role approves nothing.

Who approves the work of this role:

Work	Approval	Approved by
Claims	Claim decisions: review, reject, settle, approve a settlement, close	TIS Operations Unit Head or TIS General Manager
Policies	Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Quotations and placement	Approve a quotation created by another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Renewals	Approve or return renewal terms of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Operations > Claims > Settlement approval	Claim settlement approval within the approver's limit	TIS Operations Unit Head or TIS General Manager
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Operations > Sales & Marketing > Quotations > Underwriting referral	Underwriting referral approval within the approver's limit	TIS Operations Unit Head

The user who enters a record never approves it: the approval is always another user's.

7.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Policies (create and edit), Quotations and placement (create and edit), Claims (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Claims and payment	Claims (create and edit) with Disbursements and petty cash (create and edit) held by the same person	Warning	The claims handler should not also prepare the claim payments

Rule	Conflict	When given together	Reason
Placing and paying insurers	Quotations and placement (create and edit), Policies (create and edit) with Remittance and insurer reconciliation (create and edit), Disbursements and petty cash (create and edit) held by the same person	Warning	The person who places business with an insurer should not also prepare the payments to insurers
Receipting and selling	Quotations and placement (create and edit), Policies (create and edit) with Receipts (create and edit) held by the same person	Warning	The person who issues receipts and posts cash should not also sell or issue the policies paid for

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

7.6 Daily and periodic tasks

Task	When	Screen
Work through the placement slips, renewals, endorsements and claims assigned to you	Every morning and through the day	My Work (2.3)
Send new placement slips to the insurers and record their acknowledgements	Daily	Placement Slips (18.5)
Upload the e-policies received from the insurers	Daily, as they arrive	Placement Slips (18.5), Record e-Policy (18.5.1)
Book the policies checked against the slip	Daily	Placement Slips (18.5)
Issue cover notes while the insurer's policy is pending; follow up those expiring	Daily	Cover Notes (18.20)
Register new claims and advise the insurers	Daily, as clients report losses	Policy (18.10), Claims (18.13)
Collect claim documents and remind claimants	Daily	Claims Awaiting Documents (18.22)
Record repair estimates, adjuster decisions, letters of authority and vehicle releases	Daily	Motor Claim Repairs (18.23)
Raise endorsements and cancellations requested by clients	As requested	Policy (18.10), Policy Cancellation (18.21)
Check the payment status of policies before an endorsement or a claim	As needed	Payments (18.19)
Send renewal notices and prepare the renewal quotations	Weekly, for policies expiring in the next 90 days	Renewal Queue (18.16), Renewal Batch (18.15)
Follow up lapsed policies and the policies in their grace period	Weekly	Lapse Management (18.15)
Maintain fleet schedules and marine open covers of corporate clients	As requested	Fleet Schedules (18.11), Marine Open Covers (18.12)
Run the claims and renewal reports	Month-end	All Reports (23.1)

7.7 Procedures

7.7.1 Start the day from My Work

1. Choose **My Work**. **Mine** lists the records you own; **Everyone** lists the open work of all users.
2. Select a category on the left (**Placement slips**, **Renewals**, **Endorsements**, **Claims**, **Missing documents**) to narrow the list. The **Next action** column says what the

record waits for, for example "Obtain and upload the e-policy" or "Check the e-policy against the slip".

3. Select the arrow at the end of a row to open the record on its screen.

See My Work (2.3) for the filters, tasks and calendar.

7.7.2 Place the business with the insurer

The quotation accepted by the client raises a placement slip with the status **Placement raised**. See Placement Slips (18.5) for the whole screen.

1. Choose Operations > Sales & Marketing > Placement Slips and open the placement slip.
2. Check the insurer, its share, the sum insured and the premium under **Security (participating insurers)**.
3. Select **Send to insurer(s)**. Each participating insurer receives the slip of its share by e-mail. The status becomes **Sent to insurer**.
4. When the insurer confirms the order, select **Record acknowledgement**, type the **Insurer acknowledgement reference** and select **Record acknowledgement** in the dialog. The status becomes **Acknowledged**.
5. When the e-policy arrives, select **Upload e-policy**. Attach the **e-Policy file**, type the **Insurer policy number**, check the **Participant name (insured on the policy)**, the **Sum insured**, **Net premium**, **Gross premium**, **Commission** and the dates against the e-policy, and correct the **Chassis number**, **Engine / motor number** and **Plate number** or **MV file number** to those on the e-policy. The plate number or the MV file number is required, even where the quotation said TBA.
6. Select **Save e-policy**. The status becomes **e-Policy received**.

> *The e-policy you uploaded is checked against the slip by another user: the TIS Operations Unit Head, the TIS Sales Officer, the TIS Sales Unit Head or the TIS General Manager. You cannot check your own upload.*

If the insurer declines, select **Record decline** in the insurer's row. To stop a placement, select **Cancel slip**.

7.7.3 Book the policy

Once the placement slip is **Checked against slip**:

1. Open the placement slip and select **Book (Insurer issued)**.
2. Check the client's ID details shown in the dialog: for a motor policy the ID type, the ID number and the ID card image are required, with the chassis number, engine number and plate or MV file number.
3. Select **Book (Insurer issued)** in the dialog.

The system creates the policy, the bill (or, for a direct-bill insurer, the commission receivable from the insurer), the journal and the commission lines, ends the cover notes of the risk and e-mails the policy schedule with the e-policy to the client. The placement slip becomes **Insurer issued (Booked)**. See Book the policy (3.6.1).

7.7.4 Issue a cover note or authenticate a CTPL certificate

1. Choose Operations > Cover Notes and select **Issue cover note**.
2. Select the quotation or the placement slip in the list. The list offers the accepted and approved quotations and the placement slips already with the insurer.
3. Enter **Cover from** and **Cover period (days)**, and the **Insurer binder reference** and **Special conditions** where the insurer gave them.
4. Select **Issue cover note**. The cover note is **Active** until the insurer's policy is booked, which ends it, or until its end date.

7.7.5 Raise an endorsement or a cancellation

1. Choose Operations > Policy and find the policy by number or client.
2. Select **More actions** (the three dots) in the row of the policy, then **Endorsement**. The action is not offered while the policy's payment is **Pending** or **Reviewing**, or after the policy has expired, lapsed, been cancelled or renewed.
3. Enter the change and send the endorsement to the client and the insurer. The insurer receives the endorsement request with the endorsement PDF by e-mail.
4. When the insurer has issued its endorsement, upload it and complete the endorsement. The system applies the change to the policy and bills an additional premium to the client.

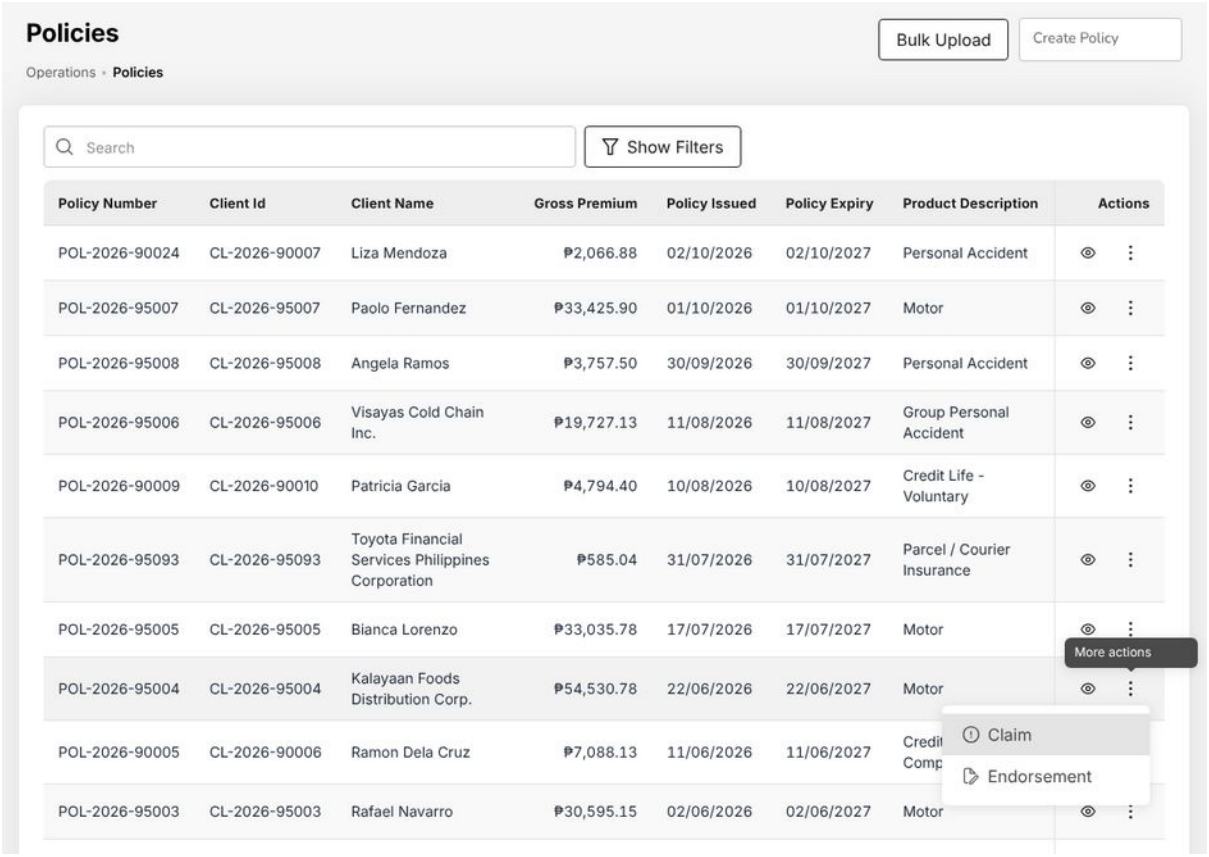

Figure 7.1: Operations > Policy with More actions open on a policy: Claim and Endorsement

To cancel a policy, choose Operations > Policy Cancellation, type the **Policy number**, the **Cancellation date** and the **Reason**, select **Compute return premium**, check the result and select **Create cancellation endorsement**.

> *A cancellation, and an endorsement that returns premium, is completed by the TIS Operations Unit Head or the TIS General Manager, never by you. They are notified when you send it. See Cancel a policy: computed return premium (18.21).*

7.7.6 Register a claim

1. Choose Operations > Policy, select **More actions** in the row of the policy, then **Claim**. The action is not offered while the policy's payment is **Pending** or **Reviewing**.
2. On **Claim notification**, check the insurer, the policy and the insured's address.
3. Under **Incident Details**, enter the **Date of loss**, the **Time of loss**, the **Cause of loss**, the **Place of loss** and the **Estimated Claim Amount**.
4. For a motor claim, complete **Driver at the time of loss** (or tick **Same as Policy Holder**) and the **Third party** where there is one.
5. Select **Next**. On **Advice to the insurer**, check the message and attach the proof of loss if you have it.
6. Select **Register claim and send**. The claim is registered with the status **Pending** and the Preliminary Loss Advice is e-mailed to the insurer.

The system refuses the claim when the premium is unpaid or the date of loss is outside the period of cover.

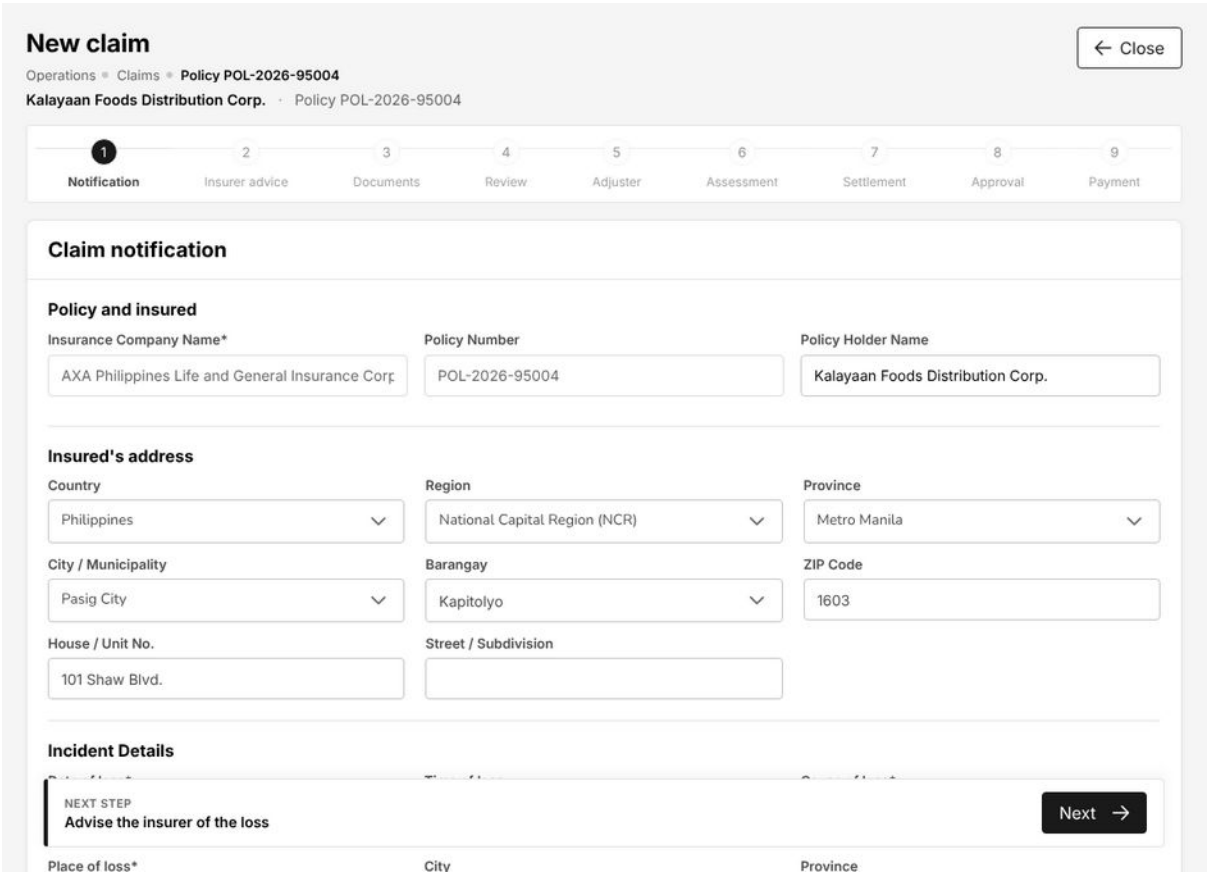

Figure 7.2: New claim from a motor policy: Claim notification, the first of the nine claim steps

7.7.7 Collect the claim documents

1. Choose Operations > Claims Awaiting Documents. **Claims missing documents** and **Ready to submit** count the open claims whose file has not gone to the insurer.
2. Select the folder icon of a claim. The checklist lists the documents of the line of business and cause of loss.
3. For each document received, select **Upload a copy** or **Mark received**. A document the claim does not need is waived with **Waive** and the reason.
4. While required documents are missing, select **Remind the claimant**. The claimant receives the list of missing documents by e-mail.
5. When the required documents are in, select **Submit to insurer**, type the **Reference (e-mail, transmittal)** and confirm. The claim file is recorded as submitted to the insurer.

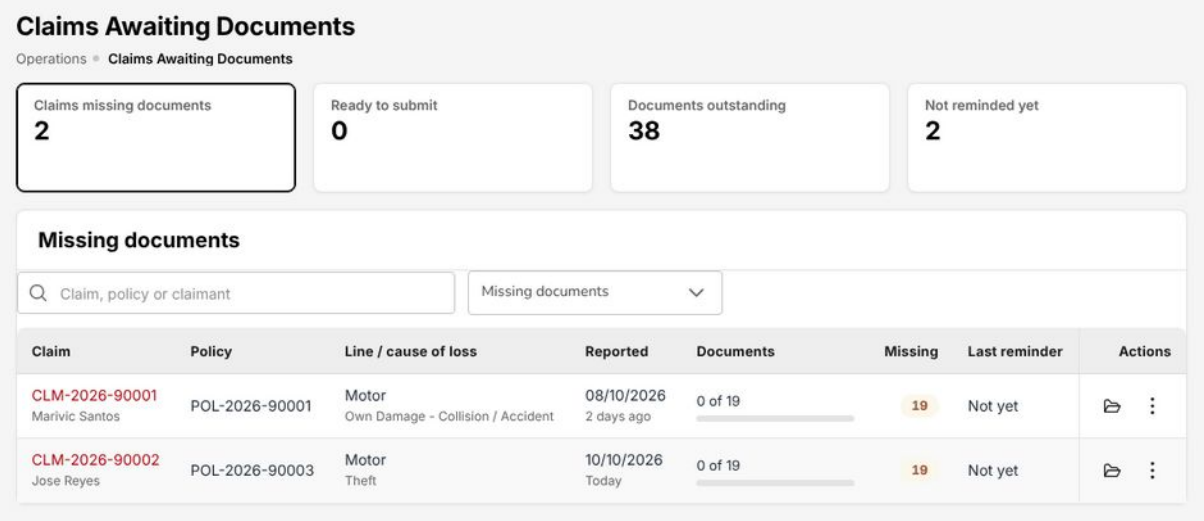

Figure 7.3: Operations > Claims Awaiting Documents with two motor claims missing documents

> *The next step, **Proceed to adjuster report** on **Review**, moves the claim to **Processing**. It is a claim decision made by the TIS Operations Unit Head or the TIS General Manager. Ask your unit head to take the claim on.*

Once the claim is **Processing**, you record the adjuster's name and report on the claim's **Adjuster** step. See Adjuster report (18.13.2).

7.7.8 Follow a motor repair

1. Choose Operations > Motor Claim Repairs. The list shows each motor claim with the stage of its repair: **No Estimate Yet**, **Awaiting approval**, **Approved**, **In repair**, **Released**.
2. Select the claim. Its repair file opens with the estimates and the letters of authority.
3. Select **Record estimate**: the accredited repair shop, the **Shop estimate no.**, the date and the amounts.
4. When the insurer's adjuster decides, select **Record adjuster decision** on the estimate: approve with the **Approved amount**, or reject with the reason.
5. Select **Issue letter of authority**. The letter goes to the shop with the participation of the insured and the amount payable by the insurer; print it from its row.
6. When the shop has finished, select **Release vehicle**, enter the release date and the person the vehicle is released to, and print the release form for the insured's signature.

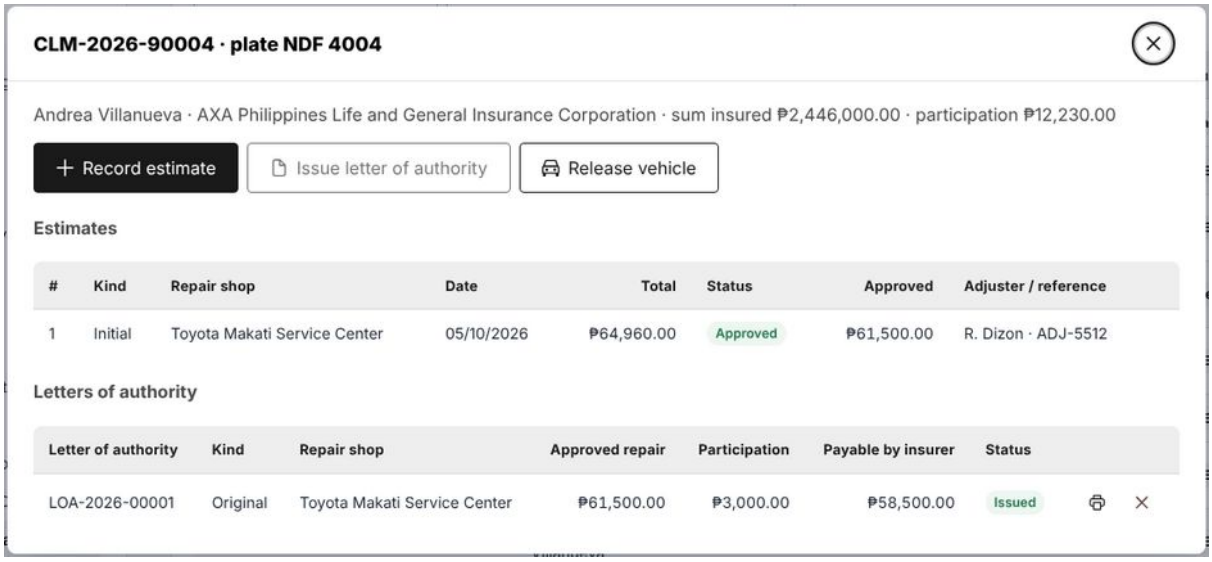

Figure 7.4: Repair file of a motor claim with Record estimate, Issue letter of authority and Release vehicle

See Motor claim repairs and letters of authority (18.23).

7.7.9 Prepare a renewal

1. Choose Operations > Renewals > Renewal Queue. The queue lists the policies due for renewal with their stage and risk.
2. In the row of a policy, open the menu and select the next notice to send it (first, second, final notice). For many policies at once, use Renewal Batch (18.15).
3. Record each call or e-mail with the client with **Record reminder**.
4. Select **Prepare renewal quote**. Go through **Policy Review**, **Premium Calculation**, **Retention Offers** and **Quote Summary**, then select **Generate Quote**.
5. Select **Send Quote**, then **Send**. The renewal terms go for approval with the status **Pending Approval**; the unit heads are notified.
6. When the terms are **Approved**, select **Complete renewal** in the queue. The system creates the new policy term, marks the expiring policy renewed and raises the premium to collect.

If the terms are rejected, the renewal comes back to you to prepare again. Price discussions with the client are logged on Negotiations (18.18).

When the system refuses one of these actions, see When the system refuses an action (2.13).

8. TIS Operations Officer

8.1 Role summary

Department: Operations. As the Operations Associate, plus reading journal vouchers and fixed assets.

The TIS Operations Officer does the same operations work as the TIS Operations Associate: placement with the insurers, e-policies and policy booking, cover notes and CTPL certificates, endorsements and cancellations, renewals, claims, claim documents and motor repairs. In addition, you can open the journal vouchers and the fixed asset register, so you can answer questions on the accounting of a booking or a claim without asking Finance.

Like the associate, you approve nothing: the e-policies you upload, the claim decisions, your renewal terms and the cancellations you raise are decided by the TIS Operations Unit Head (or the other approvers named below). You work with the TIS Sales roles, who close the business, with Cash Control, who collects the premiums, and with TIS Finance & General Accounting, who owns the journals.

8.4 Approvals

This role approves nothing.

Who approves the work of this role:

Work	Approval	Approved by
Claims	Claim decisions: review, reject, settle, approve a settlement, close	TIS Operations Unit Head or TIS General Manager
Policies	Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Quotations and placement	Approve a quotation created by another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Renewals	Approve or return renewal terms of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Operations > Claims > Settlement approval	Claim settlement approval within the approver's limit	TIS Operations Unit Head or TIS General Manager
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Operations > Sales & Marketing > Quotations > Underwriting referral	Underwriting referral approval within the approver's limit	TIS Operations Unit Head

The user who enters a record never approves it: the approval is always another user's.

8.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Policies (create and edit), Quotations and placement (create and edit), Claims (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Claims and payment	Claims (create and edit) with Disbursements and petty cash (create and edit) held by the same person	Warning	The claims handler should not also prepare the claim payments
Placing and paying insurers	Quotations and placement (create and edit), Policies (create and edit) with Remittance and insurer reconciliation (create and edit), Disbursements and petty cash (create and edit) held by the same person	Warning	The person who places business with an insurer should not also prepare the payments to insurers
Receipting and selling	Quotations and placement (create and edit), Policies (create and edit) with Receipts (create and edit) held by the same person	Warning	The person who issues receipts and posts cash should not also sell or issue the policies paid for

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

8.6 Daily and periodic tasks

Task	When	Screen
Work through the placement slips, renewals, endorsements and claims waiting for you	Every morning and through the day	My Work (2.3)
Send placement slips, record acknowledgements, upload e-policies, book checked policies	Daily	Placement Slips (18.5)
Issue cover notes and authenticate CTPL certificates	Daily	Cover Notes (18.20)
Register claims, collect their documents, follow motor repairs	Daily	Claims (18.13), Claims Awaiting Documents (18.22), Motor Claim Repairs (18.23)
Raise endorsements and cancellations	As requested	Policy (18.10), Policy Cancellation (18.21)
Send renewal notices and prepare renewal quotations	Weekly	Renewal Queue (18.16)
Look up the journal of a booking, an endorsement or a claim settlement	When a client, an insurer or Finance asks	Journal Voucher (19.12)
Follow the work in flight and the claims position	Weekly	Processing Dashboard (20.3), Claims Dashboard (20.2)
Run the production, claims and renewal reports	Month-end	All Reports (23.1)

8.7 Procedures

The operations procedures of this role are those of the TIS Operations Associate:

- Start the day from My Work (7.7.1)
- Place the business with the insurer (7.7.2)
- Book the policy (7.7.3)
- Issue a cover note or authenticate a CTPL certificate (7.7.4)

- Raise an endorsement or a cancellation (7.7.5)
- Register a claim (7.7.6)
- Collect the claim documents (7.7.7)
- Follow a motor repair (7.7.8)
- Prepare a renewal (7.7.9)

The same rules apply: the e-policy you upload is checked by another user, claim decisions (moving a claim to processing, submitting the settlement, rejecting) are made by the TIS Operations Unit Head or the TIS General Manager, and a cancellation or return premium you raise is completed by another user.

8.7.1 Look up the journal of a transaction

1. Choose Accounts > Journal Voucher.
2. In **Search Transactions**, type the journal number or a word of the description; use **Search by** to search on another column.
3. Select the eye icon in **View** to open the journal with its lines (accounts, cost centre, debit and credit).
4. To see the journals the system has parked for approval, tick **System journals parked for approval**.

The status column shows **Posted** for a journal in the books and **Awaiting approval** for one waiting for the TIS Finance & General Accounting approver.

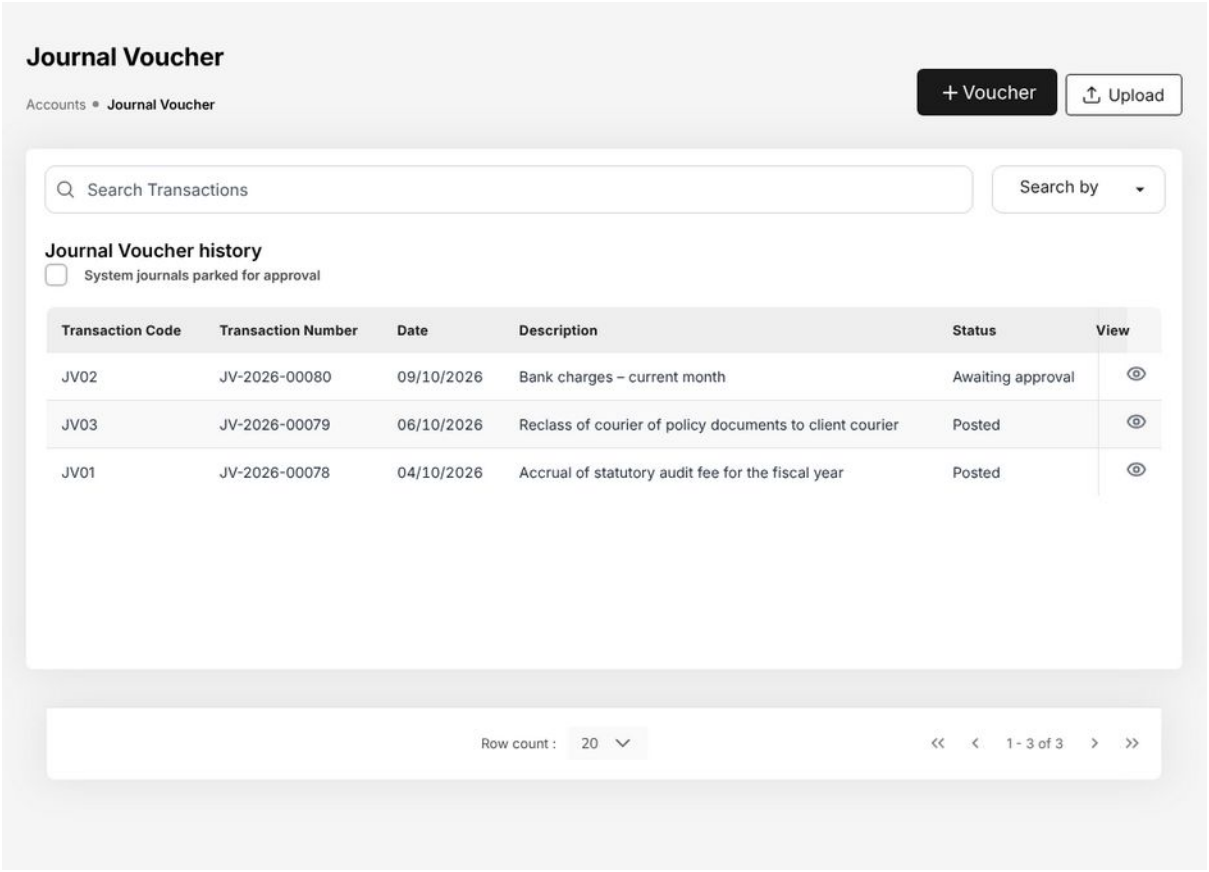

Figure 8.1: Accounts > Journal Voucher as the TIS Operations Officer: the journal history with its status

> *Your access to journal vouchers is View only. The **Voucher** and **Upload** buttons are for TIS Finance & General Accounting: the system refuses a voucher entered or uploaded by your role. See Journal vouchers (19.12).*

9. TIS Operations Unit Head

9.1 Role summary

Department: Operations. As the Operations Officer, plus approving quotations, placements, renewals and claims.

The TIS Operations Unit Head runs the operations team and is its checker. You check the insurers' e-policies against the placement slips, make the claim decisions (taking a claim into processing, submitting the settlement, rejecting it) and approve the claim settlements, approve the renewal terms and the quotations of other users, decide the underwriting referrals of the acceptance rules, complete the cancellations and return premiums raised by your team, and approve supplier invoices.

You can do the operations work of your team yourself, but you never approve your own work: a settlement, renewal, quotation or e-policy check you entered goes to another approver, usually the TIS General Manager. You work with the TIS Operations Associate and Officer, whose work you check, with the TIS Sales Unit Head, who shares the approval of quotations and renewals, and with the TIS General Manager.

9.4 Approvals

This role approves the work of other users:

- Claim decisions: review, reject, settle, approve a settlement, close
- Approve or reject a rate change, reversal or withholding tax change on a commission line requested by another user
- Approve another user's data load and its undo, sign reconciliations, vote Go / No-Go, approve the go-live lock
- Approve or reject an incentive calculation batch submitted by another user
- Approve supplier invoices (not the preparer)
- Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user
- Approve a quotation created by another user
- Approve or return renewal terms of another user

Approval limits of this role on the Authority Matrix:

Transaction	Approval step	Limit of the role
Claim settlement approval	Operations > Claims > Settlement approval	PHP 500,000.00
Underwriting referral approval	Operations > Sales & Marketing > Quotations > Underwriting referral	Not set: no amount limit applies

Who approves the work of this role:

Work	Approval	Approved by
Claims	Claim decisions: review, reject, settle, approve a settlement, close	TIS Operations Unit Head or TIS General Manager
Policies	Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Quotations and placement	Approve a quotation created by another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Renewals	Approve or return renewal terms of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Operations > Claims > Settlement approval	Claim settlement approval within the approver's limit	TIS Operations Unit Head or TIS General Manager

Work	Approval	Approved by
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Operations > Sales & Marketing > Quotations > Underwriting referral	Underwriting referral approval within the approver's limit	TIS Operations Unit Head

The user who enters a record never approves it: the approval is always another user's.

9.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Policies (create and edit), Quotations and placement (create and edit), Claims (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Claims and payment	Claims (create and edit) with Disbursements and petty cash (create and edit) held by the same person	Warning	The claims handler should not also prepare the claim payments
Load and approve migration data	Data migration and go-live (approve) with Data migration and go-live (create and edit) held by the same person	Warning	The person who uploads and submits a data load should not also approve it; named cutover administrators are recorded as exceptions until the end of hypercare
Placing and paying insurers	Quotations and placement (create and edit), Policies (create and edit) with Remittance and insurer reconciliation (create and edit), Disbursements and petty cash (create and edit) held by the same person	Warning	The person who places business with an insurer should not also prepare the payments to insurers
Receipting and selling	Quotations and placement (create and edit), Policies (create and edit) with Receipts (create and edit) held by the same person	Warning	The person who issues receipts and posts cash should not also sell or issue the policies paid for

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

9.6 Daily and periodic tasks

Task	When	Screen
Decide the claim settlements and renewal terms waiting for you	Every morning and through the day	My Work (2.3) (**Approvals**)
Check the e-policies received against the placement slips	Daily, as the team uploads them	Placement Slips (18.5)
Take registered claims into processing; reject claims the insurer repudiates	Daily	Claims (18.13)
Submit the settlements agreed by the insurers	Daily	Assessment and settlement (18.13.3)

Task	When	Screen
Approve the claim settlements of other users	Daily	Approve a settlement (18.13.4)
Complete the cancellations and return premiums raised by the team	Daily	Policy (18.10), Policy Cancellation (18.21)
Approve or return renewal terms	Daily	Negotiations (18.18)
Approve quotations and decide underwriting referrals	As referred	Quotations (18.4)
Approve supplier invoices	As submitted	Payables (19.6)
Review the renewals at risk and the escalations from the team	Weekly	At-Risk Policies (18.16)
Review the team's workload, open claims and claims ageing	Weekly	Processing Dashboard (20.3), Claims Dashboard (20.2)
Review the claims, renewal and production reports	Month-end	All Reports (23.1)

9.7 Procedures

For the operations work you do yourself, follow the procedures of the TIS Operations Associate (7.7).

9.7.1 Work through your approvals

1. Choose **My Work** and select **Approvals**. The list shows the claim settlements and renewal terms waiting for your decision, with the amount and the due date. Records you submitted yourself are not listed.
2. Select the arrow at the end of a row. A claim settlement opens on the claim, ready to decide. A renewal opens the **Negotiations** list without a selection: select the renewal there by its number (RN-YYYY-NNNNN), shown in the row of My Work.
3. For the e-policies to check, the cancellations to complete and the claims to take into processing, select **Everyone**, then **Placement slips**, **Endorsements** or **Claims**.

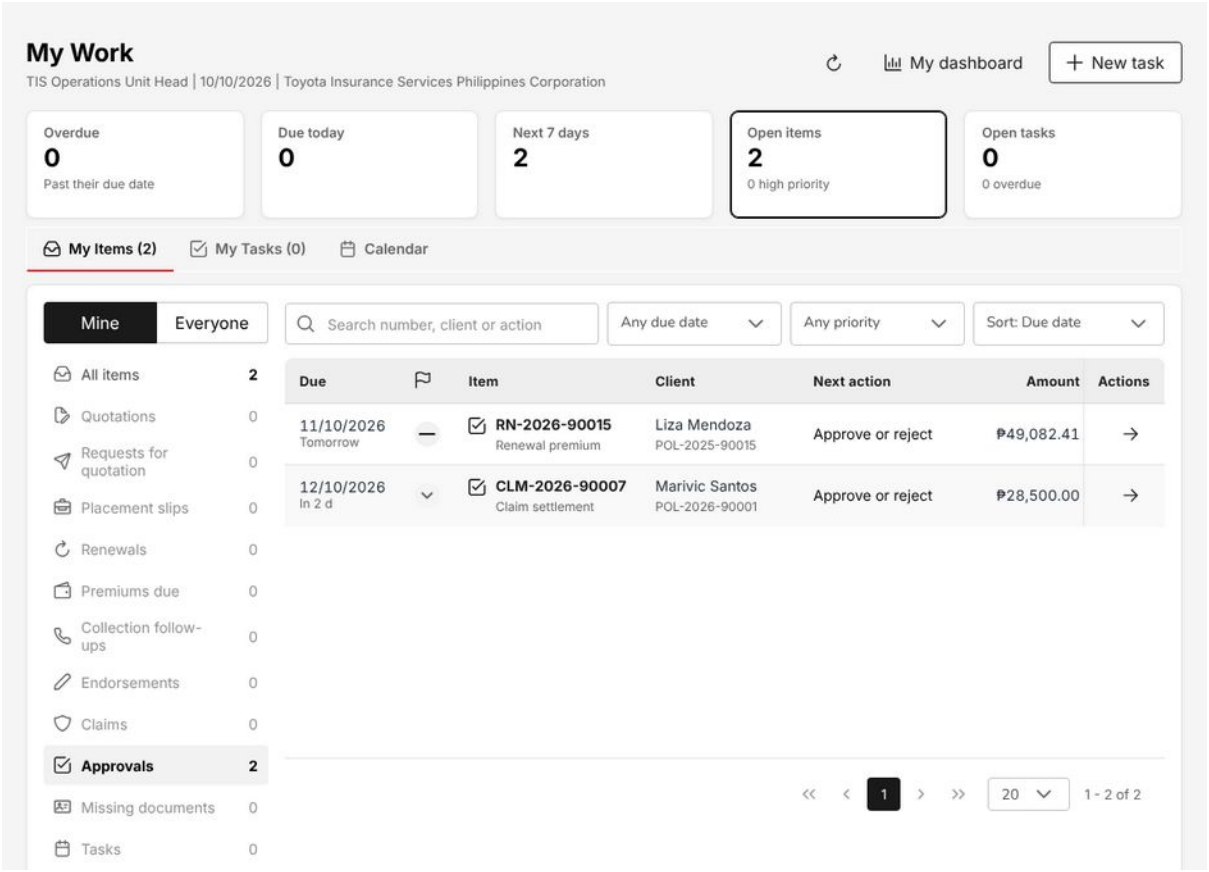

Figure 9.1: My Work of the TIS Operations Unit Head: a renewal premium and a claim settlement to approve

9.7.2 Check an e-policy against the slip

1. Choose Operations > Sales & Marketing > Placement Slips and open a placement slip with the status **e-Policy received**.
2. Select **Check against slip**. The dialog shows the **Insurer policy number**, who recorded the e-policy, and each item on the placement slip and on the e-policy with the **Difference** and the result **Matches** or **Differs**. Amounts within PHP 1.00 of the slip match.
3. Decide:
   - **Confirm check** when every item matches.
   - **Accept differences** when the e-policy differs but is right. Type the **Reason**.
   - **Return to insurer** when the e-policy is wrong. Type the **Reason**. The lead insurer receives the discrepancy by e-mail and the team uploads the corrected e-policy when it arrives.

After **Confirm check** or **Accept differences**, the status is **Checked against slip** and the policy can be booked. You cannot check an e-policy you uploaded yourself. See Check the e-policy against the slip (3.5.1).

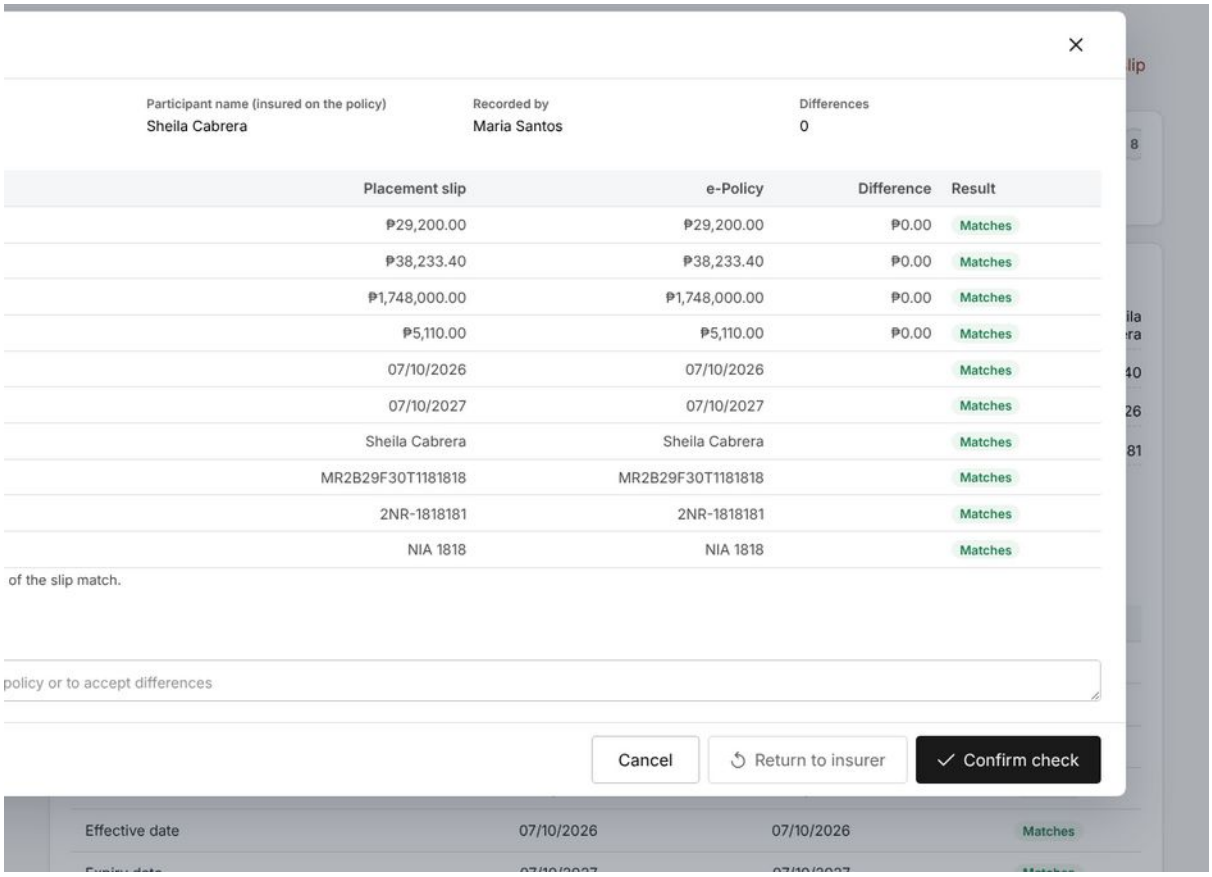

Figure 9.2: Check against slip: every item of the e-policy matches the placement slip

9.7.3 Take a claim into processing or reject it

1. Choose Operations > Claims and open a **Pending** claim.
2. Select **Continue: Review** at the foot of the claim (or **Continue claim** in the row menu of the list). The claim is at **Review** once its file has gone to the insurer.
3. Check what was reported and select **Proceed to adjuster report**. The claim becomes **Processing** and the team records the adjuster's report.
4. On **Assessment**, check the key facts and the **Assessment basis** (date reported, adjuster and adjuster status).
5. Select **Proceed to settlement** to enter the settlement, or **Reject claim** when the insurer repudiates it: pick the **Repudiation reason** or type the **Reason for rejection**. A rejected claim is **Rejected**.

9.7.4 Submit a settlement

1. On **Settlement**, select the **Settlement type**, type the settlement amount agreed by the insurer and the **Issue date** and **Settlement date**, and attach the settlement documents. For co-insurance the screen shows each insurer's share of the amount.
2. Select **Submit settlement**. The claim becomes **Pending Approval**.

The amount cannot exceed the policy's sum insured. A settlement you submit is approved by another holder of the claim decision right: the TIS General Manager, or another TIS Operations Unit Head user.

9.7.5 Approve a claim settlement

1. In **My Work**, open the **Claim settlement** item, or open the claim on Operations > Claims and select **Continue: Approval**.
2. On **Settlement approval**, check the **Settlement to approve**: date reported, adjuster, adjuster status, **Settlement type** and **Settlement amount**.
3. Select **Approve settlement**, or **Return for correction** to send it back to **Processing**. The decision takes effect at once, without a confirmation.

On approval the claim is settled at once and the user who submitted it is notified. You cannot approve a settlement you submitted. When the Authority Matrix sets you a limit for claim settlements, the amount must be within it.

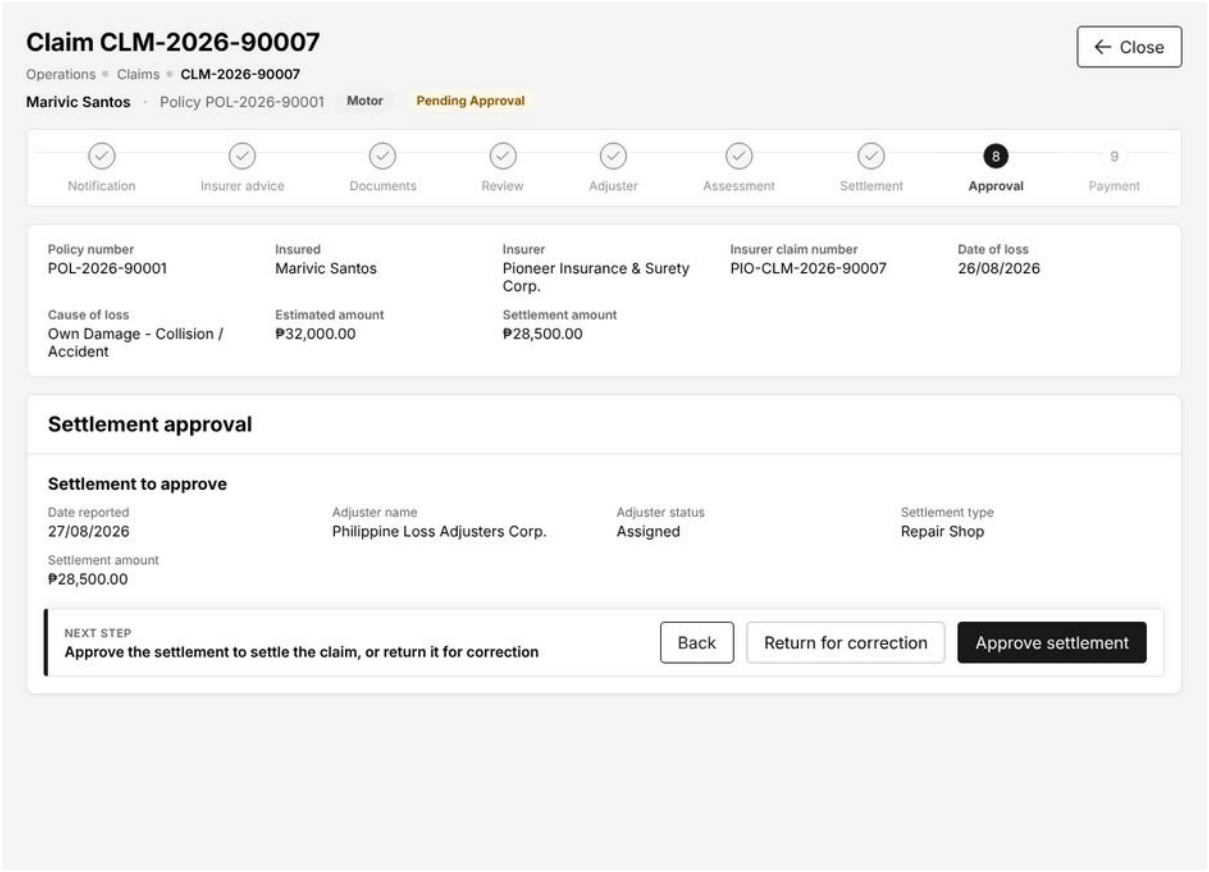

Figure 9.3: Settlement approval of a motor claim with Return for correction and Approve settlement

9.7.6 Complete a cancellation or a return premium

When a user of your team sends a cancellation, or an endorsement that returns premium, you receive a notification.

1. Open the notification, or choose **My Work**, select **Everyone** and **Endorsements**, and open the item with the next action "Complete the cancellation".
2. Check the return premium, the reason and the insurer's endorsement.
3. Complete the endorsement. The system applies the cancellation or the return premium to the policy and the commission already paid on it is clawed back.

You cannot complete a cancellation or return premium you raised yourself. When the Authority Matrix sets you a limit for return premiums, the amount must be within it. See Cancel a policy: computed return premium (18.21).

9.7.7 Approve or reject renewal terms

1. Choose Operations > Renewals > Negotiations and select **Pending approval** (the arrow of a **Renewal premium** item in My Work opens the same list).
2. Select the renewal by its number. The side panel shows the **Renewal terms** (product, insurer, expiry, current and proposed premium, the premium change) and the timeline of notices and negotiations.
3. Select **Approve**, or **Reject** with a note. The decision takes effect at once, without a confirmation.

An approved renewal is completed by the team on the Renewal Queue. You cannot approve terms you submitted yourself.

9.7.8 Approve a quotation or an underwriting referral

Quotations created by other users are approved on Quotations (18.4). You cannot approve a quotation you created.

When an acceptance rule of the product refers a quotation, the quotation shows the panel **Underwriting referral** with the status "Referred: awaiting approval", the **Referral reasons** and the loadings added by the rules. The quotation cannot be sent to the client, approved, placed or issued until the referral is decided.

1. Choose Operations > Sales & Marketing > Quotations and open the quotation.
2. In **Underwriting referral**, check the reasons and the sum insured, type the **Insurer underwriter reference** and the **Remarks**.
3. Select **Approve referral**, or **Decline referral**. A declined referral rejects the quotation.

The referral is decided by the role named as the authority of the acceptance rule; when the Authority Matrix sets you a limit for underwriting referrals, the referral must be within it.

10. CCD-PDU (Post-Dated Cheques)

10.1 Role summary

Department: Cash Control. Post-dated cheques: encoding, acknowledgement, deposit and cancellation.

CCD-PDU keeps the post-dated cheques that clients hand to Toyota Insurance Services Philippines for the instalments of their premiums. You encode each client's cheques as a set against the instalments of the bill when you receive them, give the client the acknowledgement receipt, forward the cheques payable to the Insurance Partner with a transmittal, record the partner's receipt and advices, deposit the cheques payable to TISPH on their dates, and ask for the cancellation, replacement or return of cheques. Nothing is posted when a cheque is received: a cheque is accounted for when it is collected.

You work with CCD-PDC / CCD-ADA, who approves the cancellations you ask for, with CCD-BP / QRPh (Receipting), who receipts the other collections, and with CCD-Recon (Reconciliation and Reversals), who matches the deposits with the bank statement. You do not open the receipts. The TIS Operations and Sales users see the result on the policy's payment status.

10.2 Menus available

The menus of this role as delivered. Access: View (open and read), Create and edit (enter and change records), Approve (decide the records of other users).

Master data and configuration	Reference masters	View	See reference masters	No screen of its own
Basic and special access	Basic access	View	Own profile and the look-up lists of every form	No screen of its own

10.4 Approvals

This role approves nothing.

Who approves the work of this role:

Work	Approval	Approved by
Post-dated cheques	Approve or return the cancellation of a post-dated cheque requested by another user	CCD-PDC / CCD-ADA
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager

The user who enters a record never approves it: the approval is always another user's.

10.5 Segregation of duties

No delivered segregation-of-duties rule concerns this role.

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

10.6 Daily and periodic tasks

Task	When	Screen
Read the morning notifications: cheques due for deposit, cheques to follow up	Every morning	Notifications (2.4)
Encode the post-dated cheques received from clients and print their acknowledgement	Daily, as cheques arrive	Post-Dated Cheques (19.5)
Forward the cheques payable to an Insurance Partner	Daily	Post-Dated Cheques (19.5)
Record the partners' receipts and their cleared or bounced advices	As they arrive	Post-Dated Cheques (19.5)
Deposit the cheques payable to TISPH on their dates	Daily	Post-Dated Cheques (19.5)
Ask for the cancellation of a cheque; replace or return cheques	As requested	Post-Dated Cheques (19.5)
Count the cheques in the vault against the log	Month-end	Post-Dated Cheques (19.5)
Run the PDC reports	Month-end	All Reports (23.1)

10.7 Procedures

10.7.1 Find a cheque in the log

1. Choose Accounts > Post-Dated Cheques.
2. Open the tab of the cheques you look for: **At TIS**, **With partners**, **Awaiting confirmation** (dated in the past, no advice from the partner yet), **Follow-up**, **Bounced**, **Deposit due** or **All open**.
3. Type a PDC number, cheque number, client, policy or set in the search box; **Export** downloads the tab.

Select a row to see the cheque, its set with every instalment and its history.

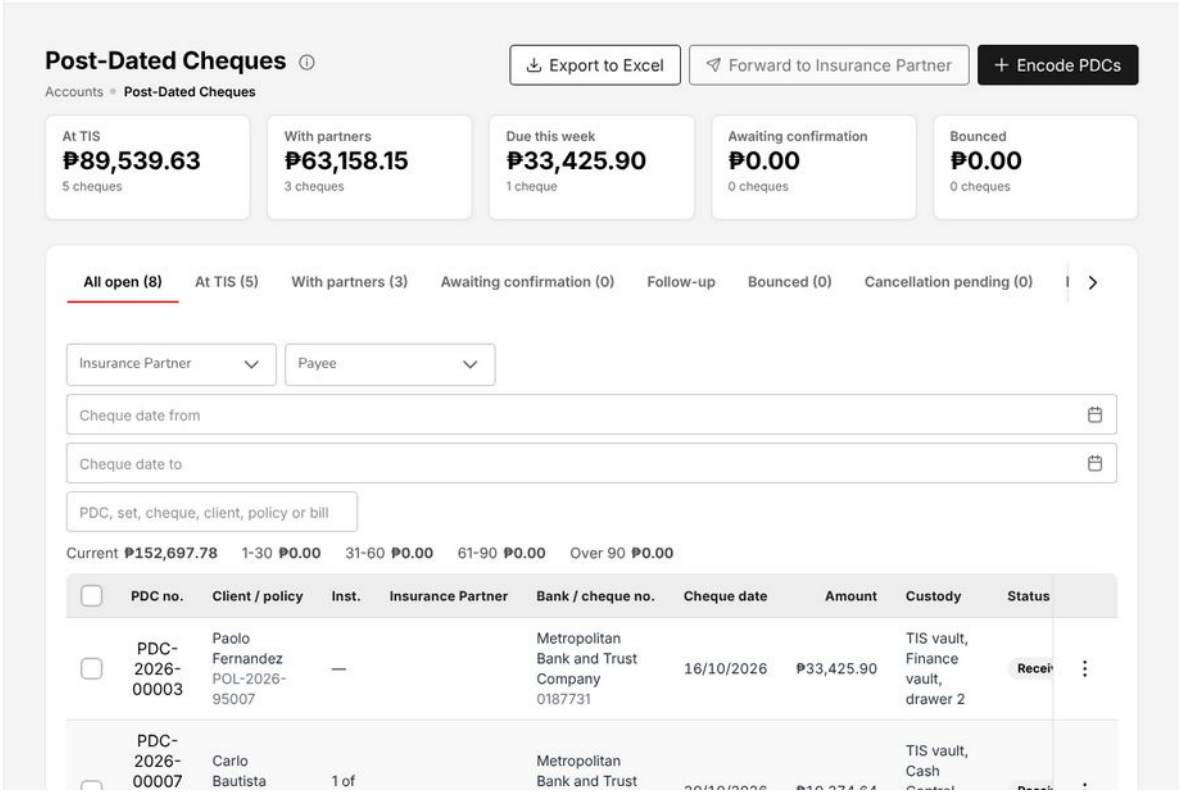

Figure 10.1: Accounts > Post-Dated Cheques, the log with its tabs

10.7.2 Encode the cheques of a client

1. Choose Accounts > Post-Dated Cheques and select **Encode PDCs**.
2. Enter the policy and choose the bill. One row is proposed per unpaid instalment, with its due date and amount.
3. Choose the payee: **Insurance Partner** (forwarded for warehousing) or **TISPH** (kept and deposited by TISPH).
4. For each cheque enter the bank, branch, account number, cheque number, cheque date and amount. **Copy down** repeats the bank details on the next rows.
5. Enter where the cheques are kept and select **Save set**. The system gives the set its number (PCS-2026-00031) and each cheque its PDC number, **Received at TIS**.
6. Open a cheque of the set and select **Print acknowledgement**: the client keeps the acknowledgement receipt.

Rule	
Cheque date	Within a few days of the instalment due date
Amounts	Not more than the bill still owes after the cheques already encoded for it
Cheques	Not the same cheque number of the same bank twice

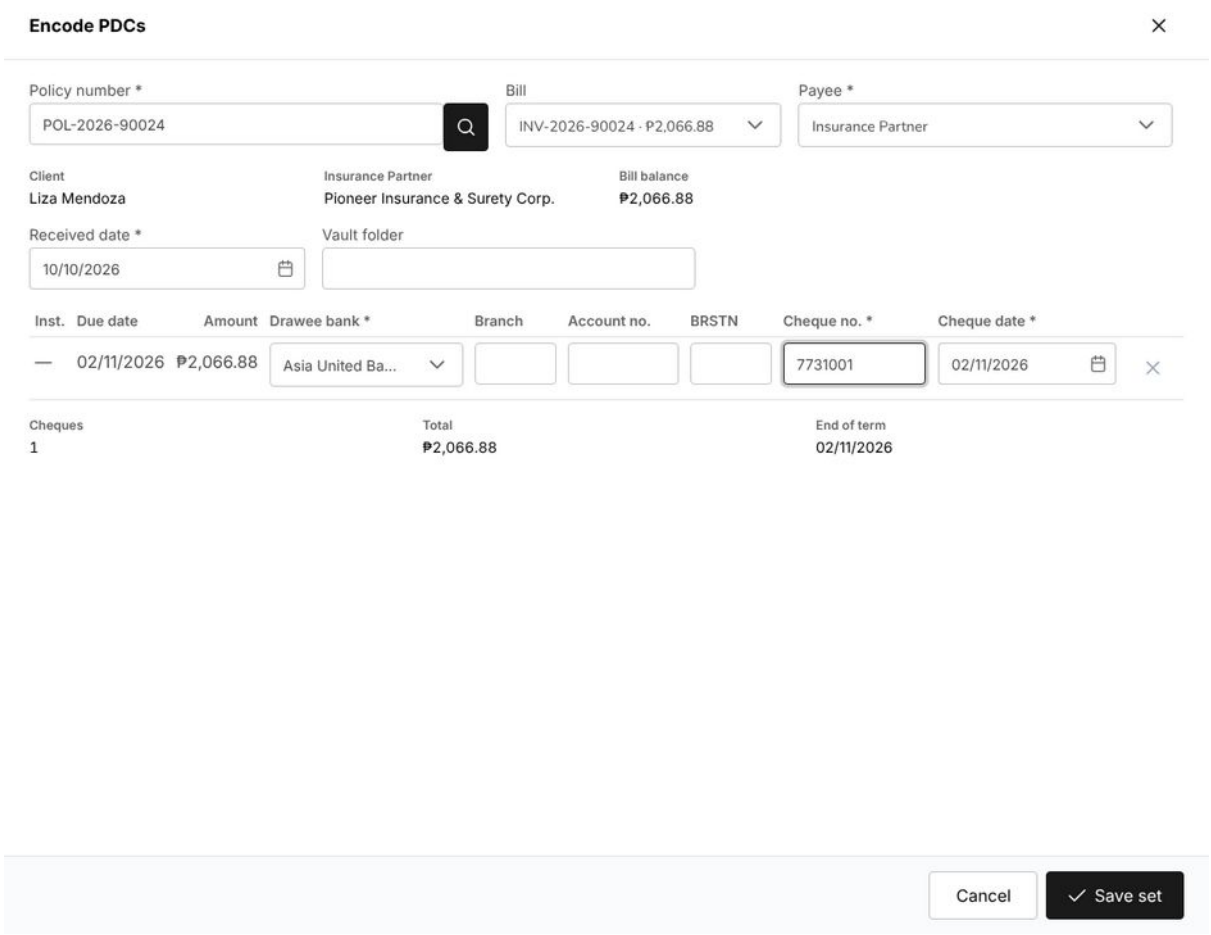

Figure 10.2: Encode PDCs, one row per instalment

10.7.3 Forward cheques to the Insurance Partner

1. On the **At TIS** tab tick the cheques payable to one Insurance Partner and select **Forward to Insurance Partner**.
2. Choose how they are sent (courier, messenger or hand-carry) and the courier reference. The transmittal (PT-2026-00008) lists them; its Excel file goes with the cheques.
3. When the partner acknowledges the transmittal, select **Partner received** on the transmittal (all cheques or those ticked), with who received them and the partner's reference. The cheques are **Warehoused**.

10.7.4 Record the partner's advice: cleared or bounced

- **Partner cleared**: enter the collection date and the partner's reference. The acknowledgement receipt of the cheque is posted against the premium payable to the partner and the instalment is paid.

- **Partner bounced**: choose the reason (DAIF, account closed, stop payment, signature differs, stale, other). The receipt of the cheque is cancelled, the instalment is open again and the client is told.

10.7.5 Deposit a cheque payable to TISPH

1. Open the **Deposit due** tab and select **Deposit** on the cheque.
2. The cheque goes to the one collection account of TISPH; enter the deposit date (not before the cheque date).
3. The official receipt is posted and the cheque is **Deposited**. Record **Cleared** or **Bounced** from the bank's answer.

10.7.6 Cancel, replace or return a cheque

- **Request cancellation**: choose the reason (cash or cheque replacement, technical defect, policy cancelled, paid off, encoded in error). CCD-PDC / CCD-ADA approves it; you cannot approve your own request. A cheque the partner holds is pulled out on the next transmittal to that partner.
- **Replace**: on a bounced or cancelled cheque, enter the new cheque for the same instalment.
- **Return to client**: a cheque kept at TIS goes back to the client with the reason.

See Post-dated cheques (19.5) for the whole screen and Post-dated cheques (3.7.2) in the TISPH process.

11. CCD-PDC / CCD-ADA

11.1 Role summary

Department: Cash Control. Post-dated cheques and auto-debit arrangements.

CCD-PDC / CCD-ADA collects the premiums paid by post-dated cheque and by auto-debit arrangement. On Post-Dated Cheques you work like CCD-PDU (Post-Dated Cheques): you encode, forward, deposit and follow cheques, and you approve the cancellations CCD-PDU asks for. For a client who pays by authority to debit, you pass the bank's debit advice to CCD-BP / QRPh (Receipting), who issues the official receipt; you read the receipts, the collections, the bank reconciliation and the insurer statements to answer clients and follow the cheques and debits until the bank statement shows them.

You work with CCD-PDU (Post-Dated Cheques) on the cheque register, with CCD-BP / QRPh (Receipting) for the other collections and with CCD-Recon (Reconciliation and Reversals), who matches your receipts with the bank statement and handles returned debits.

11.2 Menus available

11.4 Approvals

This role approves the work of other users:

- Approve or return the cancellation of a post-dated cheque requested by another user

Who approves the work of this role:

Work	Approval	Approved by
Post-dated cheques	Approve or return the cancellation of a post-dated cheque requested by another user	CCD-PDC / CCD-ADA
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager

The user who enters a record never approves it: the approval is always another user's.

11.5 Segregation of duties

No delivered segregation-of-duties rule concerns this role.

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

11.6 Daily and periodic tasks

Task	When	Screen
Read the morning notifications of the cheques due for deposit and to follow up	Every morning	Notifications (2.4)
Encode and forward post-dated cheques and deposit those due	Daily	Post-Dated Cheques (19.5)
Record the partners' advices and the cleared and bounced cheques	Daily	Post-Dated Cheques (19.5)
Approve or return the cancellations asked by CCD-PDU	Daily, from My Work	Post-Dated Cheques (19.5)
Check the auto-debits receipted from the bank's debit advice	On each debit date	Receipts (19.1)
Check the premiums still open and their ageing	Daily	Collections (19.3)
Check that your deposits and debits appear on the bank statement	Daily	Bank Reconciliation (19.16)
Look up an insurer statement when the insurer asks about a payment	As needed	Insurer Statements (19.17)
Run the collection report, the statement of account and the deposits in transit	Month-end	All Reports (23.1), Bank Reconciliation (19.16)

11.7 Procedures

11.7.1 Post-dated cheques

You encode, forward, deposit and follow the post-dated cheques on Accounts > Post-Dated Cheques as CCD-PDU (Post-Dated Cheques) does:

- Encode the cheques of a client (10.7.2)
- Forward cheques to the Insurance Partner (10.7.3)
- Record the partner's advice: cleared or bounced (10.7.4)
- Deposit a cheque payable to TISPH (10.7.5)
- Cancel, replace or return a cheque (10.7.6)

You also decide the cancellations: on **Cancellation pending** (or from My Work) open the cheque and select **Approve cancellation**, or **Return request** with a remark. You never decide a cancellation you asked for. A cheque at TIS is then **Cancelled**; one the Insurance Partner holds is pulled out on the next transmittal.

11.7.2 Auto-debits

Pass the bank's debit advice to CCD-BP / QRPh (Receipting), who issues the official receipt with the receipt mode **Authority to Debit** (see Issue an official receipt (12.7.1)). Check the receipt on Accounts > Receipts. If the bank reports that a debit failed after it

was receipted, tell CCD-Recon (Reconciliation and Reversals), who reverses the receipt (see Reverse a receipt (19.1.1)).

11.7.3 Follow the open premiums

1. Choose Accounts > Collections. The cards show the premium **Outstanding**, **Overdue**, **Committed**, **Escalated** and **Collected this month**.
2. Filter by status (**All Status**) and overdue level (**All Levels**), or search by policy or client name.
3. Select **View** in a row to see the bill, its ageing, the follow-up history and the payments.

Your role reads this screen; the follow-up of overdue premiums is done by CCD-BP / QRPh (Receipting) and CCD-Recon (Reconciliation and Reversals). See Collections (19.3).

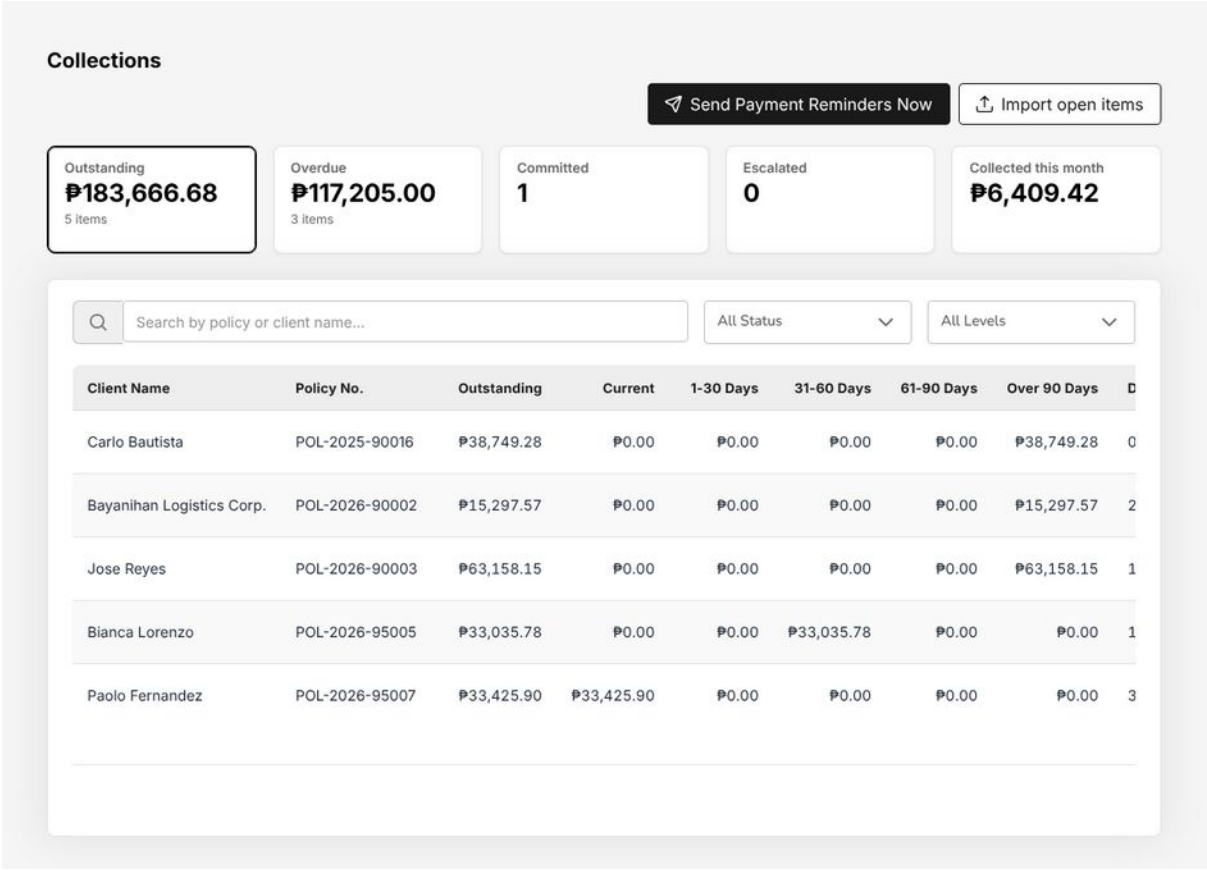

Figure 11.1: Accounts > Collections, the open premiums with their ageing

11.7.4 Check that a deposit or a debit reached the bank

1. Choose Accounts > Bank Reconciliation > Reconciliation Workspace. Select the **Bank account** and the **Period**.
2. Search the **Book entries** for your receipt and the **Bank statement lines** for the deposit or the debit. A receipt matched with the bank shows **Matched**; an **Unmatched** receipt is not yet on the statement.
3. For a list, choose Accounts > Bank Reconciliation > Deposits in Transit, type the dates and select **Generate**.

Your role reads the bank reconciliation; the matching and adjustments are the work of CCD-Recon (Reconciliation and Reversals). See Bank reconciliation (19.16).

12. CCD-BP / QRPh (Receipting)

12.1 Role summary

Department: Cash Control. Official and acknowledgement receipts, bills payment and QRPh; no reversals.

CCD-BP / QRPh (Receipting) issues the official receipts of Toyota Insurance Services Philippines for the premiums paid over the counter, by bank transfer, through bills payment and by QRPh. You post every collection against the client's bill, print or e-mail the receipt, follow up the overdue premiums and record the claim settlement funds that insurers pay to the broker. You also handle post-dated cheques on the same register as CCD-PDU (Post-Dated Cheques).

The acknowledgement receipt (AR) is not issued on your screens: the system issues it when an account executive records a client's payment on the policy. You then confirm that payment against the bank, and the confirmation issues the official receipt.

On Collections you record the follow-ups, the promises to pay and the receipts of the premiums. You allocate the money held On Account (excess, floating and advance payments) to the bills, upload the bank's payment reports and the payments made directly to the insurers, and receipt the auto-debits of CCD-PDC / CCD-ADA. You do not reverse receipts: a returned payment or a receipt issued in error is reversed by CCD-Recon (Reconciliation and Reversals) with another user's approval. Premium warranty extensions and client credit limits are approved by TIS Finance & General Accounting.

12.2 Menus available

12.4 Approvals

This role approves nothing.

Who approves the work of this role:

Work	Approval	Approved by
Collections and credit control	Approve premium warranty extensions and client credit limits (not the requester)	TIS Finance & General Accounting

Work	Approval	Approved by
Receipts	Approve or return the reversal of a receipt requested by another user	CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager

The user who enters a record never approves it: the approval is always another user's.

12.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Receipts (create and edit), Collections and credit control (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Receipting and selling	Receipts (create and edit) with Quotations and placement (create and edit), Policies (create and edit) held by the same person	Warning	The person who issues receipts and posts cash should not also sell or issue the policies paid for
Receipting and reversals	CCD-BP / QRPh (Receipting) and CCD-Recon (Reconciliation and Reversals) held by the same person	Warning	CCD-BP issues the receipts and has no reversal rights; reversals and adjustments sit with CCD-Recon

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

12.6 Daily and periodic tasks

Task	When	Screen
Work through the overdue premiums and the promises to pay assigned to Cash Control	Every morning	My Work (2.3)
Issue official receipts for payments over the counter and bank transfers	Daily, as payments arrive	Receipts (19.1)
Receipt the bills payment and QRPh collections of the day	Daily, from the settlement report	Receipts (19.1)
Print or e-mail the receipts to the clients	Daily	Receipts (19.1)
Follow up overdue premiums, record notes and promises to pay	Daily	Collections (19.3)
Send payment reminders to the clients when needed (each morning the system also e-mails the clients whose premiums fall due)	As needed	Collections (19.3)
Upload the bank's payment report and the payments made to the insurers	Daily	Receipts (19.1.2)
Allocate or refund the unapplied collections by their date	Daily, from My Work	Unapplied Collections (19.2)
Attach the proof of payment of the receipts	Daily	Receipts (19.1)
Print the receipts of a client for a period	As requested	Receipts (19.1)
Run the collection report and the statement of account	Month-end	All Reports (23.1)

12.7 Procedures

12.7.1 Issue an official receipt

1. Choose Accounts > Receipts. **Receipts history** lists the receipts issued, the latest first.
2. Select **Receipt**. **Add Receipts** opens with today's date as **Receipt Date** and the **Receipt Number** generated on saving.
3. Keep **Receipt Type** at **Payment**. In **Branch Code** choose your branch (**Head Office**) and in **Department Code** choose **Cash Control**.
4. In **Customer Code**, select the client. The list shows each client with an open premium and the amount open; type part of the code or name to find it. **Customer Name** is filled in.
5. In **Policy Number**, select the policy paid. Keep **Currency Code** at **PHP** and **Transaction Code** at **OR – Official Receipt**. The other code of the list, **CM – Credit Memo**, records a credit to the client's account that is not money received; use it only when TIS Finance & General Accounting asks for it.
6. In **Receipt Mode**, select how the client paid: **Dollar/Peso** (cash), **Cheque**, **Managers Check/Demand Draft**, **Direct Credit/Transfer to Account**, **Telegraphic Transfer**, **Online Banking** or **Credit Ticket-Inter Office**. A cheque asks for the cheque number and date; for the other modes type the bank or transfer reference in **Reference No. (Optional)**.
7. Under **Open bills for policy**, select the bill paid. Type the **Amount received**, or select **Pay full balance**.
8. Select **Record payment**. Check the client, the bill, the receipt mode and the **Balance after payment**, and select **Record** with the amount.

The system issues the official receipt number, posts the payment (cash in the bank account against the premium receivable) and reduces the bill. When the bill is fully paid, the policy's payment becomes **Completed**. Back on **Receipts**, the confirmation offers **Print receipt**, **E-mail receipt** and **Record another**.

Field	Required	What to enter	Rule
Receipt Date	Yes	The date the payment was received	Must be in an open accounting period
Branch Code, **Department Code**	Yes	**Head Office** and **Cash Control**	
Customer Code	Yes	The client paying	Only clients with an open premium are listed
Policy Number	Yes	The policy paid	Only policies with an open bill are listed
Receipt Mode	Yes	How the client paid	A cheque or manager's check needs the cheque number
Amount received	Yes	The amount paid for the bill	Greater than zero and not more than the bill balance; a partial payment leaves the rest open

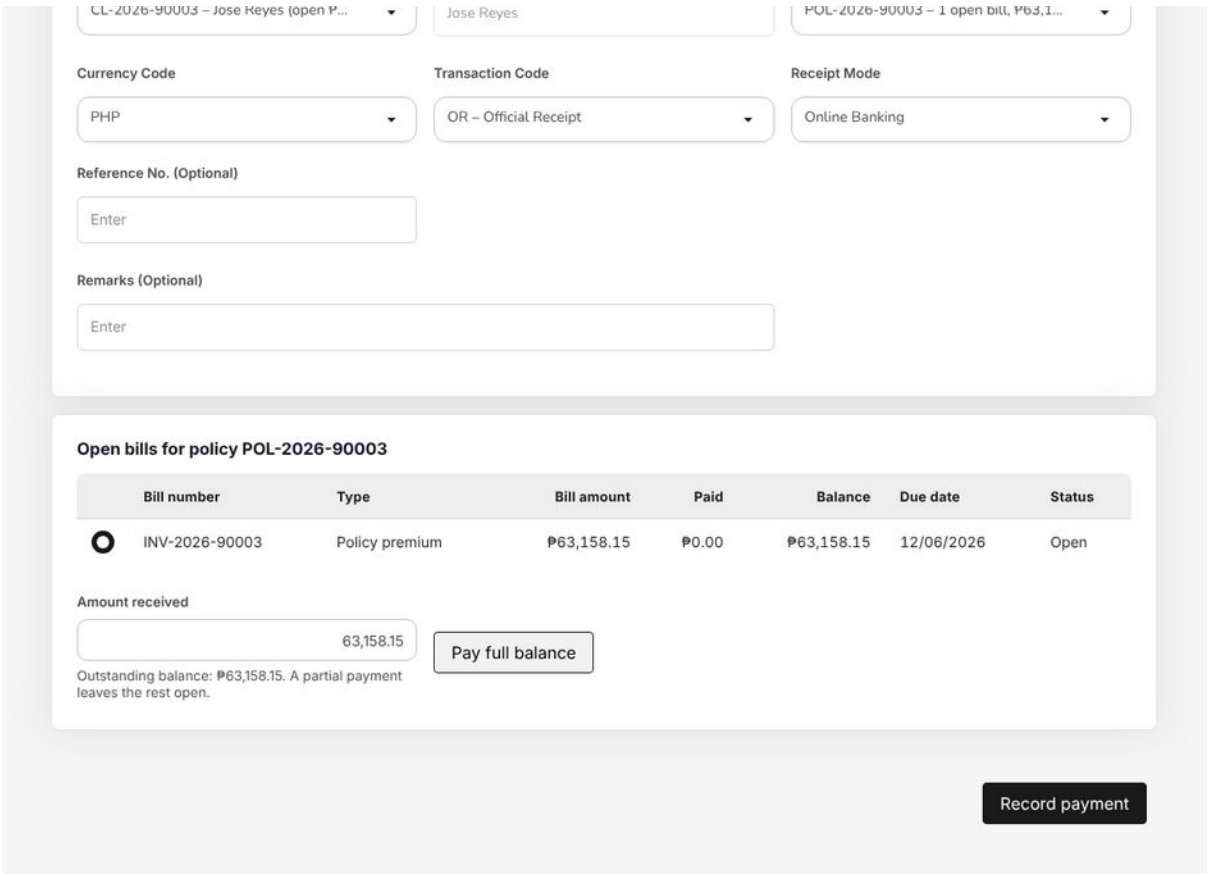

Figure 12.1: Add Receipts with the open bill selected and the full balance as the amount received

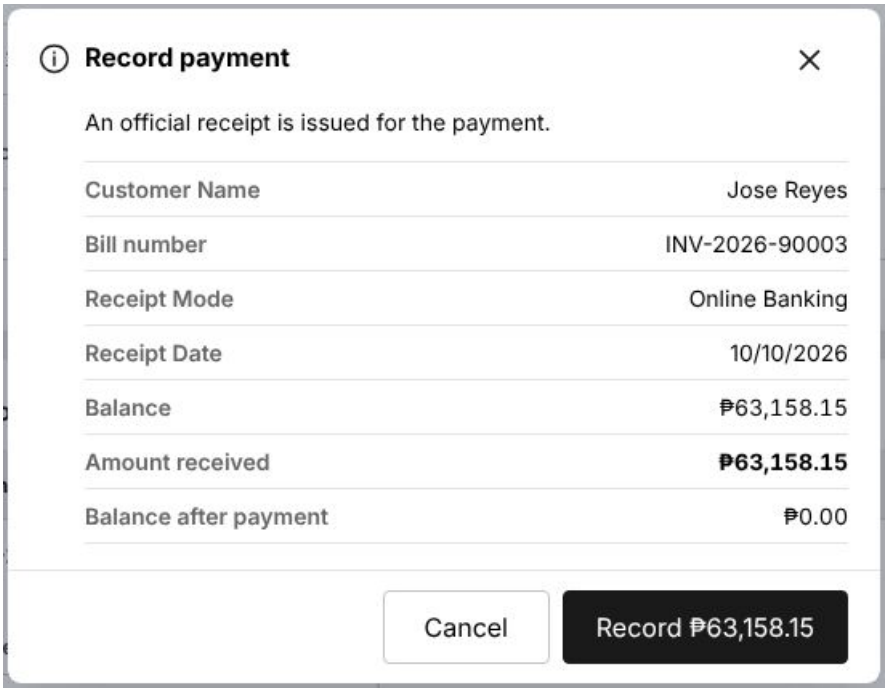

Figure 12.2: Record payment confirmation: client, bill, receipt mode, amount and the balance after payment

12.7.2 Receipt bills payment and QRPh collections

Payments that clients make through bills payment or QRPh reach the bank with a reference; the day's settlement report of the bank lists them.

For a few payments, issue one receipt per payment as in Issue an official receipt (12.7.1), with the receipt mode **Online Banking** and the bills payment or QRPh reference in **Reference No. (Optional)**.

For the whole settlement report:

1. Choose Accounts > Receipts and select **Bulk Upload**.
2. Select **Download template**. The workbook has the **Data** sheet to fill in, and the **Columns** and **Instructions** sheets.
3. Copy one row per payment into the **Data** sheet: **Policy Number** and **Amount** are required; give the **Receipt Date**, the **Payment Mode** (for example online), the **Reference No** of the bills payment or QRPh transaction and, if needed, the **Customer Code** and **Remarks**.
4. Select **Choose file**, pick the completed file (XLSX or CSV) and select **Upload**.

Each row issues one official receipt against the open bill of the policy. The result gives the number of rows processed, the receipts created and the rows that failed, with the row number and the reason (for example a policy billed directly by the insurer, an amount above the balance or a date in a closed period). Correct the failed rows and upload them again; the rows already receipted must not be uploaded twice.

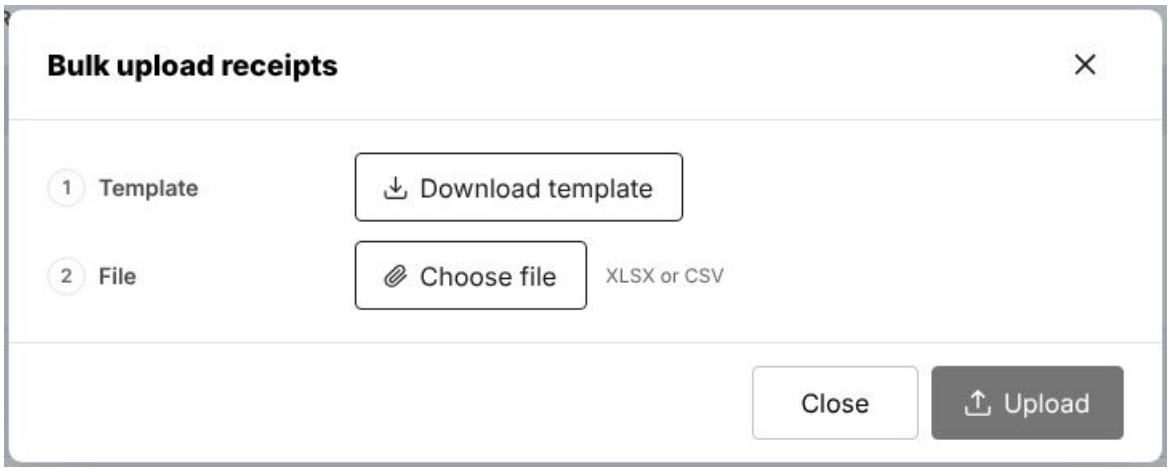

Figure 12.3: Accounts > Receipts > Bulk upload receipts, with the template and the file

12.7.3 Print and e-mail receipts

- One receipt: select the eye icon in its row on **Receipts**. **Receipt Detail View** shows the policy lines with the premium, taxes and amounts paid. Select **E-mail receipt**, **Print All** or **Print Selected**.
- A batch: select **Bulk Print**, select the **Customer Code From** (and **Customer Code To** for a range of clients), the **Date From** and the **Date To**, and select **Generate**. These three fields are required. The receipts are printed one per page in one PDF.

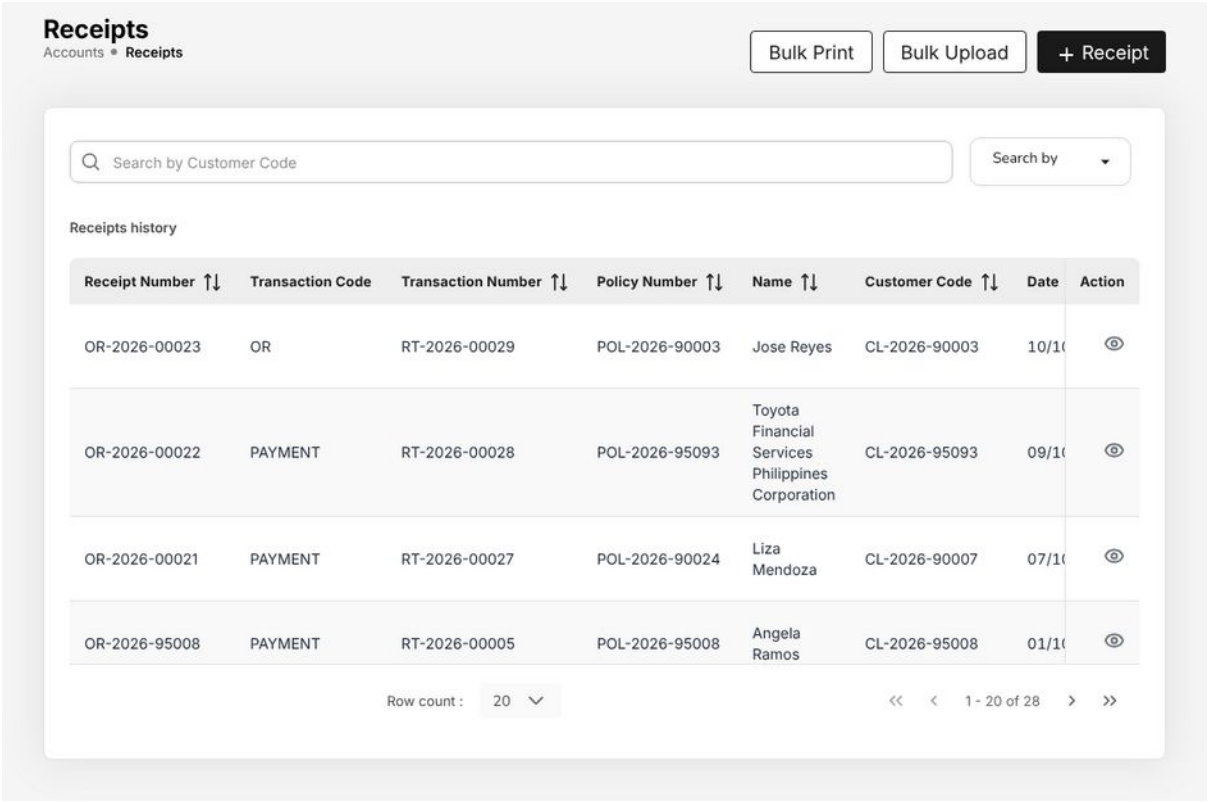

Figure 12.4: Accounts > Receipts, the receipts history with Bulk Print, Bulk Upload and Receipt

In the list, **Status** is **Converted** for a receipt whose lines are all paid and posted (the usual status of an issued receipt), **Draft** for a receipt with a line not yet paid and **Cancelled** for a cancelled receipt. **Transaction Code** is **OR** for a receipt issued on Add Receipts or by Bulk Upload, and **PAYMENT** for a receipt issued when a payment recorded on the policy (with its acknowledgement receipt) was confirmed.

12.7.4 Follow up an overdue premium

1. Choose **My Work**. Under **Collection follow-ups**, each overdue bill shows its next action, for example "Follow up the overdue premium (120 days)", and each promise to pay shows "Confirm the payment promised".
2. Select the arrow of a row, or choose Accounts > Collections and select **View** in the row of the premium.
3. **Collection Details** shows the bill, the **Financial Breakdown**, the **Aging Analysis**, the **Follow-Up History** and the **Payment History**.
4. Under **Collection Actions**, select:
   - **Send Email** to write to the client, or **E-mail invoice** to send the premium invoice of the bill;
   - **Add Note** to record a call or a visit;
   - **Set Commitment Date** when the client promises to pay: give the **Commitment Date** and the **Reason for Delay**. The promise appears in My Work on that date.
5. When the client pays, select **Record receipt**: **Add Receipts** opens for the bill.

To remind every client with a premium due or overdue at once, select **Send Payment Reminders Now** on Collections, then **Send reminders**. Each reminder is recorded in the follow-up history of its collection.

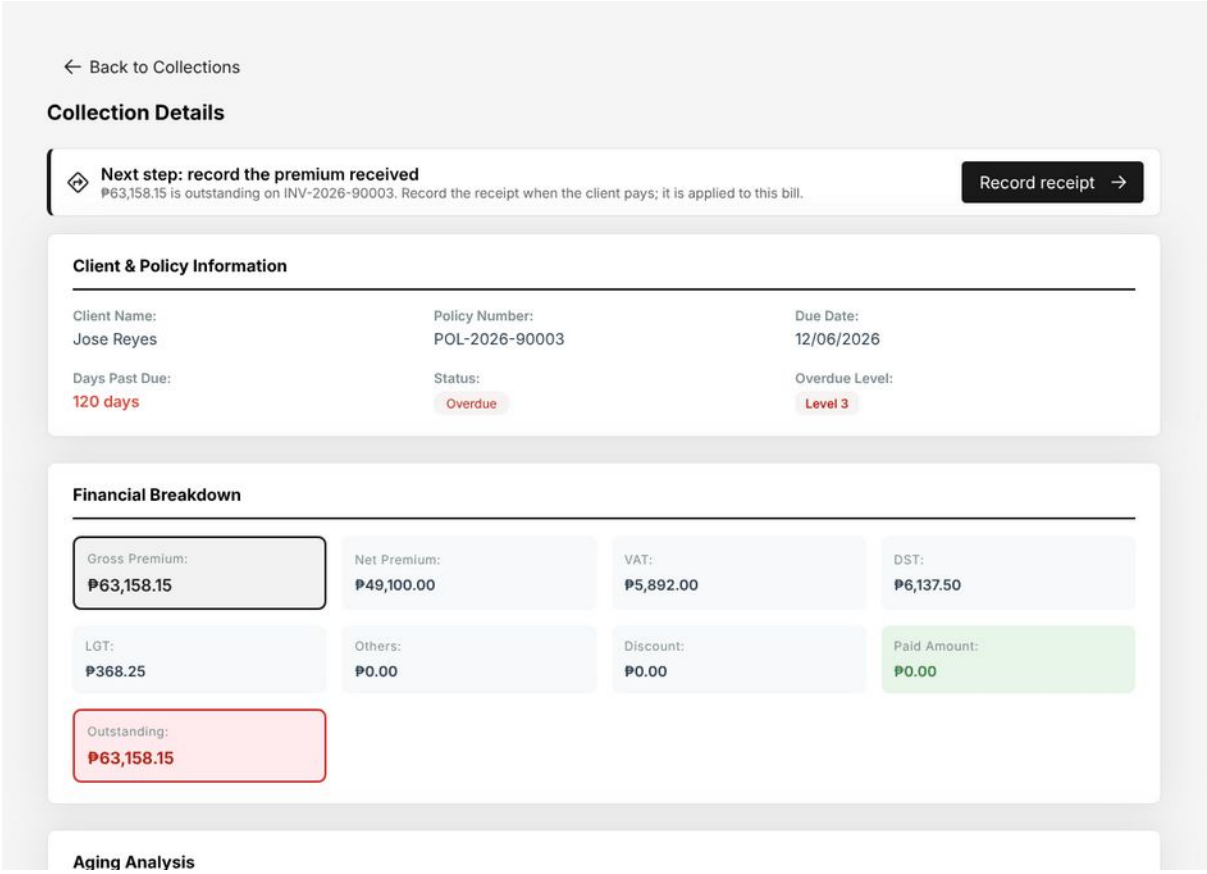

Figure 12.5: Accounts > Collections > Collection Details of an overdue premium, with Record receipt

12.7.5 Post-dated cheques

Post-dated cheques handed in at the counter go to CCD-PDU (Post-Dated Cheques), who encodes them (see Encode the cheques of a client (10.7.2)). You see them on Accounts > Post-Dated Cheques; their receipts are raised when they are collected.

12.7.6 Upload bank payments and payments made to the insurer

1. Choose Accounts > Receipts and select **Bulk Upload**.
2. Choose the file: **Bank payments (matched by reference)** for the bank's report of the day, **Payments made to the insurer** for the payments the insurers report, or **Official receipts** for the receipt voucher file. Download its template the first time.
3. Upload the file. The result says how many lines were matched, overpaid, underpaid, not found or failed, with the reason of each failed row.
4. Open **Receipt batches** to see the batch and export its lines. Allocate what was held On Account or not found on Unapplied Collections (19.2).

12.7.7 Allocate an unapplied collection

1. Choose Accounts > Unapplied Collections, or open the item from My Work.
2. Select **Allocate** in the row, type the amount against each bill and select **Allocate**.

3. An overpayment the client asks back is refunded with **Refund** and its reason; Finance pays the refund.

13. CCD-Recon (Reconciliation and Reversals)

13.1 Role summary

Department: Cash Control. Payment reconciliation, reversals and adjustments, bank and insurer statements.

CCD-Recon (Reconciliation and Reversals) checks every day that the collections posted by Cash Control agree with the bank. You import the bank statements, match them with the receipts and payments in the books, post the bank items not yet booked, reverse the receipts of cheques returned by the bank and prepare the monthly bank reconciliation. You also reconcile the insurers' statements of account with the remittances and approve the insurer statement reconciliations prepared by another user. With TIS Finance & General Accounting you prepare the remittances to the insurers and submit them for approval; TIS Finance & General Accounting and the TIS General Manager approve them.

You work with CCD-BP / QRPh (Receipting), CCD-PDU (Post-Dated Cheques) and CCD-PDC / CCD-ADA, whose receipts you match and reverse; the receipting roles do not reverse their own receipts. TIS Finance & General Accounting approves your bank reconciliations and the bank adjustments that need approval.

13.3 What you can view, change and approve

Where: the screens of your menus that show the module. A module without a screen of its own is seen inside the screens of other modules (for example the remittance status of a policy).

Area	Module	Access	What it allows	Where
Operations	Claims	Special	Reverse claim settlement funds or a payment to the claimant recorded in error	No screen of its own
Operations	Claims	Special	Record claim settlement funds received from an insurer	
Accounts	Receipts	View	See receipts	Receipts and Unapplied Collections
Accounts	Receipts	Create and edit	Reverse a receipt with a reason; the reversal waits for a checker when required	
Accounts	Receipts	Approve	Approve or return the reversal of a receipt requested by another user	
Accounts	Post-dated cheques	View	See the post-dated cheque log, its sets, transmittals and cheque history	Post-Dated Cheques
Accounts	Collections and credit control	View	See collections, instalment plans and credit limits	Collections, Instalment Plans, Premium Warranty Monitor and Remittance Ageing
Accounts	Collections and credit control	Create and edit	Record collections and adjustments	
Accounts	Disbursements and petty cash	View	See payment vouchers, petty cash and bank payment files	Disbursement and Insurer payments
Accounts	Remittance and insurer reconciliation	View	See remittances to insurers and insurer statements	Remittances, Approvals, Insurer payments, Reconciliation, Exceptions, Held policies and Insurer billing
Accounts	Remittance and insurer reconciliation	Create and edit	Prepare remittances and insurer statement reconciliations	
Accounts	Remittance and insurer reconciliation	Approve	Approve insurer statement reconciliations and post their adjustments (not the preparer)	
Accounts	Bank reconciliation	View	See bank reconciliations	Reconciliation Workspace, Reconciliations, Reconciliation Statement Report, Outstanding Cheques, Deposits in Transit, Unmatched Bank Lines and Bank Book
Accounts	Bank reconciliation	Create and edit	Prepare bank reconciliations	

Area	Module	Access	What it allows	Where
Reports	Reports	View	Run and download reports	SOA/Premium Receivable and Collection Report
Master data and configuration	Reference masters	View	See reference masters	No screen of its own
Basic and special access	Basic access	View	Own profile and the look-up lists of every form	No screen of its own

13.4 Approvals

This role approves the work of other users:

- Approve insurer statement reconciliations and post their adjustments (not the preparer)
- Approve or return the reversal of a receipt requested by another user

Who approves the work of this role:

Work	Approval	Approved by
Receipts	Approve or return the reversal of a receipt requested by another user	CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting
Bank reconciliation	Approve and reopen bank reconciliations (not the preparer)	TIS Finance & General Accounting
Collections and credit control	Approve premium warranty extensions and client credit limits (not the requester)	TIS Finance & General Accounting
Remittance and insurer reconciliation	Approve or reject an insurer billing statement raised or submitted by another user	TIS Finance & General Accounting or TIS General Manager
Remittance and insurer reconciliation	Approve insurer statement reconciliations and post their adjustments (not the preparer)	CCD-Recon (Reconciliation and Reversals)
Remittance and insurer reconciliation	Approve or reject remittances, settlements, adjustments and transfers within the Authority Matrix limit (not the preparer or submitter)	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager

The user who enters a record never approves it: the approval is always another user's.

13.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Collections and credit control (create and edit), Remittance and insurer reconciliation (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions

Rule	Conflict	When given together	Reason
Placing and paying insurers	Remittance and insurer reconciliation (create and edit) with Quotations and placement (create and edit), Policies (create and edit) held by the same person	Warning	The person who places business with an insurer should not also prepare the payments to insurers
Receipting and reversals	CCD-Recon (Reconciliation and Reversals) and CCD-BP / QRPh (Receipting) held by the same person	Warning	CCD-BP issues the receipts and has no reversal rights; reversals and adjustments sit with CCD-Recon

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

13.6 Daily and periodic tasks

Task	When	Screen
Work through the follow-ups and approvals waiting for you	Every morning	My Work (2.3)
Import the bank statement of each bank account	Daily	Bank Reconciliation (19.16)
Match the statement lines with the receipts and payments	Daily	Bank Reconciliation (19.16)
Post bank charges, interest and direct credits not yet booked	Daily	Bank Reconciliation (19.16)
Reverse the receipts of cheques returned by the bank	As the bank returns them	Bank Reconciliation (19.16), Post-Dated Cheques (19.5)
Follow up overdue premiums and promises to pay	Daily	Collections (19.3)
Cancel stale cheques not presented within the stale period	Month-end	Bank Reconciliation (19.16)
Prepare the bank reconciliation of each account for TIS Finance & General Accounting	Month-end	Bank Reconciliation (19.16)
Import and reconcile the insurers' statements of account	Monthly, as statements arrive	Insurer Statements (19.17)
Approve the insurer statement reconciliations prepared by another user	As submitted	Insurer Statements (19.17)
Check and submit the weekly draft remittances to the insurers	Every Monday, after the weekly run	Remittances (19.10.1)
Follow the remittances you submitted until they are approved	Daily	Approvals (19.10.4)
Follow up the remittance exceptions assigned to you	Daily	Exceptions (19.10.6)
Run the bank book, deposits in transit, outstanding cheques and reconciliation statement	Month-end	Bank Reconciliation (19.16), All Reports (23.1)

13.7 Procedures

13.7.1 Start the day from My Work

1. Choose **My Work**. The categories on the left are **Collection follow-ups**, **Approvals**, **Bank reconciliations** and **Tasks**.
2. Under **Collection follow-ups**, each overdue bill shows "Follow up the overdue premium" and each promise to pay "Confirm the payment promised". Work them as in Follow up an overdue premium (12.7.4).
3. Under **Approvals**, select the arrow of an insurer statement reconciliation to open it and decide it.

4. The remittances you submitted are followed on Accounts > Remittance > Approvals, under **Submitted by me**: see Follow a remittance you submitted (13.7.11).

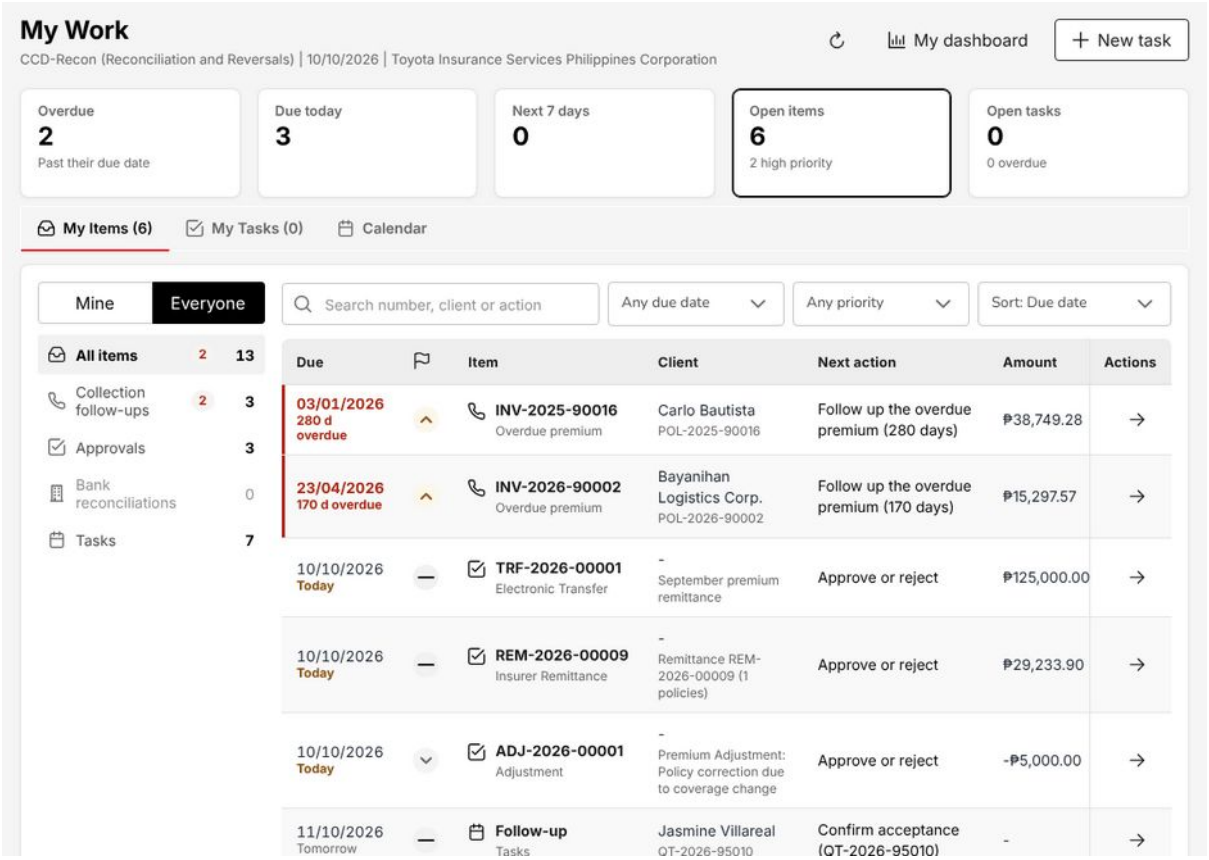

Figure 13.1: My Work of CCD-Recon (Reconciliation and Reversals): collection follow-ups and approvals

13.7.2 Import a bank statement

1. Choose Accounts > Bank Reconciliation > Reconciliation Workspace. Select the **Bank account** and the **Period**.
2. Select **Import statement**. The **Statement format** of the bank is proposed; select **Download template** for the standard layout if the bank's export cannot be read.
3. Attach the **Statement file (CSV / XLSX)**. Type the **Bank statement no.**, and the **Opening balance** and **Closing balance** if they are not in the file. Keep **Leave out lines already on file** ticked.
4. Select **Preview**. Check the lines, the credits and debits, and that opening balance plus credits less debits equals the closing balance. The preview warns of lines already on file and of an opening balance that does not continue from the previous statement.
5. Select **Import**. The statement is saved and its lines are matched automatically where they can be.

The cards show the **Balance per bank**, the **Balance per books**, the **Unmatched bank lines**, the **Unmatched book entries** and the **Difference**.

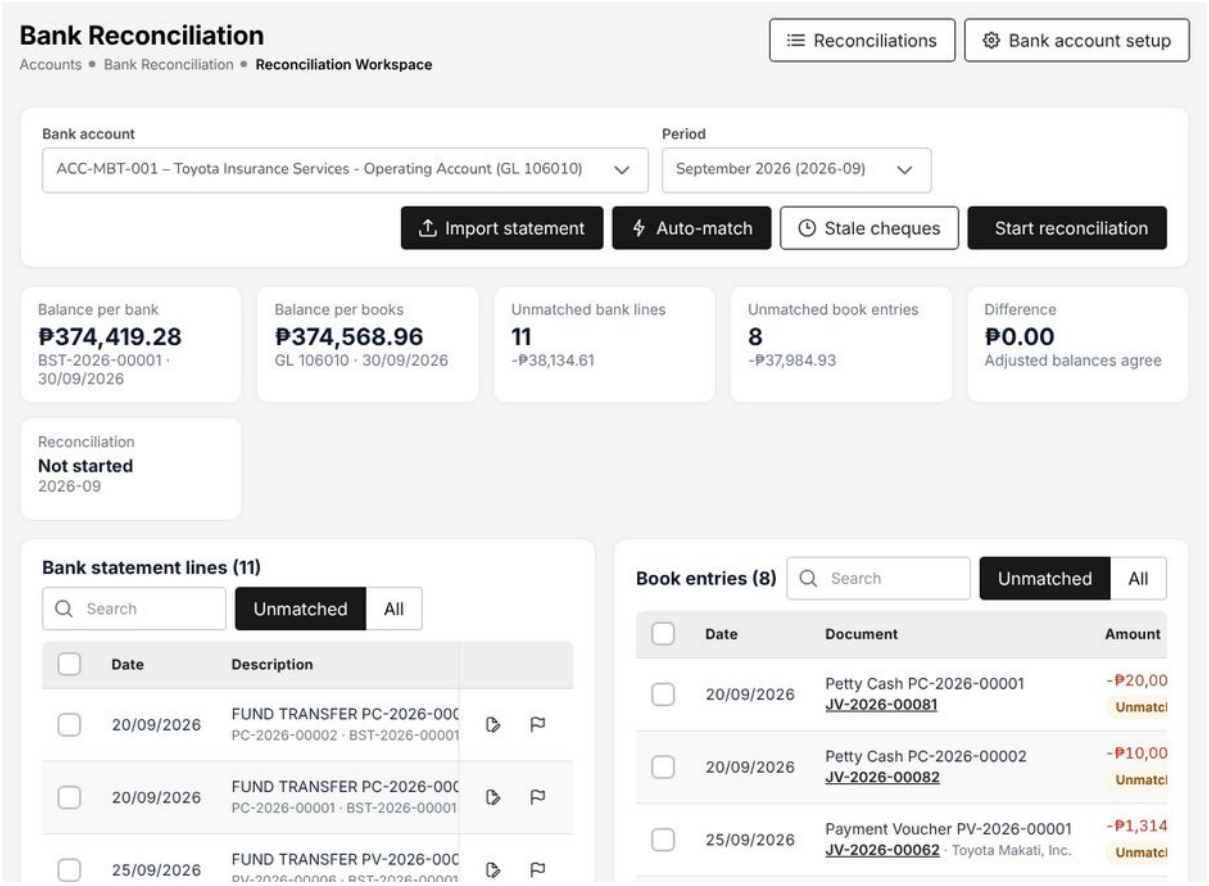

Figure 13.2: Accounts > Bank Reconciliation > Reconciliation Workspace, with the balances, the bank statement lines and the book entries

13.7.3 Match the bank lines with the books

1. Select **Auto-match**. The matching rules pair bank lines and book entries of the same amount (by reference, by date, one to many and many to one); the number of matches found is shown.
2. For the lines left, tick the bank line(s) under **Bank statement lines** and the receipt(s) or payment(s) under **Book entries**. The selection shows **Bank** and **Books** with the number ticked.
3. Select **Match selected**. When the amounts differ, **Match with a difference** asks for the **Treatment of the difference**: **Adjustment journal** (with the **Bank transaction type**), **Bank error** or **Book error**, and **Remarks**.
4. For a bank line that is the bank's mistake, select the flag icon (**Mark as bank error**): the line becomes a reconciling item on the bank side and no journal is posted.

To undo a match, select **All** on either side, find the matched line and select **Unmatch** with the reason. The undone match stays in the audit trail. A match in an approved reconciliation cannot be undone.

13.7.4 Post a bank item not yet in the books

1. In the row of the bank line, select **Create adjustment**.

2. In **Bank transaction type**, select the item: **Bank charges**, **Interest income**, **Final tax on interest**, **Direct credit from client**, **Direct credit from insurer** or **Other bank debit**.
3. Check the **Posting date**, type the **Remarks** and select **Post**.

The adjustment journal is posted and matched with the bank line. **Direct credit from insurer** and **Other bank debit** require approval: the journal is sent to TIS Finance & General Accounting, who approves and posts it; it is matched when approved.

13.7.5 Reverse a returned cheque

A cheque deposited by Cash Control that the bank returns unpaid (DAIF, DAUD, account closed) appears as a bank debit on the statement.

For a post-dated cheque of the register, record the return on Accounts > Post-Dated Cheques: see Record the bank's answer: cleared or bounced (10.7.4). The receipt is cancelled there.

For any other cheque receipted on Receipts:

1. On the Reconciliation Workspace, select **Create adjustment** in the row of the returned cheque.
2. In **Bank transaction type**, select **RCHQ – Returned cheque**.
3. In **Official receipt of the returned cheque**, type the receipt number (for example OR-2026-00018).
4. Type the **Remarks**, for example the bank's reason, and select **Post**.

The system cancels the official receipt: its journals are reversed, the bill is open again and the reversal is matched to the bank line. The receipt shows **Cancelled** on Receipts. Ask the client for a new payment; it is receipted again by CCD-BP / QRPh (Receipting).

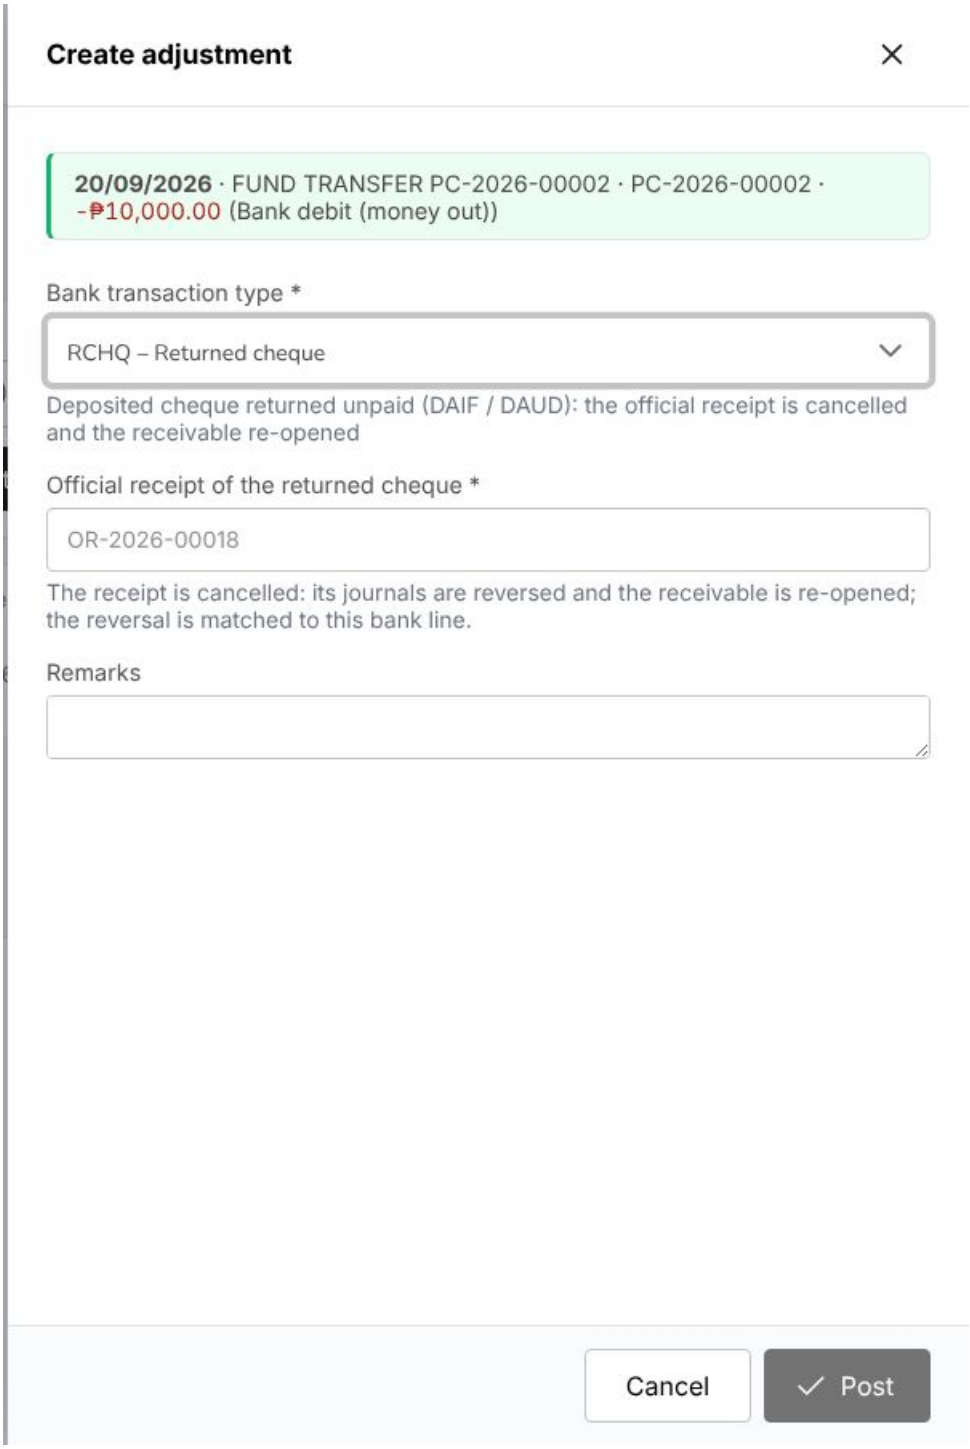

Figure 13.3: Create adjustment with the bank transaction type Returned cheque and the official receipt to cancel

13.7.6 Cancel a stale cheque

1. Select **Stale cheques**. The list shows the payments in the books that have not cleared the bank within the stale period.
2. Select **Cancel cheque** in the row, type the reason (for example "Not presented within the stale period") and confirm. The payment journal is reversed and the payable is open again.

13.7.7 Prepare the monthly bank reconciliation

1. On the Reconciliation Workspace, select the bank account and the period and select **Start reconciliation** (or **New reconciliation** on Reconciliations). The reconciliation (BRC-2026-00001) opens as **Draft** with live figures.
2. Check the statement: balance per bank, deposits in transit, outstanding cheques and bank errors against the balance per books, bank credits and charges not yet booked and book errors.
3. When every line is matched or explained and the adjusted balances agree (**Difference ₱0.00**), select **Prepare** and confirm. The statement of the period must have been imported. The figures are frozen and the reconciliation goes to TIS Finance & General Accounting for approval.

The approver cannot be you. When approved, every match cleared up to the period end is locked. An approver can **Reopen** a reconciliation with remarks: it returns to **Draft** and you receive a notification. **Print PDF** gives the Bank Reconciliation Statement. **Cancel** cancels a draft started in error; the matches are kept.

All reconciliations are listed on Accounts > Bank Reconciliation > Reconciliations, with the preparer and the approver.

13.7.8 Reconcile an insurer's statement of account

1. Choose Accounts > Remittance > Reconciliation and select **Import statement**.
2. Select the **Insurer** and the **Statement type**: **Premium remittance confirmation** (the premium the insurer received from the broker) or **Commission statement** (the commission the insurer recognises on direct-bill business).
3. Type **Period from** and **Period to**, the **Insurer reference** and, if needed, the **Tolerance (PHP)**. Keep **Statement format** at the insurer's own format.
4. Attach the **File (CSV or XLSX)**, select **Preview** to check the lines read, then **Import and match**.
5. Open the statement. The tabs **Amount differences**, **Not found at the broker**, **Missing on the insurer statement** and **All lines** show what does not agree.
6. For each line not matched, select **Match by hand** and pick the broker record, or **Resolve** the difference with **Explain with a note** or **Adjustment journal (posted on approval)**, giving the premium and commission adjustment.
7. Select **Submit for approval**. The reconciliation is **Pending approval** and the other CCD-Recon (Reconciliation and Reversals) users are notified.

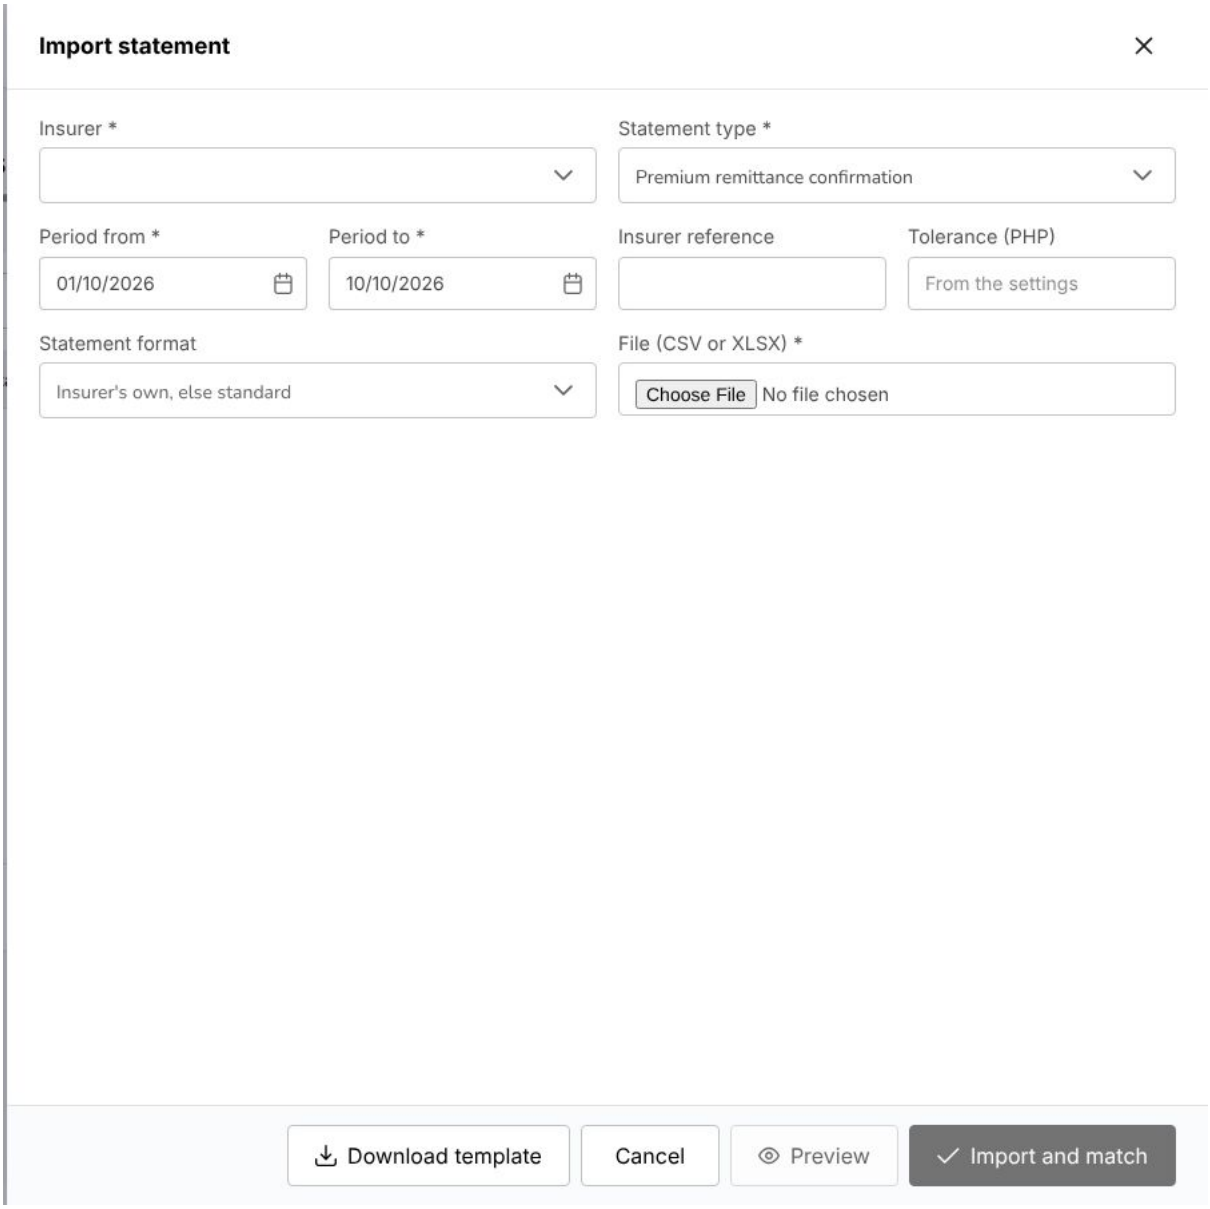

Figure 13.4: Insurer Statements > Import statement, with the insurer, statement type, period and file

13.7.9 Approve an insurer statement reconciliation

1. Open the statement **Pending approval** from **Approvals** in My Work or from Remittance > Reconciliation.
2. Check the matched lines, the differences and their resolutions.
3. Select **Approve** (with optional remarks) and confirm with **Approve reconciliation**: the adjustment journals are posted and the reconciliation is locked. Or select **Reject**, type the reason and confirm with **Reject reconciliation**: the statement returns to **Draft** for the preparer.

You cannot approve a reconciliation you submitted yourself: another CCD-Recon (Reconciliation and Reversals) user approves it. See Insurer statement reconciliation (19.17).

13.7.10 Prepare a remittance to an insurer

1. Choose Accounts > Remittance > Remittances. **My work** lists the drafts to submit: those of the weekly run and those created from a list of policies with Import policy list (19.10.2).
2. Select the remittance number to open it. On **Lines**, check its policies, the total premium, the commission, the tax and the amount due to the insurer against the collections.
3. Select **Submit for approval** and confirm. To submit several drafts at once, tick them on **My work** and select **Submit for approval (n)**.

The remittance is **Pending approval**. The users who can approve its amount are notified; you cannot approve a remittance yourself.

13.7.11 Follow a remittance you submitted

1. Choose Accounts > Remittance > Approvals. The chip **View only** shows that you do not decide remittances. **Submitted by me** lists what you submitted, with the approvers each one waits on and its **SLA**.
2. If an approval is late, select **Remind approver** in the row menu (or on the remittance page). A reminder can be sent again after a few hours; the menu shows when.
3. A rejected remittance returns to **My work** as **Returned**. Read the reason on its **Activity** tab before you submit it again.

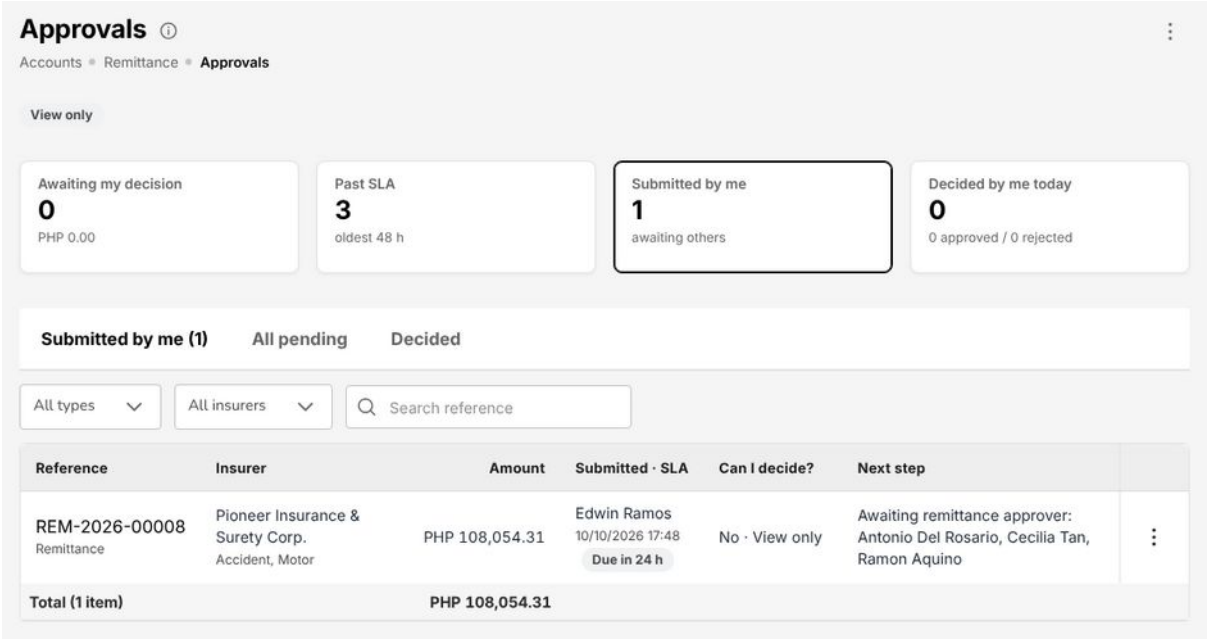

Figure 13.5: Accounts > Remittance > Approvals of CCD-Recon (Reconciliation and Reversals): a remittance submitted, waiting for its approvers

13.7.12 Reverse a receipt and decide reversals

A receipt issued in error is reversed from its page with a reason, and another user approves: a second CCD-Recon user or TIS Finance & General Accounting. See Reverse a receipt (19.1.1). The reversals waiting for you are on My Work; you never approve your own.

You read the receipts, the unapplied collections and the collections of CCD-BP / QRPh (Receipting), who issues the receipts, allocates the amounts held On Account and records the claim settlement funds. Disbursement is open to you to look up payment vouchers.

14. TIS Finance & General Accounting

14.1 Role summary

Department: Finance and Accounting. Disbursements, journal vouchers, payables, fixed assets, commission, remittance and period end.

TIS Finance & General Accounting keeps the books of Toyota Insurance Services Philippines. You prepare the payment vouchers, cheques and bank payment files, enter the supplier invoices and the journal vouchers, run the depreciation, prepare the remittances to the insurers and pay the commission of the agents and referrers. Every day the posted journals go to SAP in the SAP GL export; every month you reconcile the banks, close the period and prepare the BIR returns; once a year you close the fiscal year.

You are also the checker of the accounting: you approve the cheques, the journal vouchers, the supplier invoices, the bank reconciliations, the month-end close and the changes to the posting rules of another user. Because the user who enters a record never approves it, TISPH needs at least two users with this role. You work with Cash Control, who collect the premiums and reconcile the payments, with the TIS Operations roles, whose bookings, endorsements and claims create the journals, and with the TIS General Manager and the unit heads, who also approve supplier invoices.

14.2 Menus available

The menus of this role as delivered. Access: View (open and read), Create and edit (enter and change records), Approve (decide the records of other users).

14.4 Approvals

This role approves the work of other users:

- Approve and reopen bank reconciliations (not the preparer)
- Approve or reject a rate change, reversal or withholding tax change on a commission line requested by another user
- Approve premium warranty extensions and client credit limits (not the requester)
- Approve another user's data load and its undo, sign reconciliations, vote Go / No-Go, approve the go-live lock
- Approve or reject an insurer billing statement raised or submitted by another user
- Approve supplier invoices (not the preparer)
- Approve the close, post into soft-closed periods, reopen periods, reverse a year-end close
- Approve changes to posting rules and account determination (not the requester)
- Approve or return the reversal of a receipt requested by another user
- Approve or reject remittances, settlements, adjustments and transfers within the Authority Matrix limit (not the preparer or submitter)

Approval limits of this role on the Authority Matrix:

Transaction	Approval step	Limit of the role
Payment voucher and cheque release	Accounts > Disbursements > Cheque approval, and bank payment batch approval	Not set: no amount limit applies
Journal voucher approval	Accounts > Journal Vouchers > Approve	Not set: no amount limit applies
Remittance approval	Accounts > Remittance > Approvals	PHP 1,000,000.00
Remittance settlement, adjustment and transfer	Accounts > Remittance > Approvals (settlement, adjustment, transfer)	PHP 1,000,000.00

Who approves the work of this role:

Work	Approval	Approved by
Bank reconciliation	Approve and reopen bank reconciliations (not the preparer)	TIS Finance & General Accounting
Commission	Approve or reject a rate change, reversal or withholding tax change on a commission line requested by another user	TIS Operations Unit Head, TIS Finance & General Accounting or TIS General Manager
Commission rules register	Approve or return a commission rule submitted by another user	TIS General Manager
Data migration and go-live	Approve another user's data load and its undo, sign reconciliations, vote Go / No-Go, approve the go-live lock	TIS Operations Unit Head, TIS Finance & General Accounting or TIS General Manager
Payables	Approve supplier invoices (not the preparer)	TIS Sales Unit Head, TIS Operations Unit Head, TIS Finance & General Accounting or TIS General Manager
Period end and tax	Approve the close, post into soft-closed periods, reopen periods, reverse a year-end close	TIS Finance & General Accounting
Posting rules and account determination	Approve changes to posting rules and account determination (not the requester)	TIS Finance & General Accounting
Remittance and insurer reconciliation	Approve or reject an insurer billing statement raised or submitted by another user	TIS Finance & General Accounting or TIS General Manager
Remittance and insurer reconciliation	Approve insurer statement reconciliations and post their adjustments (not the preparer)	CCD-Recon (Reconciliation and Reversals)
Remittance and insurer reconciliation	Approve or reject remittances, settlements, adjustments and transfers within the Authority Matrix limit (not the preparer or submitter)	TIS Finance & General Accounting or TIS General Manager
Sharing schemes	Approve or return sharing schemes and assignments; suspend, resume and end schemes	TIS General Manager
Accounts > Disbursements > Cheque approval, and bank payment batch approval	Payment voucher and cheque release within the approver's limit	TIS Finance & General Accounting
Accounts > Journal Vouchers > Approve	Journal voucher approval within the approver's limit	TIS Finance & General Accounting
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager

The user who enters a record never approves it: the approval is always another user's.

14.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Disbursements and petty cash (create and edit), Journal vouchers (create and edit), Remittance and insurer reconciliation (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Claims and payment	Disbursements and petty cash (create and edit) with Claims (create and edit) held by the same person	Warning	The claims handler should not also prepare the claim payments
Load and approve migration data	This role itself combines Data migration and go-live (create and edit) with Data migration and go-live (approve)	Warning	The person who uploads and submits a data load should not also approve it; named cutover administrators are recorded as exceptions until the end of hypercare
Placing and paying insurers	Remittance and insurer reconciliation (create and edit), Disbursements and petty cash (create and edit) with Quotations and placement (create and edit), Policies (create and edit) held by the same person	Warning	The person who places business with an insurer should not also prepare the payments to insurers

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

14.6 Daily and periodic tasks

Task	When	Screen
Decide the cheques, journal vouchers, remittances, petty cash requests and other approvals waiting for you	Every morning and through the day	My Work (2.3)
Check the SAP GL file of the previous day; re-generate a day when needed	Every morning	SAP GL Export (19.13)
Prepare payment vouchers; issue the cheque or the bank transfer	Daily	Disbursement (19.8), Bank Payment Files (19.9)
Enter supplier invoices and pay suppliers; issue BIR Form 2307	As invoices arrive; on the payment run	Payables (19.6), BIR Form 2307 for suppliers (19.7)
Enter, correct or reverse journal vouchers	As needed	Journal Voucher (19.12)
Prepare the remittances to the insurers and decide those of another user	Every Monday, after the weekly run, and as submitted	Remittance (19.10)
Approve the eligible commission lines and pay the agents and referrers	On each payout	Agents/Referrer Accounts (20.4)
Reconcile each bank account; approve the reconciliations of another user	Month-end	Bank Reconciliation (19.16)
Reconcile the insurers' statements	Month-end	Insurer Statements (19.17)
Run the month-end close and approve the close of another user	Month-end	Period End (19.21)
Prepare and file the BIR returns	Monthly, quarterly and yearly (see BIR returns (3.12.3))	Tax (19.18)
Approve changes to the posting rules and account determination	When another user proposes one	Posting configuration (21.14)

Task	When	Screen
Close the fiscal year (April to March)	Once a year, after period 12	Year-End Close (19.22)
Run the financial reports	Month-end and on request	All Reports (23.1)

14.7 Procedures

14.7.1 Start the day from My Work

1. Choose **My Work**. The tiles show what is overdue, due today and due in the next seven days.
2. Select **Approvals** in the list on the left. The list shows each item waiting for your decision: insurer remittances, remittance adjustments, cheque releases, journal vouchers and petty cash requests, with the amount and the due date.
3. Select the arrow in **Actions** to open the item on its own screen, check it and approve or reject it there.

Items you entered yourself are not listed for your approval: they wait for another user of your role.

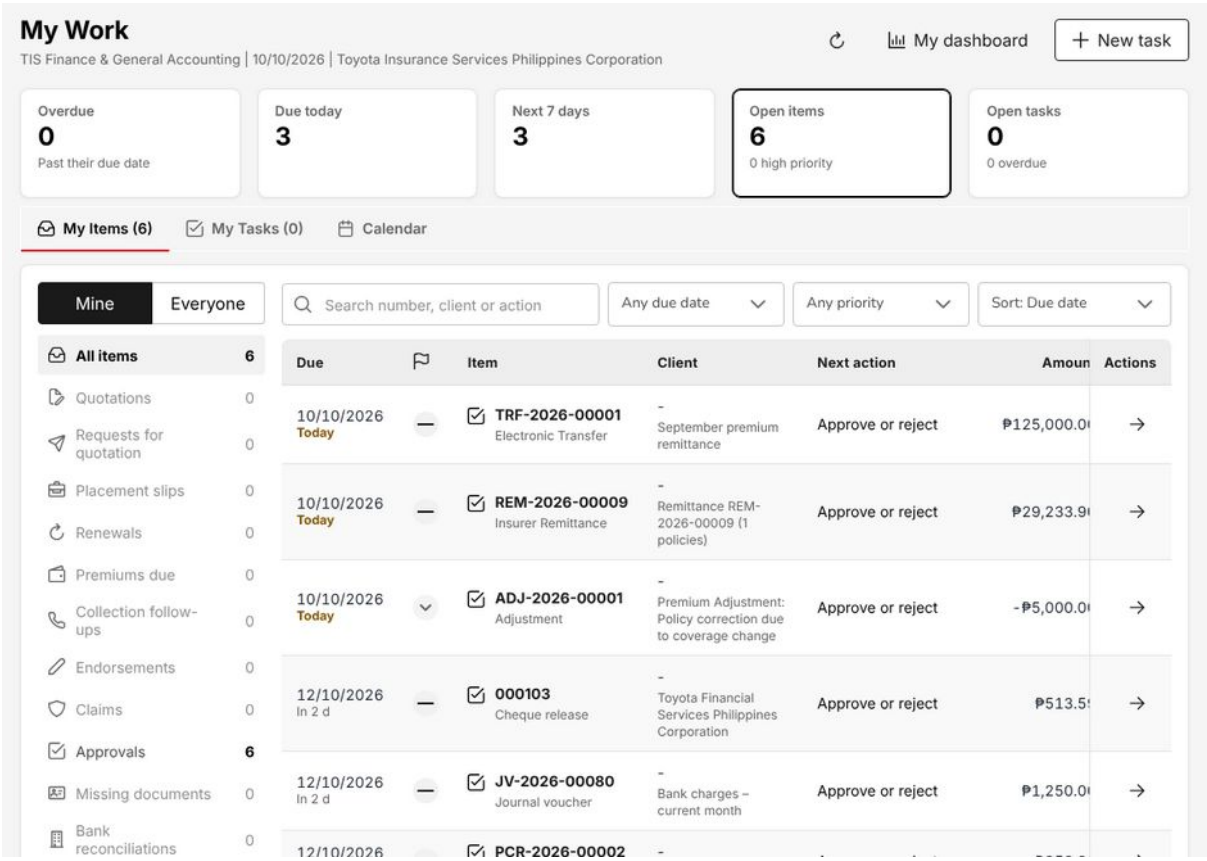

Figure 14.1: My Work as TIS Finance & General Accounting, with the cheque, journal voucher and remittance approvals of the day

14.7.2 Enter a journal voucher

1. Choose Accounts > Journal Voucher and select **Voucher**.

2. In **Transaction Code**, select the type of voucher; type the **Transaction Description**; check the **Date**.
3. Select **Add Data** to add a line. In the **Add Journal Voucher** window:
   a. Select the **Main Account** and, where the account has them, the **Sub Account**.
   b. In **Entry Type**, select debit or credit.
   c. Select the **Branch Code** and the **Department Code**. The **Cost Centre** shows the default cost centre; change it when the line belongs to another cost centre.
   d. Select the **Currency Code** and type the **Amount**. Add **Remarks** if needed.
   e. Select **Save**.
4. Repeat for every line. **Total Debit** and **Total credit** must be equal (**Net** zero).
5. Select **Submit for approval**. The voucher is **Awaiting approval**.

Another user of TIS Finance & General Accounting approves the voucher from My Work or from the journal voucher list; the voucher is then **Posted** and goes into the SAP GL file of the day it is approved. The approver must not be the user who entered it, and must be within the approver's limit for journal vouchers on the Authority Matrix (21.10).

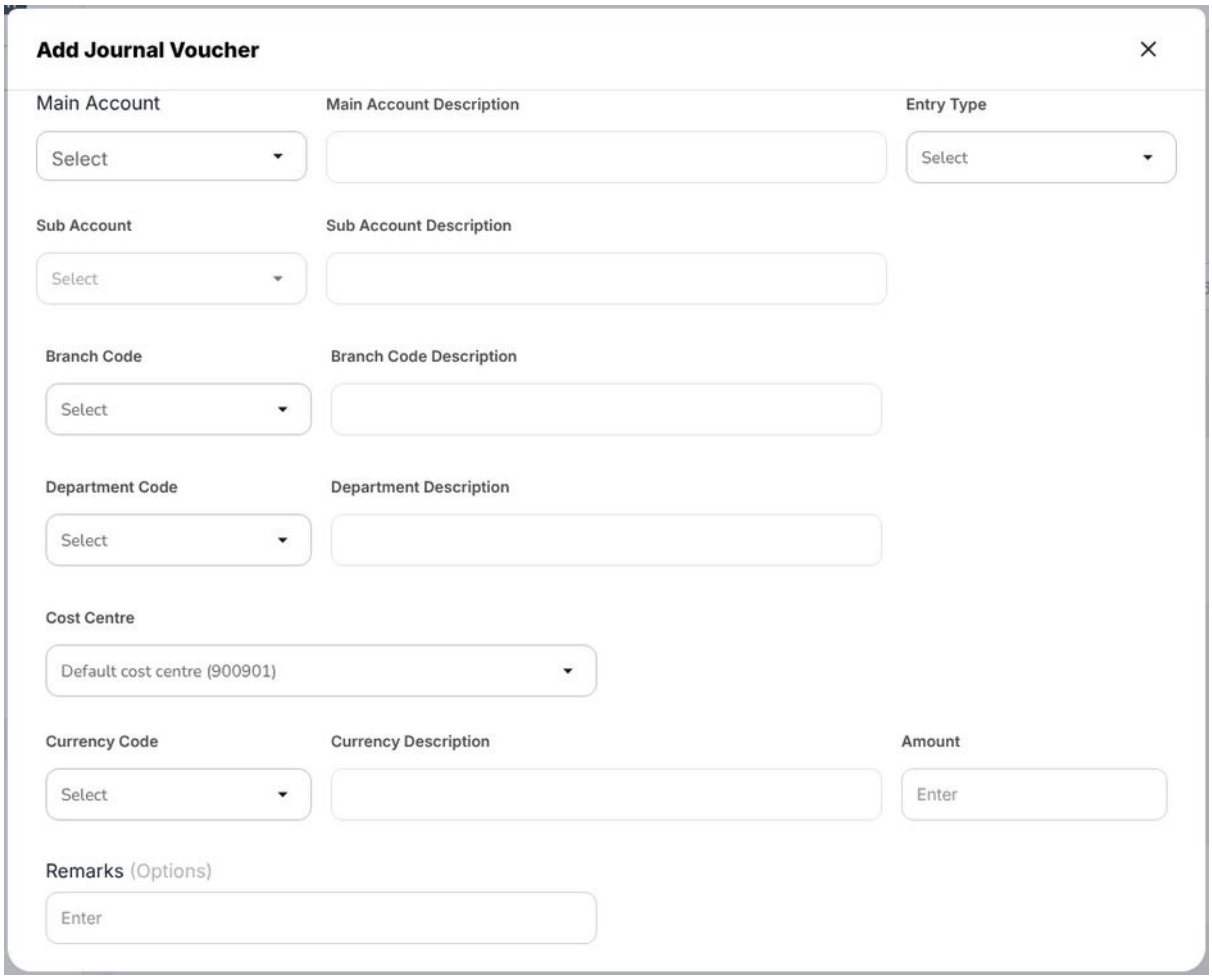

Figure 14.2: Accounts > Journal Voucher > Add Journal Voucher, the window for one line of the voucher

To enter many vouchers at once, select **Upload** and use the template of the screen: one row per line, the same voucher reference for the lines of one voucher. The whole file is

checked first (debits equal credits, accounts open to manual entries, cost centres valid, period open); one error saves nothing and lists every row to correct. Uploaded vouchers always wait for approval.

The system's own journals that are parked for approval (for example the bank charges of a statement) are listed when you tick **System journals parked for approval**, and are approved in the same way. To correct or reverse a posted voucher, use Accounts > Correction JV or Accounts > Reversal JV. See Journal vouchers (19.12).

14.7.3 Check the SAP GL export

The SAP GL header and line files are written every night at the cut-off with the journals posted since the previous cut-off.

1. Choose Accounts > SAP GL Export.
2. Check the run of the previous day: **Status**, **Journals / lines**, **Debit** and **Credit** (always equal), and **Warnings** (lines on an account outside the SAP chart, or without a cost centre).
3. To send a day again, select **Run now / re-generate**. A re-generation is a new run; every run keeps its files, which you download from **Files**.

A journal approved after the cut-off is in the next day's file. See SAP GL export (19.13).

14.7.4 Pay by cheque: payment voucher and cheque release

1. Choose Accounts > Disbursement and select **Create**.
2. Enter the **Disbursement Date**, **Department Code**, **Branch Code**, **Payee Type** and **Criteria**; select the payee (**Customer Code**, **Customer Name**) and, for a policy payment, the **Policy Number**; select the **Transaction Type** and the **Payment Currency**; type the **Payment Description**.
3. Select **Next**. In the invoice list, select the payables to pay and select **Next**.
4. In **Select Bank Details**, select the bank account (**Main Account**, **Bank Code**) and the cheque book (**Instrument Book ID**), check the **Instrument No** and **Instrument Date** and the **Total Amount**, and select **Create Voucher**. The voucher is **Draft** and its cheque **Pending**. A voucher saved without a cheque shows **Issue payment** on its detail page.
5. Another user of TIS Finance & General Accounting opens the voucher, selects the cheque in **Cheque book details** and selects **Approve**, then **Approve cheque**. The user who created the voucher or issued the cheque cannot approve it.
6. When the cheque is printed, select it and select **Print**, then **Print cheque**. The cheque is **Printed** and the voucher **Paid**. This cannot be undone.

Payment vouchers are also raised by the system: an approved remittance settlement raises the insurer's voucher, and a commission payout raises the referrer's voucher. A voucher paid by bank transfer goes into a batch of Accounts > Bank Payment Files (**New batch**): the batch is approved, its file is uploaded to the bank portal and the bank's results post each payment. See Disbursement: payment vouchers and cheques (19.8) and Bank payment files (19.9).

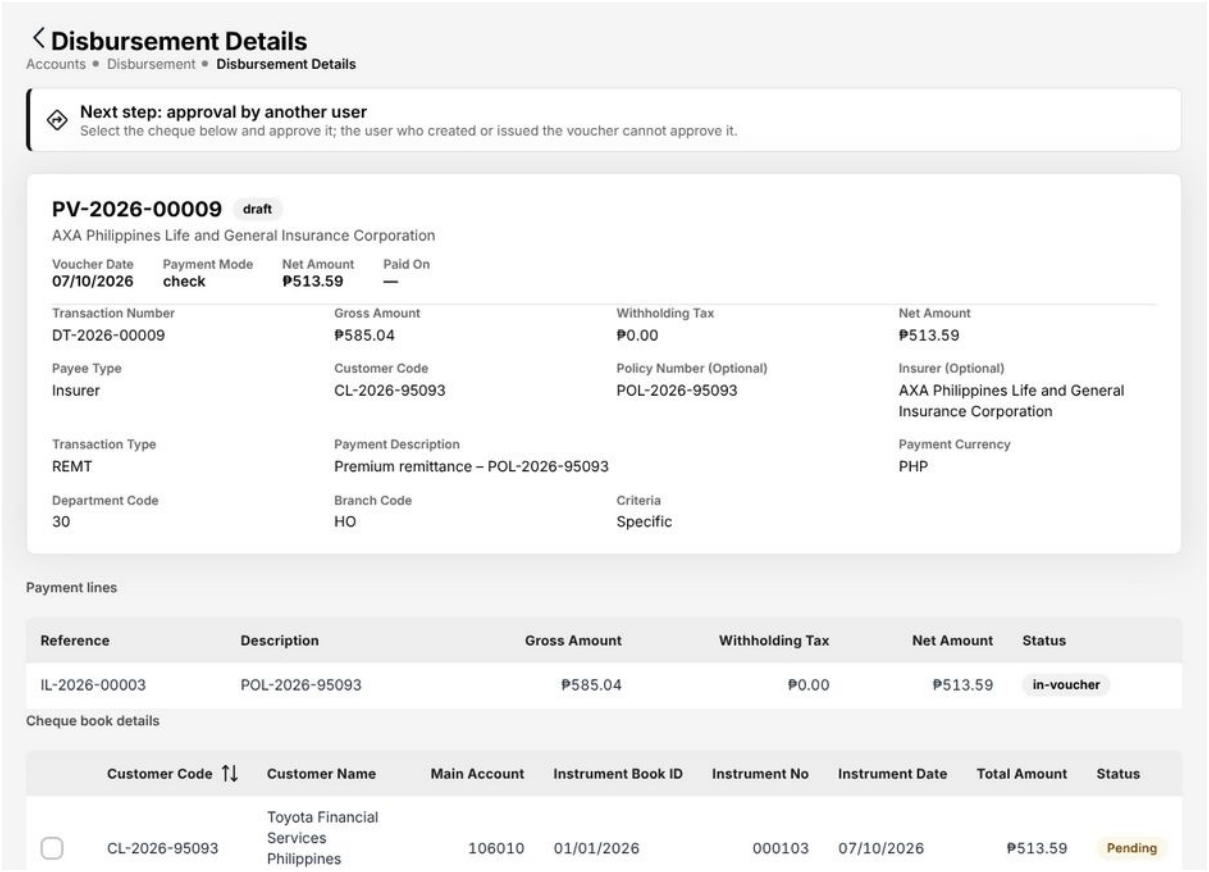

Figure 14.3: Accounts > Disbursement, a voucher to an insurer with its cheque waiting for approval by another user

14.7.5 Prepare and approve a remittance to an insurer

1. Choose Accounts > Remittance > Remittances. **My work** lists the drafts to submit, from the weekly run or from Import policy list (19.10.2).
2. Open a draft, check its policies and amounts, and select **Submit for approval**. The remittance is **Pending approval**.
3. To decide the remittances of another user, choose Accounts > Remittance > Approvals. **Awaiting my decision** lists what you may decide within your limit (PHP 1,000,000.00 as delivered). Select the reference, check the review panel and select **Approve**, or **Reject** with a reason from the list.
4. Settle the approved remittances on Accounts > Remittance > Settlement and submit the settlement for approval. The approved settlement raises the insurer's payment voucher on Disbursement.
5. Pay the voucher from Accounts > Remittance > Insurer payments: in a bank payment batch, or by cheque on Disbursement.

You cannot approve a remittance you prepared or submitted. A remittance above your limit waits for the TIS General Manager. See Remittance to insurers (19.10) and Remittance to the insurers (3.8).

14.7.6 Pay the commission of agents and referrers

1. Choose Commission > Agents/Referrer Accounts and open the agent or referrer.

2. Approve the **Eligible** commission lines (the premium of their policy is collected). The accrual journal is posted.
3. Generate the payout. The approved lines go to a payment voucher, net of the referrer's withholding tax, and are **Paid** when the voucher is paid.

14.7.7 Reconcile a bank account

1. Choose Accounts > Bank Reconciliation > Reconciliation Workspace, select the **Bank account** and the **Period**.
2. Select **Import statement** and load the bank's statement file (or enter it by hand). A file already imported is refused.
3. Select **Auto-match**. The matching rules pair the statement lines with the book entries.
4. Match the remaining lines by hand: tick a bank line and its book entries. Explain a difference with an adjustment journal (bank charges, interest, withholding tax on interest) or mark it as a bank or book error.
5. Check the tiles: **Difference** must be PHP 0.00 ("Adjusted balances agree").
6. Select **Start reconciliation**, then **Prepare**. The reconciliation is **Prepared**.
7. Another user of TIS Finance & General Accounting opens the reconciliation on Accounts > Bank Reconciliation > Reconciliations and selects **Approve reconciliation**. Every match cleared up to the period end is then locked. The user who prepared it cannot approve it.

To change an approved reconciliation, the approver reopens it with remarks: it returns to draft and its matches are unlocked. Cheques not presented after the stale period are listed with **Stale cheques**. See Bank reconciliation (19.16).

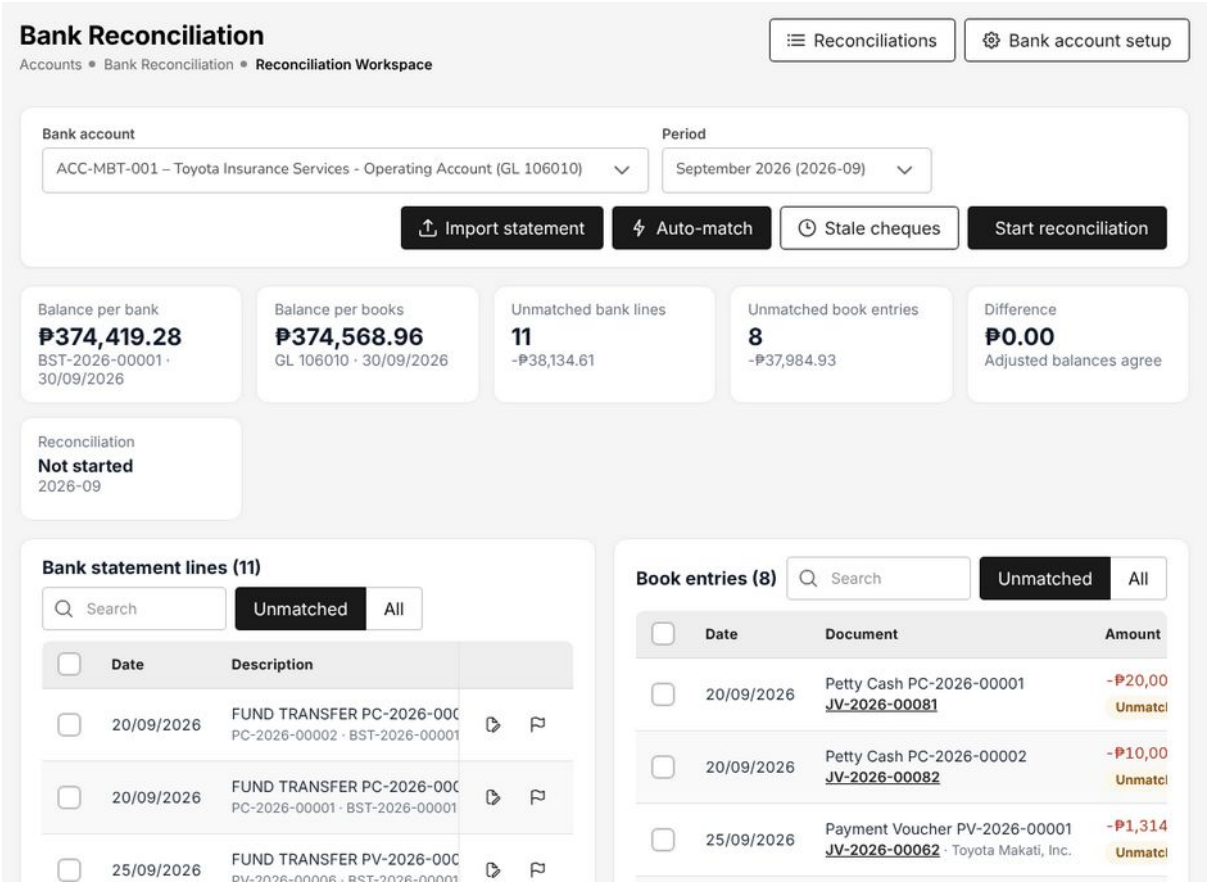

Figure 14.4: Accounts > Bank Reconciliation > Reconciliation Workspace, September of the operating account before the reconciliation is started

14.7.8 Close the month

1. Make sure the month's receipts, remittances, payment vouchers, commission and journal vouchers are posted and the bank reconciliations approved.
2. Choose Accounts > Period End > Month-End Close and select **New close run**.
3. Select the **Period**, add **Remarks** if needed and select **Start**.
4. Open the run and select **Run steps**: the accruals, recurring journals, commission deferral, revaluation and the close checklist. **Rerun steps** first reverses the run's own journals, so the result is the same as one run.
5. Correct what the **Blocking failures** show and select **Re-run checks**.
6. **Sign off** the manual items of the **Checklist**.
7. Select **Submit close**.
8. Another user of TIS Finance & General Accounting opens the run and selects **Approve close**, or **Return to preparer** with a reason. On approval the period is **Closed**.

A period can first be soft-closed on Accounts > Period End > Period Management: only the approvers of the close can then still post into it. Closing or reopening a period asks for a reason. See Period end (19.21) and Month-end (3.12.2).

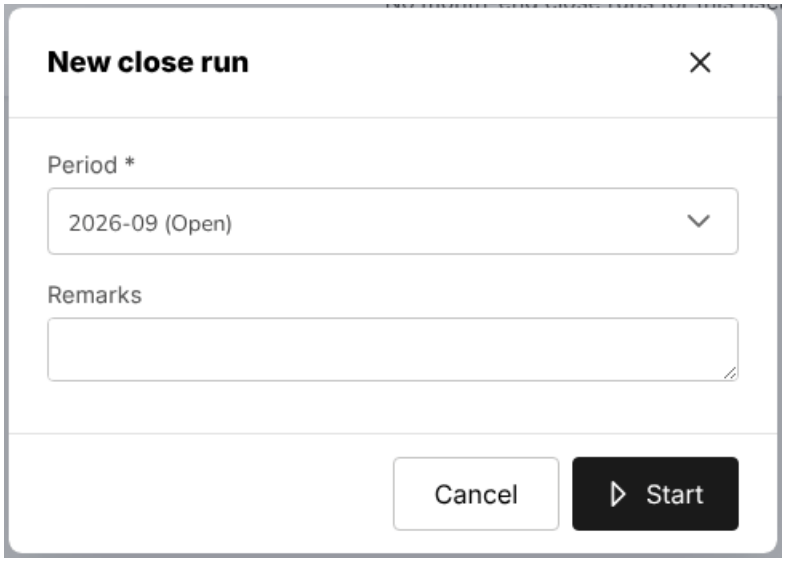

Figure 14.5: Accounts > Period End > Month-End Close, the New close run window

14.7.9 Approve a change to the posting rules

A new version of a posting rule, a change of account determination or of the commission taxes changes no journal until another user approves it.

1. Choose Master > Finance > Configuration Approvals. **Pending approval** lists each change with what it changes, the value before and after, and who requested it.
2. Check the change; for a posting rule, look at its sample journal on Master > Finance > Posting Rules.
3. Approve it, or reject it with a reason. You cannot decide a change you requested.

See Posting configuration (21.14).

14.7.10 Close the fiscal year

1. After period 12 (March) is closed, choose Accounts > Period End > Year-End Close and select **Start year-end close**. The pre-checks run at once.
2. Resolve each failed check; post the adjustments of period 13 (they are approved like journal vouchers).
3. Another user of TIS Finance & General Accounting, not the one who started the run, closes the year: the closing entries are posted, the balances are carried forward to the next year, the year is locked and the next one created.

See Year-end (3.12.4) and Year-end close (19.22).

15. TIS IT AppSupport / Admin

15.1 Role summary

Department: IT. Users, roles, settings, reference masters and interfaces; no business transactions.

TIS IT AppSupport / Admin runs the system for the business. You create the user accounts and give them their TISPH role, unlock accounts and reset passwords, maintain the access of the roles, the approval limits, the delegations and the segregation-of-duties rules, and run the quarterly access reviews. You also keep the reference masters (insurers, products, covers, vehicles, branches, banks), the products of the Product Configurator, the document layouts and numbering, the scheduled jobs and the interfaces (SMS, e-mail, CTPL authentication, insurers, banks).

You read the business data to answer support questions. As delivered, the role also sets up the dealer programmes and uploads the dealers' sales files (see Dealer programme policies (3.3)); apart from these, you enter no business or accounting transaction. Every change of access you make waits for another user of this role: TISPH needs at least two users with this role. You work with the department heads, who ask for the access of their staff, with TIS Finance & General Accounting, who approves the changes to the posting rules, and with the TIS General Manager, who decides the approval limits.

15.2 Menus available

The menus of this role as delivered. Access: View (open and read), Create and edit (enter and change records), Approve (decide the records of other users).

Users and access	Access control	Approve	Approve role access changes and authority limits of another administrator	
Basic and special access	Basic access	View	Own profile and the look-up lists of every form	No screen of its own

15.4 Approvals

This role approves the work of other users:

- Approve role access changes and authority limits of another administrator

Who approves the work of this role:

Work	Approval	Approved by
Access control	Approve role access changes and authority limits of another administrator	TIS IT AppSupport / Admin
Data migration and go-live	Approve another user's data load and its undo, sign reconciliations, vote Go / No-Go, approve the go-live lock	TIS Operations Unit Head, TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager

The user who enters a record never approves it: the approval is always another user's.

15.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Users (create and edit), Roles (create and edit), Access control (create and edit) with Receipts (create and edit), Collections and credit control (create and edit), Disbursements and petty cash (create and edit), Journal vouchers (create and edit), Remittance and insurer reconciliation (create and edit), Policies (create and edit), Quotations and placement (create and edit), Claims (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Load and approve migration data	Data migration and go-live (create and edit) with Data migration and go-live (approve) held by the same person	Warning	The person who uploads and submits a data load should not also approve it; named cutover administrators are recorded as exceptions until the end of hypercare

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

15.6 Daily and periodic tasks

Task	When	Screen
Decide the changes of access of the other administrator waiting for you	Every morning and through the day	My Work (2.3), Role Permissions (21.8)
Check the scheduled jobs: last run, last status, failures	Every morning	Schedules (21.26)
Check the messages waiting or failed: e-mails, SMS, insurer and bank interfaces	Every morning	E-mail Outbox (21.30), Integrations (21.31)
Create accounts for new staff; deactivate leavers	On the request of the department head; on the last working day	User (21.7)
Unlock an account, reset a password, turn off two-step verification after a lost phone	On the user's request	User (21.7)
Change the access of a role	On an approved access request	Role Permissions (21.8)
Record the approval limits decided by Management	When Management changes them	Authority Matrix (21.10)
Record the cover for an approver who is away	Before the leave	Delegations (21.11)
Follow the segregation-of-duties conflicts and their exceptions	Weekly	Segregation of Duties (21.12), User Access Matrix (21.9)
Review the access of every user	At least every quarter	Access Reviews (21.13)
Set up the dealer programmes and upload the dealers' sales files	When a programme is agreed; as the dealers send their files	Dealer Programmes (18.7)
Maintain the reference masters	On the request of the business	Masters that work the same way (21.4)
Configure products, covers, rating and acceptance rules	On the request of the business	Product Templates (22.2)
Maintain the document layouts, signatures and numbering	On the request of the business	Documents and Reports Layout (21.22), Document Numbering (21.25)

Task	When	Screen
Answer audit questions: who changed what and when	On request	Audit Trail (21.27)

15.7 Procedures

15.7.1 Create a user account

1. Choose Master > Users and Access > User and select **Add**.
2. Type the **Username**, the **E-mail** and the **Display Name**.
3. Leave **Password** empty: the system creates a temporary password.
4. Select the **Branch**, the **Designation** and **Reporting to**.
5. Under **Roles**, tick the TISPH role of the user. The roles are grouped by department, each with a one-line summary.
6. Select **Save**.
7. The temporary password is shown once. Give it to the user in person or by phone. The user must choose a new password at the first sign-in.

Users who sign in with **Sign in with Microsoft** are matched to their account by e-mail: the **E-mail** (or the **Username**) must be the user's Microsoft 365 address. At the first sign-in the account is bound to that Microsoft account; later sign-ins must come from the same Microsoft account. When you give roles that one person should not hold together, the system warns you, or refuses a combination its rule blocks; see Segregation of Duties (21.12).

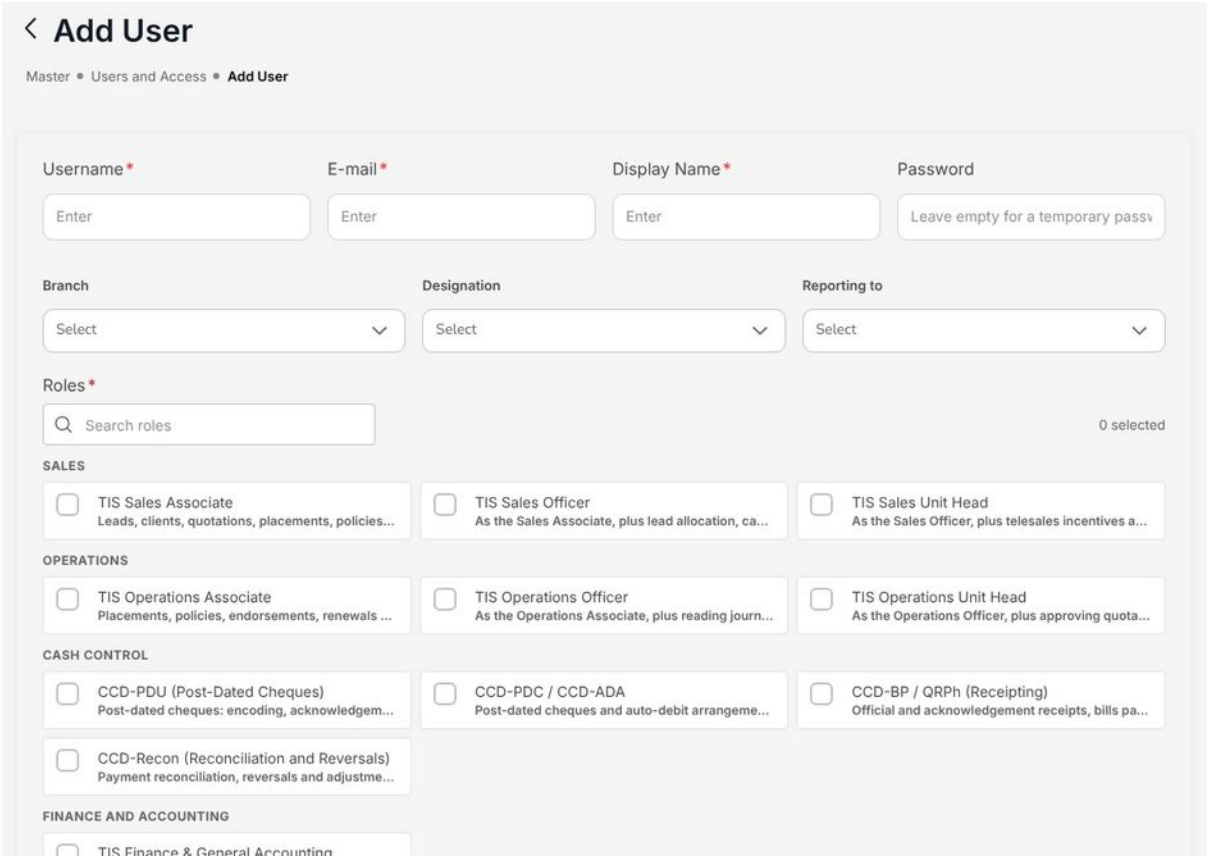

Figure 15.1: Master > Users and Access > User > Add User, with the TISPH roles grouped by department

> *You cannot change your own account or roles, nor give a role that includes the built-in administrator. Another administrator changes your account.*

15.7.2 Unlock an account or reset a password

1. Choose Master > Users and Access > User and find the user.
2. Open the account actions of the user's row and select one of:
   - **Unlock**: the account is unlocked and its failed sign-in attempts are cleared. Confirm with **Unlock account**.
   - **Reset password**: the account receives a temporary password, shown once; the user's sessions end and the user must choose a new password at the next sign-in. Give the password to the user in person or by phone.
   - **Turn off two-step verification** (for example after a lost phone): the user signs in with the password alone until two-step verification is set up again.
   - **Sign-in history**: the user's sign-ins with the device and the result.

To stop a leaver from signing in, switch off the **Status** of the user in the list; the account is inactive. Each action is recorded in the Audit Trail (21.27). See Users (21.7).

15.7.3 Change the access of a role

1. Choose Master > Users and Access > Role Permissions.
2. On **By role**, select the role. The modules of the role show their access: **View**, **Create and edit**, **Approve**.

3. Select **Edit access** and switch the access on or off module by module. The bar at the bottom counts the changes.
4. Select **Review and submit**. The system lists the segregation-of-duties rules the change would break, for the role and for its users.
5. Select the reason and submit the change. It waits on **Waiting for approval**; one change per role waits at a time.
6. Another user of TIS IT AppSupport / Admin opens **Waiting for approval** (or My Work) and selects **Approve**, or **Reject** with the reason. The change applies at once to every active user of the role, whose sessions are renewed.

The approver is never the requester and must not hold the role changed. You cannot change a role you hold: a change to the TIS IT AppSupport / Admin role itself is made by the built-in administrator. The requester can **Withdraw** a change before it is decided. Use **Compare roles** to see two roles side by side and **Export to Excel** for the access of every role. See Roles and role permissions (21.8).

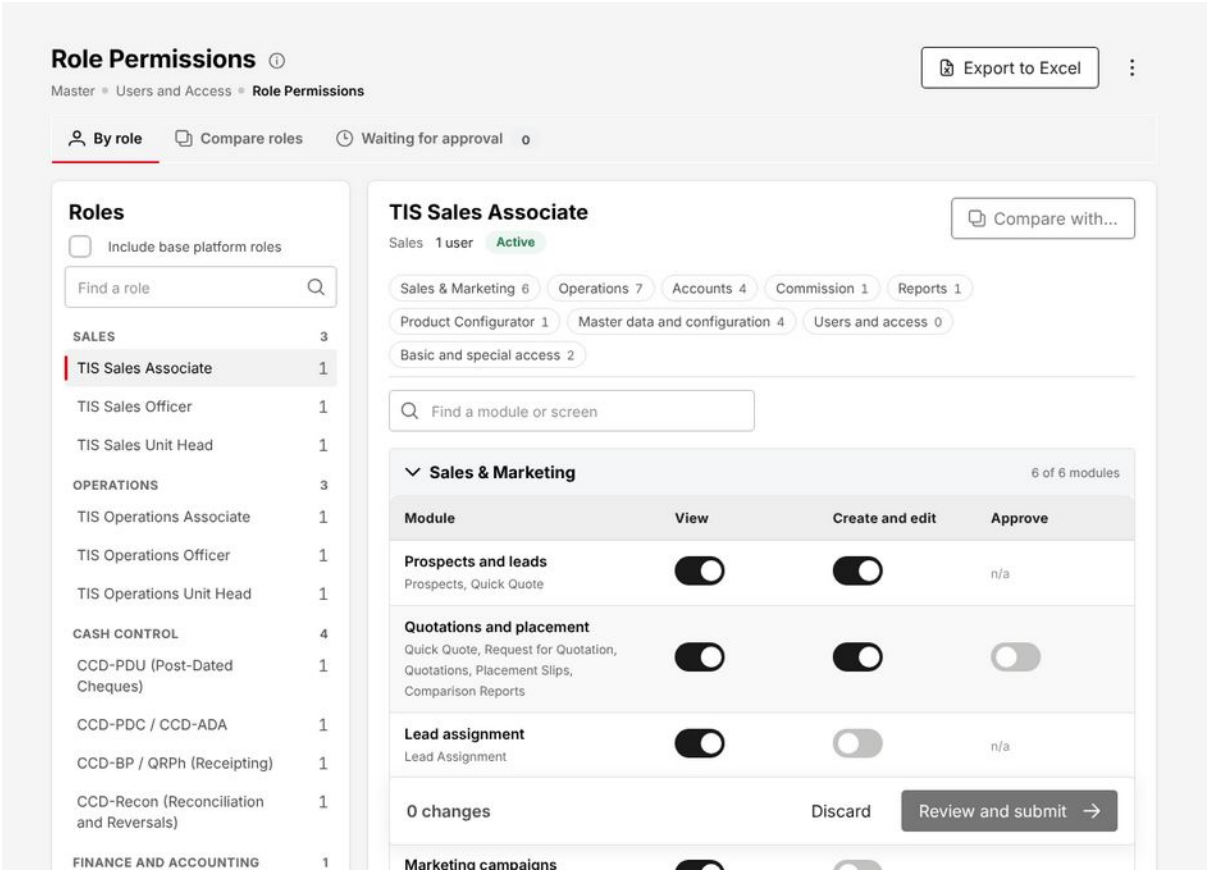

Figure 15.2: Master > Users and Access > Role Permissions, the access of the TIS Sales Associate open with Edit access

15.7.4 Record approval limits

1. Choose Master > Users and Access > Authority Matrix. The matrix shows the transactions down and the approver roles across, by department, with the limit in effect in each cell; a cell without a limit shows **Not set**.
2. Select the cell and **Set a limit** (amount in PHP), or no limit, with the **Effective from** date (today or later), the **Authority reference** and its **Reference date**, and the

Remarks for the approver. To change many cells at once, select **Download**, fill the file and select **Upload**: the whole file is checked and nothing is saved while one row is wrong.

3. Submit the change. It waits on **Pending approval**.
4. Another user of TIS IT AppSupport / Admin approves it, or rejects it with the reason. The limits apply from their effective date.

Nobody approves a change to his or her own personal limit or to the limit of a role he or she holds. While a cell is **Not set**, the delivered rule lets the approver approve without an amount check (shown as "Approver without a limit: may approve"). See Authority Matrix (21.10).

15.7.5 Record a delegation

1. Choose Master > Users and Access > Delegations and select **New delegation**.
2. Select the approver who is away, the person covering, the transactions and the dates (from today, for a limited number of days), and the reason.
3. Submit. The delegation waits for approval by another user of TIS IT AppSupport / Admin, who is neither the requester nor the person covering.

Once approved, the person covering approves the chosen transactions with the limit of the approver who is away, for the dates chosen; both people are told. Select **End early** with the **Reason for ending** to stop a delegation. See Delegations (21.11).

15.7.6 Follow segregation-of-duties conflicts

1. Choose Master > Users and Access > Segregation of Duties.
2. On **Conflicts**, check each user with an **Open** conflict: the roles held, the rule broken and its state.
3. Remove the conflicting role from the user, or select **Request exception** with a reason and an end date. The exception waits for approval by another administrator; the person concerned does not approve it.

New rules (**New rule**), changes (**Edit rule**) and switching a rule off (**Switch off**) also wait for the approval of another administrator. A **Block** rule refuses the combination of roles when they are given; a **Warn** rule allows it and lists the person here. The delivered TISPH rules warn. The Master > Users and Access > User Access Matrix shows, for each user, the roles, the last sign-in, two-step verification, the password age and the conflicts. See Segregation of Duties (21.12) and User Access Matrix (21.9).

15.7.7 Run the quarterly access review

1. Choose Master > Users and Access > Access Reviews and select **Start a review**.
2. Check the **Review** name and the **Due** date; choose the **Scope**: **All active users**, **Departments** or **Roles**. The window counts the users to be reviewed. Select **Start**.
3. For each user, with the department head, decide: **Keep access**, **Remove roles** or **Deactivate account** (a removal needs a reason). You cannot decide your own line.
4. When every line is decided, select **Submit for sign-off**.

5. Another user of TIS IT AppSupport / Admin, who decided none of its lines, selects **Sign off**. The roles removed are taken away, the accounts deactivated and the users' sessions renewed; the review is closed.

See Access Reviews (21.13).

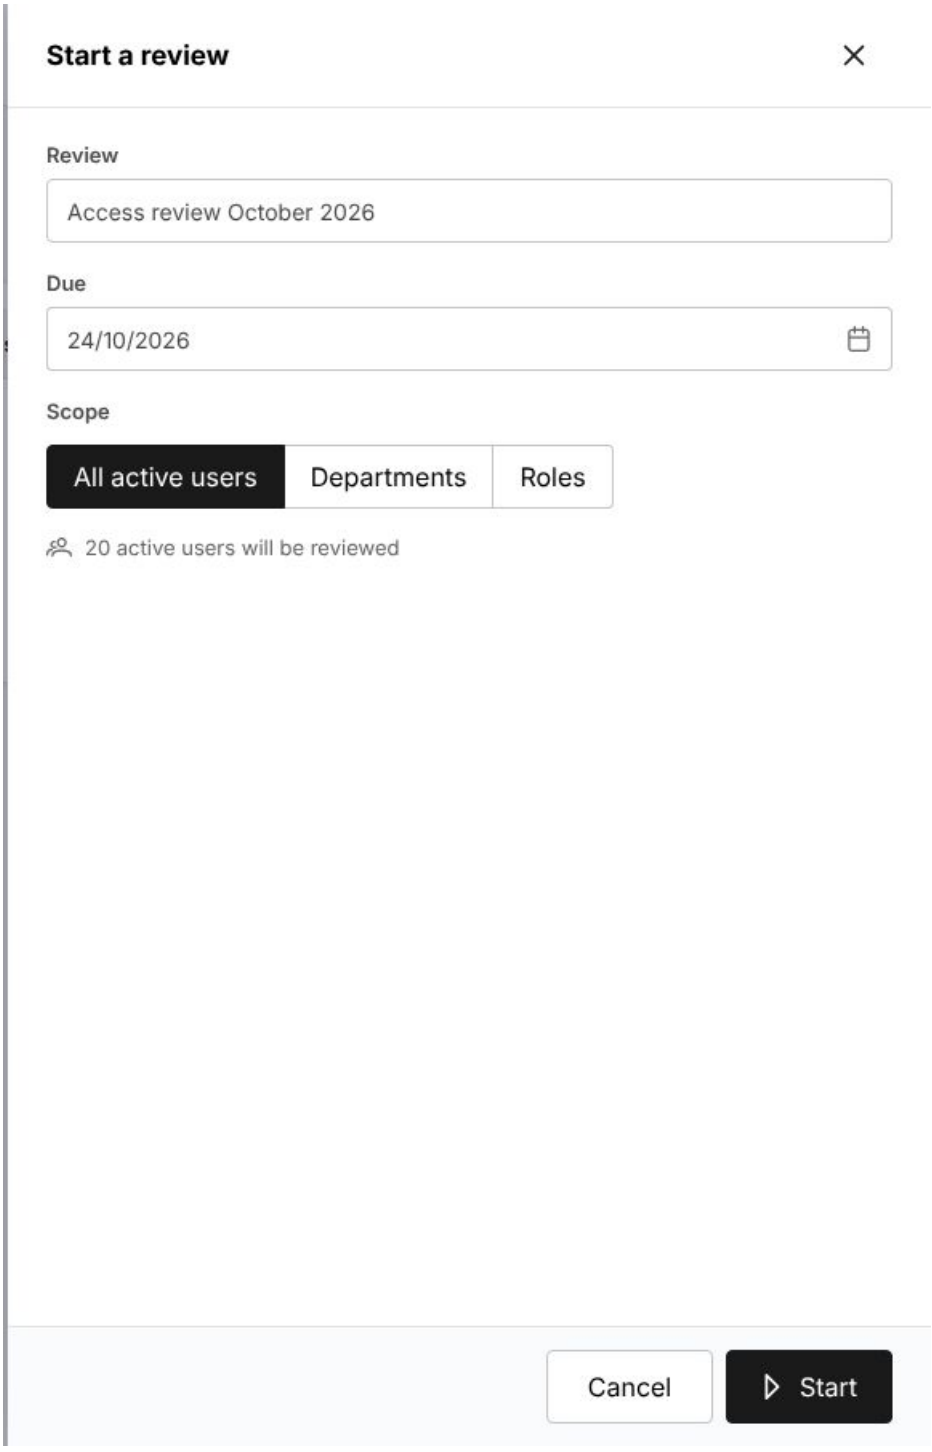

Figure 15.3: Master > Users and Access > Access Reviews, the Start a review window

15.7.8 Maintain a reference master

1. Choose the master on the Master menu, for example Master > Insurance > Insurance Company or Master > Insurance > Vehicle.

2. Select **Add** for a new record, or the edit icon of a record; fill in the form and save.
3. To withdraw a record, set it inactive rather than deleting it: the records already using it keep it.

Some finance masters (posting rules, account determination, account roles) are maintained by TIS Finance & General Accounting; a change you propose to the accounting accounts waits for their approval on Master > Finance > Configuration Approvals. See Masters that work the same way (21.4), Insurance companies (21.3) and Distribution Channels (21.1).

15.7.9 Configure a product

1. Choose Product Configurator > Product Templates. The template marked **In use** is the one the business applies to its product.
2. Select **Create Template**, or the edit icon of a template, and set its covers (Product Configurator > Coverage Builder), rating (Product Configurator > Rating Engine), acceptance rules (Product Configurator > Acceptance Rules), documents (Product Configurator > Document Manager) and insurer market (Product Configurator > Market Mapping).
3. Select **Activate** and confirm with **Activate template**. The template applies to new quotations; quotations already issued are not changed. **Deactivate** stops its use for new quotations.

See Product Templates (22.2) and the other sections of the Product Configurator.

15.7.10 Watch the scheduled jobs

1. Choose Master > System > Schedules. Each job shows what it does, its schedule (Asia/Manila time), its status (**Scheduled** or **Switched off**), the next run, the last run and the last status.
2. Select the run history icon of a job to see its runs and the error of a failed run.
3. To run a job outside its schedule, select the run icon and confirm with **Run job**: what the job sends or updates is sent or updated as on a scheduled run.
4. To change the schedule of a job or switch it on or off (**Enabled**), select **Edit schedule**.

Agree with TIS Finance & General Accounting before you switch on or reschedule an accounting job (recurring journals, accrual auto-reversal, period auto soft-close, SAP GL export). See Schedules (21.26).

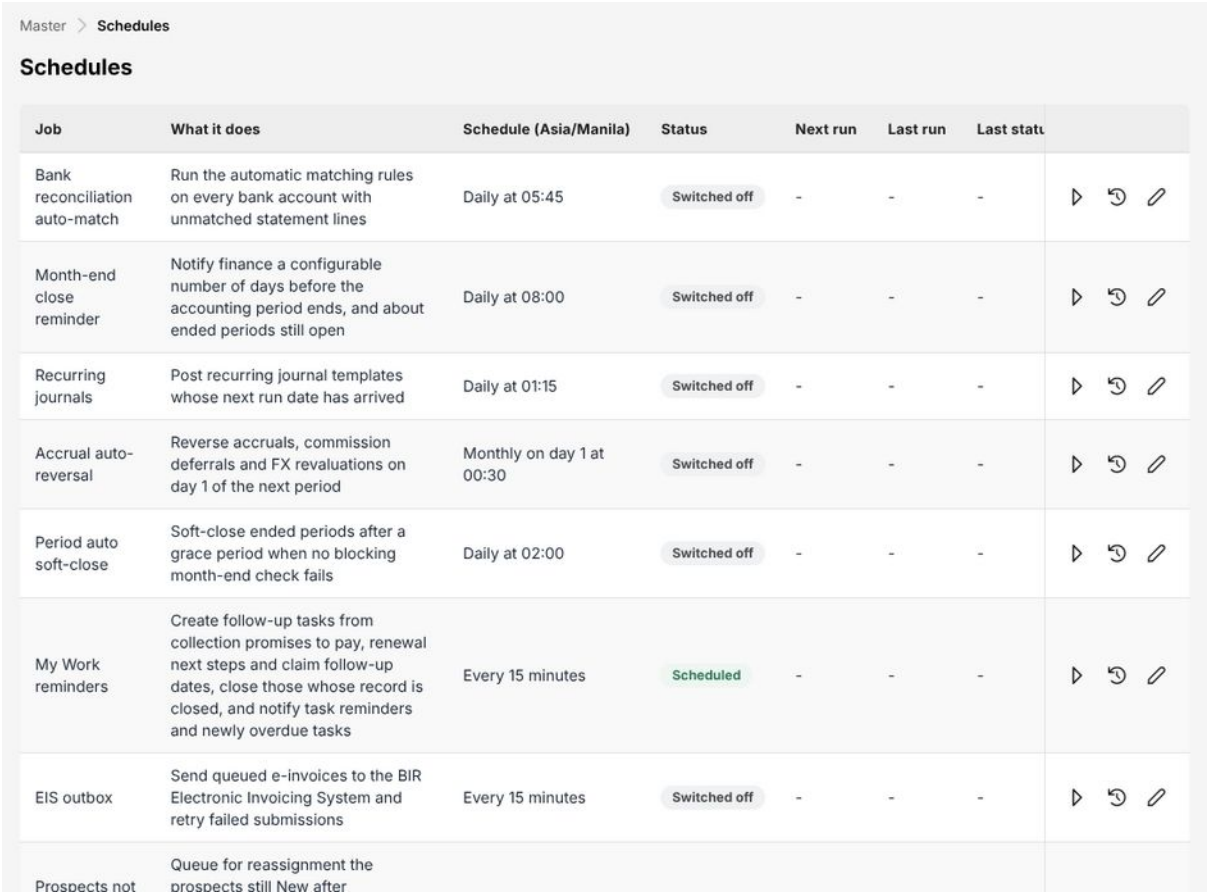

Figure 15.4: Master > System > Schedules, the jobs with their schedule and status

15.7.11 Resend a message that failed

1. Choose Master > System > Integrations. **Connectors** shows each interface with its mode, the messages waiting, failed and sent today, and the last success and failure.
2. Open **Outbox** to see the messages sent and failed, with the error; resend or cancel a failed message.
3. Select **Send due messages** to send the messages waiting now.
4. For e-mails, choose Master > System > E-mail Outbox: each e-mail shows its status, attempts and last error.

See Integrations (21.31) and E-mail Outbox (21.30).

16. TIS General Manager

16.1 Role summary

Department: Management. Front office with every approval; reads accounting and the audit trail.

The TIS General Manager oversees the business of Toyota Insurance Services Philippines. You hold every approval of the front office: the check of the insurers' e-policies against the placement slips, the renewal terms, the return premiums and cancellations, and the claim decisions and settlement approvals. You approve supplier invoices and the remittances to the insurers above the limit of TIS Finance & General Accounting, follow the business on the dashboards and reports, and review who has access to what.

Apart from the remittance approvals, you read the accounting (receipts, remittances, journals, period end, tax) without changing it, and you read users, roles, access, the Authority Matrix, segregation of duties and the audit trail without changing them: those are kept by TIS Finance & General Accounting and TIS IT AppSupport / Admin. You never decide a record you entered yourself.

16.2 Menus available

16.4 Approvals

This role approves the work of other users:

- Claim decisions: review, reject, settle, approve a settlement, close
- Approve or reject a rate change, reversal or withholding tax change on a commission line requested by another user
- Approve or return a commission rule submitted by another user
- Approve another user's data load and its undo, sign reconciliations, vote Go / No-Go, approve the go-live lock
- Approve or reject an incentive calculation batch submitted by another user
- Approve or reject an insurer billing statement raised or submitted by another user
- Approve supplier invoices (not the preparer)
- Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user
- Approve a quotation created by another user
- Approve or reject remittances, settlements, adjustments and transfers within the Authority Matrix limit (not the preparer or submitter)
- Approve or return renewal terms of another user
- Approve or return sharing schemes and assignments; suspend, resume and end schemes

Approval limits of this role on the Authority Matrix:

Transaction	Approval step	Limit of the role
Claim settlement approval	Operations > Claims > Settlement approval	No limit
Remittance approval	Accounts > Remittance > Approvals	No limit
Remittance settlement, adjustment and transfer	Accounts > Remittance > Approvals (settlement, adjustment, transfer)	No limit

Who approves the work of this role:

Work	Approval	Approved by
Claims	Claim decisions: review, reject, settle, approve a settlement, close	TIS Operations Unit Head or TIS General Manager
Policies	Decide the check of a placement against the slip, and complete the cancellations and return premiums of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Quotations and placement	Approve a quotation created by another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Renewals	Approve or return renewal terms of another user	TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager
Operations > Claims > Settlement approval	Claim settlement approval within the approver's limit	TIS Operations Unit Head or TIS General Manager
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Operations > Sales & Marketing > Quotations > Underwriting referral	Underwriting referral approval within the approver's limit	TIS Operations Unit Head

The user who enters a record never approves it: the approval is always another user's.

16.5 Segregation of duties

Rule	Conflict	When given together	Reason
Administration and transactions	Policies (create and edit), Quotations and placement (create and edit), Claims (create and edit) with Users (create and edit), Roles (create and edit), Access control (create and edit) held by the same person	Warning	The person who administers users and access should not enter business or accounting transactions
Claims and payment	Claims (create and edit) with Disbursements and petty cash (create and edit) held by the same person	Warning	The claims handler should not also prepare the claim payments
Load and approve migration data	Data migration and go-live (approve) with Data migration and go-live (create and edit) held by the same person	Warning	The person who uploads and submits a data load should not also approve it; named cutover administrators are recorded as exceptions until the end of hypercare
Placing and paying insurers	Quotations and placement (create and edit), Policies (create and edit) with Remittance and insurer reconciliation (create and edit), Disbursements and petty cash (create and edit) held by the same person	Warning	The person who places business with an insurer should not also prepare the payments to insurers
Receipting and selling	Quotations and placement (create and edit), Policies (create and edit) with Receipts (create and edit) held by the same person	Warning	The person who issues receipts and posts cash should not also sell or issue the policies paid for

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

16.6 Daily and periodic tasks

Task	When	Screen
Decide the approvals waiting for you (claim settlements and the other queues)	Every morning and through the day	My Work (2.3)
Approve or return claim settlements	Daily	Approve a settlement (checker) (18.13.4)
Decide claims: review, reject, settle, close	As needed	Claims (18.13)
Check the e-policies received against their placement slips, when the sales and operations approvers are not available	As needed	Placement Slips (18.5)
Approve or return renewal terms and complete return premiums	As needed	Negotiations (18.18), Policy (18.10)
Approve or reject supplier invoices	As notified	Payables (19.6)
Approve or reject the remittances to the insurers, without amount limit	As notified	Approvals (19.10.4)
Review premium, new business, claims rate, retention and receivables	Weekly	Dashboard (20.1), Claims Dashboard (20.2), Processing Dashboard (20.3)
Review the month's financial reports after the month-end close	Monthly	All Reports (23.1)
Review who has access to what and the open segregation-of-duties conflicts	Quarterly, and before an audit	User Access Matrix (21.9), Segregation of Duties (21.12)
Review the approval limits of the roles	Quarterly	Authority Matrix (21.10)
Look up who changed a record and when	As needed	Audit Trail (21.27)

16.7 Procedures

16.7.1 Decide the approvals in My Work

1. Choose **My Work**. The **Approvals** category lists the records waiting for your decision, with the due date, the client, the amount and the next action **Approve or reject**.
2. Select the arrow at the end of a row. The record opens on its approval screen.
3. Decide it there (see the procedures below). The item leaves My Work once decided.

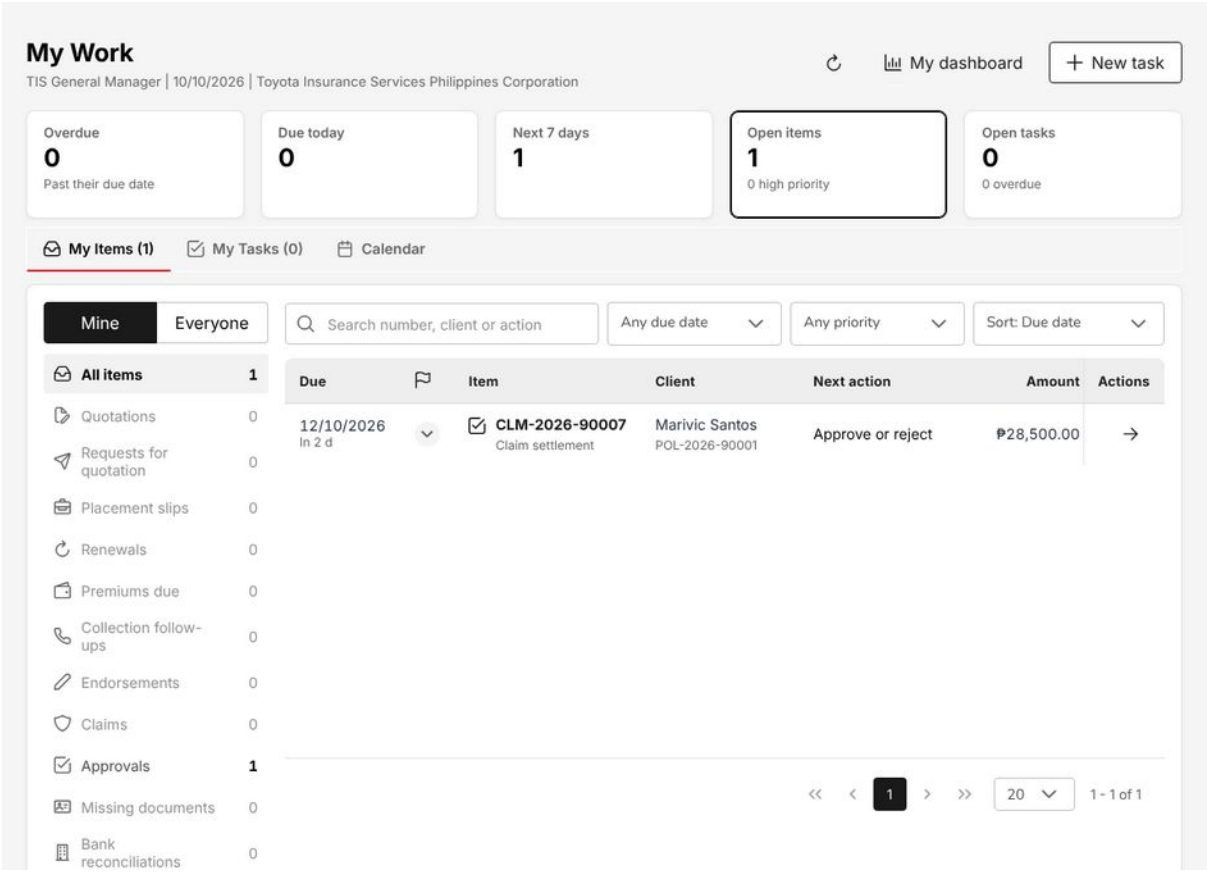

Figure 16.1: My Work of the TIS General Manager with a claim settlement to approve

16.7.2 Approve a claim settlement

A claim settlement submitted by the TIS Operations roles is **Pending Approval**. The approver must be another user than the one who submitted it, and the amount must be within the approver's limit on the Authority Matrix. The TIS General Manager has no amount limit set as delivered (see Approvals (16.4)).

1. Open the settlement from My Work, or choose Operations > Claims and select the count **Settlement to approve**.
2. Check the policy, the insurer and the insurer claim number, the date and cause of loss, the estimate, the adjuster, the settlement type and the settlement amount.
3. Select **Approve settlement**, or **Return for correction** when the settlement must be revised.

An approved settlement settles the claim at once (**Settled**) and the user who submitted it is notified. A returned settlement goes back to **Processing** for correction. See Approve a settlement (checker) (18.13.4).

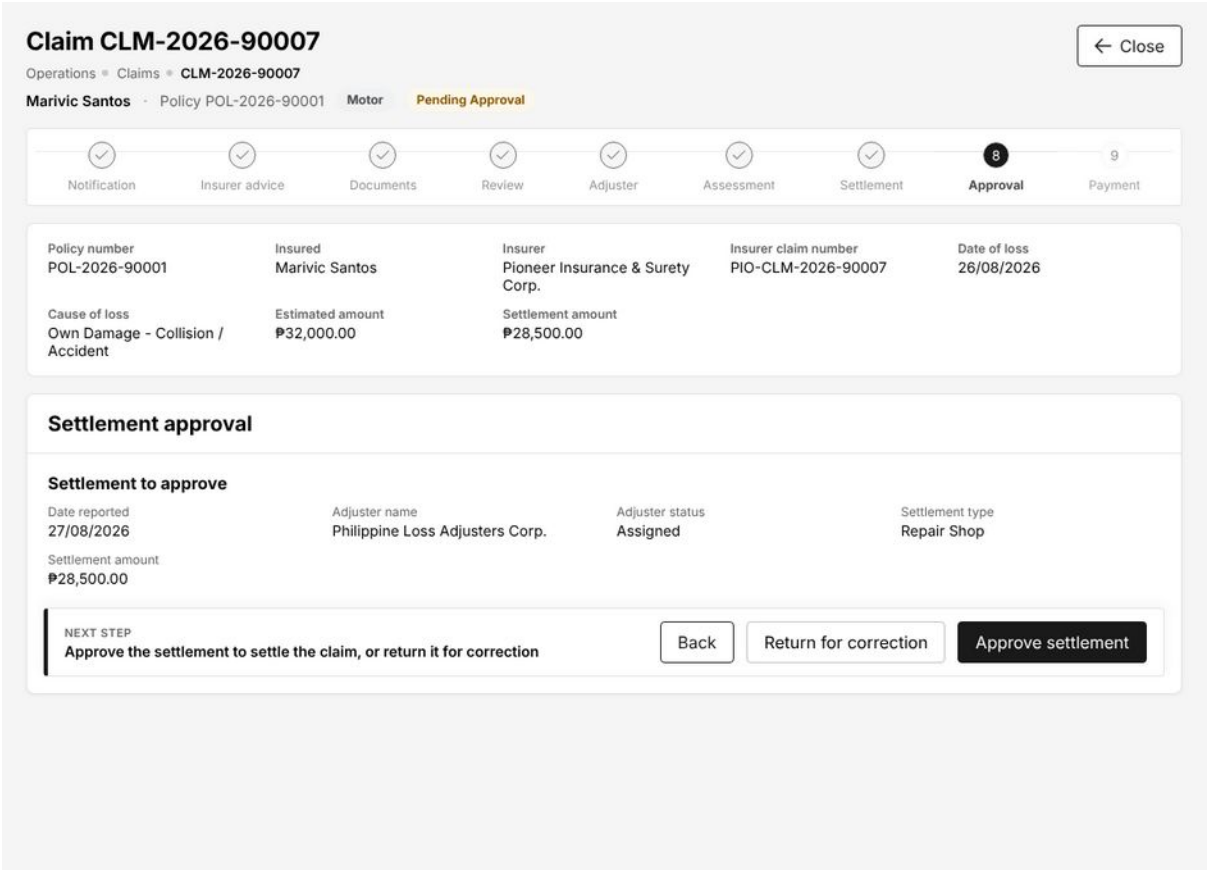

Figure 16.2: Claim settlement to approve: the claim's steps, the settlement amount and the decision

16.7.3 Approve the decisions of the front office

The TIS General Manager holds the same front-office approvals as the TIS Sales Officer, the TIS Sales Unit Head and the TIS Operations Unit Head, and decides them the same way:

- **Check of an e-policy against the placement slip**: see Check an e-policy against the placement slip (5.7.1).
- **Renewal terms**: see Approve renewal terms (5.7.2). The terms waiting for approval are on Operations > Renewals > Negotiations (count **Pending approval**).
- **Return premiums and cancellations**: see Complete a return of premium (5.7.3).

An underwriting referral of a quotation is decided by the TIS Operations Unit Head, not by the TIS General Manager.

16.7.4 Review the business on the dashboards

1. Choose Dashboard > Executive Dashboard.
2. Choose the period (for example **This month**) and the comparison (**Previous period**). **Data as of** shows when the figures were computed; the refresh icon computes them again.
3. Read the cards: total revenue and new business against their targets, active policies, the claims rate, the retention rate, the premium receivable with its overdue part, and the commission receivable. Select a card's arrow to open the records behind it.

4. Scroll down for premium written by month, revenue by product line, claims by stage, the regional performance and the top products and sales performance.
5. Select **Export Report** to save the dashboard.

Choose another dashboard in the first list, or on the side bar: Claims Dashboard, Processing Dashboard, Sales Dashboard. See Dashboard (20.1).

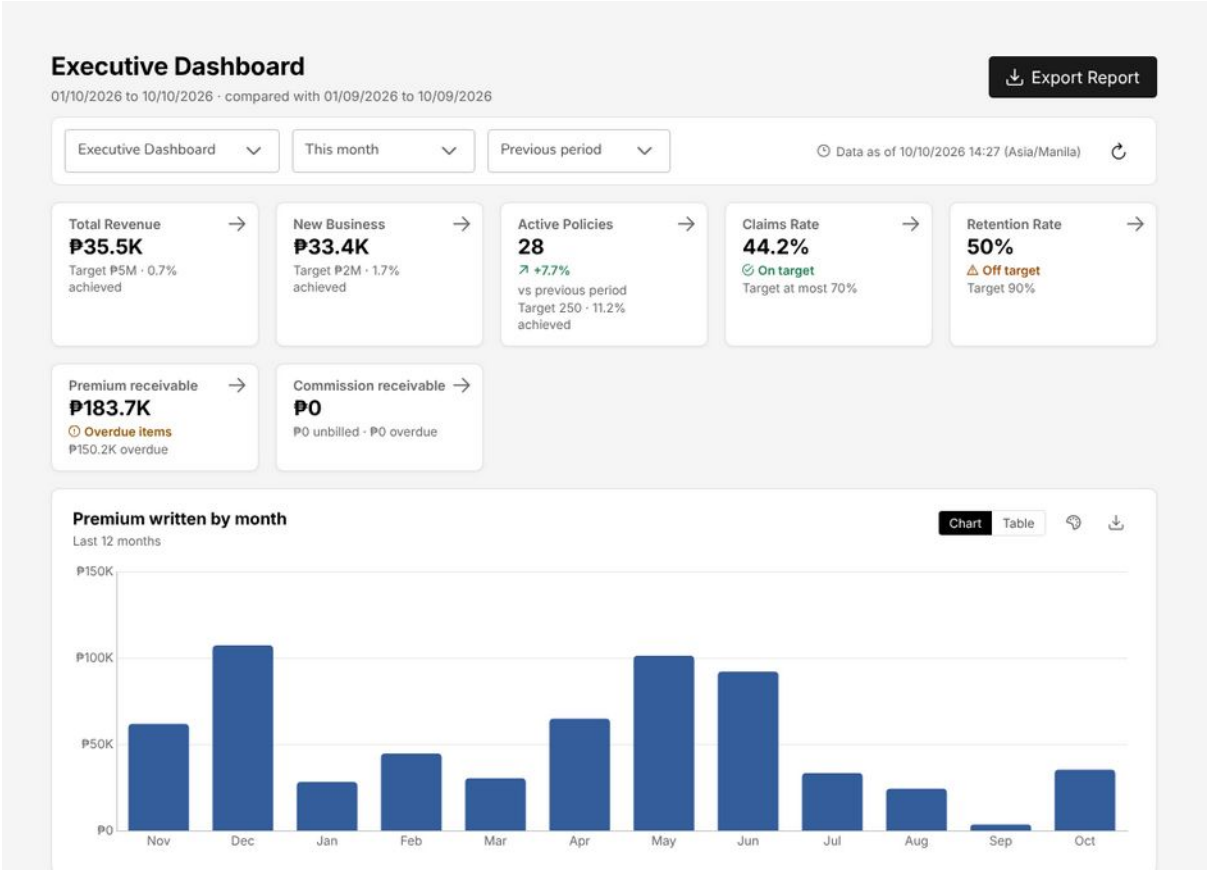

Figure 16.3: Dashboard > Executive Dashboard for the current month, compared with the previous period

16.7.5 Review access and segregation of duties

You review access; changes are made and approved by TIS IT AppSupport / Admin.

1. Choose Master > Users and Access > User Access Matrix. The cards count the active and dormant users, the duty conflicts without an accepted exception, the users without two-step sign-in and the changes pending.
2. Filter by department or role. Each user shows the roles held, the branch, the status, the last sign-in, two-step sign-in, the password age and the segregation-of-duties rules the user breaks.
3. Select **Export to Excel** to keep the review with its date.
4. Choose Master > Users and Access > Segregation of Duties to see each conflict with the roles behind it, its rule and whether an exception was accepted.
5. Choose Master > Users and Access > Authority Matrix to see the largest amount each role may approve per transaction. A limit shown as **Not set** means the role may approve any amount.

6. Ask TIS IT AppSupport / Admin to correct what you find: remove a role, end a user, set a limit.

See User Access Matrix (21.9), Segregation of Duties (21.12) and Authority Matrix (21.10).

16.7.6 Look up a change in the audit trail

1. Choose Master > System > Audit Trail.
2. Filter by user, record type or action. Each line shows the date and time, the user and role, the record, the event, the fields changed and the source (for example **Sign-in**).
3. Select **Export** to keep the result.

See Audit Trail (21.27).

17. TIS Audit

17.1 Role summary

Department: Audit. Internal and external audit: reads the migration workspace, the audit trail, the business records, the ledgers and the reports; changes nothing.

TIS Audit is the role of the internal and external auditors of the cut-over. You read the Data Migration & Go-Live workspace (the loads and their approvals, the reconciliation and its signatures, the runs, the checklist, the Go / No-Go decision, the lock and the hypercare figures) and the audit trail, and you change nothing: no tab of the workspace offers you an action. Through the reports and the records you read, you tie the opening balances, the migrated receivables and the business issued since go-live to the books. Personal data in every download and review is masked.

17.2 Menus available

The menus of this role as delivered. Access: View (open and read), Create and edit (enter and change records), Approve (decide the records of other users).

Menu	Screen	Access
Master > System	Audit Trail	View
Master > System	Data Migration & Go-Live	View

17.3 What you can view, change and approve

Where: the screens of your menus that show the module. A module without a screen of its own is seen inside the screens of other modules (for example the remittance status of a policy).

Area	Module	Access	What it allows	Where

17.4 Approvals

This role approves nothing.

Who approves the work of this role:

Work	Approval	Approved by
Accounts > Remittance > Approvals	Remittance approval within the approver's limit	TIS Finance & General Accounting or TIS General Manager
Accounts > Remittance > Approvals (settlement, adjustment, transfer)	Remittance settlement, adjustment and transfer within the approver's limit	TIS Finance & General Accounting or TIS General Manager

The user who enters a record never approves it: the approval is always another user's.

17.5 Segregation of duties

No delivered segregation-of-duties rule concerns this role.

These are the delivered rules. The rules in force are on Master > Users and Access > Segregation of Duties.

17.6 Daily and periodic tasks

Task	When	Screen
Read the loads of the production run: who uploaded, submitted and approved each one, the counts per result	During the cut-over and the hypercare	Data Migration & Go-Live (21.29)

Task	When	Screen
Check the reconciliation: every difference explained and accepted by a user who did not load the data; the signed report	Before and after the Go / No-Go decision	Data Migration & Go-Live (21.29)
Read the Go / No-Go decision, the criteria, the waivers and the votes, and the lock and unlock requests	At the decision; after every unlock	Data Migration & Go-Live (21.29)
Check who changed what and when, with the values before and after	On request; monthly during the hypercare	Audit Trail (21.27)

17.7 Procedures

17.7.1 Review a load

1. Choose Master > System > Data Migration & Go-Live and open **Loads**.
2. Open the load. The header shows its number, the run, the file and its hash, who uploaded, submitted and approved it and when, and the counts per result.
3. **Rows** lists every row with its result; a **Changed** row shows the fields changed with the values before. **Duplicates** lists the matches and the decision taken on each, with the user and the reason.
4. **Activity** lists every action on the load: validation, submission, approval or rejection with its reason, load, undo request and decision.

17.7.2 Review the reconciliation and the decision

1. On **Reconciliation**, open the reconciliation of the run. Each line shows the figure of the old system, the figure loaded, the difference and its explanation, who accepted it and who signed each slot. **Download report** gives the signed report; its hash is shown next to it.
2. On **Go-Live**, read the criteria with their results, the waivers with their reasons, the votes of the named approvers and the lock and unlock requests with their two users.
3. On **Runs**, open the production run for its checklist steps with owner, times and evidence, its defects and the **Evidence pack**.

18. Screen reference: Operations

The screens of the Operations menu, in menu order: prospects, quotations and placement, clients, policies, claims, renewals and the policy services.

Each section names the menu of the screen and the roles that open it, with their access. Your own menu shows only the screens of your role. The step-by-step business procedures are in The TISPH process end to end (chapter 3); this chapter describes each screen: what it shows, its fields, its buttons and its statuses.

18.1 Prospects

A prospect is a person or company that TISPH quotes before it becomes a client: a buyer referred by Toyota Financial Services (TFS), a dealer sale, a walk-in client or a referral.

Menu: Operations > Sales & Marketing > Prospects

Role	Access
TIS Sales Associate	Create and edit
TIS Sales Officer	Create and edit
TIS Sales Unit Head	Create and edit
TIS Operations Associate	View
TIS Operations Officer	View
TIS Operations Unit Head	View
TIS IT AppSupport / Admin	View
TIS General Manager	Create and edit

The cards at the top count **Total Prospects**, **Last 7 Days**, **Last 30 Days**, **Converted Prospects** (with the conversion rate), **With Quotations** (with the quotation rate) and **Active Prospects**. The chips below them (**Motor**, **Personal Accident**, **Credit Life**, **Marine**, **Product not yet tagged**) filter the list by product line; **All Categories** filters by **Retail** or **Corporate**. **Show Filters** adds the country, province and city.

The list shows **Prospect ID** (LD-YYYY-NNNNN), **Name**, **Category**, **Product line**, **Mobile**, **E-mail**, **Quotations**, **Created on**, **Status** and **Actions**.

Status	Meaning
New	Created, not yet contacted
Contacted	A sales activity has been logged on the prospect
Quote Generated	At least one quotation exists
Converted	A policy has been booked; the prospect is now a client
Lost	The prospect did not buy

The buttons above the list are **Bulk Upload** (prospects from an Excel file, validated before they are created), **Generate Report** (the list as an Excel file) and **Create Prospect**.

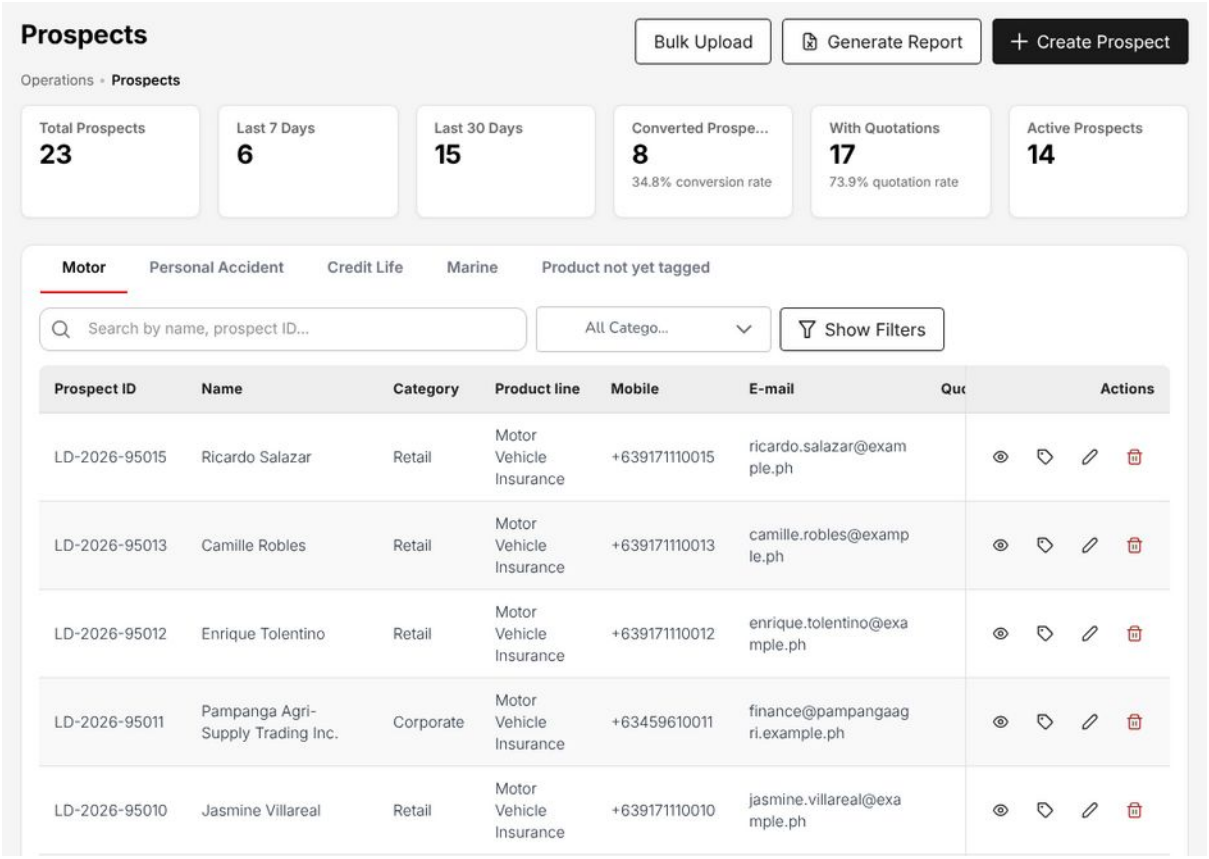

Figure 18.1: Operations > Sales & Marketing > Prospects, with the prospects by product line and status

18.1.1 Create a prospect

1. Choose Operations > Sales & Marketing > Prospects and select **Create Prospect**.
2. Choose **New customer**, or **Existing client** to find a client by name, mobile number or e-mail (the prospect is then linked to that client). Select **Continue**.
3. Choose the **Line of Business** and the **Product** the prospect is for, and select **Continue**. If the product is not known yet, select **Skip - tag product later**: the first quotation asks for it.
4. Fill in the prospect form and select **Save & Continue**.

Field	Required	What to enter	Rule
Category	Yes	**Retail** (a person) or **Corporate** (a company)	A corporate prospect asks for the company name instead of the personal details
First name, **Last name**, **Preferred name**	Yes	As on the client's ID	
Date of birth, **Gender**	Yes		
E-mail	Yes	The e-mail address	Used for the quotation approval link and campaign offers
Mobile number	Yes	For example 0917 123 4567 or +63 917 123 4567	
Country, **Province**, **City / Municipality**, **Barangay**, **ZIP Code**, **House / Unit No.**	Yes	The address	The city list follows the province; **Region** and **Street / Subdivision** are optional
Source	No	Where the lead came from, for example **Walk-In**, **Referral**, **Bundling**	From Lead sources and reason codes (21.6)

Field	Required	What to enter	Rule
Product	No	The product chosen in step 3	**Product not yet tagged** when skipped

The prospect is created with the status **New** and the next number of the prospect series. The assignment rules of Lead Assignment (18.6) give it an account executive.

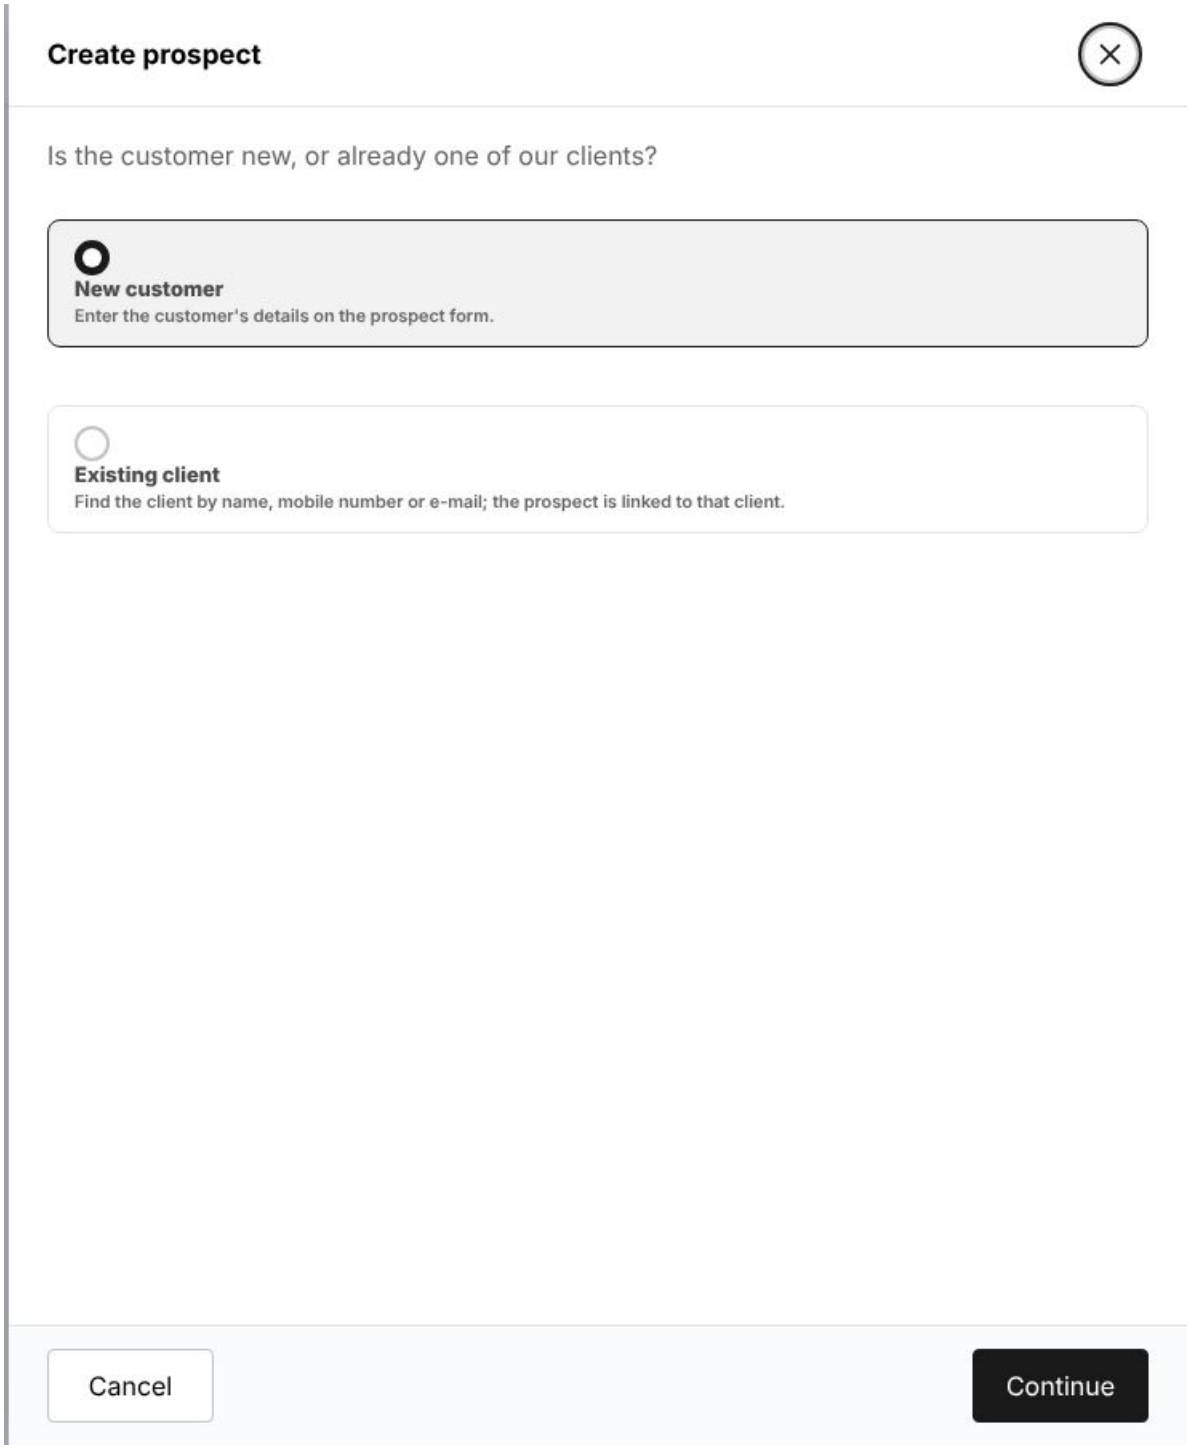

Figure 18.2: Create prospect: the choice between a new customer and an existing client

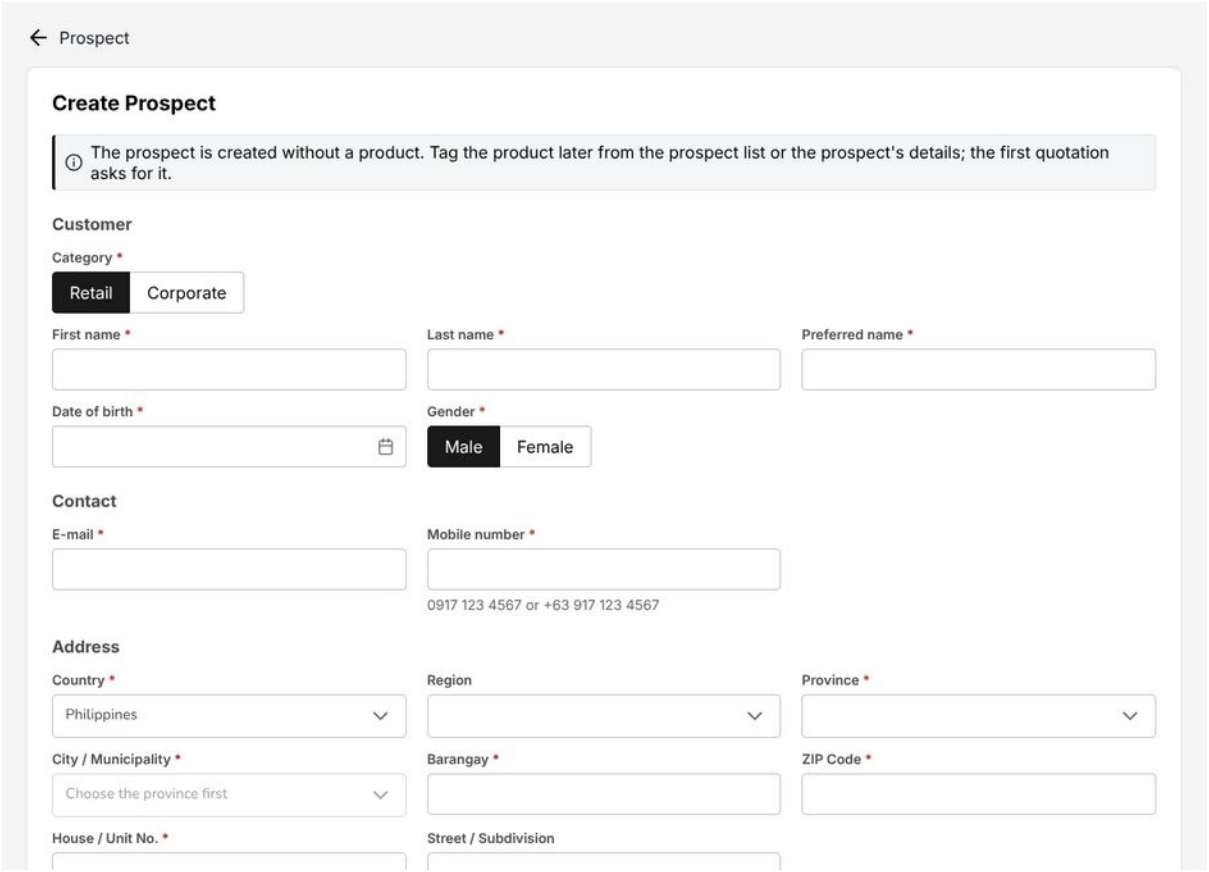

Figure 18.3: The prospect form

18.1.2 View, edit or delete a prospect

Select a row (or the eye in **Actions**) to open the prospect. The prospect page shows the prospect's quotations with the same counters as the quotations list, **Add Quote** to quote the prospect, and **Convert** on an approved quotation. The pencil opens the prospect form for a change.

A prospect is not deleted once it has a quotation or a sales activity: set it to **Lost** instead. Every change is kept in the history of the prospect.

18.2 Quick Quote

Quick Quote prices a package product on the spot from the product's rates, without the steps of a full quotation: for example Compulsory Credit Life, Personal Accident or Parcel / Courier Insurance.

Menu: Operations > Sales & Marketing > Quick Quote

Role	Access
TIS Sales Associate	Create and edit
TIS Sales Officer	Create and edit
TIS Sales Unit Head	Create and edit
TIS Operations Associate	Create and edit
TIS Operations Officer	Create and edit
TIS Operations Unit Head	Create and edit
TIS General Manager	Create and edit

1. Choose Operations > Sales & Marketing > Quick Quote.
2. In **Line of Business**, choose the line; in **Product**, choose the package product. Only package products are offered.
3. Choose the plan or package and enter the details the product asks for (insured, sum insured or plan, period).
4. Check the premium shown with its taxes and create the quotation.

The quotation is created in **Draft** on Quotations (18.4) and follows the same steps as any quotation. When a product has no quick quote on this build (for example **Credit Life - Compulsory**), the screen says so and offers **Request quotation**, which opens a request for quotation to the insurers. For a product that is not a package, use **Request for Quotation (non-package)** at the top of the screen, which opens Requests for quotation (18.3).

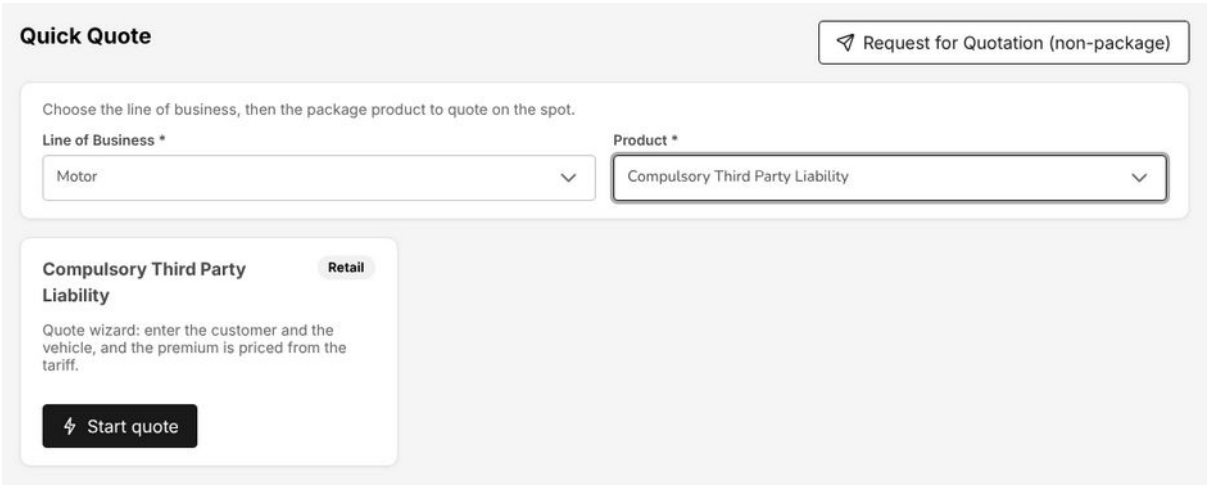

Figure 18.4: Operations > Sales & Marketing > Quick Quote

18.3 Requests for quotation (broker slips)

A request for quotation asks several panel insurers for their terms on one risk, for example a fleet or a group personal accident cover. It is optional: most motor quotations are priced on the motor tariff.

Choose Operations > Sales & Marketing > Request for Quotation (Broker Slip). The cards count the requests by status (**Submitted**, **Responses in**, **Placement raised**, **Closed**); select a card to filter. Each row shows **Slip No.**, **Insured**, **Product**, **Sum insured**, **Offers / approached** (with the number declined), **Best offer (gross)**, **Response due**, **Age**, **Status** and the **Quotation Slip** made from it. Select a row to open it.

Menu: Operations > Sales & Marketing > Requests for Quotation

TIS General Manager	Create and edit

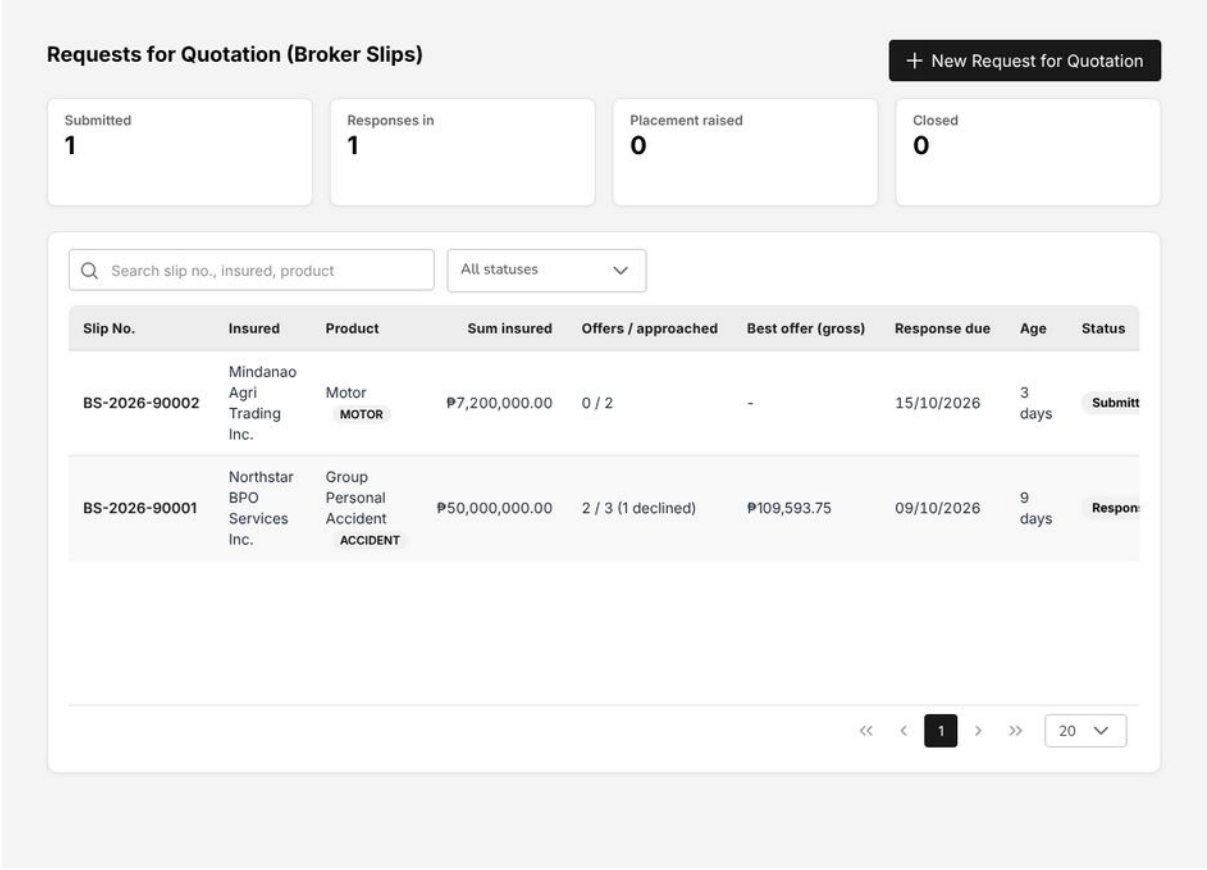

Figure 18.5: Operations > Sales & Marketing > Requests for Quotation, with the offers received per request

To create a request, select **New Request for Quotation**:

Field	Required	What to enter	Rule
Customer	Yes	**Client**, **Prospect** or **New prospect**, then the name	
Line of Business, **Product**	Yes	The line and the product of the risk	The product decides the risk details and the covers offered
Insured	No	The insured named on the policy, if not the customer	
Inception, **Expiry**	No	The period of cover asked for	
Response due	No	The date by which the insurers must answer	Shown as overdue afterwards
Risk details	Depends on the product	For example the vehicles or the number of employees	
Requested covers	No	Each cover with its **Sum insured** and **Deductible**; **Add cover** adds a row	
Insurers to approach	Yes	One or more panel insurers	Each receives the request by e-mail
Remarks	No	What the client asked for	Printed on the slip

Save draft keeps the request as **Draft**. **Save and submit to market** sends it to the insurers: the status becomes **Submitted**.

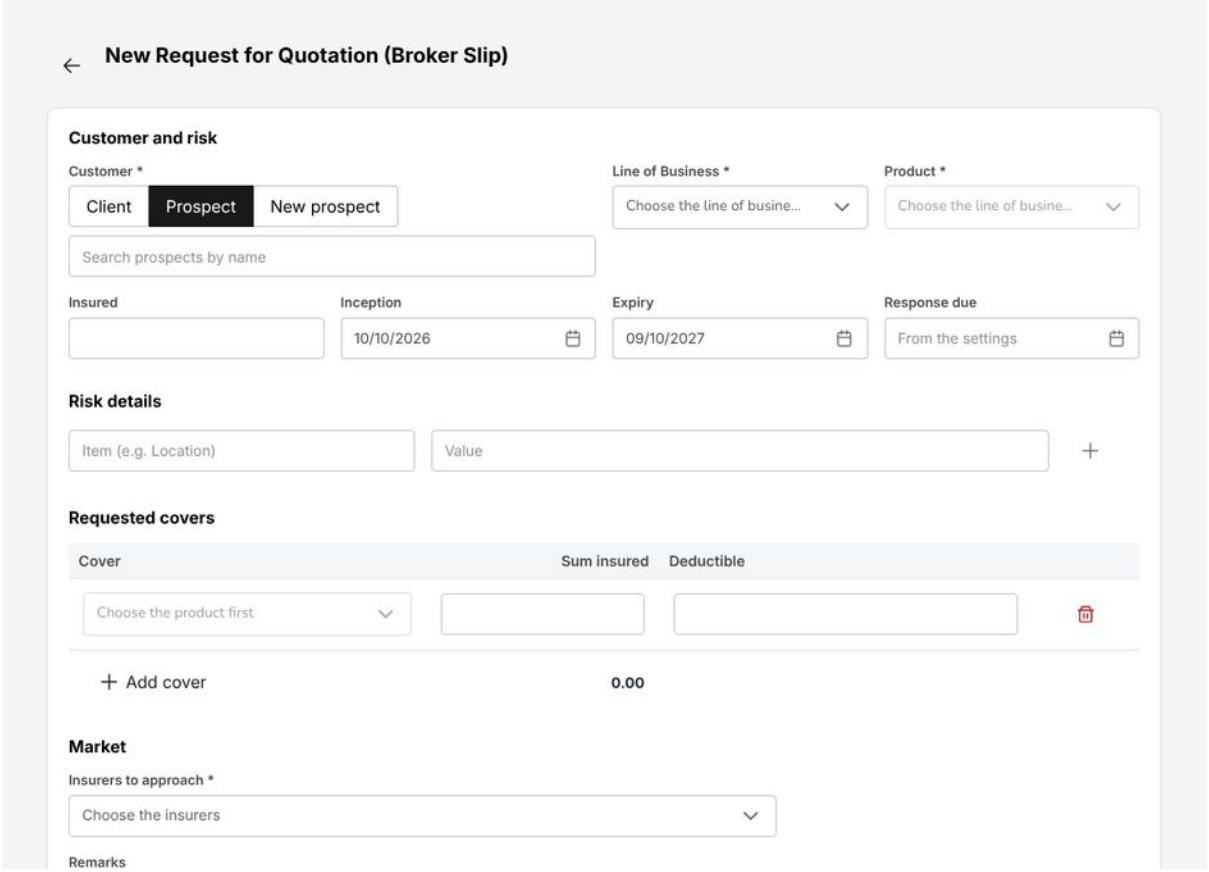

Figure 18.6: New Request for Quotation (Broker Slip)

On the request, the tabs are **Market responses**, **Compare offers**, **Risk and covers** and **History**. Record each insurer's answer (premium, rate, deductibles, special terms, the line it writes) or its decline; with the answers in, the status becomes **Responses in**. On **Compare offers**, the best offer is marked **Best** and the others show their difference (**vs best**). Select the offer or offers to place and the lead insurer: the shares must total exactly 100%. Then select **Prepare Quotation Slip**.

The buttons of the request are **Print slip**, **Client comparison report** (see Comparison Reports), **Add insurer**, **Close (not taken up)** and **Cancel slip**. The stepper at the top shows the journey: **Request for Quotation**, **Quotation Slip**, **Placement raised**, **Insurer issued (Booked)**.

18.4 Quotations

The quotation (quotation slip) is the offer given to the client: the insurer, the covers and the premium with its taxes.

Menu: Operations > Sales & Marketing > Quotations

Role	Access

TIS Sales Officer	Approve
TIS Sales Unit Head	Approve

Role	Access
TIS Operations Associate	Create and edit
TIS Operations Officer	Create and edit
TIS Operations Unit Head	Approve
TIS IT AppSupport / Admin	View
TIS General Manager	Approve

The cards count **Total Quotations**, **Active Quotations**, **Pending Review**, **Approved Quotations** (with the approval rate), **Converted to Policy** and the **Average Premium**. The list shows **Quote ID** (QT-YYYY-NNNNN), **Prospect Name**, **Policy Type**, **Gross premium**, **Date**, **Status** and **Actions** (**View Details**; **Edit Quotation** while the quotation can still be changed).

Status	Meaning
Draft	Saved, not yet sent to the client
Pending Customer	Sent to the client for approval
Customer Accepted	The client accepted; the placement slip is raised
Submitted to Insurer	The placement slip has gone to the insurer
Approved	Approved by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, a user other than the one who created it
Rejected	Turned down, with a reason
Converted to Policy	The insurer's policy has been booked

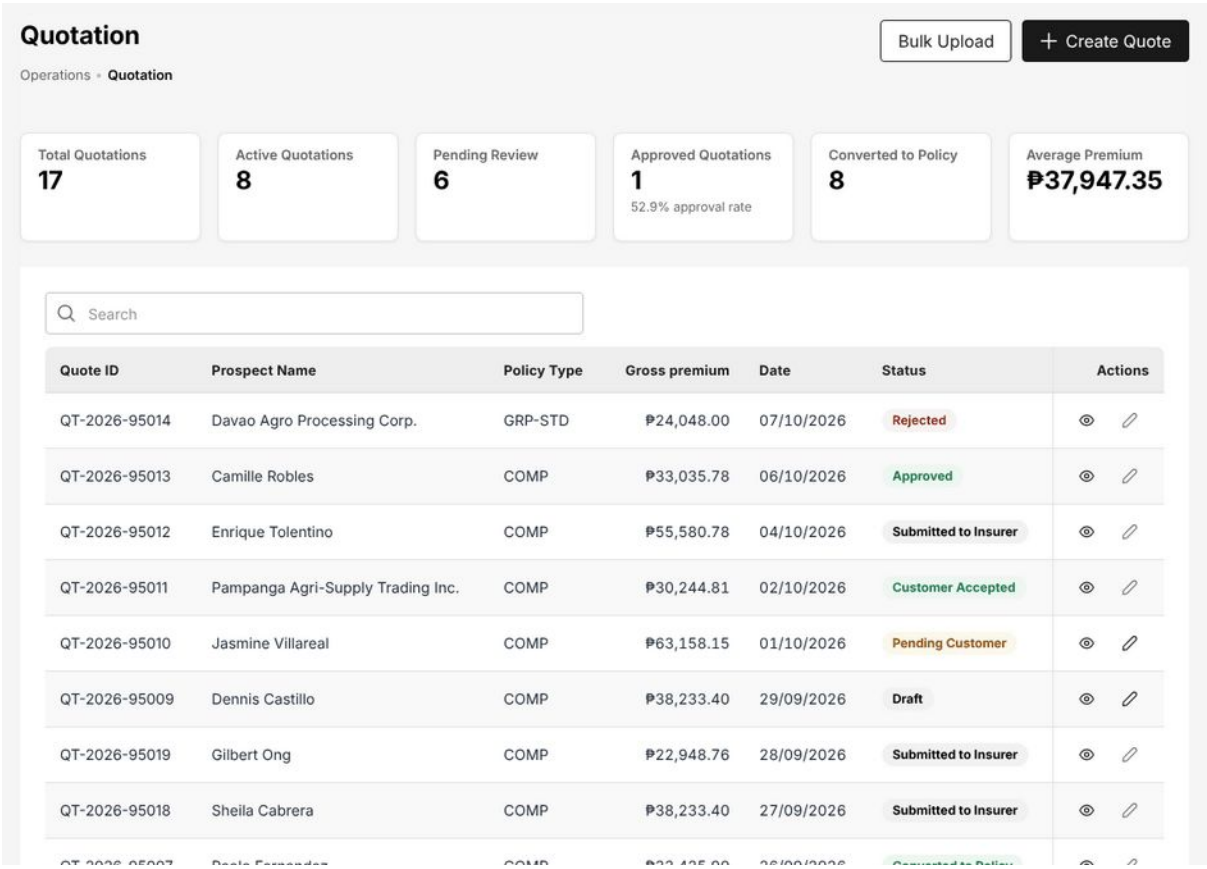

Figure 18.7: Operations > Sales & Marketing > Quotations

The quotation page has the tabs **Details**, **Activities** and **Audit Trail**. **Details** shows the placement journey, the policy details (insurer, co-insurance, policy type, referrer), the

assured, the vehicle (for motor), the coverage details and the payment details: **NET Premium**, **DST (12.5%)**, **VAT (12%)**, **LGT (0.75%)**, **Others**, **Discount** and **Gross premium**. The actions depend on the status: **Send for Customer Approval** on a draft, **Copy approval link** and **Record customer response** while it waits for the client, **Proceed to Policy** once accepted. See Quotation and request for quotation (3.4).

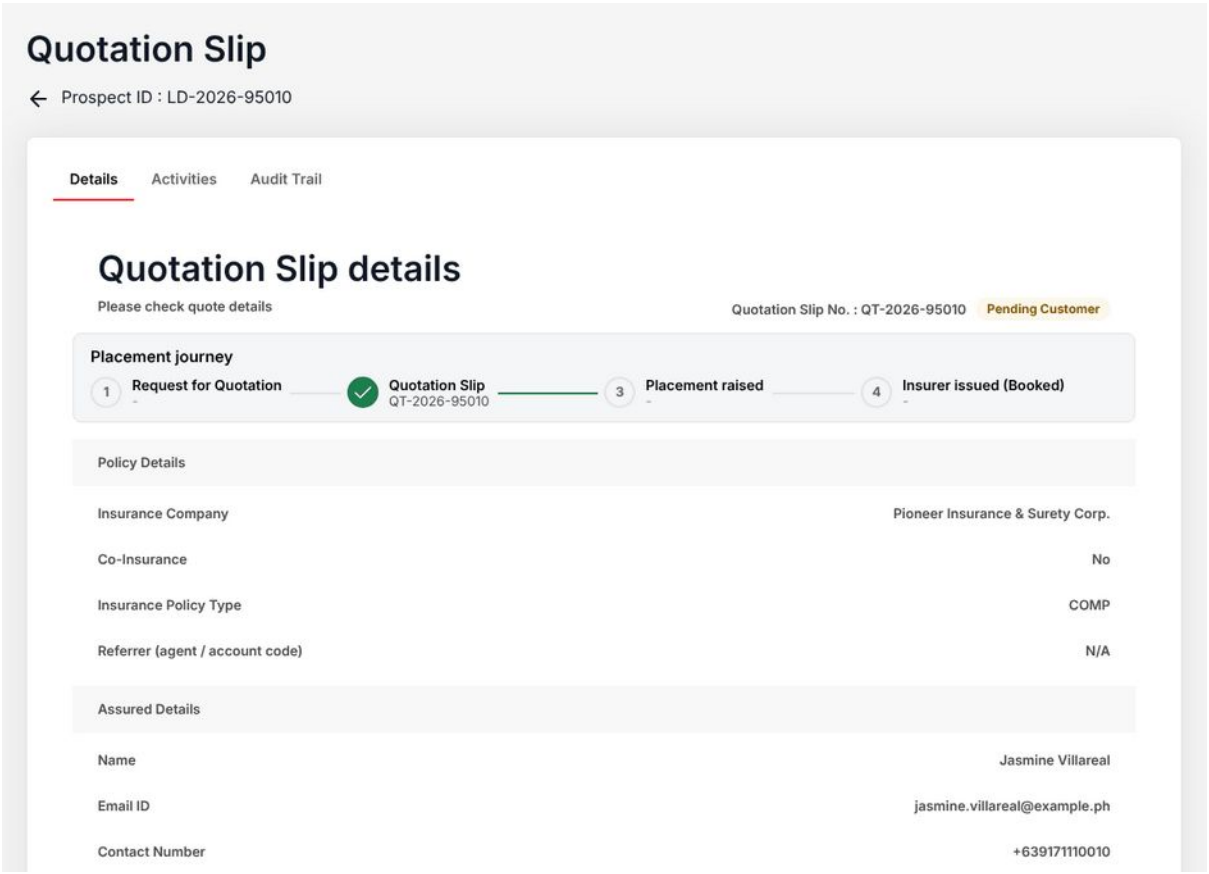

Figure 18.8: A motor quotation waiting for the client, with Copy approval link and Record customer response

18.4.1 Create a motor quotation

A motor quotation is made for a prospect and has four steps: **Policy details**, **Coverage**, **Accessories** and **Summary**. Nothing is saved until the last step, so you can move with **Back** and **Next**.

1. Choose Operations > Sales & Marketing > Prospects and open the prospect (or select **Create Quote** on Operations > Sales & Marketing > Quotations, choose the motor product and then the prospect).
2. Select **Add Quote**. In **Line of Business**, choose **Motor**; in **Product**, choose the motor product. Select **Continue**.
3. **Policy details**: choose the insurer (**Select Insurance Company**, or **Co-Insurance** for several insurers), the **Insurance Policy Type**, the **Referrer (agent / account code)** if any, and the **Payment Type** (required). Under **Insurance Vehicle Details**, choose **Vehicle Type** (the tariff class), **Vehicle Brand**, **Vehicle use**, **Model Year**, **Vehicle Model**, **Model Variant**, **Vehicle Color** and **Seating Capacity** from the vehicle master. Under **Risk details for the product rules**, enter the **Fair market value of the vehicle**, the **Claims in the last 3 years** and the **Driver's date of birth**

(required: the acceptance rules of the product check them), and if they apply **The vehicle has modifications**, **Claim-free years (NCB)** and **Vehicles in the fleet**. Select **Next**.

4. **Coverage**: the mandatory covers of the product are always included; tick the optional covers to quote. Enter the own damage sum insured (the invoice price for a new car) and rates, acts of nature, the bodily injury and property damage limits, auto passenger personal accident per seat, and CTPL for 1 or 3 years at the Insurance Commission tariff. Select **Calculate**; **Override** lets an authorised user change a computed premium.
5. **Accessories**: add the accessories with their value, if any.
6. **Summary**: check the premium (net premium, DST, VAT, LGT, gross premium) and complete the quotation.

The quotation is created in **Draft**. Open it and select **Send for Customer Approval** to send it to the client.

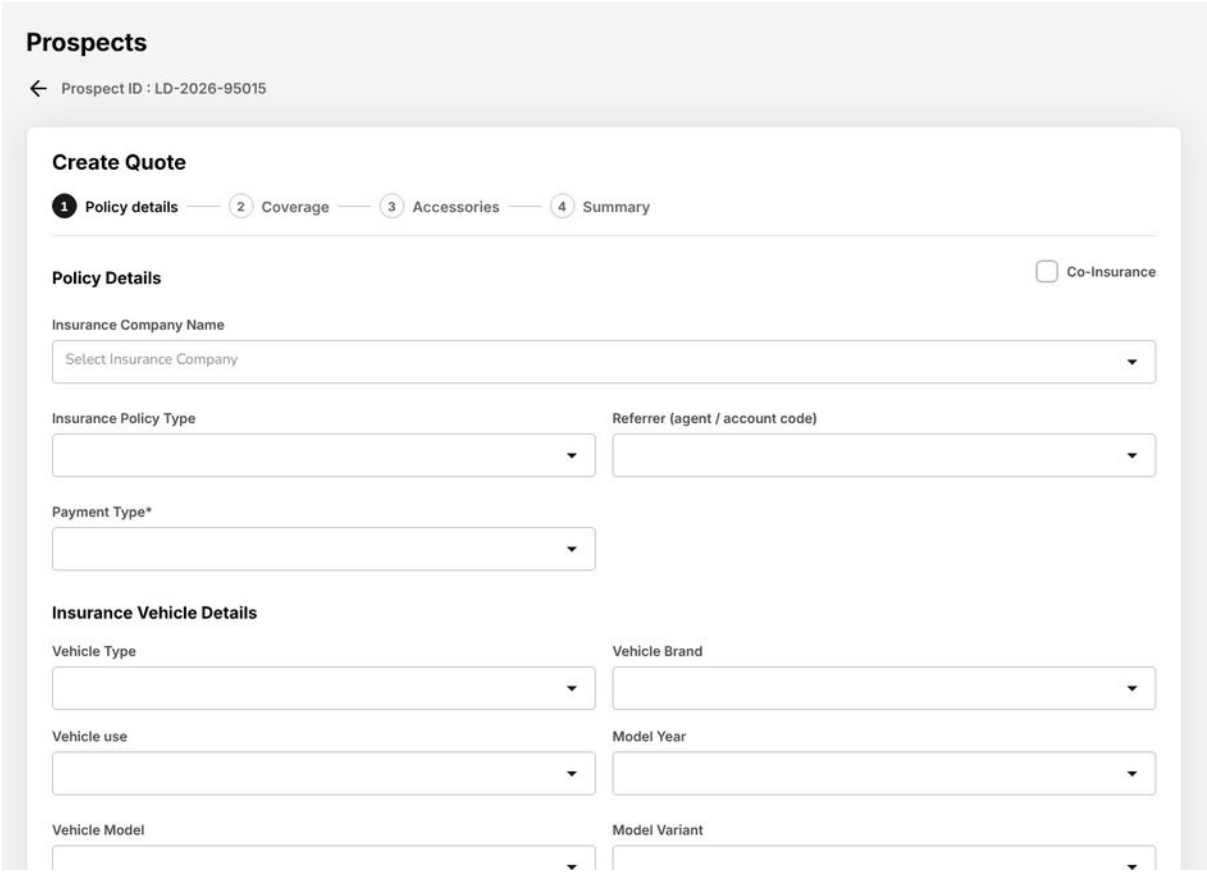

Figure 18.9: Create Quote, step 1 Policy details: insurer, vehicle and the risk details of the product rules

18.5 Placement Slips

The broker never issues cover. A placement slip goes to the insurer, the insurer acknowledges it and returns the e-policy, the e-policy is checked against the slip and only then is the policy booked. No screen lets a user complete cover without the insurer.

Menu: Operations > Sales & Marketing > Placement Slips

Role	Access
TIS Sales Associate	Create and edit
TIS Sales Officer	Approve
TIS Sales Unit Head	Approve
TIS Operations Associate	Create and edit
TIS Operations Officer	Create and edit
TIS Operations Unit Head	Approve
TIS IT AppSupport / Admin	View
TIS General Manager	Approve

The cards count the placements at each step: **Placement raised**, **Sent to insurer**, **Acknowledged**, **e-Policy received**, **Checked against slip** and **Insurer issued (Booked)**. The list shows **Placement No.** (PS-YYYY-NNNNN), **Insured**, **Product**, **Lead insurer**, **Gross premium**, **Period**, **Source** (**From quotation slip** or **Direct placement**), **Status** and the booked **Policy**. Filter by status and by source.

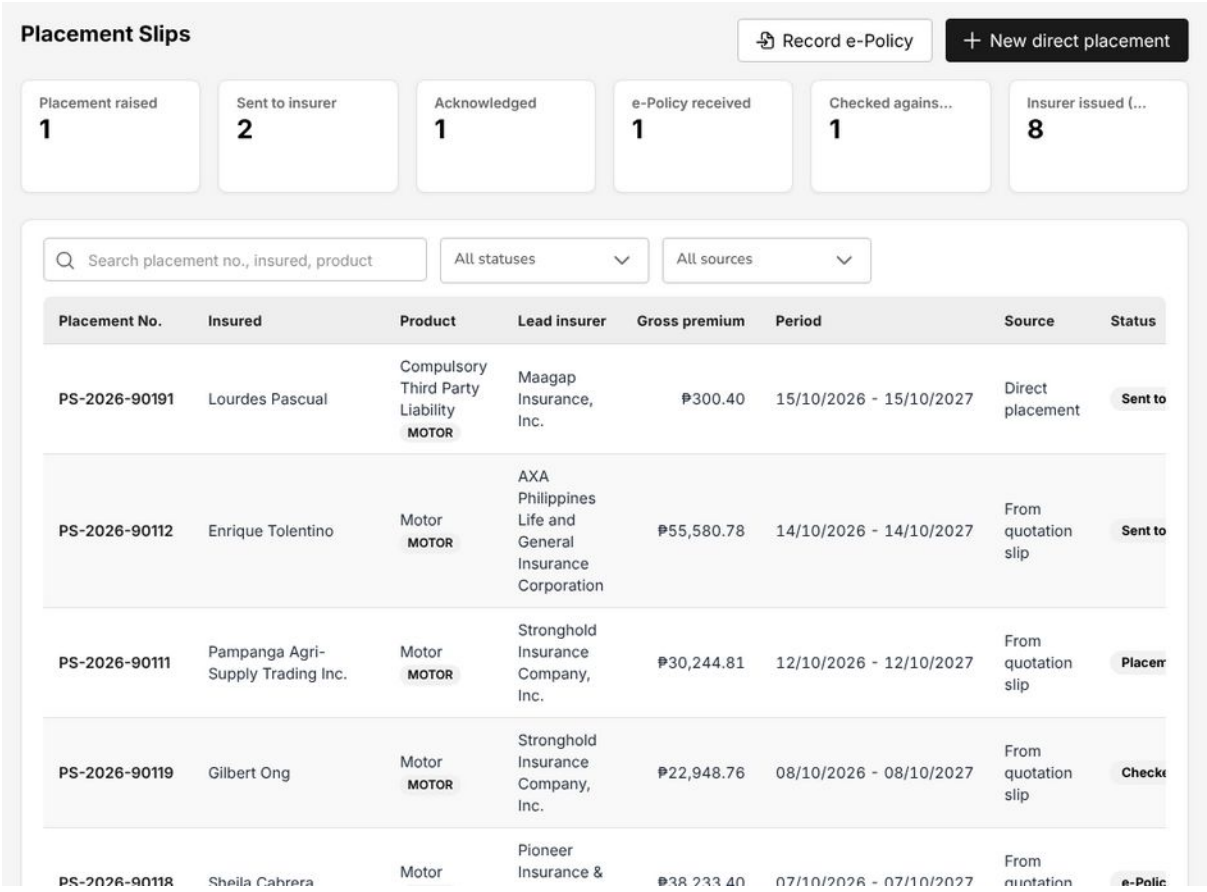

Figure 18.10: Operations > Sales & Marketing > Placement Slips, with the count of placements at each step

A placement slip is raised by the client's acceptance of a quotation, or directly with **New direct placement** for a risk that needs no quotation (for example a CTPL cover):

Field	Required	What to enter	Rule
Customer	Yes	**Client**, **Prospect** or **New insured**	
Line of Business, **Product**	Yes	The line and product	

Field	Required	What to enter	Rule
Risk details	Depends on the product	For motor: the vehicle and its identifiers	
Inception	Yes	The start of cover	
Expiry	No	The end of cover	One year after inception if left empty
Sum insured	No	The sum insured	
Net premium	Yes	The premium before taxes	Taxes are computed
Commission rate	No	The broker's commission rate	Defaults from the commission rate matrix
Billing mode	No	**System default**, or broker bill or direct bill	
Security (participating insurers)	Yes	Each insurer with its **Share**; mark the **Lead**	One lead insurer; the shares must total exactly 100%

Select **Create Placement Slip**. The status is **Placement raised**.

On the placement slip the buttons follow the status: **Edit participants** and **Send to insurer(s)** (placement raised), **Record acknowledgement**, **Upload e-policy** or **Record decline** (sent), **Check against slip** (e-policy received), **Book (Insurer issued)** (checked), and at every step **Print slip** and **Cancel slip**. The page shows the stepper, the **e-Policy** panel with the result of the comparison, the **Security (participating insurers)** with each insurer's share, premium, taxes, commission and policy number, the **Premium** breakdown, the **Summary**, the **Risk** and the **History**.

The check against the slip compares the net and gross premium, the sum insured, the commission, the effective and expiry dates, the insured and, for motor, the chassis, engine and plate numbers. Amounts within PHP 1.00 of the slip match. The check is decided by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, never by the user who recorded the e-policy: **Confirm check**, **Accept differences** (with a reason) or **Return to insurer** (with a reason). See Placement with the insurer (3.5) and Book the policy (3.6.1).

18.5.1 Record e-Policy

Use **Record e-Policy** to key the e-policies the insurers send back without searching for each placement slip. Choose Placement Slips and select **Record e-Policy**: the list shows the placement slips sent to the insurer or acknowledged, with **Placement No.**, **Insured**, **Product**, **Lead insurer**, **Gross premium**, **Sent** and **Status**. Select a row, then fill in the e-policy:

Field	Required	What to enter
e-Policy file	Yes	The PDF the insurer sent
Insurer policy number	Yes	As printed on the e-policy
Participant name	Yes	The insured named on the e-policy
Sum insured, net premium, gross premium, commission	Yes	As on the e-policy
Issue date, issuance date, effective date, production date	Yes	As on the e-policy
Chassis number, engine / motor number, plate number (motor)	Yes	As on the e-policy; the plate number or the MV file number is required

The placement slip becomes **e-Policy received** and opens afterwards for the check against the slip by another user.

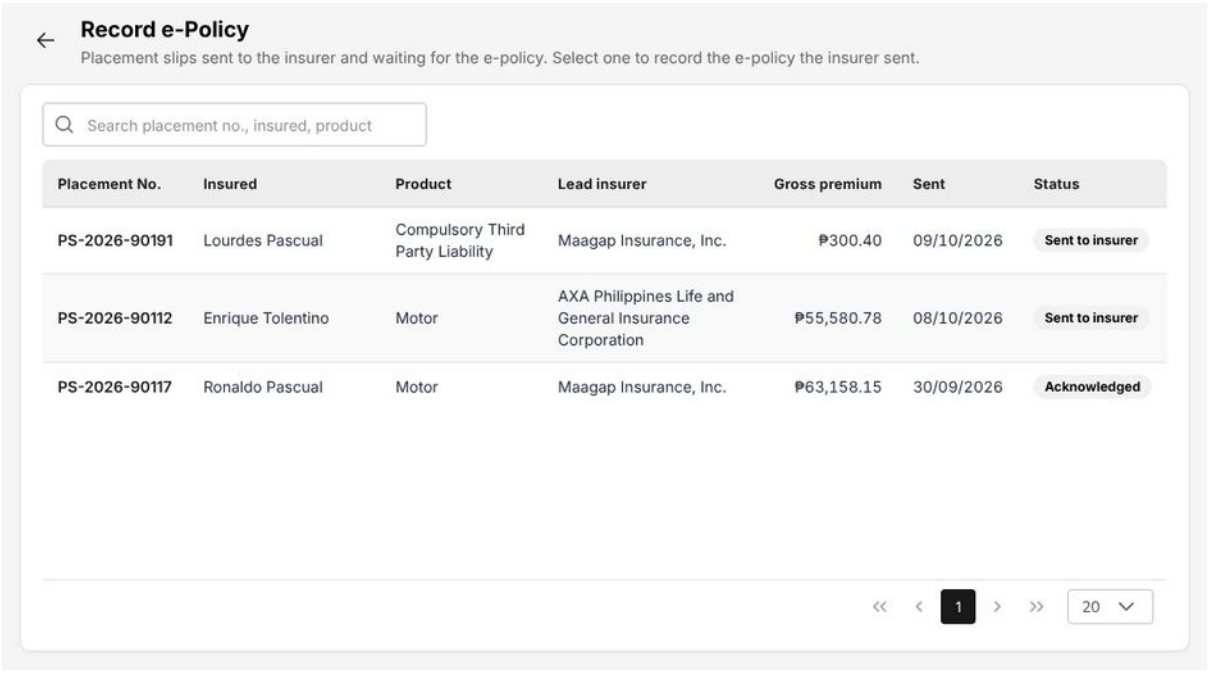

Figure 18.11: Record e-Policy: the placement slips waiting for the insurer's e-policy

18.6 Lead Assignment

Lead Assignment decides who works each prospect.

Menu: Operations > Sales & Marketing > Lead Assignment

TIS Operations Unit Head	View
TIS IT AppSupport / Admin	View
TIS General Manager	Create and edit

The screen has three tabs:

- **Team View**: for each team member (filter **My team** or the whole team), the prospects **Open**, **New**, **Converted**, **Lost**, **In queue** and of the **Last 30 days**, and below the prospects of the team with their **Status**, **Line**, **Territory**, **Channel**, **Account executive** and **Assignment**.
- **Reassignment Queue**: the prospects no rule could assign, or released by their account executive. Select a prospect and assign it to an account executive.
- **Assignment Rules**: the rules that give a new prospect its account executive. The first active rule by **Priority** whose **Conditions** match the prospect applies; empty conditions match any prospect. **Method** is **Round robin** between the rule's

Account executives, or a fixed account executive. **Add rule** creates a rule; the switch in **Active** turns it off.

At TISPH the rules send the TFS referrals of each TFS office to the account executives of that territory.

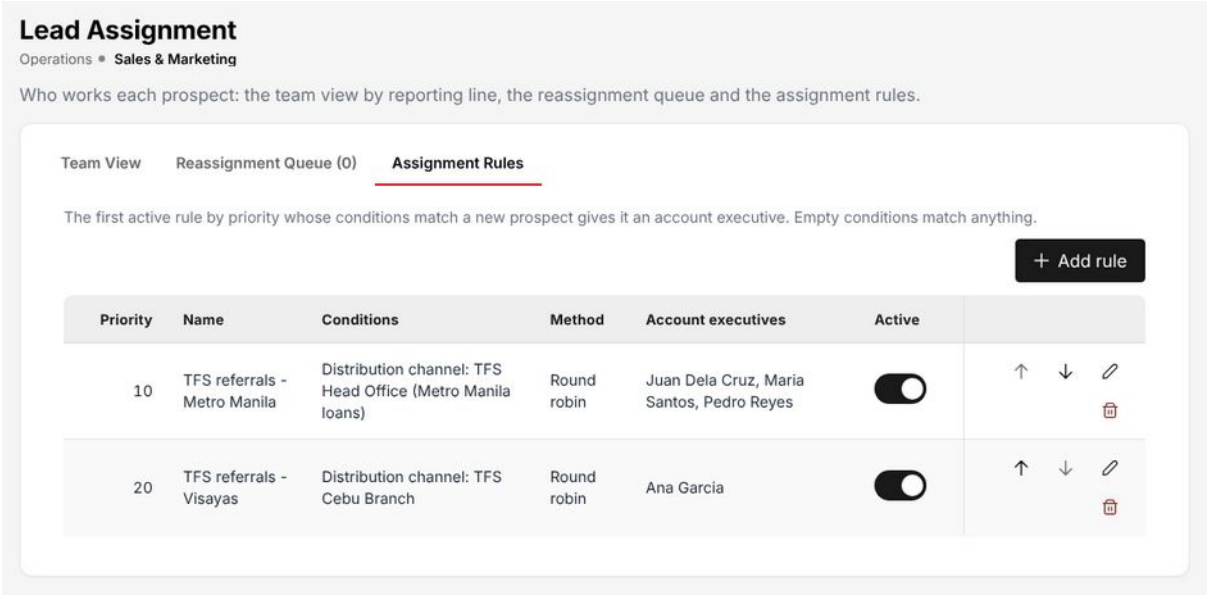

Figure 18.12: Lead Assignment, Assignment Rules: TFS referrals by office, shared round robin

18.7 Dealer Programmes

Choose Operations > Sales & Marketing > Dealer Programmes. A programme holds the terms agreed with a dealer, and optionally its financing bank, for brand-new vehicles.

Menu: Operations > Sales & Marketing > Dealer Programmes

Role	Access
TIS Sales Associate	View
TIS Sales Officer	View
TIS Sales Unit Head	View
TIS Operations Associate	View

TIS IT AppSupport / Admin	Create and edit
TIS General Manager	View

The **Programmes** tab lists **Code**, **Name**, **Dealer**, **Financing bank**, **Insurer**, **Rates**, **Who pays**, **Upload creates**, **Sales** and **Status**. **Add programme** opens the programme form:

Field	Required	What to enter	Rule
Code, **Name**	Yes	For example TMK-TFS-2026, "Toyota Makati x TFS financed cars 2026"	The code is unique
Dealer	Yes	The dealer of Distribution Channels (21.1)	
Financing bank, **Mortgagee of the financed cars**	No	The bank, for financed cars	The bank is the mortgagee on the policy
Insurer	Yes	The panel insurer of the programme	

Field	Required	What to enter	Rule
Default vehicle class	Yes	The tariff class of the cars sold	
Own damage rate %, **Acts of nature rate %**	Yes	The rates agreed	
Excess bodily injury, **Property damage**	No	The limits included	
CTPL, **Include CTPL**	No	Whether CTPL is included and for **1** or **3 year(s)**	
Upload creates	Yes	**Quotation to follow up** or **Policy issued**	What a row of the dealer's sales file creates
Free first year	No	The dealer (or bank) pays the whole first-year premium	
Subsidy paid by, **Subsidy**, **Subsidy value**	No	Who pays part of the premium (**Nobody (buyer pays)**, the dealer or the bank), as a percent of premium or an amount	
Effective from, **Effective to**	Yes	The period of the programme	Sales outside the period are refused
Mortgagee clause	No	The clause printed on the policy	Used when the bank has no clause of its own
Status, **Notes**		**Active** or inactive	Only an active programme accepts uploads

The **Dealer Sales Upload** tab takes the dealer's sales file: choose the programme, download the **Template** if needed and select **Upload sales**. Each upload is a batch (DSB-YYYY-NNNNN) with its **Created** and **Failed** rows and its status (**Completed** or **Partial**). See Dealer programme policies (3.3).

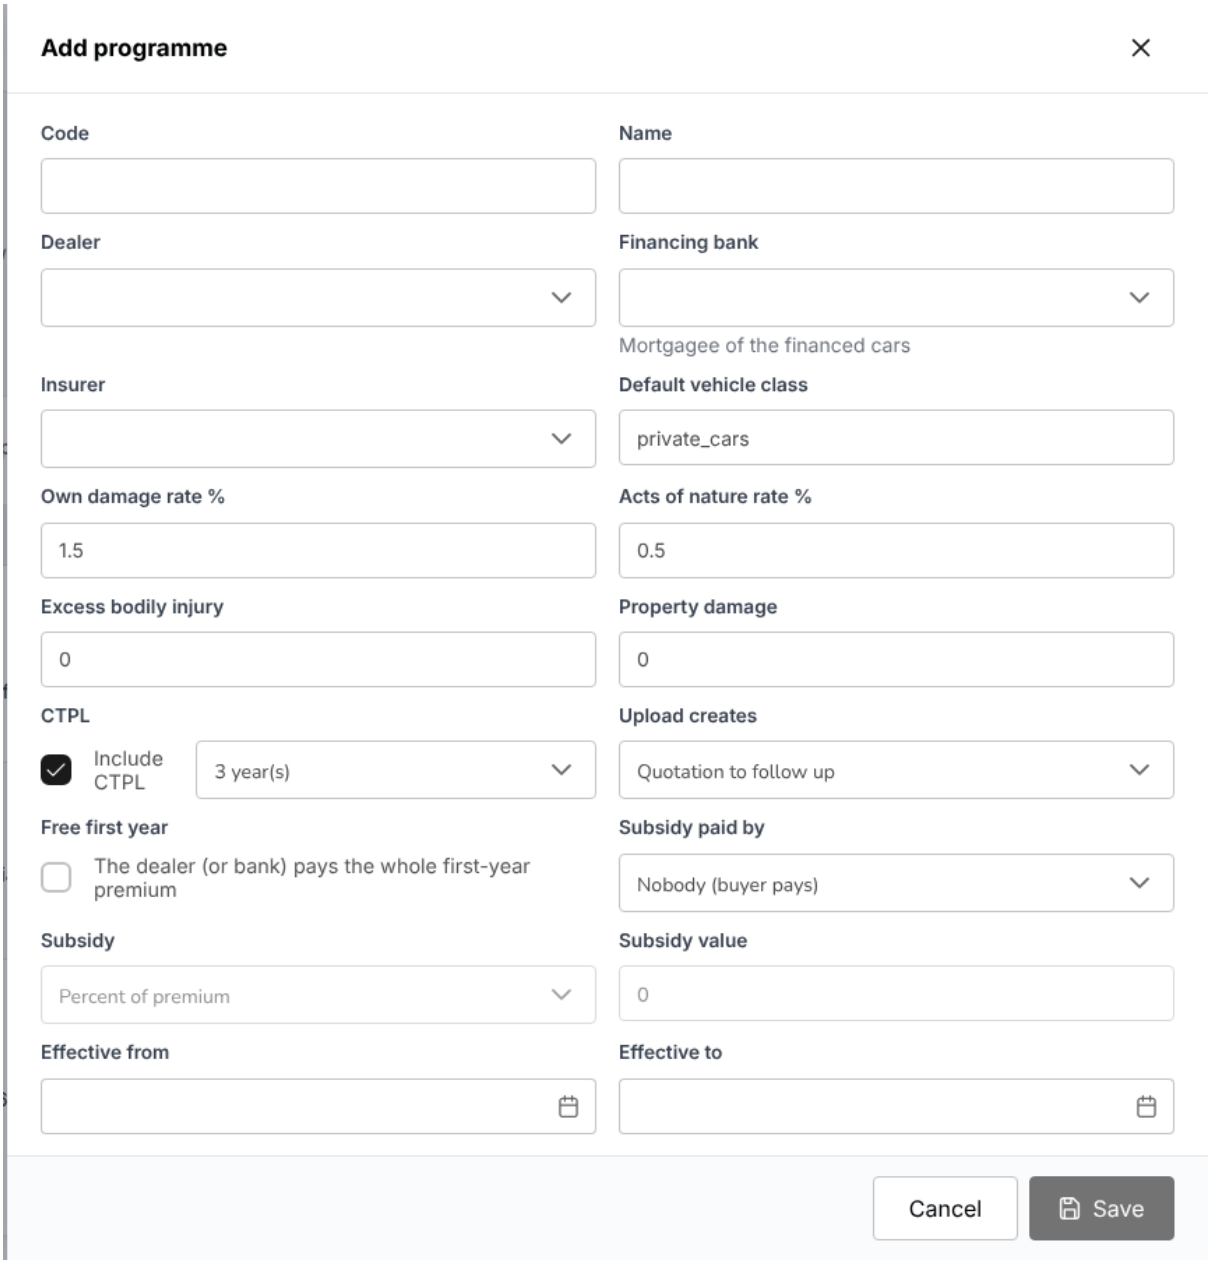

Figure 18.13: Add programme: the terms of a dealer programme

18.8 Sales activities

Account executives log every call, meeting, e-mail and visit with a prospect, a client or on a quotation. Each prospect, client and quotation shows its activities as a timeline, newest first: a prospect and a client also show the activities logged on their quotations (with the quotation number), and a client those of the prospect it came from. The open next step is shown above the timeline.

The list shows **Client ID** (CL-YYYY-NNNNN), **Assured Name**, **Category**, **E-mail**, **Mobile**, **Client Since**, **Policies**, **Latest Policy Status** and **Actions**; the tabs **All**, **Individual** and **Corporate** filter it. The buttons are **Onboard client** and **Create Prospect** (for a client who asks for a new quotation).

Select a client to open the client view: the cards **Active policies**, **Premium in force**, **Open claims**, **Renewals due** and **Outstanding balance**, and the tabs **Policies**, **Quotations**, **Claims**, **Renewals**, **Endorsements**, **Receipts**, **Documents**, **Activity** and

History. The header shows whether the identification is **Complete** or **Incomplete**; **Identification and due diligence** opens it.

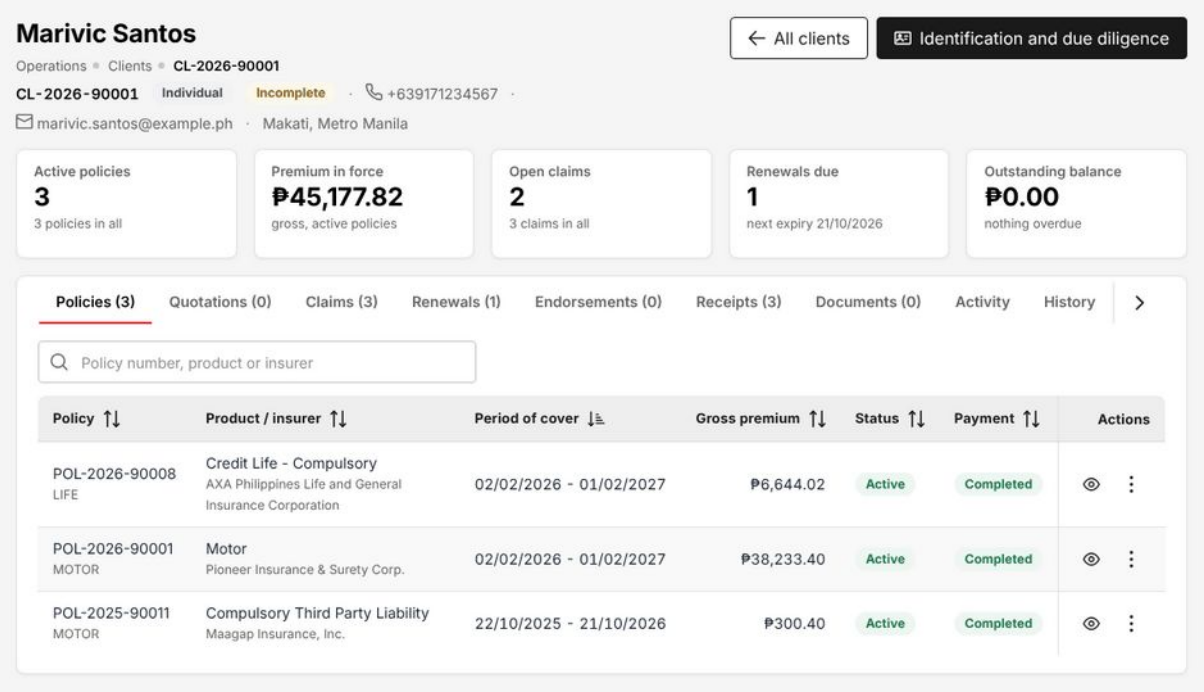

Figure 18.15: The client view, with the client's policies, claims, renewals and receipts

18.9.1 Onboard a client before the first policy

A client can be created, identified and checked before any quotation or policy, as customer due diligence requires. A client created by the first policy (a prospect converted, a direct placement) is completed the same way, from **Identification and due diligence** on the client view.

1. Choose Operations > Clients and select **Onboard client**.
2. Choose the **Client type**: **Individual** or **Juridical (company, cooperative, partnership)**.
3. Fill in the form and select **Onboard client**.
4. Upload the ID, the registration and the board resolution once the client is saved.

Group	Fields	Rule
Identity (individual)	**First name**, **Middle name**, **Last name**, **Suffix**, **Date of birth**, **Place of birth**, **Gender**, **Civil status**, **Nationality**, **Occupation or nature of work**, **Employer or business name**, **Source of funds**, **TIN**	
Government ID presented	**ID type**, **ID number**, **ID expiry date**	An expired ID is refused
Contact and address	**Mobile number**, **E-mail**, **Country**, **Region**, **Province**, **City / Municipality** (required), **Barangay**, **ZIP Code**, **House / Unit No.**, **Street / Subdivision**	The city list follows the province
Expected business and PEP	**Lines of business expected**, **Usual payment mode**, **Expected annual premium (PHP)**, **Politically exposed person (or family member or close associate)**	A politically exposed person needs enhanced due diligence

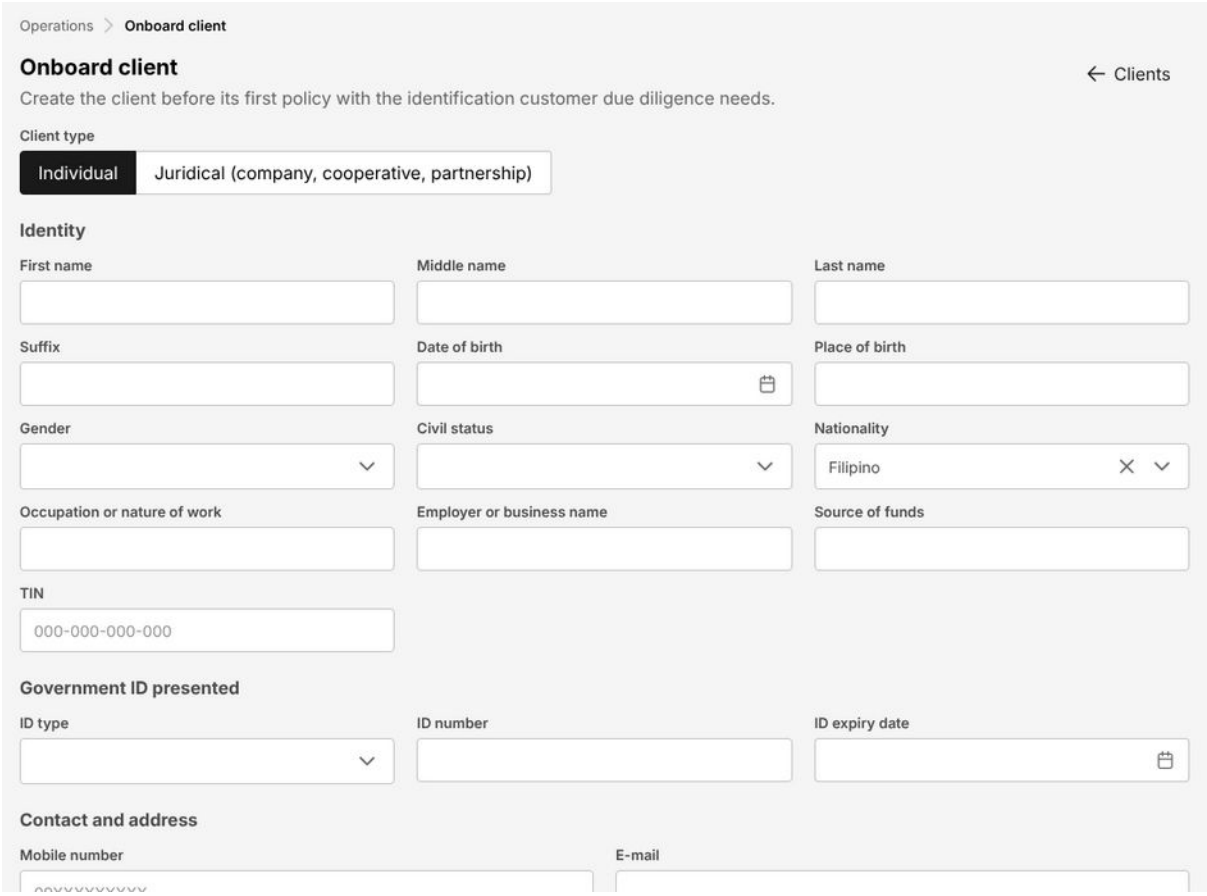

Figure 18.16: Onboard client: identity, ID, address and expected business

18.10 Policies

Choose Operations > Policy. The list shows **Policy Number**, **Client Id**, **Client Name**, **Gross Premium**, **Policy Issued**, **Policy Expiry**, **Product Description** and **Payment** status. The search box finds a policy by number or client. **Show Filters** offers **Payment Status**, **Product Type**, **Insurance Company**, **Client Name**, issue and expiry date ranges and minimum and maximum premium.

TIS General Manager	Approve

Policies are booked from the placement slip (see Placement Slips (18.5)); **Bulk Upload** loads policies from a file, validated first. The **Payment** status is **Pending** (billed, not paid), **Reviewing** (a payment waits for Cash Control), **Partial** or **Completed**.

In **Actions**, the eye (**View policy**) opens the policy and **More actions** offers **Claim** (register a claim on the policy, see Register a claim (18.13.1)) and **Endorsement**.

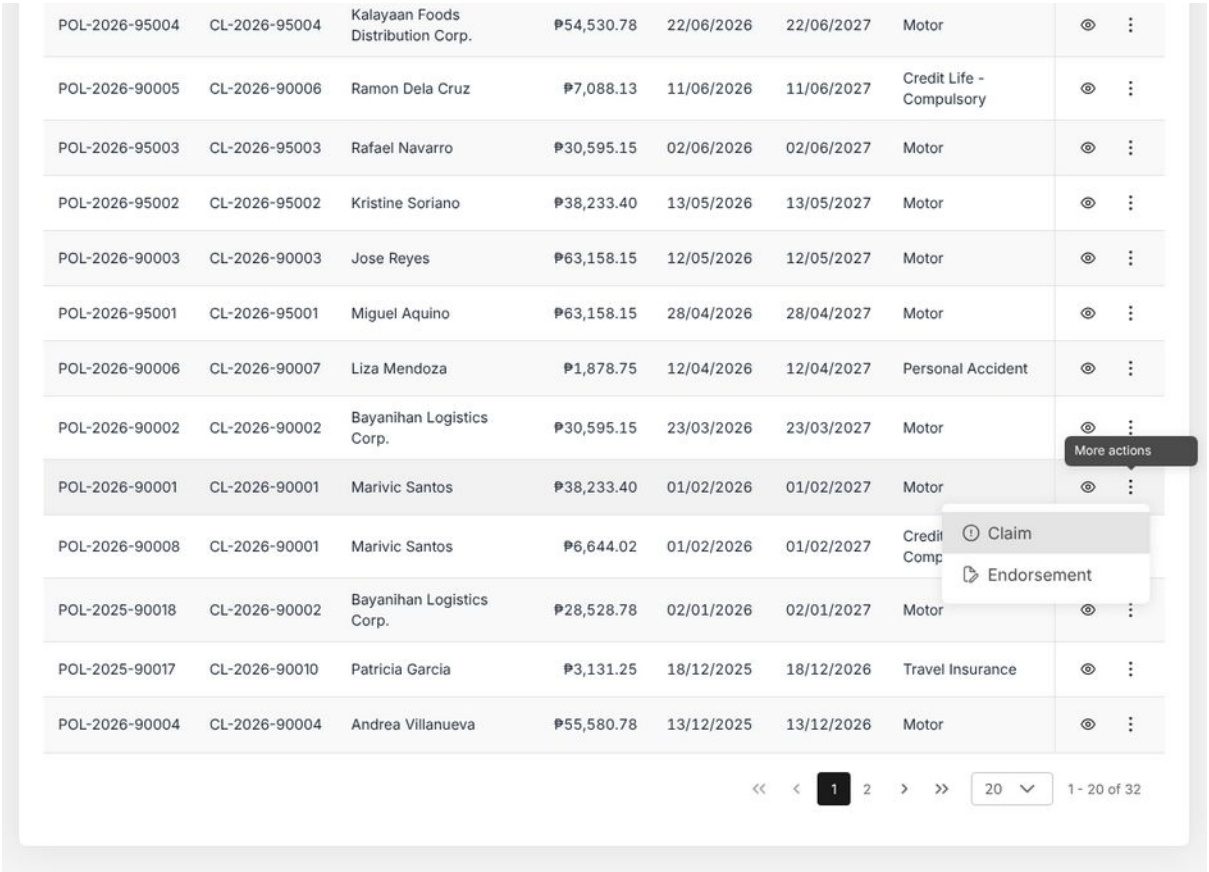

Figure 18.17: Operations > Policy, with More actions: Claim and Endorsement

The policy page shows the cards **Gross Premium**, **Expiry Date** and **Client ID**, and the panels **Policy Details**, **Insured Details**, **Vehicle Details** (motor: motor, chassis and plate numbers, mortgagee), **Coverage Details**, **Premium Breakdown**, **Endorsements**, **History** and **Documents & Billing** (**Generate Policy Invoice**, **Premium Accounting Entries**, the policy document to **Preview**, **Open** or **Print**). **View Policy** opens the policy schedule.

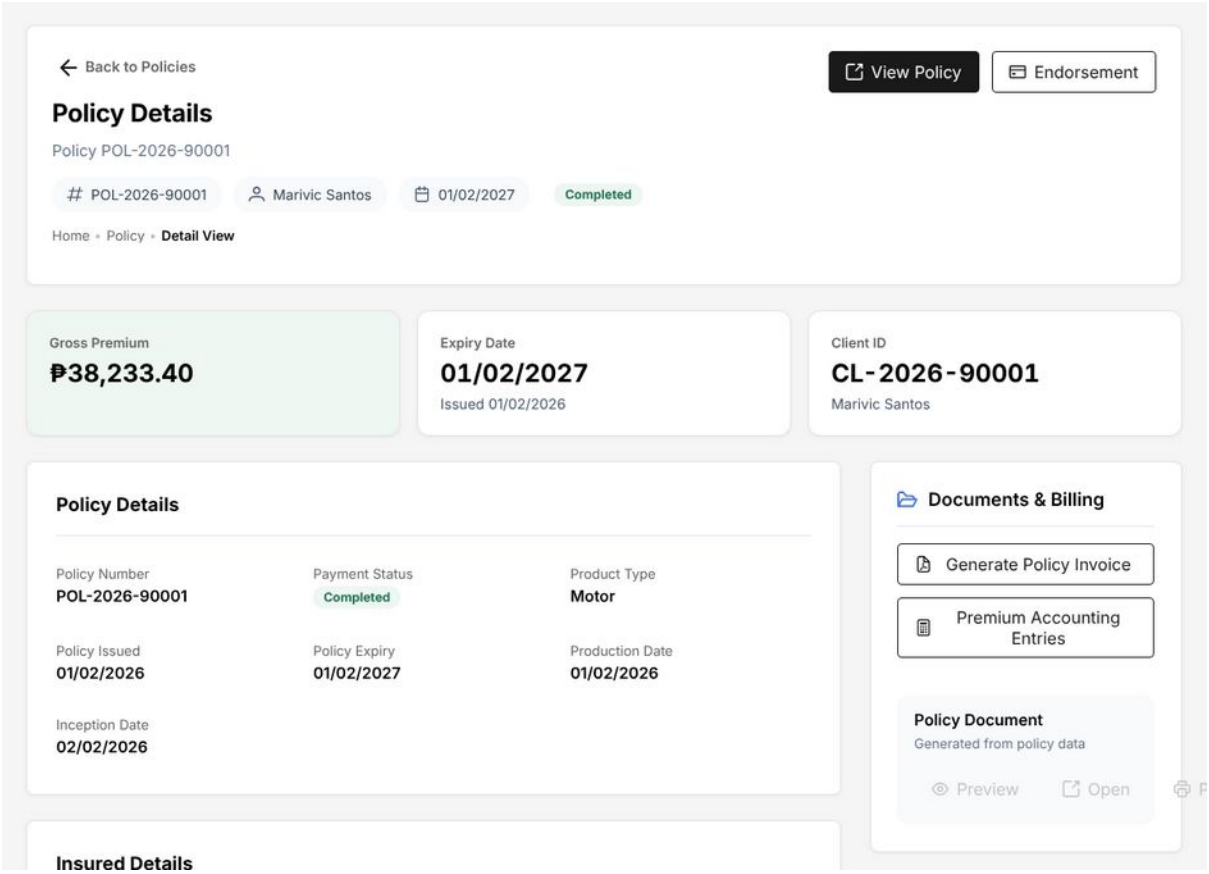

Figure 18.18: The policy page, with Documents & Billing

18.10.1 Raise an endorsement request

1. Choose Operations > Policy.
2. In the row of the policy, select **More actions**, then **Endorsement** (or **Endorsement** on the policy page).
3. Choose the kind of change (insured details, vehicle, cover, extension), enter the new values and the effective date.
4. Upload the endorsement document of the insurer.
5. Complete the endorsement.

The endorsement is not available while the payment is **Pending** or **Reviewing**, or once the policy has expired, lapsed, was cancelled or renewed. An additional premium is billed to the client. An endorsement that returns premium is completed by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, a user other than the one who entered it. See Endorsements and cancellations (3.6.3).

18.11 Fleet Schedules

Choose Operations > Fleet Schedules. A fleet schedule is one motor policy covering many vehicles of a client.

Menu: Operations > Fleet Schedules

Role	Access

Role	Access
TIS Sales Officer	Create and edit
TIS Sales Unit Head	Create and edit
TIS Operations Associate	Create and edit
TIS Operations Officer	Create and edit
TIS Operations Unit Head	Create and edit
TIS General Manager	Create and edit

Each vehicle has its own premium and CTPL; vehicles added or deleted during the period are endorsed at the pro-rata premium. The list shows **Fleet schedule**, **Client**, **Insurer**, **Policy**, **Period**, **Vehicles on cover**, **Sum insured**, **Annual premium** and **Status**.

1. Select **New fleet schedule**.
2. Enter **Client** (required), **Insurer** (can be chosen later, before the policy is issued), **Period from** (required), **Period to** (one year after the start unless changed) and **Description**.
3. Select **Start**. Add the vehicles one by one or from a file; each line is rated on the motor tariff.
4. Place the schedule with the insurer; the policy is booked like any other.

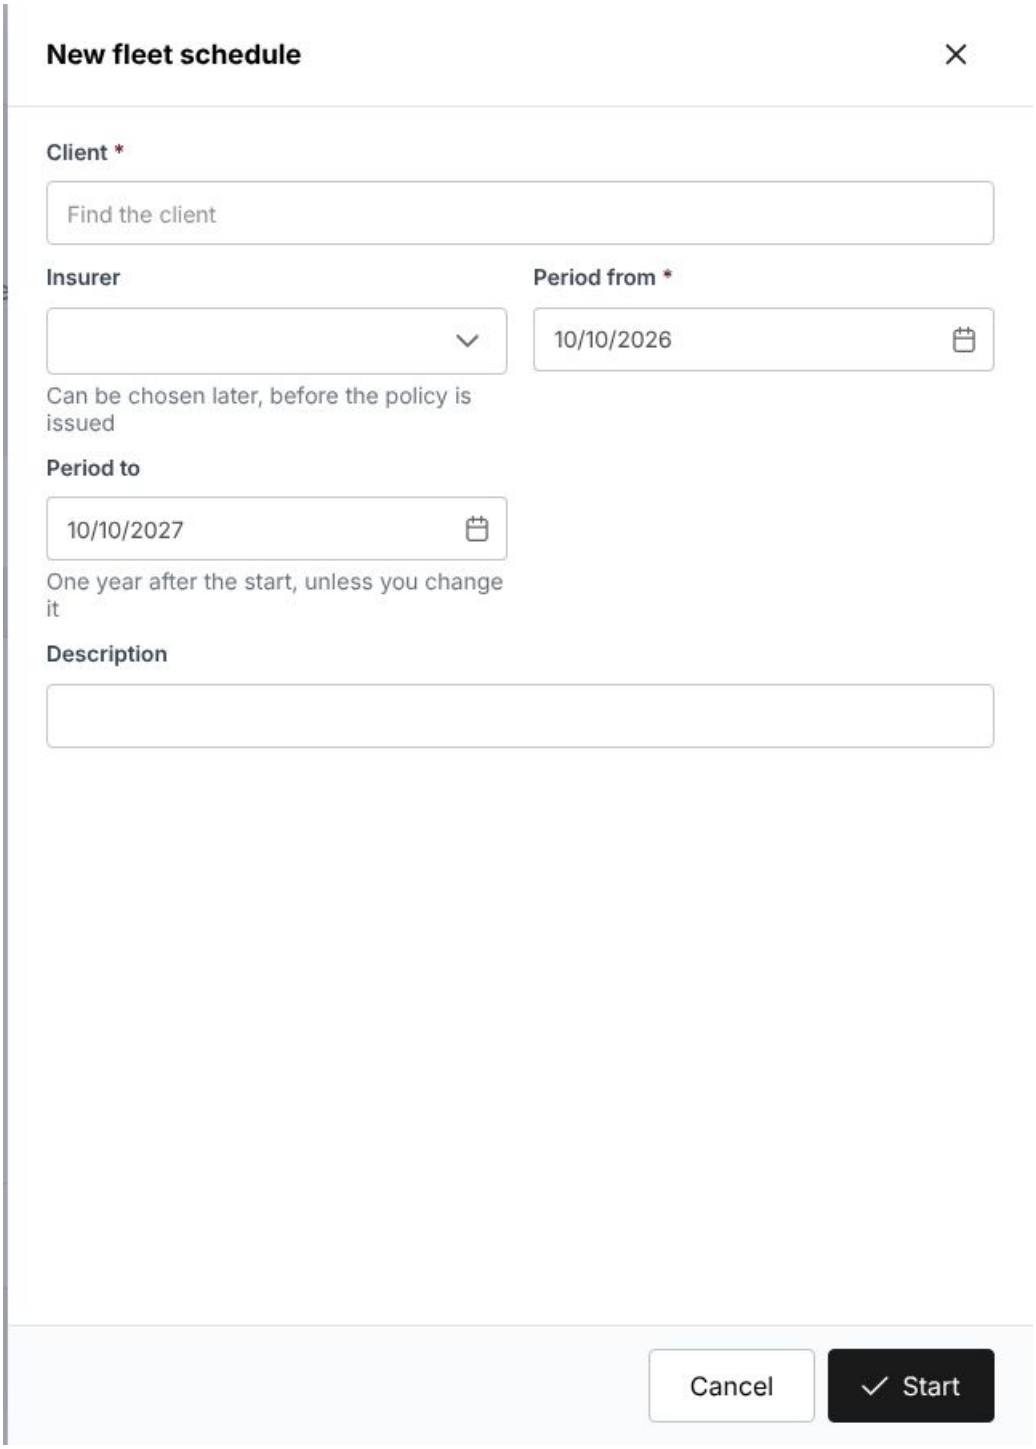

Figure 18.19: New fleet schedule

18.12 Marine Open Covers

Choose Operations > Marine Open Covers. An open cover insures a client's cargo shipments for a period: each shipment is certified or declared and the premium is billed per declaration period.

Menu: Operations > Marine Open Covers

TIS Operations Unit Head	Create and edit
TIS General Manager	Create and edit

The list shows **Open cover** (MOC-YYYY-NNNNN), **Client**, **Insurer**, **Policy**, **Period**, **Conveyances**, **Certificates**, **Billed premium** and **Status**. **New open cover** asks for **Client**, **Insurer**, **Period from**, **Period to**, **Goods insured**, **Voyages**, **Clauses**, the rate % and limit per conveyance (**Sea**, **Air**, **Land**), **Mark-up on invoice %**, **Minimum premium per certificate**, **Declarations** (**Monthly**) and **Insurer's reference**.

The open cover page has the tabs **Contract**, **Certificates** (one per shipment, rated at the conveyance rate with the minimum premium), **Declarations** (the shipments of each period, billed on the open policy) and **History**. **Cancel cover** ends it. At TISPH the parcel cover of TFS (registration papers, plates, keys and loan documents couriered to its customers) is kept this way.

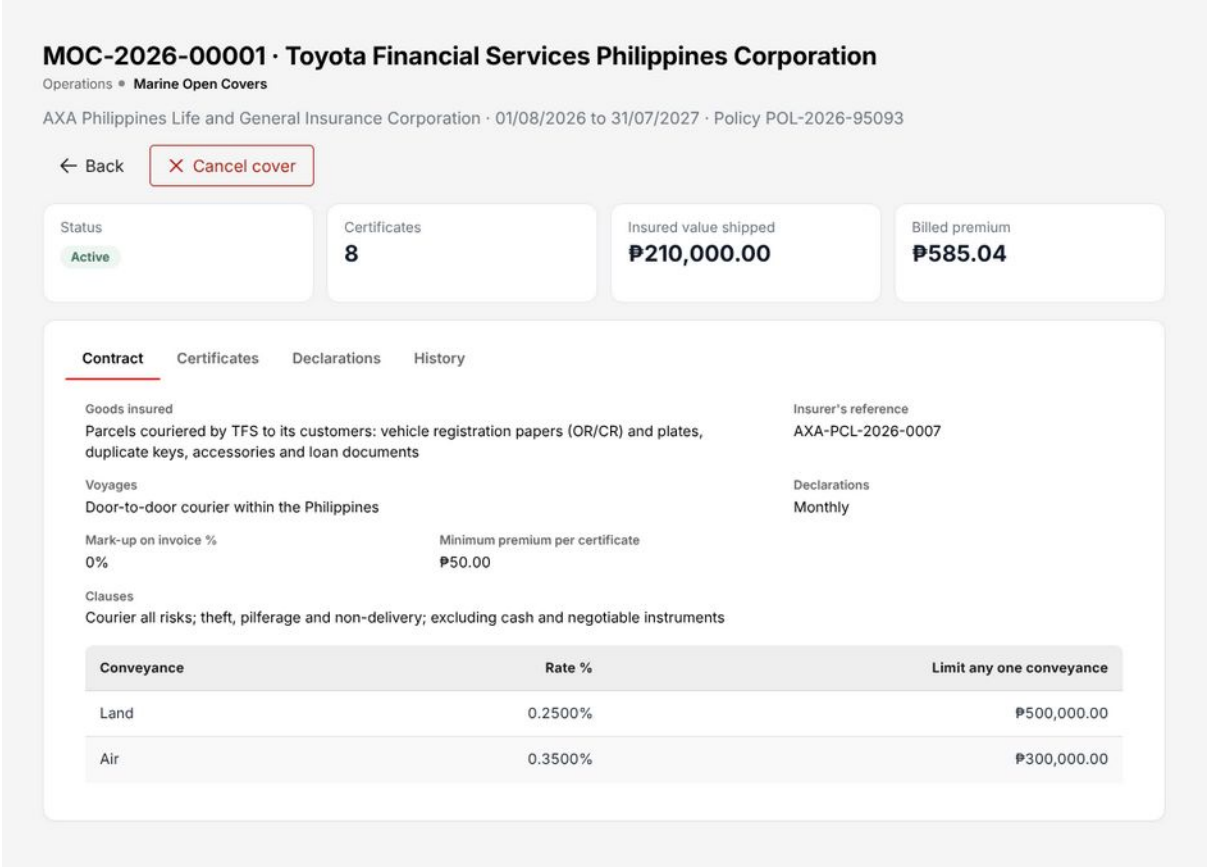

Figure 18.20: A marine open cover with its rates per conveyance

18.13 The claims list

TISPH registers the client's claim, advises the insurer, collects the documents and follows the claim to its settlement. The insurer decides and pays.

Menu: Operations > Claims

TIS Sales Unit Head	View
TIS Operations Associate	Create and edit
TIS Operations Officer	Create and edit
TIS Operations Unit Head	Approve
TIS IT AppSupport / Admin	View
TIS General Manager	Approve

The cards count **Open claims**, **Settlement to approve**, **Approved, to be paid** and **Settled**. The list shows **Claim / insured**, **Policy / product**, **Date / cause of loss**, **Reported**, **Estimate**, **Status** and **Actions**; filter by status.

Status	Meaning
Pending	Registered, documents being collected
Processing	Advised to the insurer, under review or with the adjuster
Pending Approval	The settlement waits for the checker
Approved	The settlement is approved and not yet released (only when the release on approval is switched off)
Partially Settled	A partial settlement is approved; the claim stays open for the final settlement
Settled	The settlement is approved and released
Rejected	Declined by the insurer, with a reason
Cancelled	Registered in error or a duplicate notification, with a reason

A claim follows nine steps, shown at the top of the claim: **Notification**, **Insurer advice**, **Documents**, **Review**, **Adjuster**, **Assessment**, **Settlement**, **Approval** and **Payment**. The **Next step** bar at the bottom names what is to be done and leads to it.

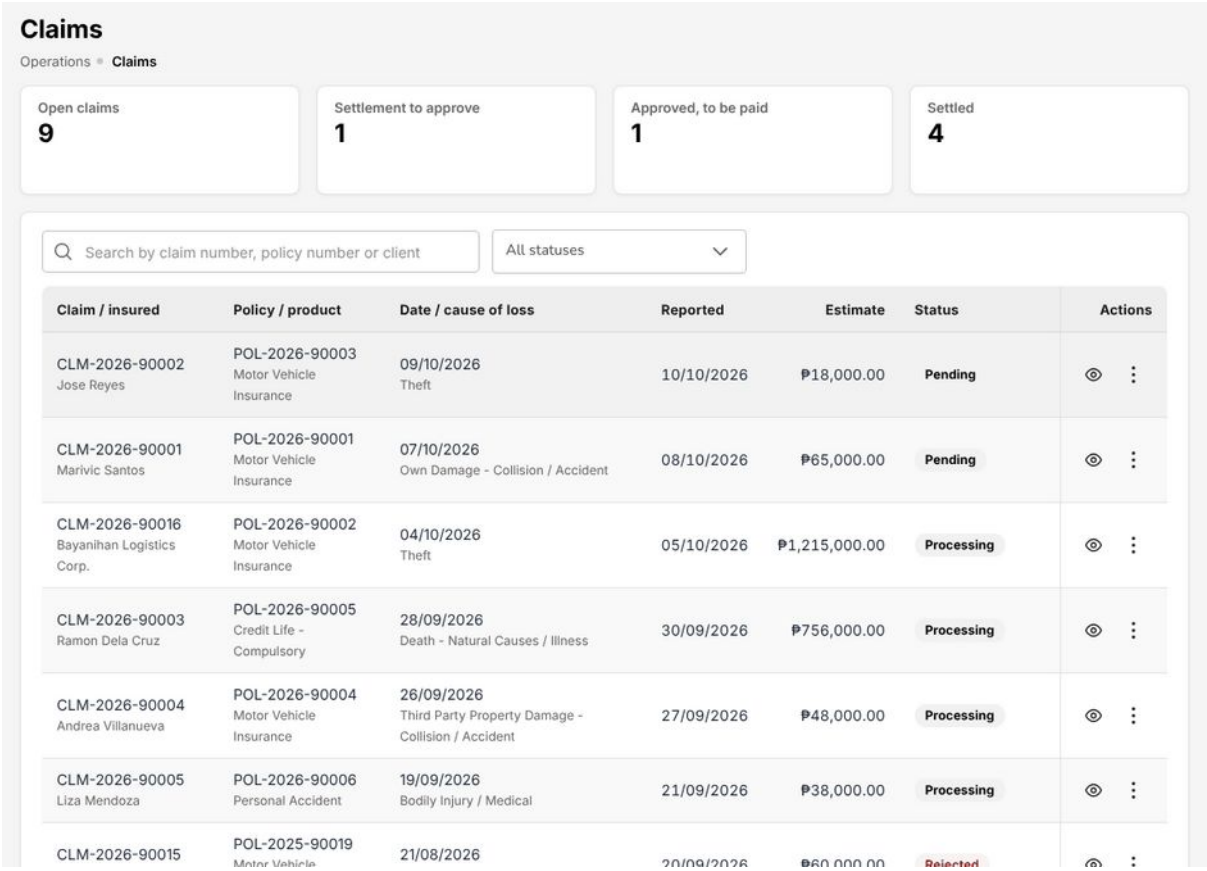

Figure 18.21: Operations > Claims

18.13.1 Register a claim

1. Choose Operations > Policy, select **More actions** in the row of the policy, then **Claim**. (Or select **Register claim** in My Work (2.3).)
2. On **Claim notification**, check the policy and insured, and the insured's address.
3. Enter the incident: **Date of loss** (required), **Time of loss**, **Cause of loss** (required), **Place of loss** (required, with city and province), **Estimated Claim Amount**, **Reported through** (TFS, call centre, insurer, dealer, walk-in or e-mail), for a motor claim the **Loss extent** (**Partial loss** or **Total loss**) and, if known, the **Insurance Company Claim Number**.
4. Enter the **Driver at the time of loss** (**Same as Policy Holder**, or the **Driver's name** and address) and the **Third party** if any (name, contact number, plate number, unit, shop, insurer).
5. Select **Next**, then on **Insurer advice** select **Register claim and send**.
6. When the policy has premium outstanding, the claim is reported late or a claim of the same date of loss is already registered on the policy, **Check before registering** shows the **Outstanding premium**, the **Claims ratio of the client**, the days between the loss and the report and the claims of the same date. Select **Register claim and send** to register the claim anyway, or **Cancel**.
7. The claim is created (CLM-YYYY-NNNNN) as **Pending**, assigned to the claims handler with the fewest open claims, and the Preliminary Loss Advice is e-mailed to the insurer.

The date of loss must fall within the period of cover of the policy and cannot be in the future. A claim reported more than the late intimation days after the loss (30 as delivered) is marked **Late** and the claims handlers are alerted. The follow-up date of the claim depends on the line and the loss extent (for example 30 days for a partial motor loss, 60 for a total loss, 90 for fire, marine and engineering). For Credit Life the claim is a death benefit claim on the TFS loan.

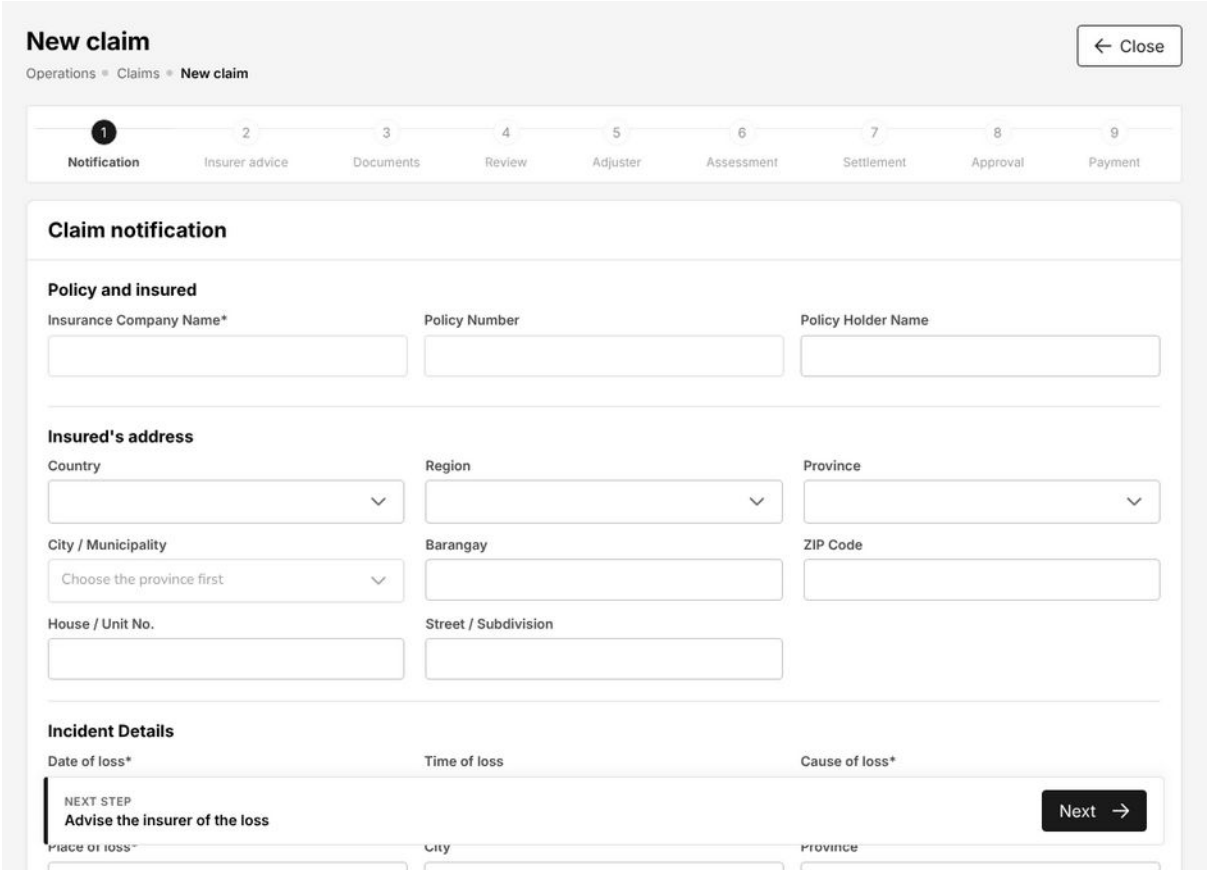

Figure 18.22: New claim, step 1: Claim notification

On **Documents**, the claim lists the documents its cause of loss needs (from Claim documents (21.5)) with their status **Missing**, **Received** or **Waived**. Upload each document as it arrives, or waive it. **Remind the claimant** e-mails the list of missing documents; **Continue to review** moves on once the documents are in.

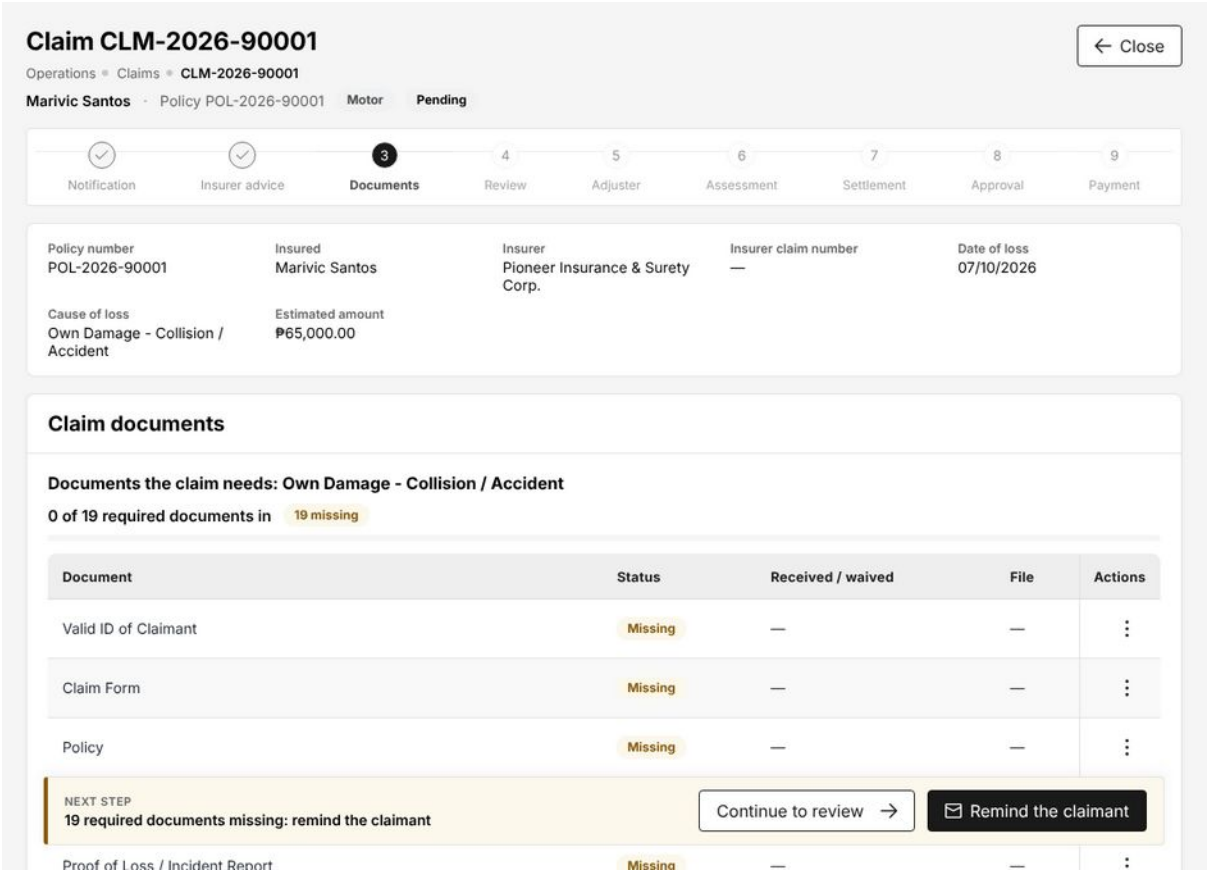

Figure 18.23: Claim, step 3: the documents the claim needs

18.13.2 Adjuster report

On **Adjuster**, record the adjuster the insurer appointed (**Adjuster name**), the **Adjuster status** (assigned, report received) and upload the adjuster's report with the amount the adjuster recommends. For a motor repair, the estimates and the letter of authority are kept on Motor claim repairs (18.23).

18.13.3 Assessment and settlement (maker)

The claim is moved to review and its settlement submitted by the Operations roles. Rejection, cancellation and closing are decisions of TIS Operations Unit Head or TIS General Manager.

On **Assessment**, check the key facts of the claim and the **Assessment basis** (date reported, adjuster and adjuster status) and choose **Proceed to settlement**, or **Reject claim** with the **Reason for rejection**.

On **Settlement**, choose **Final** or **Partial**, enter the **Settlement type** (for example **Repair Shop**, or payment to the insured), the **Settlement amount** the insurer agreed, the deductible or participation and the payee, and select **Submit settlement**. The claim becomes **Pending Approval**: a second claims user must approve it before the claim is settled. A partly settled claim shows **Settled so far** and is settled further, or finally, from the same step.

18.13.4 Approve a settlement (checker)

The settlement is approved by TIS Operations Unit Head or TIS General Manager, never by the user who submitted it.

1. Open the claim from My Work (2.3) or from the list (**Settlement to approve**).
2. On **Approval**, check the settlement against the adjuster's report and the documents: the **Settlement** (partial or final), **Requested by** and what was **Settled before**.
3. Enter the **Approved amount** (the amount requested, or less), then approve it, or return it with a reason.

The approved amount must be within the approver's claim settlement limit on the Authority Matrix (21.10) when the limit is enforced. **Requested by** and **Approved by** show the users' names.

As delivered, the approval also releases the settlement: the claim is **Settled** at once, without the status **Approved** in between.

18.13.5 Claim details, documents and audit trail

Open a claim from the list (the eye in **Actions**). The claim page shows the key facts (**Policy number**, **Insured**, **Insurer**, **Insurer claim number**, **Date of loss**, **Cause of loss**, **Estimated amount**, **Settlement amount**, **Reported through**, **Loss extent**, **Follow-up due**) and the panels **Claim details** (loss, policy and insured, driver, third party), **Adjuster report**, **Settlement details** and **Documents**. **History** shows every change: who made it, when and what changed. **Close** returns to the list.

18.13.6 Insurer advice and communications

The **Insurer** panel shows the insurer claim number, the **Insurer claims handler**, the **Insurer advice** (**Under evaluation**, **Incomplete requirements**, **LOA issued**, **Cheque available**, **Approved by the insurer**, **Denied by the insurer**), the **Authorisation code** and the **Amount offered**. **Record insurer advice** updates them.

The **Communications** panel logs each exchange with the insurer, the client, the adjuster or the repair shop: date, party, sent or received, method, message, **Follow-up date** and who logged it. An overdue follow-up shows **Overdue** until **Mark follow-up done**. **Log communication** records one; **Follow up insurer** e-mails the insurer and logs it. The claims handlers are alerted of overdue follow-ups and of claims past their follow-up date.

The **Settlements** panel lists each settlement of the claim, partial and final, with the amount requested and approved, its status, **Requested by** and **Decided by**.

18.13.7 Cancel a claim or verify a death

Cancel claim cancels a claim registered in error or notified twice: choose the reason (**Registered in error**, **Duplicate notification of the same loss**) and add a note. A settlement waiting for approval is returned.

On a death benefit claim (Credit Life), **Verify death** records the date the death was verified; the follow-up date counts from it.

18.14 Renewal Policy

Renewal Policy lists the policies coming up for renewal and those already in progress.

Menu: Operations > Renewals > Renewal Policy

Role	Access

The cards count **Due for renewal**, **In grace period**, **Lapsed, renewable**, **Renewal in progress** and **Renewed**. The list shows **Policy / client**, **Product / insurer**, **Account executive**, **Expiry** (with the days before or since), **Premium**, **Payment**, **Renewal state** and **Actions**. Search by policy number, client or client code, and choose the expiry date range.

18.14.1 Renew a policy

1. Choose Operations > Renewals > Renewal Policy.
2. In the row of the policy, select the renew action (the arrow). The renewal quotation opens on **Renewal Details** with the client and the covers of the expiring policy.
3. Check the covers (mandatory covers are always included; tick the optional ones), the sums insured and the rates, and select **Calculate**. Then **Next** to the following steps, as for a new quotation.
4. Save the renewal quotation and send it to the client.

From the client's acceptance the renewal follows the same steps as a new policy: placement slip, e-policy, check and booking. Renewal terms submitted for approval on Negotiations (18.18) are approved by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager. A lapsed policy (**Lapsed, renewable**) can still be renewed.

Renewal Batch prepares the renewal quotations of many policies at once. Select **Create Batch**, choose the **Selection Criteria** (**Expiry Date From**, **Expiry Date To**, **Insurance Company**, **Product Type**, **Min premium**, **Max premium**, **Client Name**, **Payment Status**) and select **Generate policy list**. Check the list and process the batch. The list of batches shows **Batch ID** (RB-YYYY-NNNNN), **Status** (**Draft**, **Partially completed**, **Completed**), **Total policies**, **Processed** and **Created on**.

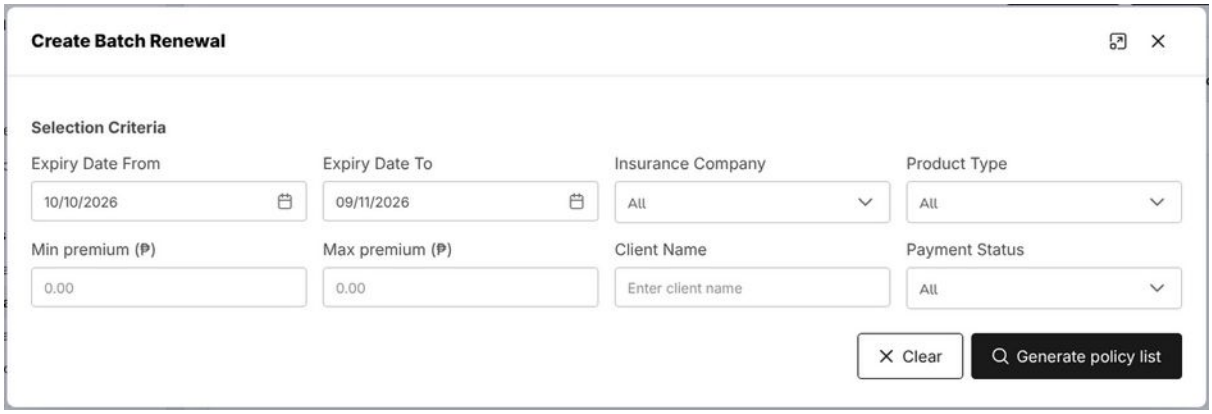

Figure 18.24: Create Batch Renewal: the selection criteria

Lapse Management shows the policies **Lapsed**, **In grace period** and that **Can be reinstated**, with the **Premium lost or at risk**. The tab **Lapsed and grace period** lists each policy with its days lapsed or left in the grace period, the **Lapse reason** and the win-back offers made. The tab **Win-back campaigns** holds the campaigns offering lapsed clients a discount to come back, with the clients contacted and converted and the premium recovered; **New campaign** creates one.

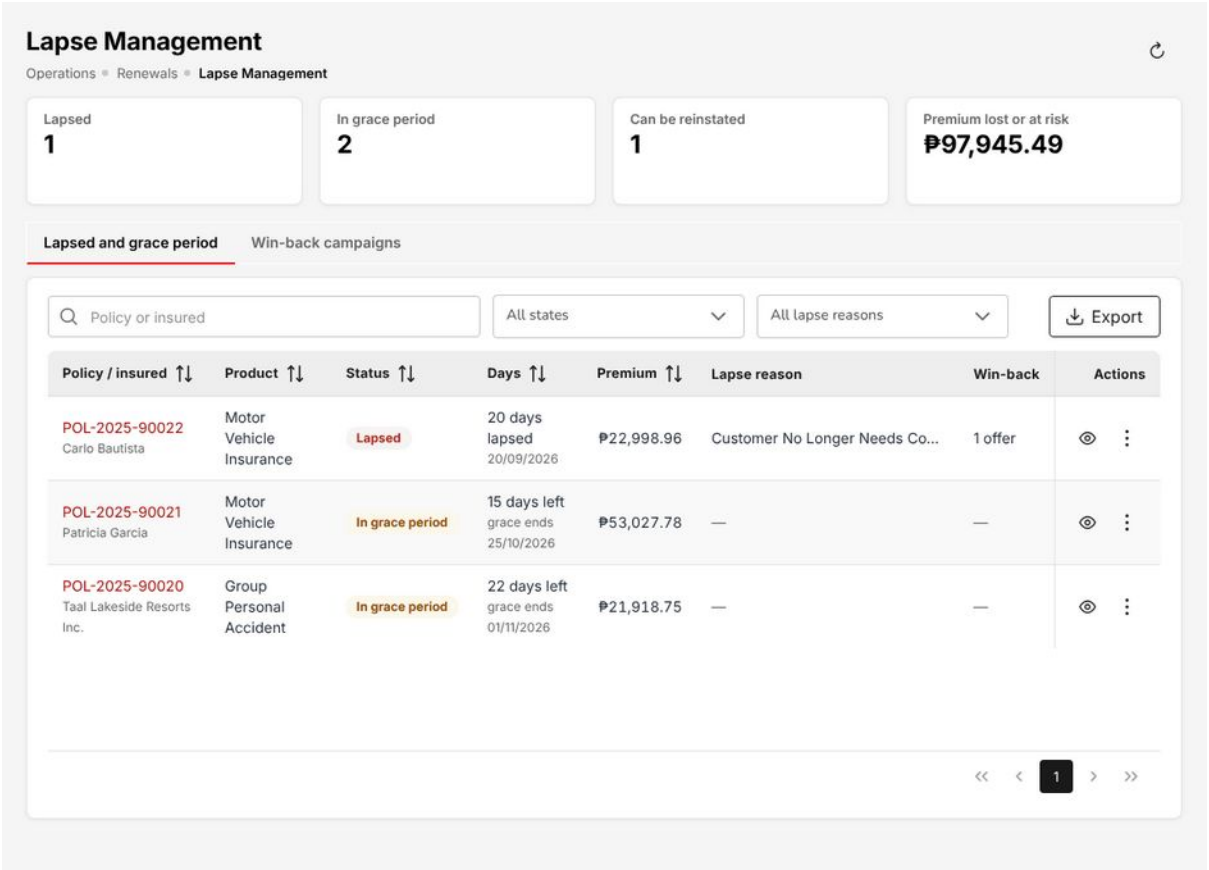

Figure 18.25: Operations > Renewals > Lapse Management

Retention Analytics shows, for the period, line of business and account executive chosen, the **Renewal rate**, the **Premium retention**, the **Average cycle time** (from renewal opened to renewed) and the **Open renewals now**, with the tabs **Monthly trend**, **By line of business**, **By account executive** and **Open renewals profile**.

Performance compares the renewal results with the targets: the **KPI scorecard** shows each KPI (renewal rate, premium retention, average cycle time) with **Target**, **Achieved**, **Variance** and the status **Met** or **Below target**, also **By account executive**, **By line of business** and as a **Monthly trend**. **Export** downloads each view.

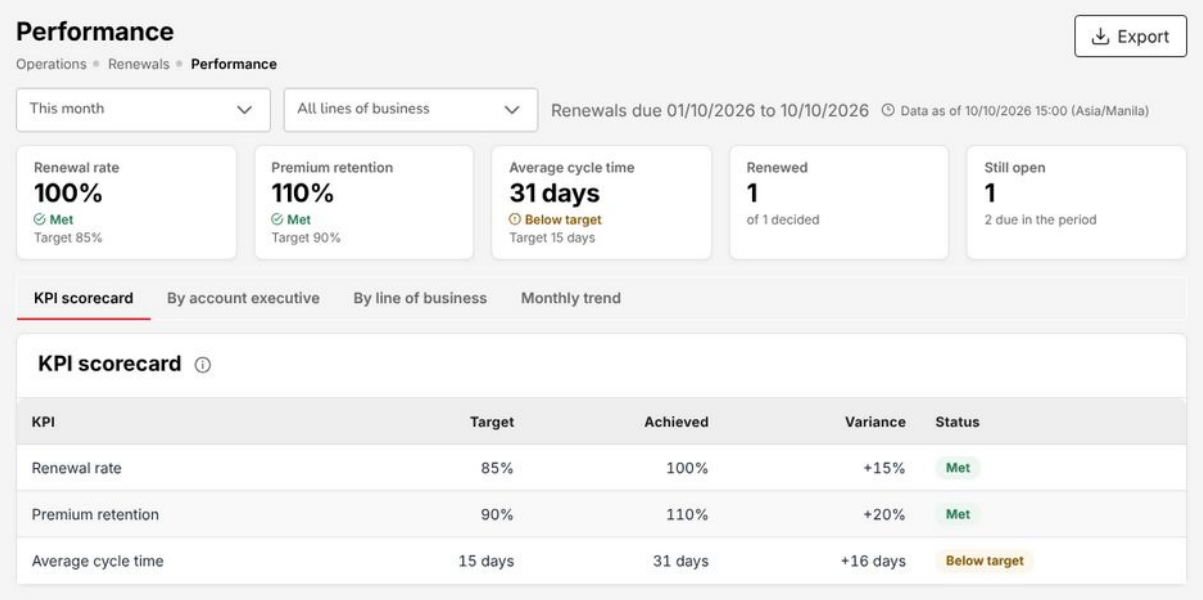

Figure 18.26: Operations > Renewals > Performance, the KPI scorecard

The **Renewal Queue** is the work list of open renewals. The cards count **Open renewals**, **Expiring within 30 days**, **High risk**, **In grace period** and the **Premium due for renewal**. Each row shows the policy and insured, product and insurer, **Expiry**, **Premium**, **Stage**, **Risk** and **Account executive**; filter by stage, risk level and account executive. **Refresh pipeline** adds the policies newly due; **Export** downloads the queue.

The stages follow the renewal: **Pending**, **First Notice Sent**, **Second Notice Sent**, **Final Notice Sent**, **Quote Sent**, **Pending Approval**, **Approved**, **In Grace Period**, then **Renewed**, lapsed or **Not for renewal**. The renewal notices are e-mailed to the client 90, 60 and 30 days before expiry (30 and 15 days for Credit Life), on working days; a notice missed on a holiday goes out on the next working day.

The notices of a policy in a lock-in or under Scheme 2 are not sent, and those of a policy whose TFS loan is past due, terminated, in legal dispute or under fraud review are held: the stage shows **Lock-in: not sent** or **Held**, and **Notices withheld** replaces the send action.

Under **More actions**, TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager can:

- **Reassign**: move the renewal to another owner, with a reason.
- **Not for renewal**: close the renewal with a reason; no more notices are sent and the policy shows **Not for renewal** on Lapse Management, where it can still be reinstated within the reinstatement period.

A renewal opened from My Work (2.3) or a notification opens on the selected renewal.

18.17 Lock-in Accounts

TIS General Manager	Create and edit

Lock-in Accounts lists the lock-in (promotion, Scheme 1 ARA) and Scheme 2 accounts expiring within the review window (60 days as delivered) or the days chosen. The cards count the **Accounts**, those whose **Review due** date is reached, **Notices suppressed** and **Notices held**. Each row shows the policy and insured, the lock-in and its year, **Expiry**, **Review date**, **TFS loan status** with the loan account, the notice treatment and the owner. Filter by lock-in, loan status and notice treatment, or search by policy, client or loan account.

Download Excel downloads the list. **Open renewal** opens the renewal of the account. **Set loan status** records the TFS loan status (**Current**, **Past due**, **Fraud**, **Terminated**, **Legal dispute**, **Closed**); a status that holds the notices needs a note, and the notices already queued for the policy are skipped. A review task is created in My Work (2.3) for the owner when the review date is reached.

At-Risk Policies is the risk register: open renewals with a **Medium** or higher retention risk. The cards count the **Policies at risk**, **High**, **Medium**, the **Premium at risk** and those **Without a next action**. Each row shows the risk score and its **Main drivers** (for example claims in the current term, first renewal with the broker, premium up on the renewal quote, expiry close), and the **Next action** with its due date. Open the policy to plan the next action.

18.18 Negotiations

Menu: Operations > Renewals > Negotiations

Negotiations lists the renewals being discussed with the client. The cards count **In negotiation**, **Quote sent**, **Pending approval**, **Approved** and **Expiring within 15 days**. Each row shows the policy and client, **Stage**, **Expiry**, **Current premium**, **Proposed premium** (with the change against the current premium), **Last activity** and **Account executive**.

Select a renewal to see its **Renewal terms** (RN-YYYY-NNNNN), and the **Timeline** of notices, quotes, meetings and counter-offers, with the outcome and next step of each. The buttons are:

- **Add update**: a change of terms or stage.
- **Log communication**: a call, e-mail or meeting with the client, its outcome and the next step.
- **Submit for approval**: the renewal terms go to TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, a user other than the one who submitted them.

While the terms wait for approval they cannot be changed. The approved premium is the premium booked on the renewed policy, and an expired renewal quote cannot be submitted or completed. When the renewal terms limit is enforced, the premium must be within the approver's limit on the Authority Matrix (21.10). The new term starts the day after the expiring term ends.

18.19 Payments

Operations > Payments shows **Gross Premium**, **Collected Premium**, **Receivables** and **Earned Commission**, and the bills in the tabs **Paid**, **Pending** and **Reviewing**. The **Type** column says whether the bill is for a **Policy**, a **Renewal Policy** or an **Endorsement**. Receipts are posted by Accounting; this screen shows the result.

A cover note gives the client temporary cover while the insurer's policy is pending. It is issued from an accepted quotation or from a placement slip sent to the insurer or later. It is superseded when the policy is booked and expires after its end date.

The cards count the cover notes **Active** and **Expiring within 7 days**, and show those where you must **Follow up the insurer's policy**. The list shows **Cover note / insured**, **Insurer**, **Quotation / placement**, **Cover period**, **Premium**, **Status** and **Policy**.

1. Select **Issue cover note**.
2. Search and select the quotation or placement slip.
3. Enter **Cover from**, **Cover period (days)** (the default applies if left empty), the **Insurer binder reference** and any **Special conditions**.
4. Select **Issue cover note**. Print it or e-mail it to the client.

Role	Access
TIS IT AppSupport / Admin	Create and edit

Menu: Master > Insurance > Cancellation Reasons

Role	Access
TIS IT AppSupport / Admin	Create and edit

Policy Cancellation computes the return premium of a policy from the days left: pro-rata when the insurer cancels, at the short-period rates when the insured cancels, and in full (flat) when the policy is cancelled from inception.

1. Choose Operations > Policy Cancellation.
2. Enter the **Policy number** (required) and the **Cancellation date**.
3. Choose the **Reason** (from Master > Insurance > Cancellation Reasons). The reason gives the **Return premium method**; you may choose another method.
4. Choose **Cancellation**: **Whole policy**, or one risk of the policy.
5. Select **Compute return premium**. The screen shows the method, the days in force and left, the return net premium with its taxes, the gross return, the commission taken back and the amount returned by the insurer.

Nothing is saved by this screen. The cancellation itself is made as an endorsement of the policy (**More actions** > **Endorsement**, cancellation), which computes the same figures on the server; see Raise an endorsement request (18.10.1). It is completed by TIS Sales Officer, TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, a user other than the one who entered it. The return premium is credited to the client and commission already paid on it is clawed back. The short-period rates (the percentage of the annual premium earned for each period in force) are kept on Master > Insurance > Short-Period Rates.

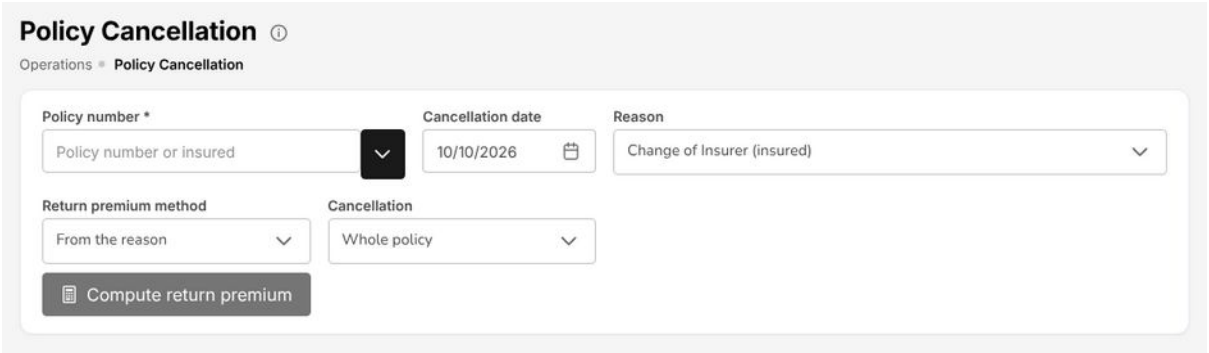

Figure 18.28: Operations > Policy Cancellation

The repair file shows the plate number, insured, insurer, sum insured and the participation of the insured (the deductible the insured pays the shop), and the buttons:

- **Record estimate**: the estimate of an accredited repair shop (from Master > Insurance > Repair Shops), its total and the adjuster's decision.
- **Issue letter of authority**: the insurer's authority to the shop to repair, with the **Approved repair**, the **Participation** and the amount **Payable by insurer**.
- **Release vehicle**: the date the repaired vehicle was released to the insured.

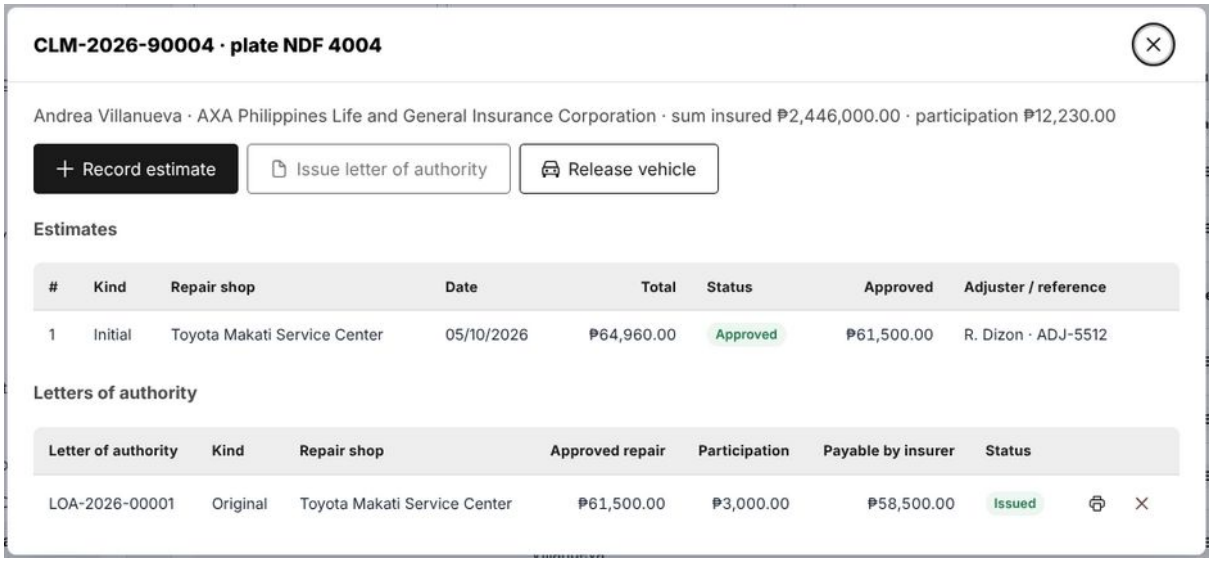

Figure 18.30: The repair file of a motor claim: estimates and letters of authority

19. Screen reference: Accounts

The screens of the Accounts menu, in menu order: receipts and collections, Cash Control, disbursements and payables, remittance to insurers, journal vouchers, reconciliations, tax, period end and incentives.

Each section names the menu of the screen and the roles that open it, with their access. Your own menu shows only the screens of your role. Every amount is in pesos; every posting goes to the general ledger through the posting rules of Posting configuration (21.14), and each document can be traced to its journal on Accounting Query (19.15).

19.1 Verify payments and post official receipts

When Operations or Sales record a client payment on the policy, the system issues the acknowledgement receipt (AR), the policy payment status becomes **Reviewing** and Cash Control receives the notification to verify it. Open the notification, check the payment against the bank statement and confirm it (the official receipt is posted, with the transaction code **PAYMENT**) or reject it with a reason.

The list (**Receipts history**) shows **Receipt Number** (OR-YYYY-NNNNN), **Transaction Code**, **Transaction Number** (RT-YYYY-NNNNN), **Policy Number**, **Name**, **Customer Code**, **Date**, **Amount**, **Paid**, **UnPaid**, **Status**, **Payments** and **Action**. **Status** is **Converted** when every line of the receipt is paid and posted (the usual status of an issued receipt), **Draft** while a line is not yet paid, and **Cancelled** after a cancellation. **Transaction Code** is **OR** for a receipt issued on Add Receipts or by Bulk Upload, **PAYMENT** for a receipt issued on the confirmation of a payment recorded on the policy, and **CM** for a credit memo. **Search by** chooses the column searched. The buttons are **Bulk Print** (receipts of a period as one PDF), **Bulk Upload** (bills payment and QRPh settlement files: each row pays a policy; the file is validated before anything is posted) and **Receipt**.

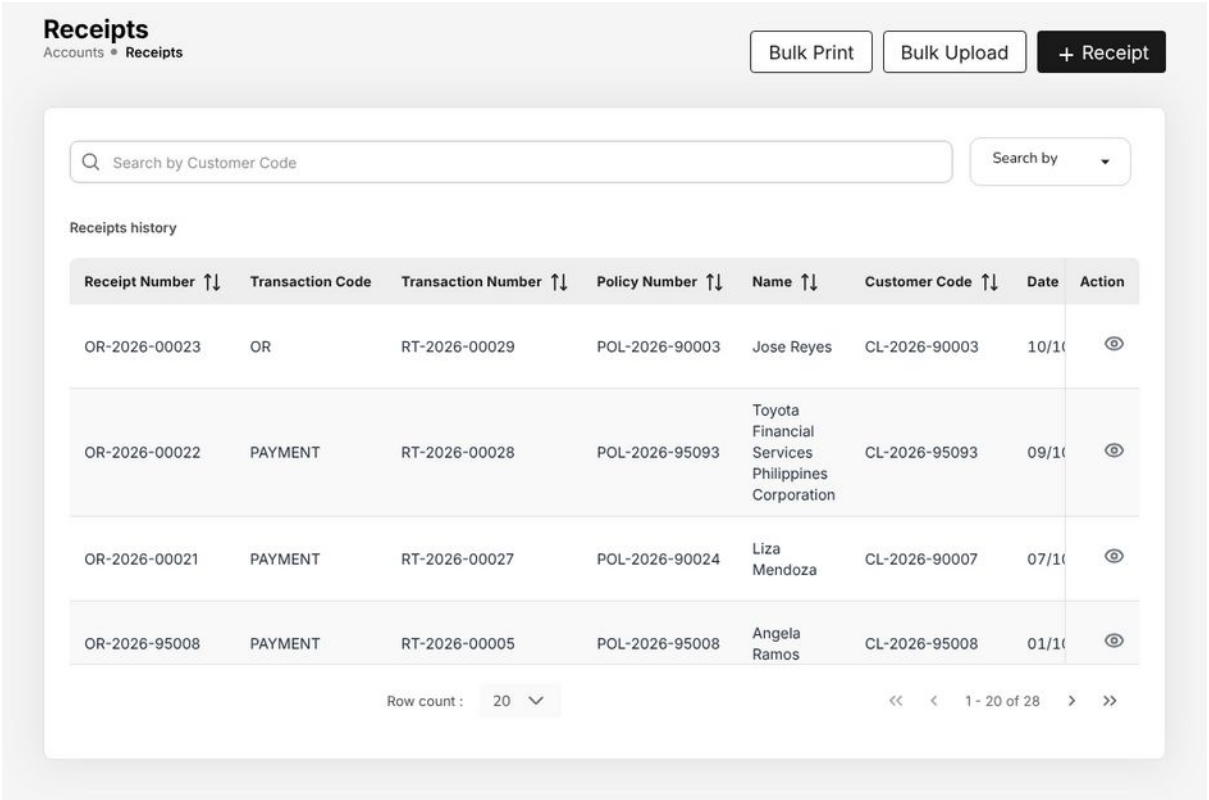

Figure 19.1: Accounts > Receipts

To issue an official receipt, select **Receipt**:

Field	Required	What to enter	Rule
Receipt Date	Yes	Today's date is proposed	Must fall in an open period
Receipt Number		Issued by the system on save	From the official receipt series
Receipt Type	Yes	**Payment**	
Branch Code, **Department Code**	No	The branch (**Head Office**) and the department (**Cash Control**) of the receipt	
Customer Code	Yes	The client	**Customer Name** is filled in
Policy Number	Yes	The policy paid	Only the client's policies with an open bill
Currency Code	Yes	**PHP**	
Transaction Code	Yes	**OR – Official Receipt**	**CM – Credit Memo** only when TIS Finance & General Accounting asks for it
Receipt Mode	Yes	**Dollar/Peso** (cash), **Cheque**, **Managers Check/Demand Draft**, **Direct Credit/Transfer to Account**, **Telegraphic Transfer**, **Authority to Debit**, **Online Banking** or **Credit Ticket-Inter Office**	A cheque asks for the cheque details; the mode gives the bank account debited
Remarks	No		

Select **Record payment**. The system issues the receipt number, posts the payment (cash in the bank account of the receipt mode against the premium receivable) and reduces the bill. When the bill is fully paid the policy's payment becomes **Completed**. Print the receipt or e-mail it to the client. A payment above what the policy owes is not billed again: the excess is held On Account on Unapplied Collections (19.2). See Collection by Cash Control (3.7).

A payment recorded on the policy carries its proof of payment (deposit slip, cheque image or transfer confirmation): the payment cannot be saved without it. The receipt page shows the proof under **Proof of payment**, where a receipting user attaches or replaces it, and **Paid to**: **TISPH**, or **Insurance company** for a payment made to the insurer.

19.1.1 Reverse a receipt

A receipt issued in error, or paid by a cheque that bounced, is reversed from the receipt page, section **Reversal**. CCD-Recon selects **Reverse receipt**, chooses the reason (cheque returned DAIF, duplicate receipt, wrong amount, applied to the wrong policy or client, payment not received in the bank, other with a note) and sends it for approval. The receipt stays posted until another user approves: CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting, never the user who asked. On approval the receipt is cancelled, its journals are reversed, the bills it paid are open again and an amount it held On Account is taken back. The approver can instead **Return** the request with a reason; the receipt is unchanged. The request is on My Work of the approvers.

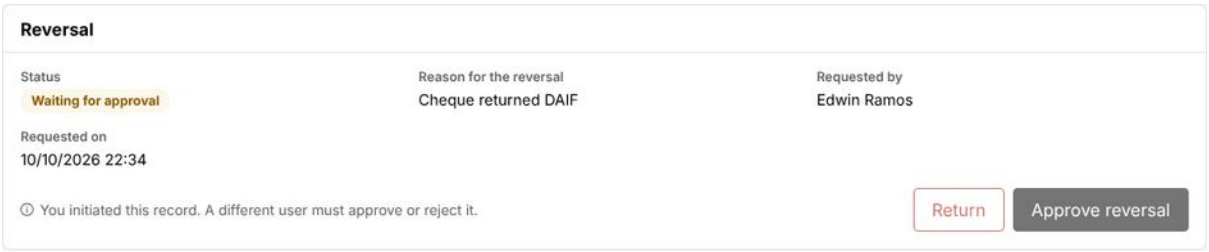

Figure 19.2: The Reversal section of a receipt, approved

19.1.2 Bulk upload and receipt batches

Bulk Upload takes three files, each with its template:

- **Official receipts**: each row pays a policy. On the receipt voucher file of TISPH a row can combine premium and commission: **Commission Amount** is the commission part of the **Amount**. The premium is receipted; the commission is kept apart on the batch for Finance & General Accounting to reconcile with the insurer.
- **Bank payments (matched by reference)**: the bank's report of payments credited to TISPH (**Date**, **Reference**, **Amount**, **Bank Account**, **Payer**). Each line is matched by its reference (the 10-digit payment reference of the policy, its policy number or the bill number) to what the policy owes. Within one peso it is receipted in full; above it the receipt pays the bills and the excess is held On Account; below it the receipt pays part and the line is an insufficient payment; a reference that finds no policy is held as a floating payment.
- **Payments made to the insurer**: payments the clients made directly to the insurance company (**Policy Number**, **Amount**, **Date Paid**, **Insurer Reference**). Each settles the policy's bills with a receipt marked paid to the insurance company: the premium payable to the insurer is reduced instead of the cash.

Every upload is a receipt batch (RVB-YYYY-NNNNN). **Receipt batches** lists them with the file, the rows receipted, the premium and the commission kept apart. **Export commission** downloads the commission lines of a batch; **Export lines** downloads how each line of a bank payment file was matched.

Each policy has a 10-digit payment reference, the number the client quotes at the bank. Search the open bills on Add Receipts by it, by the plate or chassis number of the vehicle, or by the client, policy or bill number; the bills show the vehicle.

19.2 Unapplied collections

Accounts > Unapplied Collections lists the money received that no bill takes yet:

- **Excess payment**: paid above what the policy owes, held On Account;
- **Floating payment**: a bank credit whose client or bill is not yet known;
- **Advance payment**: paid by a client before the bill exists.

CCD-Recon (Reconciliation and Reversals)	Create and edit
TIS Finance & General Accounting	View
TIS General Manager	View

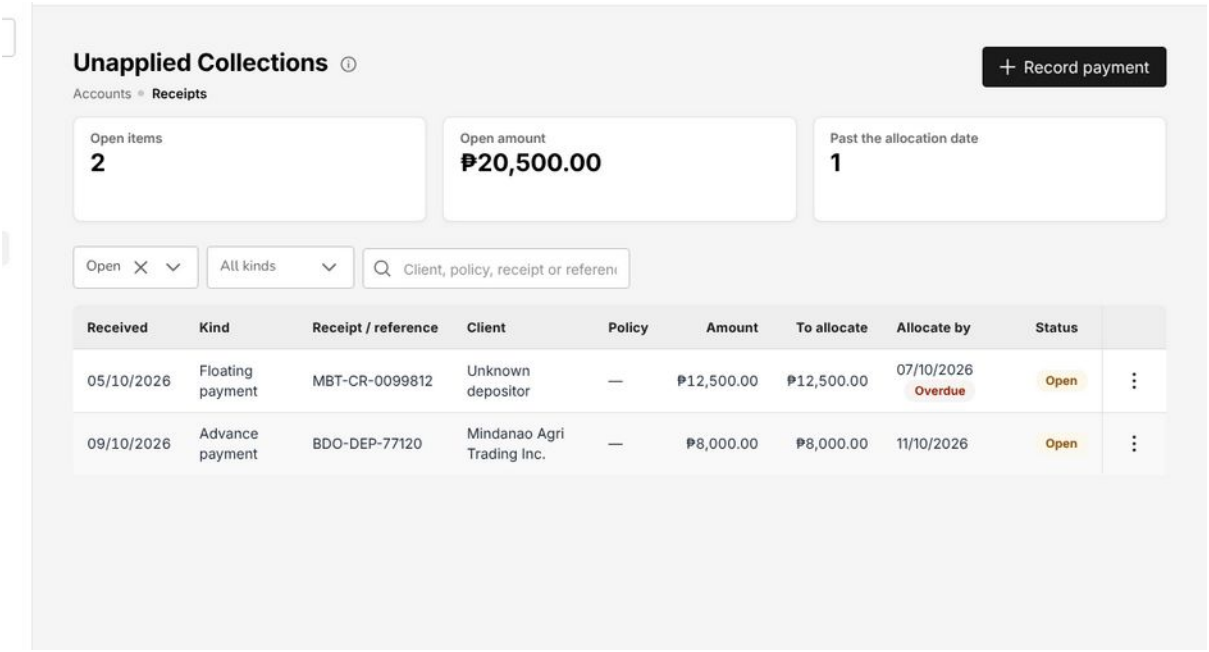

Figure 19.3: Accounts > Unapplied Collections

Each is posted to the clients' deposits and unapplied collections account and must be allocated within two working days (**Allocate by**; past it, the row shows **Overdue** and the item is on My Work of Cash Control). The cards show the open items, the open amount and the items past their date. Filter by status and kind, or search by client, policy, receipt or reference.

Record payment records a floating payment (amount, date received, reference, the payer if known) or an advance payment (with the client code). The actions of a row are:

- **Allocate**: choose the open bills (the client's bills, or for a floating payment those found by client, policy or bill number) and the amount for each; the amounts

cannot exceed what a bill owes nor what is left to allocate. The bills are paid as by a receipt; a floating payment takes the client of the bill.

- **Refund**: with a reason (overpayment, paid twice, policy cancelled or not taken up, other with a note), the amount becomes a refund payable to the client, paid by disbursement.
- **Reverse**: a floating or advance payment recorded in error, nothing allocated yet, is reversed with a reason.

View shows the item with its allocations and its activity.

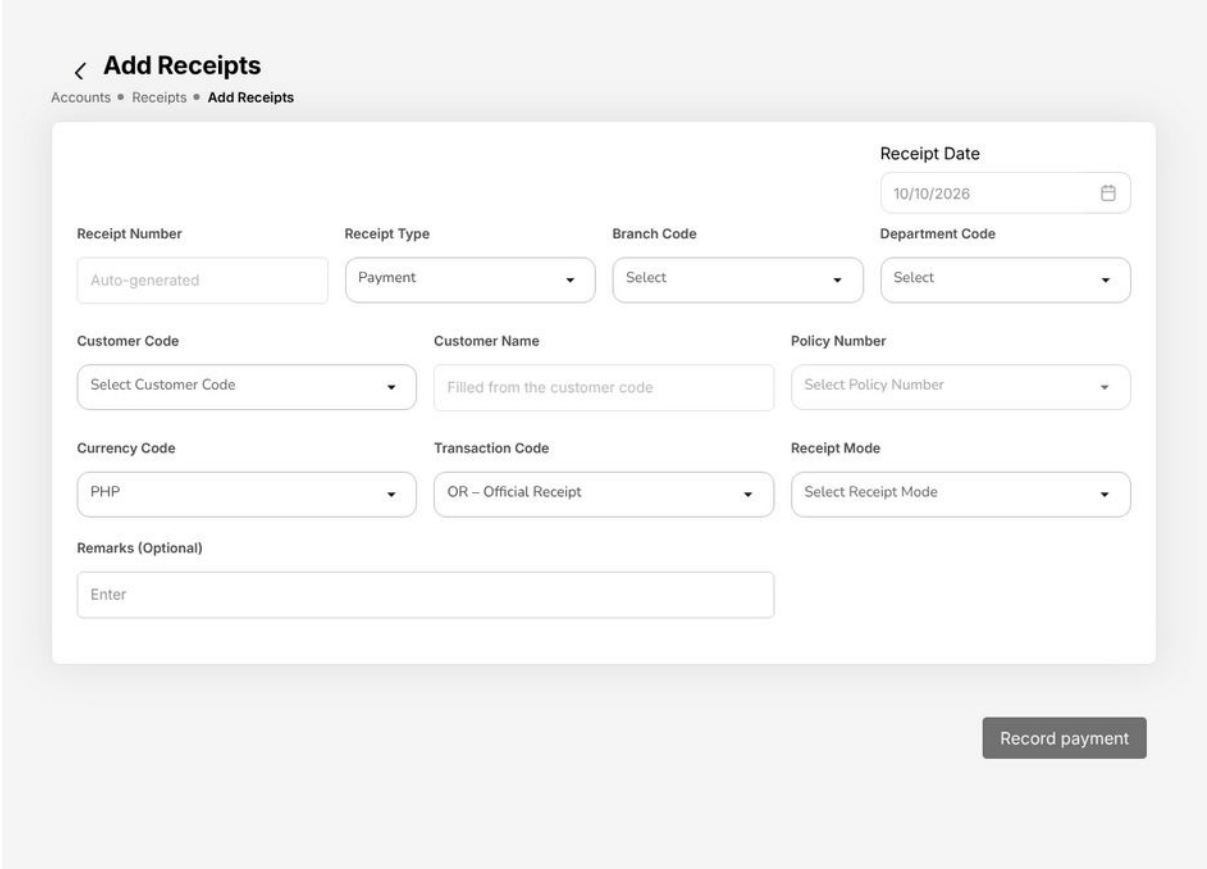

Figure 19.4: Accounts > Receipts > Add Receipts

19.3 Collections

Accounts > Collections lists every open premium with **Client Name**, **Policy No.**, **Outstanding** spread over the ageing buckets (**Current**, **1-30 Days**, **31-60 Days**, **61-90 Days**, **Over 90 Days**), **Due Date**, **Status** (Pending, Committed, Overdue), **Days Overdue** and **View**. Filter by status and overdue level.

The cards show the **Outstanding** and **Overdue** amounts, the items **Committed** (the client gave a payment date) and **Escalated**, and the amount **Collected this month**. **Send Payment Reminders Now** e-mails the reminders of the overdue items at once; **Import open items** loads open premiums from a file.

Select **View** to open an item. **Collection Details** shows the client and policy, the overdue level, the financial breakdown of the bill (gross premium, net premium, VAT, DST, LGT, paid, outstanding), the ageing, the **Follow-Up History** and the **Payment History**. The **Collection Actions** are **Send Email**, **E-mail invoice**, **Add Note** and **Set Commitment Date**; **Record receipt** opens the receipt for this bill.

Changes on the Credit Control screens that need approval (a credit limit, a warranty extension) are approved by TIS Finance & General Accounting, a user other than the one who requested them.

- **Instalment Plans** lists the open instalments of policies paid by instalment, with **Policy no.**, **Client**, the instalment number, **Due date**, **Outstanding**, **Days past due** and **Ageing**, and the totals per ageing bucket. **Overdue only** narrows the list. Instalments are monthly. A corporate client has 90 days to pay unless the insurer's premium warranty says otherwise; an individual client has 30.
- **Premium Warranty Monitor** follows the premium payment warranty: the premium must be paid by the warranty deadline after inception, or the cover is at risk. The cards count the policies **Warranty breached** and **At risk** and the **Extensions to approve**. Each row shows the policy, client, insurer, **Inception**, **Warranty deadline**, **Days past deadline**, **Premium due** and **Status**. Request an extension from the row; the extension is approved by another user.
- **Client Credit Limits** shows each client's **Credit limit** (or **No limit**), **Open premium**, **Available** and **Last changed**. Set or change a client's limit from the row. **Issued over the limit** lists the policies booked over a client's limit.
- **Remittance Ageing** ages the premium collected and not yet remitted to each insurer, by the insurer's remittance terms (**Not yet due**, **1-30**, **31-60**, **61-90**, **Over 90**), with the detail by policy and receipt. **Excel** downloads it.

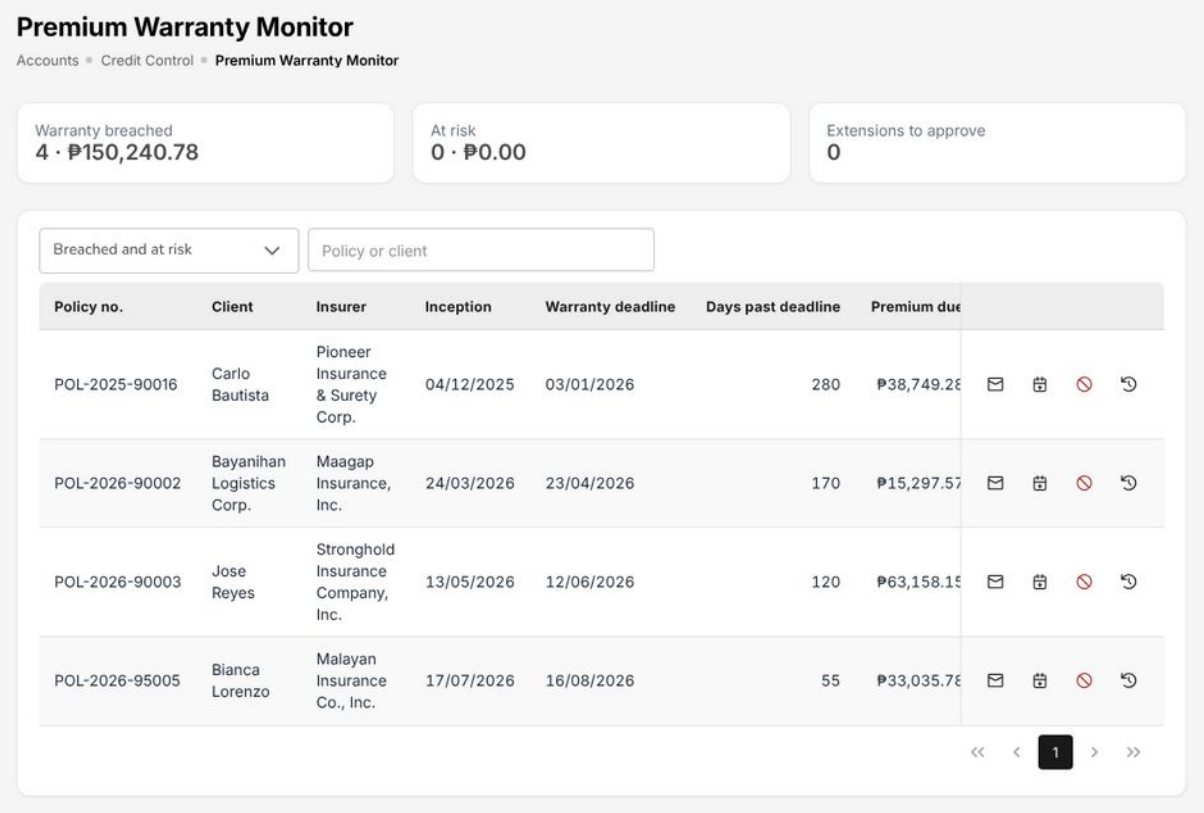

Figure 19.6: Accounts > Credit Control > Premium Warranty Monitor

19.5 Post-dated cheques

Accounts > Post-Dated Cheques follows the cheques of clients paying by instalment, from receipt to collection.

TIS IT AppSupport / Admin	View
TIS General Manager	View

The tabs list the cheques **All open**, **At TIS**, **With partners**, **Awaiting confirmation** (the cheque date is past and the Insurance Partner has not advised), **Follow-up**, **Bounced**, **Cancellation pending**, **Deposit due**, **Closed** and the **Transmittals**. Each row shows the PDC number and its set, the client and policy, the bank and cheque number, the cheque

date, the amount, the instalment ("1 of 4"), the custody, the status and the ageing of a cheque not yet confirmed. **Export** downloads the tab.

To encode the cheques of a client, select **Encode PDCs**, enter the policy and the bill, and the payee: **Insurance Partner** (the cheques are forwarded for warehousing) or **TISPH** (kept and deposited by TISPH). One row is proposed per unpaid instalment; enter the bank, branch, account number, cheque number, cheque date and amount of each. The dates must fall near the instalment due dates and the amounts cannot exceed what the bill owes. **Save set** saves the set (PCS-YYYY-NNNNN) with its cheques **Received at TIS**; nothing is posted. **Print acknowledgement** on the set prints the acknowledgement receipt the client keeps.

Cheques payable to the Insurance Partner:

- **Forward to Insurance Partner**: choose the cheques of one partner and send them with a transmittal (PT-YYYY-NNNNN): courier, messenger or hand-carry, with the courier reference. They are **Forwarded**.
- **Partner received**: the partner's acknowledgement of the transmittal; the cheques are **Warehoused**.
- **Partner cleared**: the partner's advice that the cheque was paid, with the collection date and the partner's reference. The acknowledgement receipt is posted against the premium payable to the partner and the instalment is paid.
- **Partner bounced**: with the reason (DAIF, account closed, stop payment, signature differs, stale, other); the receipt of the cheque is cancelled and the instalment is open again for a replacement.

Cheques payable to TISPH are **Deposit**ed to the one collection account of TISPH (an official receipt is posted), then **Cleared** or **Bounced**.

Request cancellation asks for the cancellation of a cheque with a reason (cash or cheque replacement, technical defect, policy cancelled, account paid off, encoded in error). Another user approves it: CCD-PDC / CCD-ADA, never the one who asked. A cheque the partner holds is pulled out on the next transmittal to that partner. **Replace** registers the cheque that replaces a bounced or cancelled one for the same instalment; **Return to client** gives back a cheque kept at TIS. The history of each cheque shows every step with its user.

19.6 Accounts payable

Suppliers are kept on Accounts > Payables > Suppliers: TIN, address, VAT registration, the EWT tax code withheld (Master > Finance > Taxation, for example WC158 goods, WC160 services, WC100 rentals), payment terms and the default expense account.

Menu: Accounts > Payables > Suppliers

Role	Access
TIS Sales Unit Head	View
TIS Operations Unit Head	View
TIS Finance & General Accounting	Create and edit
TIS IT AppSupport / Admin	View
TIS General Manager	View

Suppliers: **Add** opens the supplier form: **Code** and **Supplier** (required), **TIN**, **Registered Address**, **VAT Registered**, **EWT Tax Code**, **Payment Terms (days)**, **Default Expense Account**, **Contact Person**, **E-mail**, **Phone**, **Bank** and **Bank Account No.**

Supplier Invoices lists **AP voucher**, **Supplier**, **Supplier invoice no.**, **Invoice date**, **Due date**, **Gross**, **EWT**, **Balance** and **Status**. To record an invoice:

1. Select **New supplier invoice**.
2. Enter **Supplier**, **Supplier invoice no.** and **Invoice date** (required), the **Description** and the **EWT tax code** (the supplier's is proposed).
3. Add a line per expense: **Description**, **Account**, **Asset class** (for a fixed asset), **Vatable** and **Amount**. The total net of VAT is shown.
4. Select **Save draft**, or **Save and submit**.

The invoice is approved by TIS Sales Unit Head, TIS Operations Unit Head, TIS Finance & General Accounting or TIS General Manager, a user other than the one who submitted it, and is posted on approval: expense (or asset), input VAT, EWT payable and the payable to the supplier. A line with an asset class creates the asset on the Asset Register.

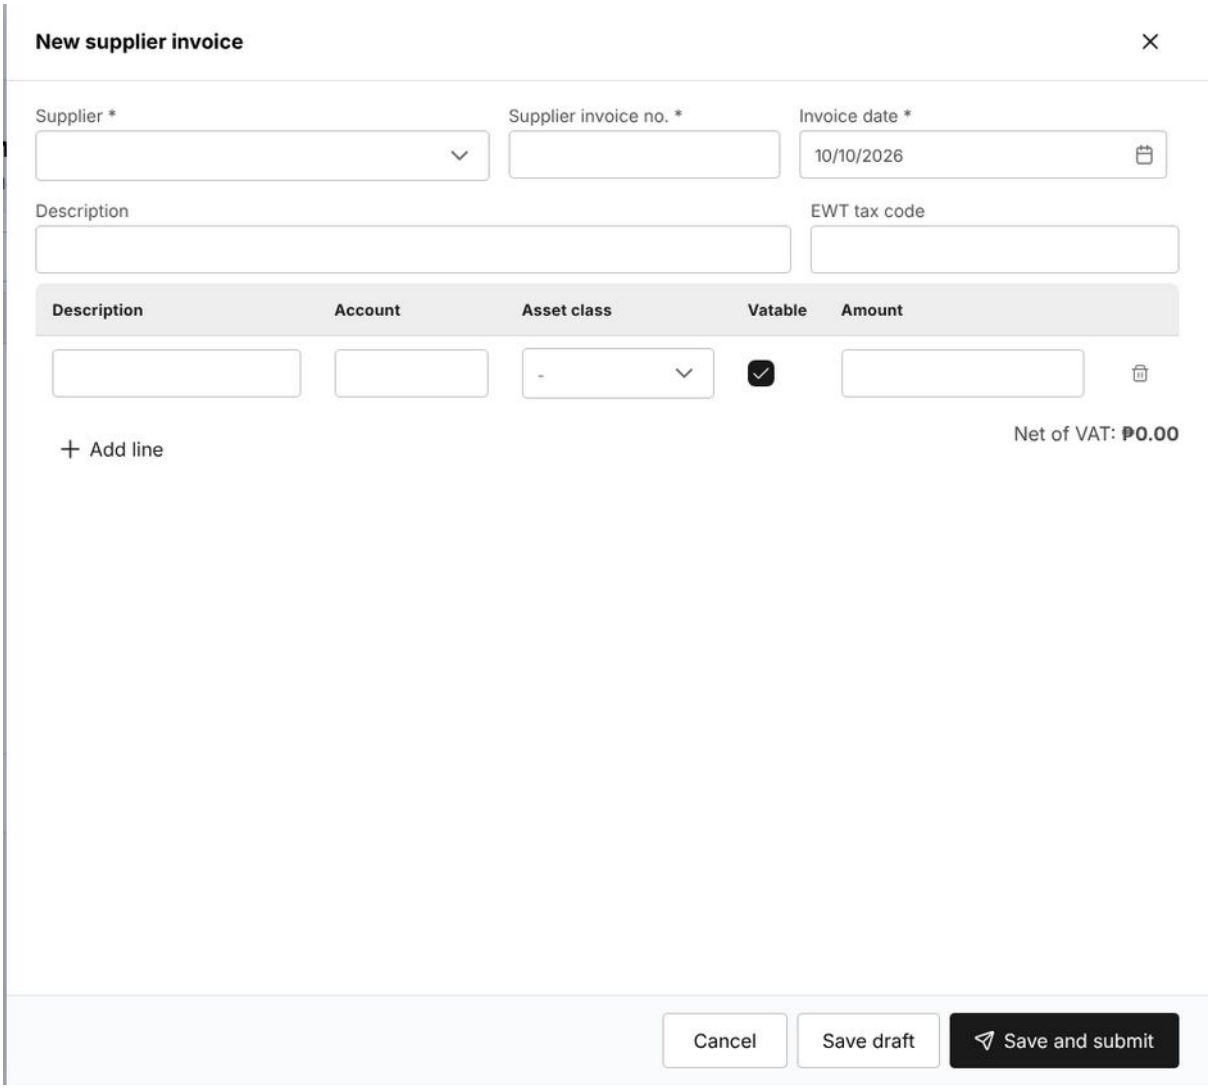

Figure 19.7: New supplier invoice

Supplier Payments pays approved invoices: select **New supplier payment**, choose the **Supplier**, the **Date**, the **Payment mode** (for example **Cheque**), the **Bank account** (required), the **Cheque no.** and **Reference**, tick the invoices to pay and select **Pay**. The payment is posted and the invoices' balance reduced.

AP Ageing ages the open supplier invoices on their due dates (**Not due**, **1-30**, **31-60**, **61-90**, **Over 90**), by supplier and by invoice. **Export to Excel** downloads it.

19.7 BIR Form 2307 for suppliers

The expanded withholding tax withheld from a supplier on an approved supplier invoice (the supplier's EWT tax code, on the amount net of VAT) is creditable tax of the supplier: the broker issues BIR Form 2307 for it each quarter.

Menu: Accounts > Payables > Supplier 2307

Role	Access
TIS Sales Unit Head	View
TIS Operations Unit Head	View
TIS Finance & General Accounting	View

Choose the year and the quarter. The cards show the number of **Payees**, the **Income payments subject to expanded withholding tax** and the **Tax withheld for the quarter**. Each row is one supplier: **Payee's name**, **Taxpayer Identification Number (TIN)**, **ATC**, **Transactions**, the income payments, the tax withheld and the **Certificate no.** Print the certificate of a supplier from its row. The same figures are in the QAP of Tax: BIR forms and returns (19.18).

19.8 Disbursement: payment vouchers and cheques

A payment voucher (PV-YYYY-NNNNN, with the disbursement transaction DT-YYYY-NNNNN) pays an insurer, an agent or referrer, a client or a supplier.

Menu: Accounts > Disbursement

Role	Access
TIS Sales Unit Head	View
TIS Operations Unit Head	View
CCD-Recon (Reconciliation and Reversals)	View
TIS Finance & General Accounting	Create and edit
TIS IT AppSupport / Admin	View
TIS General Manager	View

The list (**Disbursement history**) shows **Disbursement Number**, **Transaction Number**, **Customer Code**, **Disbursement Date**, **Amount**, **Status** (**Draft**, **Approved**, **Paid**) and **Action**. The buttons are **Bulk Print**, **Bulk Upload**, **Bulk Disburse** (one voucher per referrer with approved commission) and **Create**.

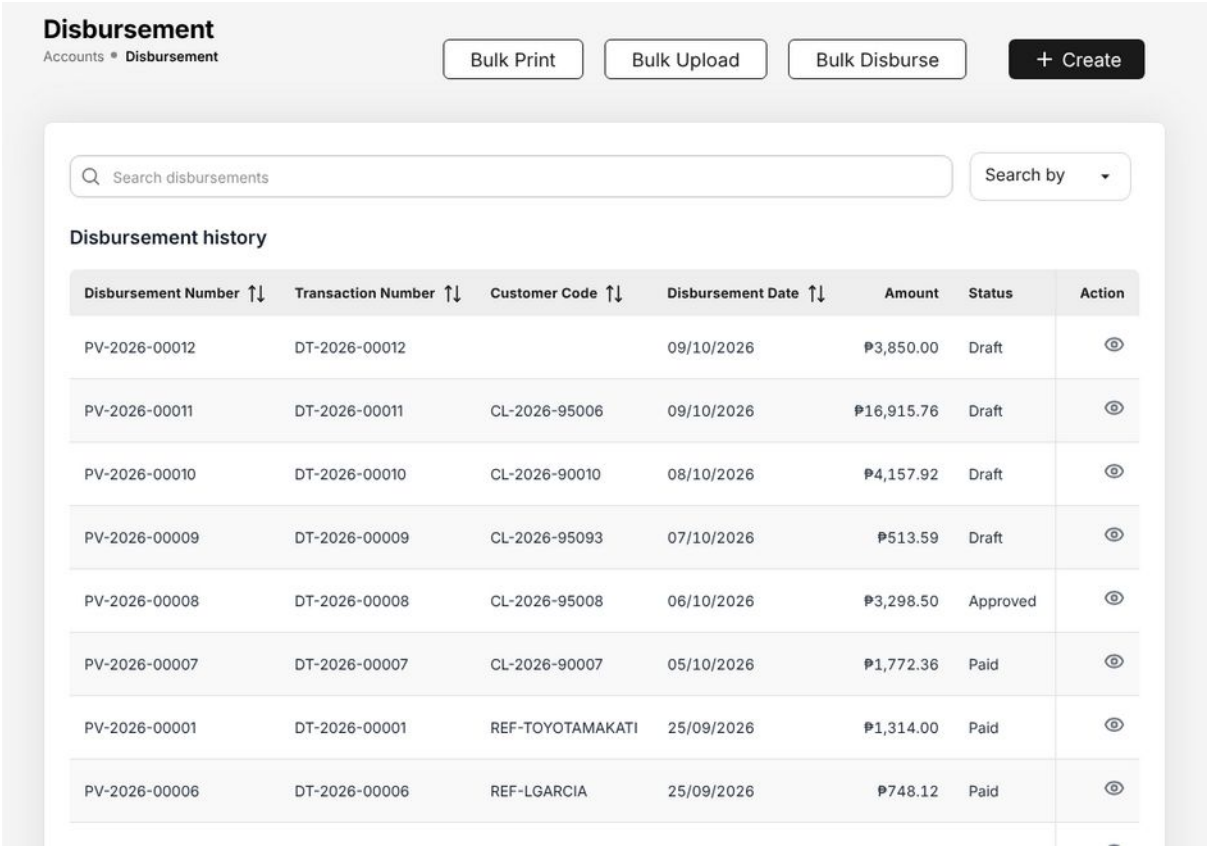

Figure 19.8: Accounts > Disbursement

To create a payment voucher, select **Create**:

1. Enter the **Disbursement Date**, **Department Code** and **Branch Code**.
2. Choose the **Payee Type** (insurer, agent or referrer, client, supplier) and the **Criteria**, then the payee (**Customer Code**, **Customer Name**) and, if the payment is for one policy, the **Policy Number**.
3. Choose the **Transaction Type**, enter the **Payment Description**, the **Payment Currency** and any **Payment Notes**. Select **Next**.
4. Enter the amounts and the accounts debited, and the withholding tax where it applies.
5. Choose the bank account and the payment method (cheque, bank transfer or bank payment file) and save.

The voucher is approved by a user other than the one who prepared it, within his or her limit of the Authority Matrix (21.10). An approved voucher is paid by cheque (the cheque number and release are recorded) or by a bank payment file (19.9); on payment the journal is posted and the voucher becomes **Paid**.

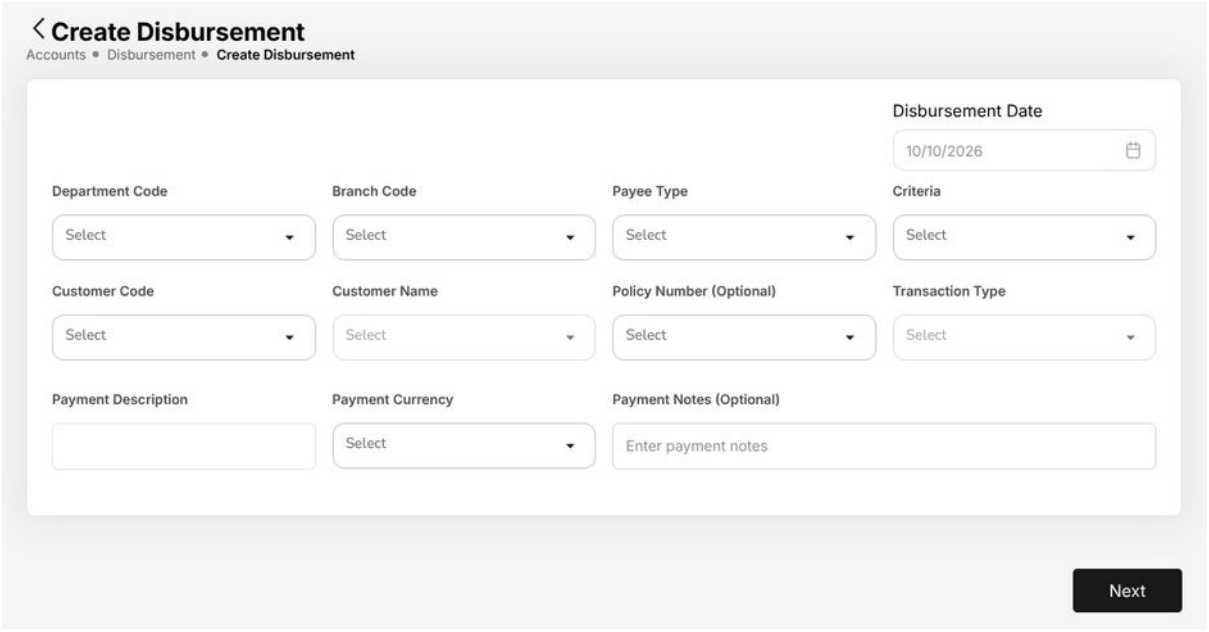

Figure 19.9: Create Disbursement

19.9 Bank payment files

Menu: Accounts > Bank Payment Files

Role	Access
TIS Finance & General Accounting	Create and edit
TIS General Manager	View

Bank Payment Files pays approved payment vouchers through the bank's upload file. The list shows **Batch**, **Layout**, **Value date**, **Payments**, **Amount**, **Status** and **Created**.

1. Select **New batch**.
2. Choose the **Layout** of the bank (see Bank file layouts and payee bank accounts (21.20)), the account to **Pay from**, the **Channel** (for example **PESONet**) and the **Value date**.
3. Tick the payment vouchers waiting for payment and enter **Remarks**.
4. Select **Create batch**.

The batch is approved by another user, the file is downloaded for the bank portal, and the bank's result file is loaded back: each payment it confirms is posted and its voucher becomes **Paid**; a rejected payment returns to the vouchers waiting for payment.

Approve and **Return to draft** are shown only to a user who may decide the batch. The user who prepared or submitted the batch, or prepared one of its payment vouchers, reads why instead, and a user whose payment voucher limit is below the batch total sees the limit. The vouchers of insurer remittances are batched from Insurer payments (19.10.5) with the same batch dialog.

19.10 Remittance to insurers

For broker-billed policies TISPH remits the collected premium, net of the broker's commission, to each insurer by its share. Remittances are prepared and submitted by

CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting; they are approved by TIS Finance & General Accounting or TIS General Manager, never by the user who prepared or submitted them.

The Remittance menu has eight entries. Each role sees the entries of its work; a role that only reads an entry sees **View only** at the top of the page and no tick boxes or action buttons.

Entry	What it is for
Remittances (19.10.1)	The remittances from draft to payment; **Import policy list** for an off-cycle remittance
Approvals (19.10.4)	The remittances, settlements and adjustments waiting for a decision
Insurer payments (19.10.5)	The payment vouchers of the approved remittances, with their bank payment batch or cheque
Reconciliation	The insurers' statements: see Insurer statement reconciliation (19.17)
Exceptions (19.10.6)	Differences and problems found on remittances, to follow up
Insurer billing	Commission debit notes of direct-bill policies: see Direct bill: commission debit notes (19.11)
Setup (19.10.7)	The schedules of the weekly remittance runs
Settlement (19.10.9)	The settlement of approved remittances, which raises the insurer's payment voucher

A remittance (REM-YYYY-NNNNN) covers one insurer and product line for a coverage week. Its status is **Draft** until submitted, **Pending approval** until an approver decides, then **Approved**, or **Returned** to its maker when rejected. **Settled (voucher raised)** means the insurer's payment voucher exists; the step **Paid** of the remittance shows when the voucher is paid.

19.10.1 Remittances

TIS General Manager	View

The chips at the top show the next weekly run and whether **Automation** (the daily remittance job) is **On** or **Off**. The cards **To submit**, **Awaiting approval**, **Approved, not paid** and **Overdue to insurer** count the remittances of the list as filtered; select a card to list them. The tabs are **My work** (the drafts and returned remittances to submit), **Drafts**, **In approval**, **In payment** and **All**. Filter by coverage week, insurer, product line and source (**Weekly run**, **Run now**, **Import**), or search a REM, policy or OR number.

Each row shows **Remittance no** with the coverage week, **Insurer** and product line, **Policies**, **Due to insurer** with the due date (red with **Overdue** when past), **Status** and **Next step**: for a remittance pending approval, the approvers it waits on. **Columns** adds

Source, Voucher no, Paid on, Bank ref, Submitted by and Created on. The total of the list is under **Due to insurer**.

To submit remittances for approval:

1. Choose Accounts > Remittance > Remittances. Open **My work** or **Drafts**.
2. Tick the drafts and select **Submit for approval (n)**, or choose **Submit for approval** in the row menu.
3. Check the total in the confirmation and select **Submit n remittances**. Each row then says **Submitted**, or why it was not submitted (for example, another user submitted it a moment before).

The row menu also offers **View**, the remittance schedule (XLSX and PDF), the remittance advice once the voucher is raised, and **Open voucher**. The menu at the top right holds **Run now**, **Run history**, **Import history** and **Export XLSX**.

19.10.2 Import policy list

An off-cycle remittance (opening remittances at go-live, a catch-up, an insurer's list, a correction) is created from a list of policies. The file names the policies and the insurer; the system computes every amount from the collections. **Import policy list** replaces the bulk upload of remittances with typed amounts.

1. On Accounts > Remittance > Remittances, select **Import policy list**.
2. Select **Download template** and fill in the **Data** sheet: **Policy No** and **Insurer Code** are required; **Product Line**, **Expected Due to Insurer**, **Insurer Reference** and **Remark** are optional.
3. Choose the **Purpose** from the list, type a **Note** if needed, and choose the file (.xlsx or .csv, at most 10 MB and 5,000 rows).
4. Select **Validate**. Nothing is created yet. The preview shows each row with its result (**Ready**, **Ready · Variance**, **Already on REM**, **Not found**, **Not issued**, **Insurer differs**, **Product line differs**, **Direct bill**, **Duplicate in file**) and the remittances to create per insurer and product line. **Download error report** lists every row with its result and message.
5. Select **Create n draft remittances** and confirm. One draft is created per insurer and product line from the ready rows, marked **Off-cycle** with the purpose. Submit the drafts for approval as above.

Expected Due to Insurer is only compared with the amount computed: a difference above PHP 1.00 is shown as a variance. The same file cannot be imported twice, and a validated file not created within 7 days is discarded. **Import history** (menu at the top right) lists the imports with their results.

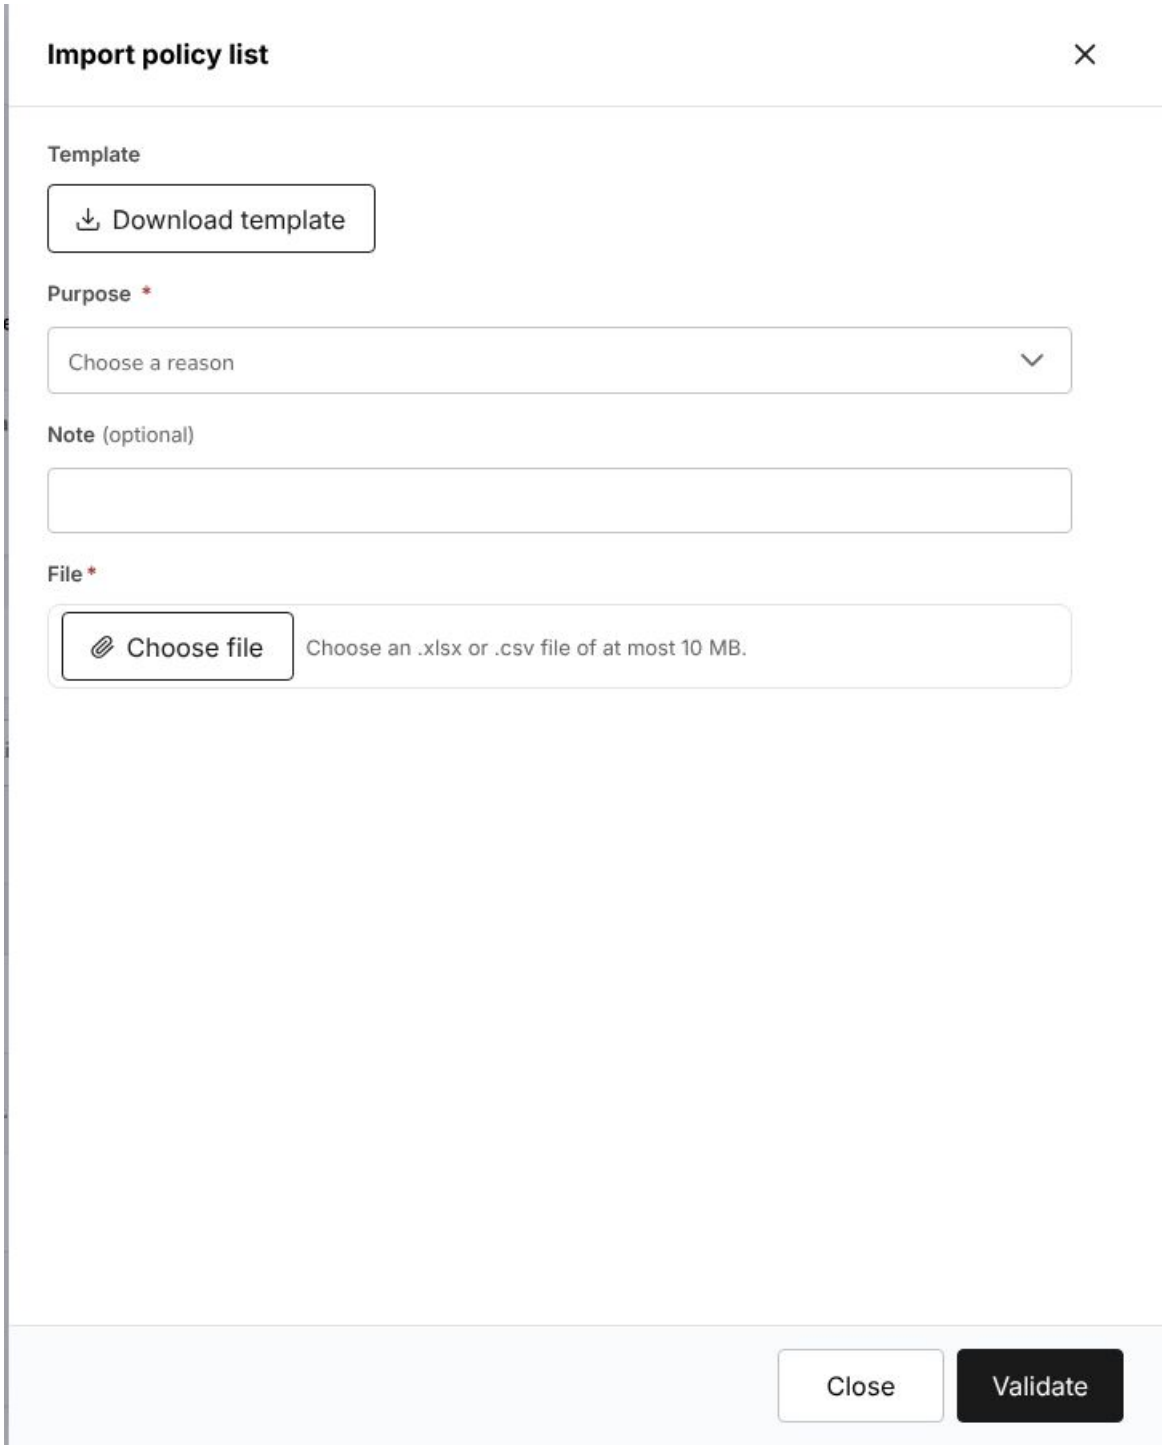

Figure 19.10: Import policy list with Download template, Purpose, Note and File

19.10.3 The remittance page

Select a remittance number to open its page. The header shows the number, status, insurer, product line, basis, coverage week, due date and source, and the steps **Created**, **Submitted**, **Approved** (or **Returned**), **Voucher raised** and **Paid**, each with its date and user. Under the header one line says what comes next, or why you cannot act and who can.

The buttons follow the status and your role: **Submit for approval** for a draft or returned remittance, **Approve** and **Reject** for an approver who may decide it, **Remind approver**

for the user who submitted it. The tabs are **Lines** (the policies with their totals), **Payment** (the voucher, its payment and value date), **Documents** (the remittance schedule in XLSX and PDF and, once the voucher is raised, the remittance advice) and **Activity** (the decisions and the activity log, with **Download log (XLSX)**).

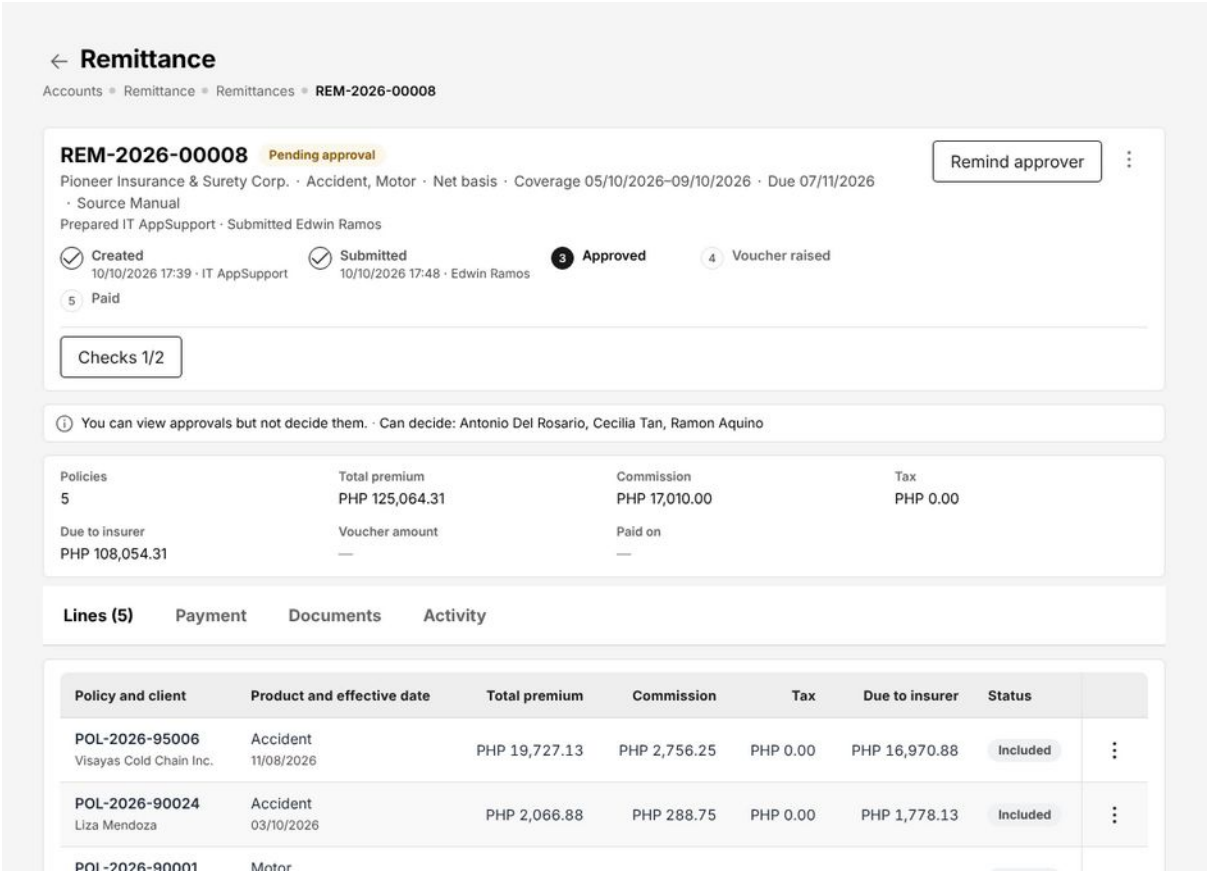

Figure 19.11: A remittance pending approval, seen by the user who submitted it: the steps, Remind approver and the users who can decide

19.10.4 Approvals

Menu: Accounts > Remittance > Approvals

Role	Access
CCD-Recon (Reconciliation and Reversals)	Approve
TIS Finance & General Accounting	Approve
TIS IT AppSupport / Admin	View
TIS General Manager	Approve

The chips at the top say what you may decide, for example **Remittance up to PHP 1,000,000.00**, or **View only**. As delivered, TIS Finance & General Accounting approves remittances up to PHP 1,000,000.00 and the TIS General Manager without limit (see the Authority Matrix (21.10)). A user without a remittance limit cannot approve or reject. An absent approver is covered by a Delegation (21.11).

The cards count **Awaiting my decision**, **Past SLA**, **Submitted by me** and **Decided by me today**. The tabs are **Awaiting my decision**, **Submitted by me** (with the approvers each item waits on, and **Remind approver** in the row menu), **All pending** (with **Can I decide?**) and **Decided** (the last 30 days).

To decide a remittance:

1. Choose Accounts > Remittance > Approvals, or open the approval from **My Work** or its notification.
2. Select the reference. The review panel shows the remittance and its totals, the previous remittance of the insurer with the change in per cent, the checks at submission, the lines, the open exceptions and the activity.
3. Select **Approve** and confirm, or **Reject**, choose the reason from the list and confirm. A rejected remittance returns to its maker as **Returned**.

Several items can be approved together: tick them and select **Approve selected (n)**; each is decided on its own and its result is listed. There is no rejection of several items at once. When you may not decide an item, the panel says why (you submitted it, it is above your limit, or another user decided it) and shows no buttons.

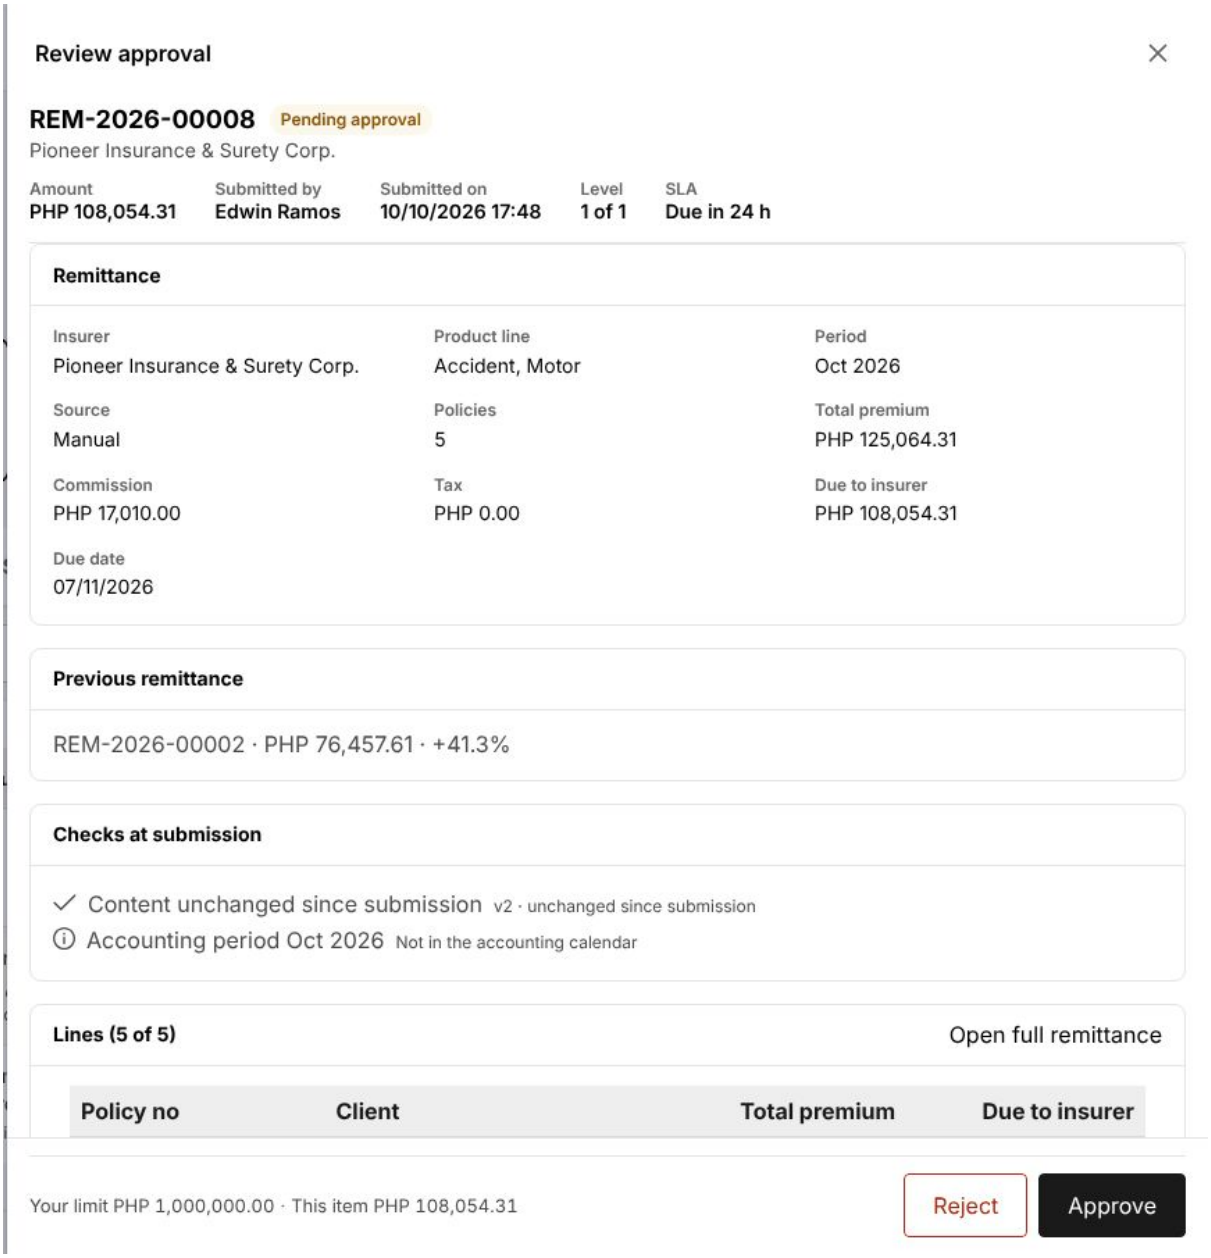

Figure 19.12: Review approval of a remittance with the approver's limit, Reject and Approve

Menu: Accounts > Remittance > Insurer payments

Role	Access
CCD-Recon (Reconciliation and Reversals)	Create and edit
TIS Finance & General Accounting	Create and edit
TIS IT AppSupport / Admin	View
TIS General Manager	View

Insurer payments lists the payment vouchers of the approved remittances with their bank payment batch or cheque and the bank's result. It posts nothing itself: batches are approved and released on Bank payment files (19.9), cheques on Disbursement (19.8).

The cards and tabs are **To pay**, **In payment**, **Paid** (this week on the card), **Failed** and **All**. Each row shows the voucher, the insurer with its bank account masked, the amount, method, batch, paid on and the **Next step** (for example **Submit voucher (Disbursement)**). The row menu starts with **View payment**, then **Open remittance**, **Open batch**, **Pay by cheque**, **Re-batch** (a failed payment) and **Download advice (PDF)** (a paid one).

To pay insurers by bank file, tick the vouchers to pay (an approved voucher with the insurer's bank account on file) and select **Create Metrobank batch (n)**. The batch dialog of Bank Payment Files opens with those vouchers and the Metrobank layout; check the value date and select **Create batch with n payments**, then submit the batch on Bank payment files (19.9). A voucher still in draft shows **Submit voucher (Disbursement)** as its next step and cannot be ticked.

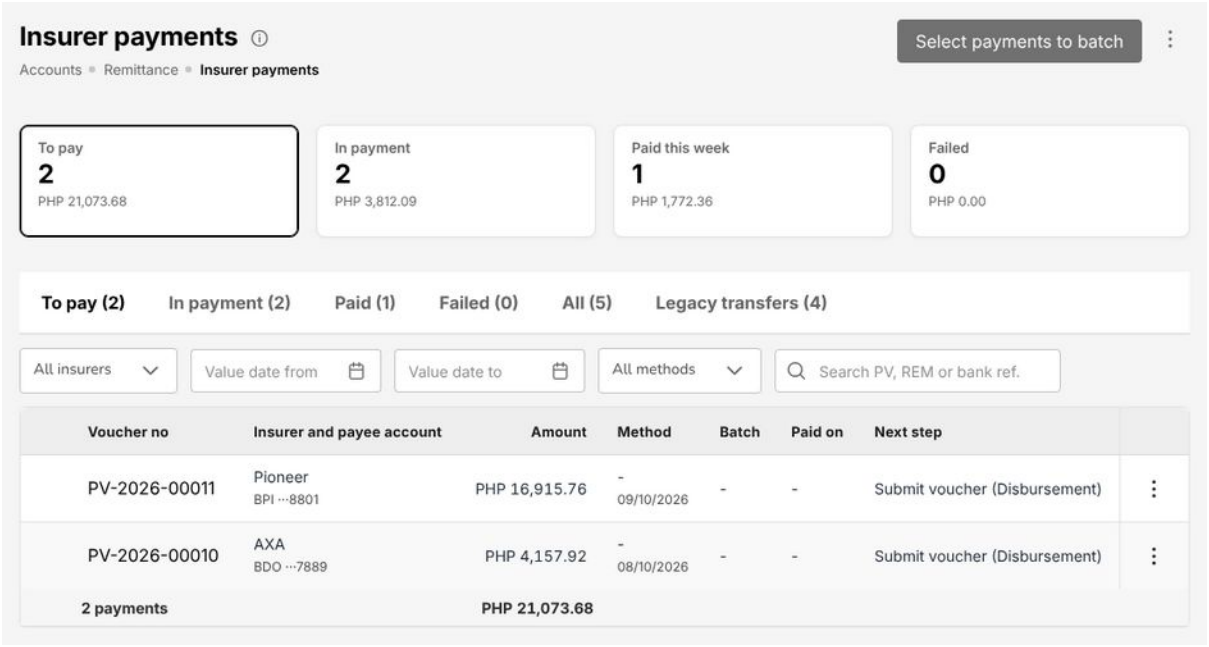

Figure 19.13: Accounts > Remittance > Insurer payments with the vouchers to pay

Exceptions lists the differences found on remittances (for example **Amount Mismatch**, **Duplicate Entry**, **Missing Document**, **Date Discrepancy**) with their severity, amount, age, the user assigned and the status. The cards **Unresolved**, **In progress**, **Escalated** and **Resolved today** filter the list. The row menu offers **View**, **Start** (you take it on),

Escalate (with a reason from the list) and **Resolve** (with the resolution, the amount if any and a note).

19.10.7 Setup: remittance schedules

Menu: Accounts > Remittance > Setup

Role	Access
TIS Finance & General Accounting	Create and edit
TIS IT AppSupport / Admin	View

The weekly schedule **TIS-WEEKLY** runs every Monday at 06:15 for every active insurer and creates one draft per insurer and product line for the policies paid in full from the Monday to the Friday before (**Eligibility**: Fully paid in the window). With **Proof of payment required** a policy is remitted only when every receipt that paid it carries its proof; a policy without it is listed on Exceptions as **No proof of payment**. A schedule on **Inception date** remits by inception date instead. The **Automation** chip shows whether the daily remittance job is on; it is **Off** until TISPH switches it on.

The row menu offers **View** (the schedule, its latest runs and its activity log) and, to TIS Finance & General Accounting: **Edit**, **Preview run** (what a run would create, without creating anything), **Run now** and **Pause** or **Resume**. **Run now** asks for the off-cycle reason and shows per insurer what will be created; nothing is created until you select **Create n draft remittances**. A week that has been run cannot be run again: a later catch-up goes through Import policy list (19.10.2).

A part-paid policy on an instalment plan is not remitted until it is paid in full. **Held** lists these policies with the insurer, product line, plan, total premium, paid to date, balance, next due date and the cheques that bounced; **Released** lists those paid in full since, which go on the next weekly run with their full premium. The list is refreshed every morning and after each payment.

19.10.9 Settlement

Menu: Accounts > Remittance > Settlement

Role	Access
TIS Finance & General Accounting	Create and edit
TIS IT AppSupport / Admin	View
TIS General Manager	View

An approved remittance is settled with the insurer, and the approved settlement raises the insurer's payment voucher.

1. Choose Accounts > Remittance > Settlement.
2. Choose the **Insurer code** and the period, then select **Add policies** (or **Import**).
3. Select **Calculate**: total premium less commission and tax, plus or minus adjustments, gives the **Net Settlement**.
4. Select **Submit for approval**, or **Save draft**.

Another user approves the settlement on Approvals (19.10.4). The system then raises the payment voucher for the net amount on Disbursement (19.8), and the remittance shows **Settled (voucher raised)**. The voucher is paid through Insurer payments (19.10.5).

For a co-insured policy each insurer is remitted its own share. A refund due from an insurer (return premium on premium already remitted) is netted against its next remittance.

See Remittance to the insurers (3.8) for the order of the steps at TISPH.

19.11 Direct bill: commission debit notes

CCD-Recon (Reconciliation and Reversals)	Create and edit
TIS Finance & General Accounting	Create and edit
TIS IT AppSupport / Admin	View
TIS General Manager	View

For a direct-bill policy the client pays the insurer, and TISPH bills the insurer for its commission with a debit note. For the premium TISPH remits, the commission is billed to the insurer with a billing statement on the 15th and the 26th of the month. The cards show the **Unbilled commission**, **Billed, outstanding**, **Overdue** and **Receivable from insurers**. The screen has four tabs:

1. **Raise debit note**: choose the **Insurer** (required), the issue dates (**Issued from**, **Issued to**), **Commission of** and the **Line of business**, and select **Load policies**. Tick the policies to bill: each shows the gross premium, rate, commission, VAT, **Total Due** and EWT. Raise the debit note.
2. **Debit notes**: the debit notes and billing statements issued, with their balance, the line of business of a statement and **Overdue** past its due date; record the insurer's payment against them. A billing statement exports with its schedule to Excel or CSV.
3. **Billing run**: the next billing dates and the runs made. On the 15th and the 26th (the working day before when that day is a Saturday, Sunday or holiday) the system drafts one billing statement per insurer and line of business from the remittances approved before the billing date and not yet billed: the commission, VAT on the commission (Gross Amount), the withholding tax and the Net Amount Payable, due 15 days after the billing date. **Run billing** drafts them now for a billing date and, if chosen, one insurer.
4. **Billing mode**: whether each insurer's policies are broker-billed or direct-billed.

A debit note or billing statement is approved by another user than the one who raised or submitted it; that user reads why instead of **Approve** and **Reject**. A billing statement is approved by TIS Finance & General Accounting or TIS General Manager, and only when the insurer's TIN is on Master > Insurance Company. A statement on commission kept from the remittance is then **Settled by retention**. **Reject** and **Cancel debit note** ask for the reason from the list; a cancelled statement's lines are billed again on the next run.

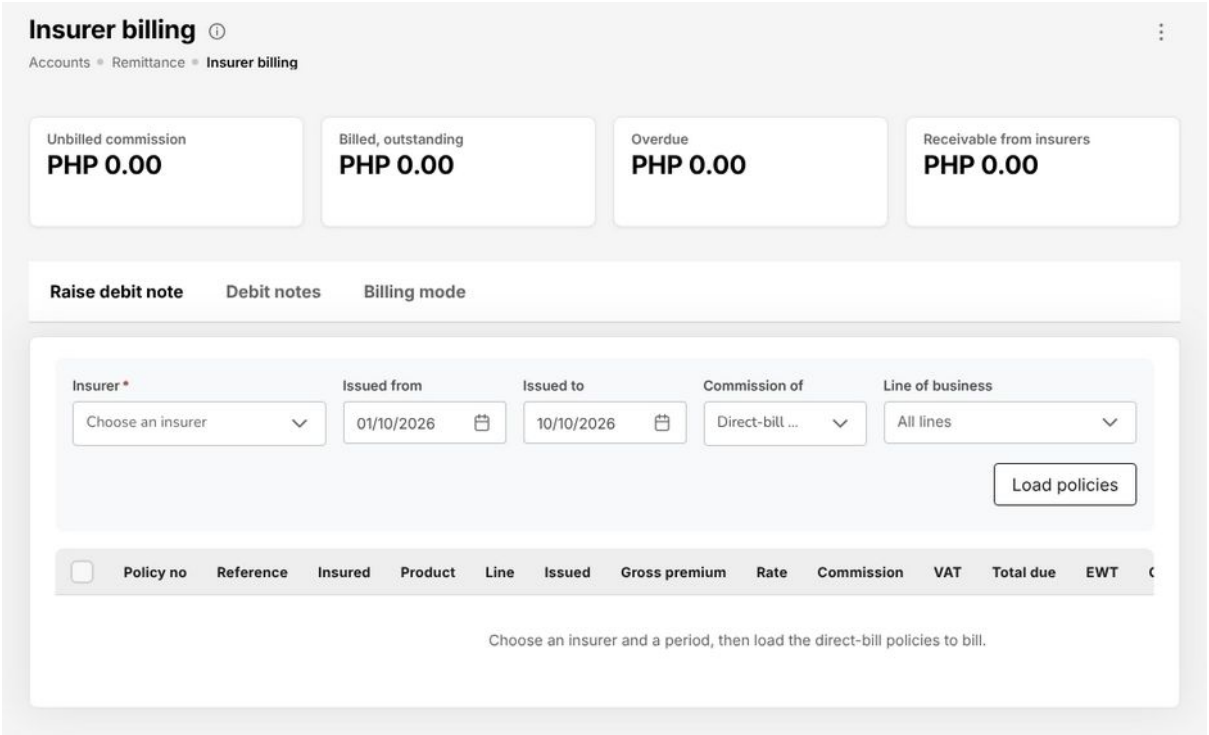

Figure 19.15: Accounts > Remittance > Insurer billing on the tab Raise debit note

TIS General Manager	View

Journal Voucher lists the manual journals (**Journal Voucher history**) and the **System journals parked for approval**, with **Transaction Code**, **Transaction Number** (JV-YYYY-NNNNN), **Date**, **Description** and **Status** (**Awaiting approval**, **Posted**). **Upload** loads a journal from a file.

To enter a journal, select **Voucher**:

1. Choose the **Transaction Code** (the kind of journal) and enter the **Date** and **Remarks**.
2. Select **Add Data** for each line: **Main A/c**, **Sub A/c**, **Foreign Amount**, **Currency**, **Local Amount**, **Entry** (debit or credit) and **Cost Centre**.
3. Check that **Total Debit** equals **Total credit** (**Net** zero).
4. Select **Submit for approval**.

The journal is approved by TIS Finance & General Accounting other than the user who submitted it, and is posted on approval. A journal cannot be posted into a closed period.

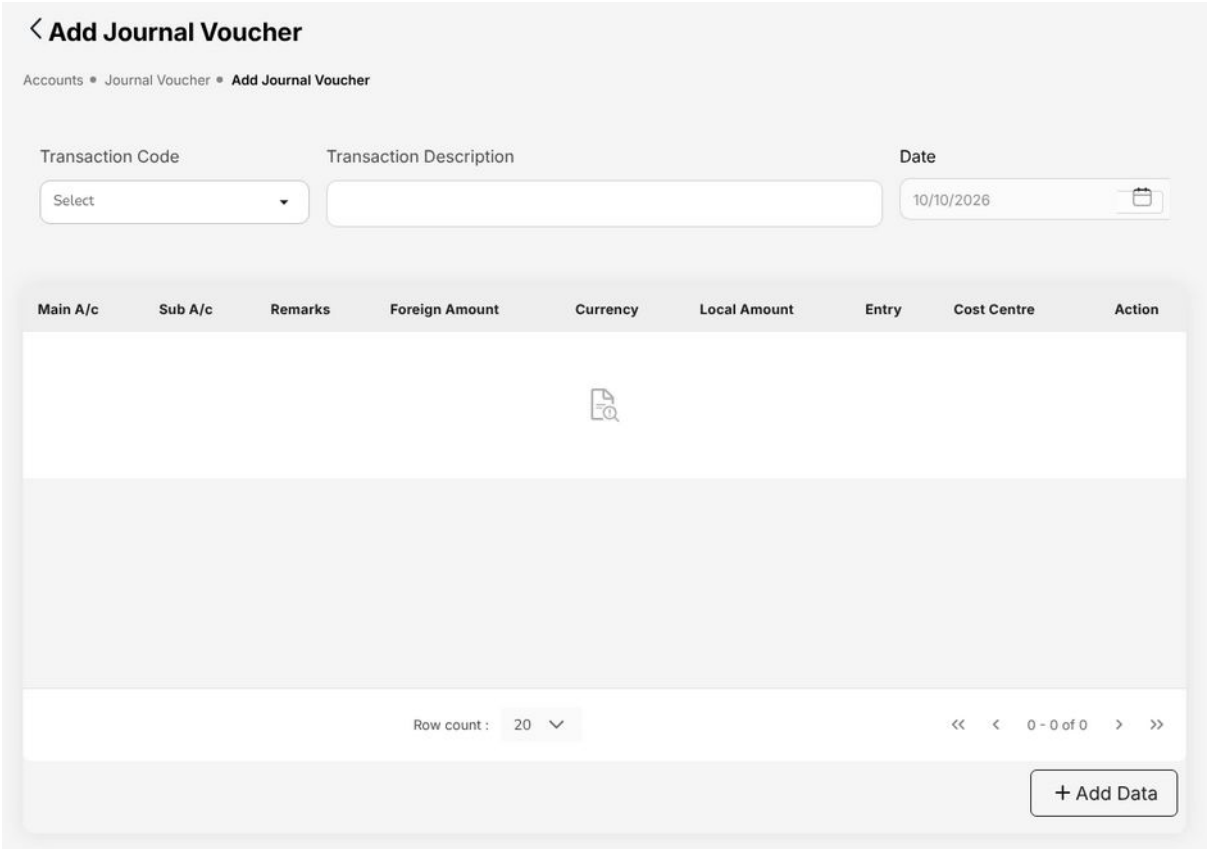

Figure 19.16: Add Journal Voucher

Correction JV corrects a posted transaction: choose the **Transaction Code** and **Transaction Number** of the original, the **Corrections JV Transaction Code** and the **Correction Description**, select **Next** and enter the corrected lines. **Reversal JV** reverses a posted transaction in full the same way, with the **Reversal JV Transaction Code** and **Reversal Description**. Both are approved like any journal voucher.

19.13 SAP GL export

Menu: Accounts > SAP GL Export

Role	Access
TIS Finance & General Accounting	Create and edit
TIS General Manager	View

Every day at the cut-off, the journals posted since the previous cut-off are written as the SAP GL header and line files to the SAP pick-up folder. The list shows each **Day**, the period **Posted between**, **Status**, **Journals / lines**, **Debit**, **Credit**, **Started by**, **Warnings** and **Files**. **Run now / re-generate** writes the file of a day again, for example after a correction. Download the files from their row.

19.14 Open entry matching and write-offs

Open entry matching settles open debit and credit entries of the same account against each other, for example a receipt against a bill posted without a reference.

Menu: Accounts > Open Entry Matching

Role	Access
TIS Finance & General Accounting	View
TIS General Manager	View

Menu: Accounts > Open Entry Unmatching

Role	Access
TIS Finance & General Accounting	View
TIS General Manager	View

1. Choose Accounts > Open Entry Matching.
2. Enter the **Sub Account Code** (and, if needed, **Division**, **Department**, the analysis codes and **Currency Code**) and select **Pull**, or **Pull By Criteria**.
3. The **Debit Entries** and **Credit Entries** of the account are listed with **Document No**, **Doc Dt**, **Due Dt**, the foreign and local amounts and balances. Tick the entries to match and enter the **Adjustment Amt** of each.
4. If a small difference remains, enter the **Write off Code**, **Write off reason** and **Write off Amount**.
5. Select **Match**.

Open Entry Unmatching undoes a match the same way, with **Unmatch**.

19.15 Accounting Query and All Clients Accounting

Accounting Query searches the accounting entries by **Policy ID / Number**, **Client ID**, **Client Name**, **Entry Type**, **Reference Type**, **Status**, **Start Date**, **End Date** and **GL Code**; **Export** downloads the result. **All Clients Accounting** shows, for every client, the number of transactions, total debits, total credits and balance; **Export CSV** downloads it.

The **Reconciliation Workspace** reconciles one bank account for one period:

1. Choose the **Bank account** and the **Period**.
2. Select **Import statement** and load the bank statement file (in the format of the bank, see Accounting masters (21.17)).
3. Select **Auto-match**: statement lines and book entries with the same amount and reference are matched.
4. Match the remaining lines by hand: tick a bank line and the book entries it settles. A bank line with no book entry (bank charges, interest) is flagged and booked with a journal.
5. Select **Stale cheques** to list cheques outstanding too long.
6. When the **Difference** is zero (**Adjusted balances agree**), select **Start reconciliation** and submit it.

The cards show the **Balance per bank**, **Balance per books**, **Unmatched bank lines**, **Unmatched book entries**, **Difference** and the status of the **Reconciliation**. The reconciliation is prepared by CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting and approved by TIS Finance & General Accounting, a user other than the preparer.

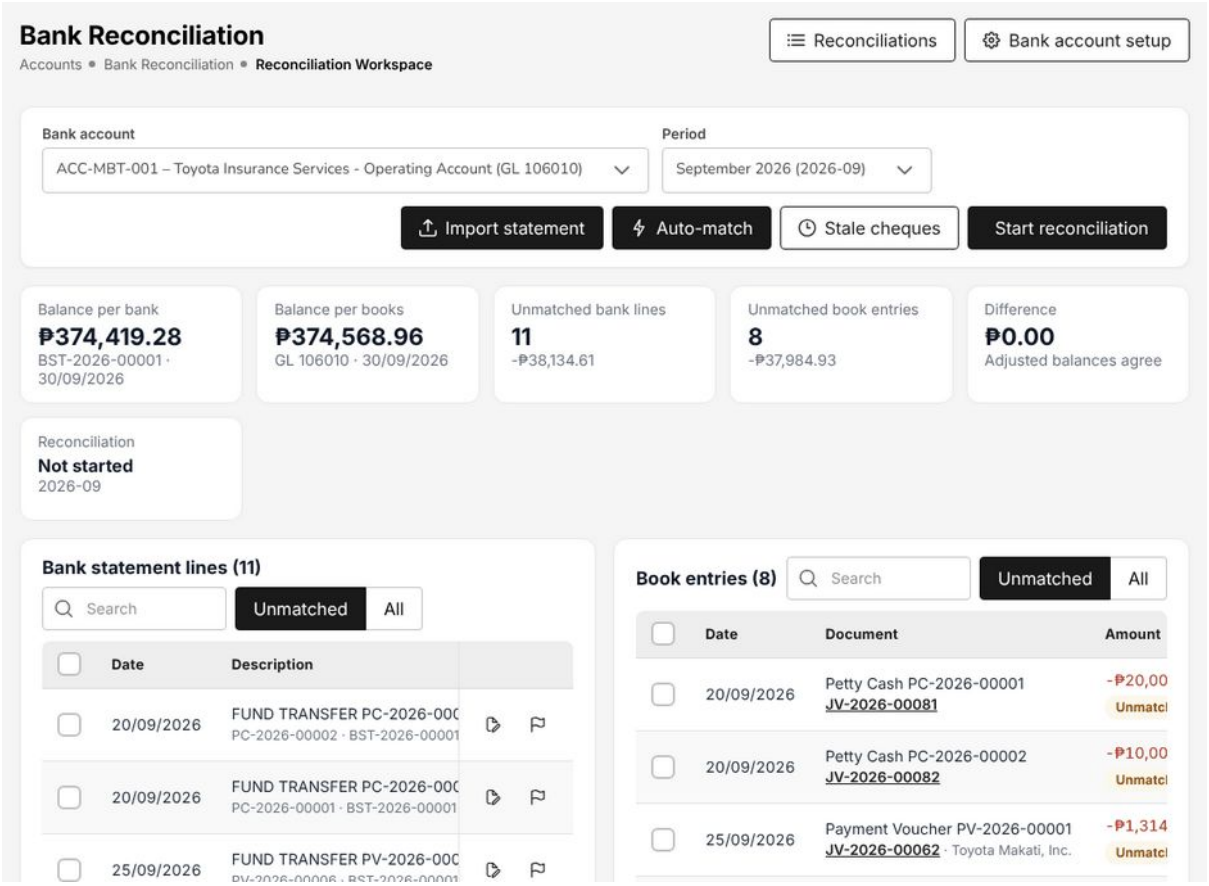

Figure 19.17: Accounts > Bank Reconciliation > Reconciliation Workspace

Reconciliations lists the reconciliations with **Reconciliation No.**, **Bank account**, **Period**, **Status**, the adjusted bank and book balances, **Difference**, **Prepared by** and **Approved by**. **New reconciliation** starts one.

The five reports (**Reconciliation Statement Report**, **Outstanding Cheques**, **Deposits in Transit**, **Unmatched Bank Lines**, **Bank Book**) are run like any report: choose the criteria (**Overall** or by bank account), **From Date** and **To Date**, the **Bank Account** and the **File format** (**CSV**, **Excel (XLSX)** or **PDF**), then **Preview** or **Generate**. See Reports (chapter 23).

An insurer's statement (for example a premium remittance confirmation) is matched with what TISPH recorded. The list shows **Number**, **Insurer**, **Statement type**, **Insurer reference**, **Period**, **Lines**, **Matched**, **Gross premium**, **Commission** and **Status**.

1. Select **Import statement**.
2. Choose the **Insurer** and the **Statement type** (required), the **Period from** and **Period to** (required), the **Insurer reference**, the **Tolerance (PHP)** and the **Statement format** (the insurer's own format, else the standard one).
3. Choose the **File (CSV or XLSX)**. **Download template** gives the standard layout.
4. Select **Preview** to check the lines read, then **Import and match**.

Each statement line is matched with the policy, premium and commission recorded; differences within the tolerance match. Open the statement to resolve the lines that differ. The statement is approved by CCD-Recon (Reconciliation and Reversals).

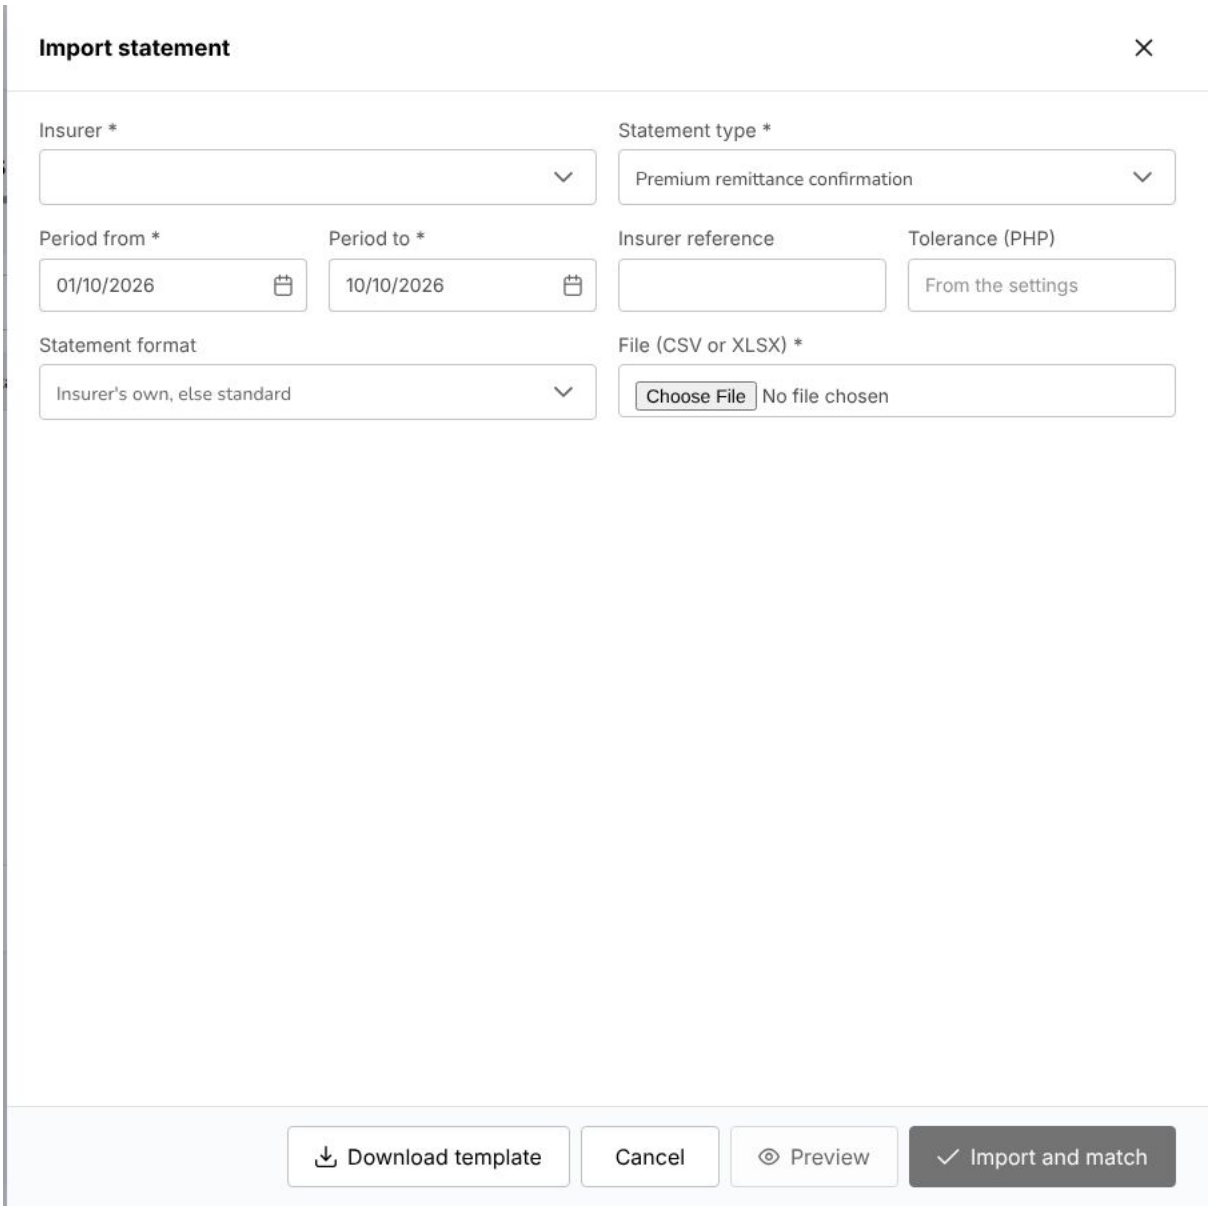

Figure 19.18: Import an insurer statement

19.18 Tax: BIR forms and returns

Menu: Accounts > Tax > BIR Form 2307

Role	Access
TIS Finance & General Accounting	Create and edit
TIS General Manager	View

BIR Form 2307 has two tabs: **Issued by us** (the certificates TISPH issues for the tax it withheld from payees: referrers, suppliers) and **Received** (the certificates received from insurers and clients for the tax they withheld from TISPH). Choose the year and the quarter; each row is a payee with its TIN, ATC, income payments and tax withheld. Print a certificate from its row.

The BIR reports are run like any report (criteria, **From Date**, **To Date**, file format, **Preview** or **Generate**):

Report	Contents
VAT Summary	Output VAT on the broker's sales and input VAT on purchases, by month
SAWT	Summary alphalist of the tax withheld from TISPH by its customers (for the income tax return)
QAP	Quarterly alphalist of payees: the tax TISPH withheld (with the 1601-EQ)
SLSP Sales	Summary list of sales, by customer (filter by principal insurer)
SLSP Purchases	Summary list of purchases, by supplier

19.19 Sales invoices (EOPT Act)

Menu: Accounts > Tax > Sales Invoices

Role	Access
TIS Finance & General Accounting	Create and edit
TIS General Manager	View

Under the Ease of Paying Taxes Act (RA 11976, RR 7-2024) the sales invoice is the primary document of the broker's sale of services: commission billed to insurers and fees. The header shows the seller (Toyota Insurance Services Philippines Corporation), its TIN, VAT status, the serial range and whether the **Invoicing setup** is complete; invoices cannot be issued until the ATP or CAS permit number is set up.

The list shows **Invoice no.**, **Invoice date**, **Buyer**, **Invoice for**, **Reference**, **Total sales**, **VAT**, **Total amount due**, **Balance**, **Status** and **EIS**. To issue an invoice by hand, select **New invoice**: **Invoice for** (for example **Fees and other services (manual)**), **Invoice date**, **Buyer type** and **Buyer** (required), **Buyer TIN (with branch code)**, **Buyer business style**, **Buyer address**, the lines (**Description**, **Qty**, **Unit price**, **VAT class**), **Expected withholding** and **Remarks**, then **Issue invoice**. Commission debit notes issue their invoice themselves.

Invoices are numbered in sequence; an invoice is cancelled with a reason and keeps its number, it is never deleted.

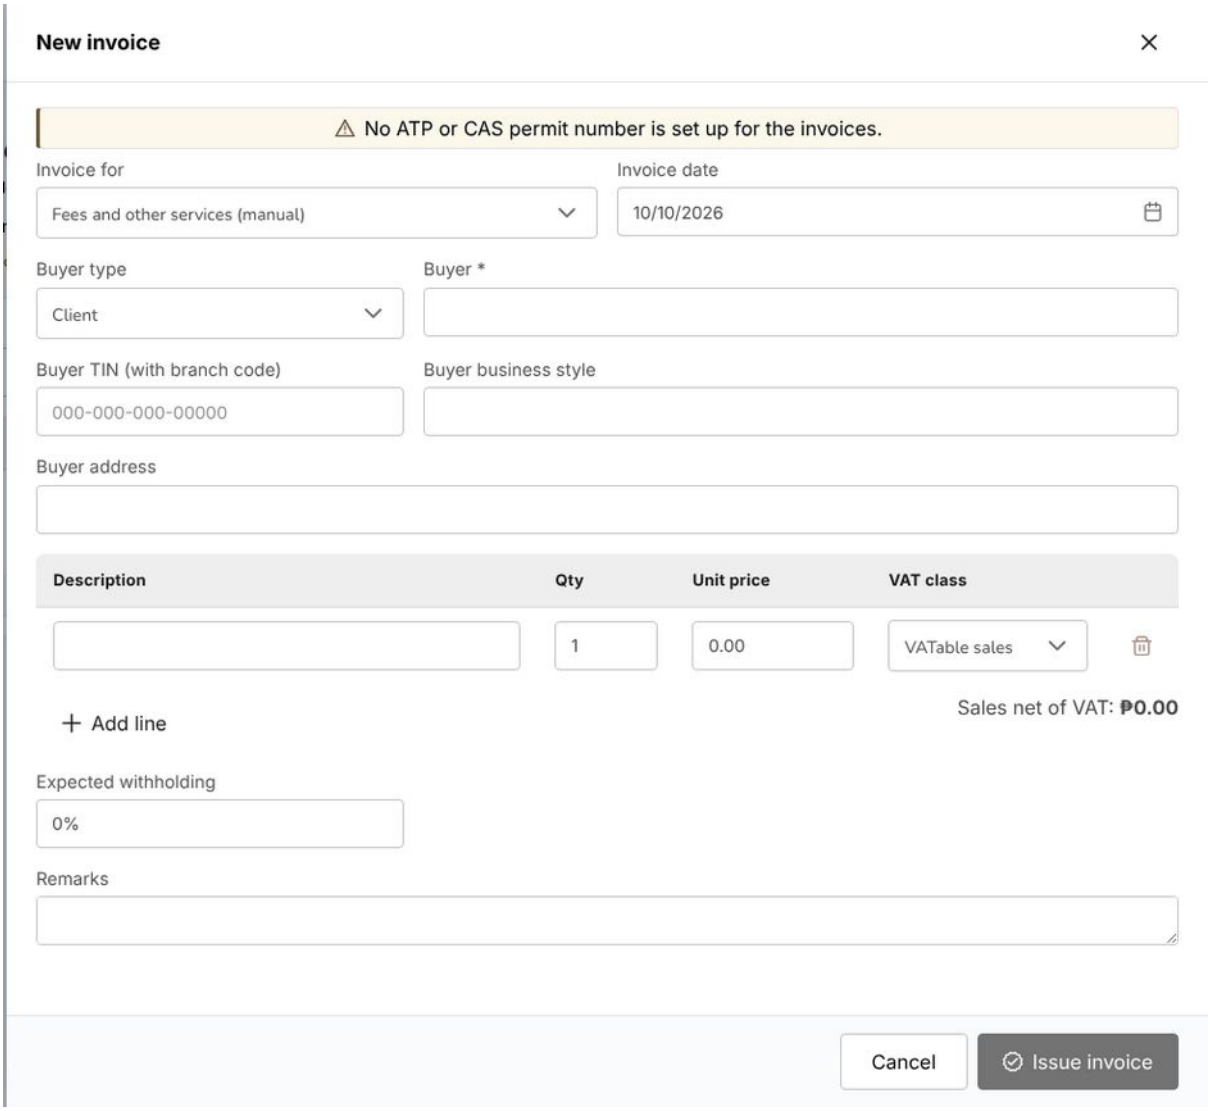

Figure 19.19: New invoice

19.20 CAS books and documents

Choose Accounts > Tax > CAS Books and Documents.

Menu: Accounts > Tax > CAS Books and Documents

Role	Access
TIS Finance & General Accounting	Approve

The screen holds the registration pack of the computerized accounting system (CAS). **Readiness** lists the items the BIR registration needs, each **Complete** or **Missing** with its action: taxpayer name, TIN and registered address; RDO code; CAS permit or acknowledgement number and date (**Enter permit**); invoice ATP (**Enter ATP**); backup custodian; system contact person; the approved system description and backup procedure (**Open document**); and the books printed at least once (**Go to books**).

Documents holds the system description and controls and the backup and restore procedure, with their approved version; **Open** and **Print**. The books (general journal,

general ledger, cash receipts and disbursements books, sales and purchase books) print per month with page numbers that run on through the year.

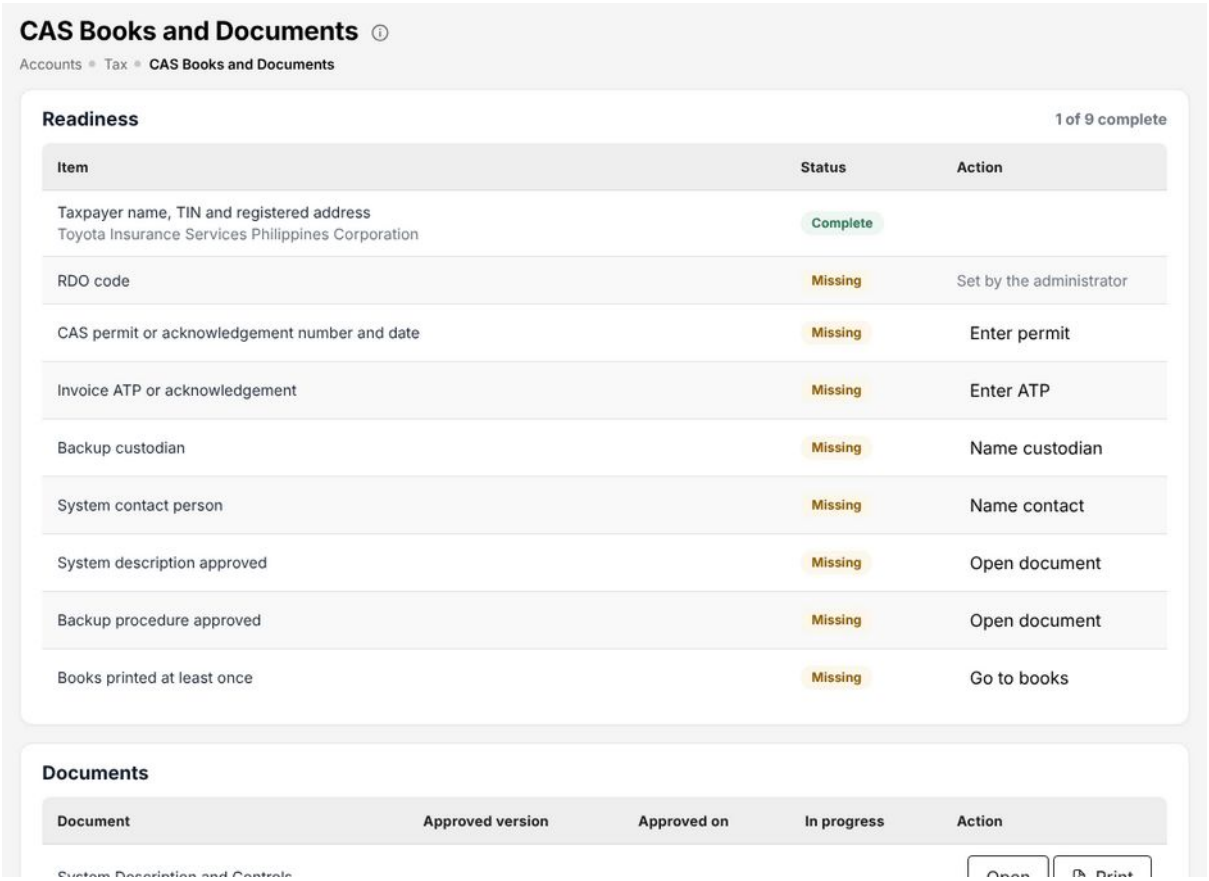

Figure 19.20: Accounts > Tax > CAS Books and Documents

19.21 Period end

A fiscal year (FY2026) has twelve monthly periods and an adjustment period 13 used by the year-end close. The cards count the periods Open, Soft-closed, Closed and Locked.

Menu: Accounts > Period End > Period Management

Role	Access
TIS Finance & General Accounting	Approve
TIS General Manager	View

Menu: Accounts > Period End > Month-End Close

Role	Access
TIS Finance & General Accounting	Approve
TIS General Manager	View

Menu: Accounts > Period End > Financial Statements

Role	Access
TIS Finance & General Accounting	View
TIS General Manager	View

The fiscal year of TISPH runs from April to March. **Period Management** lists the periods of the year chosen with **No.**, **Period**, **Start**, **End**, **Status**, **Close run** and **Last change**, and the actions **Soft-close** and **Close**:

Status	Postings allowed
Open	All
Soft-closed	Only by TIS Finance & General Accounting
Closed	None; reopened only by TIS Finance & General Accounting
Locked	None

Next fiscal year creates the next year; **Import opening balances** loads the opening balances (validated first, then imported all or nothing).

Operations close on the 26th: a premium booking dated from the 26th of a month is posted in the next period. Finance closes on the 29th, and the month-end close reminder counts down to it. Finance can still post its month-end adjustments into the period until the 6th working day of the next month (holidays of Master > Holiday excluded); the automatic soft-close, when it is switched on, waits until that day has passed.

Month-End Close runs the close of a period:

1. Select **New close run**, choose the **Period** and enter **Remarks**. Select **Start**. The run (MEC-) executes its steps: the accrual journals of the period (reversed on day 1 of the next period), the recurring journals due, the deferral of unearned commission, the foreign exchange revaluation and the checklist.
2. Check the checklist: the automatic checks (for example the sub-ledgers of premium receivable, commission receivable and due to insurers against their control accounts) and sign the manual items. A failed blocking check stops the close; correct it and run the steps again.
3. Submit the run to soft-close or close the period.
4. The run is approved by TIS Finance & General Accounting, a user other than the preparer. The period takes the new status.

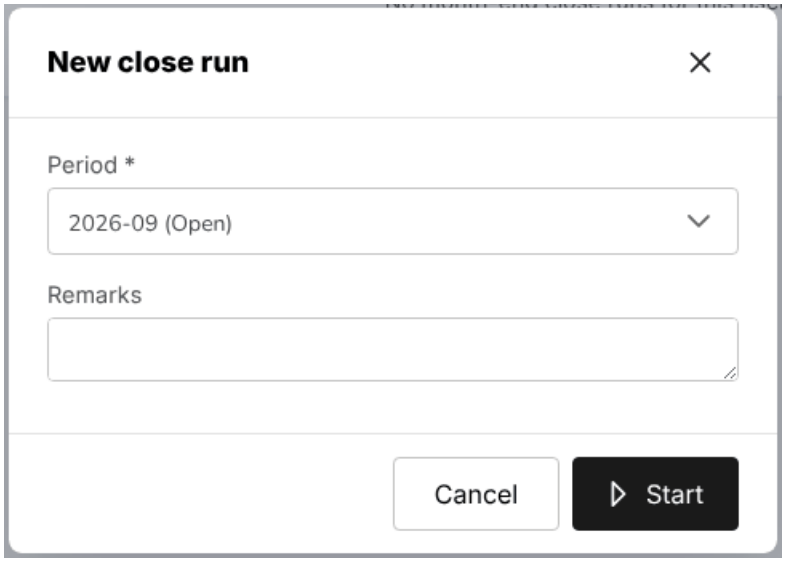

Figure 19.21: New close run

Financial Statements shows the **Income Statement**, **Balance Sheet** and **Trial Balance** from the posted journals, for a fiscal period or a date range, with the period, year to date and the same columns of the previous year. Select an account to see its postings. **Export** (Excel) and **Print** (PDF).

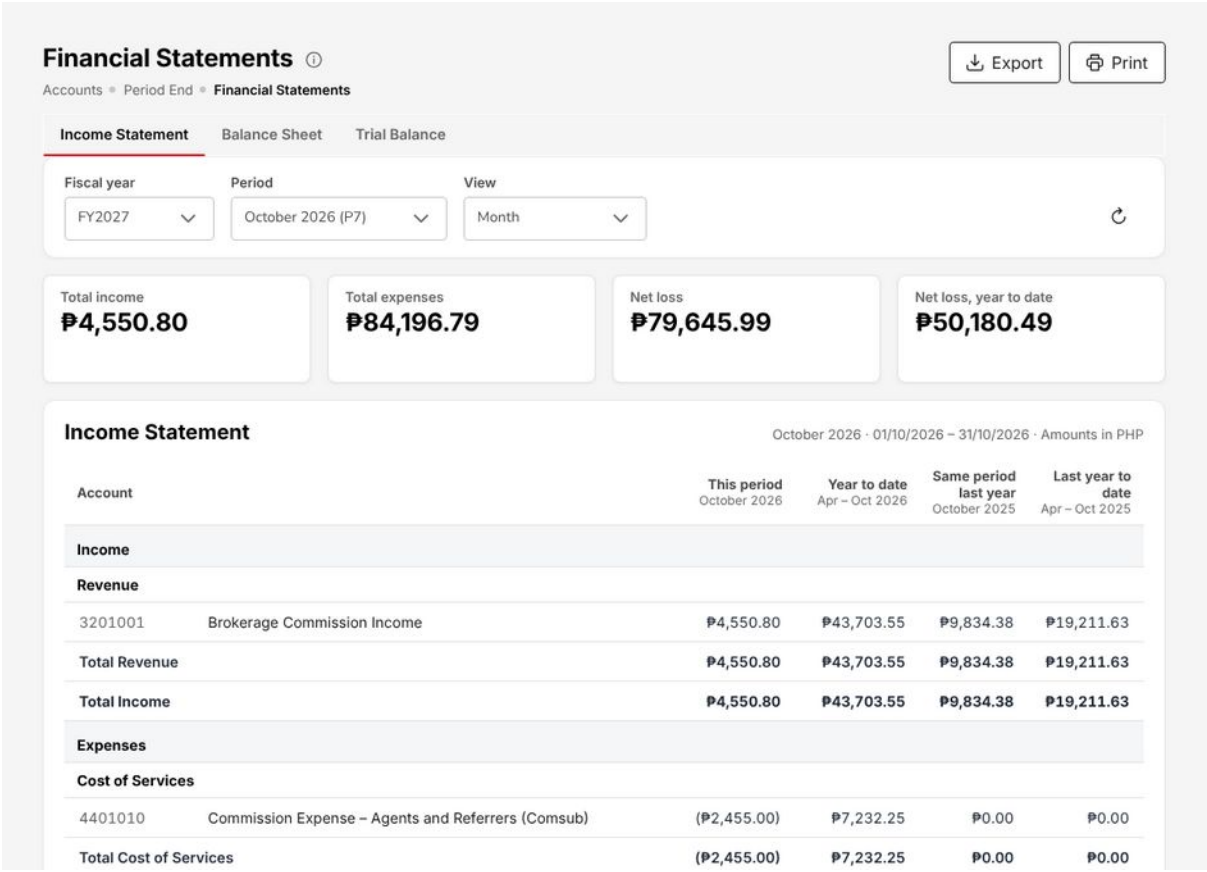

Figure 19.22: Accounts > Period End > Financial Statements

19.22 Year-end close (preparer)

Accounts > Period End > Year-End Close leads through five steps, one card per step; the stepper above the card shows the status of each step. Choose the fiscal year and select **Start year-end close**: the prerequisites are checked at once.

Menu: Accounts > Period End > Year-End Close

Role	Access
TIS Finance & General Accounting	Approve
TIS General Manager	View

1. **Prerequisites**: periods 1 to 12 closed, no unposted journals in the year, the suspense account nil, the trial balance balanced at the year end, the closing accounts set up (current year profit and loss, retained earnings) and the previous fiscal year closed. Each shows **Passed**, **Failed** (with a link to correct it) or **Not Applicable**.
2. **Adjustments**: the year-end adjustments are posted in period 13.
3. **Closing entries**: the income and expense accounts are closed to current earnings and retained earnings; the entries are previewed first.
4. **Close**: the close is submitted and approved by TIS Finance & General Accounting, a user other than the preparer.
5. **Opening balances**: the balance sheet accounts open the next fiscal year.

A closed year can be reversed only on a request with a reason, approved by another user.

The incentive screens pay the account executives' incentives earned under the programmes set for them (for example a quarterly motor premium target).

Screen	What it shows
My Programs	Your progress in each running programme for its current period: **Target**, **Achieved**, **Achievement**, **Estimated payout** and **Status** (**Running**, **Ended**).
Calculations	The calculation batches (CALC-YYYY-NNNNN) by period. **New Calculation** runs the calculation of a month for the active programmes; adjust the agent lines and submit the batch for approval.
Approvals	The batches submitted for approval. A batch is approved or rejected by TIS Sales Unit Head, TIS Operations Unit Head or TIS General Manager, a user other than the one who ran or submitted it.
Statement	The earnings of an account executive for a month: the programmes, totals, the trend of the last 13 months and the payments. **Print** and **Export CSV**.
Reports	The incentive reports (monthly payout summary, agent payout details, target achievement, top performers, programme effectiveness): **Generate report**.

An approved batch is paid through Disbursement (19.8); its status becomes **Paid**.

20. Screen reference: Dashboards and Commission

The dashboards and the Commission menu.

Each section names the menu of the screen and the roles that open it, with their access. Your own menu shows only the screens of your role.

All dashboards work the same way:

- The selector at the top left switches to another dashboard of your role; the period selector (**This month**, **This year**, a custom range) and the comparison (**Previous period**) set the figures. **Data as of** shows when the figures were read (Asia/Manila time); the refresh button reads them again.
- Each card shows a value, the change against the comparison period and, where a target is set, the target and the status (**On target**, **Off target**). The arrow on a card opens the list behind it.
- Each chart has **Chart** and **Table** views and a download button. **Export Report** downloads the whole dashboard.
- A dashboard shows only the records your role may read.

20.1 Dashboard

TIS General Manager	Approve

Menu: Commission > Agents/Referrer Accounts

Role	Access
TIS Finance & General Accounting	Approve
TIS General Manager	Approve

The commission paid by TISPH to an agent, sub-agent or external referrer (for example a dealer) on a policy it brought in is computed when the policy is booked, from the commission details of the quotation. Each commission line goes through four statuses:

Status	Meaning	What the system does
Accrued	The policy is booked	Nothing is posted yet
Eligible	The client's premium is fully collected	
Approved	Approved by a user other than the one who prepared it	Posts the accrual: commission expense against commission payable
Paid	Paid on a payment voucher	Posts the payment: commission payable against cash and withholding tax payable

A commission line reversed after payment (for example on a cancellation that returns premium) is clawed back from the referrer.

Commission > Commission Dashboard has the views **Accounting** and **Management**. The cards show **Brokerage income**, **Comsub (gross)** (the commission due to referrers), **Net margin**, **Outstanding payable** (eligible and approved, net of withholding tax), **WHT withheld (paid)** and **Clawed back**. The charts show the monthly trend of income, payable and margin, the commission by referrer and by product, the payable by status (**Accrued**, **Eligible**, **Approved**, **Paid**) and the brokerage income by insurer.

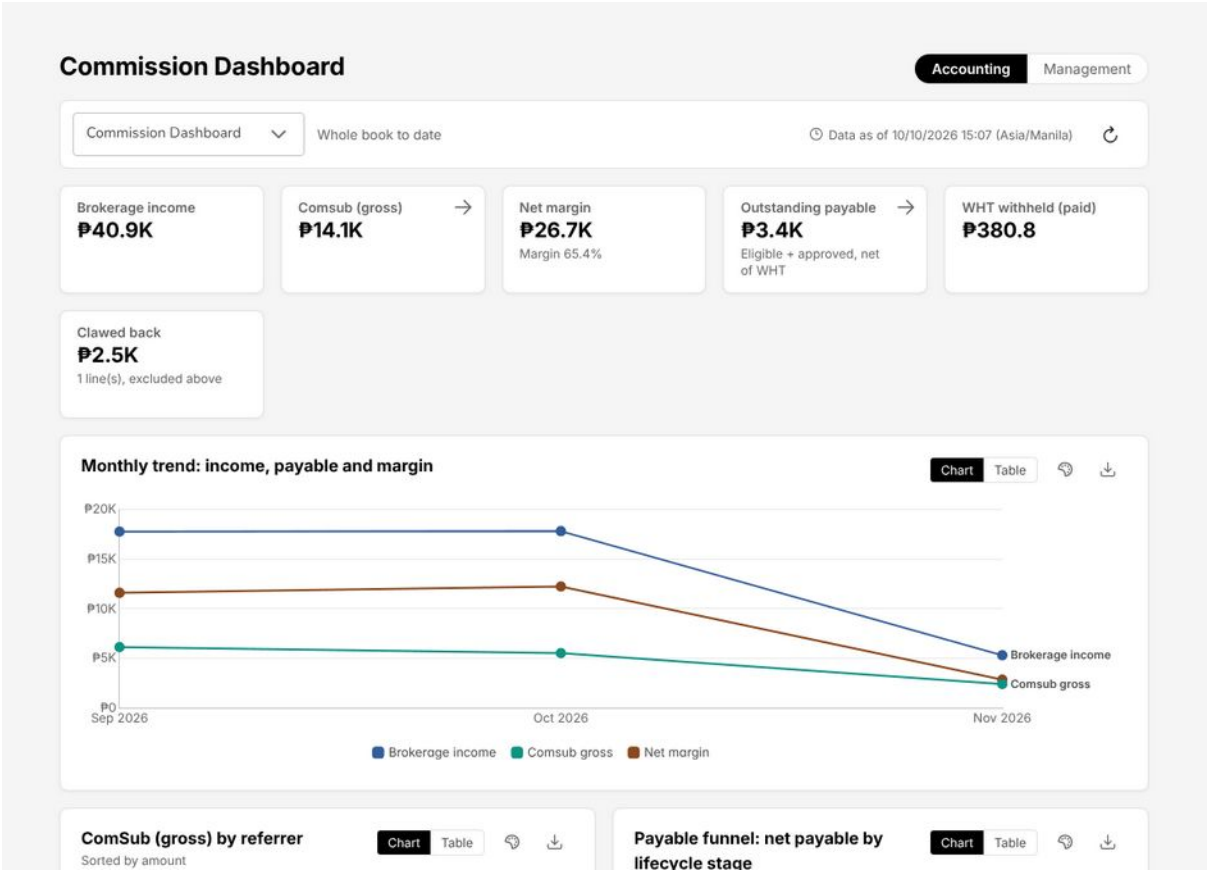

Figure 20.3: Commission > Commission Dashboard

Commission > Agents/Referrer Accounts lists the referrers. To pay a referrer:

1. Choose Commission > Agents/Referrer Accounts and select the referrer. The account shows the lines of the current cycle, the future cycles and the past lines.
2. Mark as eligible the accrued lines whose premium is fully collected.
3. Approve the eligible lines. The approval is made by TIS Finance & General Accounting other than the user who prepared the lines.
4. Select the approved lines and generate the payout. The payment voucher is prepared on Disbursement (19.8) with the withholding tax of the referrer (5% for an individual, 10% for a company, or the referrer's own tax code), and is approved and paid there.

A new referrer is added with its type (Agent, Sub-agent, External agent, TFS team member, Referral, Dealer), level, tax details and bank account, and the sharing scheme that pays it. The list shows the **SCHEME** of each payee.

Where the **review of line changes** is on (TISPH), a rate change, a reversal or a withholding tax change on a line is a request with a reason: the line shows **Pending request** until TIS Operations Unit Head, TIS Finance & General Accounting or TIS General Manager other than the requester approves or rejects it on the **Requests** panel at the top of the list. Where the **remitted** rule is on (TISPH), a line becomes eligible once the premium is fully paid and the policy is on an approved remittance; a receipt reversed before that returns the line to accrued.

A line of a policy on a sharing scheme shows its **Share** (basis, value and the minimum and maximum of the scheme); TIS Finance & General Accounting can change the value within those limits with a reason.

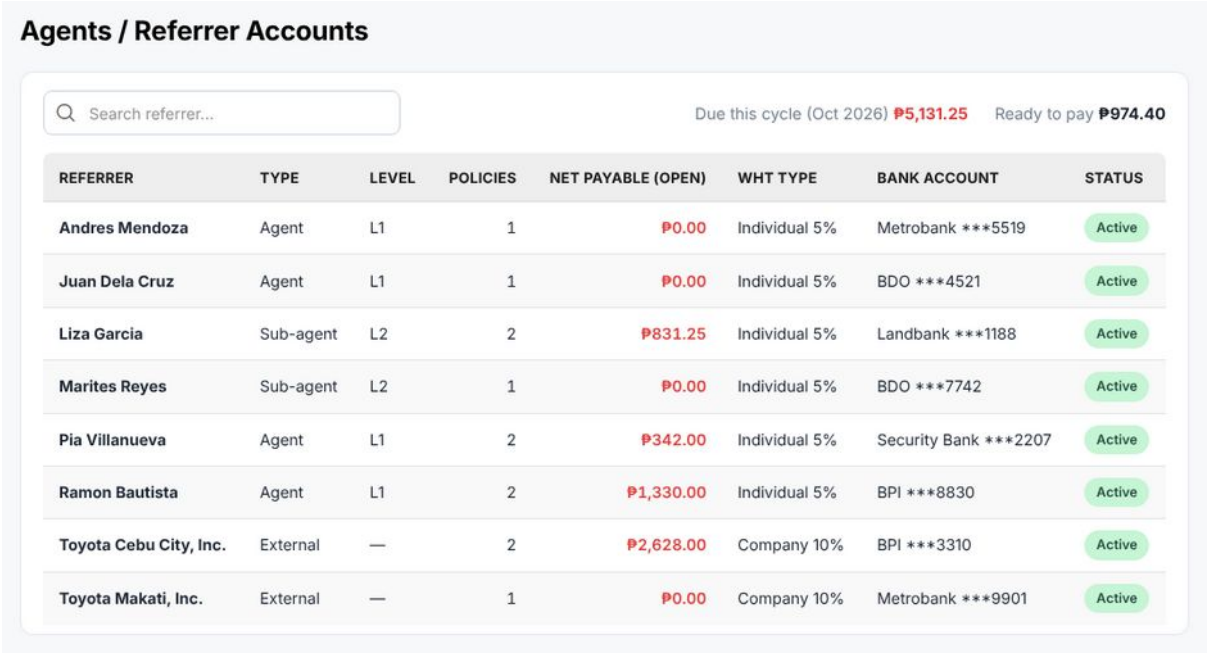

Figure 20.4: Commission > Agents/Referrer Accounts

TIS General Manager	View

A sharing scheme says how the commission of a policy is shared with the agent, dealer or referrer that brought it in. A scheme has a **Code** (3 to 20 capitals, digits or hyphens), a **Name**, the **Party types** it pays (external agents, TFS team members, referrals, dealers, sub-agents), the **Products** and **Insurers** it covers (all when empty), the **Policy type**, **Effective from** and **Effective to**, and its **Lines**: one line per payee, with the **Basis** (percent of the commission, percent of the net premium, a fixed amount or the variance share in points), the **Value** and the **Minimum** and **Maximum** a user may set on a policy. A scheme is paid once the policy is fully paid (**Pay when fully paid**) and may be combined with the referrer's own share.

New scheme adds a draft; **Example** shows the shares of a sample policy. A scheme is submitted and decided on Configuration Approvals (21.14) by TIS General Manager

other than its maker; it is **Scheduled** until its effective date and **Active** from then. A change to an active scheme is a new version that supersedes it on approval. TIS General Manager can **Suspend**, **Resume** and **End** a scheme with a reason; an ended scheme names its replacement or confirms that its payees are no longer shared with. **Assign** attaches a scheme to a referrer or a distribution channel, with an override within the scheme's limits; the assignment is approved in the same way. The **Assignments** tab lists the payees and channels on the scheme.

The commission of a policy and its shares are shown on the policy record (**Commission** section): per peril the premium, the issuing, insurer net and TIS remitting rates, the commission and the variance share; the gross commission, the shares of the scheme and what TISPH keeps; the remittance and billing statement that carry the policy. A Motor policy booked without rates on the register is marked **Rates missing** and raised as an exception by the remittance run; once the rates are added, **Recompute** (CCD-Recon (Reconciliation and Reversals) or TIS Finance & General Accounting) reads the register again while the policy is on no approved remittance.

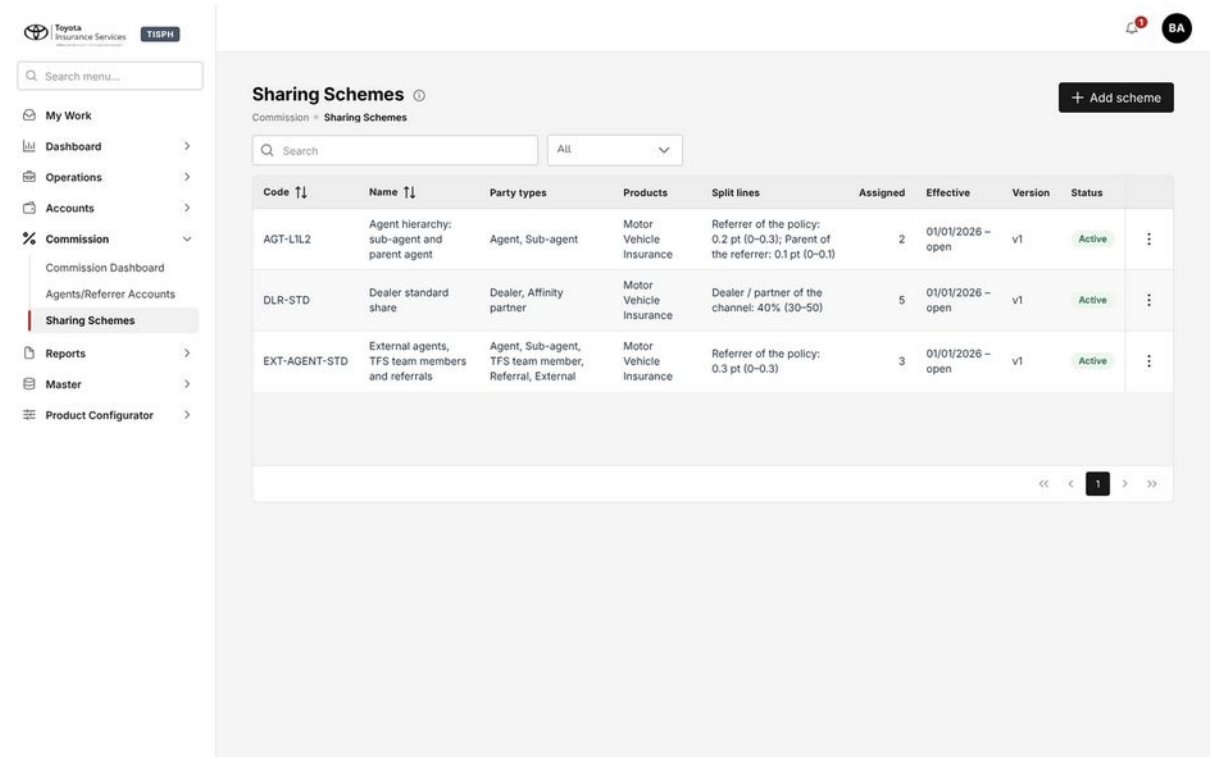

Figure 20.5: Commission > Sharing Schemes

21. Screen reference: Master

The reference masters, users and access, and the system configuration of the Master menu.

Each section names the menu of the screen and the roles that open it, with their access. Your own menu shows only the screens of your role. Most master screens are kept by TIS IT AppSupport / Admin; the finance masters by TIS Finance & General Accounting. A change to access, approval limits, posting rules or account determination applies only after another user approves it.

21.1 Distribution Channels

Choose Master > Insurance > Distribution Channels. A channel is a dealer group or dealer branch, a financing bank or bank branch, or an affinity partner (a company whose members or homeowners are referred to the broker).

Menu: Reports > Operational Reports > Dealer Production

TIS IT AppSupport / Admin	Create and edit
TIS General Manager	View

At TISPH the channels are the Toyota dealer groups and their branches (for example Toyota Alabang, Toyota Cebu, Toyota Makati) and Toyota Financial Services with its offices. The list shows **Code**, **Name**, **Channel type**, **Group** (the parent channel), **Referrer**, **Province / City**, **Prospects**, **Policies**, **Premium** and **Status**; filter by channel type and status.

Add channel asks for the code, name and channel type, the group it belongs to (its hierarchy), the province and city, the referrer paid for its business (from Commission to agents and referrers (20.4)) and, for a financing bank, its mortgagee clause. The pencil changes a channel; a channel with business is deactivated, not deleted.

The channel is chosen on the prospect and drives the lead assignment rules, the dealer programmes and the **Dealer Production** report (Reports > Operational Reports > Dealer Production: premium and policies by channel; see Reports (chapter 23)).

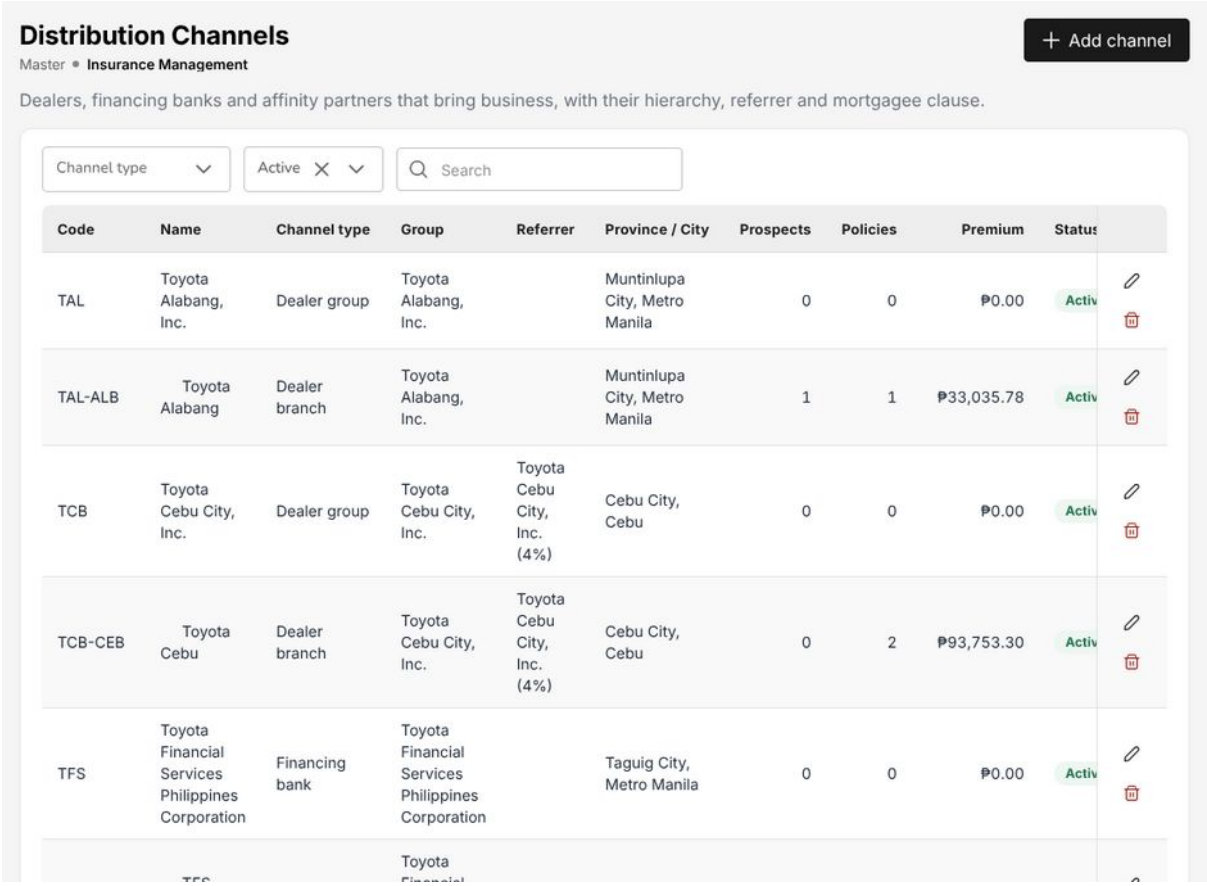

Figure 21.1: Master > Insurance > Distribution Channels: dealer groups, dealer branches and TFS

21.2 Company, branches and the letterhead

Every printed document and report PDF (quotation, request for quotation, placement slip, policy schedule, billing statement, official receipt, payment voucher, debit note, claim letters, BIR forms) carries the letterhead of the company marked as letterhead company.

Menu: Master > Organization > Company

Role	Access
TIS IT AppSupport / Admin	Create and edit

Menu: Master > Organization > Branch

Role	Access
TIS IT AppSupport / Admin	Create and edit

Company lists **Company Code**, **Company Name**, **License Number**, **Country**, **Email ID** and **Status**. The company record of Toyota Insurance Services Philippines Corporation holds its legal name, TIN, Insurance Commission licence, address, logo and contacts, and is marked as the letterhead company. **Add** creates a company; the pencil changes it.

Branch lists **Branch Code**, **Branch Name**, **Country**, **Email ID** and **Status** (for example the head office and the Cebu branch). The branch is chosen on users, receipts, vouchers and journals.

21.3 Insurance companies

Requests for quotation, placement slips, Preliminary Loss Advices and remittance advices go to the insurer's e-mail. Keep it current.

Menu: Master > Insurance > Insurance Company

Role	Access
TIS IT AppSupport / Admin	Create and edit

The list shows **Company Code**, **Company Name**, **E-mail**, **Phone Number**, **Modified By**, **Modified On**, **Status** and **Actions**. Only the panel insurers of TISPH are **Active**; an inactive insurer is not offered on quotations and placements. **Upload** loads insurers from a file (validated first); **Add** creates one.

The insurer record holds the code, name, address, e-mail and phone of the insurer. Whether an insurer's policies are broker-billed or direct-billed is set on Direct bill: commission debit notes (19.11) (**Billing Mode**); its commission rates on Commission Rate Matrix (21.16).

21.4 Masters that work the same way

All masters work alike: a list with search, **Add** (the form opens on its own page or as a panel on the right), **Upload** where offered, the eye to view, the pencil to edit and a status switch to deactivate. Records are not deleted; a deactivated record no longer appears in the lists of the other screens.

Menu: Master > Finance > Bank

Role	Access
TIS IT AppSupport / Admin	Create and edit

Master	What it holds
Line of Business	The lines TISPH writes (for example Motor, Accident, Life, Marine), with their code. Only active lines are offered.
Product	The products of each line: **Product Code**, **Product Name**, **Line of Business**, **Business Type** (for example **Package**), **Customer Segment** (**Retail**, **Corporate**). The rating and covers of a product are kept in the Product Configurator (chapter 22).
Cover	The covers offered on quotations (for example Own Damage, Acts of Nature, Excess Bodily Injury, Property Damage).
Signatories	The company signatories printed on documents, with their signature image.
Vehicle	The vehicle master used by motor quotations: **Vehicle Brand**, **Vehicle Model**, **Vehicle Variant**, code and name. **Upload** loads the Toyota model list.
Country, **Province**, **City / Municipality**	The address lists. A city or municipality has its province, class (city or municipality) and ZIP code; the local government tax rate is kept on Other finance masters (21.15).
Hierarchy, **Designation**	The ranks of the sales hierarchy and the job titles of users, by department.
Bank	The banks: **Bank Code**, **Bank Name**, **Bank Branch**, **SWIFT / BIC Code**, e-mail and phone, used for drawee banks, bank accounts and payee accounts.

21.5 Claim documents

Menu: Master > Insurance > Claim Document Checklist

Role	Access
TIS Operations Associate	View
TIS Operations Officer	View
TIS Operations Unit Head	View
TIS IT AppSupport / Admin	Create and edit

The Claim Document Checklist lists the documents a claim needs, by line of business and claim type: **Code**, **Line of Business** (* = all), **Claim Type** (* = all), **Document**, **Required**, **Sort Order** and **Status**. When a claim is registered, the documents of its line and cause of loss make the list of its **Documents** step (see Register a claim (18.13.1)). **Add** adds a document; the switch removes it from new claims.

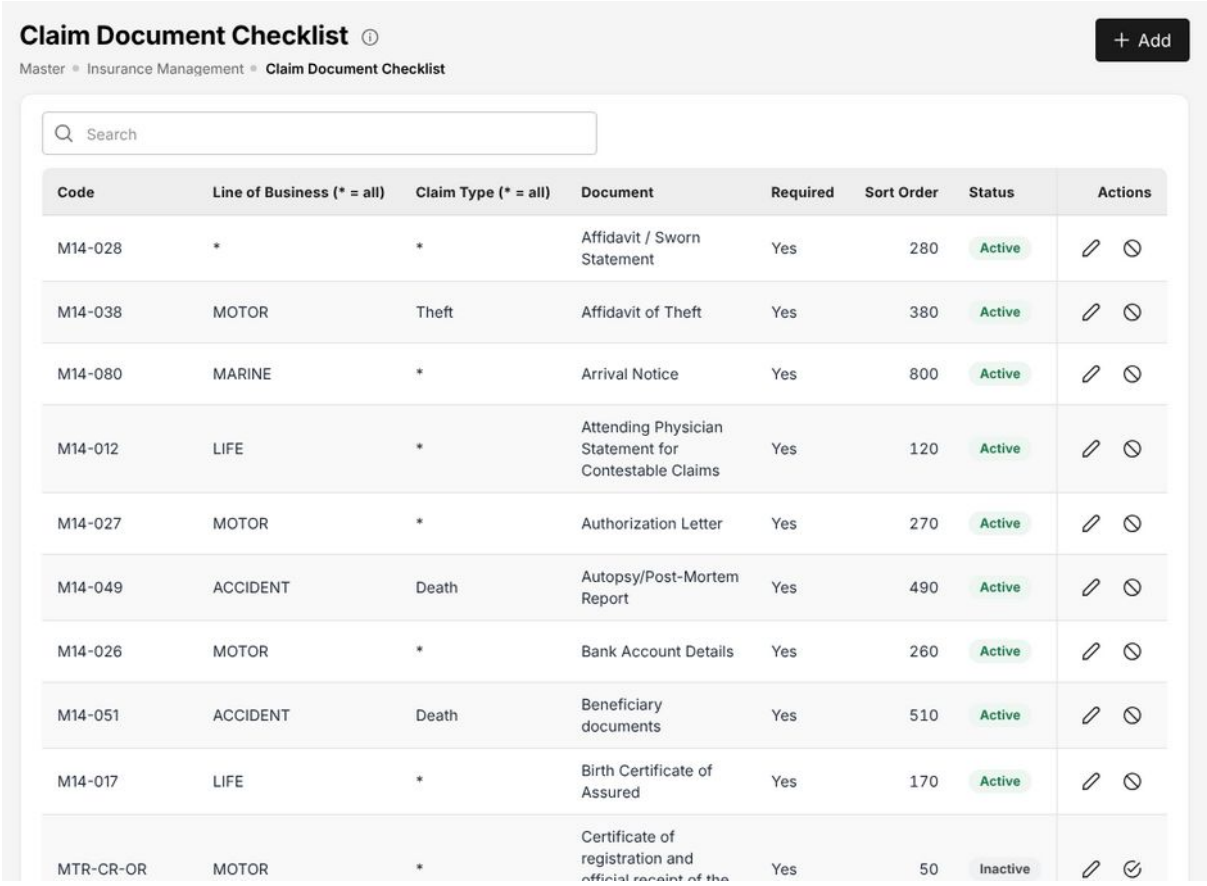

Figure 21.2: Master > Insurance > Claim Document Checklist

21.6 Lead sources and reason codes

Menu: Master > Insurance > Lead Sources

Role	Access
TIS IT AppSupport / Admin	Create and edit

Menu: Master > Insurance > Reason Codes

Role	Access
TIS IT AppSupport / Admin	Create and edit

Lead Sources lists where prospects come from (for example Walk-In, Referral, Agent, Bundling, Promo, Used-Cars - SCR, Used-Cars - UCFP), with the **Channel Type**, the **Linked Office (branch code)** and the **Sort Order**. The source is chosen on the prospect.

Reason Codes holds the coded reasons of decisions, by what they are used for (**Used For**): quotations declined, claims rejected, renewals lost, refunds and adjustments, prospect reassignment, access review removals, the accounting reversals, and the remittance decisions (rejection of a remittance, off-cycle remittance, escalation of a remittance exception, rejection or cancellation of a commission debit note). **Requires Note** asks the user for a note with the reason. A screen that asks for a reason offers only the codes of its use.

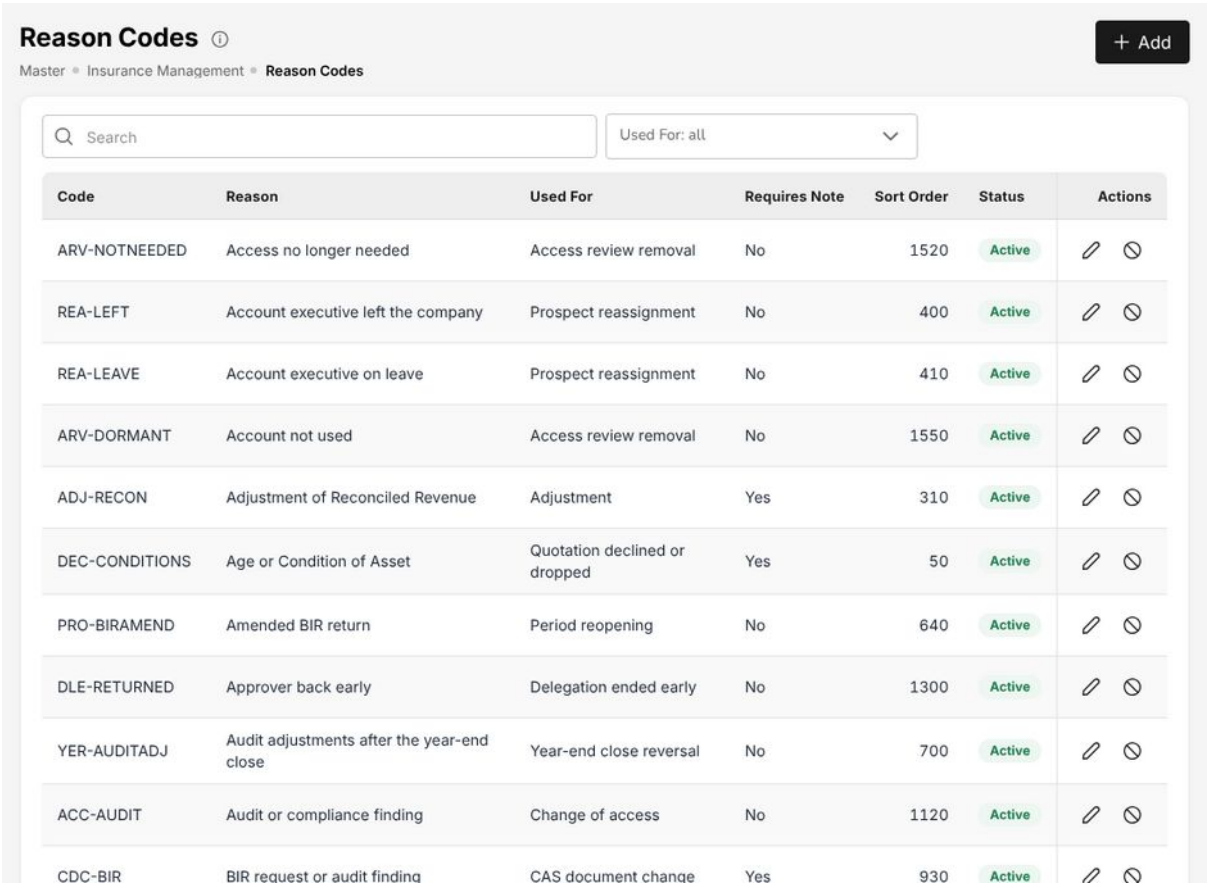

Figure 21.3: Master > Insurance > Reason Codes

21.7 Users

A duplicate username is refused. At the first sign-in the user must choose a new password (Getting started).

Menu: Master > Users and Access > User

Role	Access
TIS IT AppSupport / Admin	Create and edit
TIS General Manager	View

The **User List** shows **User Name**, **Assigned Role**, **E-mail** (masked), **Display Name**, **Status** and **Actions** (view, edit, and the account actions **Unlock**, **Reset password**, **Turn off two-step verification** and **Sign-in history**). **Add** creates a user: username, e-mail,

display name, branch, designation, reporting line and the TISPH role, grouped by department. The status switch deactivates a leaver.

The steps are in Create a user account (15.7.1) and Unlock an account or reset a password (15.7.2). An administrator cannot change his or her own account or roles.

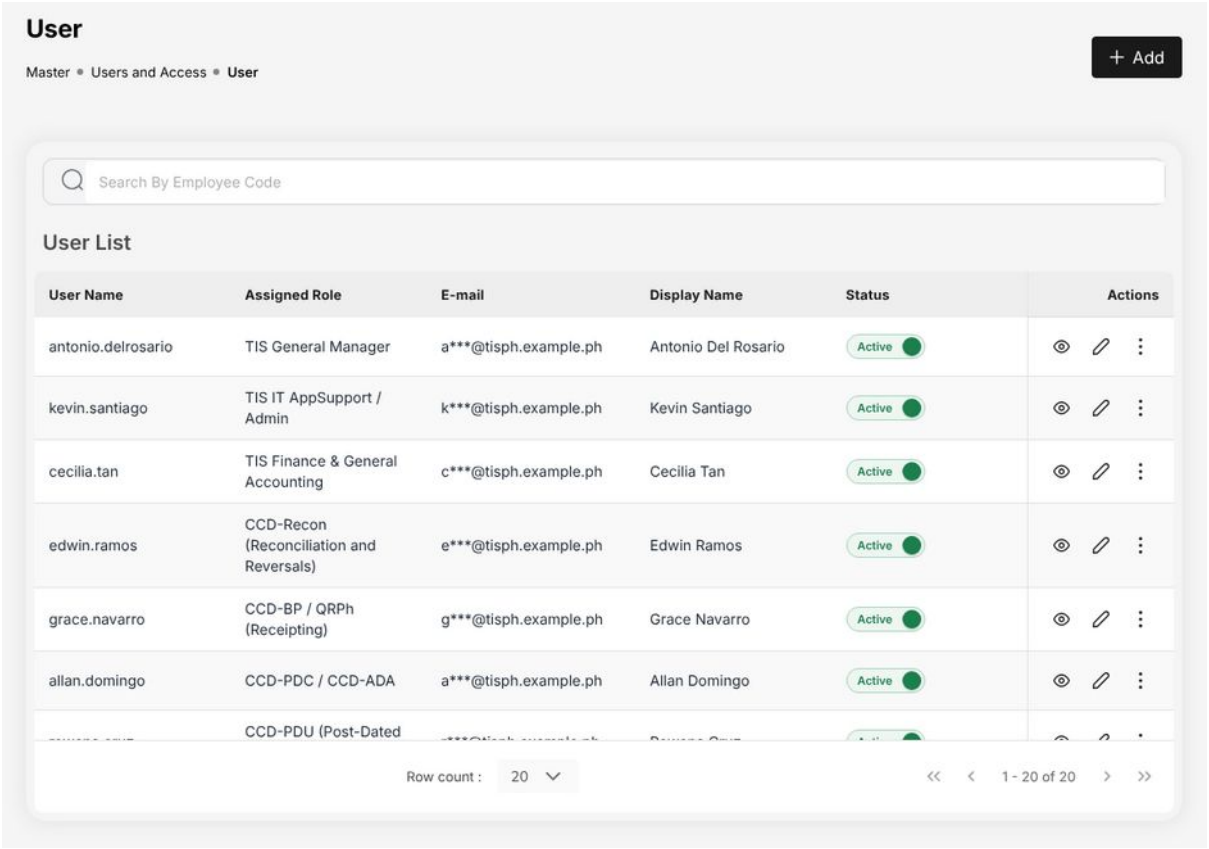

Figure 21.4: Master > Users and Access > User

21.8 Roles and role permissions

Menu: Master > Users and Access > Role

Role	Access
TIS IT AppSupport / Admin	Create and edit
TIS General Manager	View

Menu: Master > Users and Access > Role Permissions

Role	Access
TIS IT AppSupport / Admin	Create and edit
TIS General Manager	View

Role lists the 13 TISPH roles with **Role Code**, **Role Name**, **Department**, **Modified By**, **Modified On** and **Status**. The roles are delivered with the system; their names and departments are those of this manual's role chapters.

Role Permissions shows what each role may do, by part of the system: **By role** (each role's access to each screen: view, create and edit, approve) and **Compare roles** (two or more roles side by side). A change of a role's permissions waits in **Waiting for approval**

and applies once another administrator approves it. **Export to Excel** downloads the permissions.

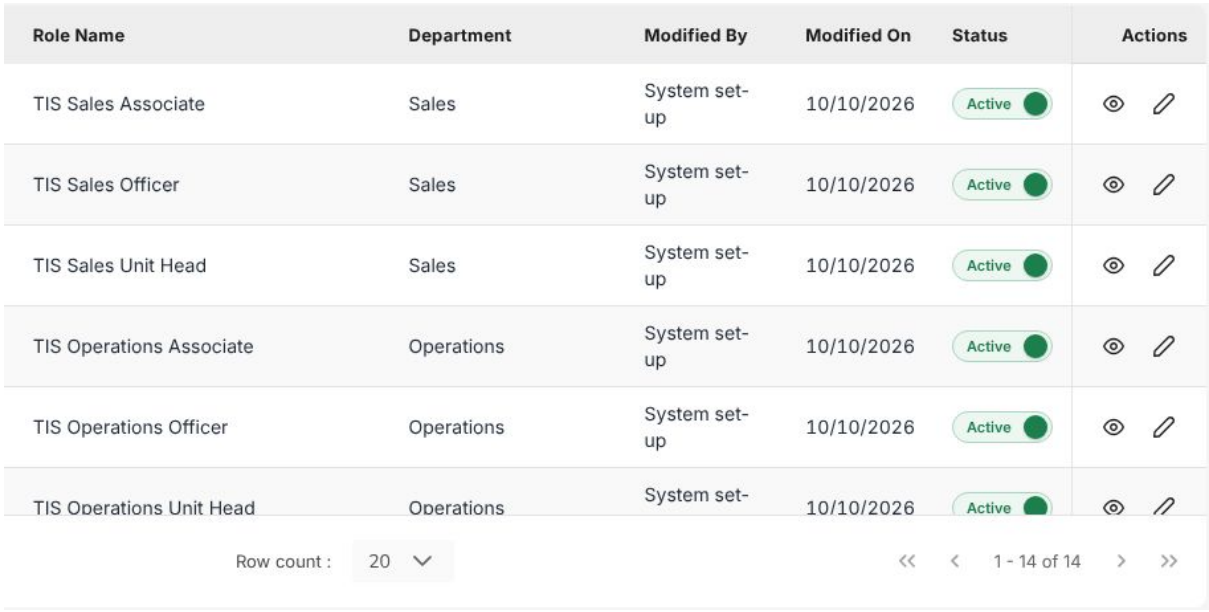

Figure 21.5: Master > Users and Access > Role: the TISPH roles

21.9 User Access Matrix

Menu: Master > Users and Access > User Access Matrix

Role	Access
TIS IT AppSupport / Admin	Create and edit
TIS General Manager	View

The User Access Matrix shows who has access to what, for audit. The cards count the **Active users**, the **Dormant** users (no sign-in for 90 days or more), the **Duty conflicts**, the users with **No two-step sign-in** and the **Changes pending**. Each row shows the user, department, roles, branch, status, **Last sign-in**, **Two-step**, **Password age (days)** and the **Segregation of duties** conflicts. Filter by department, role and status; **Export to Excel** downloads the matrix.

21.10 Authority Matrix

Menu: Master > Users and Access > Authority Matrix

Role	Access
TIS IT AppSupport / Admin	Approve
TIS General Manager	View

The Authority Matrix sets the largest amount (or percent) each role may approve per transaction: claim settlement approval, payment voucher and cheque release, journal voucher approval, remittance approval, remittance settlement, adjustment and transfer, and the others. Each transaction is a row, each approver role a column, grouped by department.

- **Limits**: the limits in force. A cell **Not set** means no limit is recorded; whether an approver without a limit may approve is shown above the table.
- **Pending approval**: changes waiting for another administrator.
- **Personal limits**: a limit for one user that differs from the role's.
- **History**: every change, with who requested and who approved it.

Download and **Upload** exchange the matrix as a file. A change applies after another administrator approves it.

21.11 Delegations

A delegation lets another user approve with the limit of an approver who is away, for chosen transactions and dates. It applies once another administrator who may approve access changes approves it; neither the requester nor the person covering approves it.

Menu: Master > Users and Access > Delegations

Role	Access
TIS IT AppSupport / Admin	Approve

The cards count the delegations **Current and upcoming**, **Waiting for approval** and **Ended**. Each row shows the **Approver away**, **Covered by**, **Transactions**, **Period** and **Status**. **New delegation**: choose the approver, the person covering, the transactions (or all) and the dates, and save. **Export to Excel** downloads the list.

21.12 Segregation of Duties

Menu: Master > Users and Access > Segregation of Duties

Role	Access
TIS IT AppSupport / Admin	Approve
TIS General Manager	View

A segregation-of-duties rule names roles or permissions one person should not hold together (for example preparing and approving payments). **Block** refuses the combination when the roles are given; **Warn** allows it and lists the person under **Conflicts** until an exception is accepted.

The cards count the **Users with conflicts**, the **Accepted exceptions**, the **Exceptions ending in 30 days** and the **Active rules**. The tabs are **Conflicts** (each user with the roles held and the rule broken; accept an exception with a reason and an end date), **Rules** (**New rule**) and **Waiting for approval**. Rules and exceptions apply after another administrator approves them. The rules that apply to each role are listed in its role chapter, under Segregation of duties.

21.13 Access Reviews

Confirm at least every quarter that each active user still needs his or her access.

Menu: Master > Users and Access > Access Reviews

Role	Access
TIS IT AppSupport / Admin	Approve

1. Select **Start a review** and choose the scope (all users, a department) and the due date.
2. For each user, confirm the access or mark the roles to remove, with a reason from the reason codes.
3. Submit the review. The removals apply when another administrator signs the review off.

The list shows **Review**, **Scope**, **Due**, **Progress**, **Removals**, **Status**, **Started by** and **Signed off by**. **Export to Excel** downloads a review as audit evidence.

21.14 Posting configuration

Menu: Master > Finance > Account Determination

Role	Access
TIS Finance & General Accounting	Approve

Menu: Master > Finance > Posting Rules

Role	Access
TIS Finance & General Accounting	Approve

Menu: Master > Finance > Configuration Approvals

Role	Access
TIS Finance & General Accounting	Approve
TIS General Manager	View

Menu: Master > Finance > Accounting Flow

Role	Access
TIS Finance & General Accounting	View

These four screens decide how every business event is posted to the general ledger. They are kept by TIS Finance & General Accounting; a change is approved by TIS Finance & General Accounting, a user other than the one who requested it.

- **Account Determination** gives each account role its general ledger account, by tab (**Premium**, **Customer**, **Miscellaneous**, **Claims**, **Other**, **Payee & payment mode**, **Commission taxes**, **Write-off reasons**), and shows which events use it. For example the brokerage commission income goes to 3201001 Brokerage Commission Income. VAT, DST and LGT on premium are booked in their own accounts.
- **Posting Rules** lists the business events (policy issued, endorsement, renewal, cancellation, premium collection, remittance, direct bill commission, claims, commission) with the version of the rule in force. Open a rule to see its lines (debit or credit, account role, amount); a change creates a new version.

- **Configuration Approvals** lists the changes waiting: what changes, before and after, who requested it and when. **Approve** or **Reject** with a reason. Besides the posting changes it carries the commission rules of the Commission Rate Matrix (21.16) (decided by TIS General Manager) and the sharing schemes and their assignments (decided by TIS General Manager), each by a user other than its maker.
- **Accounting Flow** is read only: the journal each business event posts with the rules and accounts in force today, grouped (premium billing, collections, remittance to insurers, commission, claims). It shows whether the account mapping is complete. **Export** and **Print** give it for audit.

21.15 Other finance masters

Menu: Master > Finance > Premium Taxes & LGU Rates

Role	Access
TIS Finance & General Accounting	View
TIS IT AppSupport / Admin	Create and edit

Menu: Master > Finance > Transaction Code

Role	Access
TIS IT AppSupport / Admin	Create and edit

Menu: Master > Finance > Currency

Role	Access
TIS IT AppSupport / Admin	Create and edit

Master	What it holds
Package Bundles	Products sold together with a bundle discount, for example TFS Borrower Protect (Credit Life - Compulsory with the borrower's Personal Accident).
Insurer Rate Tables	Each insurer's rate for a package product: **Rate basis** (percent or per mille of sum insured), **Rate**, **Minimum premium**, **Deductible**, **Key benefits**, **Commission** and the effective dates. Quick Quote (18.2) prices from these rates.
Premium Taxes & LGU Rates	The local government tax rate of each city or municipality, the tax and charge rules (DST, VAT, LGT) and a **Calculator** to check the taxes of a premium.
Payment Gateways	The online payment gateway for the client payment links (GCash, Maya, GrabPay, cards): enabled or not, mode, payment methods, who absorbs the fee, link validity and the bank account credited. The merchant keys are kept on the server, never on this screen.
Transaction Code	The accounting transaction codes: **CM** Credit Memo, **DM** Debit Memo, **JV** Journal Voucher, **OR** Official Receipt, **PV** Payment Voucher, **RM** Remittance to Insurer, with their basis (debit, credit, both).
Currency, **Exchange Rate**	The currencies (PHP is the base currency) and the monthly exchange rates to PHP, used by foreign currency receipts and the revaluation of the month-end close.

21.16 Commission Rate Matrix

Menu: Master > Finance > Commission Rate Matrix

Role	Access
TIS IT AppSupport / Admin	View
TIS General Manager	View

The Commission Rate Matrix is the register of the commission rules. A rule names the business it covers and the rates that apply: **Insurer**, **Product**, **Line of business**, **Policy type** (new business, renewal or any), **Channel type** (financing bank, dealer, affinity partner, agent, direct or any), **Motor type** (for example PC-SEDAN, PC-OTHER) and, where the rates depend on the value insured, a **Sum insured band**; **Effective from** and **Effective to**. The most specific rule in force on the date applies: insurer, product and motor type first, then insurer and product, insurer and line of business, insurer, product, line of business; an exact policy type and channel type before **Any**; a band before an open rule. With no rule, the insurer's default rate and then the system default apply.

A rule has one of two **Rate basis** values:

- **Net premium**: one **Rate (%)** of the net premium, as before.
- **Issuing / remitting**: the rates per peril of a Motor policy on the **Peril rates** tab. For each peril (Own Damage, Acts of Nature, Bodily Injury, Property Damage, Personal Accident, Roadside Assistance) the rule holds the **Issuing rate** charged to the client, the **Insurer net rate** and the **TIS remitting rate** that TISPH remits to the insurer; the insurer net rate is never above the TIS remitting rate, which is never above the issuing rate. The commission of a policy is the premium at the issuing rate less the premium at the TIS remitting rate per peril; CTPL is remitted in full. The difference between the TIS remitting rate and the insurer net rate is the variance shared with the referrer of the policy where its sharing scheme says so.

Add rate adds a draft; **Upload rules** loads several rules from the Excel template (**Template** downloads it); **Test rate** shows the rule and rates that apply to an insurer, product, channel, motor type, sum insured and date. A rule is submitted for approval (status **Pending**) and decided on Configuration Approvals (21.14) by TIS General Manager other than its maker; an approved rule is **In force** from its effective date. A change to an approved rule is a new version that replaces it on approval and end-dates the old one; the **History** tab lists the versions. A rule cannot overlap another rule with the same keys. A pending rule can be withdrawn; an approved rule is ended with an end date.

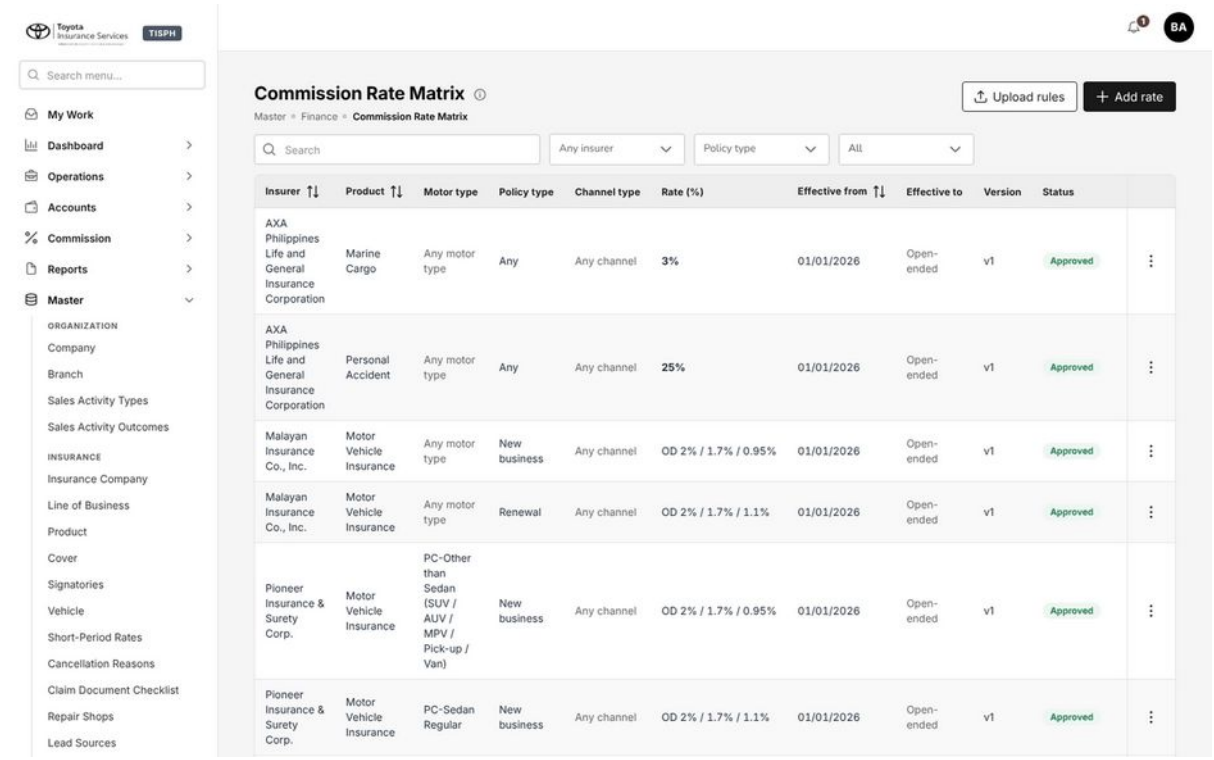

Figure 21.6: Master > Finance > Commission Rate Matrix

21.17 Accounting masters

Menu: Master > Finance > Taxation

Role	Access
TIS Finance & General Accounting	View

Menu: Master > Finance > Close Checklist

Role	Access
TIS Finance & General Accounting	View

Menu: Master > Finance > Bank Statement Formats

Role	Access
TIS Finance & General Accounting	View

Menu: Master > Finance > Bank Transaction Types

Role	Access
TIS Finance & General Accounting	View

Menu: Master > Finance > Insurer Statement Formats

Role	Access
TIS Finance & General Accounting	View

Master	What it holds
Taxation	The tax codes: **Code**, **Tax type** (VAT, expanded withholding tax), **ATC**, **Description**, **Rate**, **GL account**, **Applies to** (sales, purchases, both) and **Effective from**. For example VAT12-OUT output VAT 12% on brokerage commission and fees, and the EWT codes WC158, WC160, WC100.
Close Checklist	The items of the month-end close: **Order**, **Code**, **Item**, **Type** (**Automatic** or manual), **Severity** (blocking or warning). For example no unposted journals in the period, trial balance balanced, suspense account cleared, no unapplied receipts.
Bank Statement Formats	How each bank's statement file is read: columns, date format, debit and credit or signed amounts (for example the BDO and BPI exports).
Bank Transaction Types	The bank lines with no book entry (bank charges, interest income, final tax on interest): direction, the account they post to, whether they need approval and the description pattern that recognises them on the statement.
Insurer Statement Formats	How each insurer's statement file is read; the standard format applies to any insurer without its own.

21.18 Financial statement versions

Menu: Master > Finance > Financial Statement Versions

Role	Access
TIS Finance & General Accounting	Create and edit

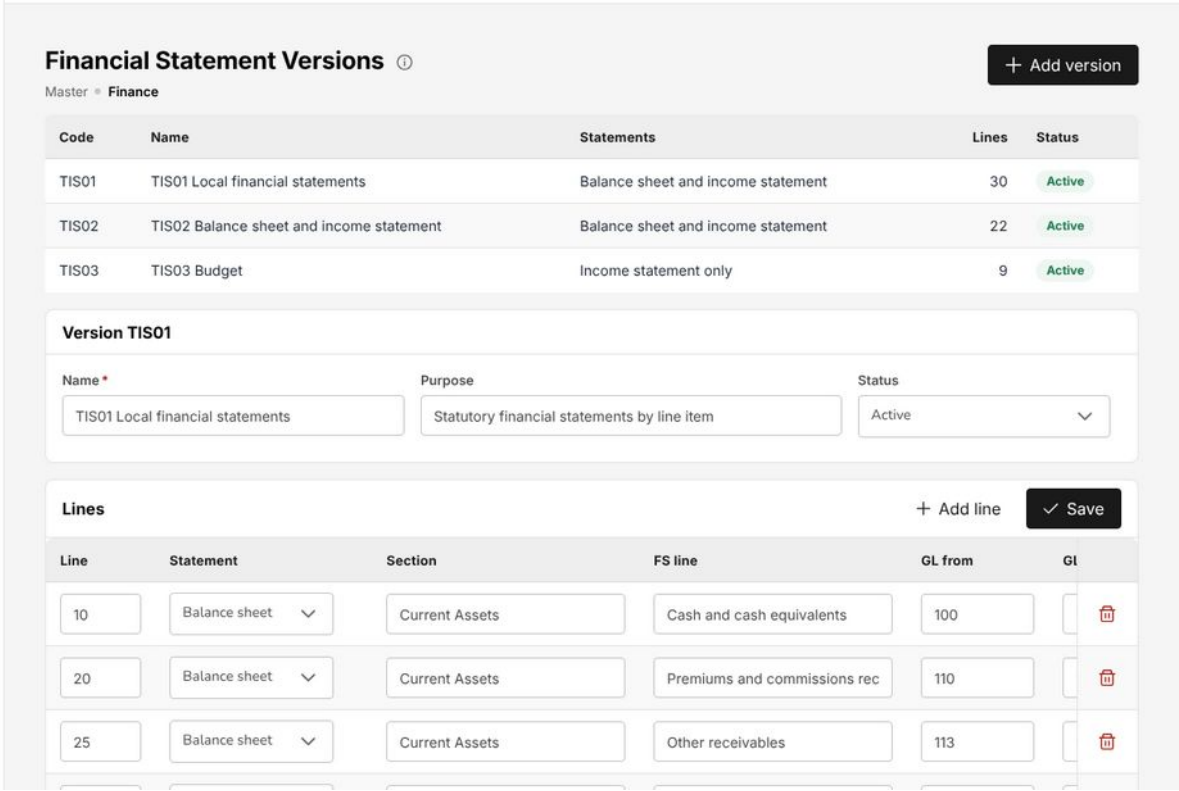

Figure 21.7: Master > Finance > Financial Statement Versions

A financial statement version lists the lines of the statements in order, each with the range of GL accounts it carries: **TIS01 Local financial statements**, **TIS02 Balance sheet and income statement** and **TIS03 Budget** (income statement lines only). A range is given by the first digits of the accounts: **GL from** 110 and **GL to** 112 take every account from 110 to 112, whatever its length. An account belongs to the first line, by line number,

whose range takes it; the accounts no line takes are listed under **Accounts not in this version** and show on that line in the reports, so the statements always add up.

Select a version to see its lines: **Line**, **Statement**, **Section**, **FS line**, **GL from**, **GL to**, **Shown as** (debit or credit balance) and the number of **Accounts** each line takes. TIS Finance & General Accounting edits the name, purpose and status and the lines (**Add line**, the bin of a line, **Save**); the lines are checked before they are saved. **Add version** starts a new version from the lines of another. The version of the reports when none is chosen is TIS01. See Financial Statement by Version and Daily GL Balance (23.1.3).

21.19 Operational masters

Menu: Master > Finance > Cost Centres

Role	Access
TIS Finance & General Accounting	View

Asset Classes gives each class of fixed asset its **Useful Life (months)**, **Asset Account**, **Accumulated Depreciation Account** and **Depreciation Expense Account** (for example Computer equipment, 36 months). **Cost Centres** lists the cost centres of journal lines with the company, department and responsible person; the default cost centre (900901 Toyota Insurance Services) goes on journal lines that name none.

21.20 Bank file layouts and payee bank accounts

Master > Finance > Bank File Layouts says how each bank's upload file is written and how its status file is read. The system is delivered with starter layouts for BDO, BPI, Metrobank, Landbank and UnionBank and a generic CSV. **The starter layouts are examples: each must be validated against the bank's current file specification, and a test file accepted by the bank, during onboarding.** They are marked **Test mode** until changed.

Menu: Master > Finance > Bank File Layouts

Role	Access
TIS Finance & General Accounting	View

The tab **Layouts** lists **Code**, **Name**, **Bank**, **Payment channels** (bulk credit, InstaPay, PESONet), **File format** (delimited or fixed width) and **Status**. **New layout** defines the header, detail and trailer records of a file and how the bank's status file is read. The tab **Payee bank accounts** holds the bank accounts of the payees (insurers, referrers, suppliers, claimants) used by Bank payment files (19.9).

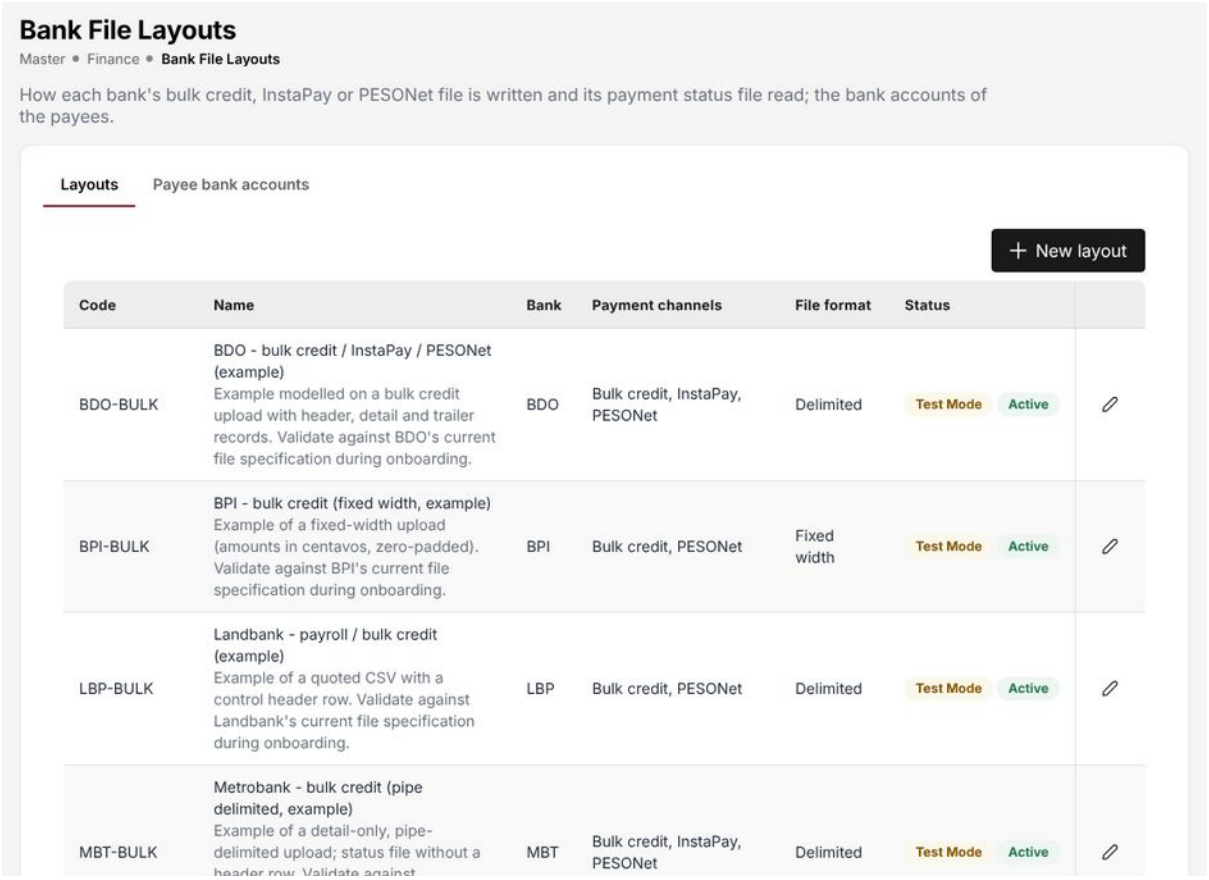

Figure 21.8: Master > Finance > Bank File Layouts

21.21 E-mail Layout

Menu: Master > System > E-mail Layout

Role	Access
TIS IT AppSupport / Admin	Create and edit

Every e-mail the system sends (quotation links, notices, receipts, reminders, debit notes) uses this layout, with the logo and the details of the primary company. Choose whether e-mails are sent in the branded layout, the header background and text colours, the line under the header, the logo in the header and the footer (company name, address, licence and TIN). **Show a sample e-mail** previews it; **Save** applies it; **Discard changes** returns to the saved layout.

21.22 Documents and Reports Layout

Master > System > **Documents and Reports Layout** sets how every printed document (quotation, policy schedule, slips, endorsement, receipts, billing statements, vouchers, debit notes, claim letters) and every report PDF or Excel file is printed, together with the logo, legal name, TIN, licence and address of the primary company (Master > Organization > Company).

Menu: Master > System > Documents and Reports Layout

Role	Access
TIS IT AppSupport / Admin	Create and edit

Set the print colours (accent, titles and section headings, section heading band, table header and its text; the contrast ratio is shown for each), the logo height on documents and the other print settings. **Sample document** previews a document; **Save** applies the layout to every document printed afterwards.

21.23 Document Signatures

Menu: Master > System > Document Signatures

Role	Access
TIS IT AppSupport / Admin	Create and edit

For each document (for example the policy schedule), the signature slots: **Slot**, **Label**, **Signed by** (a company signatory of Master > Insurance > Signatories, the default signatory, or the user who issued the document, whose signature is kept in My Profile) and **Prints** (for example **Once the document is issued**). **Add slot** adds a slot; **Save** applies the change.

21.24 Configuration

Menu: Master > System > Configuration

Role	Access
TIS IT AppSupport / Admin	Create and edit

Configuration holds the settings of the system, grouped in cards: **Company & Branding**, **Sales, Quotations & Placement**, **Policies, Endorsements & Renewals**, **Claims**, **Billing, Collections & Credit**, **Remittance & Reconciliation**, **Commission & Incentives**, **Accounting & Tax**, **Notifications & E-mail** and the others. Each card shows the number of its settings. Open a card to see and change its settings; the search box finds a setting by its name or description (for example VAT, renewal notice, password).

A setting changes the behaviour of the system for everyone (for example the quotation validity, the renewal notice days, the grace period). Change a setting only on a decision of the business owner; every change is recorded in the Audit Trail (21.27).

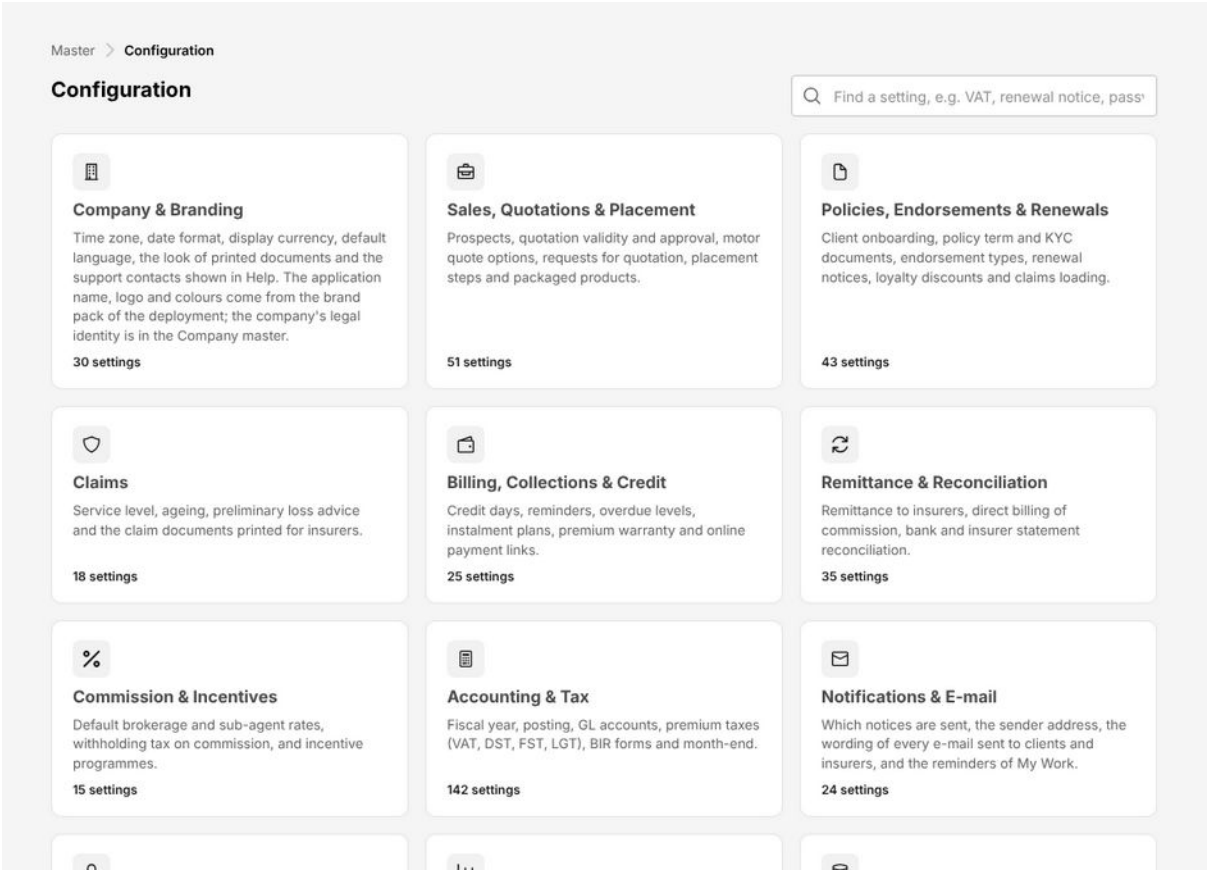

Figure 21.9: Master > System > Configuration

21.25 Document Numbering

Every number the system issues comes from a series on Master > Document Numbering: prospect, request for quotation, quotation, placement slip, policy, client, bill, official receipt, payment voucher, journal voucher, claim, endorsement, debit note, close run, reconciliation, BIR Form 2307 and the others. The list shows each series with module, prefix, format, counter reset, last number and next number.

Menu: Master > System > Document Numbering

Role	Access
TIS IT AppSupport / Admin	Create and edit

The usual format is the prefix, the year and a sequence (for example OR-2026-00001), reset every year. Filter by module and status. A number already issued is never issued again; a change to a series applies to the next number.

21.26 Schedules

Menu: Master > System > Schedules

Role	Access
TIS Finance & General Accounting	View
TIS IT AppSupport / Admin	Create and edit

Schedules lists the jobs the system runs by itself: **Job**, **What it does**, **Schedule (Asia/Manila)**, **Status** (**Scheduled** or **Switched off**), **Next run**, **Last run** and **Last status**. Among them: bank reconciliation auto-match, month-end close reminder, recurring journals, accrual auto-reversal, period auto soft-close, My Work reminders, the e-invoicing outbox, the remittance schedules and the prospect reassignment queue.

The actions of a job are **Run now** (the play button), the run history and the pencil to change its schedule or switch it on or off. Check the last status of the jobs every morning.

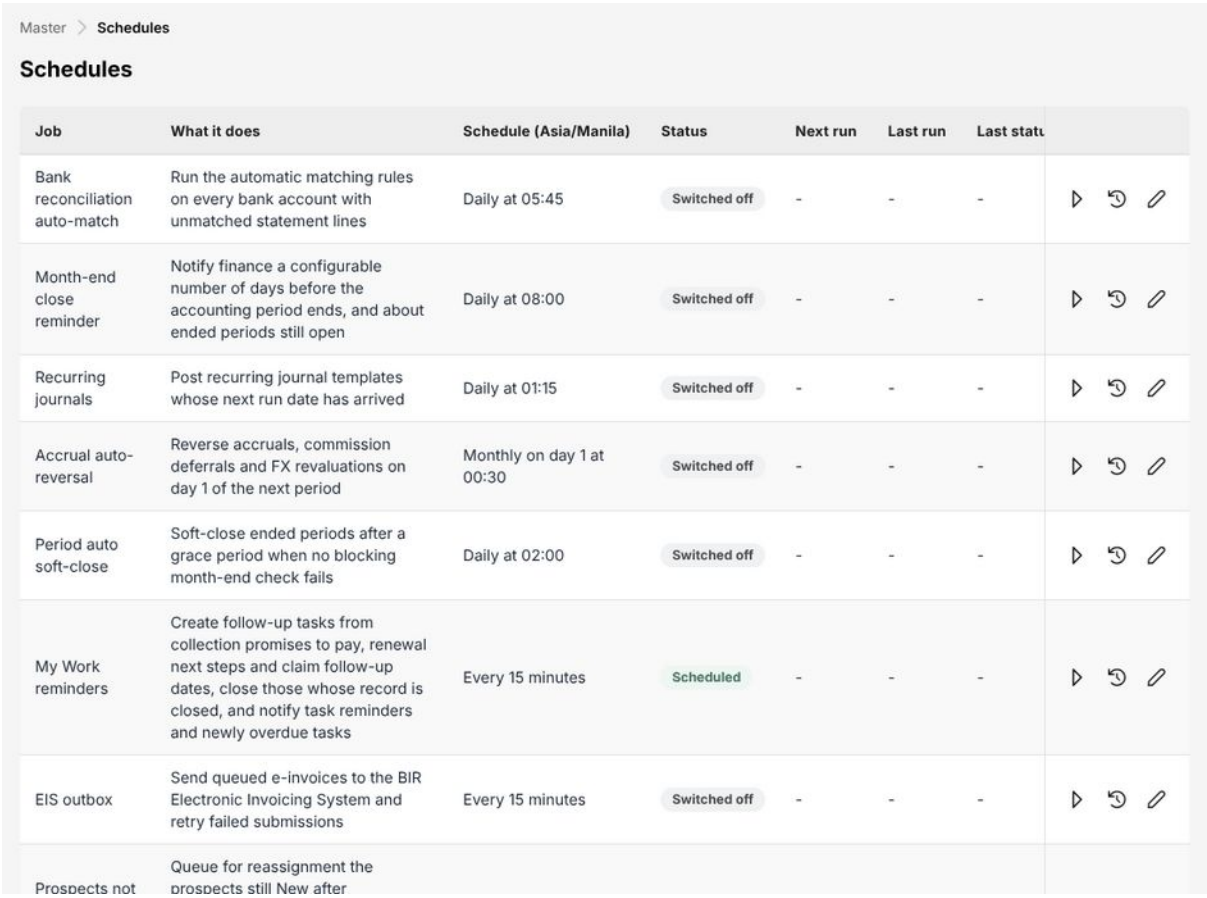

Figure 21.10: Master > System > Schedules

21.27 Audit Trail

The history of a single record (claim history, policy and client **History** tab, quotation **Audit Trail** tab, master records) uses the same layout as a timeline grouped by day, newest first, with a search box, a user filter, a filter by kind of event (created, status changes and approvals, other changes, cancelled or removed) and **Export**.

Menu: Master > System > Audit Trail

Role	Access
TIS Finance & General Accounting	View
TIS IT AppSupport / Admin	View
TIS General Manager	View
TIS Audit (read only)	View

Master > System > Audit Trail shows every change made in the system: **Date & Time**, **User** (with the role), **Record**, **Event**, **Changes** (each field with its value before and after) and **Source** (screen, sign-in, file upload, scheduled job). Filter by user, record type and action; **Export** downloads the result.

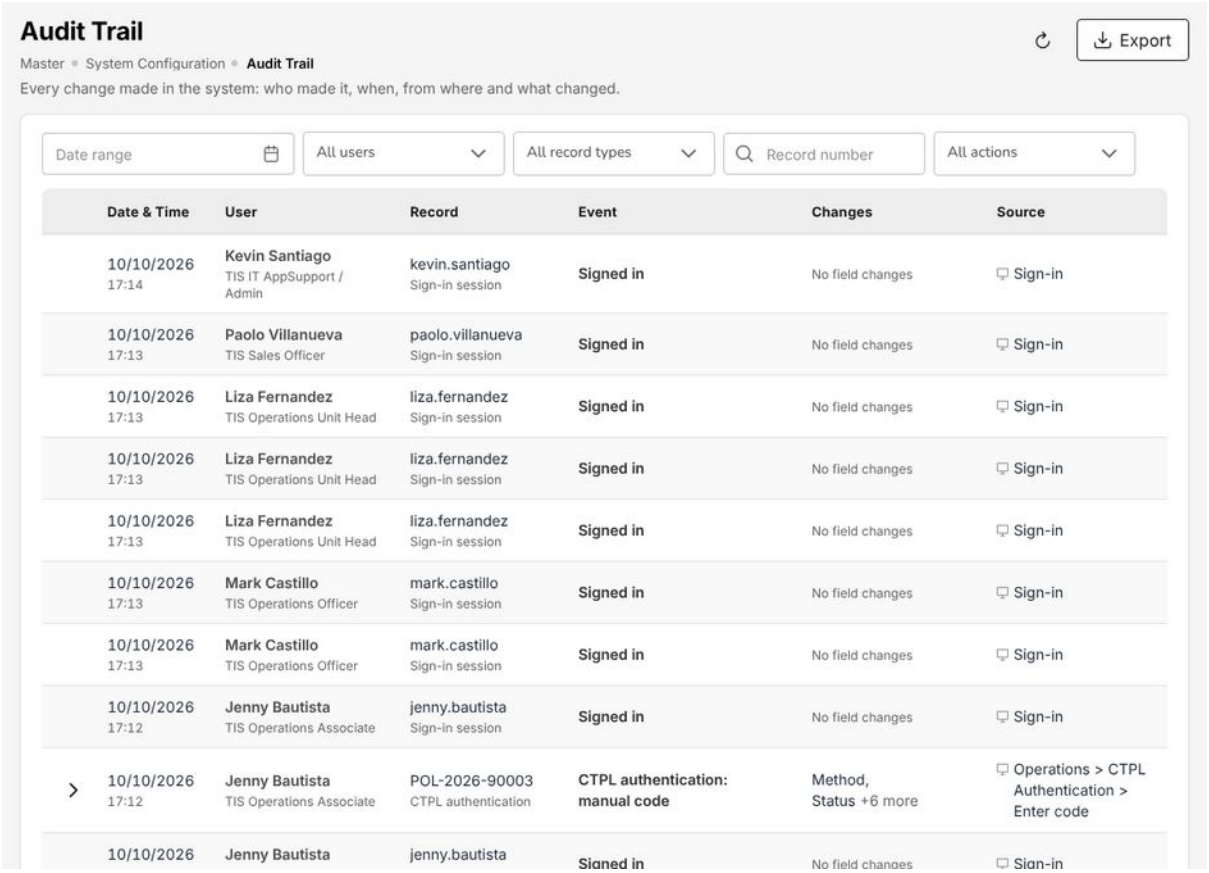

Figure 21.11: Master > System > Audit Trail

21.28 Features & Releases

Menu: Master > System > Features & Releases

Role	Access
TIS IT AppSupport / Admin	View
TIS General Manager	View

Master > System > Features & Releases lists every function of the system with its release: **Phase 1** (the TISPH scope, always on), **Platform** (users, configuration, audit and jobs, always on), **Phase 2** and **Future release** (available on request). Each line shows the **Tier**, the **Status** (Enabled, Read-only or Not enabled), the **Requirement IDs**, the **Enabled On** date, **Enabled By** (the system supplier) and the **Release Reference** of the change that enabled it. **Decision pending** marks a function whose release TISPH still has to confirm; open the line to read the question.

The tab **Future releases** lists the functions TISPH can ask for, with their description. **Export to Excel** downloads both lists.

The screen is read only. Phase 2 and future-release functions are enabled by the platform administrator of the system supplier under a signed change request, approved

by a second platform administrator; IT AppSupport / Admin and the General Manager receive an e-mail and a notification when a function is enabled or disabled. A function disabled while it holds records stays **Read-only**: its records can be viewed and exported, not changed. An address of a function that is not enabled shows **Not available in this edition**.

21.29 Data Migration & Go-Live

Menu: Master > System > Data Migration & Go-Live

Role	Access
TIS Operations Unit Head	View
TIS Finance & General Accounting	Create and edit
TIS IT AppSupport / Admin	Create and edit
TIS General Manager	View
TIS Audit (read only)	View

Master > System > Data Migration & Go-Live is the workspace of the cut-over from the old system: the templates, the loads with their approval, the reconciliation, the mock runs, the cut-over checklist, the Go / No-Go decision, the go-live lock and the hypercare figures. TIS IT AppSupport / Admin uploads and submits the loads; TIS Finance & General Accounting, the TIS Operations Unit Head and the TIS General Manager approve another user's load, sign the reconciliation and vote; TIS Audit reads every tab and changes nothing. Personal data in every download and review is masked for users who may not see it.

Tab	What it is for
Overview	Phase of the programme, cut-over date, lock, latest loads, reconciliation, Go / No-Go and open defects, and what waits for you
Templates	The configuration and migration templates per object, blank or with the current data; the policy sheets per product (Motor, CTPL, Personal Accident, Credit Life, Travel, Other Lines); the value maps of the old system's codes; the document file naming convention and its checker
Loads	Upload and validate, review each row (**New**, **Changed** with the old and new values, **Unchanged**, **Duplicate**, **Error**), resolve duplicates, submit, approve or reject, load, history, undo before go-live
Reconciliation	Control totals per object against the figures of the old system, receivables against the general ledger, the trial balance, the difference list and the sign-off, with the report
Runs	Mock 1, Mock 2, the dress rehearsal and the production run with their timings, results and defects
Cutover	The checklist of the run: owner, planned and actual start and end, status and evidence of each step
Go-Live	Go / No-Go against the criteria with the named approvers, the cut-over date, the lock and the unlock by two people
Hypercare	After the lock: business issued since go-live, migrated items worked, edits to migrated records, daily checks and defects

Loads. Download the template on **Templates**, fill it and upload it on **Loads > Upload** with the old system and the run. The file is validated in the background; nothing is saved. Review the rows: **Changed** shows each field as old and new value; **Duplicate** lists the matching record (same TIN, name and birth date, plate or chassis number, insurer name variant) and takes **Load as new** or **Use existing** with a reason; **Error** rows are in the errors file to correct and upload again. **Submit** the load: another user approves or rejects it with a reason; the uploader, the submitter and whoever resolved one of its duplicates

cannot approve it. The approval loads the records in one go under the load number (MIG-000012); a load that fails saves nothing. Every record created or changed starts its activity log with the load it came from. Before go-live, a load is undone under the same second-person approval while nothing depends on its records.

Reconciliation and sign-off. Enter or upload the totals of the old system for each line (counts and amounts per object, product, insurer and ageing bucket). Each line shows **Matched** or **Difference**; every difference needs an explanation and is accepted by a user who did not load the data. When the lines agree, the named signatories sign the reconciliation in the system; the signed report (PDF) is kept with the run and does not change afterwards.

Runs, cut-over and Go / No-Go. Each mock run is recorded with its loads, timings, results and defects. The production run carries the cut-over checklist: start and close each step with its evidence. The Go / No-Go decision lists the criteria with their automatic checks; the named approvers vote **Go** or **No-Go** with their remarks.

Go-live lock. After a Go decision, a signed reconciliation and no load waiting, one user requests the lock and another approves it on **Go-Live**. The lock closes every migration import: the migration template, the policies go-live upload, the open items import, the opening balances import, the transaction reset and the undo of loads. An unlock is requested and approved by two people, names the imports it reopens and ends by itself after its hours.

Migrated and issued business. Every migrated client, policy, claim, open item and opening balance journal shows the chip **Migrated** with its number in the old system and its load. Policies keep their old policy number; business written after go-live takes the insurer's policy number or the next TISPH number. Endorsements and claims on a migrated policy show **Migrated policy**; the renewal of a migrated policy shows **Renewal of legacy policy** on the Renewal Queue and on the renewed policy, which is new business with its own number. The Clients, Policies, Claims, Collections, Journal Voucher and Renewal Queue lists filter by **Origin** (All, Issued, Migrated); the Executive and Sales dashboards open on **Issued since go-live** and can show **All business**; the production register, premium by product, new business against renewals and dealer production reports take the **Origin** criterion. Migrated policies are not counted in premium written, new business, commission or incentive figures unless the approvers switch this on (**Go-Live**); they count as renewal opportunities. Migrated balances are in the opening balances and never go to the SAP GL daily file. The origin, the old number and the load of a migrated record cannot be changed.

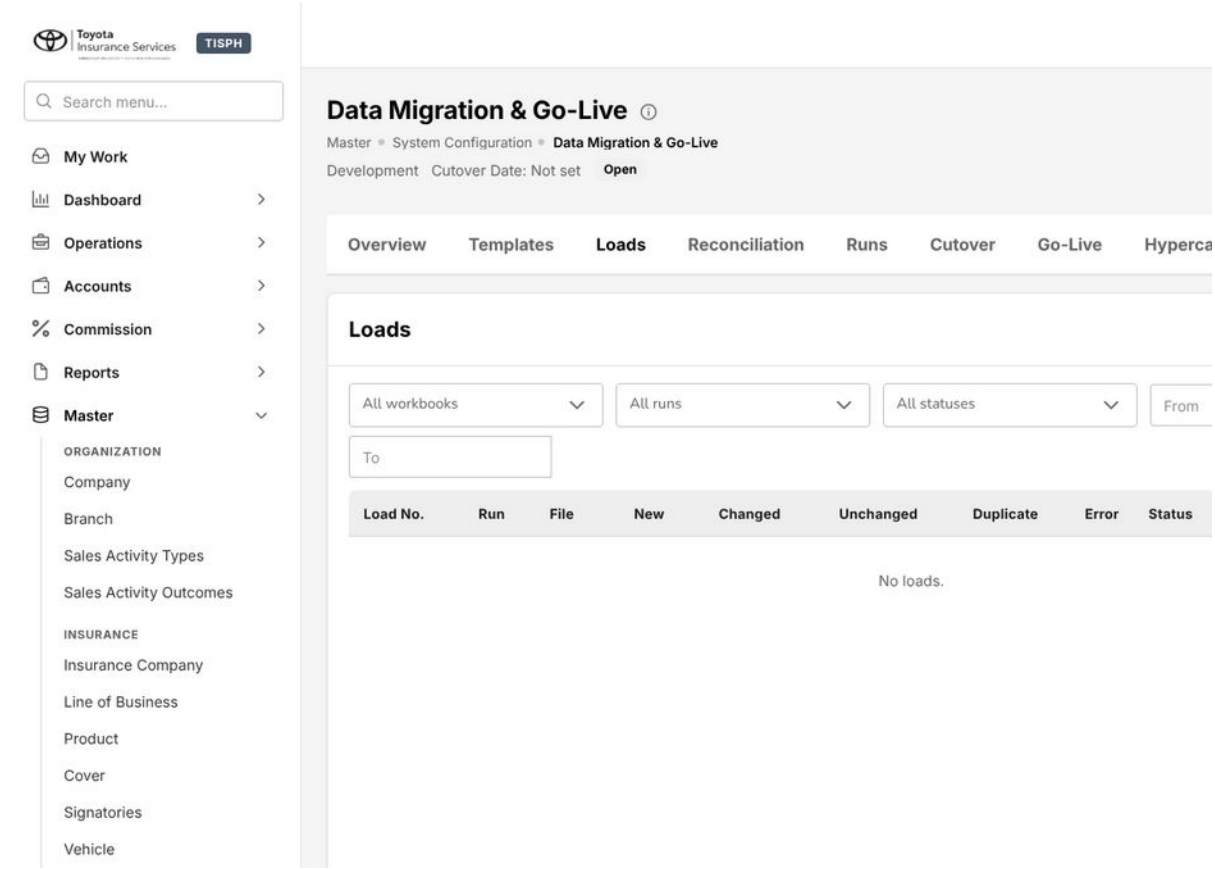

Figure 21.12: Master > System > Data Migration & Go-Live, the Loads tab

21.30 E-mail Outbox

Menu: Master > System > E-mail Outbox

Role	Access
TIS IT AppSupport / Admin	Create and edit

The E-mail Outbox lists every e-mail the system sent or tried to send: **Status** (queued, sent, failed), **To**, **Subject**, **Record**, **Attachments**, **Attempts**, **Last error**, **Created** and **Sent**. When sending is not set up, the screen says so and queued e-mails stay here. **Refresh** reads the list again; the **Last error** of a failed e-mail says why it was not delivered.

21.31 Integrations

Menu: Master > System > Integrations

Role	Access
TIS IT AppSupport / Admin	Create and edit

Integrations lists the connections to the SMS gateways, the CTPL authentication provider, the LTO, the insurers' systems and the banks. The tab **Connectors** shows each connector's **Type**, **Mode** (test or live), whether its **Credentials** are set, the **Messages** waiting, failed and sent today, and the **Last success** and **Last failure**. The tabs **Outbox** and **Inbox** list the messages sent and received. **Send due messages** sends

the waiting messages at once. The credentials themselves are kept on the server, never on this screen.

22. Screen reference: Product Configurator

The screens of the Product Configurator: products, covers, rating, acceptance rules, documents and the mapping to insurers.

Each section names the menu of the screen and the roles that open it, with their access. Your own menu shows only the screens of your role. The products are configured by TIS IT AppSupport / Admin on the request of the business; the other roles that open these screens can view them.

A product is configured as a **product template**. Only the template marked **In use** for a product is applied by the business screens: its covers, rating factors, acceptance rules, insurer market and document templates take effect on quotations, requests for quotation, placements and printed documents. The other templates are kept as drafts, inactive or retired versions. Each screen below filters by **Template**, **Line of business** and **Status**, and shows for each row its template and product and whether the template is in use.

22.1 Product Configurator dashboard

Menu: Product Configurator > Dashboard

Role	Access
TIS Sales Associate	View
TIS Sales Officer	View
TIS Sales Unit Head	View
TIS Operations Associate	View
TIS Operations Officer	View
TIS Operations Unit Head	View
TIS IT AppSupport / Admin	Create and edit
TIS General Manager	View

The dashboard shows the **Active Products**, the **Acceptance rules in force**, the **Total Premium** and the **Avg Loss Ratio** (weighted by premium), and three tabs: **Product Templates** (the list of templates, as on Product Templates (22.2)), **Performance Analytics** and **Quick Actions** (shortcuts to the other screens). **Create New Product** starts a new template.

22.2 Product Templates

Menu: Product Configurator > Product Templates

Role	Access
TIS Sales Associate	View
TIS Sales Officer	View
TIS Sales Unit Head	View
TIS Operations Associate	View
TIS Operations Officer	View
TIS Operations Unit Head	View
TIS IT AppSupport / Admin	Create and edit
TIS General Manager	View

The list shows **Template Code**, **Product Name**, **Product**, **Line of Business**, **Version**, **Status** (**Draft**, **Active**, **Inactive**, **Retired**) and **In use**. At TISPH the templates in use are those of the products sold: for example the motor template that prices the motor quotations (Motor Insurance Basic Plan) and the personal accident and travel templates. Templates of lines TISPH does not write stay inactive.

To create a template, select **Create Template**: enter the code, the product name, the product of Masters that work the same way (21.4) it configures, the line of business and the version, then add its covers, rating factors, acceptance rules, insurers and documents on the other screens. The pencil changes a template; the **In use** mark decides which template the business screens apply to the product. A change to a template in use applies to the quotations priced afterwards.

22.3 Coverage Builder

Menu: Product Configurator > Coverage Builder

Role	Access
TIS IT AppSupport / Admin	Create and edit

The Coverage Builder holds the covers of each template: **Code**, **Coverage Name**, **Template / product**, **Type** (**Mandatory** or optional), **Deductible**, **Priced on quotation as** and **Status**. A mandatory cover is always included in a quotation of the product; an optional cover is ticked on the quotation (see Create a motor quotation (18.4.1)).

For the covers quoted, the deductible and main exclusions are printed as cover terms on the quotation slip and the policy schedule. The premiums of the motor covers are priced on the quotation screens with the motor tariff of the template. **Add Coverage** adds a cover: code, name, template, type, deductible, the cover it is priced as and its exclusions.

22.4 Rating Engine

Menu: Product Configurator > Rating Engine

Role	Access
TIS IT AppSupport / Admin	Create and edit

Rating factors adjust the net premium of a quotation of the template in use. Each factor has a **Factor Code** and **Factor Name** (for example Vehicle Age, Driver Age, NCB (No Claim Bonus)), what it **Rates on** (vehicle age in years, driver age, claim-free years), a **Type** and its **Bands**:

Type	Effect
Multiplicative	The factor of the band the risk falls in multiplies the premium
Discount	The factor reduces the premium
Additive	A percentage is added to the premium

Add Factor adds a factor with its bands (from, to, factor). **Test a risk** enters a sample risk and shows the factors that apply and the premium they give, before the template is used.

22.5 Acceptance Rules

Menu: Product Configurator > Acceptance Rules

Role	Access
TIS IT AppSupport / Admin	Create and edit

Acceptance rules are the insurers' underwriting guidelines. They are checked when a quotation is priced or saved, when a request for quotation approaches an insurer and when a placement is created. Each rule has a **Rule** code and name, the **Template / product**, the **Insurer** (one insurer, or all), a **Condition** on the risk details, an **Outcome** and the **Authority Level**:

Outcome	What happens
Auto-accept	The risk passes when the condition holds; otherwise it is referred (or declined)
Refer	The quotation is held until a user of the authority role approves it within his or her limit of the Authority Matrix (21.10) (underwriting referral approval)
Decline	The risk is refused with the rule's message
Apply loading	The loading (for example 15%) is added to the net premium

The risk details the rules check are asked on the quotation (for example the fair market value of the vehicle, the claims in the last 3 years, the driver's date of birth). **Add Rule** adds a rule; **Test a risk** shows which rules a sample risk triggers.

22.6 Document Manager

Menu: Product Configurator > Document Manager

Role	Access
TIS IT AppSupport / Admin	Create and edit

The Document Manager holds the document templates of each product template, printed from the policy and quotation screens and attached to e-mails: **Document**, **Template / product**, **Printed as** (policy schedule, quotation slip, CTPL certificate, member enrolment form), **Stage** (quotation, policy issuance), **Layout** and **Status**.

Without an upload the standard layout is printed. To use TISPH's own layout, select **Add document template** (or edit a row) and upload the layout: a text file with merge fields. **Merge fields** lists the fields that can be placed in a layout (client, policy, vehicle, covers, premium, signature slots of Document Signatures (21.23)).

22.7 Market Mapping

Menu: Product Configurator > Market Mapping

Role	Access
TIS IT AppSupport / Admin	Create and edit

Market Mapping lists the insurers that offer each product: **Template / product**, **Insurer**, **Insurer Code** (the product's code at the insurer), **Agreed comm. % (ref.)**, **Target**, **YTD Performance** (premium of the policies issued this year, against the target) and **Status**. Only the insurers on a product's market can be approached on a request for quotation.

The agreed commission here is a reference; the commission applied comes from the Commission Rate Matrix (21.16). **Map Product** adds an insurer to a product.

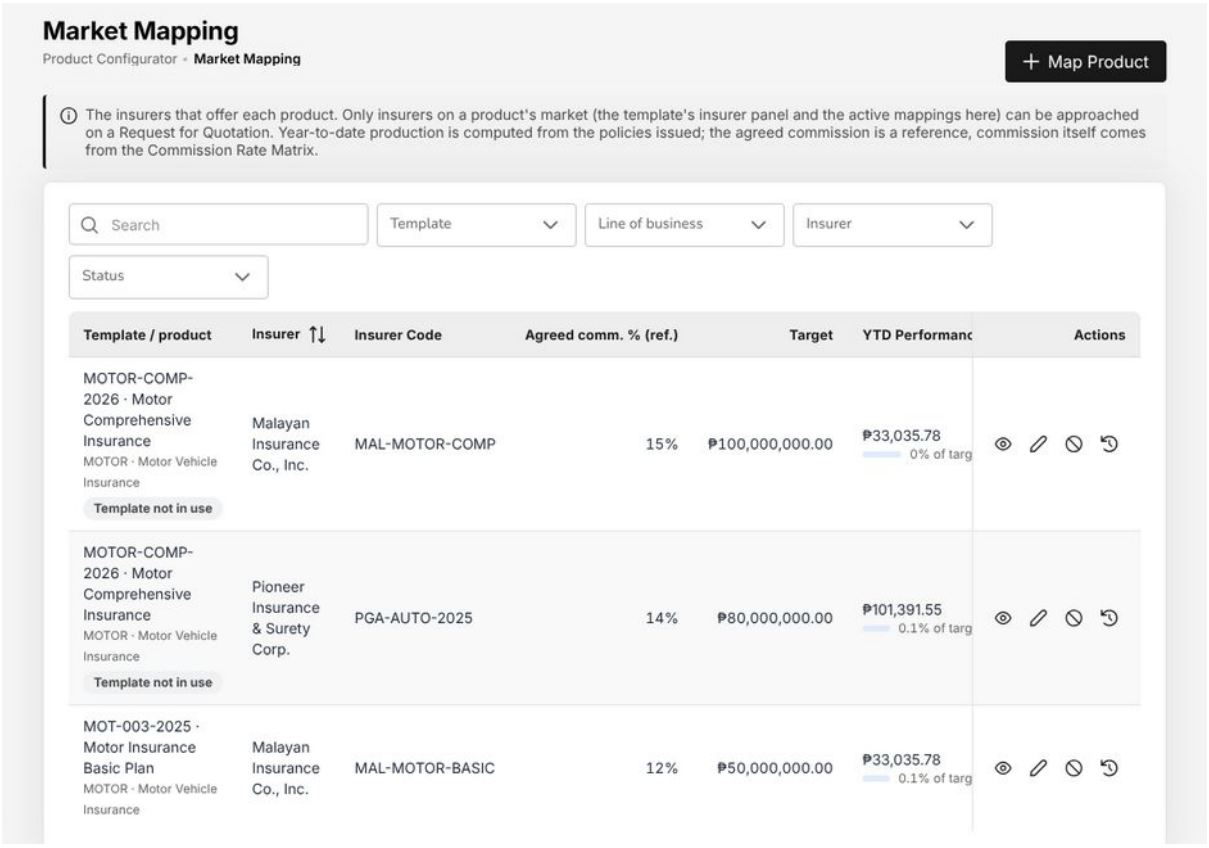

Figure 22.1: Product Configurator > Market Mapping: the panel insurers of the motor product

22.8 Risk Mapping

Menu: Product Configurator > Risk Mapping

Role	Access
TIS IT AppSupport / Admin	Create and edit

Risk Mapping lists the risk definitions of the products: **Product**, **Definition** (for example vehicle details for motor, liability cover fields for CTPL), **Risk Sections**, **Used by** and **Status**. The definitions are kept for reference; the risk details of a motor quotation are those of the quotation screens.

23. Reports

Reports open from the Reports menu. Each role sees the reports of its department, and a report shows only the records the role may read.

Reports > All Reports shows the reports your role may run, as cards grouped under **Operational Reports** and **Financial Reports**, each with its description. The search box finds a report by name. The same reports open from the menus **Reports > Operational Reports** and **Reports > Financial Reports**; the bank reconciliation and BIR reports also open from their Accounts menus.

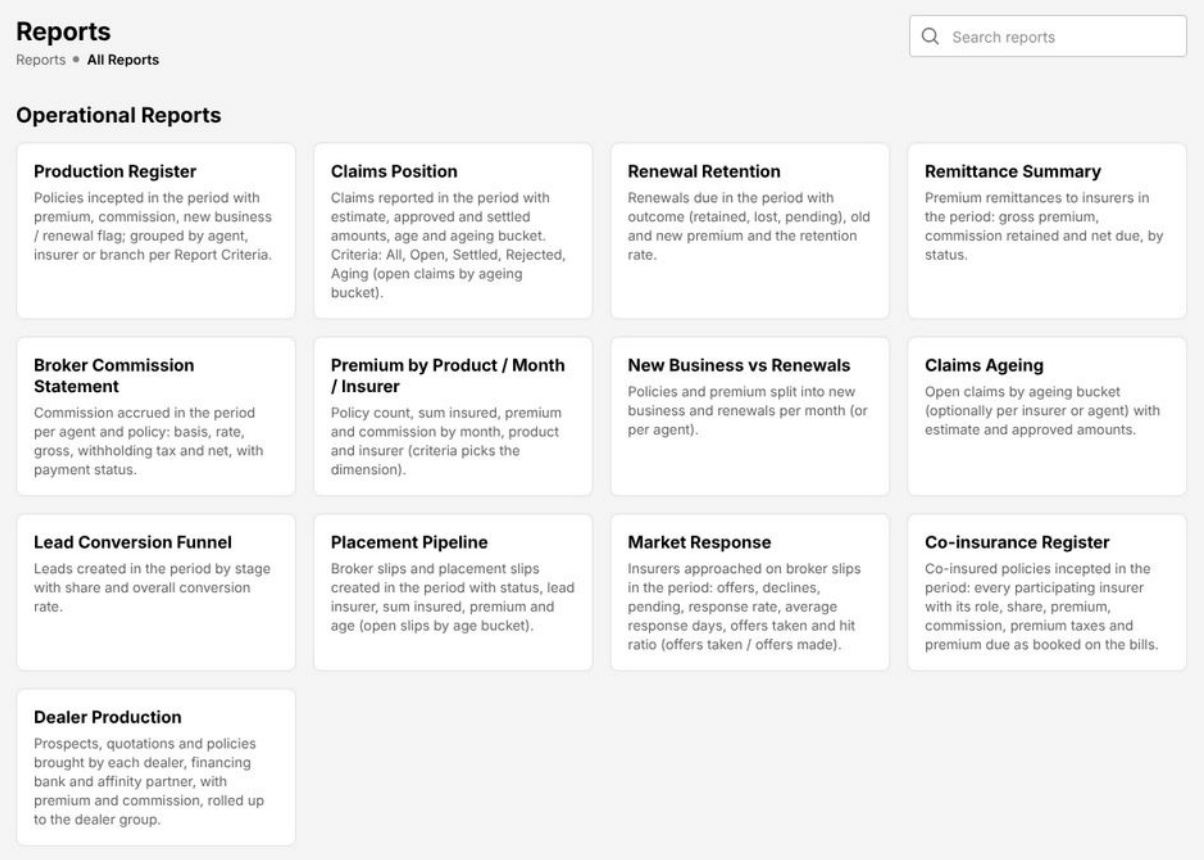

Figure 23.1: Reports > All Reports, as TIS Operations Officer sees it

23.1.1 Run a report

1. Choose Reports > All Reports and select the report (or choose it from the report menu).
2. In **Report Criteria**, choose how the report is grouped or which part it shows, for example **Overall**, by **Agent**, **Branch** or **Principal Insurer**; **Summary** or **Detailed**; **Open**, **Partial**, **Settled**, **Rejected**, **Cancelled**, **Aging** or by **Claim Type** for the claims reports.
3. Enter **From Date** and **To Date** (required). Most reports take the records of the period; the ageing and balance reports are computed as of the **To Date**.
4. Narrow the report with the other filters if needed: **Agent**, **Branch**, **Client**, **Status**, **Company (principal insurer)**, **Product**, **Bank Account**, **GL Account**. A filter marked "Used with criteria" applies only with the criteria of that name.
5. Choose the **File format**: **CSV**, **Excel (XLSX)** or **PDF**.
6. Select **Preview** to see the rows on screen, or **Generate** to download the file.

The PDF and Excel files are printed in the layout of Documents and Reports Layout (21.22), with the letterhead of Toyota Insurance Services Philippines. Amounts are in pesos.

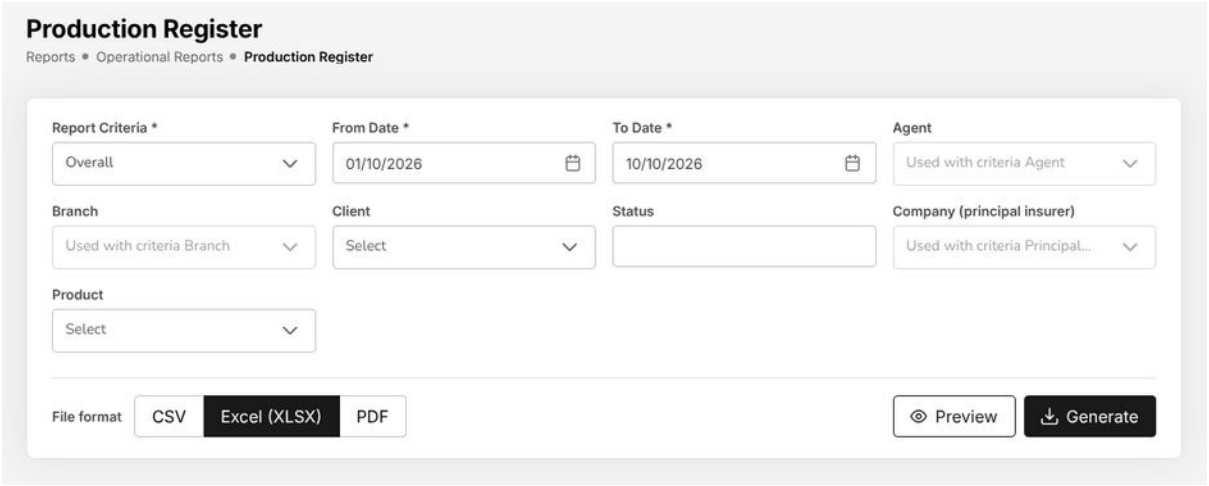

Figure 23.2: Reports > Operational Reports > Production Register: the criteria of a report

23.1.2 Export and keep a report

- **Excel (XLSX)** keeps the columns as numbers and dates, for further analysis.
- **CSV** is the format to load into another system, and the format of the BIR alphalists from which the BIR DAT files are prepared.
- **PDF** is the format to file or send.

Every list screen of the system also has its own export (**Export**, **Export to Excel**, **Generate Report**) for the rows it shows with the filters chosen.

There is no scheduled or e-mailed report in the TISPH menus: run the reports when you need them, for example at the month-end close.

23.1.3 The reports of each department

Sales (TIS Sales Associate, TIS Sales Officer, TIS Sales Unit Head):

Report	Contents
Production Register	Policies incepted in the period with premium, commission and the new business or renewal flag; grouped by agent, insurer or branch
Lead Conversion Funnel	Prospects created in the period by stage, with the share and the overall conversion rate
Placement Pipeline	Requests for quotation and placement slips created in the period with status, lead insurer, sum insured, premium and age
Market Response	Insurers approached on requests for quotation: offers, declines, pending, response rate, average response days and hit ratio
Dealer Production	Prospects, quotations and policies brought by each dealer, financing bank and affinity partner, with premium and commission, rolled up to the dealer group
Renewal Retention	Renewals due in the period with their outcome (retained, lost, pending), old and new premium and the retention rate
New Business vs Renewals	Policies and premium split into new business and renewals per month (or per agent)
Premium by Product / Month / Insurer	Policy count, sum insured, premium and commission by month, product or insurer
SOA / Premium Receivable, Receivables Ageing	The premium bills with their balance and ageing
Incentive Results	The incentive programme results: target, achieved, achievement and payout per agent

Operations (TIS Operations Associate, TIS Operations Officer, TIS Operations Unit Head): the operational reports above, and

Report	Contents
Claims Position	Claims reported in the period with claim type, line, estimate, insurer offer, approved and settled amounts, requirements received, follow-up date, settlement date, age and ageing bucket; filter by insurer, product, agent, branch or client
Settled Claims	Claims settled in the period by settlement date, overall, by principal insurer or by claim type, with the estimate, insurer offer, approved and settled amounts (Reports > All Reports)
Claims Ageing	Open claims by ageing bucket (optionally per insurer or agent) with estimate and approved amounts
Co-insurance Register	Co-insured policies incepted in the period: each participating insurer with its role, share, premium, commission, premium taxes and premium due
Remittance Summary, **Broker Commission Statement**	The remittances and the commission of the period, for information
Net Remittance - Fully Paid, **Net Remittance - Partially Paid**	Per insurer, the broker-billed policies paid in full (or paid in part) in the period: gross premium, commission, remitting rate, net remittance, taxes, paid to date, outstanding and the remittance that carries them
Premium Report by Payment Status	Policies incepting in the period as fully paid, partially paid, cancelled or pending, with the official receipts and the remittance batch
Invoice Tracker	The premium bills of the period not due, overdue, partially paid and paid, aged 1-15, 16-30, 31-60 and over 60 days overdue, with the count of overpayments held On Account
Statement of Account per Insurance Partner	Per insurer, the policies incepting in the period in three sections: premium (gross, net, VAT, DST, LGT), remitting (net remitting, collected, remittance) and commission (commission, VAT, withholding tax)
Reconciliation Schedule	Each line of the insurers' statements of the period against TISPH's records: gross premium, commission and amount paid on both sides, the differences and the match status

Cash Control (CCD-PDU (Post-Dated Cheques), CCD-PDC / CCD-ADA, CCD-BP / QRPh (Receipting), CCD-Recon (Reconciliation and Reversals)):

Report	Contents
SOA / Premium Receivable	The statement of account: premium bills issued in the period with amount, paid, balance, age and ageing bucket as of the To Date
Collection Report	Bills due in the period with the amount billed, collected (receipts posted up to the To Date), balance and collection rate
Receivables Ageing	Outstanding premium receivables as of the To Date by ageing bucket
Receipts Register	Official receipts of the period with bill, policy, payment mode, bank and reference
Bank Reconciliation Statement, **Outstanding Cheques**, **Deposits in Transit**, **Unmatched Bank Lines**, **Bank Book**	The bank reconciliation reports; see Bank reconciliation (19.16)
Remittance Summary	Premium remittances to insurers in the period: gross premium, commission retained and net due, by status
Payment Summary	Payments received in the period by user or payment method: payment and posting dates, contract, reference, client, amount, bank, cheque, channel, receipt and posting status
Daily Reversals	Receipts reversed and cheques bounced in the period, with sub-totals per bank account: reason, reversal and actual dates, contract, client, amount, cheque, method and user

Report	Contents
PDC Encoded Summary, **PDC Cancelled Summary**, **PDC Maturing**, **PDC Maturing by Product and Warehouse Bank**, **PDC History Log**, **Acknowledgement Receipts of Received PDCs**	The post-dated cheques encoded, cancelled (with the reason and the approver) and maturing in the period, by warehouse bank (the Insurance Partner holding them, or the TISPH account), every action on a cheque, and the sets received; see Post-dated cheques (19.5)
Insufficient Payments, **Overpayments**	Bank payments below what the policy owed (expected, paid, shortfall), and payments above it held On Account (excess, still held, allocated or refunded)

Finance and Accounting (TIS Finance & General Accounting):

Report	Contents
Remittance Summary, **Due to Insurers by Co-insurer**, **Aged Payables to Insurers**	The premium due to each insurer: collected, remitted and still held; the open payables aged
Broker Commission Statement, **Commission Receivable – Direct Bill**	The commission payable to agents and referrers; the commission due from insurers on direct-bill policies
Payables / Disbursement Register	Payment vouchers raised in the period with approval and payment dates
Journal Register, **General Ledger Detail**	Journal lines of the period; every movement of an account with its running balance
Trial Balance, **Trial Balance (Opening / Movement / Closing)**	Per account: opening balance, period debits and credits, closing balance
Income Statement, **Balance Sheet**	The financial statements for the period and the fiscal year to date, with the prior year
Financial Statement by Version	The trial balance grouped by the lines of a financial statement version (TIS01 local financial statements, TIS02 balance sheet and income statement, TIS03 budget), per line or per GL account: opening, movement, closing, year to date and the prior year to date; lines with nothing to show are left out. See Financial statement versions (21.18)
Daily GL Balance	Per GL account, grouped by the lines of the version: the beginning balance and the balance at the end of each day of the month from the From Date
Month-End Close Status	The periods of the range with their status, the latest close run, failed checks, journals generated and who prepared and approved the close
VAT Summary, **SAWT**, **QAP**, **SLSP Sales**, **SLSP Purchases**	The BIR working papers; see Tax: BIR forms and returns (19.18)
Bank reconciliation reports	As for Cash Control

Management (TIS General Manager): every report of the departments above.

The roles that open each report menu, with their access, are listed at the top of this section and in each role chapter.

The Report Builder makes a report of your own from a dataset: pick the columns, filters and grouping, run it on screen, export it to Excel, and save it for yourself or share it with roles.

1. Choose Reports > Report Builder. On the **Build** tab, choose a **Dataset**. A dataset shows only the records your role may read.
2. In **Columns**, choose the columns to show.
3. In **Group by**, choose a column to group on: the numeric columns chosen are summed per group. In **Sort by**, choose the sort column and **Ascending** or descending.
4. Select **Add filter** for each condition.
5. Select **Run** to see the result on screen, or **Export to Excel**.
6. Save the report: give it a name and a description, and keep it private or share it with one or more roles.

The tab **Saved reports** lists the reports you may open: your own and those shared with one of your roles, with **Name**, **Dataset**, **Description**, **Owner**, **Shared with** and **Last run**. Open one to run it again or change it.

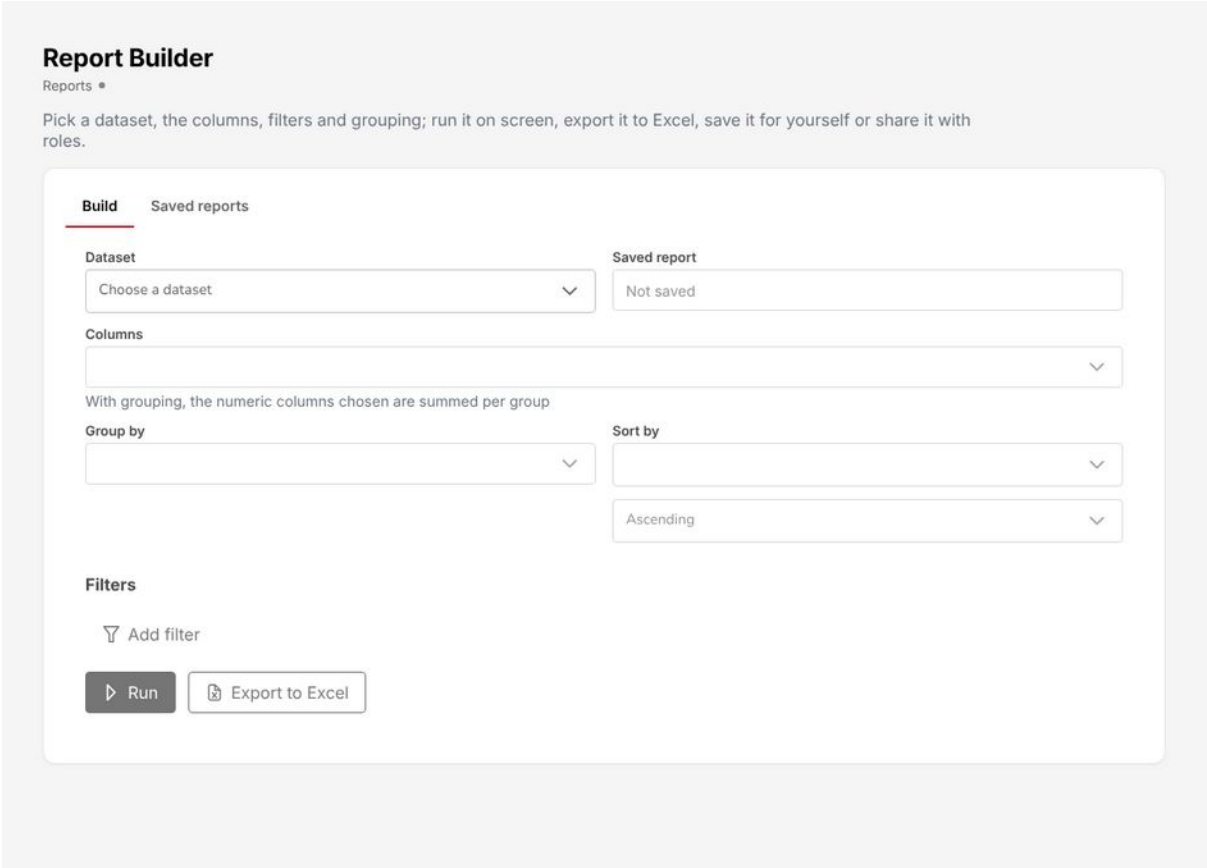

Figure 23.3: Reports > Report Builder

24. Glossary

Term	Meaning
Account executive	The TISPH employee who looks after a prospect or client and owns its quotations and renewals. Written in lower case in running text (account executive): it names a person, not a role.
ADA	Auto-debit arrangement: the client's bank pays the premium by debit to the client's account.
Agency bill	See Broker billed.
AP	Accounts payable: the amounts TISPH owes its suppliers.
AR	Acknowledgement receipt: the receipt the system issues when a client's payment is recorded on a policy, before Cash Control confirms it with the official receipt.
ATC	Alphanumeric tax code of the BIR, which identifies the kind of income on which tax is withheld.
ATP	Authority to print: the BIR permit for the series of printed receipts and invoices.
Audit trail	The record of every creation, change, approval and sign-in, with the user, the time and the values before and after.
Authority Matrix	The largest amount each role may approve per kind of transaction.
Bank reconciliation	The matching of the bank statement with the bank book of TISPH.
BDO, BPI	Banks of TISPH and its clients: BDO Unibank and the Bank of the Philippine Islands.
Billing statement	The statement to a client of the premium due, paid and outstanding.
BIR	Bureau of Internal Revenue.
BP	Bills payment: premium paid by the client through a bank or a payment centre.
Broker billed	The client pays the premium to TISPH, which remits it to the insurer net of commission. Also called agency bill.
CAS	Computerized accounting system: the registration of the system with the BIR, with its books and documents.
CCD	Cash Control Department of TISPH.
Checked against slip	The policy returned by the insurer has been compared with the placement slip and confirmed by a second user.
Claim	A request of the insured to the insurer for payment of a loss under a policy.
Client	A person or company with at least one policy.
CM	Credit memo: a credit to a client's account that is not money received. Transaction code CM on Receipts, used only when TIS Finance & General Accounting asks for it.
Co-insurer	An insurer that takes a share of a risk led by another insurer.
COC	Certificate of cover of a CTPL policy, authenticated before it is released.
Commission	The brokerage the insurer pays TISPH on the premium.
Comsub	The label of the referrer commission on the screens (see Referrer commission).
Converted	The status of an issued receipt whose lines are all paid and posted.
Cover note	Temporary evidence of cover issued while the insurer issues the policy.
CTPL	Compulsory third party liability insurance of a motor vehicle, required for its LTO registration.
DAIF, DAUD	Reasons a bank returns a cheque: drawn against insufficient funds, drawn against uncollected deposit.
Dealer	A Toyota dealer whose vehicle sales bring prospects (dealer leads) and dealer programmes.
Delegation	The loan of an approver's approval limit to the person who covers during an absence, for chosen transactions and dates.
Direct bill	The client pays the premium directly to the insurer; TISPH bills its commission to the insurer.
DST	Documentary stamp tax on the premium.
E-mail	Electronic mail. Written e-mail in running text and E-mail at the start of a sentence or a screen label, as on the screens.
e-Policy	The issued policy the insurer sends back, recorded against the placement slip.
EIS	Electronic Invoicing System of the BIR, to which the sales invoices are reported.
Endorsement	A change to a policy during its period: details, cover, period or cancellation, with additional or return premium.

Term	Meaning
EOPT	The Ease of Paying Taxes Act (Republic Act No. 11976), which governs the invoices TISPH issues.
EWT	Expanded withholding tax: income tax withheld at source on commission and other payments.
Fleet schedule	The list of vehicles insured under one policy of a fleet client.
GL	General ledger: the accounts in which every journal is posted.
IC	Insurance Commission, the regulator of insurers and insurance agents and brokers.
Insurer	An insurance company of the TISPH panel.
Insurer statement	The statement of account (SOA) an insurer sends TISPH of premium and commission, reconciled with the records of TISPH.
JV	Journal voucher: a journal entered by hand.
KPI	Key performance indicator, shown on the dashboards.
Lapse	A policy not renewed within the grace period after its expiry.
Lead insurer	The insurer that leads a co-insurance and whose terms apply.
LGT	Local government tax on the premium, at the rate of the city or municipality.
LGU	Local government unit: the city or municipality whose local government tax (LGT) applies to a premium.
Line of business	A class of insurance, for example Motor, Personal Accident, Credit Life or Marine.
LOB	Line of business.
LTO	Land Transportation Office.
Maker and checker	The maker enters a record; a different user, the checker, approves it.
Marine open cover	A marine cover of a client for all shipments of a period, declared shipment by shipment.
Masked value	A personal identifier shown in part only, for example j***@example.ph, to the roles that do not need it in full.
MV file number	The motor vehicle file number the LTO gives a vehicle before its plate number is issued.
My Work	The first screen after sign-in: the items, approvals and tasks waiting for you.
NCB	No-claim bonus: the discount on the motor premium for years without a claim.
OR	Official receipt: the receipt registered with the BIR, issued for money received.
PCF	Petty cash fund.
PDC	Post-dated cheque: a client's cheque received before its date, deposited and receipted on that date.
PEP	Politically exposed person, recorded on the client for anti-money laundering checks.
Placement slip	The firm order to the insurer to issue cover on the agreed terms.
Policy	The insurance contract issued by the insurer, identified by its policy number.
Premium payment warranty	The number of days the insurer allows for the payment of the premium.
Prospect	A person or company that may become a client.
PV	Payment voucher: the document of a payment to a supplier, insurer, referrer or claimant.
QAP	Quarterly alphalist of payees: the list of the tax TISPH withheld in a quarter, filed with the BIR Form 1601-EQ.
QRPh	The national QR code standard for payments.
Quotation	The terms offered to a prospect or client.
RDO	Revenue District Office of the BIR.
Receipt	The record of a payment received: the official receipt (OR) of Cash Control, or the acknowledgement receipt (AR) the system issues when a payment is recorded on a policy.
Referrer commission	The part of the commission TISPH pays to the agent, sub-agent or dealer who referred the business (shown as Comsub on the screens).
Remittance	The payment of premium, net of commission, to the insurer.
Renewal	The continuation of a policy for a new period.

Term	Meaning
Request for quotation	The request to the insurers for their offers on a risk.
SAP	The accounting system of TISPH to which the journals of the day are exported (SAP GL export).
SAWT	Summary alphalist of withholding taxes: the tax withheld from TISPH by its customers.
SCR, UCFP	Lead sources of TFS for used cars (Used-Cars - SCR, Used-Cars - UCFP), named as TFS names them.
Segregation of duties	The rule that one person must not hold roles that should stay apart, for example issuing and reversing receipts.
SLA	Service level: the time within which an approval or a task is expected.
SLSP	Summary list of sales and purchases, filed with the BIR each quarter.
SOA	Statement of account. On screens: Billing statement for a client, insurer statement for an insurer (see Insurer statement reconciliation).
Status	The stage a record has reached, shown as a coloured tag, for example Pending, Approved or Rejected.
TBA	To be advised: written on a quotation when the plate number is not yet known.
TFS	Toyota Financial Services.
TIN	Taxpayer identification number.
TIS	The prefix of the TISPH role names, for example TIS Sales Officer. The company is written TISPH.
TISPH	Toyota Insurance Services Philippines.
Two-step verification	A second sign-in step after the password or the Microsoft account: a code from an authenticator app.
Underwriting referral	A quotation that an acceptance rule of the product sends to the TIS Operations Unit Head for a decision before it can go to the client.
VAT	Value-added tax.
WHT	Withholding tax.
