1 About this manual

1.1 Purpose

BrokerVerse OOTB is the insurance broking platform of iorta TechNXT for non-life brokers in the Philippines. One system covers the whole broking cycle: prospects and leads, placement with insurers, quotations, policy issue, billing and collection, commission, remittance to insurers, endorsements, claims, renewals, the general ledger, the month-end and year-end close, BIR reporting and bank reconciliation.

This manual tells you how to use each screen. For each task it gives the menu path, the steps, the fields you fill in and what the system does when you save: the number it issues, the journal it posts, the approval it asks for and the report that picks the transaction up.

1.2 Who this manual is for

BrokerVerse has seven roles. Each user holds one role, and the menu shows only what that role may use.

Role	What the role does in BrokerVerse
Sales & Marketing (Account Executive)	Records prospects and leads, requests quotations, follows up renewals and watches its own production and commission.
Processing Team (Placement & Policy Processing)	Sends Broker Slips to insurers, compares offers, prepares Quotation Slips and Placement Slips, records insurer confirmations, issues and checks policies, processes endorsements, maintains product templates and reinsurance.
Operations (Client Servicing)	Serves clients: client records, endorsement requests, renewals, open items, payment capture and documents.
Claims	Registers claims, collects documents, follows up insurers and adjusters, and records and approves settlements.
Accounting	Issues official receipts, collects premium, remits to insurers, pays commission and incentives, reconciles bank accounts, prepares the month-end and year-end close and the BIR reports.
Accounting Manager	Does everything Accounting does and approves the month-end and year-end close and bank reconciliations, reopens periods and posts into soft-closed periods.
System Administrator (Super Admin Access)	Sees every menu. Maintains users, masters, document numbering, posting rules, system settings, configuration and schedules, and reads the audit trail.

Start with Chapter 2 (Getting started) and Chapter 3 (The broking cycle). Chapter 25 has a one-page guide for each role that points to the chapters you need.

1.3 Conventions

Convention	Meaning
Operations > Broker Slips	A menu path. Choose the first item in the sidebar, then the next one.

Convention	Meaning
Save, Compare offers	Buttons, tabs and fields are written exactly as they appear on the screen.
<code>limits.quote_validity_days</code>	A configuration key. You find it on Master > Configuration.
BS-2026-90001	An example record from the sample data shown in the screenshots.
₱ 28,569.53	Amounts are in Philippine pesos with Philippine digit grouping.
29/09/2026	Dates use the configured format DD/MM/YYYY.
Maker and checker	The maker enters a transaction. A different user, the checker, approves it.

Note: The screenshots come from a BrokerVerse OOTB system loaded with sample data on 29 September 2026. Your screens show your own data and, if your System Administrator has set them, your company name and logo. Your menu shows only the items of your role.

2 Getting started

2.1 Signing in

Sign in with your own user ID and password. Never share a user ID: every action is recorded against it in the audit trail.

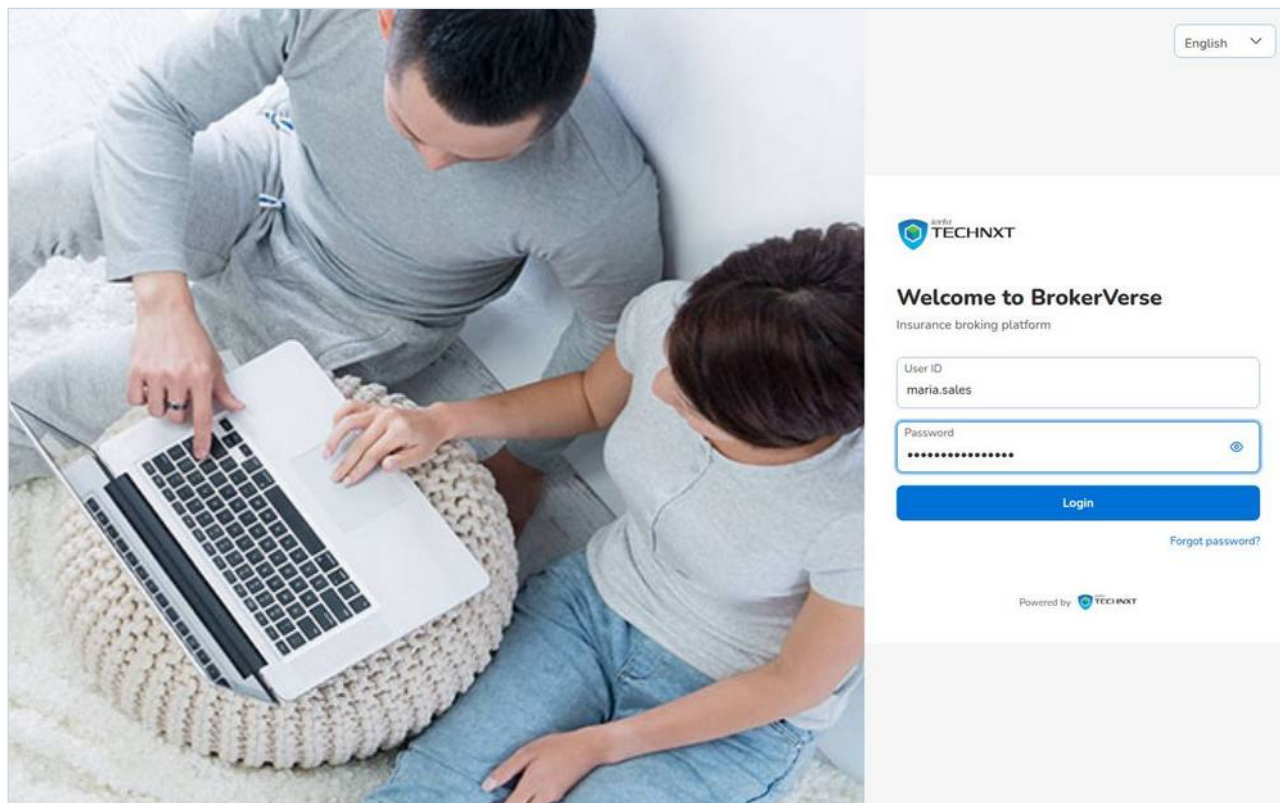

Figure 1. The sign-in page with the user ID filled in and the password hidden

1. Open the BrokerVerse address your System Administrator gave you in Chrome, Edge or Firefox.
2. In User ID, type your user name, for example maria.sales.
3. In Password, type your password. Select the eye icon to show the password while you type, and select it again to hide it.
4. Select Login.

The system opens your landing page. Each role lands on the first dashboard of its menu (see *Roles and menus* below).

One more step can follow the password:

Step	When it appears
Two-step verification	Two-factor authentication is on for your user.
Set up two-step verification	Your role must use two-factor authentication and you have not set it up yet.
Change password	You sign in with a temporary password, an administrator has reset your password, or your password is older than 90 days.

Password rules

Rule	Standard value	Setting
Minimum length	8 characters	<code>security.password_min_length</code>
Must contain	an upper-case letter, a lower-case letter, a digit and a symbol	<code>security.password_require_*</code>
Password history	the last 5 passwords cannot be used again	<code>security.password_history_count</code>
Maximum age	90 days; after that you choose a new password when you sign in	<code>security.password_max_age_days</code>

Every screen where you choose a password lists these rules under the new password and ticks each rule as soon as the new password meets it.

Change your password

A new user receives a temporary password from the System Administrator. At the first sign-in the system asks for a new password before anything else. The same happens after an administrator resets your password and when your password has expired.

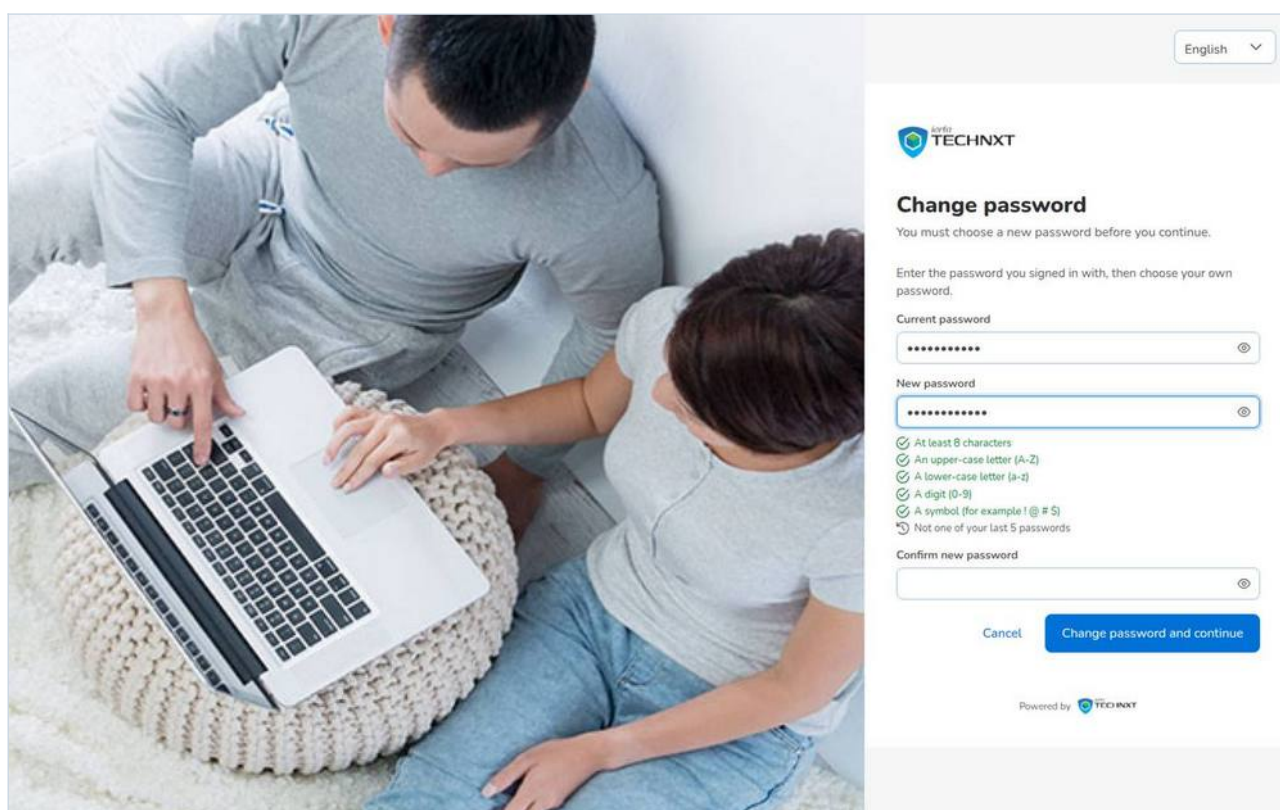

Figure 2. Change password at sign-in. The rules are ticked as the new password meets them (example values)

1. In Current password, type the password you signed in with.
2. In New password, type the new password and check that every rule is ticked.
3. In Confirm new password, type it again.
4. Select Change password and continue.

To change your password at any other time, select your initials at the top right, then Change password. Fill in the three fields and select Change password. The system signs you out on every other computer and browser; your current session continues.

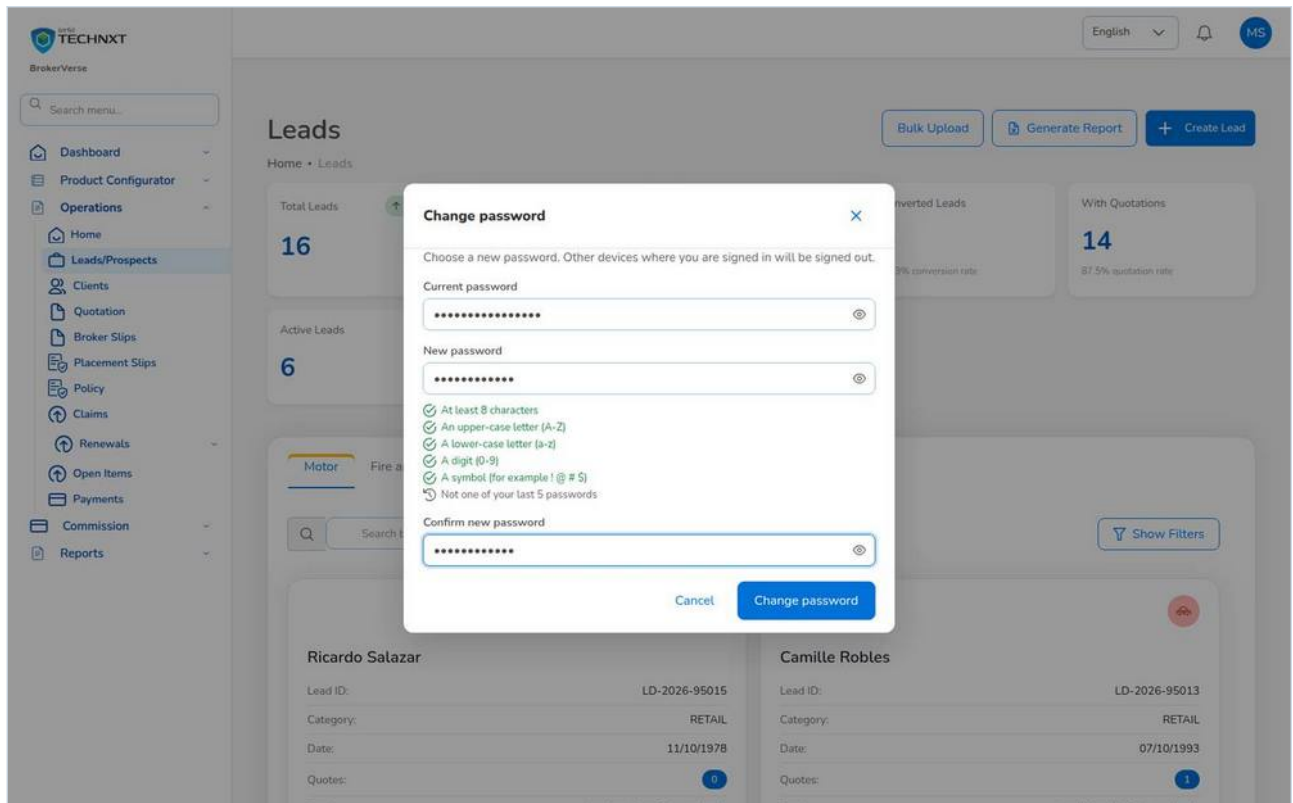

Figure 3. Profile menu > Change password (example values)

Forgot your password

1. On the sign-in page, select Forgot password?.
2. Type your User ID or e-mail address and select Send code. If the account exists and has an e-mail address, the system e-mails a 6-digit verification code to it. The message on screen is the same whether or not the account exists.
3. Type the Verification code (from the e-mail), the New password and Confirm new password, then select Reset password.
4. Select Back to sign in and sign in with the new password.

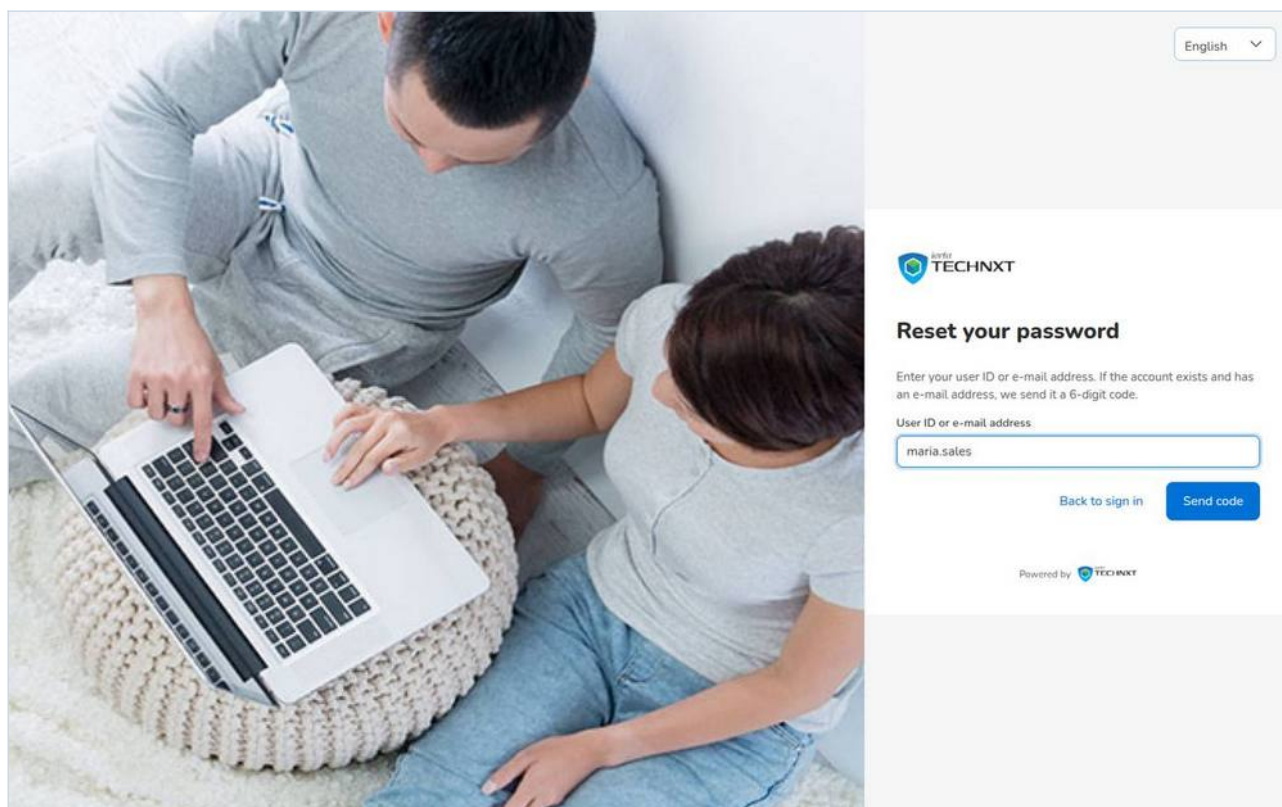

Figure 4. Forgot password: request a code

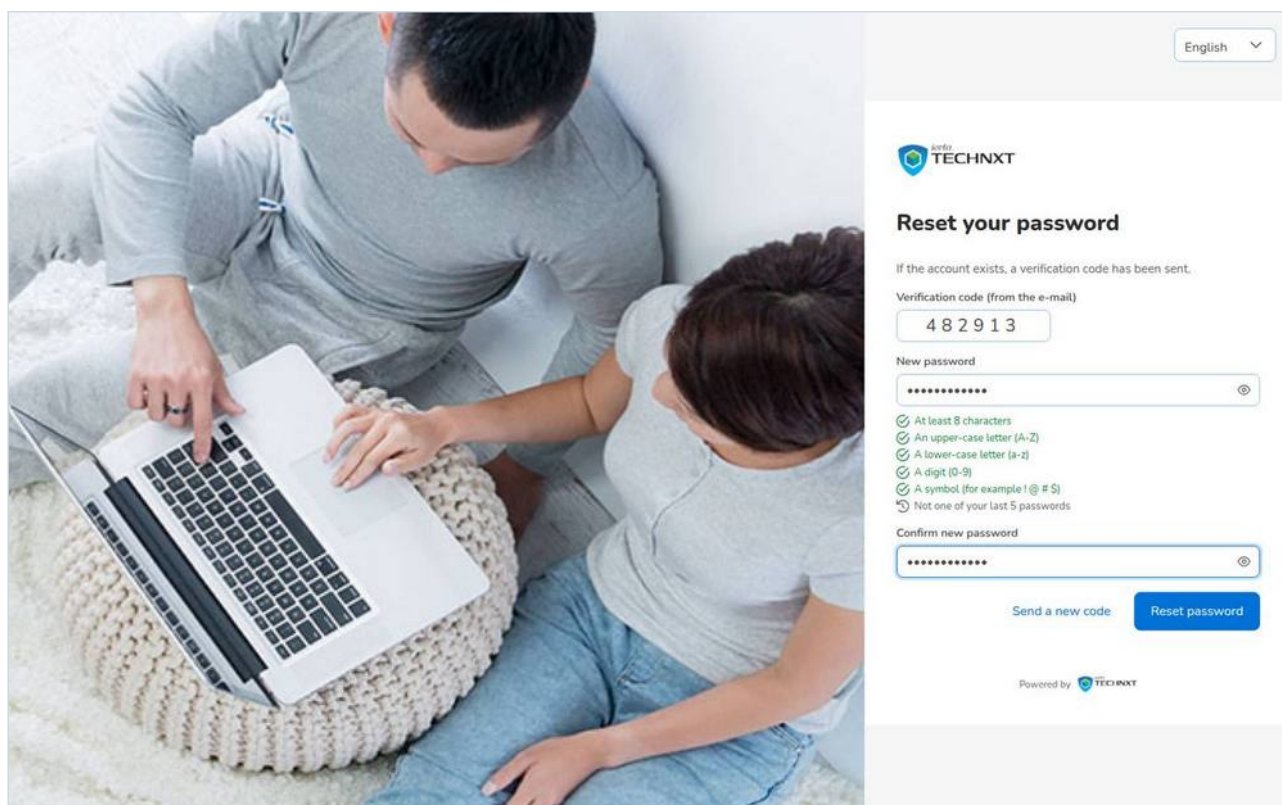

Figure 5. Forgot password: code and new password (example values)

The code is valid for 15 minutes (`security.reset_code_minutes`). After 5 wrong codes it is withdrawn and you ask for a new one. Resetting the password signs you out everywhere. If your user has no e-mail address, ask the System Administrator to reset the password for you.

Failed sign-ins and locked accounts

A wrong user ID or password shows a message under the Login button. After 5 failed attempts in a row the account is locked (`limits.max_login_attempts`) and the message reads Account locked. Contact the administrator. The system also allows only 10 sign-in attempts in 5 minutes from one computer and for one user name (`security.login_rate_limit`). To release a locked user, the System Administrator uses Unlock on the user list (Chapter 23).

Two-factor authentication

Two-factor authentication (two-step verification) adds a 6-digit code from an authenticator app on your phone, such as Google Authenticator or Microsoft Authenticator. Anyone can turn it on for their own user. The System Administrator can make it compulsory for roles with `security.require_2fa_roles`. No role requires it in the delivered configuration; iorta TechNXT recommends it for the System Administrator, Accounting and Accounting Manager roles.

To turn it on:

1. Select your initials at the top right, then Two-factor authentication. The dialog shows whether it is on or off.
2. Select Turn on.
3. In the authenticator app, add an account and type the setup key shown on the screen. On the phone itself you can open the link to the authenticator app instead.
4. Type the 6-digit code the app shows in Authentication code and select Turn on.

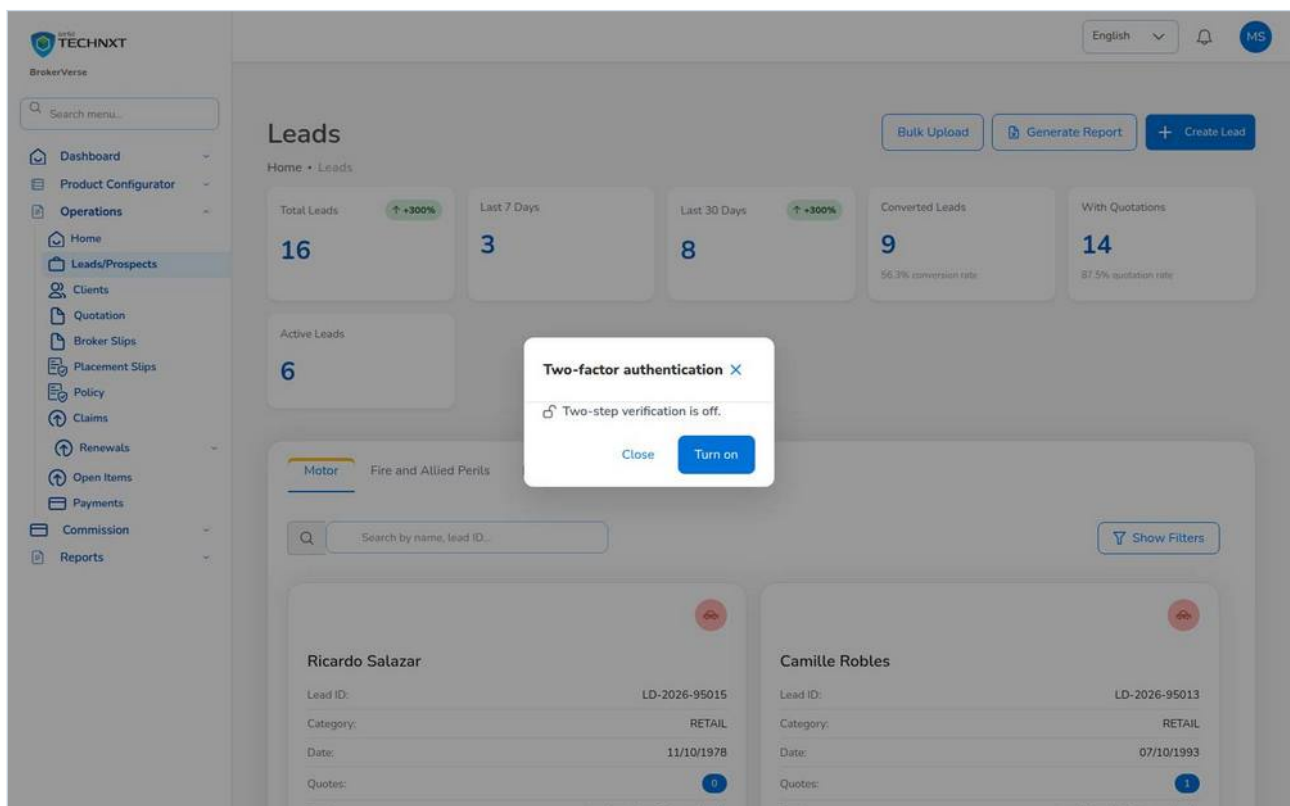

Figure 6. Profile menu > Two-factor authentication: status

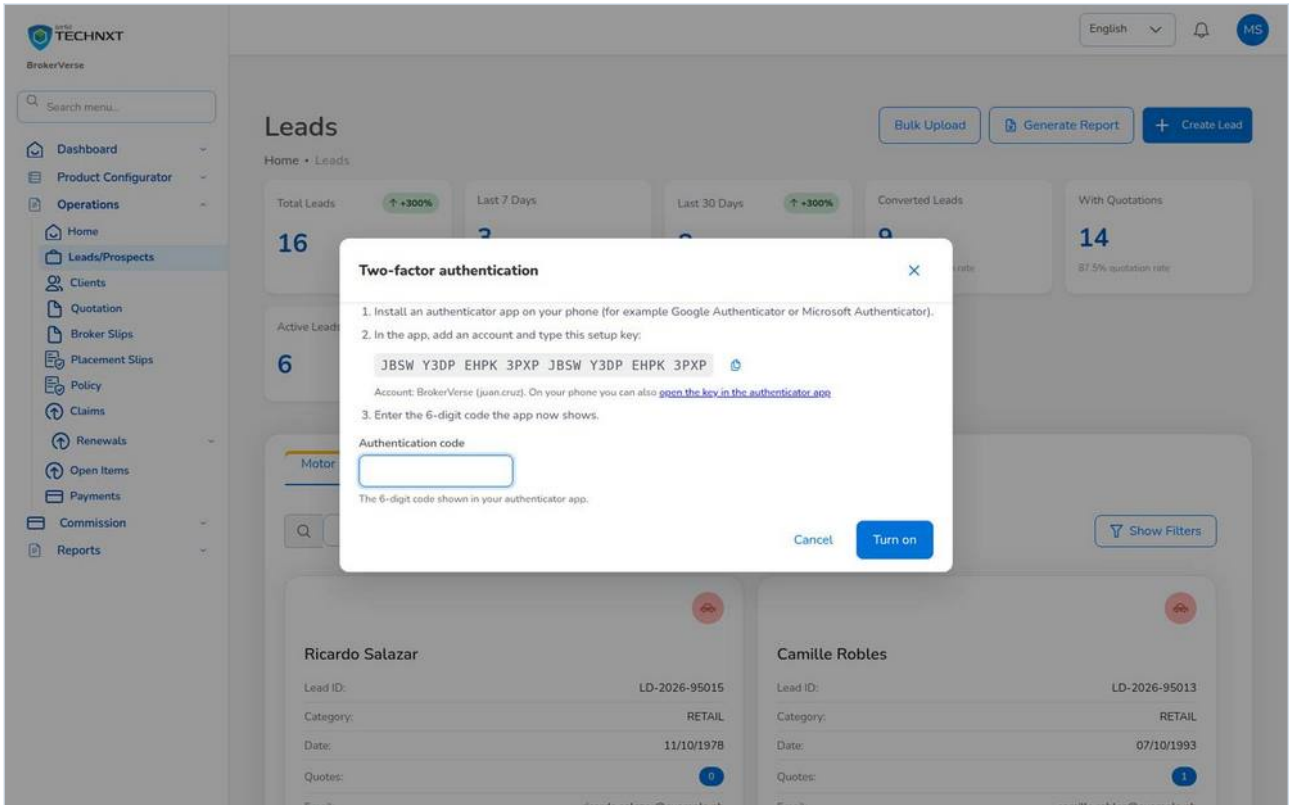

Figure 7. Turning on two-factor authentication: setup key and code (example key)

From then on the sign-in page asks for the Authentication code after the password. The code changes every 30 seconds and the page waits 5 minutes for it.

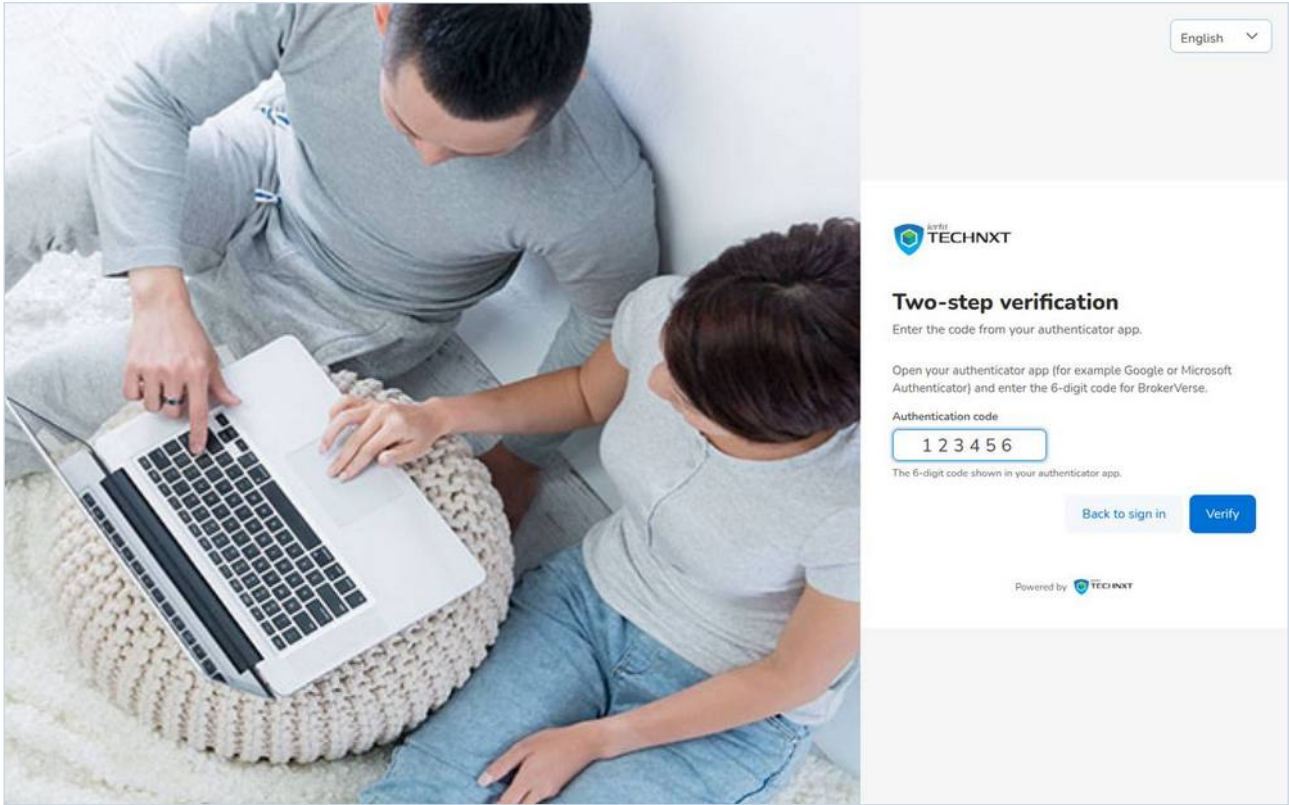

Figure 8. Sign-in: two-step verification code (example code)

If your role requires two-factor authentication and you have not set it up, the sign-in page shows Set up two-step verification after the password. Follow the same steps; when the code is accepted you are signed in.

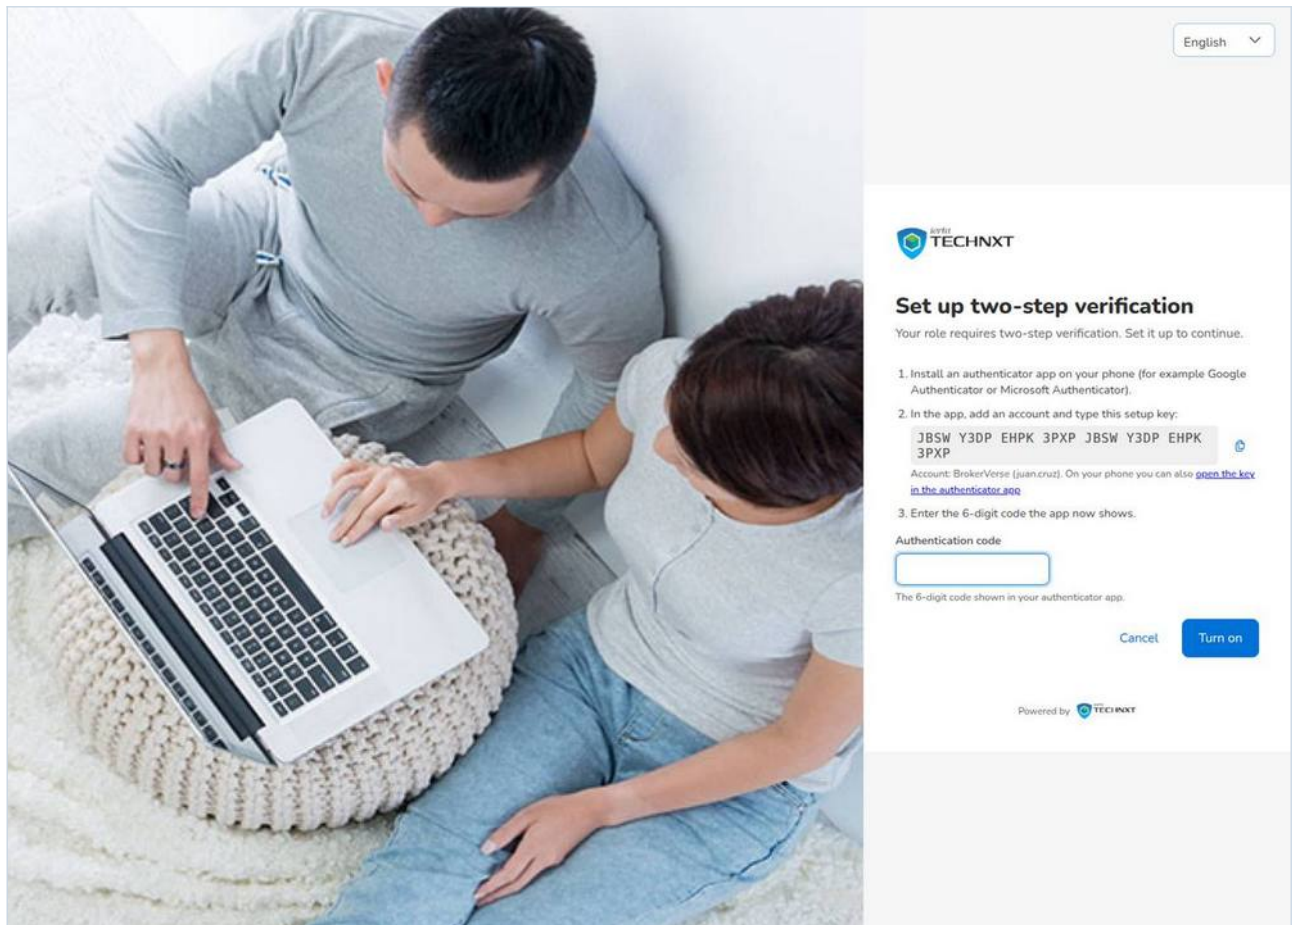

Figure 9. Sign-in: required set-up of two-step verification (example key)

To turn it off, open Two-factor authentication from the profile menu, select Turn off and enter a current code. A role that requires it cannot turn it off. If you lose your phone, the System Administrator turns it off for your user and you set it up again.

Automatic sign-out

After 30 minutes without activity the system signs you out (`limits.session_idle_minutes`). A warning appears one minute before. Move the mouse or press a key to stay signed in. Anything not saved on the screen is lost at sign-out, so save before you leave your desk. Your session also ends when your password is changed or reset, when your user is deactivated or when your role changes.

To sign out yourself, select your initials at the top right, then Logout.

2.2 The screen layout

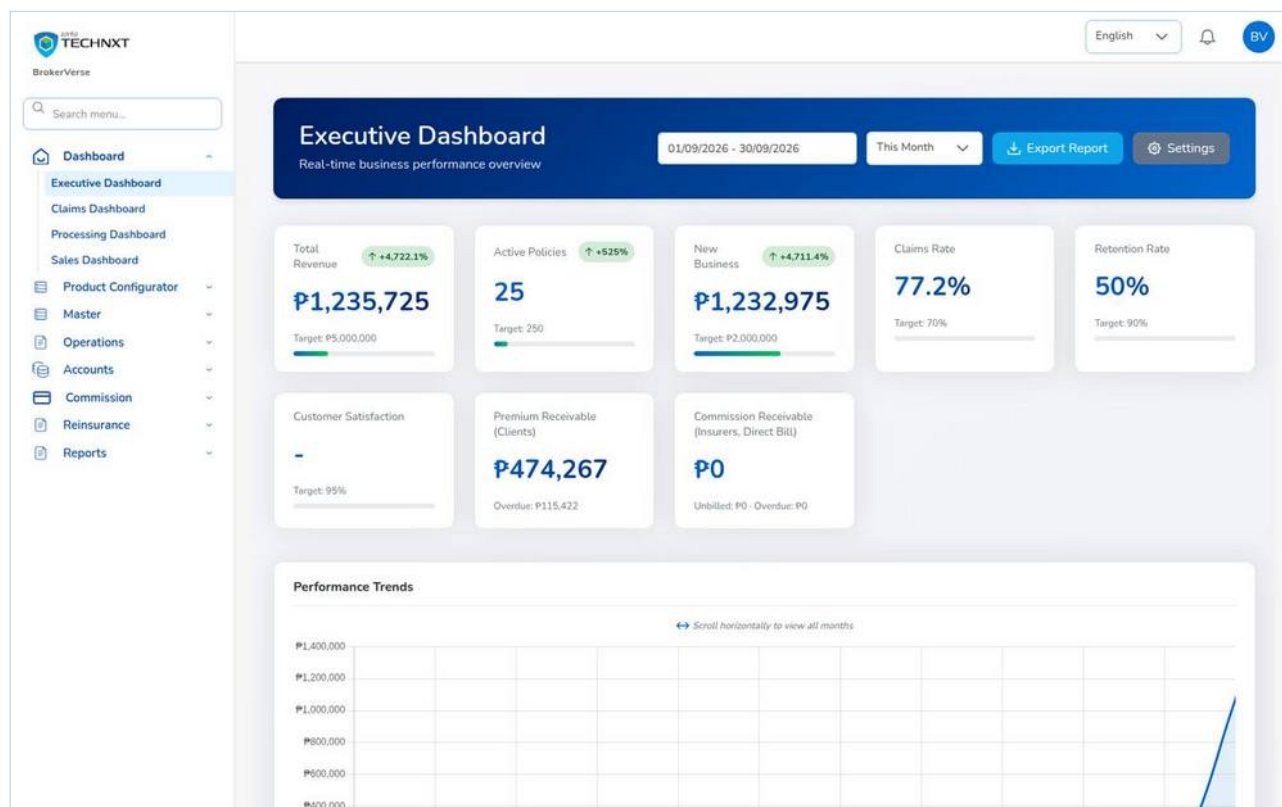

Figure 10. Screen layout: sidebar menu on the left, top bar with language, notifications and profile, work area on the right

Area	What it does
Logo and name	The logo and application name from Master > System Settings. The delivered system shows the iorta TechNXT logo and the name BrokerVerse.
Search menu...	Type part of a screen name, for example reconcil. The list shows each matching screen with its menu path. Select one to open it.
Sidebar menu	The modules your role may use. Select a module to open its items.
Language	The screen language.
Notification bell	The number of unread notifications. Select the bell to see the latest.
Profile (your initials)	Profile, Change password, Two-factor authentication, Help and Logout.
Work area	The screen you opened, with its title and breadcrumb.

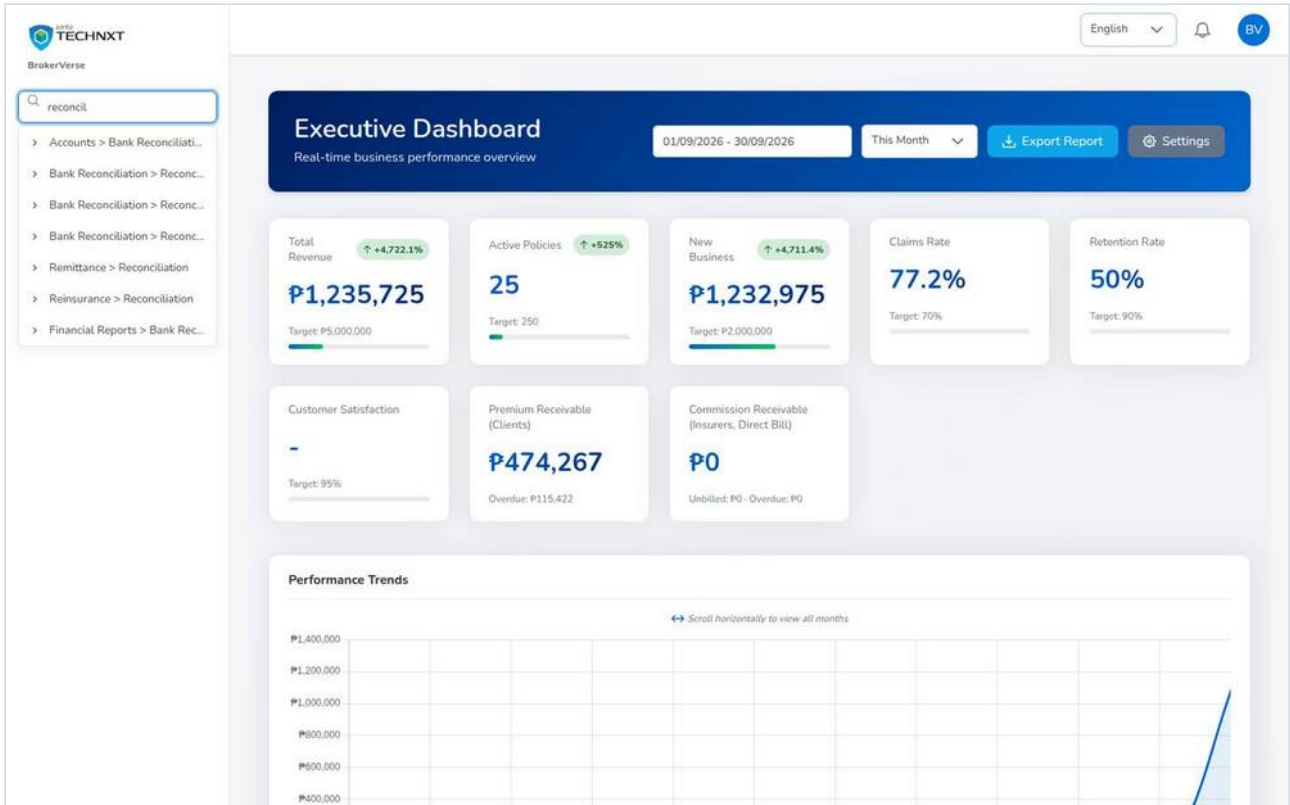

Figure 11. Menu search: typing "reconcil" lists every reconciliation screen

Notifications

The system notifies you when something needs your action: a payment to verify, a quotation to process, a claim settlement to approve, a close run waiting for approval. Approval requests go only to users who may approve them.

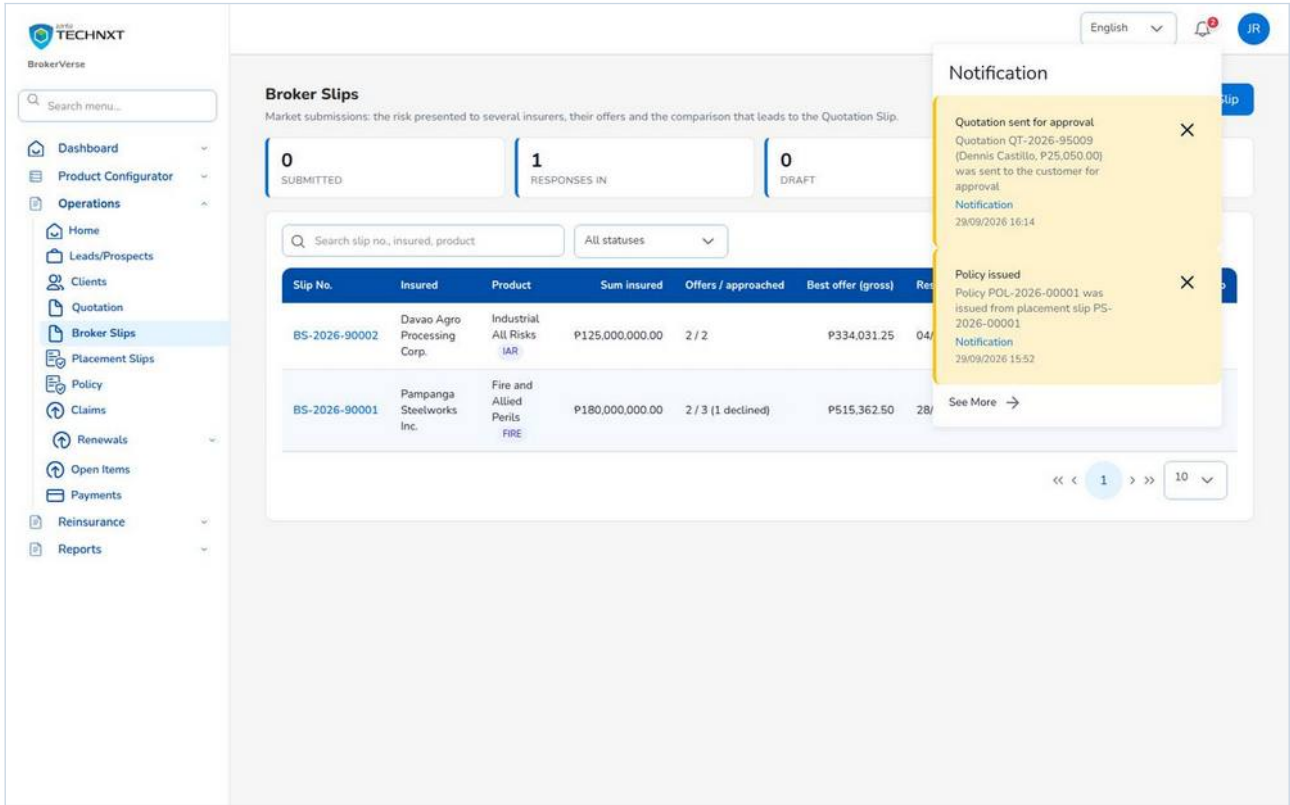

Figure 12. Notification panel opened from the bell

Select the bell to see the latest notifications with their type and time. Select See More to open the full Notification page. Select the X on a notification to remove it from the panel.

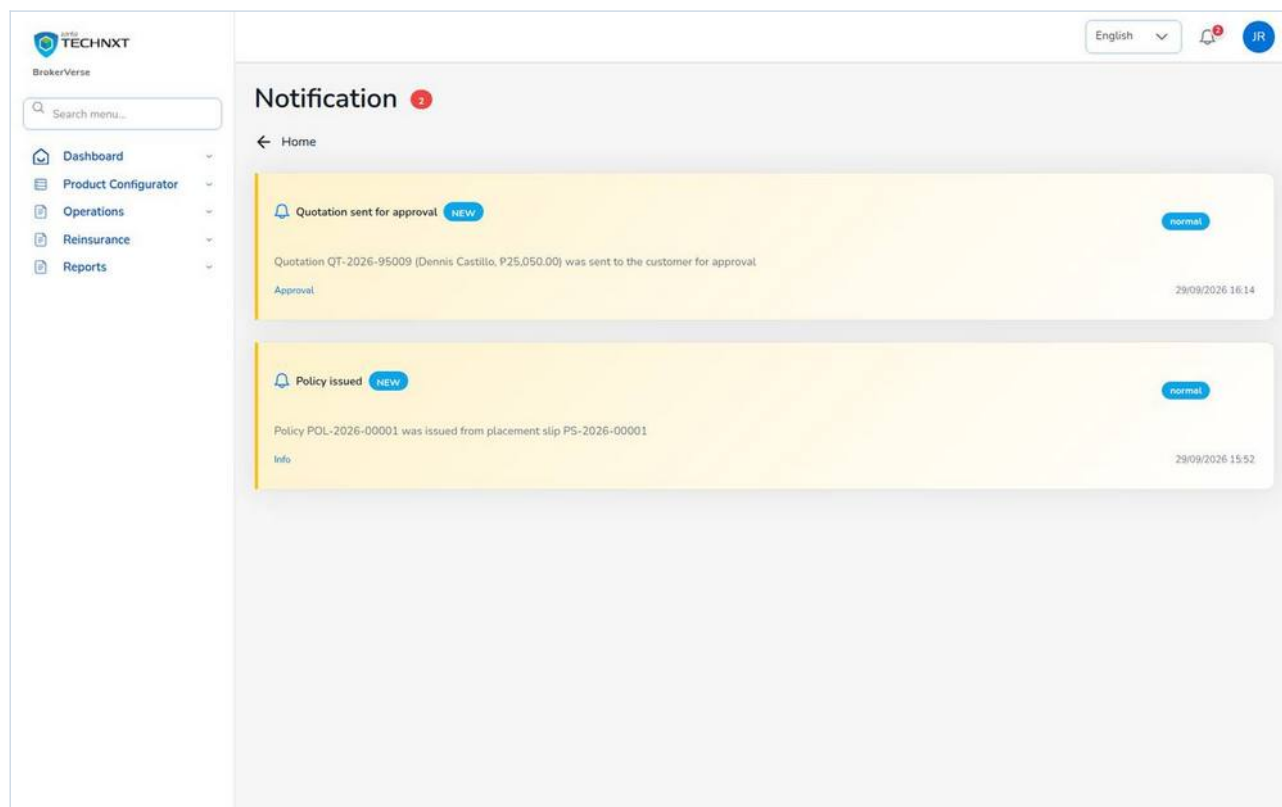

Figure 13. The Notification page

Your profile

Select your initials, then Profile, to see your name, e-mail address and contact details. Select Edit Profile to correct them.

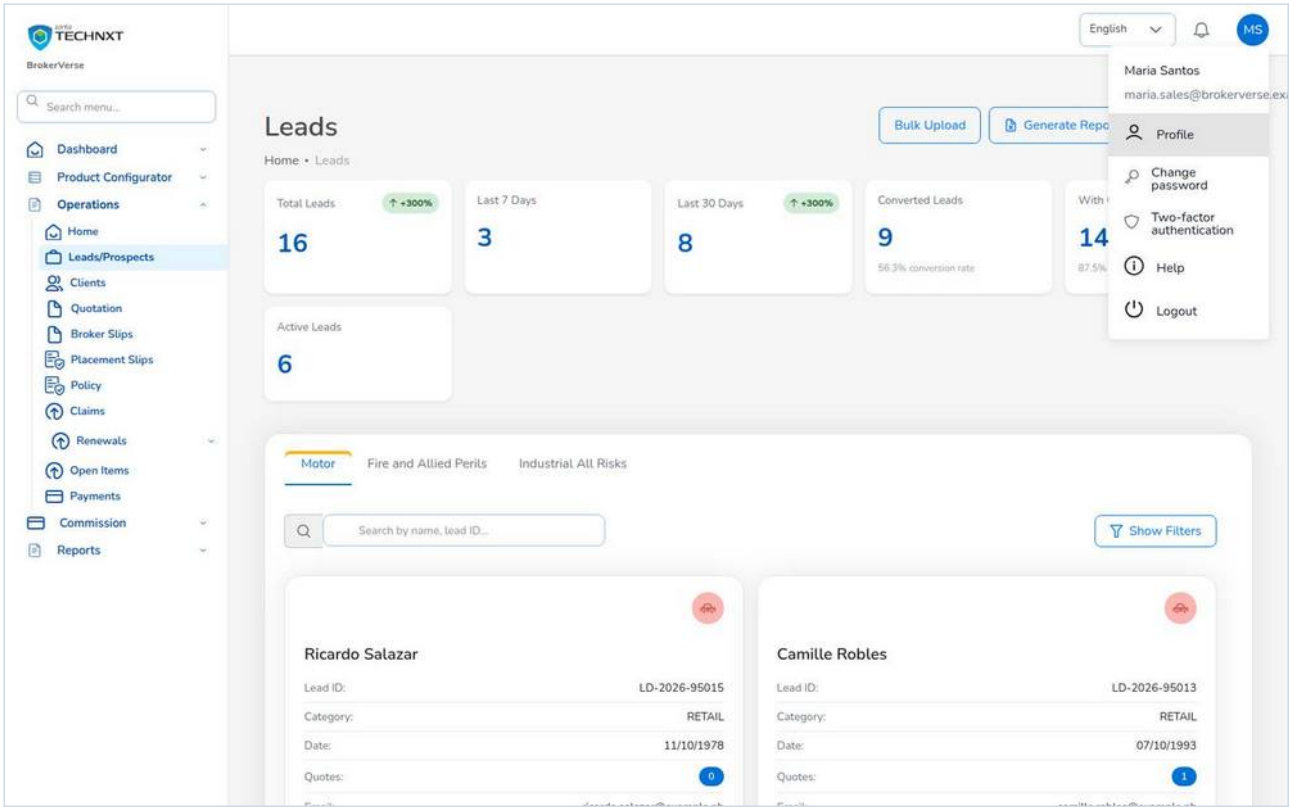

Figure 14. The profile menu

Working with lists

Most screens open with a list, and the lists work the same way everywhere. Type in the search box to filter. Use Show Filters, where offered, for status, dates, insurer or amount. Page through the list with the arrows at the bottom and change Rows per page to see more. Row actions sit at the end of the row: the eye or arrow opens the record, the pencil edits it, and the three dots open more actions. Status tags are green for completed or active, amber for pending and red for rejected or overdue.

2.3 Roles and menus

Your role decides which menus you see and which screens you may open. The server checks the same permissions on every request, so a screen missing from your menu is also refused if someone types its address.

Role (user in the screenshots)	Menus	Landing page
System Administrator (bea.admin)	Every menu.	Executive Dashboard
Sales & Marketing (maria.sales)	Dashboard: Executive Dashboard, Sales Dashboard. Product Configurator: Dashboard, Product Templates. Operations: all items. Commission: Commission Dashboard. Reports: All Reports, Operational Reports.	Executive Dashboard
Processing Team (jose.uw)	Dashboard: Processing Dashboard, Executive Dashboard. Product Configurator: all items. Operations: all items. Reinsurance: all items. Reports: All Reports, Operational Reports.	Executive Dashboard

Role (user in the screenshots)	Menus	Landing page
Operations (ana.cs)	Dashboard: Executive Dashboard. Product Configurator: Dashboard, Product Templates. Operations: all items. Reports: All Reports, Operational Reports.	Executive Dashboard
Claims (carlo.claims)	Dashboard: Claims Dashboard. Operations: Home, Clients, Policy, Claims. Reinsurance: Claims Recovery. Reports: All Reports, Operational Reports.	Claims Dashboard
Accounting (liza.finance)	Dashboard: Executive Dashboard. Operations: Open Items, Payments. Accounts: all items including Period End, Tax and Bank Reconciliation. Master > Finance: Taxation, Close Checklist, Bank Statement Formats, Bank Transaction Types. Commission: all items. Reinsurance: Reconciliation. Reports: All Reports, Financial Reports, Operational Reports > Remittance and Broker Commission.	Executive Dashboard
Accounting Manager (rosa.acctmgr)	The same menus as Accounting.	Executive Dashboard

"Operations: all items" means Home, Leads/Prospects, Clients, Quotation, Broker Slips, Placement Slips, Policy, Claims, Renewals, Open Items and Payments.

The Accounting Manager holds the Accounting role as well, so the menus are the same. The difference is in the approvals: only the Accounting Manager approves a month-end or year-end close and a bank reconciliation, reopens a period and posts into a soft-closed period.

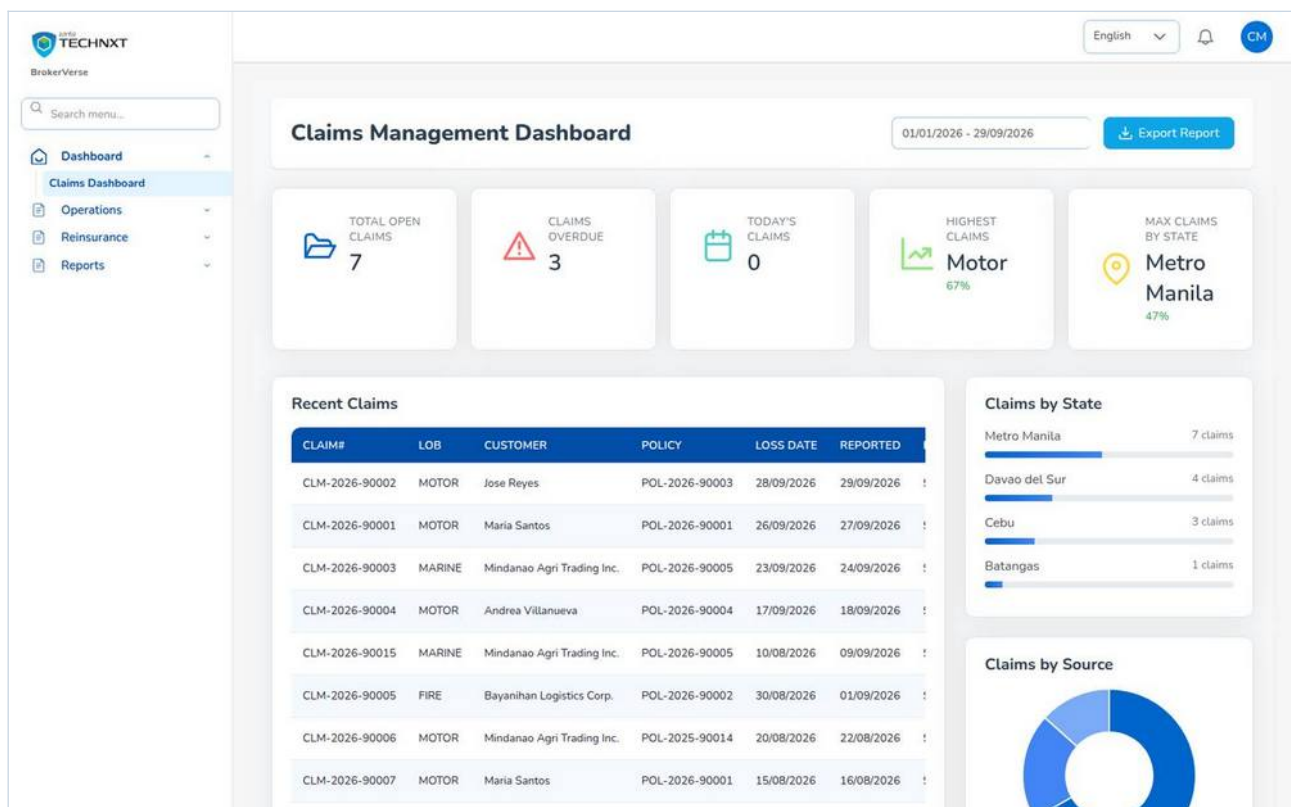

Figure 15. Landing page of the Claims role (carlo.claims): the Claims Dashboard and the Claims menu

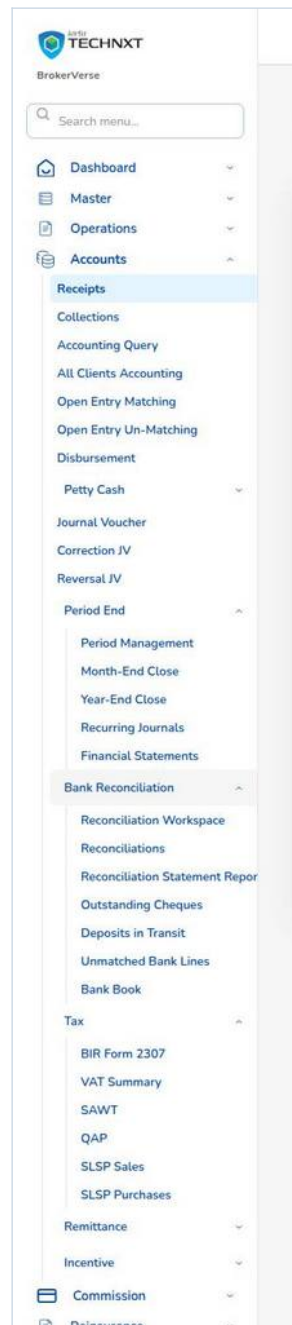

Figure 16. The Accounting menu with Period End, Tax and Bank Reconciliation opened

If you type the address of a screen your role may not open, the system shows Not authorised. Choose a screen from your menu instead. Buttons that lead to a screen outside your role are not shown.

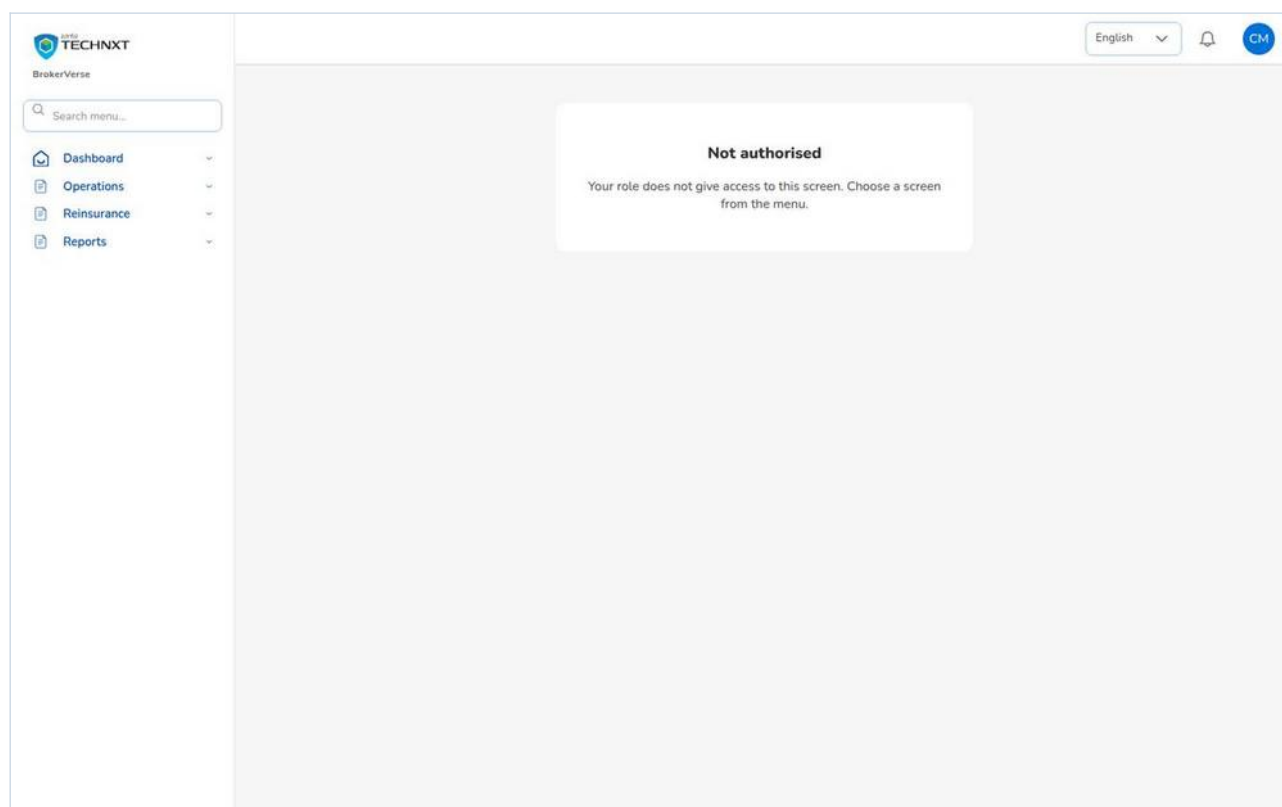

Figure 17. Not authorised: a Claims user opening Accounts > Receipts

2.4 Philippine formats

Item	Format and rule
Currency	Philippine peso (PHP, ₱) with two decimals, for example ₱ 1,450,000.00.
Dates	DD/MM/YYYY, for example 29/09/2026 (<code>general.date_format</code>). Business time zone Asia/Manila (<code>general.timezone</code>).
Mobile numbers	0917 123 4567, +63 917 123 4567 or 9171234567. The system stores 09171234567.
ZIP code	4 digits, for example 1226 (Makati).
TIN	Required for corporate prospects and on the Company master for the letterhead.
Government ID (KYC)	PhilSys ID, UMID, Passport, Driver's License, PRC ID, SSS ID, GSIS ID, TIN ID, Postal ID, Voter's ID or Senior Citizen ID (<code>policy.kyc_id_types</code>).
Taxes on premium	VAT 12%, documentary stamp tax (DST) 12.5%, local government tax (LGT) 0.75%, fire service tax (FST) 2% for fire and IAR (<code>tax.*</code> , <code>premium.taxes_by_lob</code>).
Withholding tax	Expanded withholding tax on commission paid to agents and referrers (5% individual, 10% corporate or external), and the 10% the insurer withholds on direct-bill commission, certified on BIR Form 2307.

3 The broking cycle

3.1 Overview

Every piece of business passes through the same steps. Each step is done on its own screen, usually by a different team, and each leaves a numbered document behind.

#	Step	What happens	Who	Screen
1	Lead	The prospect is recorded with contact details and address. Number LD-.	Sales & Marketing, Operations	Operations > Leads/Prospects
2	Broker Slip	The risk is presented to several insurers. Each insurer's offer or decline is recorded and the offers are compared. Numbers BS- and OFR-.	Processing Team	Operations > Broker Slips
3	Quotation Slip	The chosen terms are priced for the client: net premium, taxes, gross premium and commission. The client accepts online. Number QT-.	Sales & Marketing, Processing Team	Operations > Quotation
4	Placement Slip	The firm order goes to the lead insurer and any co-insurers. Each insurer confirms its share with its policy or certificate number. Number PS-.	Processing Team	Operations > Placement Slips
5	Policy issue	The policy is issued with its participants, the client record is created and the premium is billed. Numbers POL-, CL- and INV-.	Processing Team	Placement Slips > Issue Policy, or Convert Policy for motor
6	Payment capture	The client's payment is recorded for Accounting to verify.	Operations, Sales & Marketing, Processing Team	Policy > Proceed to Payment
7	Official receipt	Accounting posts the official receipt OR- against the open bill.	Accounting	Accounts > Receipts
8	Commission	Referrer commission becomes payable when the premium is collected and is paid by payment voucher PV- less withholding tax.	Accounting (maker and checker)	Commission > Agents/Referrer Accounts
9	Remittance	Collected premium, net of the broker's commission, is remitted to each insurer by its share. Numbers REM-, SET-, PV-.	Accounting (maker and checker)	Accounts > Remittance
10	Endorsement	A change to the policy is recorded and additional or return premium is billed. Number END-.	Operations, Processing Team	Operations > Policy
11	Claim	A loss is registered, followed with the insurer and settled. Number CLM-.	Claims	Operations > Claims
12	Renewal	Policies enter the renewal pipeline 90 days before expiry and notices go out at 60, 30 and 15 days.	Operations, Sales & Marketing, Processing Team	Operations > Renewals
13	Month-end	Bank reconciliation, the month-end close, BIR reports. Numbers BRC-, MEC-, CWT-.	Accounting, Accounting Manager	Accounts > Bank Reconciliation, Period End, Tax

3.2 The placement journey by line of business

Not every line uses every step. A private car is usually quoted and issued straight from a Quotation Slip. A fire or industrial all risks account is normally marketed with a Broker Slip and must be bound with a Placement Slip before the policy is issued. The journey of each line is set in `placement.journey` (Master > Configuration, group Placement). The delivered set-up is:

Line of business	Broker Slip	Quotation Slip	Placement Slip	Record Issued Policy
Motor	Optional	Required	Optional	Optional
Fire, IAR, Marine, Casualty, Engineering	Optional	Optional	Required	Optional
Other lines (default)	Optional	Optional	Optional	Optional

Required means the policy cannot be issued without that step. The screens show the journey that applies to each record as a progress bar (Broker Slip, Quotation Slip, Placement Slip, Policy), and a step that is not used is labelled Not used. The system refuses a step that the journey does not allow, with a message that names the line.

3.3 Maker-checker points

Maker-checker means the person who enters a transaction cannot approve it. The system refuses the approval with a message when the maker tries.

Transaction	Maker	Checker	Setting
Quotation approval	The quotation's creator	Another user; the Processing Team is notified	<code>workflow.quote_maker_checker</code>
Claim settlement	Claims user who submits it	Another Claims user	<code>claims.settlement_maker_checker</code>
Journal voucher	Accounting user who submits it	Another Accounting or Accounting Manager user	<code>journal.require_approval</code> , <code>finance_maker_checker_enabled</code>
Payment voucher, cheque, commission payout	Accounting	Another Accounting user	<code>finance_maker_checker_enabled</code>
Remittance, settlement, adjustment	Accounting	Another Accounting user, level by amount	<code>remittance.approval_levels</code>
Direct-bill debit note	Accounting	Another Accounting user	built in
Month-end close, year-end close	Accounting	Accounting Manager	<code>accounting.period_close_requires_approval</code>
Bank reconciliation	Accounting	Accounting Manager	built in
Renewal terms	Operations or Sales & Marketing	Processing Team	<code>renewals_maker_checker</code>
Reinsurance treaty	Creator	Another user	<code>reinsurance.treaty_requires_approval</code>
Incentive calculation batch	Accounting	Another Accounting user	built in

3.4 The money trail of a co-insured policy

This example follows POL-2026-00001, an industrial all risks policy for Davao Agro Processing Corp. It was marketed on Broker Slip BS-2026-90002 and placed on Placement Slip PS-2026-00001 with Malayan Insurance Co., Inc. as lead (60%) and Standard Insurance Co., Inc. as co-insurer (40%). Sum insured ₱ 125,000,000.00, net premium ₱ 262,500.00, commission 15%.

Item (P)	Malayan (lead, 60%)	Standard (40%)	Total
Sum insured	75,000,000.00	50,000,000.00	125,000,000.00
Net premium	157,500.00	105,000.00	262,500.00
Taxes (VAT, DST, LGT, FST)	42,918.75	28,612.50	71,531.25
Gross premium	200,418.75	133,612.50	334,031.25
Commission (15% of net)	23,625.00	15,750.00	39,375.00

When the policy was issued, the system raised one bill to the client for ₱ 334,031.25 and posted journal JV-2026-00087:

Account	Debit (P)	Credit (P)
1202001 Premiums Receivable - Direct Clients	334,031.25	
2201001 Premiums Payable to Insurers (Malayan 137,025.00; Standard 91,350.00)		228,375.00
2201002, 2201003, 2201004 Premium VAT, DST and LGT due to insurers		66,281.25
3201001 Brokerage Commission Income (Malayan 23,625.00; Standard 15,750.00)		39,375.00

Each payable and commission line carries the insurer, so the remittance, the Due to Insurers by Co-insurer report and the Co-insurance Register show each insurer's part. The rounding difference of a share split, if any, goes to the lead insurer.

Later steps follow the same pattern. The official receipt debits Cash in Bank and credits Premiums Receivable. The remittance to each insurer debits its payable and credits Cash in Bank. A claim settled through the broker books the amount recoverable from each insurer by its share.

3.5 Direct bill

In direct bill the client pays the premium to the insurer. The broker does not bill premium; it bills its commission plus 12% VAT to the insurer with a commission debit note (DN-). The insurer pays the commission net of 10% expanded withholding tax and sends BIR Form 2307. The billing mode is chosen at issue and defaults from the insurer's Default Billing Mode, then from `direct_bill.default_billing_mode` (broker billed).

Event	Journal
Policy issued as direct bill	Dr Commission Receivable - Insurers (Direct Bill) / Cr Brokerage Commission Income and Output VAT Payable
Debit note raised and approved	No journal; the commission is now on a debit note
Insurer pays	Dr Cash in Bank and Creditable Withholding Tax (BIR 2307) / Cr Commission Receivable - Insurers

No premium bill, collection reminder or remittance is created for a direct-bill policy.

3.6 Key business rules

- The server prices every quotation again from the configured rates and taxes. A premium changed in the browser is refused.
- Co-insurance shares must total exactly 100% with exactly one lead insurer.
- A policy on a line that requires a Placement Slip cannot be issued until every participating insurer has confirmed.
- A motor policy cannot be issued without the government ID (type, number and image), chassis number, motor number and plate or MV file number.
- A claim is refused when the date of loss is outside the policy period or in the future, and while premium is unpaid (`claims.block_unpaid_premium`).
- Commission becomes payable only when the premium is fully collected (`commission.require_full_payment`), and only to referrers with a bank account on file.
- Only Accounting posts official receipts. Other roles record the client's payment for Accounting to verify.
- Postings into a soft-closed period are accepted only from the Accounting Manager. Closed and locked periods accept none.

4 Dashboards

4.1 Purpose

Dashboards show live figures from the policies, bills, claims and commission lines in the system. They change as soon as a transaction is saved.

Dashboard	Menu	Roles
Executive Dashboard	Dashboard > Executive Dashboard	Every role except Claims
Sales Dashboard	Dashboard > Sales Dashboard (also Operations > Home)	Sales & Marketing, System Administrator
Processing Dashboard	Dashboard > Processing Dashboard	Processing Team, System Administrator
Claims Dashboard	Dashboard > Claims Dashboard	Claims, System Administrator
Commission Dashboard	Commission > Commission Dashboard	Accounting, Sales & Marketing (Chapter 15)

4.2 Executive Dashboard

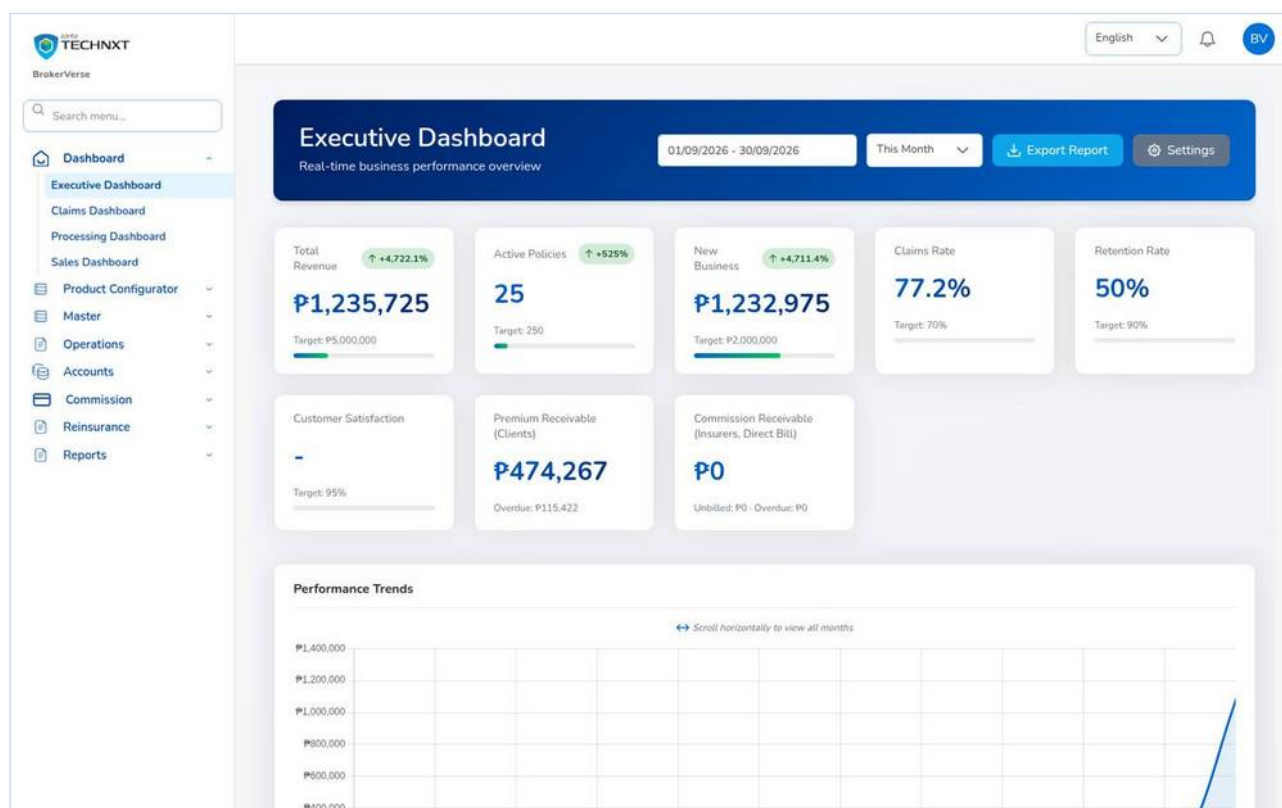

Figure 18. Executive Dashboard: key figures against target

The top of the dashboard shows the key figures against the targets set in Master > Configuration (dashboard.targets).

Card	What it shows
Total Revenue	Gross written premium in the period, with the change against the previous period.
Active Policies	Policies in force.
New Business	Premium of new, not renewed, policies in the period.
Claims Rate	Claims incurred as a percentage of premium.
Retention Rate	Renewals retained as a percentage of renewals due.
Customer Satisfaction	Shown as "-" until satisfaction scores are recorded.
Premium Receivable (Clients)	Premium billed to clients and not yet collected, with the overdue part.
Commission Receivable (Insurers, Direct Bill)	Commission billed or to be billed to insurers on direct-bill policies, with the unbilled and overdue parts.

1. Choose Dashboard > Executive Dashboard.
2. In the period list, choose This Month, This Quarter or This Year. The periods are calendar periods in Philippine time and are compared with the whole previous period.
3. To download the Production Register for a date range, choose the dates and select Export Report. The file downloads as Excel.
4. Scroll down for the charts: Performance Trends, Revenue by Product Line, Regional Performance, Top Performing Products, Top Agents Performance, Claims Status Distribution and Quick Actions.

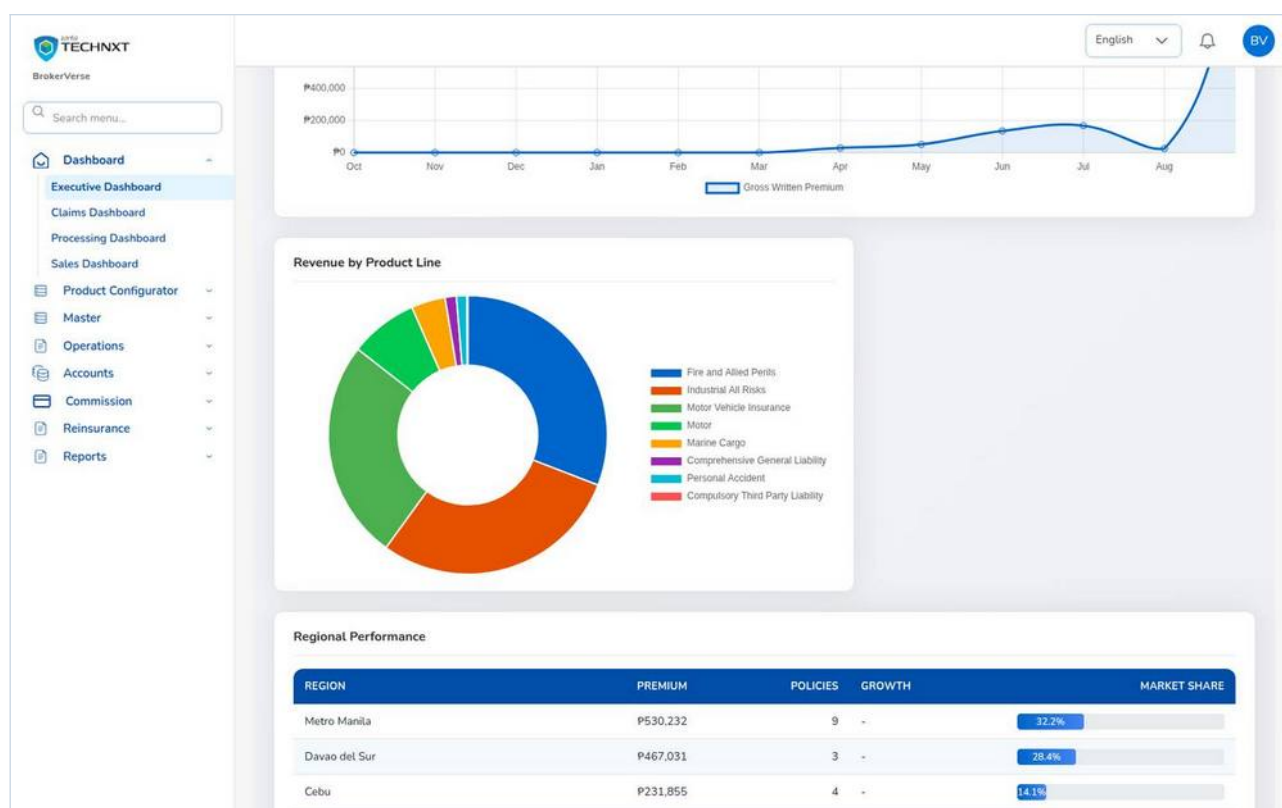

Figure 19. Executive Dashboard: trends, product lines, regions and products

The Settings button on the dashboard header opens Master > System Settings and is shown only to the System Administrator.

4.3 Sales Dashboard

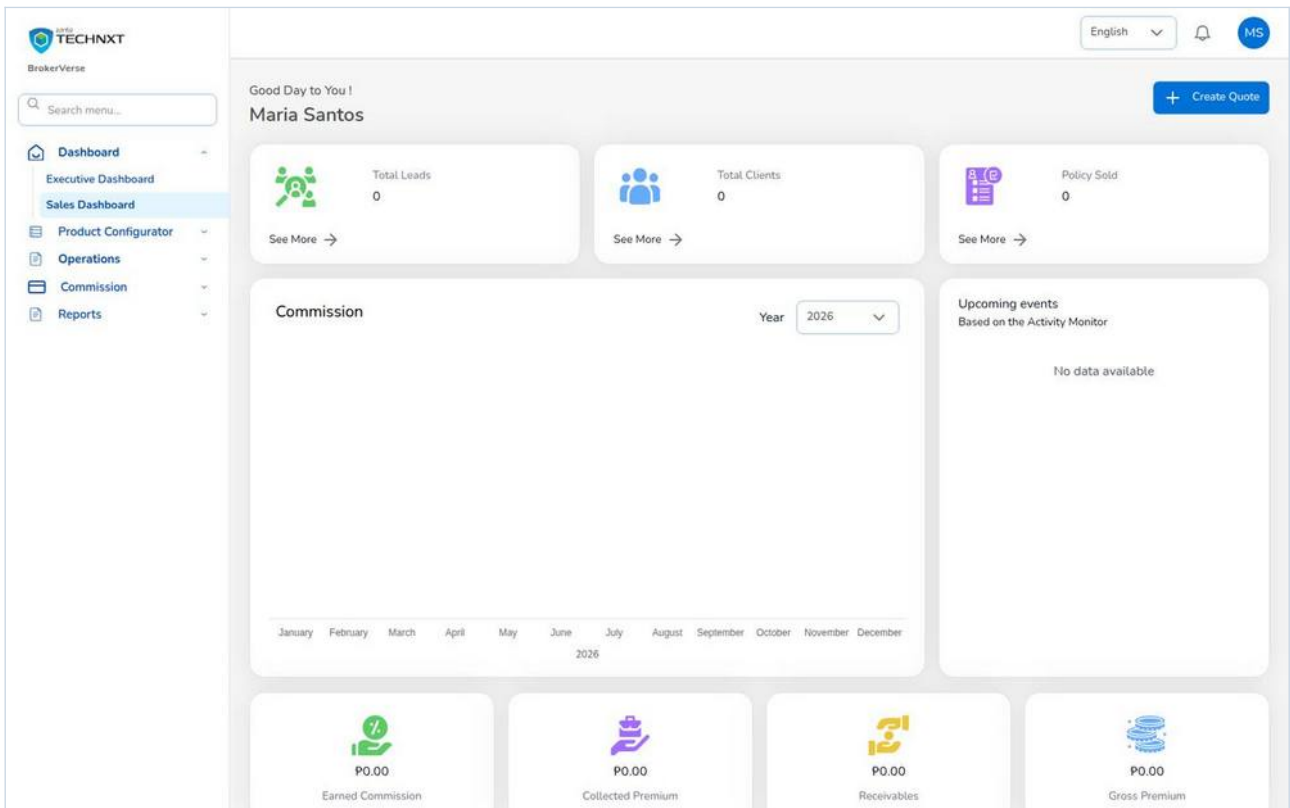

Figure 20. Sales Dashboard of maria.sales

The Sales Dashboard is the home screen of an account executive. It counts the leads, clients and policies of the signed-in user and shows Create Quote, the commission chart for the year you choose, upcoming follow-ups from the activity monitor, earned commission and the premium billed on your policies (collected, still due and total). Direct-bill policies are left out of the premium figures because their premium is paid to the insurer.

4.4 Processing Dashboard

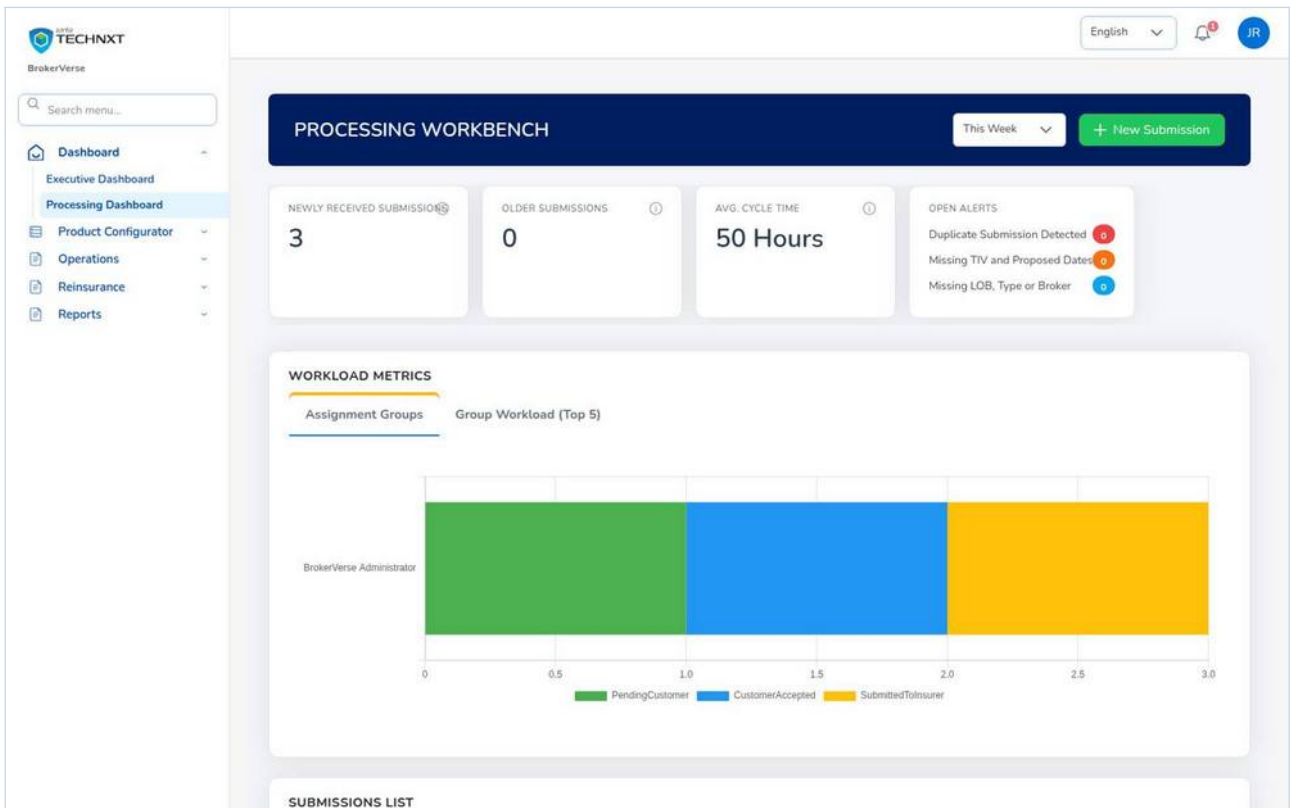

Figure 21. Processing Dashboard (Processing Workbench)

The Processing Workbench lists quotations in progress as submissions.

Section	What it shows
Newly received and older submissions	Quotations waiting for action this week and older ones.
Avg. cycle time	Average hours from submission to decision.
Open alerts	Data-quality alerts: duplicate submissions, missing sums insured or dates, missing line of business.
Workload metrics	Work by assignment group.
Submissions list	Case ID (quotation number), proposed insured, account executive, sum insured, product, next requirement due, priority and status. High priority starts at ₪ 5,000,000 sum insured (<code>dashboard.high_sum_insured</code>).
Open tasks	Quotations assigned for follow-up, with due dates.

Select New Submission to start a quotation.

4.5 Claims Dashboard

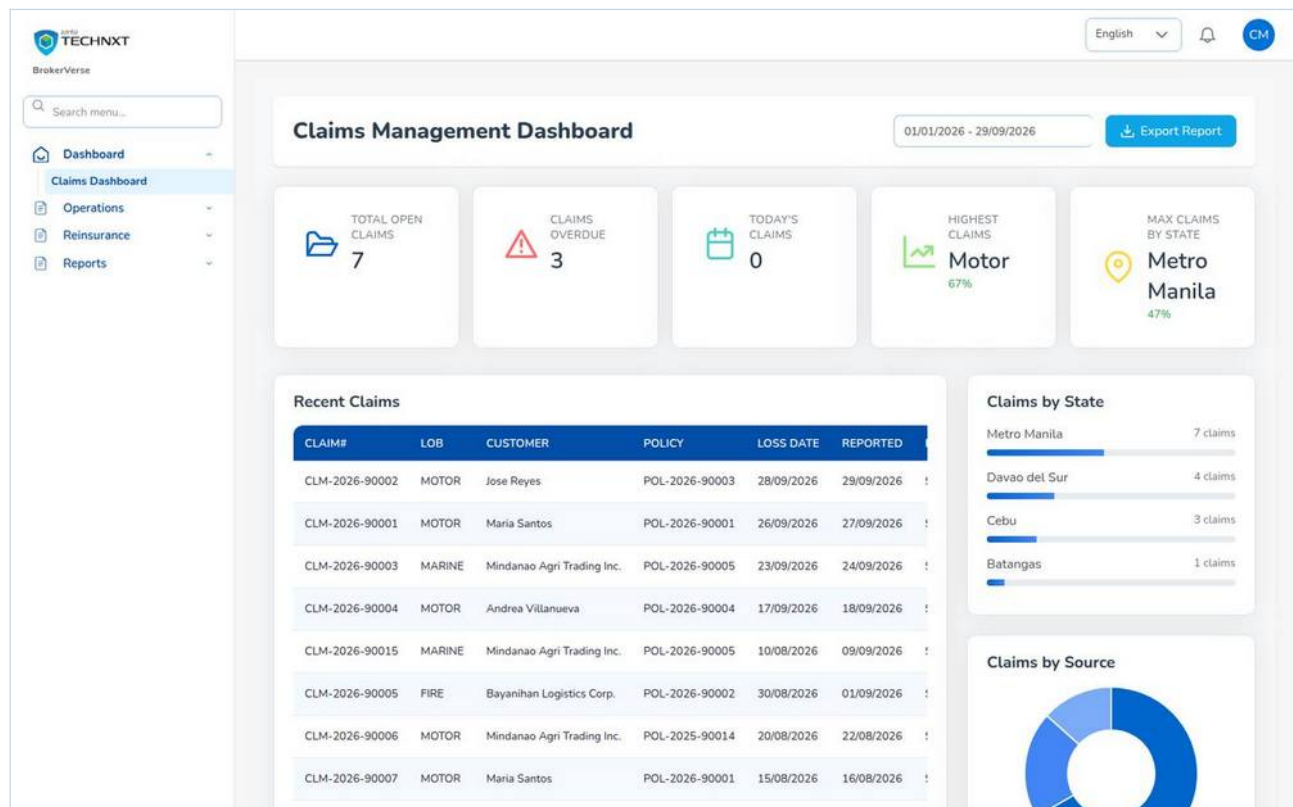

Figure 22. Claims Dashboard

1. Choose Dashboard > Claims Dashboard.
2. Read the cards: Total Open Claims, Claims Overdue (past the handling time of 20 days, `claims.sla_days`), Today's Claims, Highest Claims (line with the most claims) and Max Claims By State.
3. Open a claim from Recent Claims.
4. Choose a date range and select Export Report to download the claims data.

5 Leads and prospects

5.1 Purpose

A lead is a prospect who may buy insurance. The quotation, the client record and the policy all start from it. Each lead gets a number LD-YYYY-NNNNN. Sales & Marketing and Operations create and follow leads; the Processing Team can view them.

5.2 The lead list

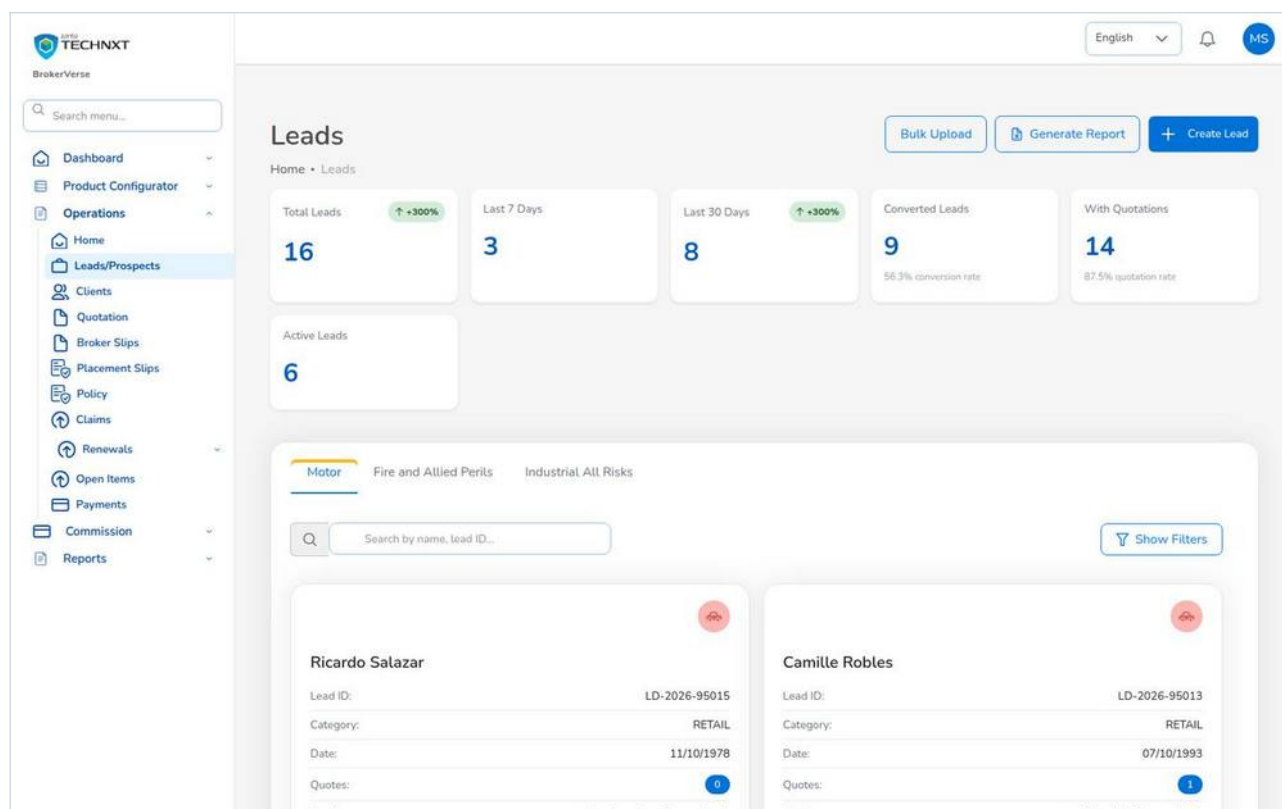

Figure 23. Operations > Leads/Prospects

Choose Operations > Leads/Prospects. The screen shows cards for Total Leads, Last 7 Days, Last 30 Days, Converted Leads, With Quotations and Active Leads; tabs by line of business; and one card per lead with its number, category, date, number of quotations and contact details, with the actions View, Edit and Delete.

5.3 Create a lead

1. Choose Operations > Leads/Prospects and select Create Lead.
2. Choose the line of business: Motor, Fire and Allied Perils, Industrial All Risks or Employee Benefit.
3. Under Select Category, choose Retail (a person) or Corporate (a company).
4. Fill in the fields below and select Save & Continue.

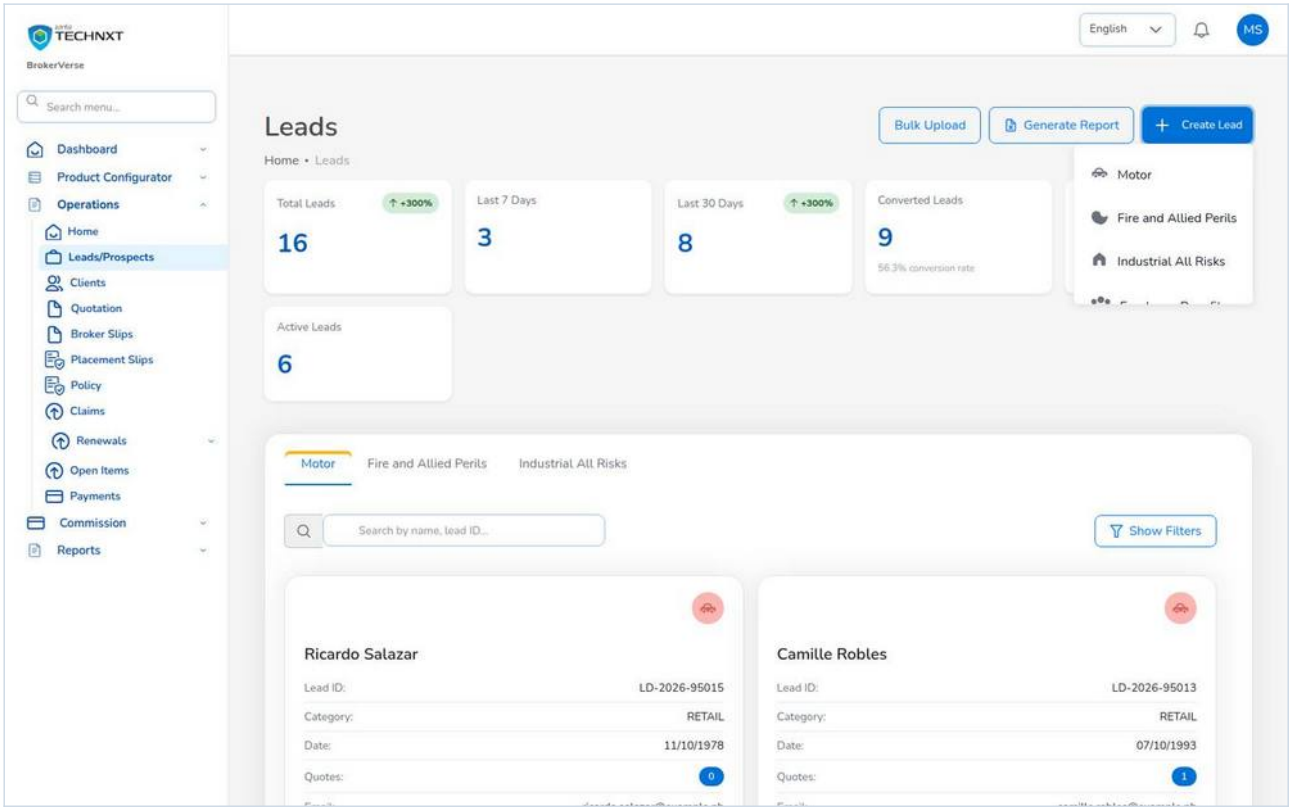

Figure 24. Create Lead: choose the line of business

Figure 25. Create Lead form for a motor prospect (example values)

Field	Meaning	Required	Rules
Category	Retail or Corporate	Yes	Corporate adds Company Name and TIN, both required.

Field	Meaning	Required	Rules
First Name, Last Name	Prospect or contact person	Yes	
Preferred Name	Name used in letters and e-mails	Yes	
Date of Birth	Date of birth	Yes	Not in the future; age 18 to 100 (<code>leads.min_age_years</code> , <code>leads.max_age_years</code>).
Gender	Male or Female	Yes	
Email ID	Quotations and approval links are sent here	Yes	A valid e-mail address.
Contact Number	Mobile number	Yes	Philippine mobile number.
Country, Province, City	Address from the location masters	Yes	Choose the country first, then the province, then the city.
ZIP Code	Postal code	Yes	4 digits.
Barangay / Subd, House No / Unit No / Street	Street address	Yes	

The system gives the lead its number and sets its status to New. Fire and IAR leads also ask for the risk location and the sums insured.

Tip: A field with a problem shows the message under it in red, for example Invalid mobile number (e.g. 0917 123 4567 or +63 917 123 4567). Correct it and select Save & Continue again.

5.4 View, edit or delete a lead

Lead Details

[Create Quote](#) [Edit](#) [Delete](#) [Back](#)

Personal Information

Lead ID: LD-2026-95015

 Date of Birth: 11/10/1978
 Gender: Male

Contact Information

Email: ricardo.salazar@example.ph
 Contact Number: +639171110015

Address Information

House No: 6 Rizal St.
 Barangay: Santo Rosario
 City: Malolos
 Province: Bulacan
 Country: Philippines
 ZIP Code: 3000

System Information

Created Date: 27/09/2026
 Last Updated: 27/09/2026
 Number of Quotes: 0

Figure 26. Lead Details with Create Quote, Edit and Delete

On the lead card, select View. Lead Details shows personal, contact, address and system information and the number of quotations. Select Edit to correct the lead, Create Quote to start a quotation (Chapter 8), or Delete to remove a lead entered by mistake. Keep leads that have quotations.

Status	Set when
New	The lead is created.
Contacted, Qualified	The lead is followed up.
QuoteGenerated	A quotation is saved for the lead.
Converted	A policy is issued from one of its quotations; the lead becomes a client.
Lost	The prospect does not buy.

5.5 Upload many leads

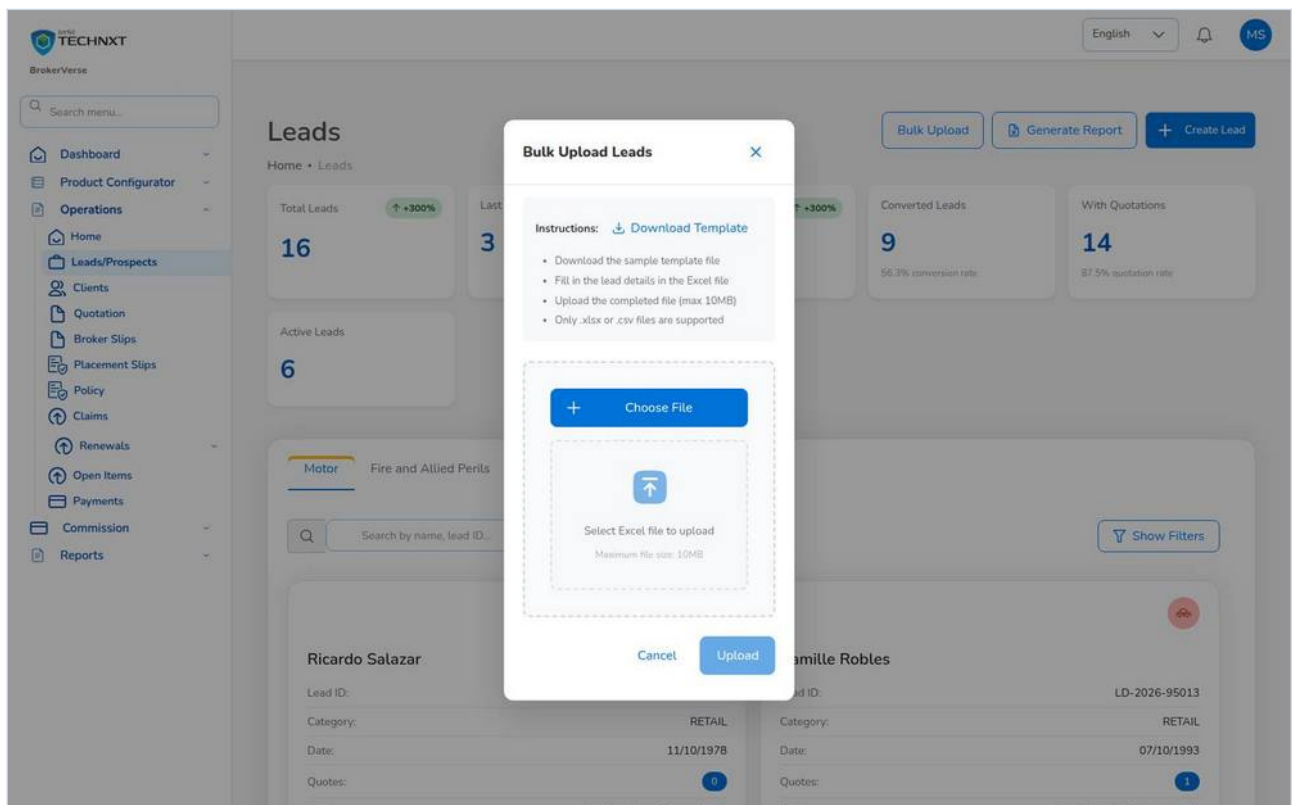

Figure 27. Bulk Upload of leads with the template download

1. Select Bulk Upload.
2. Select Download Template. Fill in one lead per row. The template is also delivered as Leads_Upload_Template.xlsx.
3. Choose the completed file (.xlsx or .csv, at most 10 MB and 1,000 rows) and upload it.

The system checks every row and reports the rows it could not load, with the reason. Correct those rows and upload them again. Generate Report downloads the lead list by category as a spreadsheet.

6 Clients

6.1 Purpose

A client is a person or company that holds or has held a policy. The system creates the client, with a client code CL-YYYY-NNNNN, when the first policy is issued. The client record shows policies, claims, renewals and endorsements in one place.

6.2 Find a client

The screenshot displays the 'Clients' page in the BrokerVerse OOTB system. The left sidebar shows the navigation menu with 'Operations' expanded and 'Clients' selected. The main content area features a 'Clients' header with a 'Create Lead' button. Below the header, there are tabs for 'All', 'Individual', and 'Corporate'. A search bar and a 'Name' dropdown are present. The table lists five clients with their details: Assured Name, Category, Client Since, Policies, Latest Policy Status, and Actions. The clients are: DAVAO AGRO PROCESSING CORP. (CORPORATE, 29/09/2026, 1 policy, ACTIVE), RAMON DELA CRUZ (INDIVIDUAL, 29/09/2026, 1 policy, ACTIVE), MARIA SANTOS (INDIVIDUAL, 29/09/2026, 2 policies, ACTIVE), TAAL LAKESIDE RESORTS INC. (CORPORATE, 29/09/2026, 2 policies, ACTIVE), and BAYANIHAN LOGISTICS CORP. (CORPORATE, 29/09/2026, 2 policies, ACTIVE). The table is filtered by 'All' and shows 5 rows per page.

Assured Name	Category	Client Since	Policies	Latest Policy Status	Actions
DAVAO AGRO PROCESSING CORP. Client Id :CL-2026-00001	CORPORATE	29/09/2026	1	ACTIVE	⌵ ⌵

MARIA SANTOS Client Id :CL-2026-90001	INDIVIDUAL	29/09/2026	2	ACTIVE	⌵ ⌵
TAAL LAKESIDE RESORTS INC. Client Id :CL-2026-90008	CORPORATE	29/09/2026	2	ACTIVE	⌵ ⌵
BAYANIHAN LOGISTICS CORP. Client Id :CL-2026-90002	CORPORATE	29/09/2026	2	ACTIVE	⌵ ⌵

Rows per page: 5 << 1 - 5 of 10 >>

Figure 28. Operations > Clients

1. Choose Operations > Clients.
2. Use the tabs All, Individual or Corporate, or type a name in the search box.
3. The list shows the name and client code, client type, Client Since or date of birth, number of policies and latest policy status.
4. Select the arrow at the end of the row to open the client.

6.3 The client view

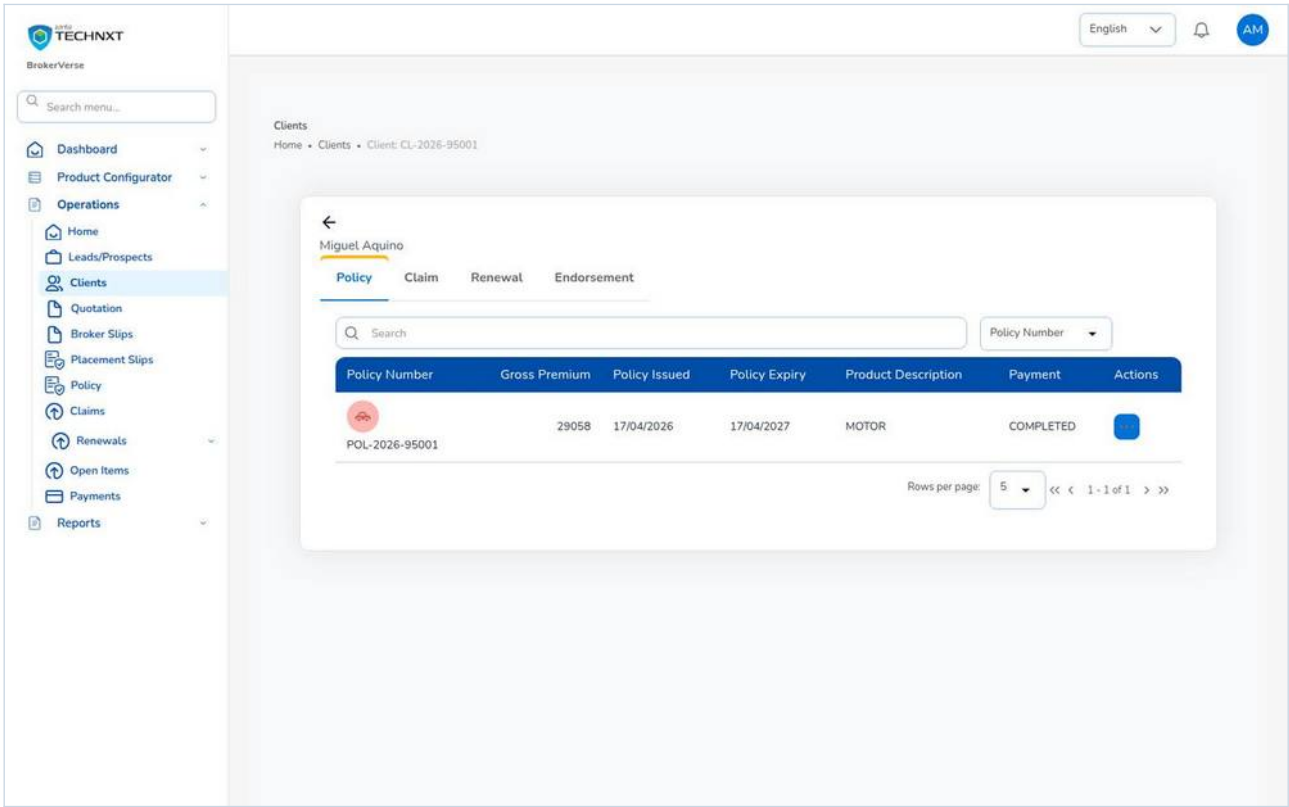

Figure 29. Client view with the Policy, Claim, Renewal and Endorsement tabs

Tab	What you see and do
Policy	The client's policies with premium, dates, product and payment status. Open a policy, or use the row actions for a claim or an endorsement.
Claim	The client's claims with status.
Renewal	Renewals due and quoted.
Endorsement	The client's endorsements with type, status and payment status.

To correct the name, address or contact details on an issued policy, raise a Personal Details Change endorsement (Chapter 10), so the change is recorded against the policy and sent to the insurer.

7 Placement: Broker Slips and Placement Slips

7.1 Purpose

Placement is the broker's core work: presenting a client's risk to the market, getting terms, choosing the security and binding the cover. BrokerVerse records each step with its own document.

Document	Number	What it is
Broker Slip	BS-YYYY-NNNNN	The risk presented to several insurers with a request for quotation.
Insurer offer	OFR-YYYY-NNNNN	One insurer's answer to a Broker Slip: its terms, or its decline.
Quotation Slip	QT-YYYY-NNNNN	The terms offered to the client, priced with taxes and commission (Chapter 8).
Placement Slip	PS-YYYY-NNNNN	The firm order to the lead insurer and co-insurers, confirmed by each of them.
Policy	POL-YYYY-NNNNN	Issued from a bound Placement Slip, from a Quotation Slip, or recorded after the insurer has issued it.

The Processing Team does this work. Sales & Marketing and Operations can open the same screens, for example to follow an account they introduced. The screens use the quotation permissions; issuing the policy also needs the policy permission.

7.2 Broker Slips

Figure 30. Operations > Broker Slips

Choose Operations > Broker Slips. The cards count the slips by status (Submitted, Responses in, Draft, Closed). Each row shows the slip number, insured, product, sum insured, offers received against insurers approached (with the number of declines), best gross offer, response due date, age and status, and the Quotation Slip made from it.

Status	Meaning
Draft	Saved, not yet sent to the market.
Submitted	Sent to the insurers; waiting for their answers.
Responses in	At least one insurer has answered.
Closed	Not taken up, closed with a reason, or turned into a Quotation Slip or Placement Slip.
Cancelled	Withdrawn with a reason.

Create a Broker Slip

1. Choose Operations > Broker Slips and select New Broker Slip.
2. Under Customer and risk, choose Client for an existing client or Lead for a prospect, then pick the record. Choose the Product. The Insured name fills in; change it if the slip is for another named insured.
3. Enter the Inception and Expiry dates. Leave Response due empty to use the default of the settings, or set the date by which insurers must answer.

4. Under Risk details, describe the risk: location, occupancy, construction, protection or, for marine, the cargo and voyage. Add each detail as an item and a value.
5. Under Requested covers, select Add cover for each cover with its sum insured and deductible, for example Fire and lightning, ₱ 180,000,000.00.
6. Under Market, choose the Insurers to approach.
7. Add Remarks for the insurers, for example the claims history or the renewal terms of the incumbent.
8. Select Save draft to keep working, or Save and submit to market.

☒	2		Pioneer Insurance & Surety Corp.	P538,267.50	+P22,905.00	0.235%	PHP 300,000 each and every loss	Subject to a risk survey within 30 days	40%

Selected shares total

Several offers make a co-insurance led by Malayan Insurance Co., Inc.; the premium follows the lead's terms.

Prepare Quotation Slip Prepare Placement Slip

Figure 34. Compare offers: two offers selected, the best offer as lead

The tab Compare offers ranks the offers by gross premium and marks the cheapest as Best. For each offer it shows the difference to the best offer, the rate, deductibles, special terms and the line offered. The summary line shows the number of offers, declines and pending insurers and the market capacity (the total of the lines offered).

1. Tick Select on each offer you want to place. One offer at 100% is a single-insurer placement. Several offers make a co-insurance.
2. Choose the Lead insurer with the radio button. The premium of a co-insurance follows the lead's terms.
3. Enter the Share taken of each selected offer. Selected shares total must be exactly 100%.
4. Select Prepare Quotation Slip when the client must see and accept the terms first (Chapter 8), or Prepare Placement Slip to send the firm order straight away.

Which buttons are offered follows the placement journey of the line (Chapter 3). A line where the Quotation Slip is Not used shows only Prepare Placement Slip.

The tab Risk and covers repeats the risk details and covers of the slip.

Navigation: << 1 >> 10

Figure 37. Operations > Placement Slips

Choose Operations > Placement Slips. Each row shows the placement number, insured, product, lead insurer and number of co-insurers, gross premium, period, how many insurers have confirmed, the

source (From quotation slip, From broker slip, Direct placement or Recorded policy), status and the policy issued.

Status	Meaning
Draft	Prepared, not yet sent. Participants can still be changed.
Sent to insurer	The firm order was e-mailed to each participant.
Bound	Every participant has confirmed. The policy can be issued.
Declined	A participant declined its line. Edit the participants or cancel the slip.
Policy issued	The policy has been issued from the slip.
Cancelled	Withdrawn with a reason.

Where a Placement Slip comes from

- From a Broker Slip: Prepare Placement Slip on the Compare offers tab.
- From a Quotation Slip: on an accepted quotation, the Placement journey panel offers Create Placement Slip. On lines where the Placement Slip is required, the quotation cannot go straight to a policy.
- Direct placement: the client instructs placement with named insurers and no quotation is needed. Select New direct placement.

Direct Placement
The client instructs placement with named insurer(s); no quotation slip. The firm order is sent and bound before the policy is issued.

Figure 39. Placement Slip PS-2026-90001 sent to two insurers; the lead has confirmed

1. Open the Placement Slip. The Security table lists each participant with its role (Lead or Co-insurer), share, sum insured, premium, taxes, gross, commission, policy or certificate number and status.
2. Select Send to insurer(s). The system e-mails each participant a placing slip that shows its own share, and the status becomes Sent to insurer. Resend to insurers sends it again.
3. When an insurer confirms, select Confirm on its row, type the Insurer policy / certificate number and save. The row becomes Confirmed.
4. When an insurer declines its line, select Declined on its row and record the reason. Then use Edit participants to replace the insurer or change the shares, so that they total 100% again.

Bound

Created by: BrokerVerse Administrator

Remarks: Client instructed placement with SecureGuard as lead

Figure 40. Recording an insurer's binding confirmation

When every participant has confirmed, the slip becomes Bound and the progress bar ticks Bound / confirmed.

The Slip PDF button prints the placing slip. The PDF icon on a participant's row prints the placement slip for that insurer's share only.

Issue the policy

Figure 41. Placement Slip PS-2026-00001 bound and issued as POL-2026-00001

On a bound Placement Slip, select Issue Policy. The system:

- issues the policy number and copies the participants, shares and insurer references to the policy;
- creates the client from the lead if the insured is not yet a client;
- raises the premium bill to the client (broker billed) or books the commission due from the insurers (direct bill);
- posts the journal with each insurer's payable and commission on its own line;
- sets the slip to Policy issued and links the policy.

A user without policy issuing rights sees the message All insurers confirmed. A user with policy issuance rights can now issue the policy.

7.4 Record Issued Policy

Use Record Issued Policy when the insurer has already issued the policy, for example a renewal the insurer processed on its own or a policy placed before the account came to BrokerVerse. The policy, the bill and the commission are created in one step.

Record Issued Policy
Record a policy the insurer already issued, with its participants and their policy / certificate numbers. The policy, bill and commission are created in one step.

Insurer	Share	Lead	Policy / certificate no.	Sum insured	Premium	Gross	Commission
Choose an insurer	100%	☒	Insurer reference	P0.00	P0.00	P0.00	P0.00
+ Add insurer 100% ⚠️ Choose an insurer							

Figure 42. Record Issued Policy

1. Choose Operations > Placement Slips and select Record Issued Policy.
2. Fill in Customer and risk.
3. Under Policy, period and premium, enter the Insurer policy number (leave it blank to let the system number the policy), the Issued date, Inception, Expiry, Sum insured, Net premium, Commission rate and Billing mode.
4. Under Security, add each participant with its share and its own policy or certificate number. The lead insurer's reference defaults to the policy number.
5. Select Record policy.

Lines where the journey does not allow a direct policy entry refuse it with the message Direct policy entry is not allowed for the line; place those risks through the Placement Slip.

7.5 Tips

- Keep the placement e-mail of each insurer current on the Insurance Company master. Requests for quotation and firm orders go there.

- Record declines as well as offers. The Market Response report uses them to show each insurer's hit rate.
- The Placement Pipeline report lists every open Broker Slip and Placement Slip with its age.
- Shares are percentages of 100% of the risk. An insurer's line offered can be larger than the share you give it.

8 Quotation

8.1 Purpose

A quotation (the Quotation Slip) prices the cover for the client. It shows the net premium, the taxes, CTPL for motor, the gross premium, the broker's commission and the referrer's share. The client accepts it online, and the accepted quotation becomes the policy, directly for motor or through a Placement Slip for lines that require one. Each quotation gets a number QT-YYYY-NNNNN and stays valid for 30 days (`limits.quote_validity_days`).

Sales & Marketing and Operations prepare quotations. The Processing Team is notified of quotations sent to clients (`quotations.approval_notify_roles`) and prepares Quotation Slips from Broker Slips.

8.2 The quotation list

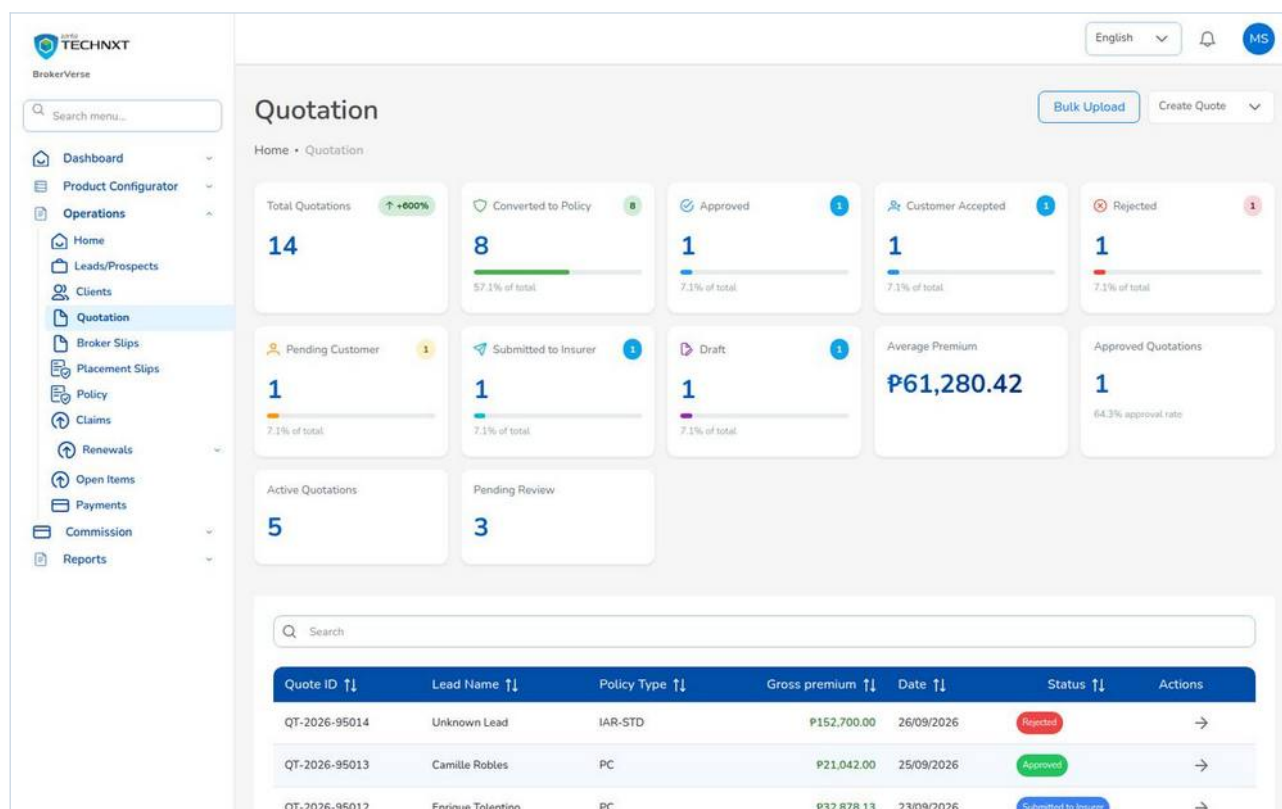

Figure 43. Operations > Quotation

Choose Operations > Quotation. The cards count quotations by status and show the average premium. The table lists each quotation with its lead, policy type, gross premium, date and status. Use the pencil to edit a draft and the eye to open a quotation.

Status	Meaning	Next step
Draft	Saved, not sent. You can still edit it.	Send for Customer Approval
Pending Customer	The approval link was e-mailed to the client.	The client accepts, or you return it to Draft

Status	Meaning	Next step
Customer Accepted	The client accepted through the link.	Proceed to Policy, or Create Placement Slip
Submitted to Insurer	Sent to the insurer for its terms.	Approved or Rejected
Approved	Approved by a user other than the creator.	Proceed to Policy
Rejected, Dropped	Not taken up. Can be reopened as Draft.	
Expired	Not converted within its validity (the Quotation expiry job runs daily at 00:30).	Reopen as Draft
Converted to Policy	The policy has been issued. The quotation can no longer be edited.	

8.3 Create a motor quotation

A motor quotation has five steps. Nothing is saved until you select Completed Quote on the last step, so you can move with Back and Next.

1. Open the lead (Operations > Leads/Prospects > View) and select Create Quote.
2. Fill in Policy Details and Insurance Vehicle Details, then select Next.
3. Review the Plan Recommendations, then select Next.
4. Fill in Coverage Details, select Calculate, check the premium, then select Next.
5. Fill in Accessories and the policy limits, then select Next.
6. Check the Order Summary, set the discount, the referrer and the signatory, then select Completed Quote.

The system saves the quotation as Draft, gives it its number, sets the lead to QuoteGenerated and opens the quotation.

Step 1: Policy details and vehicle

Figure 44. Create Quote, step 1: policy and vehicle details (example values)

Field	Meaning	Required	Rules
Co-Insurance	Tick when more than one insurer shares the risk. A table appears for the co-insurers and their shares.	No	Shares total 100% with one lead.
Insurance Company Name	The insurer that will issue the policy.	Yes	
Insurance Policy Type	Comprehensive, Own Damage / Theft or Third Party Liability.	Yes	
Account Code	The agent or referrer credited with the business.	No	Active referrers only.
Payment Type	Cash or Credit.	Yes	
Vehicle Type	Insurance Commission vehicle class. Decides the CTPL tariff, default seats and own damage rate.	Yes	From the motor tariff in the Product Configurator.
Vehicle Brand, Vehicle Model, Model Variant	From the vehicle master. Each list follows the one before.	Yes	
Model Year, Vehicle Color	Year of manufacture and colour.	Yes	The last 20 years up to next year.
Seating Capacity	Seats including the driver.	Yes	1 to 99. Used for Auto Passenger PA.

Step 2: Plan recommendations

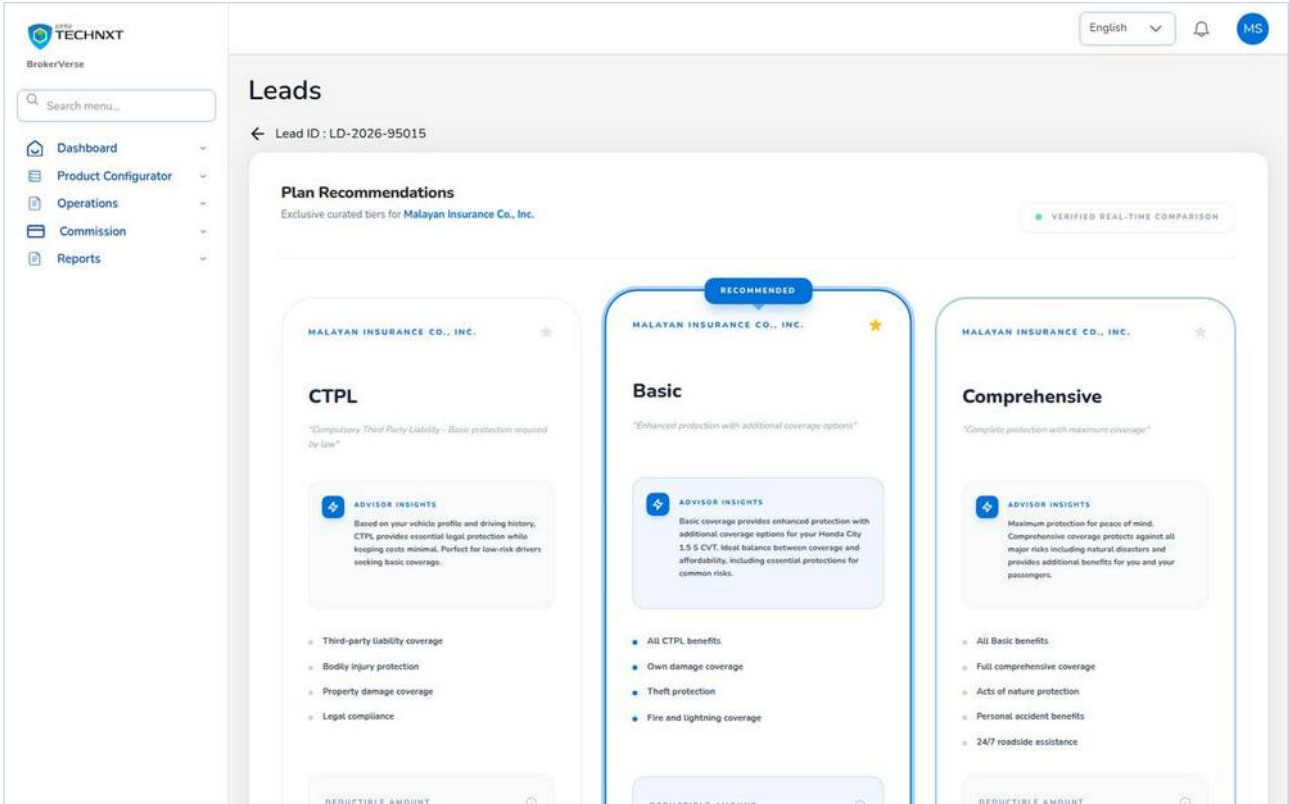

Figure 45. Create Quote, step 2: plan recommendations

The system shows three tiers for the chosen insurer, CTPL, Basic and Comprehensive, and marks one as RECOMMENDED from the vehicle class and policy type. Keep the recommendation or choose another plan. The deductible and monthly amounts on the cards are indicative; the premium is calculated on the next step.

Calculate Override Back Next

Figure 46. Create Quote, step 3: coverage details after Calculate

Field	Meaning	Rules
Own Damage coverage, Rate, premium	Sum insured of the vehicle (market value), the rate proposed from the motor tariff, and the premium.	Private cars 2%.
Include CTPL	Compulsory Third Party Liability at the tariff of the vehicle class.	Read-only amount, inclusive of taxes and fees.
Brand-new vehicle: 3-year CTPL	For a brand-new vehicle registered for 3 years with LTO.	Only for classes with a 3-year tariff.
Acts of Nature, Roadside Assistance, Personal Accident	Optional covers with their own rate and premium.	
Bodily Injury, Property Damage	Excess third-party liability limits.	₱ 100,000 to ₱ 500,000.
Auto Passenger PA	Limit per person × seats covered × 0.1%.	Example: 50,000 × 5 seats gives 250,000 cover and 250.00 premium.

Field	Meaning	Rules
Total Gross Premium	Net premium + VAT + DST + LGT + CTPL.	Calculated.

Select Calculate after every change. Override lets you type a cover premium the insurer quoted. CTPL and Auto Passenger PA are always priced by the system from the tariff in Product Configurator > Product Templates > MOT-003-2025 (Chapter 22).

Step 4: Accessories and policy limits

Figure 47. Create Quote, step 4: accessories and policy limits

Enter the declared value of accessories to be covered (Aircon, Stereo, Mag wheels, Others) and the policy limits (Deductible, Towing, Repair Limit). Leave a field empty if it does not apply.

Step 5: Order summary, discount and commission

The screenshot shows the 'Create Quote' interface for lead Ricardo Salazar (Lead ID: LD-2026-95015). The interface is divided into a sidebar menu on the left and a main content area. The sidebar includes links to Dashboard, Product Configurator, Operations, Home, Leads/Prospects (selected), Clients, Quotation, Broker Slips, Placement Slips, Policy, Claims, Renewals, Open Items, Payments, Commission, and Reports. The main content area is titled 'Leads' and contains a 'Create Quote' section. This section is further divided into 'Order Summary' and 'COMMISSION & REFERRAL'.

Order Summary:

Item	Amount
NET Premium	22,250.00
Value Added Tax	2,670.00
Others(Acc. premium)	0.00
Documentary Stamp Tax	2,781.25
Local Gov't Tax	166.88
CTPL (Insurance Commission tariff, inclusive of taxes and fees)	610.40
Discount	0.00
Total Sum Insured	1,450,000.00
Total Premium (Gross Premium)	28,478.53

COMMISSION & REFERRAL:

Discount (Optional)
Enter discount you will give to customer: 0% (Min 0%, Max 30%)

COMMISSION & REFERRAL (auto-filled, editable)
Comsub rate auto-fills from COMM001 (Motor - All insurers) when you pick a referer + level, and can be adjusted below. Brokerage 18% is the income from the insurer; comsub is payable to the referer.

PRIMARY
Direct — broker's own lead (no comsub — broker keeps the full brokerage) P0.00

Item	Amount	Notes
BROKERAGE	P4,005.00	income
COMSUB (GROSS)	P0.00	payable
- DISCOUNT	P0.00	out of broker
MARGIN	P4,005.00	6% — comsub — disc

Comsub is on the full net premium (P22,250.00) — the customer discount comes out of the broker's commission, not the referer's comsub. Margin = brokerage - comsub - discount. Withholding tax (P0.00) is deducted at payout at each referer's configured rate — net payable P0.00.

Authorized Signature: Ana Patricia Lim

Buttons: Back, Completed Quote

Figure 48. Create Quote, step 5: order summary with commission and referral

Line	How it is calculated
NET Premium	Sum of the cover premiums, without CTPL.
Value Added Tax	12% of the net premium (tax.vat_rate).
Documentary Stamp Tax	12.5% of the net premium (tax.dst_rate).
Local Gov't Tax	0.75% of the net premium (tax.lgt_rate).
CTPL	Tariff amount; not taxed again and never discounted.
Discount	The discount you give the client.
Total Premium (Gross Premium)	Net + taxes + other premium + CTPL – discount.

1. Optional: set Discount (Optional) between 0% and 30%. The discount comes out of the broker's commission, not the referrer's share.
2. Under COMMISSION & REFERRAL, choose the referrer or keep Direct (broker's own lead) and the referrer level. The comsub rate fills in from the commission rule (L1 8%, L2 5%) and can be changed. Add referrer (chain) adds a second referrer.
3. Check BROKERAGE (the broker's commission from the insurer), COMSUB (GROSS), DISCOUNT and MARGIN.
4. Choose the Authorized Signature and select Completed Quote.

The brokerage rate comes from the Commission Rate Matrix (Chapter 23): the most specific active rate for the insurer, product, line and policy type on the quotation date, then the insurer's default rate, then `commission.default_rate` (15%).

Important: The server calculates the premium again from the covers, rates and configured taxes when the quotation is saved. The amounts on the saved quotation are the ones that count.

8.4 Send the quotation to the client

Figure 53. Quotation audit trail

8.6 Tips and common errors

- The lead has no e-mail address; add one before sending the quotation: edit the lead, add the e-mail, then send again.
- Only Draft quotations can be sent for approval: the quotation was already sent. Wait for the client or reopen it as Draft.
- A quotation converted to a policy cannot be edited: raise an endorsement on the policy instead.
- CTPL shows "-": choose the Vehicle Type on step 1.
- The saved premium differs from what you typed: the server priced it with the configured rates. Check the rates with the Processing Team.

9 Policy issuance and servicing

9.1 Purpose

A policy is issued from a bound Placement Slip (Chapter 7), recorded with Record Issued Policy, or converted from an accepted motor quotation as described below. At issue the system gives the policy number POL-YYYY-NNNNN, creates the client (CL-), copies the participating insurers, bills the premium and accrues the referrer's commission.

9.2 Convert a motor quotation into a policy

1. Open the accepted or approved quotation and select Proceed to Policy.
2. Complete Customer Information and select Next.
3. Upload the five vehicle photos and select Next.
4. Review the details, choose the Billing mode and select Send to Insurance Company. The policy is issued.
5. On Upload Policy, check the dates, upload the insurer's policy document and choose Pay Later or Proceed to payment.

9.3 Co-insurance on the policy

The screenshot shows the 'Policy Details' page for Policy POL-2026-00001. The interface includes a sidebar with navigation options like Dashboard, Product Configurator, Operations, Home, Leads/Prospects, Clients, Quotation, Broker Slips, Placement Slips, Policy, Claims, Renewals, Open Items, Payments, Reinsurance, and Reports. The main content area displays the following information:

- Policy Details:** Policy POL-2026-00001, Issued 29/09/2026, Status: Pending.
- GROSS PREMIUM:** P334,031.25
- EXPIRY DATE:** 01/10/2027 (Issued 29/09/2026)
- CLIENT ID:** CL-2026-00001 (Davao Agro Processing Corp.)
- Policy Details Table:**

POLICY NUMBER	PAYMENT STATUS	PRODUCT TYPE
POL-2026-00001	Pending	Industrial All Risks
- Payment Required:** This policy requires payment to become active. You can proceed to payment now or pay later. (Proceed to Payment button)
- Documents & Billing:** Generate Policy Invoice button.
- CO-INSURANCE DETAILS:** CO-INSURANCE POLICY: YES

Figure 58. Policy POL-2026-00001: the co-insurance participants

A co-insured policy shows its participants: each insurer with role, share, sum insured, premium, taxes, gross premium, commission and the insurer's policy or certificate number. The shares always total 100% with one lead. Amounts are split by share and the rounding remainder goes to the lead. The same split is used for the bill journal, the remittance to each insurer, claim recoveries and the reports.

9.4 Record the client's payment

Only Accounting posts official receipts. Everyone else records how the client paid, and Accounting verifies it.

Proof of payment (deposit slip, cheque image, screenshot) — optional

Files upload as soon as you choose them.

① The payment is recorded for finance to verify. The official receipt is issued once finance confirms it.

Cancel

Figure 59. Payment Confirmation: recording a bank transfer (example values)

1. Open the policy and select Proceed to Payment.
2. Under How does the client pay?, choose Pay later, Bank transfer, Cheque, Online payment or Cash.
3. Fill in the reference, Amount paid, Payment date, Remarks and, if you have it, the proof of payment.
4. Select Record payment (or Confirm pay later).

The payment waits for verification, the policy payment status becomes Reviewing and Accounting receives the notification Premium payment to verify. Accounting checks the bank statement and selects Confirm, which posts the official receipt, or Reject with a reason. Accounting users see Record payment and issue receipt and can post the receipt directly.

9.5 The policy list

The screenshot shows the 'Policies' page in the BrokerVerse OOTB interface. The sidebar on the left lists various navigation options, with 'Operations' expanded and 'Policy' selected. The main content area displays a table of policies. The table has the following columns: Policy Number, Client Id, Client Name, Gross Premium, Policy Issued, Policy Expiry, Product Description, Payment, and Actions. There are five rows of data, each representing a policy. The 'Payment' column shows 'Pending' for all policies. The 'Actions' column contains a right arrow and three dots for each row.

Policy Number	Client Id	Client Name	Gross Premium	Policy Issued	Policy Expiry	Product Description	Payment	Actions
POL-2026-00001	CL-2026-00001	DAVAO AGRO PROCESSING CORP.	P334,031.25	29/09/2026	01/10/2027	INDUSTRIAL ALL RISKS	Pending	→ ...

Rows per page: 5 1 - 5 of 29

Figure 60. Operations > Policy

Choose Operations > Policy. The list shows policy number, client, gross premium, issue and expiry dates, product and payment status. The three dots on a row open Claim, Endorsement and Reminder. They are disabled while the payment is Pending or Reviewing, and Endorsement is not offered for expired, lapsed, cancelled or renewed policies.

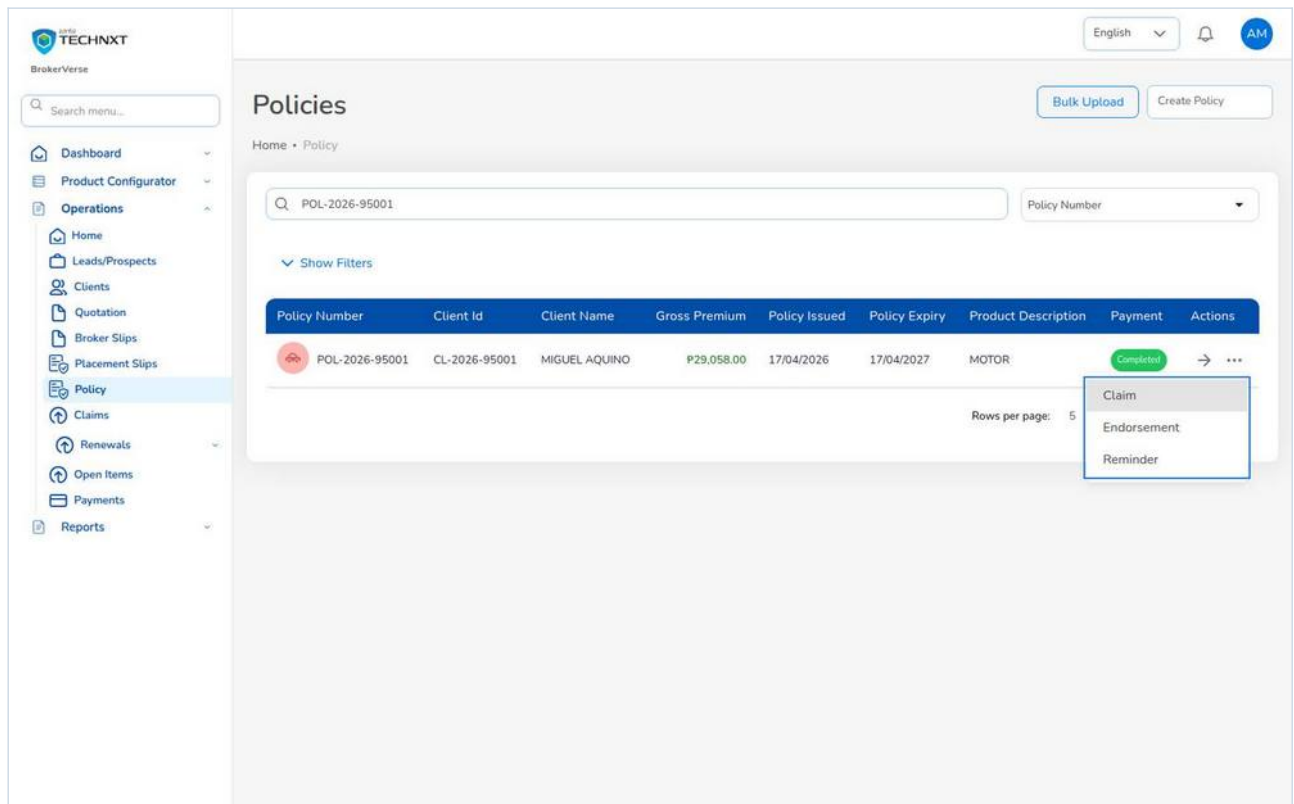

Figure 61. Row actions of a policy

9.6 Policy details

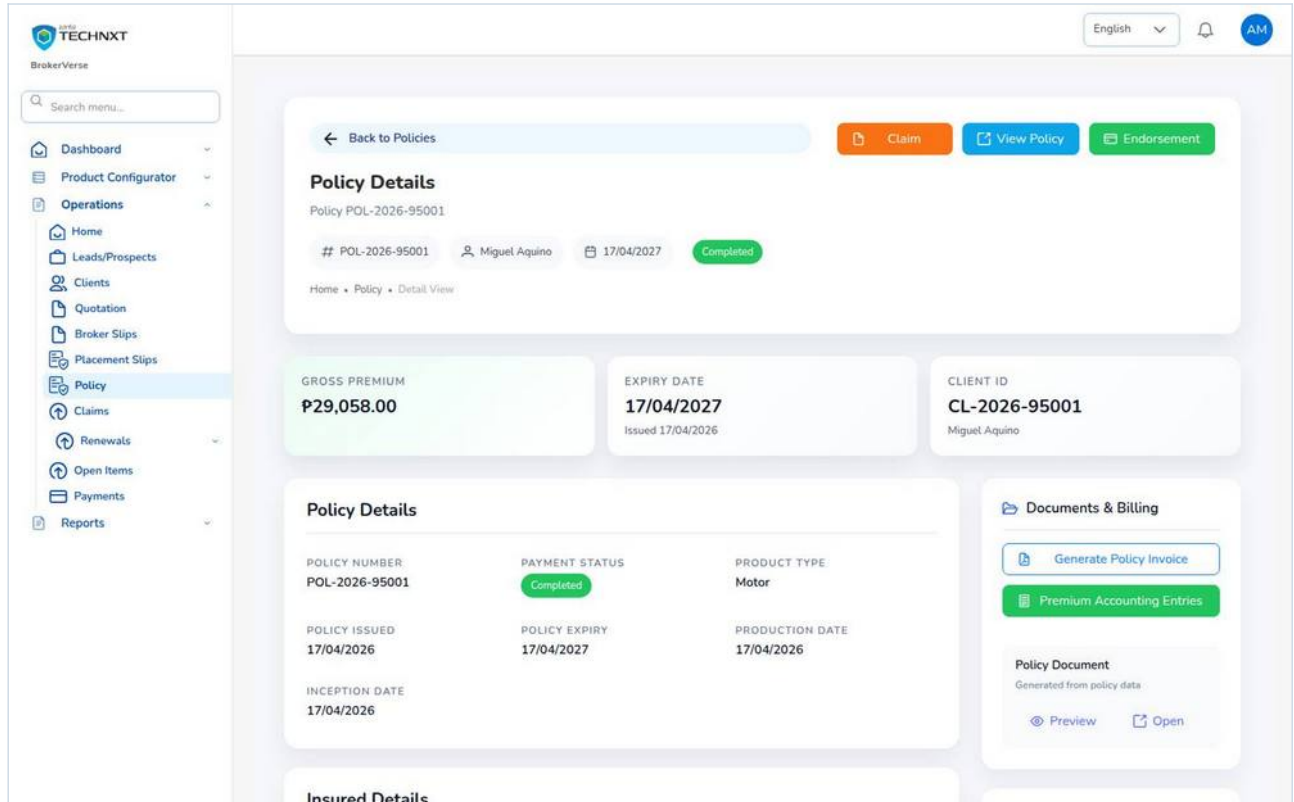

Figure 62. Policy Details

Section	Content
Header	Policy number, client, expiry and payment status, with Claim and View Policy.
Policy Details, Insured Details	Number, product, dates; client, ID and contact details.
Vehicle Details and Photos	Motor only.
Coverage Details, Premium Breakdown	Each cover with sum insured and premium; net premium, taxes, discount, gross premium.
Participants	The insurers and their shares (co-insurance).
Endorsements, Payment	Latest endorsements; Proceed to Payment while premium is due.
Documents & Billing	Generate Policy Invoice, Premium Accounting Entries and the policy document.

Showing 1 to 10 of 11 entries

Figure 64. Premium accounting entries of POL-2026-00001

Policy status	Meaning
Active	In force.
Expired	Past its expiry date (Policy expiry job, daily 00:15).
Renewed	Replaced by a new term.
Lapsed	Not renewed within the 30-day grace period.
Cancelled	Cancelled by endorsement.

Payment status	Meaning
Pending	Premium due, nothing received.
Reviewing	A payment was recorded and waits for Accounting.
Partial	Part of the premium was receipted.
Completed	Fully paid.
Refunded	Premium returned to the client.

9.7 Upload policies

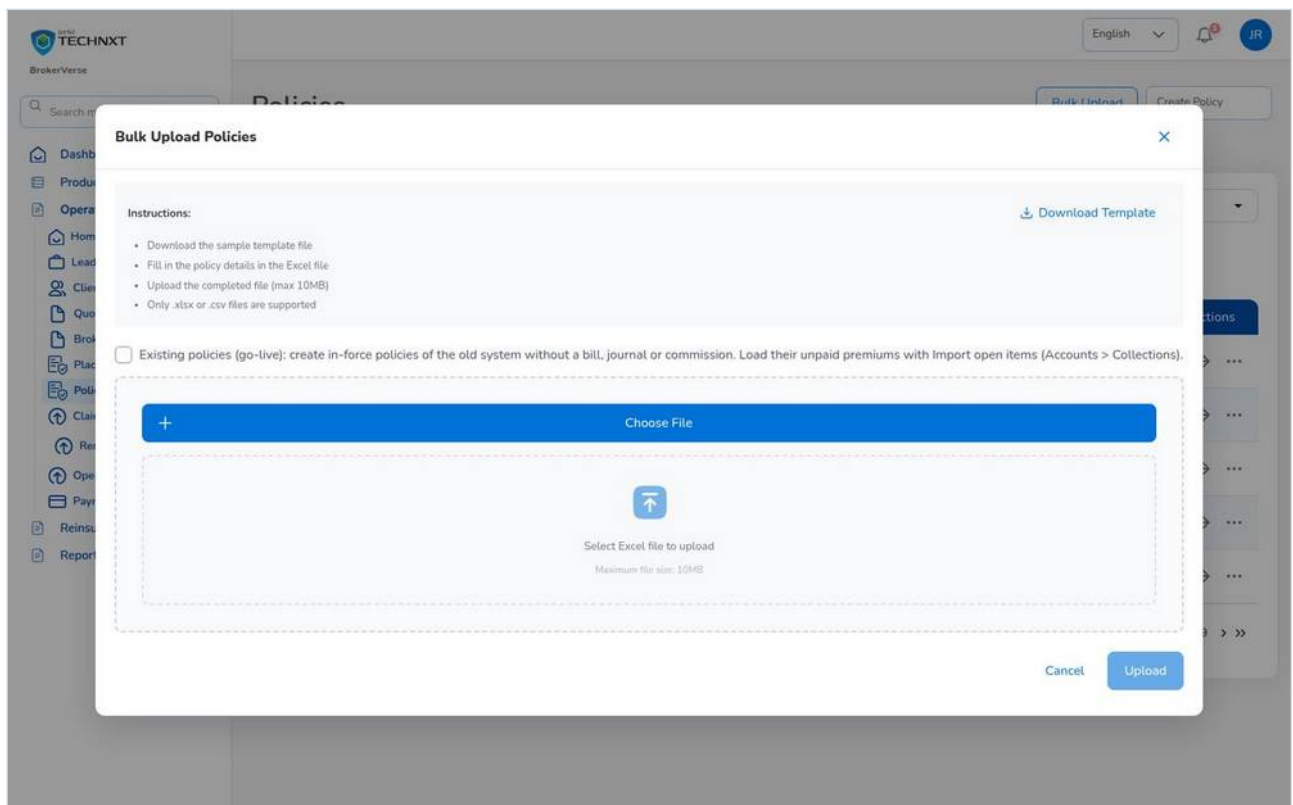

Figure 65. Bulk Upload of policies

Operations > Policy > Bulk Upload loads policies from `Policies_Upload_Template.xlsx`. Two modes are offered:

- New business: each row issues a policy with its bill and commission, as if issued on the screen.
- Existing policies (go-live): tick this box when you load the in-force book from the old system. Each row creates the client and the policy with its insurer at 100%, but no bill, journal or commission. Load the unpaid premiums afterwards with Import open items (Chapter 14). Enter co-insured policies on the screen.

10 Endorsements

10.1 Purpose

An endorsement changes an issued policy: the client's details, the vehicle, the cover, the period, or cancels the policy. The system records it with a number END-YYYY-NNNNN, sends it to the insurer and bills additional premium or credits return premium. A change of cover is priced again with the configured rates. Operations raises endorsement requests; the Processing Team completes them with the insurer's endorsement.

Line	Type	What you can change
Motor	Personal Details Change	Name, preferred name, contact number and address.
Motor	Motor Details Change	Vehicle details and identifiers.
Motor	Coverage Change	Own damage sum insured and rate, acts of nature, bodily injury, property damage, Auto Passenger PA. The premium is recalculated.
Motor	Policy Extend, Policy Cancel	The period; cancellation.
Fire and Allied Perils	Regular / Premium Change	Risk, cover or premium.
Fire and Allied Perils	Policy Cancellation	Full, partial, pro-rata or pro-rata partial.

10.2 Raise an endorsement

1. Choose Operations > Policy, or open the client and use the Policy tab.
2. On the policy row, select the three dots, then Endorsement.
3. Tick one or more endorsement types and select Proceed.
4. Enter the changes on the Endorsement Request page.
5. Select Save & Next, check the summary and select Send to Insurance Company.

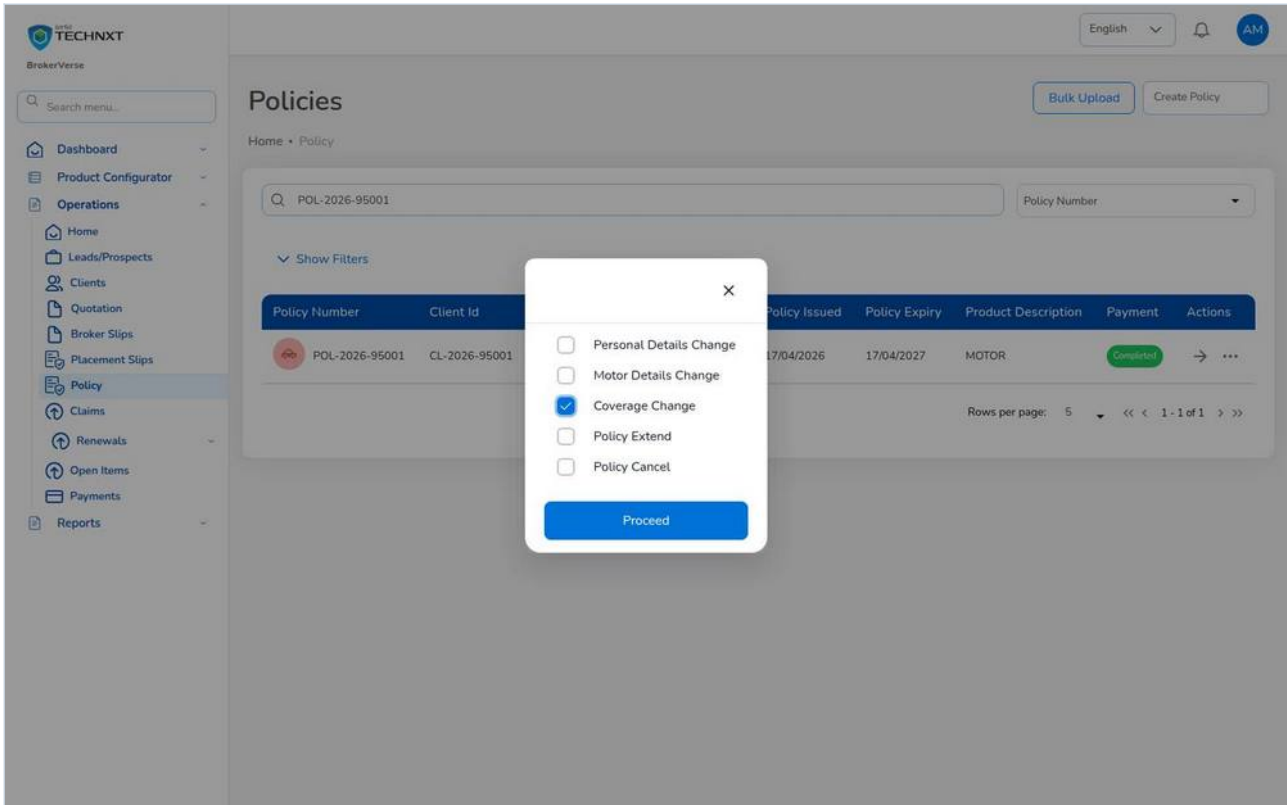

Figure 66. Choosing the endorsement type

The screenshot displays the BrokerVerse OOTB interface. On the left is a sidebar menu with the following items: Dashboard, Product Configurator, Operations, Home, Leads/Prospects, Clients (highlighted), Quotation, Broker Slips, Placement Slips, Policy, Claims, Renewals, Open Items, Payments, and Reports. The main content area is titled 'Clients' and shows a breadcrumb for 'Miguel Aquino / Client ID : CL-2026-95001'. Below this is a form titled 'Endorsement Request' with the subtitle 'Personal Details Change'. The form contains the following fields: First name (Miguel), Last name (Aquino), Preferred name (Miguel Aquino), Contact number (+639171110001), House no. street (14 Jupiter St.), Barangay subd (Bel-Air), Country (Philippines), Province (Metro Manila), City (Makati), and Zip code (1209). A 'Save & Next' button is located at the bottom right of the form. The top right of the interface shows 'English', a notification bell, and a user profile icon labeled 'AM'.

Figure 67. Endorsement request: personal details change

For a personal details change the form opens with the client's current details. The contact number must be a valid Philippine mobile number and the ZIP code must have 4 digits. The client record is updated when the endorsement is completed.

Auto passenger personal accident		
Appa total coverage		APPA coverage premium
Total Sum Insured		1,450,000
Net premium	23,200	Value Added Tax (12%) 2,784
Others(Acc. premium)		Documentary Stamp Tax (12.5%) 2,900
Local Gov't Tax (0.75%)	174	Discount
Others		Gross premium 29,058
Premium change		

Figure 68. Endorsement request: coverage change priced again

For a coverage change, change the cover and the premium boxes recalculate: net premium, VAT, DST, LGT, gross premium and Premium change. CTPL stays as issued.

10.3 After sending to the insurer

1. The endorsement waits for the insurer (Waiting for Update).
2. When the insurer has issued its endorsement, select Proceed, upload the insurer's document with the endorsement number and dates, and select Complete.
3. The system applies the change to the policy and the client and notifies the policy owner.
4. Additional premium is billed to the client (or, for a co-insured policy, split by share on the journal). The endorsement view shows Additional premium is due: proceed to payment. Return premium is credited to the client; if the premium was already remitted, the refund due from each insurer is booked and netted on its next remittance.

Rows per page: 5 << < 1 - 1 of 1 > >>

Figure 70. Client view: Endorsement tab

Status	Meaning
Draft	Saved, not sent.
Pending Customer	Sent; waiting for the insurer's endorsement.

Status	Meaning
Completed	Applied to the policy.
Initiate Cancel, Cancelled	A cancellation in progress or done.
Rejected	Refused by the insurer.

11 Claims

11.1 Purpose

The claims module records a loss under a policy, follows it with the insurer and the adjuster, and settles it. A second Claims user approves each settlement. Each claim gets a number CLM-YYYY-NNNNN. Reinsurance recoveries are in Chapter 20.

11.2 The claims list

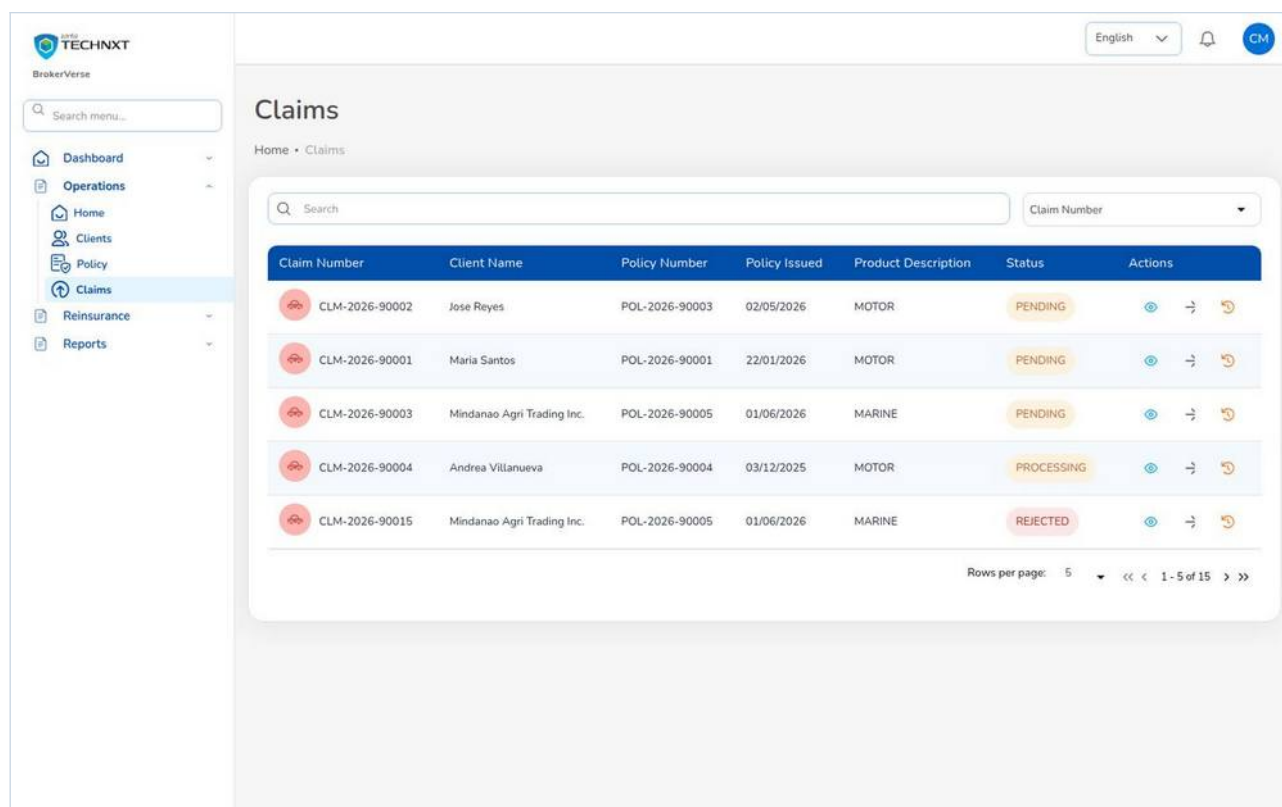

Figure 71. Operations > Claims

Choose Operations > Claims. Each row shows the claim number, client, policy, issue date, product and status. The icons at the end of the row open Claim Details, the next step for the claim's status, and the Claim Audit Trail.

Status	Meaning	Next step
Pending	Registered; the Preliminary Loss Advice went to the insurer.	Proceed when the insurer assigns an adjuster
Processing	Adjuster details and documents are being gathered.	Submit the settlement
Pending Approval	Settlement submitted; waiting for a second Claims user.	Approve or reject
Approved	Settlement approved.	Settled automatically (claims.auto_settle_on_approval)
Settled	Settlement released.	Close

Status	Meaning	Next step
Rejected	Refused by the insurer.	
Closed	File closed.	

11.3 Register a claim

1. Choose Operations > Policy, select the three dots on the policy row, then Claim. You can also select Claim on the policy details page.
2. Check the insurer, policy and policy holder, which fill in from the policy.
3. Fill in the Incident Details and the driver.
4. Fill in Third Party Details (If Applicable).
5. Select Next, attach the documents and select Send.

Figure 72. Claim Request

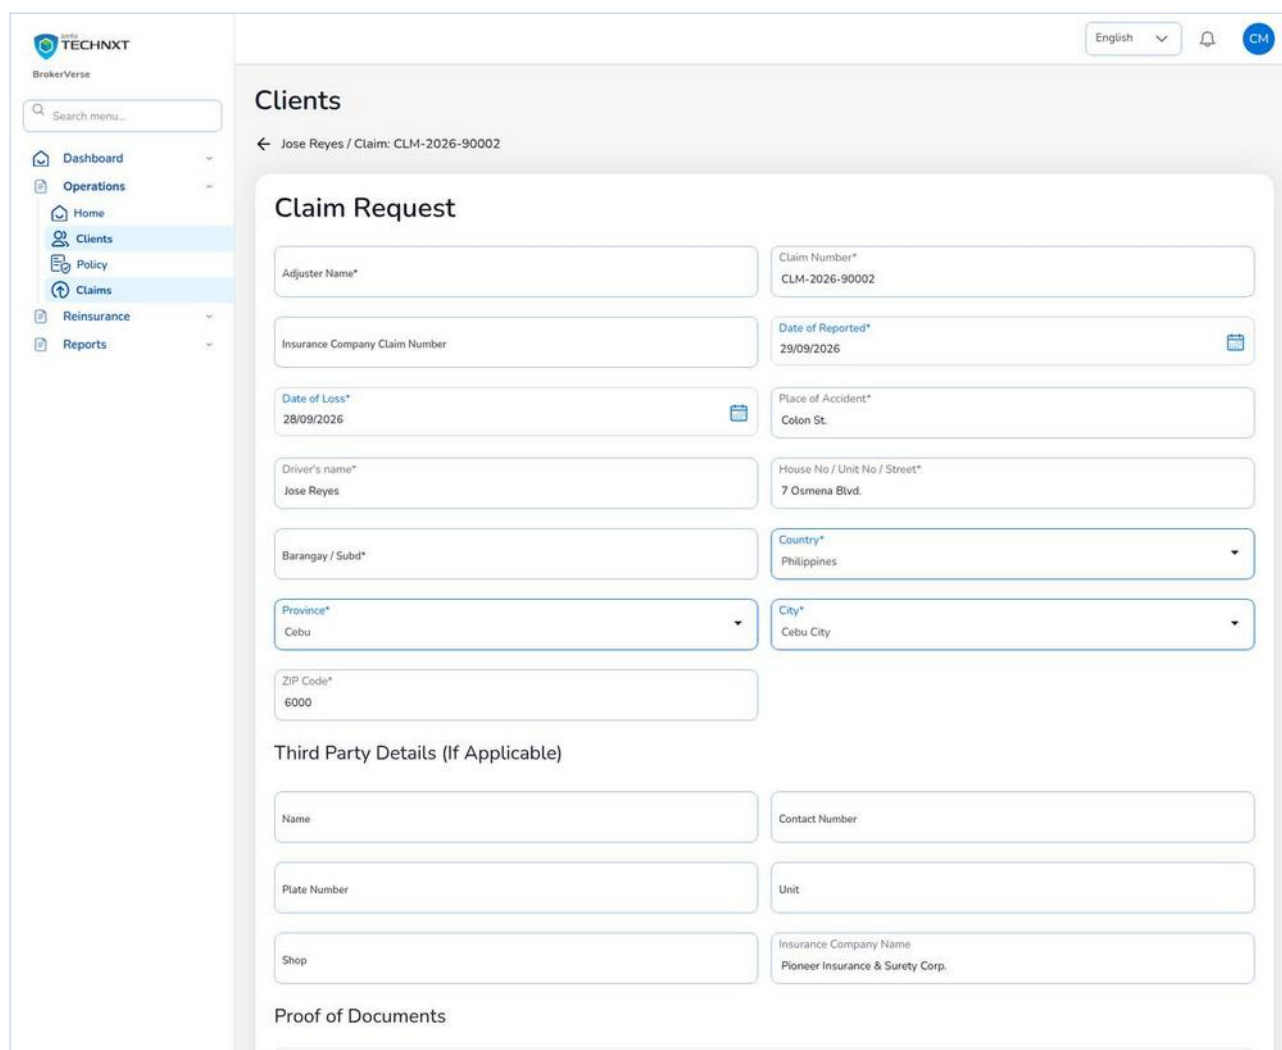

Field	Meaning	Required	Rules
Date of Incident, Time of Incident	Date and time of loss.	Date yes	Not in the future; inside the policy period.
Address of Incident, City, Province	Where the loss happened.	Address yes	
Type of Incident / Cause of Loss	Collision, theft, fire, flood and so on.	Yes	
Estimated Claim Amount	First estimate of the loss.	No	Pesos.
Insurance Company Claim Number	The insurer's claim reference, when known.	No	

Field	Meaning	Required	Rules
Driver's name and address	Person driving at the time of loss. Same as Policy Holder copies the holder.	Name yes	
Third Party Details	Name, contact number, plate number, shop and insurer of the other party.	No	
Documents	Police report, photos, estimates.	No	PNG, JPEG or PDF, at most 2 MB each.

The claim is refused when the date of loss is outside the policy period (Date of loss ... is outside the policy period) and while the policy premium is unpaid ([claims.block_unpaid_premium](#)). When it is saved, the system issues the claim number, sets the status to Pending, e-mails the Preliminary Loss Advice to the insurer's claims e-mail and notifies the Claims users and the policy owner. For a co-insured policy the claim shows each insurer's share of the claim amount.

11.4 Follow the claim with the insurer

1. Open the claim with the eye icon. The page shows Waiting for Update.
2. Select Edit to correct the claim, or Proceed when the insurer has assigned an adjuster.
3. On the adjuster page, enter the Adjuster Name, the Insurance Company Claim Number, the dates, place of accident, driver and third party details, and upload the proof of documents.
4. Select Next. The status becomes Processing.

Figure 73. Adjuster details

11.5 Settle the claim

The maker submits the settlement:

1. Open the claim and continue to Claim Settlement.
2. Choose the Settlement Type (Cash, Card or Cheque), enter the Settlement Amount, the Issue Date and the Settle Date, and upload the settlement documents (PNG or JPEG, at most 2 MB).
3. Select Submit.

The screenshot displays the 'Claim Settlement' form within the BrokerVerse OOTB application. The interface includes a sidebar menu on the left with options like Dashboard, Operations, Home, Clients, Policy, Claims, Reinsurance, and Reports. The main content area is titled 'Clients' and shows a breadcrumb for 'Bayanihan Logistics Corp. / Claim: CLM-2026-90005'. The 'Claim Settlement' form contains the following fields:

- Settlement Type:** A dropdown menu with 'Select' as the current value.
- Settlement Amount:** A text input field.
- Issue Date:** A date picker showing '29/09/2026'.
- Settle Date:** A date picker showing '29/09/2026'.
- Documents:** A section with an 'Upload' button (indicated by an upward arrow icon) and the text 'Maximum 2 MB (PNG or JPEG Files Only)'.

At the bottom right of the form, there are 'Back' and 'Submit' buttons.

Figure 74. Claim Settlement form

The settle date cannot be before the issue date and the amount must be more than zero. The claim goes to Pending Approval, and the message says a second Claims user must approve it. The other Claims users are notified.

A second Claims user approves it:

1. Open the notification, or open the claim in Pending Approval from Operations > Claims. The page shows Waiting for Settlement.
2. Check the claim details and the settlement.
3. Select Proceed to approve, or Reject to send it back to the maker.

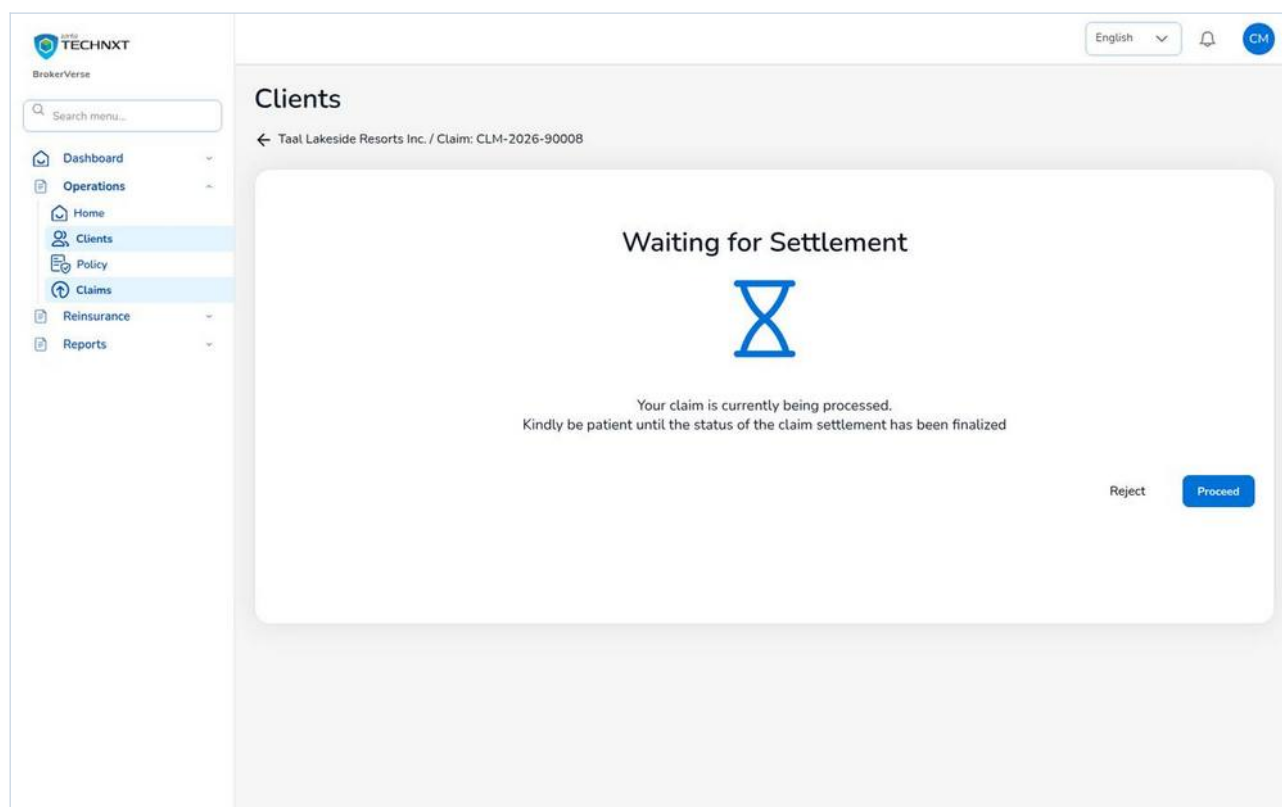

Figure 75. *Waiting for Settlement: the checker's view*

The maker cannot approve his or her own settlement. After approval the claim is Settled, the maker is notified and the dashboard and reports are updated. For a co-insured policy, the settlement is split by share: the Co-Insurance Details table shows each insurer's share of the claim and of the settlement.

11.6 Settlement cash (claims paid through the broker)

Usually the insurer pays the claimant directly and no money passes through the broker. When the settlement is marked as paid through the broker, the insurer pays the broker and the broker pays the claimant. The system then books, at settlement, the amount recoverable from each insurer by its share against the amount payable to the claimant, and the Settlement cash panel appears on the settled claim.

Paid to claimant: P0.00 / P28,500.00 · Still payable: P28,500.00

Date	Movement	Amount	Bank account	Reference	Journal
25/09/2026	Funds received – MAPFRE Insurance Corporation	P28,500.00	ACC-BDO-001	RA-8812	JV-2026-00089

Figure 76. Settlement cash of CLM-2026-90007: funds received from the insurer, amount still payable to the claimant

Two cash movements are recorded on this panel:

1. Record funds received: when the insurer's money arrives, choose the Insurer, enter the Amount, the Bank account it was paid into, the Date and the Remittance advice / reference, and select Save. The system posts the receipt (posting rule Claim funds received from insurer) and shows the amount Received against Recoverable.
2. Pay claimant: when you pay the claimant, enter the Amount, the Bank account, the Payment mode, the Voucher / cheque number and the Payee, and select Save. The system posts the payment (posting rule Claim paid to claimant) and shows Paid to claimant and Still payable.

Each movement is listed with its journal. Recording funds needs the receipts permission and paying the claimant the disbursements permission, both held by Accounting. The claim screens belong to the Claims menu, which Accounting does not have in this release, so the System Administrator opens the claim and records the movements on Accounting's instruction (Appendix G).

Figure 77. Claim Details

Claim Details shows the claim, incident, driver, policy, third party and system information, the insurer's claim number and the claim due date (20 days after reporting, `claims.sla_days`). For a settled claim the eye icon opens Claim Settlement with the documents the system produces: Acknowledgment letter, Claims Discharge Voucher, Claims Data sheet and FIR. Select View to open each one on the company letterhead.

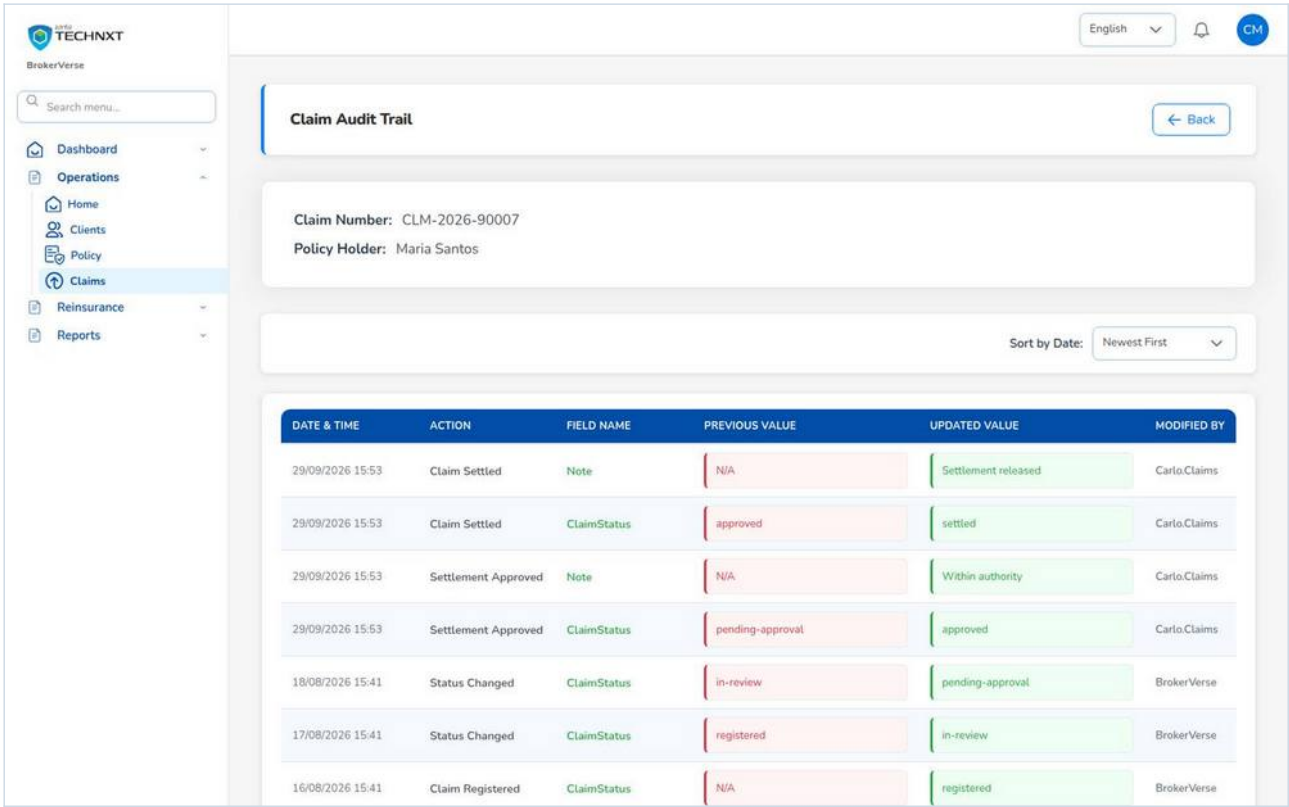

Figure 78. Claim Audit Trail: every status change with the user and time

12 Renewals

12.1 Purpose

The system puts every policy into the renewal pipeline 90 days before expiry, sends renewal notices at 60, 30 and 15 days, and turns the accepted renewal quotation into the next policy term. A policy not renewed within 30 days after expiry lapses. Operations and Sales & Marketing work the renewals; the Processing Team approves renewal terms.

Menu (Operations > Renewals)	Use it to
Renewal Policy	See active, expiring and expired policies and start a renewal.
Renewal Batch	Group many policies and send their notices together (up to 500, <code>renewals.batch_max_policies</code>).
Renewal Queue	Work the policies due for renewal: days to expiry, status, risk, owner, attempts.
Retention Analytics	Renewed, lapsed and open renewals and the retention rate.
At-Risk Policies	Policies with a high retention risk score and the recommended actions.
Negotiations	Record contacts with the client and request approval of terms.
Lapse Management	Lapsed policies, policies in the grace period and win-back campaigns.
Performance	Renewal rate, premium retention and cycle time against target.

When	What happens	Setting
90 days before expiry	The policy enters the pipeline.	<code>renewals.pipeline_days</code>
60, 30, 15 days before expiry	First, second and final notice to the client.	<code>limits.renewal_notice_days</code>
Expiry date	The policy becomes Expired.	
30 days after expiry	An unrenewed policy lapses.	<code>renewals.grace_period_days</code>

12.2 Renew a policy

Rows per page: 5 << 1 - 4 of 4 >>

Figure 79. Renewal Policy: expired and expiring policies

1. Choose Operations > Renewals > Renewal Policy.
2. On the policy row, select the three dots, then Renewal.
3. The renewal quotation opens with the covers of the expiring term. Check the coverage, select Calculate, then Next.
4. Check accessories and the order summary, then select Completed Quote.
5. Send it for customer approval (Chapter 8). When the client accepts, select Proceed to Policy.

The system issues the new term, marks the old policy Renewed, bills the premium and accrues the commission to the original referrer. Renewal terms submitted from the renewal workspace go to the Processing Team for approval (`renewals.maker_checker`). Whether renewals must follow the placement journey of their line is set in `placement.journey_applies_to_renewals` (off in the delivered set-up).

12.3 Follow-up screens

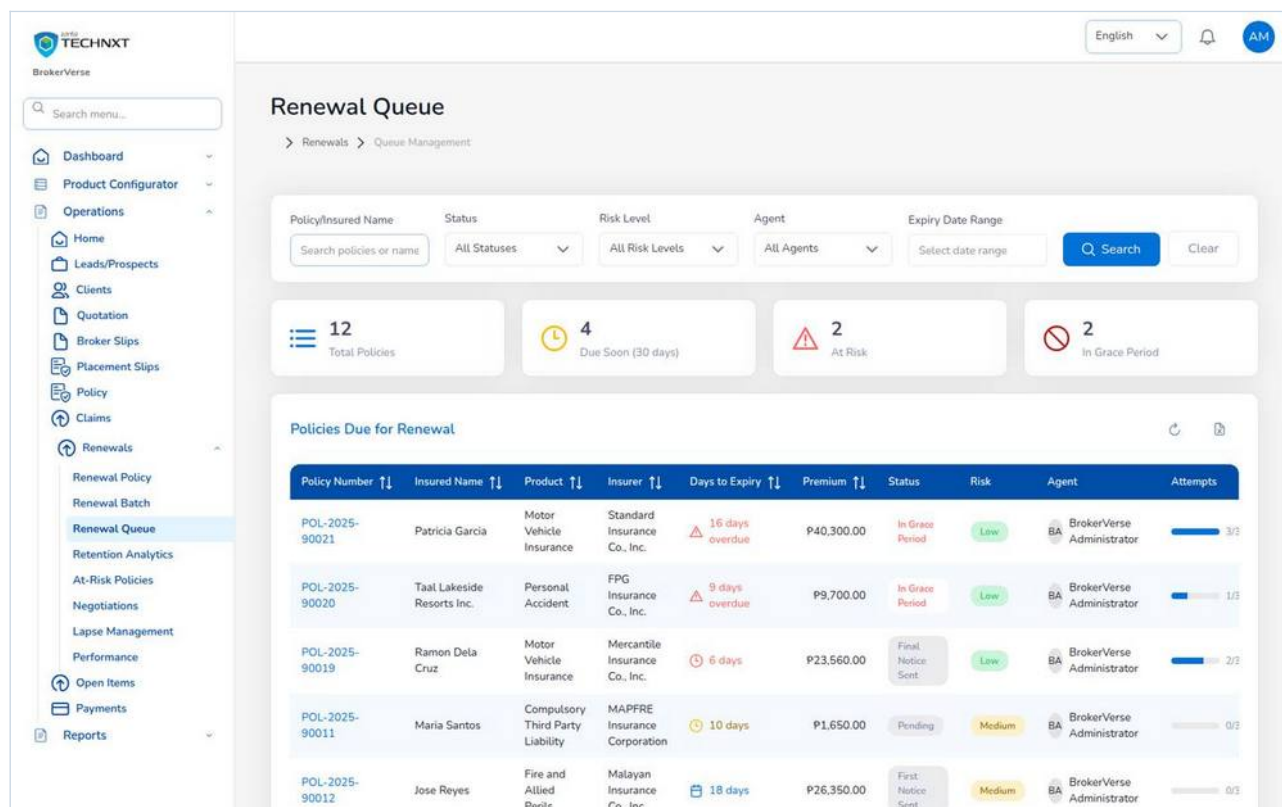

Figure 80. Renewal Queue

The queue lists the policies due with days to expiry (red when overdue), premium, renewal status, risk level and number of contact attempts. Filter by status, risk level, owner or expiry dates.

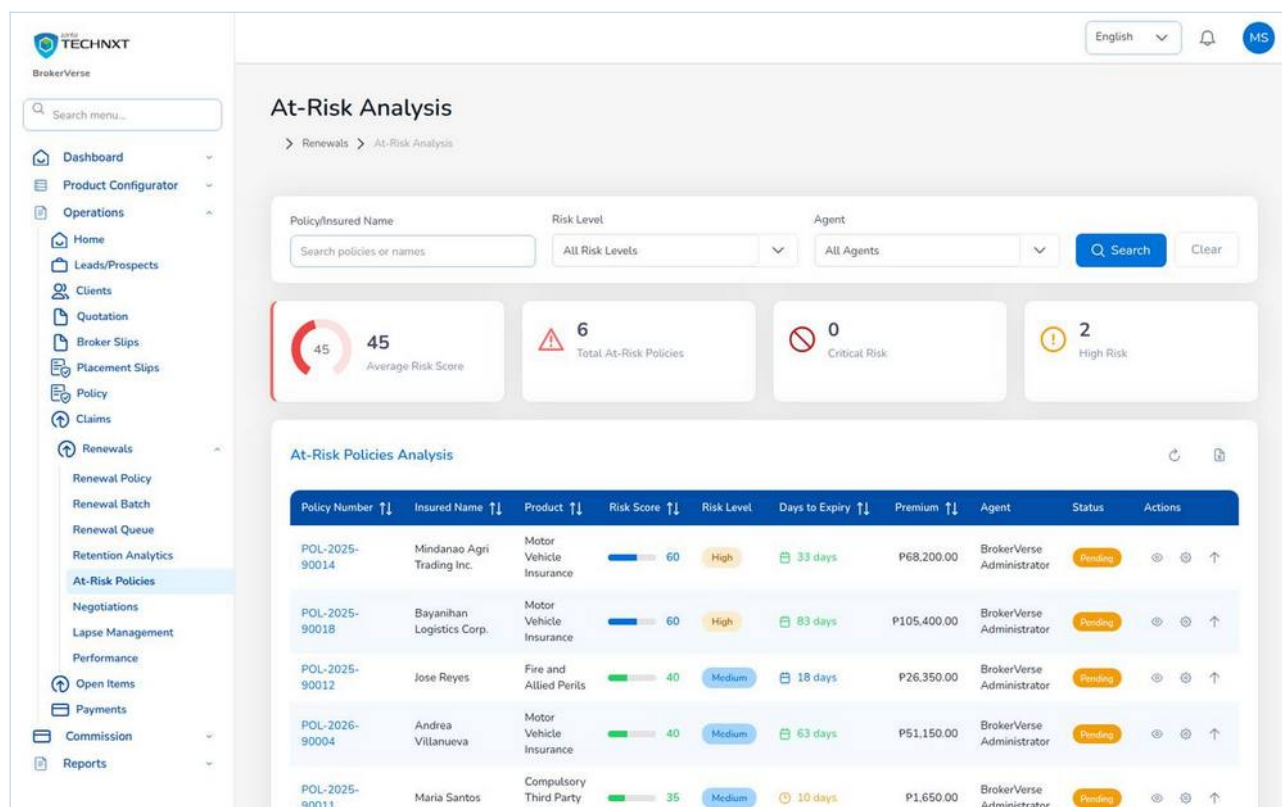

Figure 81. At-Risk Analysis

The risk score adds weights for claims in the term, unpaid premium, expiry within 30 days, a premium increase, no contact yet and a first renewal (`renewals.risk_weights`). The recommended actions follow `renewals.risk_actions`.

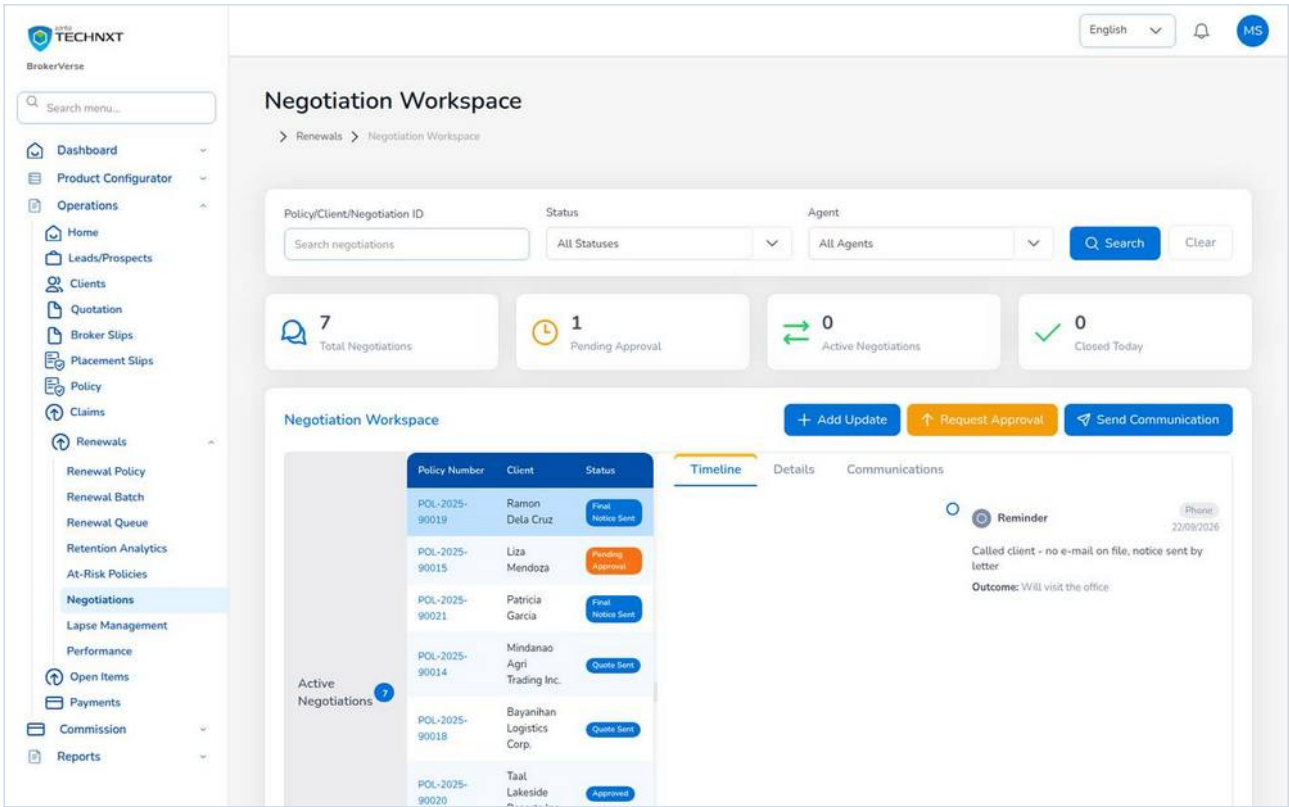

Figure 82. Negotiation Workspace

Use Add Update to record a call or meeting, Request Approval to send renewal terms to the Processing Team and Send Communication to write to the client.

The screenshot shows the 'Batch Renewal' page in the BrokerVerse OOTB system. The left sidebar contains a navigation menu with options like Dashboard, Product Configurator, Operations, Home, Leads/Prospects, Clients, Quotation, Broker Slips, Placement Slips, Policy, Claims, Renewals, Open Items, Payments, and Reports. The 'Renewals' section is expanded, showing sub-options like Renewal Policy, Renewal Batch (selected), Renewal Queue, Retention Analytics, At-Risk Policies, Negotiations, Lapse Management, and Performance.

The main content area is titled 'Batch Renewal' and includes a 'Batch Renewal Management' section. It features a table with columns: Batch ID, Status, Total Policies, Processed, Created Date, and Actions. The table lists two batches:

Batch ID	Status	Total Policies	Processed	Created Date	Actions
RB-2026-90002	Draft	3	0	28/09/2026	[View] [Edit]
RB-2026-90001	Partially Completed (3/4)	4	3	17/09/2026	[View] [Edit]

Below the table is a pagination control showing page 1 of 10.

Figure 83. Batch Renewal

The screenshot shows the 'Lapse Management' page in the BrokerVerse OOTB system. The left sidebar is identical to the previous screenshot, with 'Lapse Management' selected under the 'Renewals' section.

The main content area is titled 'Lapse Management' and includes a search bar for Policy/Insured Name, Status, and Lapse Reason. Below the search bar are four summary cards:

- 3 Total At Risk** (with a red circle icon)
- 2 In Grace Period** (with a yellow clock icon)
- 1 Win-back Eligible** (with a blue refresh icon)
- P61,200.00 Revenue at Risk** (with a red tag icon)

Below these cards are two tabs: 'Lapsed Policies' (selected) and 'Win-back Campaigns'. The 'Lapsed Policies' tab shows a table of lapsed and grace period policies:

Policy Number	Insured Name	Product	Status	Days Lapsed	Premium Lost	Reason	Win-back	Attempts	Actions
POL-2025-90022	Carlo Bautista	Fire and Allied Perils	Lapsed	21 days	P11,200.00	Client did not respond to notices; insured elsewhere	In	1/3	[View] [Edit] [Refresh]
POL-2025-90021	Patricia Garcia	Motor Vehicle Insurance	In Grace Period	14 days left	P40,300.00		Eligible	0/3	[View] [Edit] [Refresh]
POL-2025-90020	Taal Lakeside Resorts Inc.	Personal Accident	In Grace Period	21 days left	P9,700.00		Eligible	0/3	[View] [Edit] [Refresh]

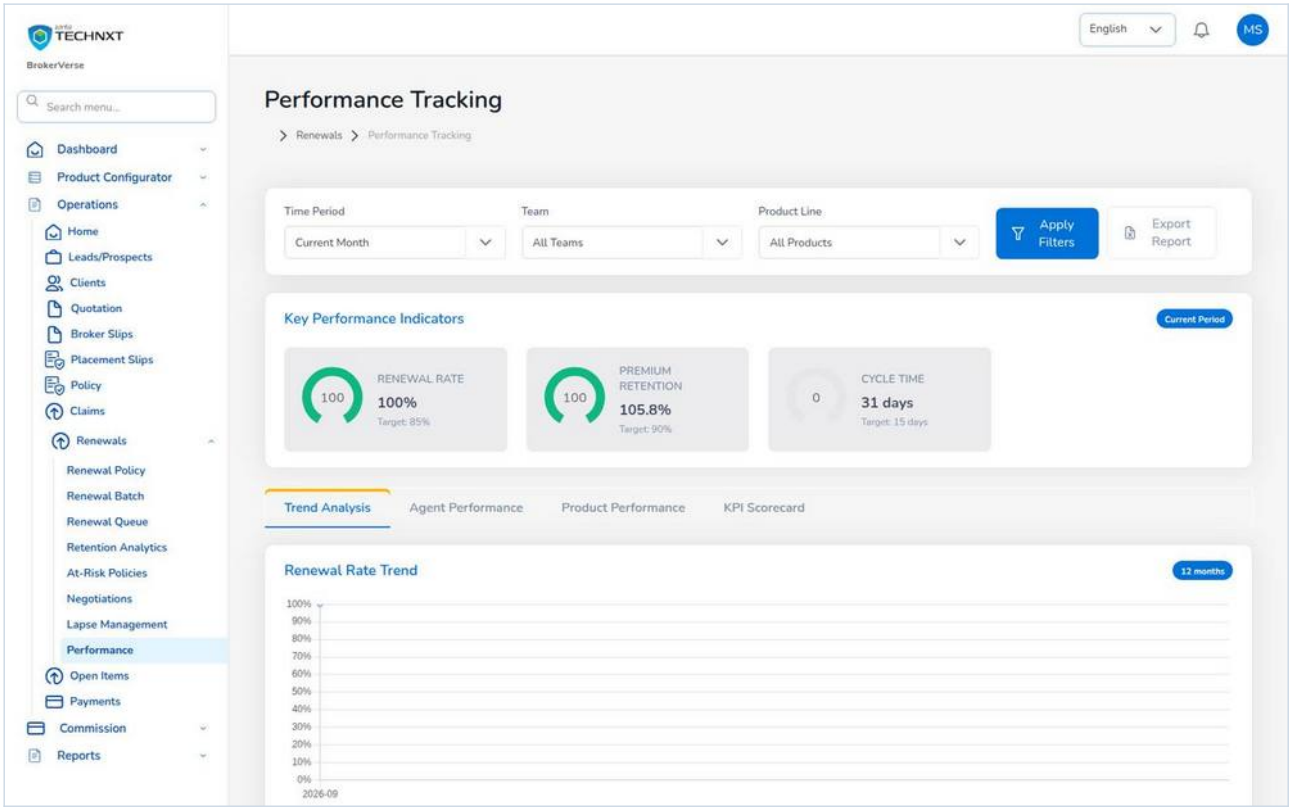

Figure 85. Performance Tracking

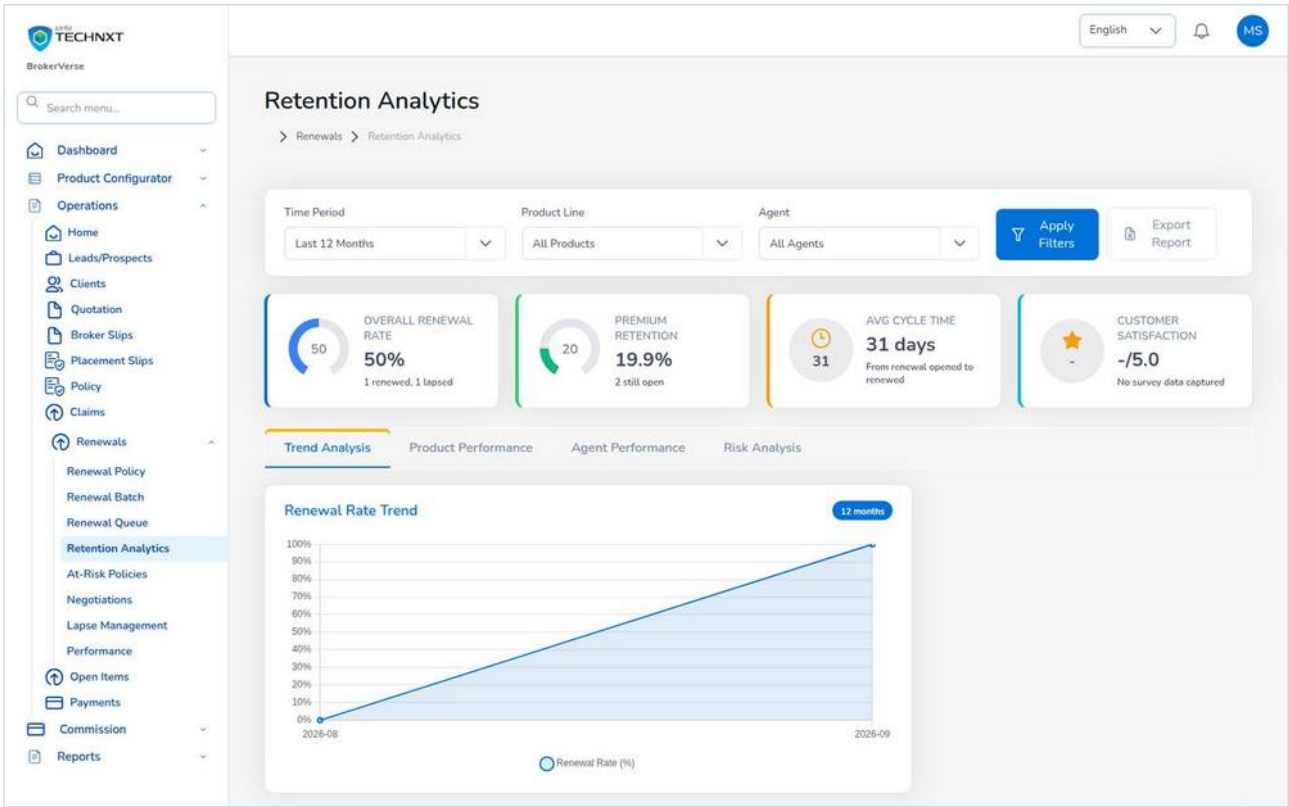

Figure 86. Retention Analytics

13 Open items and payments

13.1 Open Items

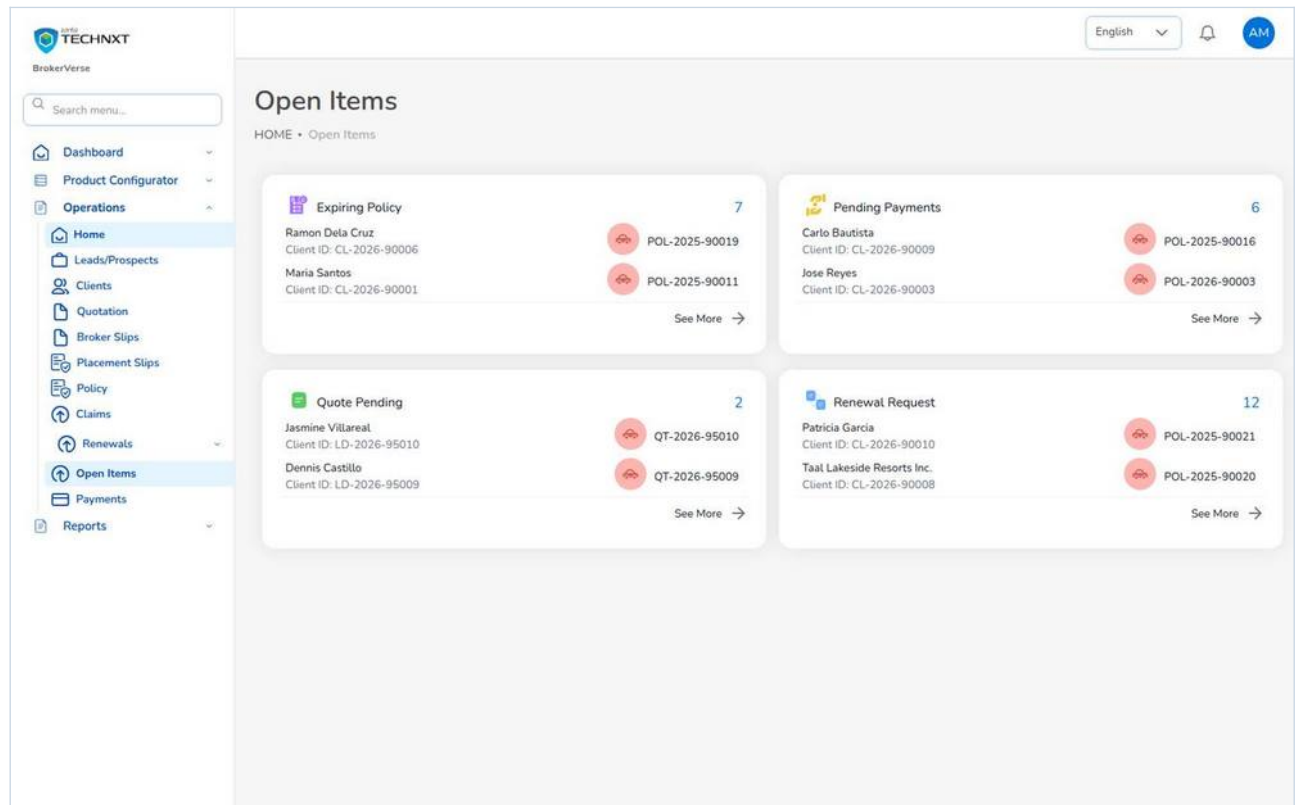

Figure 87. Operations > Open Items

Operations > Open Items is the daily worklist of Operations and Accounting. Four boxes show a count and the first records: Expiring Policy, Pending Payments, Quote Pending and Renewal Request. Select See More to open the full list of a box.

13.2 Payments

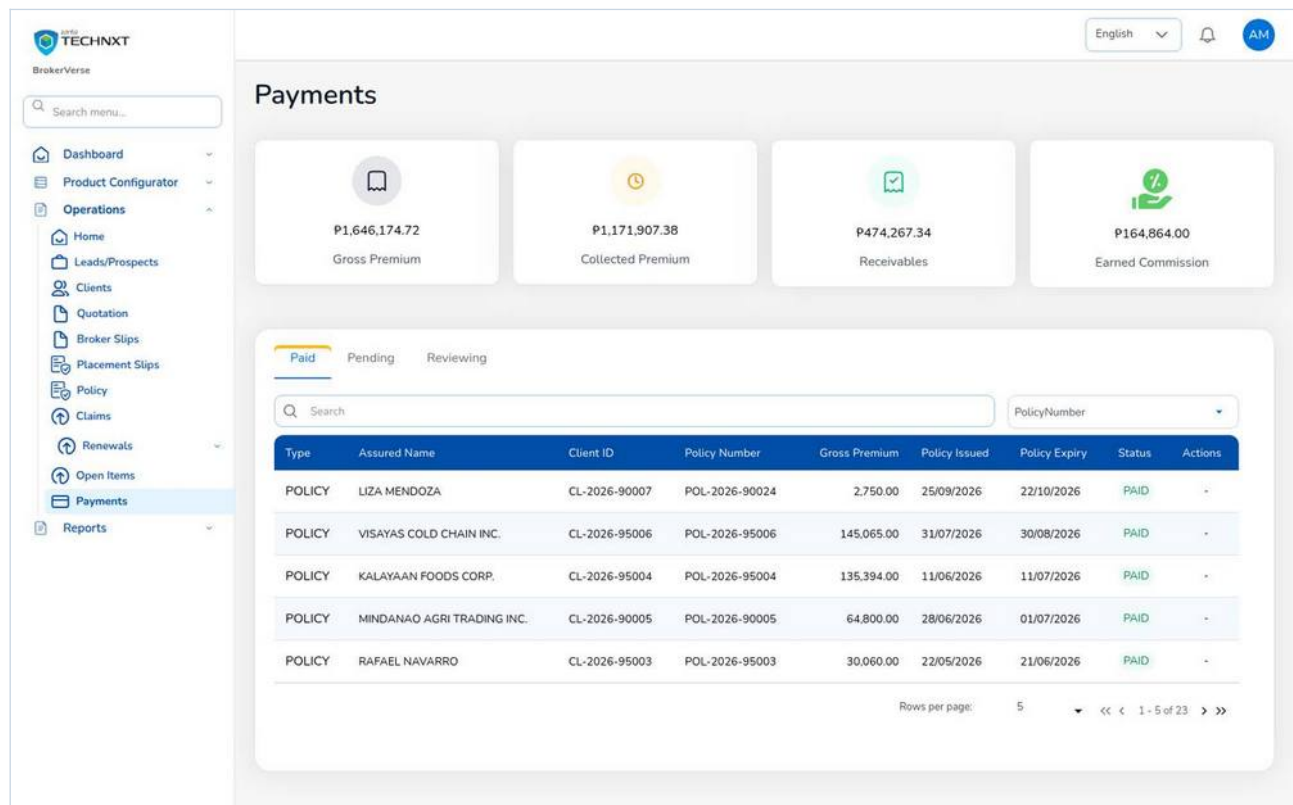

Figure 88. Operations > Payments

Operations > Payments shows gross premium, collected premium, receivables and earned commission, with the bills by tab Paid, Pending and Reviewing. The Type column tells whether the bill is for a policy, a renewal or an endorsement. A premium bill cancelled because the policy is direct bill shows DIRECT BILL. Receipts are posted by Accounting; this screen shows the result.

14 Accounts: receipts, collections and the ledger

14.1 Purpose

The Accounts menu is where Accounting collects premium, pays out money and keeps the general ledger. Every screen posts balanced journals through the posting rules (Chapter 23), and most payments need a second user to approve them.

Menu (Accounts)	Use it to
Receipts	Post official receipts against open bills.
Collections	Follow outstanding premium by ageing bucket, send reminders and import open items at go-live.
Accounting Query, All Clients Accounting	Search the accounting entries; see each client's balance.
Open Entry Matching, Open Entry Un-Matching	Match open debit and credit entries of an account, with write-offs, or undo a match.
Disbursement	Payment vouchers and cheques.
Petty Cash	Initiate, request, disburse, receive and replenish petty cash.
Journal Voucher, Correction JV, Reversal JV	Manual journals, corrections and reversals, with approval.
Remittance	Remittances to insurers, settlements and direct-bill debit notes (Chapter 16).
Incentive	Incentive calculations, approvals and statements (Chapter 21).
Period End, Tax, Bank Reconciliation	Chapters 17, 18 and 19.

14.2 Receipts

The screenshot shows the 'Accounts > Receipts' interface. On the left is a sidebar with a search menu and a list of navigation items including Dashboard, Master, Operations, Accounts, Receipts, Collections, Accounting Query, All Clients Accounting, Open Entry Matching, Open Entry Un-Matching, Disbursement, Petty Cash, Journal Voucher, Correction JV, Reversal JV, Period End, Bank Reconciliation, Tax, Remittance, Incentive, Commission, Reinsurance, and Reports. The main content area has a 'Receipts' header with 'Accounts > Receipts' breadcrumb. It includes buttons for 'Bulk Print', 'Bulk Upload', and '+ Receipt'. Below these is a search bar 'Search by Customer Code' and a 'Search by' dropdown. The 'Receipts history' table contains the following data:

Receipt Number ↑↓	Transaction Code	Transaction Number ↑↓	Policy Number ↑↓	Name ↑↓	Customer Code ↑↓	Date ↑↓	Amount
OR-2026-00018	PAYMENT	RT-2026-00023	POL-2026-90024	LIZA MENDOZA	CL-2026-90007	26/09/2026	P2,750.
OR-2026-95006	PAYMENT	RT-2026-00005	POL-2026-95006	VISAYAS COLD CHAIN INC.	CL-2026-95006	01/08/2026	P145,065.
OR-2026-00017	PAYMENT	RT-2026-00022	POL-2026-90005	MINDANAO AGRI TRADING INC.	CL-2026-90005	29/06/2026	P64,800.
OR-2026-95004	PAYMENT	RT-2026-00004	POL-2026-95004	KALAYAAN FOODS CORP.	CL-2026-95004	12/06/2026	P135,394.

At the bottom of the table, there is a 'Row count: 10' dropdown and pagination controls showing '1 - 10 of 23'.

Figure 89. Accounts > Receipts

The receipts list shows each official receipt with its transaction code and number (RT-), policy, client, date, amount, paid and unpaid amounts and status. Bulk Print prints receipts for a customer and date range on the company letterhead. Bulk Upload posts many receipts from `Receipts_Upload_Template.xlsx` (at most 1,000 rows).

Post a receipt

1. Choose Accounts > Receipts and select Receipt.
2. Check the Receipt Date and keep Receipt Type Payment (choose Refund for money returned).
3. Choose the Branch Code and, if used, the Department Code.
4. In Customer Code, choose the client. The list shows only clients with open bills.
5. In Policy Number, choose the policy.
6. Choose the Receipt Mode and type the Reference No.
7. Select the open bill to pay, then enter the Amount received or select Pay full balance.
8. Add Remarks if needed and select Record payment.

Record payment

Figure 90. Add Receipts

The receipt gets the next number of the Official Receipt series (Master > Document Numbering). The system posts Dr Cash in Bank (or the cash account of the receipt mode) / Cr Premiums Receivable, sets the bill to Partial or Paid, closes the collection item when fully paid, and makes the referrer's commission payable once the premium is fully collected. The amount cannot exceed the bill balance.

14.3 Collections and ageing

Client Name	Policy No.	Outstanding	Current	1-30 Days	31-60 Days	61-90 Days	Over 90 Days	Due Date	Status
Carlo Bautista	POL-2025-90016	P35,650.00	P0.00	P0.00	P0.00	P0.00	P35,650.00	23/12/2025	OVERDUE

Figure 91. Accounts > Collections

Accounts > Collections lists every open premium with the client, policy, outstanding amount across the ageing buckets (Current, 1-30, 31-60, 61-90, over 90 days), due date, status (Pending, Committed, Overdue) and days overdue.

- The due date follows the insurer's Premium Payment Warranty (days) on the Insurance Company master, else `collections.default_credit_days`.
- Reminders are e-mailed to clients 7 days before the due date and then every 7 days by the Collection reminders job (08:00). Send Payment Reminders Now sends them at once.
- The Aging Report shows the total outstanding per bucket, a chart and the detail by client.

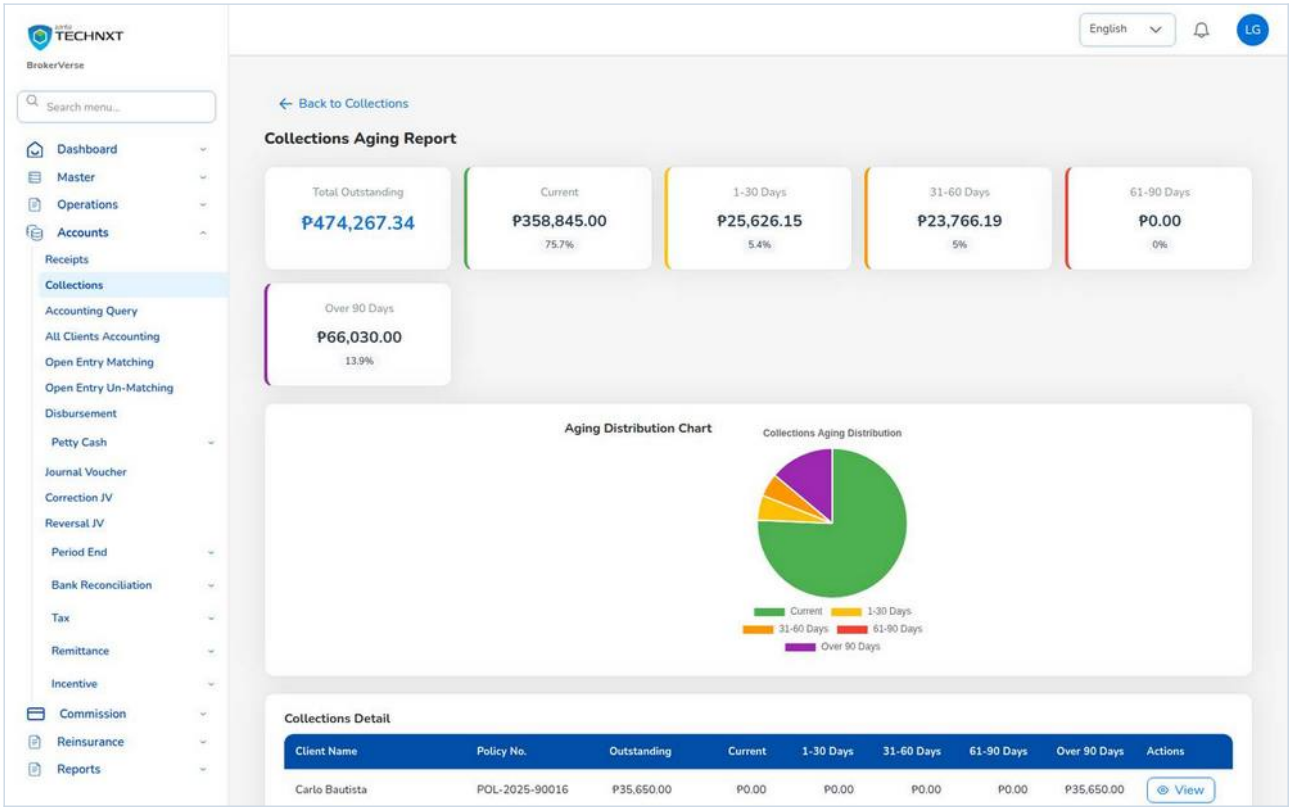

Figure 92. Collections Aging Report

Import open items at go-live

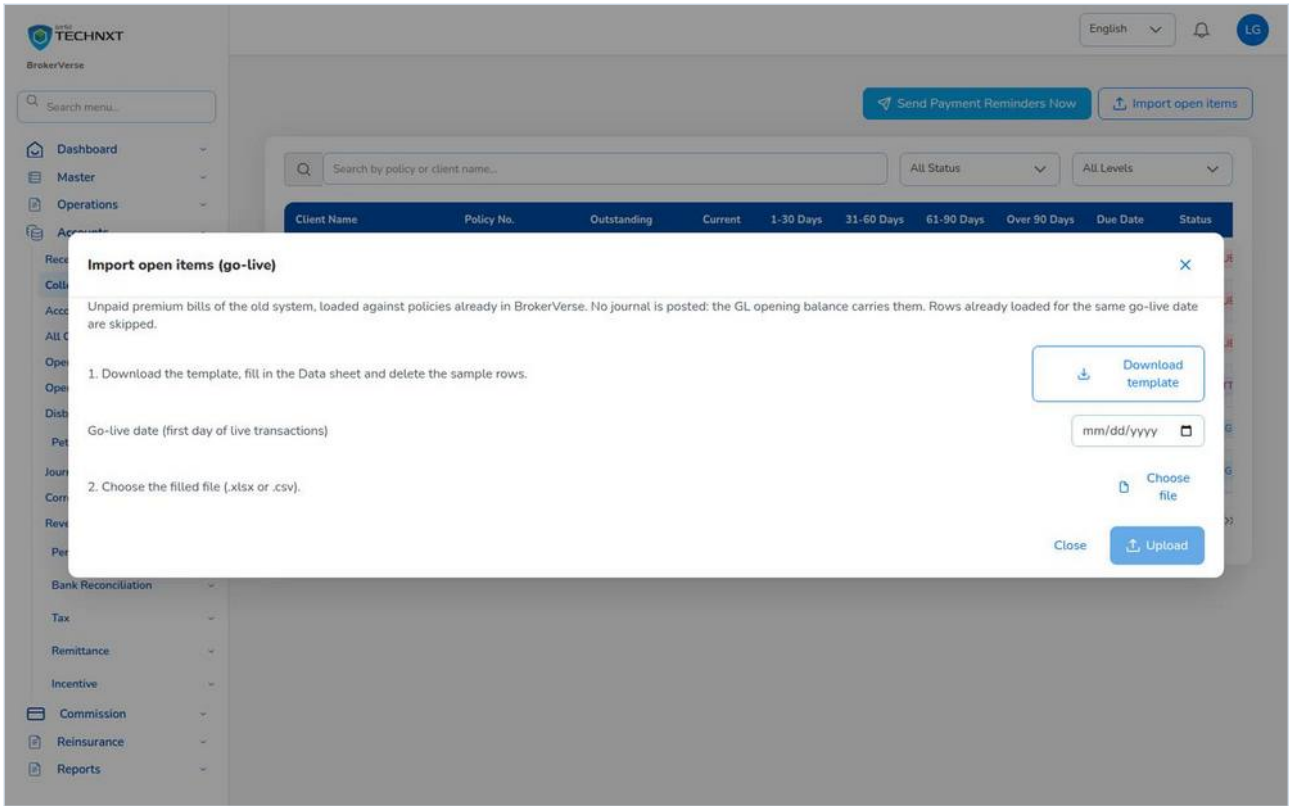

Figure 93. Import open items (go-live)

When you start on BrokerVerse, load the unpaid premium bills of the old system:

1. Select Import open items.
2. Select Download template ([Open_Items_Upload_Template.xlsx](#)) and fill in one row per unpaid bill: policy number, old bill reference, due date, original amount and open balance.
3. Enter the Go-live date (first day of live transactions).
4. Choose the file and select Upload.

No journal is posted: the receivable is part of the GL opening balances (Chapter 17). Rows already loaded for the same go-live date are skipped, so you can upload a corrected file again. The collection list and the ageing report total should equal the old system's ageing at the day before go-live.

14.4 Accounting query and client accounting

The screenshot shows the 'Accounting Entries Query' page in the BrokerVerse application. On the left is a sidebar menu with categories like Dashboard, Master, Operations, and Accounts. The 'Accounts' section is expanded, showing options like Receipts, Collections, Accounting Query (which is selected), All Clients Accounting, Open Entry Matching, Open Entry Un-Matching, Disbursement, Petty Cash, Journal Voucher, Correction JV, Reversal JV, Period End, Bank Reconciliation, Tax, Remittance, Incentive, Commission, Reinsurance, and Reports. The main content area has a header 'Accounting Entries Query' with a subtitle 'Search and filter accounting entries across all policies and clients'. Below this is a search form with fields for Policy ID / Number (Optional), Client ID, Client Name, Entry Type, Reference Type, Status, Start Date, End Date, and GL Code. There are 'Search', 'Export', and 'Reset' buttons. Below the search form, a large box contains a magnifying glass icon and the text 'No entries found. Use the search form above to query accounting entries.'

Figure 94. Accounting Entries Query

Accounting Query searches the accounting entries by policy, client, entry type, reference type, status, dates or GL code. Export downloads the result as CSV. All Clients Accounting shows, for every client, the number of transactions, total debits, total credits and balance.

14.5 Open entry matching and write-offs

TECHNXT
BrokerVerse

English LG

Open Entry Matching
Accounts • Open Entry Matching

Sub Account Code: Sub Account Code
Division: Division
Department: Department
Anly Code 1: Analysis Code 1
Anly Code 2: Analysis Code 2
Currency Code: Currency Code

Pull Match Pull By Criteria ☒ Debit ☐ Credit ☐ Select All? Cash Discount

Debit Entries

	Document No	Doc Dt	Due Dt	FC Amount	LC Amount	Balance FC Amt	Balance LC Amt	Adjustment Amt	Cr	Ok
No results found										
Total:				₱0.00		₱0.00	₱0.00		₱0.00	

Figure 96. Open Entry Matching

Open entry matching settles open debit and credit entries of the same account against each other, for example a receipt against a bill posted without a reference.

1. Choose the Sub Account Code and, if needed, division, department, analysis codes and currency.
2. Select Pull, or Pull By Criteria with Debit or Credit.
3. Tick the entries to match and check the totals.
4. If a small difference remains, enter it as the Adjustment Amt and choose the Write off reason.
5. Select Match.

The write-off reasons and their GL accounts are maintained on Master > Finance > Account Determination, tab Write-off reasons. The delivered reasons are Uncollectible premium (bad debt), Small balance difference (up to ₱ 100.00), Small credit balance taken to income (up to ₱ 100.00) and Foreign exchange difference. A reason with a limit refuses a larger write-off. The system posts the write-off journal with the posting rule of a debit or credit balance write-off. Open Entry Un-Matching undoes a match.

14.6 Disbursement: payment vouchers and cheques

Figure 97. Accounts > Disbursement

A payment voucher PV-YYYY-NNNNN pays an insurer, an agent or referrer, a client or a supplier.

Status	Meaning
Draft	Prepared; amounts may still change.
For approval	Waiting for a second user.
Approved	Approved; the cheque can be printed.
Paid	Paid; the payment journal is posted.
Cancelled	Cancelled before payment.

1. Choose Accounts > Disbursement and select Create.
2. Fill in the header: Disbursement Date, Department Code and Branch Code, Payee Type (Customer, Insurer, Agent/Referrer or Supplier), Criteria (Specific or Payall), the payee and, if needed, the policy. Select Next.
3. On the Invoice List, tick the payables to pay. Select Next.
4. Choose the bank account and cheque book. Save the voucher; it goes for approval.

The screenshot shows the 'Create Disbursement' form in the BrokerVerse system. The left sidebar contains a navigation menu with the following items: Dashboard, Master, Operations, Accounts (selected), Receipts, Collections, Accounting Query, All Clients Accounting, Open Entry Matching, Open Entry Un-Matching, Disbursement (highlighted), Petty Cash, Journal Voucher, Correction JV, Reversal JV, Period End, Bank Reconciliation, Tax, Remittance, Incentive, Commission, Reinsurance, and Reports. The main form area is titled 'Create Disbursement' and includes a breadcrumb trail 'Accounts > Disbursement > Create Disbursement'. The form fields are organized as follows: Disbursement Date (29/09/2026), Department Code (Select), Branch Code (Select), Payee Type (Select), Criteria (Select), Customer Code (Select), Customer Name (Select), Policy Number (Optional) (Select), Transaction Type (Select), Payment Description (text area), Payment Currency (Select), and Payment Notes (Optional) (text area). A 'Next' button is located at the bottom right of the form.

Figure 98. Create Disbursement

A second Accounting user opens the voucher, reviews the cheque details and approves the cheque. The system posts the payment journal (for example Dr Premiums Payable to Insurers / Cr Cash in Bank). Print the approved cheque; the voucher becomes Paid. The maker cannot approve his or her own voucher (`finance_maker_checker_enabled`). Bulk Disburse creates one payout voucher per referrer with approved commission. Bulk Upload loads vouchers from `Disbursements_Upload_Template.xlsx`, and Bulk Print prints vouchers on the company letterhead.

14.7 Petty cash

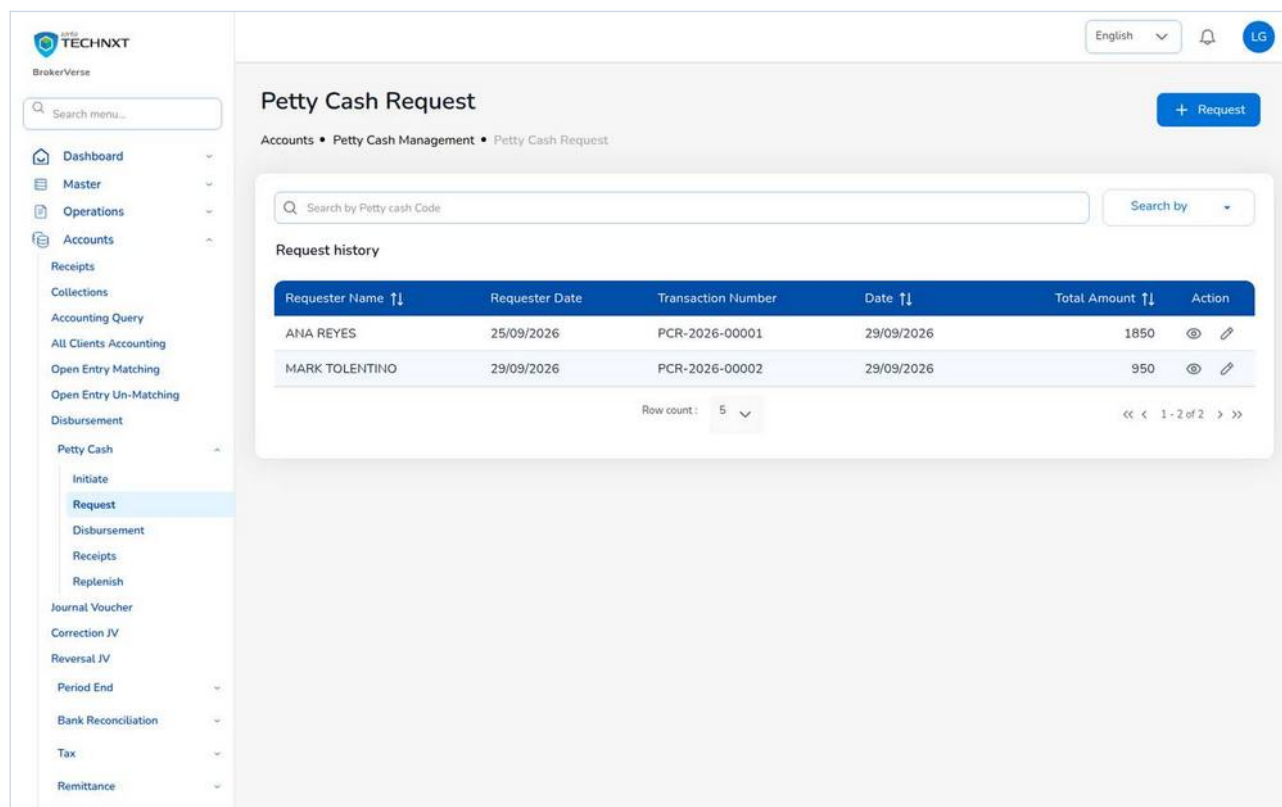

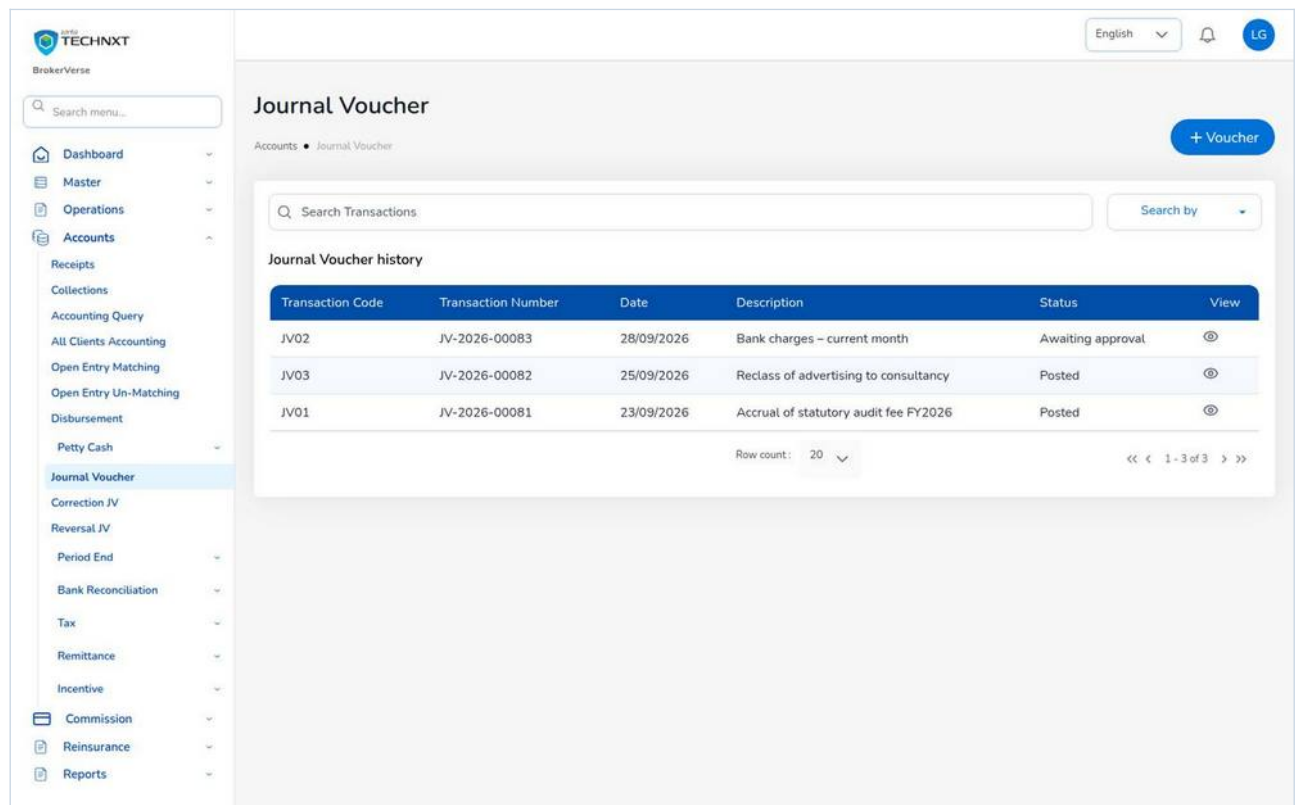

Figure 99. Petty Cash Request

Screen (Accounts > Petty Cash)	Use it to
Initiate	Open a petty cash fund (code, size, maximum per transaction, branch, department).
Request	Record a request for petty cash.
Disbursement	Pay out an approved request from the fund.
Receipts	Record money returned to the fund.
Replenish	Top the fund back up from the bank.

The funds are defined in Master > Finance > Petty cash. The custodian is notified when a fund drops below its minimum. Requests are maker-checker.

Figure 102. Add Journal Voucher: entering a line

An unbalanced voucher is refused with the difference. A voucher dated in a soft-closed period can be posted only by the Accounting Manager, and one dated in a closed period is refused (Chapter 17). The approvers are notified. The checker opens the voucher, checks the lines and approves it (the journal is posted and appears in the Journal Register and the trial balance) or rejects it with a reason.

The screenshot displays the BrokerVerse OOTB interface. On the left is a sidebar menu with the 'iorta TECHNXT' logo and 'BrokerVerse' text. The menu includes sections like 'Dashboard', 'Master', 'Operations', 'Accounts', 'Receipts', 'Collections', 'Accounting Query', 'All Clients Accounting', 'Open Entry Matching', 'Open Entry Un-Matching', 'Disbursement', 'Petty Cash', 'Journal Voucher', 'Correction JV' (highlighted), 'Reversal JV', 'Period End', 'Bank Reconciliation', 'Tax', 'Remittance', 'Incentive', 'Commission', 'Reinsurance', and 'Reports'. The main content area is titled 'Corrections JV Details' and shows a breadcrumb trail: 'Accounts > Corrections JV > Corrections JV Details'. The form contains two rows of input fields: the first row has 'Transaction Code' (a dropdown menu), 'Transaction Description' (a text input), and 'Transaction Number' (a text input); the second row has 'Corrections JV Transaction Code' (a dropdown menu) and 'Correction Description' (a text input). A blue 'Next' button is located at the bottom right of the form area. The top right of the interface shows 'English' with a dropdown arrow, a bell icon, and a user profile icon labeled 'LG'.

Figure 103. Correction JV

Correction JV reverses a posted voucher and posts the corrected lines after approval. Reversal JV posts the opposite entries of a posted voucher after approval. Recurring journals such as monthly rent are set up once as templates (Chapter 17).

15 Commission

15.1 Purpose

The broker earns brokerage commission from the insurer on every policy. Part of it, the comsub, is paid to the agent or referrer who brought the business. BrokerVerse accrues the commission at policy issue, makes it payable when the premium is collected and pays it by voucher less withholding tax.

The brokerage rate comes from the Commission Rate Matrix (Chapter 23), then the insurer's default rate, then `commission.default_rate`. Only Sales & Marketing users earn commission on their production (`commission.eligible_roles`).

Status	Set when	Who
Accrued	The policy is issued, or an endorsement adds premium.	System
Eligible	The premium is fully collected, or Accounting marks it.	System, Accounting
Approved	An Accounting user approves the line; the comsub accrual is posted.	Accounting, not the maker
Paid	The payout voucher is approved; commission payable, cash and withholding tax are posted.	Accounting checker
Reversed	The line is reversed; a clawback journal is posted if it was paid. Return premium claws back the comsub on the returned part.	Accounting

15.2 Commission Dashboard

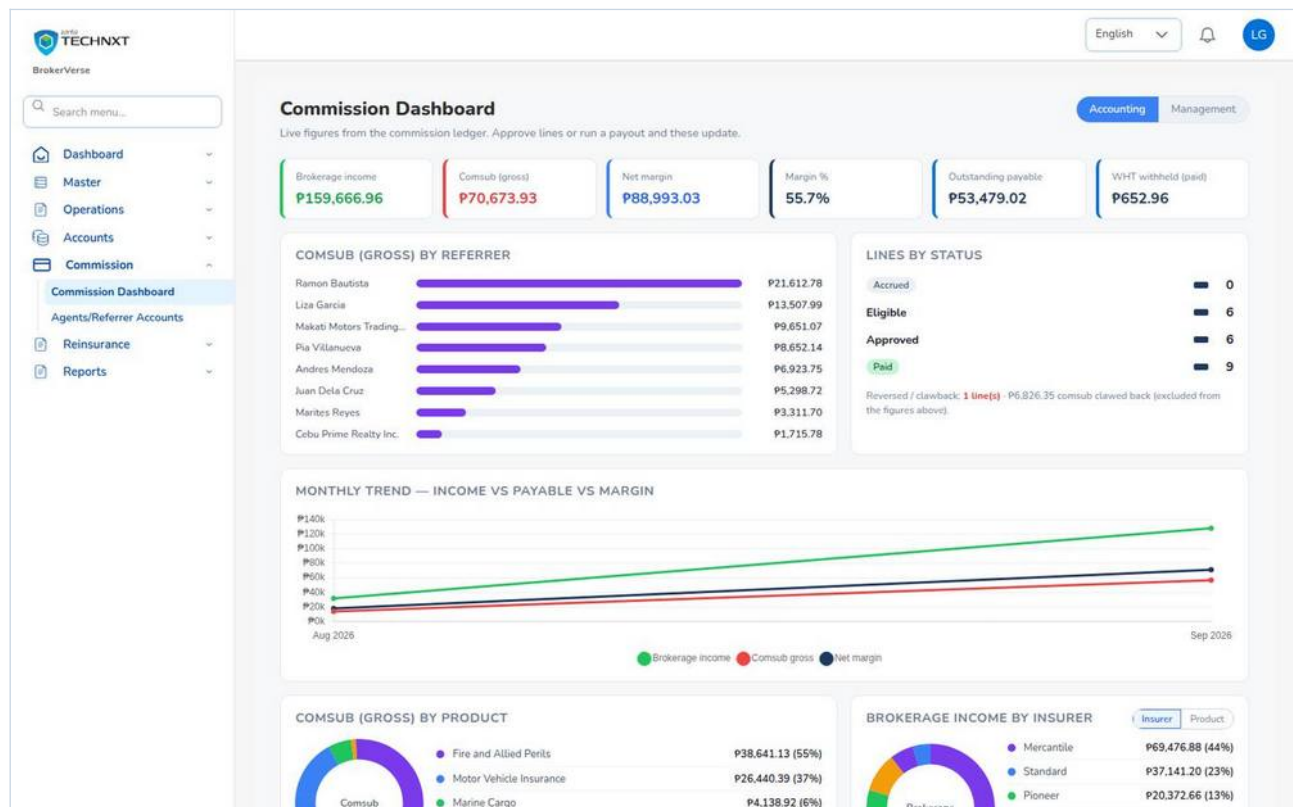

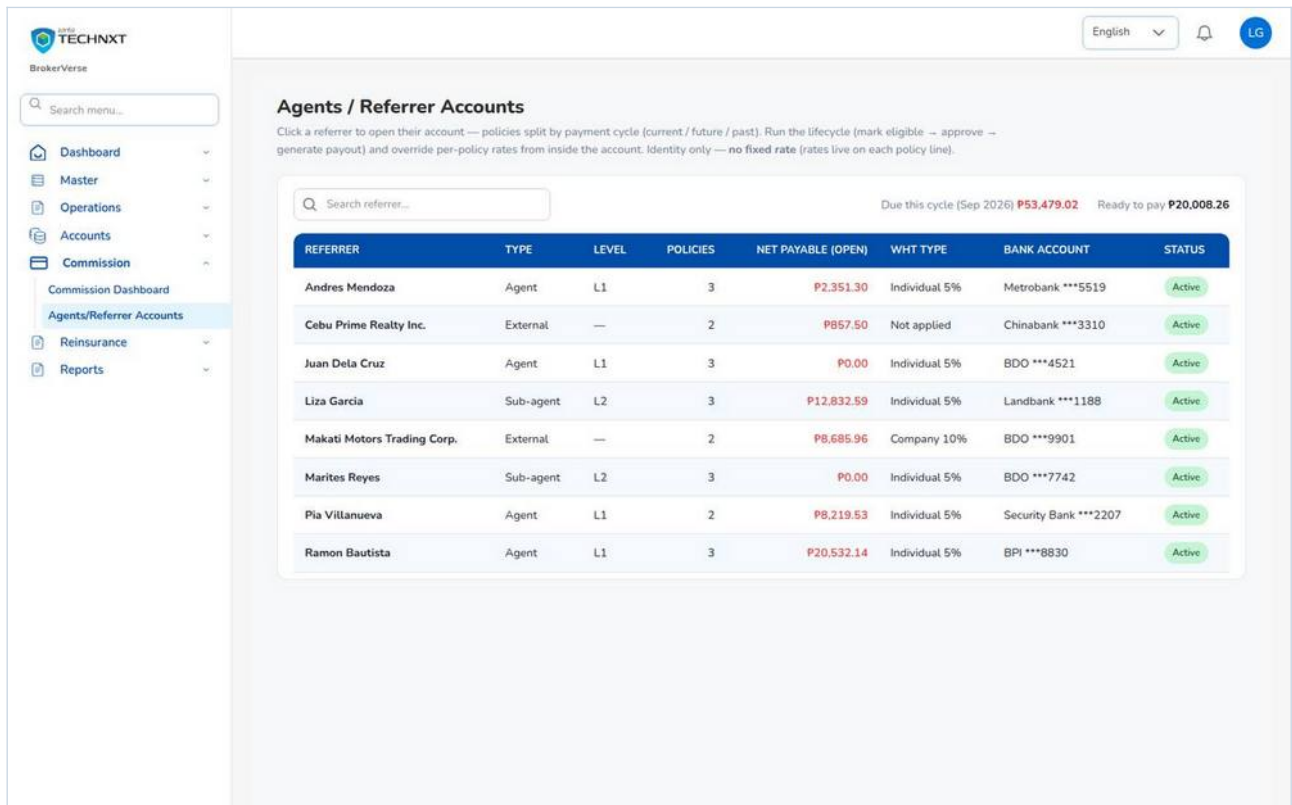

Figure 104. Commission > Commission Dashboard

The dashboard shows brokerage income, comsub, net margin and margin %, the outstanding payable and the withholding tax withheld, with breakdowns by referrer, status, month, product and insurer. Switch between the Accounting and Management views at the top right.

15.3 Pay commission to a referrer

Agents / Referrer Accounts

Click a referrer to open their account — policies split by payment cycle (current / future / past). Run the lifecycle (mark eligible → approve → generate payout) and override per-policy rates from inside the account. Identity only — **no fixed rate** (rates live on each policy line).

Due this cycle (Sep 2026) **P53,479.02** Ready to pay **P20,008.26**

REFERRER	TYPE	LEVEL	POLICIES	NET PAYABLE (OPEN)	WHT TYPE	BANK ACCOUNT	STATUS
Andres Mendoza	Agent	L1	3	P2,351.30	Individual 5%	Metrobank ***5519	Active
Cebu Prime Realty Inc.	External	—	2	P857.50	Not applied	Chinabank ***3310	Active
Juan Dela Cruz	Agent	L1	3	P0.00	Individual 5%	BDO ***4521	Active
Liza Garcia	Sub-agent	L2	3	P12,832.59	Individual 5%	Landbank ***1188	Active
Makati Motors Trading Corp.	External	—	2	P8,685.96	Company 10%	BDO ***9901	Active
Marites Reyes	Sub-agent	L2	3	P0.00	Individual 5%	BDO ***7742	Active
Pia Villanueva	Agent	L1	2	P8,219.53	Individual 5%	Security Bank ***2207	Active
Ramon Bautista	Agent	L1	3	P20,532.14	Individual 5%	BPI ***8830	Active

Figure 105. Commission > Agents/Referrer Accounts

The list shows every referrer with type (Agent, Sub-agent, External), level, number of policies, net payable, WHT type and bank account. The header shows the amount due this cycle and the amount ready to pay.

1. Choose Commission > Agents/Referrer Accounts and select the referrer.
2. Check Apply WHT (individual agents 5%, companies 10%, `commission.wht_rate_by_type`).
3. Under Current cycle, check the eligible lines.
4. Select Approve. Another Accounting user must approve lines you prepared.
5. Select Generate payout. The system creates a draft payout voucher and opens it in Disbursement.
6. Complete the bank details and submit the voucher. A second Accounting user approves it and the lines become Paid.

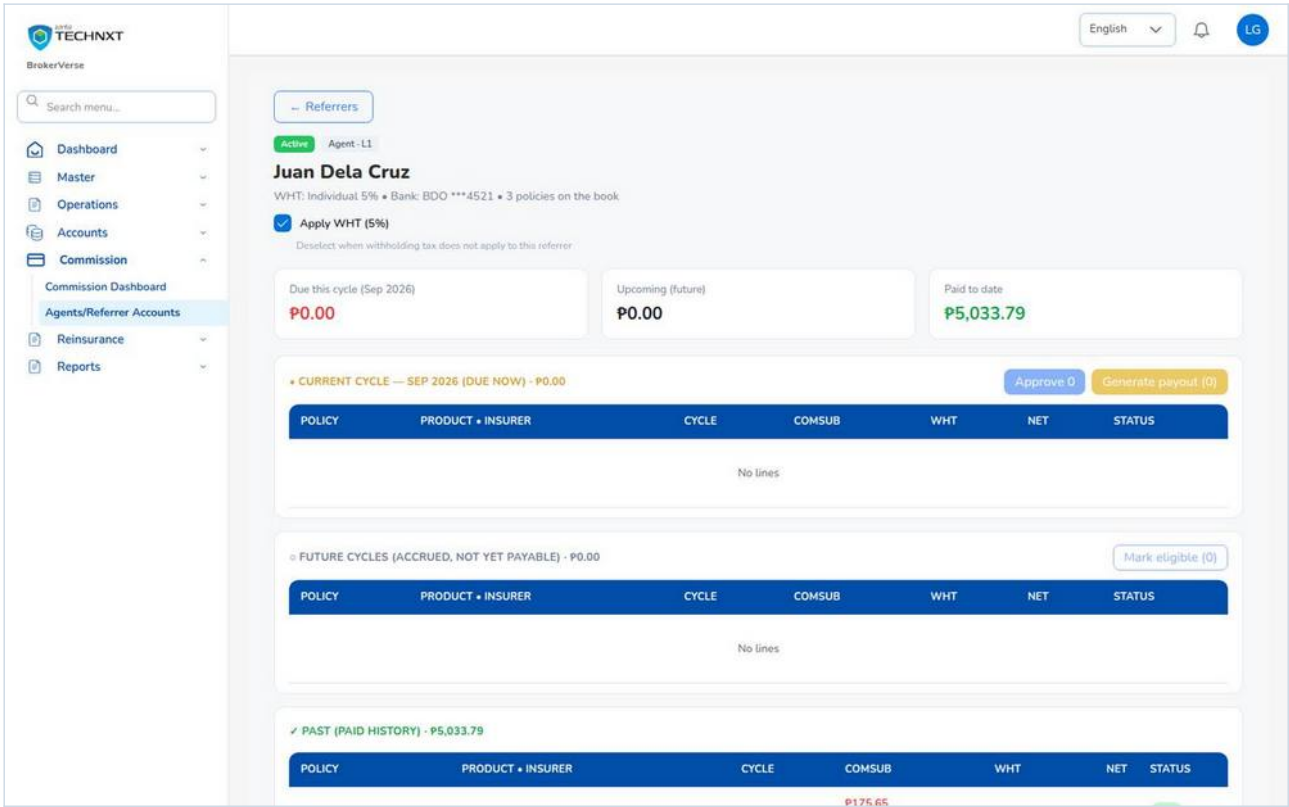

Figure 106. Referrer account

A referrer without a bank account on file cannot be approved or paid. Add the bank details first.

16 Remittance and direct bill

16.1 Purpose

The Remittance menu pays the insurers. For broker-billed policies, Accounting remits the collected premium, net of the broker's commission, to each insurer by its share. For direct-bill policies, Accounting bills the commission to the insurer with a debit note and records the insurer's payment.

Menu (Accounts > Remittance)	Use it to
Automated Processing	Create draft remittances per insurer from the collected, unremitted premium.
Tracking	Follow each remittance and submit drafts for approval.
Statements	Produce remittance statements for insurers.
Settlement	Settle approved remittances with an insurer; raises the insurer payment voucher.
Reconciliation	Match bank transactions with remittances.
Approval Workflow	Approve or reject remittances, settlements, transfers and adjustments.
Direct Bill Processing	Commission debit notes to insurers for direct-bill policies.
Bulk Processing, Scheduling, Electronic Transfer, Exception Management, Agency Bill Processing, Adjustments, Notifications, History, Analytics	Supporting screens.

16.2 Remit premium to an insurer

1. Automated Processing: tick the insurers that are Ready, select Validate, then Process Selected. Draft remittances REM- are created. The due date follows the insurer's Remittance Terms (days after collection), else `remittance.default_due_days`.
2. Tracking: find the draft and select Process. It goes for approval.
3. Approval Workflow: a second Accounting user approves it. The level depends on the amount (level 1 up to ₱ 100,000, level 2 up to ₱ 1,000,000, level 3 above). The initiator cannot approve.
4. Settlement: choose the Insurer code, select Add policies, select Calculate (premium – commission – tax ± adjustments = net settlement) and Submit for approval.
5. The checker approves the settlement (SET-). The system raises the insurer payment voucher in Disbursement for the net amount.
6. Issue and approve the cheque in Disbursement. The voucher becomes Paid and the remittance Completed.

Figure 110. Insurer settlement

For a co-insured policy each insurer is remitted its own share. A refund due from an insurer (return premium on premium already remitted) is netted against its next remittance.

16.3 Direct bill processing

Figure 111. Direct Bill Processing: raise a debit note

The cards show the unbilled commission, the billed and outstanding amount, the overdue amount and the total receivable from insurers.

To raise a commission debit note (maker):

1. Choose Accounts > Remittance > Direct Bill Processing, tab 1. Raise Debit Note.
2. Choose the Insurer, Issued from and Issued to dates and, if needed, the line. Select Load policies.
3. Tick the policies to bill and check the totals: commission, output VAT (12%), total due, EWT (10% of commission) and net cash expected.
4. Check the debit note date. The due date is 30 days later (`direct_bill.debit_note_due_days`).
5. Select Raise debit note and submit for approval, or Save draft.

A second Accounting user approves it on tab 2. Debit Notes, then prints it on the company letterhead and e-mails it to the insurer. When the insurer pays, open the debit note, choose Collections, enter the cash received, the tax withheld (EWT), the payment mode and reference, and select Post collection. Partial payments are allowed.

Tab 3. Billing Mode changes a policy between Direct bill and Broker billed with a reason. Switching to direct bill cancels the premium bill and books the commission due from the insurer. The change is refused once premium was collected or remitted, or once the commission is on a debit note.

Direct bill processing

Direct bill: the client pays the premium directly to the insurer. The broker bills its commission (with VAT) to the insurer with a commission debit note and collects it net of the insurer's expanded withholding tax (BIR Form 2307).

Unbilled commission: P0.00

Billed, outstanding: P0.00

Overdue: P0.00

Receivable from insurers: P0.00

1. Raise Debit Note 2. Debit Notes 3. Billing Mode

Mark an issued policy as direct bill (the client pays the insurer) or return it to broker billing. Direct bill cancels the premium bill and books the commission due from the insurer; the change is refused once premium was collected or remitted, or once the commission is on a debit note. New policies take their billing mode from the payment step at issue (default in System Settings, direct_bill.default_billing_mode).

Figure 114. Remittance history

17 Period end

17.1 Purpose

Accounts > Period End holds the fiscal calendar and the closing work of Accounting: period status, the month-end close, recurring and accrual journals, the year-end close and the financial statements.

Accounting prepares; the Accounting Manager approves.

Menu (Accounts > Period End)	Use it to
Period Management	See the fiscal years and their periods, soft-close, close or reopen a period, and import the go-live opening balances.
Month-End Close	Run the month-end steps and checklist for a period and send the close for approval.
Year-End Close	Close income and expense to retained earnings and carry the balances into the next year.
Recurring Journals	Keep templates for journals that repeat every month, and accruals that reverse on day 1 of the next period.
Financial Statements	Income statement, balance sheet and trial balance for any dates.

The close checklist items are maintained on Master > Finance > Close Checklist.

17.2 Period Management

Period Management
Accounts > Period End > Period Management

Fiscal years and their accounting periods. Soft-closed periods accept postings from Accounting Managers only; closed periods accept none; periods of a closed fiscal year are locked.

FY2026 (Open) + Next fiscal year Import opening balances

Fiscal year	Year status	Open	Soft-closed	Closed	Locked
FY2026 01/01/2026 – 31/12/2026	Open	13	0	0	0

Figure 115. Accounts > Period End > Period Management

A fiscal year (for example FY2026) has twelve monthly periods (2026-01 to 2026-12) and an adjustment period 13 (2026-13) used by the year-end close. The fiscal year starts in the month set in `accounting.fiscal_year_start_month` (January). Years are created when needed; Next fiscal year opens the following one.

Period status	Who may post into it
Open	Everyone with posting rights.
Soft-closed	Only the Accounting Manager. Other users are refused with Accounting period ... is soft-closed.
Closed	Nobody. Reopen the period first.
Locked	Nobody. The periods of a closed fiscal year are locked.

The Actions column offers Soft-close and Close for open periods and Reopen for closed ones. Every change asks for remarks and is kept in the period history with the user and time. Reopening a period and posting into a soft-closed period need the Accounting Manager (approve:period-end).

Period Management
Accounts • Period End • Period Management

Figure 116. Period Management seen by the Accounting Manager

Import the go-live opening balances

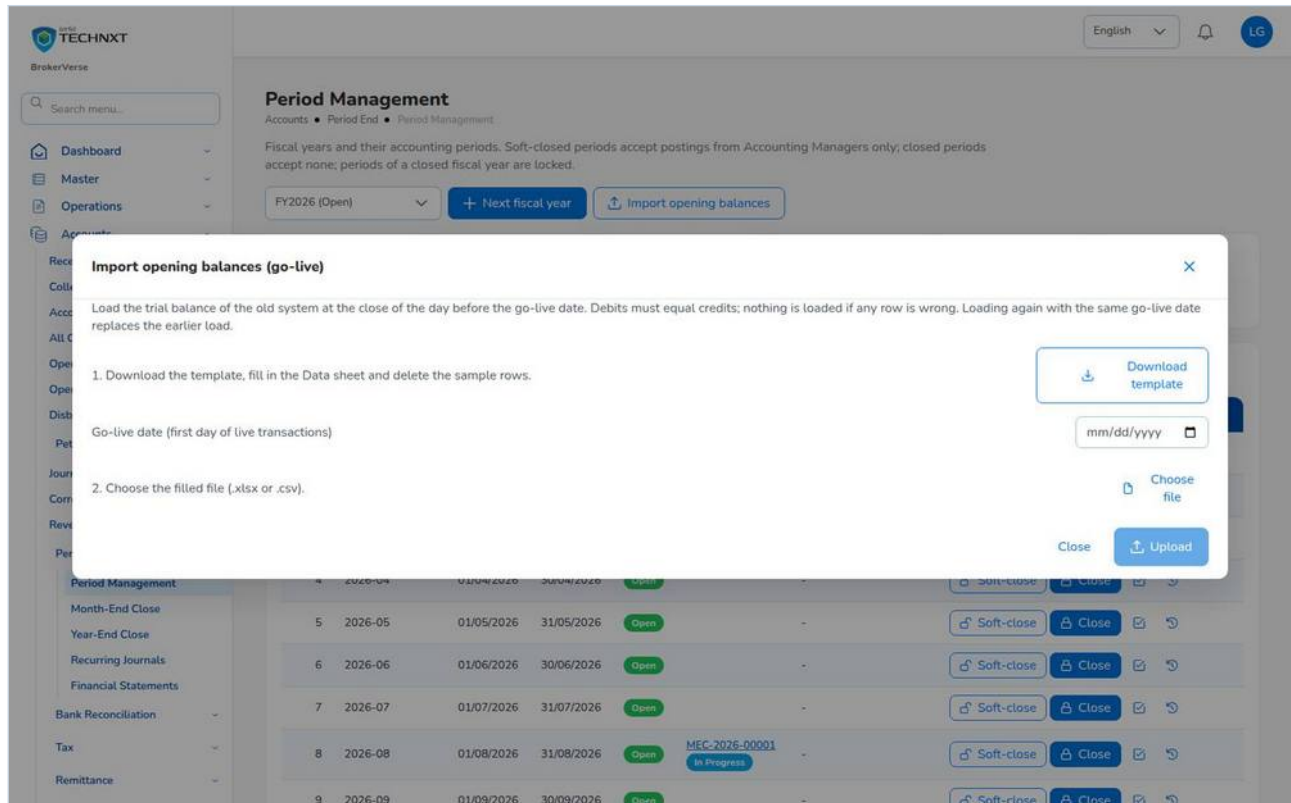

Figure 117. Import opening balances (go-live)

1. Select Import opening balances.
2. Select Download template ([Opening_Balances_Upload_Template.xlsx](#)) and enter the old system's trial balance at the day before go-live, one row per account with a debit or a credit.
3. Enter the Go-live date.
4. Choose the file and select Upload.

Debits must equal credits, otherwise nothing is loaded. Loading again with the same date replaces the earlier load. The balances go into the fiscal year that contains the go-live date and are read by the trial balance, financial statements, general ledger detail and bank reconciliation; the year-end close carries them forward. No opening journal is posted, so screens that add up journals only, such as Accounting Query, show movements from the go-live date. A go-live date after journals already posted in the same fiscal year is refused. The balance of Premiums Receivable must equal the open items imported on Accounts > Collections (Chapter 14).

17.3 Month-End Close

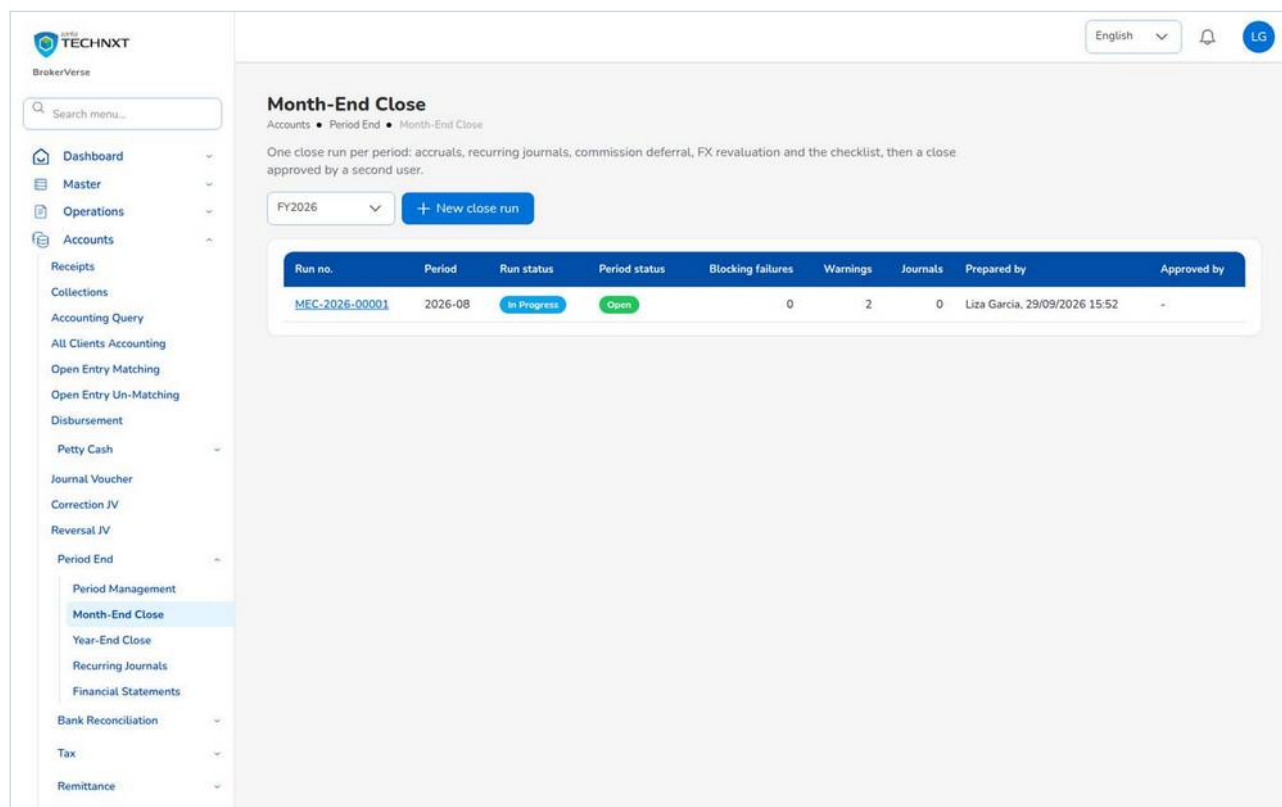

Figure 118. Accounts > Period End > Month-End Close

There is one close run per period. The list shows each run with its number (MEC-), period, run status, period status, blocking failures, warnings, journals created, preparer and approver.

1. Select New close run and choose the period.
2. Open the run and select Rerun steps (the first time, the steps run when the run is created and executed). The run executes the steps in order:

Step	What it does
(a) Accruals	Posts the accrual templates of the period (Recurring Journals, kind accrual). They reverse on day 1 of the next period.
(b) Recurring journals	Posts the recurring templates due in the period that have not run yet.
(c) Commission deferral	Defers unearned commission when <code>accounting.defer_commission</code> is on; otherwise Skipped.
(d) FX revaluation	Revalues foreign-currency balances of the account types in <code>accounting.fx_revaluation_account_types</code> .
(e) Checklist	Runs the automatic checklist items and lists the manual ones.

1. Read the checklist. Automatic items show Passed, Warning or Failed with the reason, for example 1 bank account(s) with activity in 2026-08 have no approved bank reconciliation: ACC-BDO-001. Fix what failed, then select Re-run checks.
2. Sign off each manual item with Sign off once it is done, for example Bank reconciliations reviewed and signed off.
3. Select Submit close.

Step	Journal	Date	Description	Amount	Auto-reversal	Status
No journals generated						

Figure 119. Month-end close run MEC-2026-00001 for 2026-08 with its steps and checklist

A blocking item that has failed or is not signed off stops the submit; a warning does not. When `accounting.period_close_requires_approval` is on (delivered setting), the Accounting Manager opens the submitted run and selects Approve, or Reject with a reason. The approver must be a different user from the preparer. On approval the period becomes closed. With the setting off, the submit closes the period directly.

Rerunning the steps first reverses the run's own earlier journals, so a rerun gives the same ledger as a single run. Cancel run reverses the run's journals and ends the run.

The Month-End Close Status report (Reports > Financial Reports) shows each period's run and checklist result.

The close checklist

Close Checklist
Accounts • Period End • Close Checklist

Items copied to every month-end close run. Automatic items run a built-in check; manual items are signed off by a user. Blocking items must pass or be signed off before a period closes.

Order	Code	Item	Type	Severity	Status	Actions
10	unposted_journals	No unposted or pending journals in the period Journals dated in the period still pending, for approval or approved but not posted	Automatic	Failed	Active	Edit
20	trial_balance	Trial balance balances Total debits equal total credits as of the period end	Automatic	Failed	Active	Edit
30	suspense_balance	Suspense account is cleared Balance of the suspense account (accounting.account.suspense) as of the period end is zero	Automatic	Failed	Active	Edit
40	unapplied_receipts	No unapplied receipts Receipt lines paid but not applied to a bill up to the period end	Automatic	Warning	Active	Edit
50	unreconciled_bank	Bank transactions reconciled Every bank account linked to a GL cash account with activity in the period (GL postings or statement lines) has an approved bank reconciliation for the period (Accounts > Bank Reconciliation). Make the item blocking to stop the close until then.	Automatic	Warning	Active	Edit
60	policies_without_accounting	Issued policies are billed Broker-billed policies inception in or before the period with neither a receivable nor a journal	Automatic	Warning	Active	Edit
70	remittances_due	Remittances to insurers paid Approved remittances for the period or earlier not yet settled, and open insurer payables	Automatic	Warning	Active	Edit
80	direct_bill_unbilled	Direct-bill commission billed Direct-bill commission booked up to the period end not yet on a commission debit note	Automatic	Warning	Active	Edit
100	bank_reconciliation_signoff	Bank reconciliations reviewed and signed off Finance manager confirms every bank account is reconciled to the statement	Manual	Failed	Active	Edit Delete

Figure 120. Master > Finance > Close Checklist

Master > Finance > Close Checklist holds the items copied to every close run. Automatic items run a built-in check; manual items are signed off by a user. Each item is Blocking or Warning.

Delivered item	Type	Severity
No unposted or pending journals in the period	Automatic	Blocking
Trial balance balances	Automatic	Blocking
Suspense account is cleared	Automatic	Blocking
No unapplied receipts	Automatic	Warning
Bank transactions reconciled	Automatic	Warning
Issued policies are billed	Automatic	Warning
Remittances to insurers paid	Automatic	Warning
Direct-bill commission billed	Automatic	Warning
Bank reconciliations reviewed and signed off	Manual	Blocking
Prepayments and depreciation reviewed	Manual	Warning
Payroll and statutory contributions booked	Manual	Warning

Select Add item to add a manual item of your own, and change the severity of an item to make it blocking. The bank reconciliation check looks at periods from `bank_reconciliation.check_from_period` onwards.

17.4 Recurring Journals

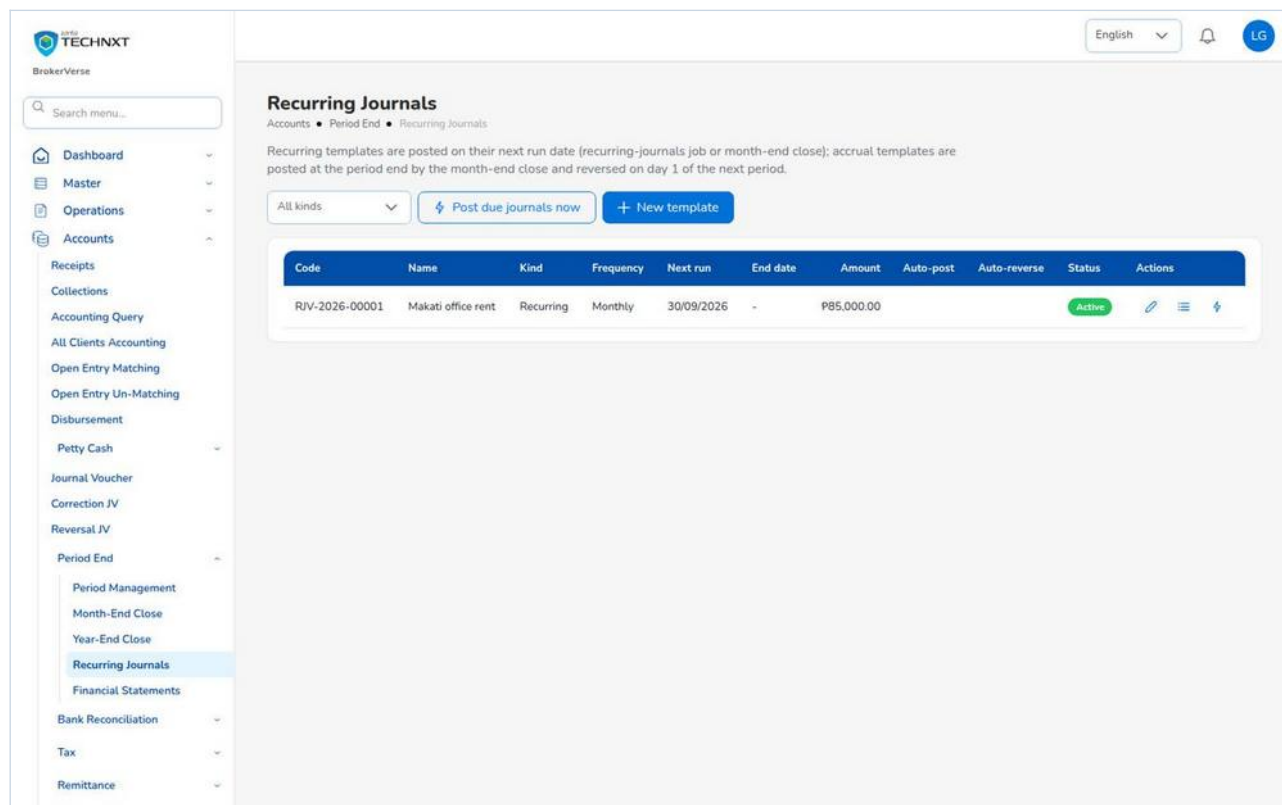

Figure 121. Accounts > Period End > Recurring Journals

A recurring template (RJV-) posts the same journal every month, quarter or year, for example office rent. An accrual template posts at the period end through the month-end close and reverses on day 1 of the next period.

1. Select New template.
2. Enter the Name, Kind (recurring or accrual), Frequency, Start date, Next run and, if needed, End date.
3. Enter the lines with account and debit or credit. The template must balance.
4. Choose Auto-post (post without approval) and, for accruals, Auto-reverse.
5. Save.

Recurring templates post on their next run date through the Recurring journals job (Master > Schedules, off in the delivered set-up) or through the month-end close. Post due journals now posts every template that is due. The Accrual auto-reversal job reverses accruals, commission deferrals and FX revaluations on day 1 of the next period.

17.5 Year-End Close

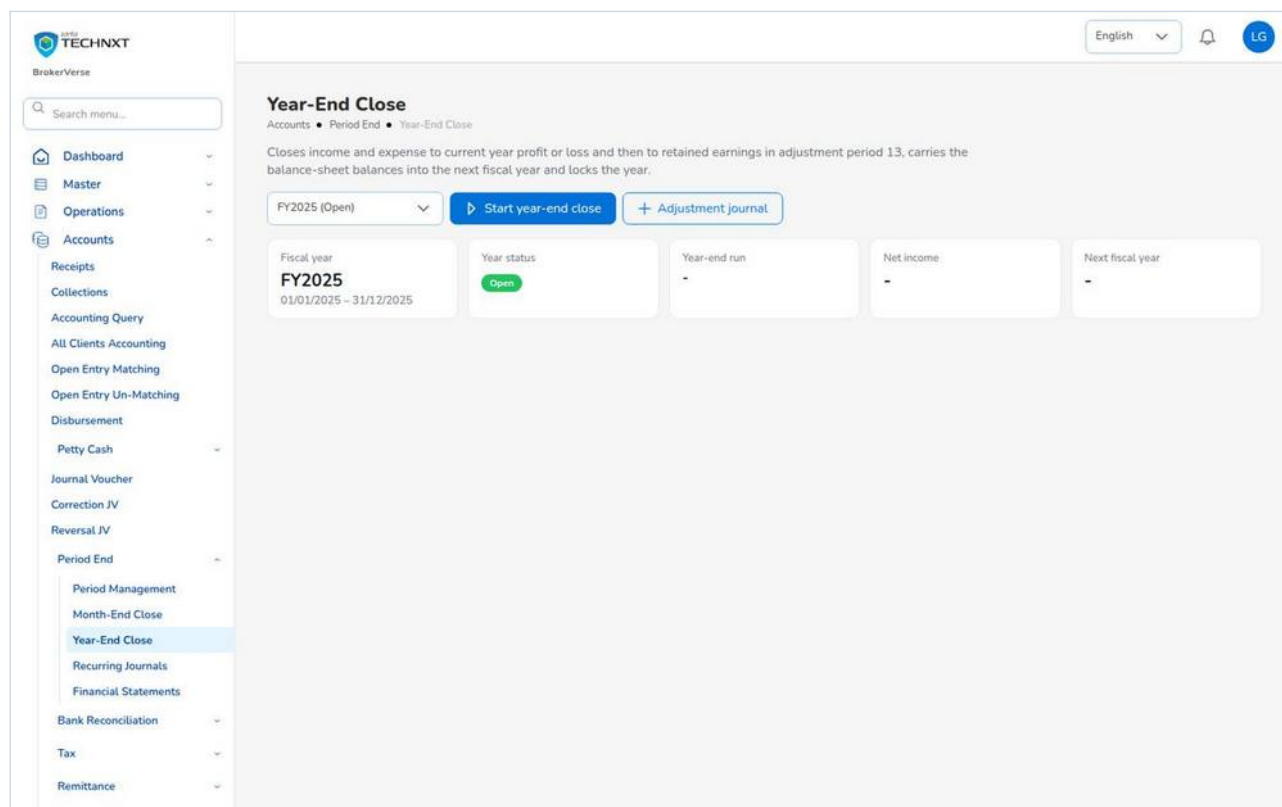

Figure 122. Accounts > Period End > Year-End Close

The year-end close needs all twelve periods of the year closed and period 13 open.

1. Choose the fiscal year and select Start year-end close. The year becomes closing and the run gets a number YEC-.
2. Select Run checks. The Pre-checks confirm that the periods are closed and the trial balance balances.
3. Post any audit adjustments with Adjustment journal. They are dated the fiscal year end, posted in period 13 and approved by a second user.
4. The Accounting Manager selects Close the year. The system posts the closing entries in period 13 (income and expense to Current Year P/L, `accounting.account.current_year_pl`, then to Retained Earnings, `accounting.account.retained_earnings`), writes the balance-sheet balances at year end as the opening balances of the next year (no opening journal is posted), locks the periods and creates the next year.

Reverse the close (Accounting Manager, with a reason) reverses the closing entries, removes the opening balances and unlocks the periods. It is possible until the first period of the next year is closed.

17.6 Financial Statements

The screenshot displays the 'Financial Statements' section in the BrokerVerse application. The left sidebar contains a navigation menu with options like Dashboard, Master, Operations, Accounts, Receipts, Collections, Accounting Query, All Clients Accounting, Open Entry Matching, Open Entry Un-Matching, Disbursement, Petty Cash, Journal Voucher, Correction JV, Reversal JV, Period End, Bank Reconciliation, Tax, and Remittance. The 'Financial Statements' section is currently selected.

The main content area shows the 'Financial Statements' header with a breadcrumb trail: Accounts > Period End > Financial Statements. Below this, there's a description: 'Income statement with year to date and prior year, balance sheet with the prior year end, and the trial balance with opening, movement and closing balances.' An 'Export' button is visible in the top right corner.

The interface includes filters for 'From date' (01/09/2026) and 'To date' (29/09/2026). Three tabs are available: 'Income Statement' (selected), 'Balance Sheet', and 'Trial Balance'. Below the filters, four summary boxes display key figures:

- Total income: **P42,907.50**
- Total expenses: **P121,585.38**
- Net income: **-P78,677.88**
- Net income, year to date: **P37,138.37**

The 'Income Statement' table for the period 01/09/2026 – 29/09/2026 is shown below:

Account	Current period	Year to date	Prior year period	Prior year to date
Income				
Revenue				
3201001 Brokerage Commission Income	P42,907.50	P158,723.75	P7,890.00	P9,570.00
Total Revenue	P42,907.50	P158,723.75	P7,890.00	P9,570.00
Total Income	P42,907.50	P158,723.75	P7,890.00	P9,570.00
Expenses				
Cost of Services				
4401010 Commission Expense – Agents and Referrers (Comsub)	P34,933.59	P34,933.59	P0.00	P0.00
Total Cost of Services	P34,933.59	P34,933.59	P0.00	P0.00
Operating Expenses				
4401002 Advertising and Marketing	-P12,000.00	-P12,000.00	P0.00	P0.00

Figure 123. Accounts > Period End > Financial Statements: income statement

Financial Statements offers three tabs for the From date and To date you choose:

- Income Statement: current period, year to date, prior year period and prior year to date, grouped into revenue, cost of services and operating expenses, with net income.
- Balance Sheet: balances at the To date against the prior year end.
- Trial Balance: opening, movement and closing balance per account.

Export downloads the statement. The same statements are reports under Reports > Financial Reports (Income Statement, Balance Sheet, Trial Balance Movement, General Ledger Detail), where you can also produce them as PDF on the company letterhead.

18 Tax

18.1 Purpose

Accounts > Tax prepares the BIR forms and working papers from the ledger. The tax codes, with their rates, BIR ATC and GL accounts, are kept on Master > Finance > Taxation.

Menu (Accounts > Tax)	What it produces
BIR Form 2307	Certificates of Creditable Tax Withheld at Source, per payee and quarter: issued by the broker, and received from insurers and clients.
VAT Summary	Vatable revenue (commission and fees), output VAT, input VAT and net VAT payable per month or quarter: the working paper for BIR 2550M / 2550Q.
SAWT	Summary Alphalist of Withholding Taxes: the tax withheld from the broker by insurers and clients, for the income tax return.
QAP	Quarterly Alphalist of Payees: the tax the broker withheld from its payees, for BIR 1601EQ.
SLSP Sales, SLSP Purchases	Summary List of Sales and of Purchases for the VAT relief submission.

Before the first filing, fill in `bir.withholding_agent_tin`, `bir.registered_name`, `bir.registered_address` and `bir.zip_code` on Master > Configuration, group BIR. The ATC used for each payee type comes from `bir.atc_by_payee`, and SAWT uses `bir.sawt_default_atc` where no ATC is recorded.

18.2 BIR Form 2307

BIR Form 2307
Accounts > Tax > BIR Form 2307

Certificates of creditable tax withheld at source per payee and quarter: tax the broker withheld on payment vouchers (issued) or tax insurers and clients withheld from the broker (received).

Issued by us | Received | 2026 | Q3

Payees: **4** | Income payments subject to expanded withholding tax: **P19,885.47** | Tax withheld for the quarter: **P1,335.60**

Payee's name	Taxpayer Identification Number (TIN)	ATC	Transactions	Income payments subject to expanded withholding tax	Tax withheld for the quarter	Certificate
Andres Mendoza	345-678-912-000	WI515	2	P4,448.70	P222.44	
Juan Dela Cruz	123-456-789-000	WI515	3	P5,298.72	P264.93	
Makati Motors Trading Corp.	789-123-456-000	WC515	1	P6,826.35	P682.64	
Marites Reyes	567-891-234-000	WI515	3	P3,311.70	P165.59	

Figure 124. Accounts > Tax > BIR Form 2307

1. Choose Accounts > Tax > BIR Form 2307.
2. Choose Issued by us (tax the broker withheld on payment vouchers to agents, referrers and suppliers) or Received (tax insurers and clients withheld from the broker).
3. Choose the year and quarter. The list shows each payee with TIN, ATC, number of transactions, income payments and tax withheld.
4. Select View on a payee to see the certificate with the three months of the quarter.
5. Issue the certificate. It gets a number from the BIR Form 2307 series (CWT-) and prints on the BIR layout with the broker's details. An issued certificate is kept; issuing again returns the same one. Cancel withdraws it with a reason.

For direct-bill commission, the tax the insurer withheld is posted to Creditable Withholding Tax (BIR 2307) when the debit note collection is recorded, and appears under Received.

18.3 VAT Summary, SAWT, QAP and SLSP

VAT Summary
Reports • Tax • VAT Summary

Vatable revenue (commission and fees), output VAT and input VAT per month or quarter from the ledger, with the net VAT payable (BIR 2550M / 2550Q working paper).

Report Criteria * From Date * To Date *

WI516	EWT	WI516	EWT on commission of sales representatives and marketing agents – individual (above P3M)	10%	2204001	Purchases	01/01/2026	Active
WC515	EWT	WC515	EWT on commission of marketing agents and referrers – corporate	10%	2204001	Purchases	01/01/2026	Active
WC158	EWT	WC158	EWT 1% – purchases of goods by top withholding agents	1%	2204001	Purchases	01/01/2026	Active

Figure 129. Master > Finance > Taxation: tax codes

The tax codes master lists VAT (output 12%, input 12%, zero-rated, exempt), expanded withholding tax codes with their BIR ATC (for example WI139 and WC139 on broker commission, WI515 on commission of sales representatives and referrers), final withholding, documentary stamp, local government and premium taxes. Each code has its rate, GL account, what it applies to (sales, purchases or both), effective date and status. Select Add tax code for a new code, or edit a code when a rate changes, with the new effective date. Verify the rates and ATCs against the current BIR regulations with your tax adviser.

19 Bank reconciliation

19.1 Purpose

Bank reconciliation matches the lines of each bank statement with the cash-account lines of the ledger, posts the bank items not yet in the books and produces the monthly bank reconciliation statement. Accounting prepares each reconciliation; the Accounting Manager approves it.

Menu (Accounts > Bank Reconciliation)	Use it to
Reconciliation Workspace	Import statements, match lines, post bank items and start the reconciliation of an account and period.
Reconciliations	The list of reconciliations (BRC-) with their status, and each reconciliation statement.
Reconciliation Statement Report, Outstanding Cheques, Deposits in Transit, Unmatched Bank Lines, Bank Book	Reports for any bank account and date.

The set-up is on Master > Finance: Bank (bank accounts, each linked to its GL cash account and statement format, with the reconcile-from date), Bank Statement Formats and Bank Transaction Types.

19.2 The Reconciliation Workspace

Bank Reconciliation
Accounts > Bank Reconciliation > Reconciliation Workspace

Match the bank statement lines with the book entries of the bank account's GL cash account, post the bank items not yet in the books, then prepare the reconciliation for approval.

[Reconciliations](#) [Bank account setup](#)

Figure 130. Accounts > Bank Reconciliation > Reconciliation Workspace for ACC-BDO-001, August 2026

Choose the Bank account and the Period. The cards show the Balance per bank (from the latest statement), the Balance per books (GL cash account at the period end), the unmatched bank lines and book entries with their totals, and the Difference between the adjusted balances. Below are the bank statement lines and the book entries, each filtered to Unmatched or All.

Import a bank statement

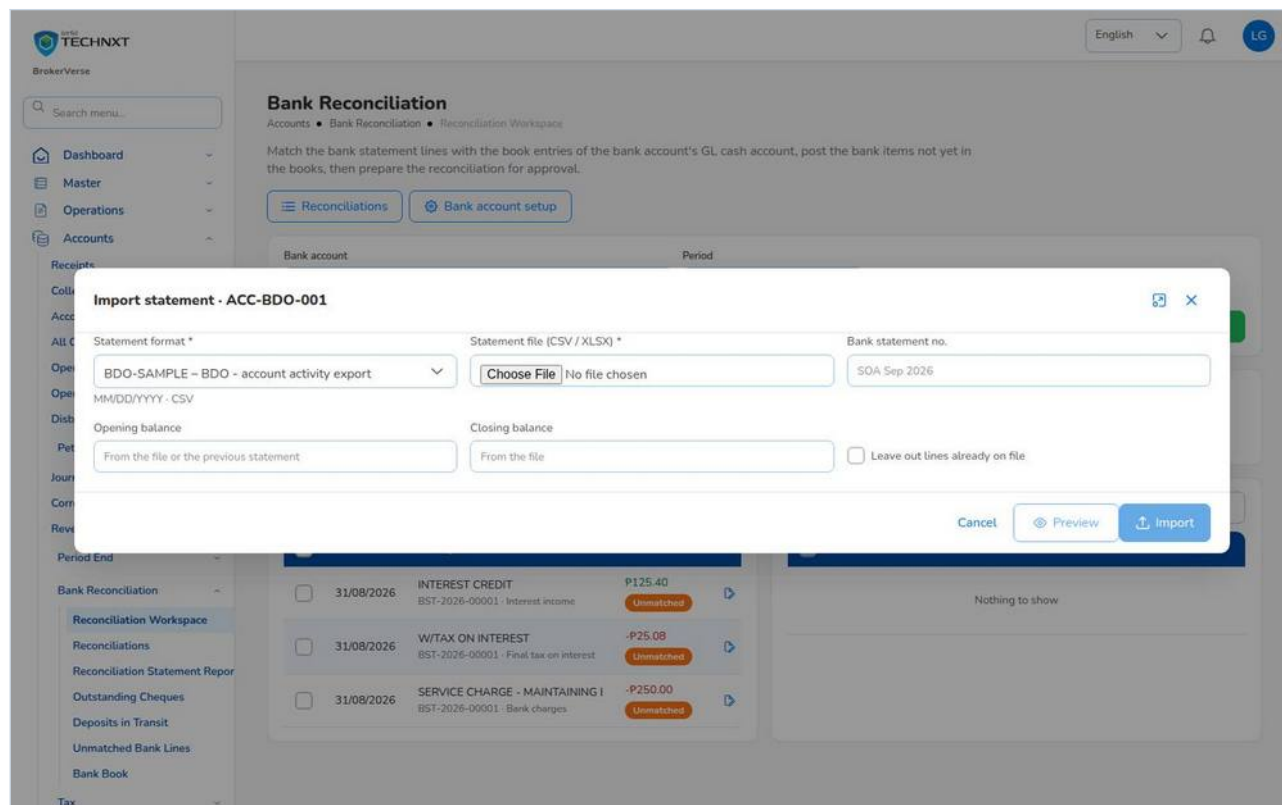

Figure 131. Import statement

1. Select Import statement.
2. Choose the statement Format (BDO-SAMPLE, BPI-SAMPLE, MBT-SAMPLE, GENERIC or one of your own) and the file (CSV or XLSX as downloaded from the bank's online banking).
3. Enter the statement reference, for example SOA Aug 2026.
4. Select Preview. The preview shows the opening and closing balance, the lines read and any rows that could not be read. The statement must balance (opening + credits – debits = closing) when `bank_reconciliation.require_balanced_statement` is on.
5. Select Import. The statement gets a number (BST-).

A file already imported for the account is refused. Automatic matching runs straight after import when `bank_reconciliation.auto_match_on_import` is on. For a bank without a delivered format, use `Bank_Statement_Generic_Upload_Template.xlsx` with the GENERIC format, or add a format. A statement can also be entered by hand.

Match

Auto-match runs the matching rules on the account, in this order, on exact amounts only:

Rule	Confidence
Adjustment journals (a bank line and the journal made from it)	100%
Reversed entries (a book entry and its reversal)	100%
Amount and reference or cheque number	100%

Rule	Confidence
Amount and date window (bank_reconciliation.date_window_days, 5 days), one candidate on each side	80%
One bank line, several book entries (a deposit of several receipts)	65%
Several bank lines, one book entry	60%

Match the rest by hand: tick one or more bank lines and one or more book entries with the same total and select Match selected. When the amounts differ, choose the Treatment of the difference: an adjustment journal, a bank error or a book error. A match can be undone with Unmatch until the reconciliation that cleared it is approved.

Post bank items not yet in the books

Bank charges, interest, final tax on interest and direct credits appear on the statement before they are in the books. Select the bank line and choose Create adjustment. The Bank transaction type proposes the account from the line's description (for example SERVICE CHARGE suggests BCHG Bank charges). The system posts the adjustment journal and matches it to the line. Types marked Approval required, such as a direct credit from an insurer booked to suspense, wait for a second user (Approve adjustment journal). A line the bank posted in error is marked with Mark as bank error instead.

A returned cheque (DAIF or DAUD) uses the type Returned cheque: the official receipt is cancelled and the client's receivable is opened again.

Stale cheques

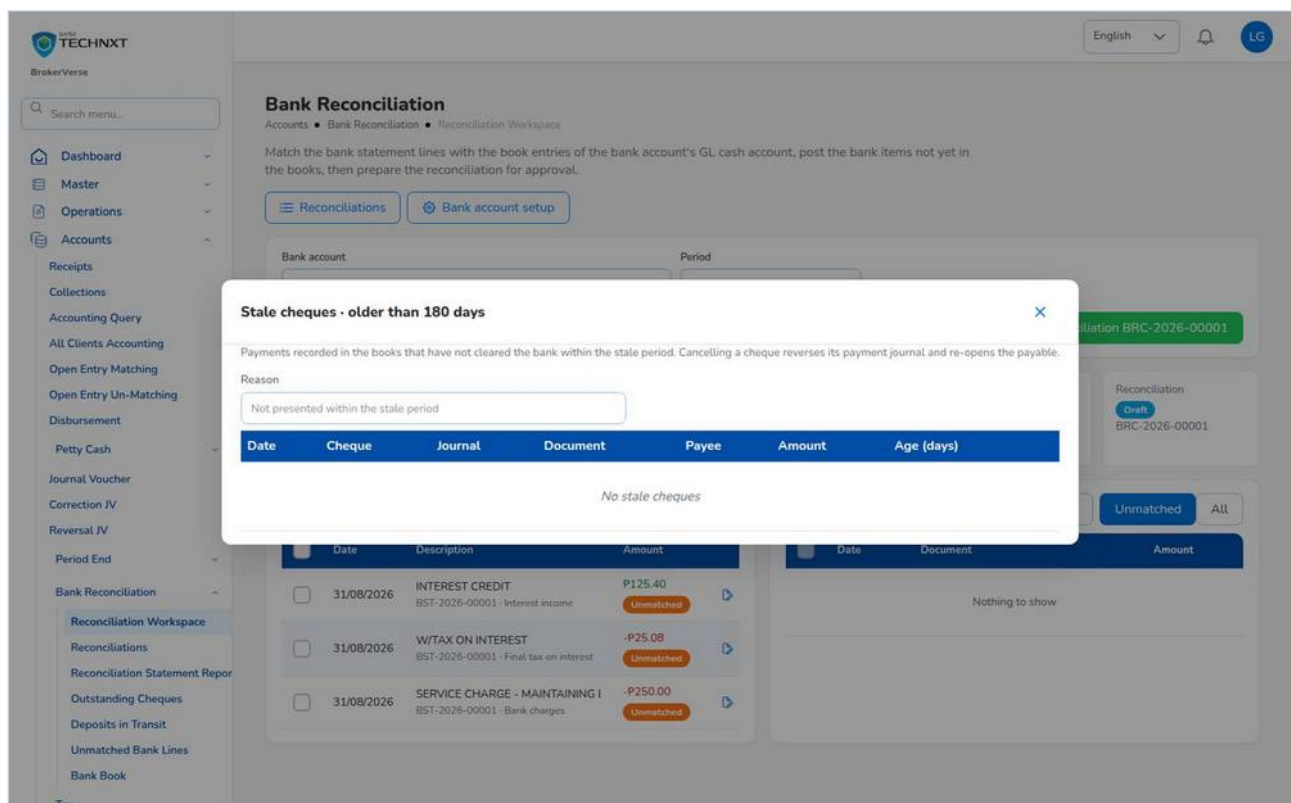

Figure 132. Stale cheques

Stale cheques lists the cheques issued more than `bank_reconciliation.stale_cheque_days` (180 days) ago that have not cleared the bank. Cancel a stale cheque to reverse the payment and reopen the payable.

19.3 Prepare and approve the reconciliation

1. On the workspace, select Start reconciliation for the account and period. The reconciliation (BRC-) opens as Draft with live figures.
2. Check the Bank Reconciliation Statement: balance per bank statement, deposits in transit, outstanding cheques and bank errors give the adjusted bank balance; balance per books, bank credits not yet booked, bank charges not yet booked and book errors give the adjusted book balance. The Difference must be ₱ 0.00.
3. Select Prepare. The figures are frozen and the reconciliation waits for approval.
4. The Accounting Manager opens it from Reconciliations and selects Approve. The approver must not be the preparer. Approval locks the matches cleared up to the period end.

Figure 134. Accounts > Bank Reconciliation > Reconciliations

Print PDF prints the statement on the company letterhead. An approved reconciliation can be reopened by the Accounting Manager with remarks, for example to correct a match; the history lists every status change. The month-end checklist item Bank transactions reconciled looks for an approved reconciliation of each bank account with activity in the period.

19.4 Reports

The screenshot shows the 'Bank Reconciliation Statement' report interface. On the left is a sidebar menu with categories like Dashboard, Master, Operations, and Accounts. The 'Accounts' section is expanded, showing options like Receipts, Collections, Accounting Query, All Clients Accounting, Open Entry Matching, Open Entry Un-Matching, Disbursement, Petty Cash, Journal Voucher, Correction JV, Reversal JV, Period End, Bank Reconciliation (which is further expanded to show Reconciliation Workspace, Reconciliations, Reconciliation Statement Repo, Outstanding Cheques, Deposits in Transit, Unmatched Bank Lines, and Bank Book), and Tax. The main content area is titled 'Bank Reconciliation Statement' and includes a breadcrumb trail: Reports > Bank Reconciliation > Bank Reconciliation Statement. Below this is a descriptive paragraph about bank reconciliation. The report configuration section includes:

- Report Criteria ***: A dropdown menu set to 'Overall'.
- From Date ***: A date field set to '01/09/2026' with a calendar icon.
- To Date ***: A date field set to '29/09/2026' with a calendar icon.
- Status**: An empty text field.
- Bank Account**: A dropdown menu set to 'Select'.
- File format**: Three buttons: 'CSV', 'Excel (XLSX)' (which is highlighted), and 'PDF'.
- Actions**: Two buttons: 'Preview' and 'Generate'.

Figure 135. Reconciliation Statement Report

Report	What it shows
Bank Reconciliation Statement	The statement of an account as of a date.
Outstanding Cheques	Payments in the books not cleared by the bank as of the To Date, aged; stale cheques marked.
Deposits in Transit	Receipts in the books not yet on the bank statement.
Unmatched Bank Lines	Statement lines not matched as of the To Date.
Bank Book	Every movement of the account with the running balance.

19.5 Set-up masters

Bank Statement Formats

Master • Finance • Bank Statement Formats

How each bank's statement export is read: column mapping, date format, title rows and amount sign. Formats marked Example follow typical layouts; check them against the bank's actual file.

Code	Name	Bank	Date format	Amounts	Status
BDO-SAMPLE	BDO - account activity export Standard layout of a BDO online banking CSV export: Posting Date (MM/DD/YYYY), Description, Check Number, Debit, Credit, Running Balance. Adjust the columns here if the bank changes its export.	BDO	MM/DD/YYYY	Debit / credit	Active
BPI-SAMPLE	BPI - transaction history Standard layout of a BPI transaction history download: three title rows, then Date (MMM DD, YYYY), Transaction Description, Reference Number, Debit, Credit, Running Balance. Adjust the columns here if the bank changes its export.	BPI	MMM DD, YYYY	Debit / credit	Active
GENERIC	Generic (Date, Description, Reference, Debit, Credit, Balance) Standard layout: one header row with Date, Value Date, Description, Reference / Cheque No., Debit, Credit and Balance columns (or a signed Amount column)		YYYY-MM-DD	Signed amount	Active
MBT-SAMPLE	Metrobank - statement with signed amount Standard layout of a Metrobank statement export with a single signed Amount column (withdrawals negative): Txn Date (DD/MM/YYYY), Value Date, Particulars, Ref No, Amount, Balance. Adjust the columns here if the bank changes its export.	MBT	DD/MM/YYYY	Signed amount	Active

Figure 136. Master > Finance > Bank Statement Formats

A statement format tells the system how to read a bank's export: the column of each field, the date format, the number of title rows and whether amounts are in debit and credit columns or one signed column. The delivered formats follow the usual exports of BDO, BPI and Metrobank and a generic layout. Check them against an actual file from your bank and adjust the columns if the bank changes its export. Test a format with a sample file before you use it.

Bank Transaction Types

Master • Finance • Bank Transaction Types

Bank items not yet in the books and the journal their adjustment posts: account role or GL account, approval, and the description pattern that suggests the type on imported lines.

Code	Name	Direction	Posts to	Approval	Description pattern	Status
BCHG	Bank charges Service charges, cheque book fees, transfer fees debited by the bank	Bank debit (money out)	bank_charges (4401004)	-	(service svc bank) ?(charge chg fee) chq ?book checkbook transfer fee instapay fee pesonet fee	Active
INT	Interest income Interest credited on the deposit (gross)	Bank credit (money in)	interest_income (3301001)	-	interest (credit earned income) int\.? ?cr	Active
FTAX	Final tax on interest Final tax withheld by the bank on deposit interest	Bank debit (money out)	final_tax_interest (4601002)	-	w/?h(olding)? ?tax final tax tax withheld	Active
RCHQ	Returned cheque Deposited cheque returned unpaid (DAIF / DAUD): the official receipt is cancelled and the receivable re-opened	Bank debit (money out)	Cancel the official receipt	-	return(ed)? (check cheque chq) daif daud dishono	Active
DCR-INS	Direct credit from insurer Unidentified credit from an insurer (claim or commission payment) booked to suspense until identified	Bank credit (money in)	suspense (1901001)	Required	insurance assurance insurer	Active
DCR-CLI	Direct credit from client Client paid straight into the bank without an official receipt yet: booked to suspense (or a chosen account)	Bank credit (money in)	suspense (1901001)	-	instapay pesonet fund transfer ibft online transfer	Active
DDR-	Other bank debit Other debits by the bank (auto-debit arrangements)	Bank debit (money out)	suspense (1901001)	Required		Active

Figure 137. Master > Finance > Bank Transaction Types

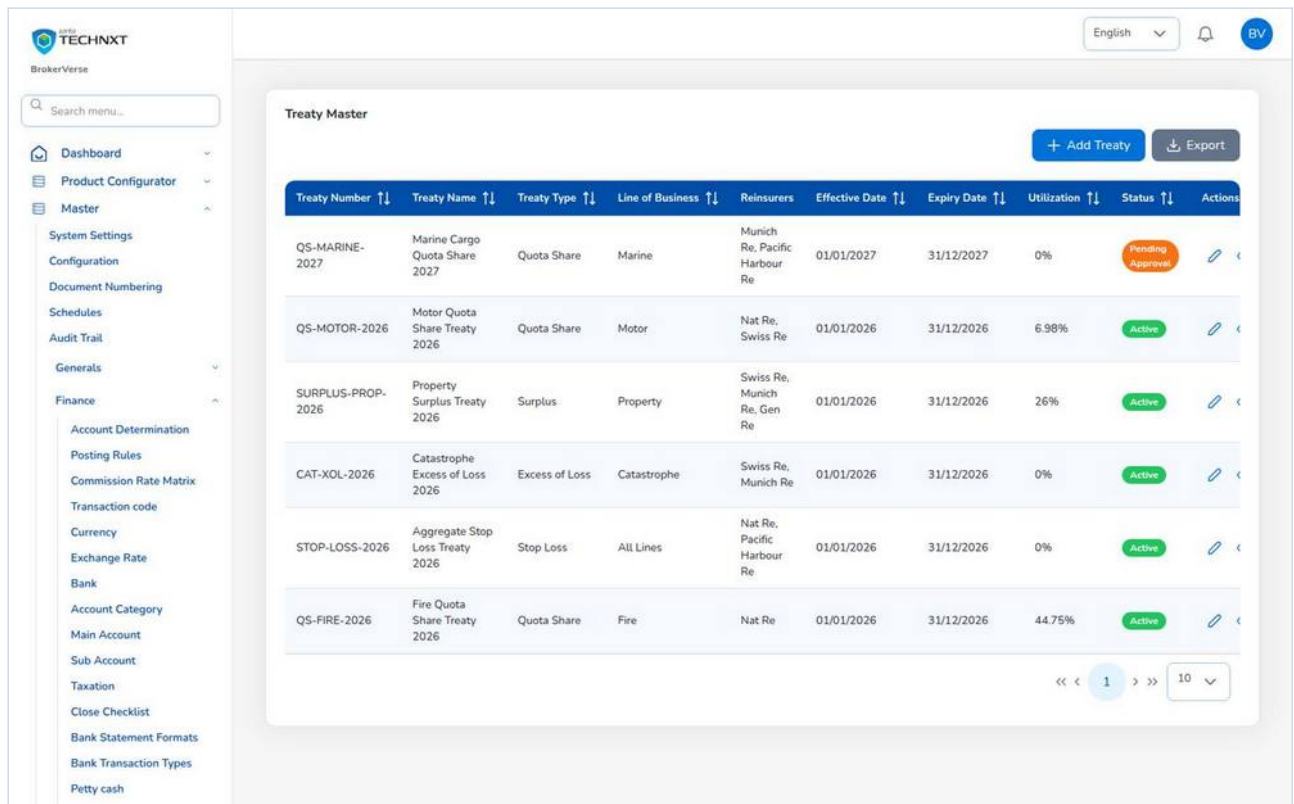

A bank transaction type is a bank item that is not yet in the books, with the account its adjustment posts to (an account role or a GL account), whether the adjustment needs approval, and the description pattern that suggests the type on imported lines. The delivered types are Bank charges, Interest income, Final tax on interest, Returned cheque, Direct credit from insurer, Direct credit from client and Other bank debit. The same screen lists the automatic matching rules; you can switch a rule off or change its date window.

20 Reinsurance

20.1 Purpose

The reinsurance screens record the treaties that protect large risks, the cessions made under them, the recoveries on claims and the reconciliation of reinsurer statements. The Processing Team works the treaties and cessions, Claims registers recoveries, Accounting reconciles reinsurer statements and the System Administrator maintains the treaty master.

Menu	Use it to
Master > Reinsurance Treaty	Add and maintain treaties: quota share, surplus, excess of loss, stop loss; reinsurers, shares, period. A new treaty needs a second user's approval (<code>reinsurance.treaty_requires_approval</code>).
Reinsurance > Treaty Dashboard	Active treaties, capacity, utilisation, premium ceded and claims recovered.
Reinsurance > Cession Tracking	Policies ceded per treaty with cession %, ceded premium and commission; Process Cession and Generate Bordereau.
Reinsurance > Claims Recovery	Amounts recoverable on claims under treaties; Register Recovery.
Reinsurance > Reconciliation	Compare our figures with the reinsurer's statement; variances above 1% need review.
Reinsurance > Analytics	Treaty utilisation, loss ratio trend, retention, recovery performance.

Figure 139. Reinsurance Treaty Dashboard

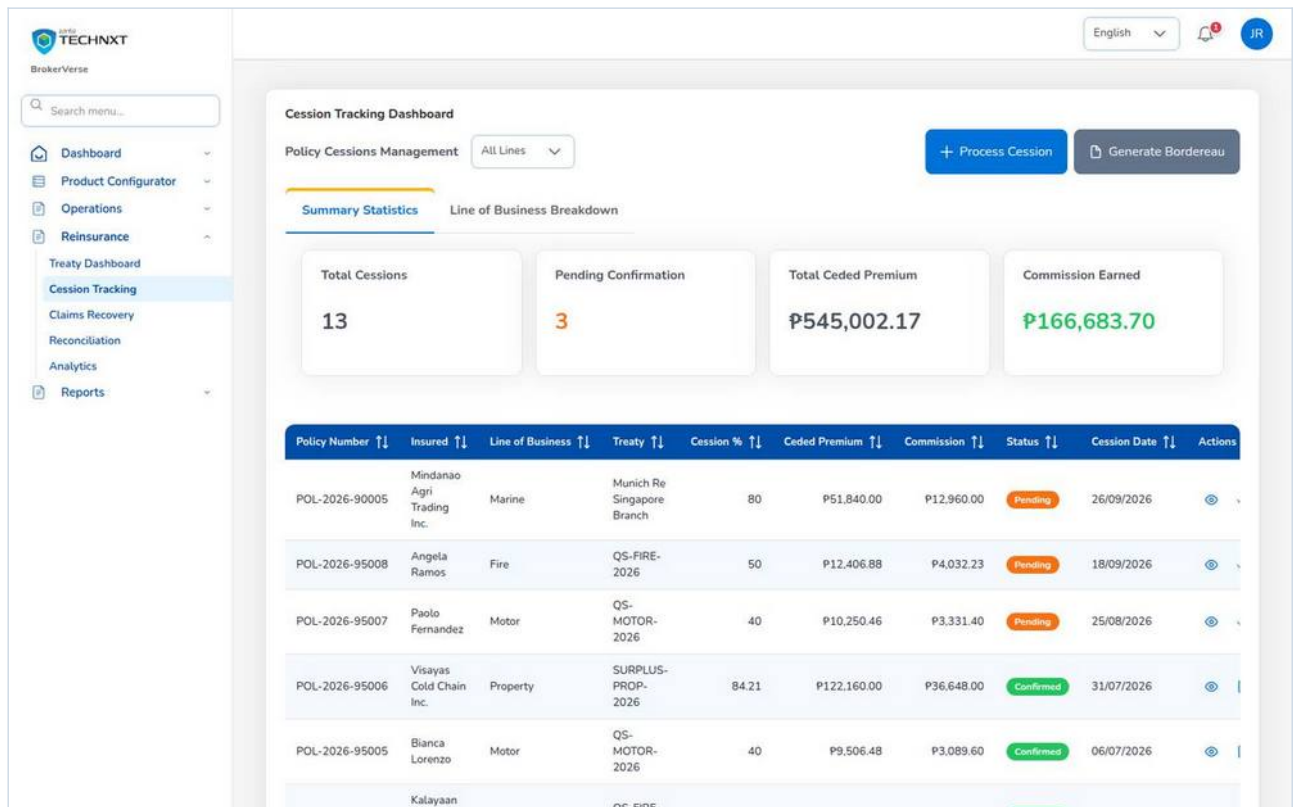

Figure 140. Session Tracking

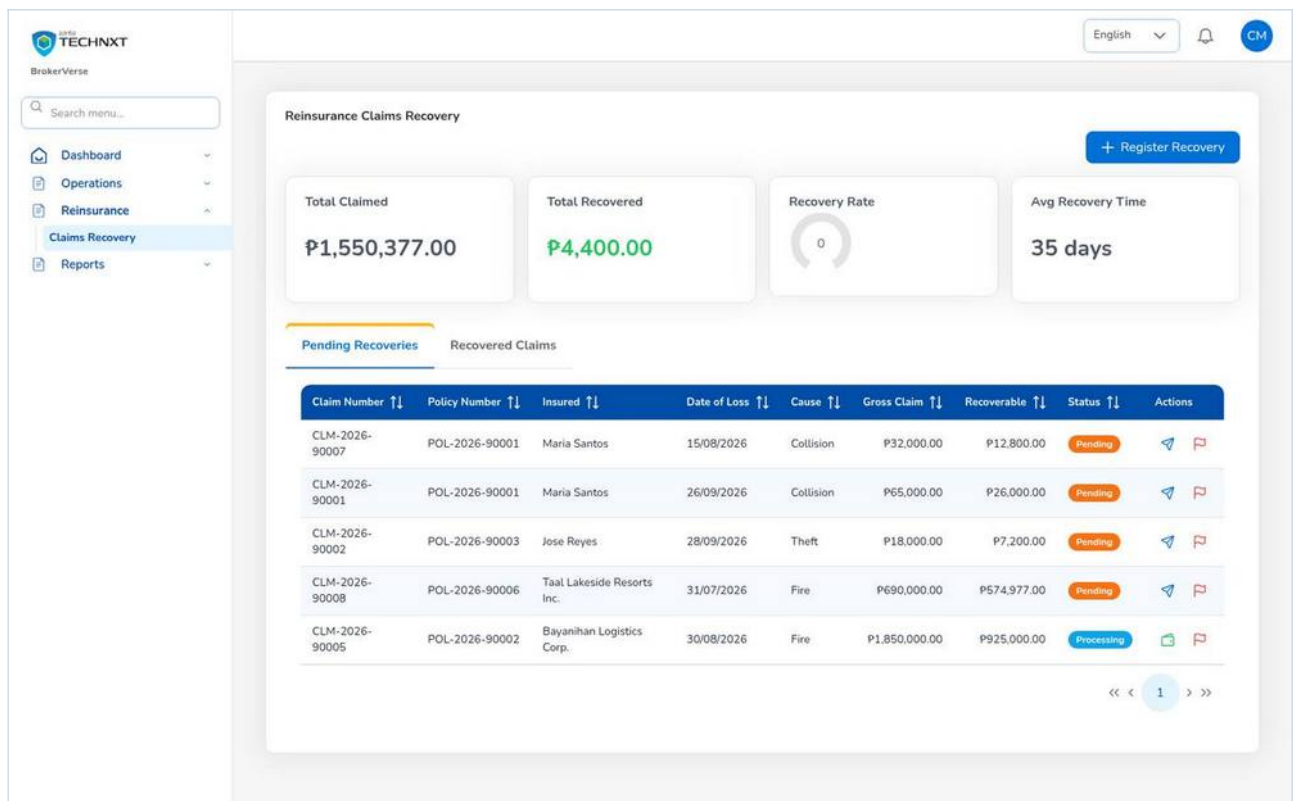

Figure 141. Reinsurance Claims Recovery

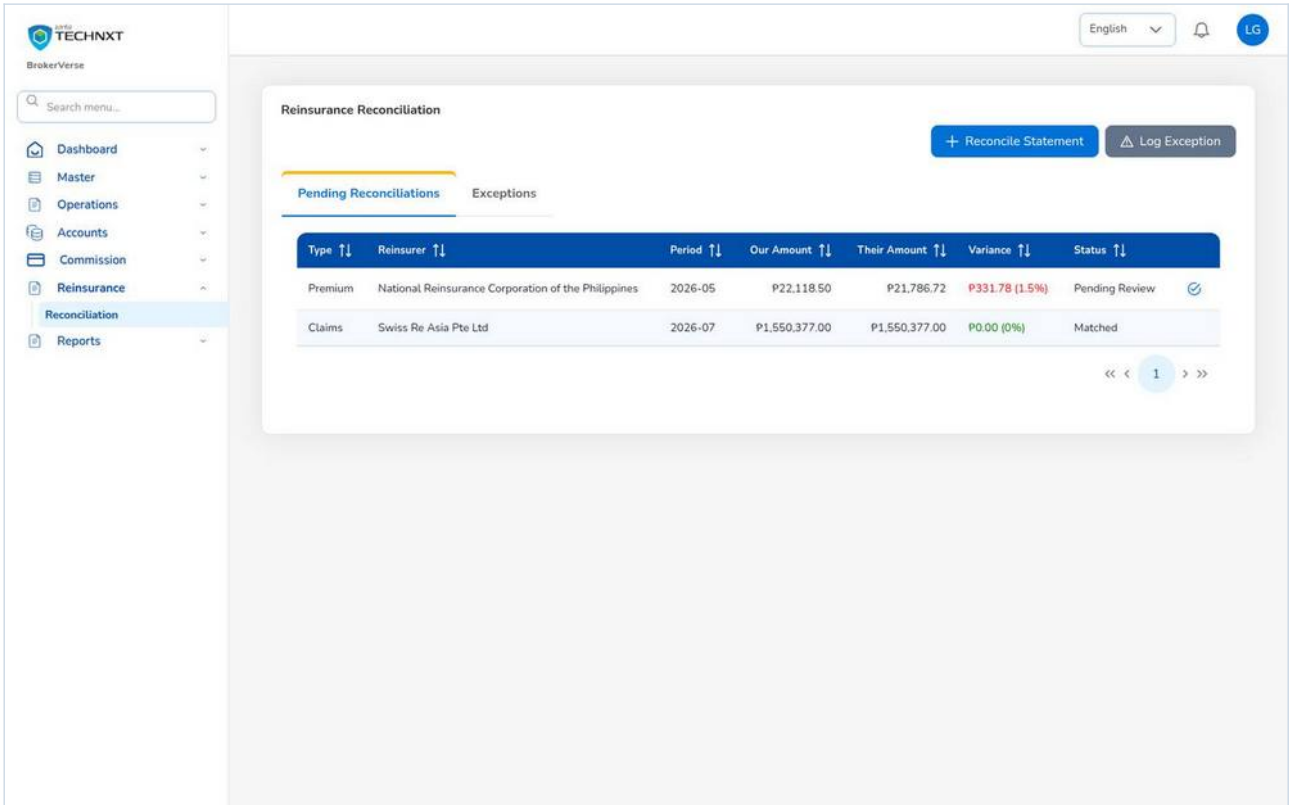

Figure 142. Reinsurance Reconciliation

Reinsurers must meet the minimum security rating A- (`reinsurance.min_security_rating`). A confirmed cession and a settled recovery are posted through their posting rules. The Reinsurance Cession Register report lists the cessions of a period.

21 Incentives

21.1 Purpose

Incentive programmes reward account executives for reaching targets: premium volume, policy count, renewal rate or conversion. The System Administrator sets up the programmes. Accounting calculates the results, a second Accounting user approves them, and Accounting pays them. Accounting cannot change the programmes it pays.

Screen	Use it to
Master > Incentive Programs	Add a programme: code (INC-), name, type, target metric, base target, frequency, start and end dates.
Accounts > Incentive > My Programs	The programmes with target, achievement and potential earning.
Accounts > Incentive > Calculations	New Calculation for a period creates a batch (CALC-) with the amount per person, sent for approval.
Accounts > Incentive > Approvals	Approve, reject or Bulk Approve calculation batches (not your own).
Accounts > Incentive > Statement	Statement per person and month: earnings, year to date, pending and last payment.

The screenshot displays the 'Incentive Program Master' screen. On the left is a sidebar with a search menu and various navigation links. The main area features a header with the title and an 'Add Program' button. Below the header is a search and filter section with a text input for searching by name, code, or description, and dropdown menus for Status (set to 'All') and Program Type (set to 'All'). The central part of the screen contains a table with the following data:

Program Code	Program Name	Type	Target Metric	Base Target	Frequency	Start Date	End Date	Status	Actions
INC-2026-004	Q4 Motor Sales Contest	Contest	Premium Volume	P1,000,000	Quarterly	01/10/2026	31/12/2026	Draft	[Eye icon] [Edit icon] [Active toggle]
INC-2026-001	Q3 Premium Achievers	Target Based	Premium Volume	P500,000	Quarterly	01/07/2026	30/09/2026	Active	[Eye icon] [Edit icon] [Active toggle]
INC-2026-002	New Business Champion	Commission Based	Policy Count	P20	Monthly	01/01/2026	31/12/2026	Active	[Eye icon] [Edit icon] [Active toggle]
INC-2026-003	Renewal Excellence	Hybrid	Renewal Rate	P85	Semi-Annual	01/01/2026	30/06/2026	Completed	[Eye icon] [Edit icon] [Active toggle]

At the bottom right of the table, there are pagination controls showing '1' and arrows for navigation.

Figure 145. Incentive Approvals (Accounting Manager)

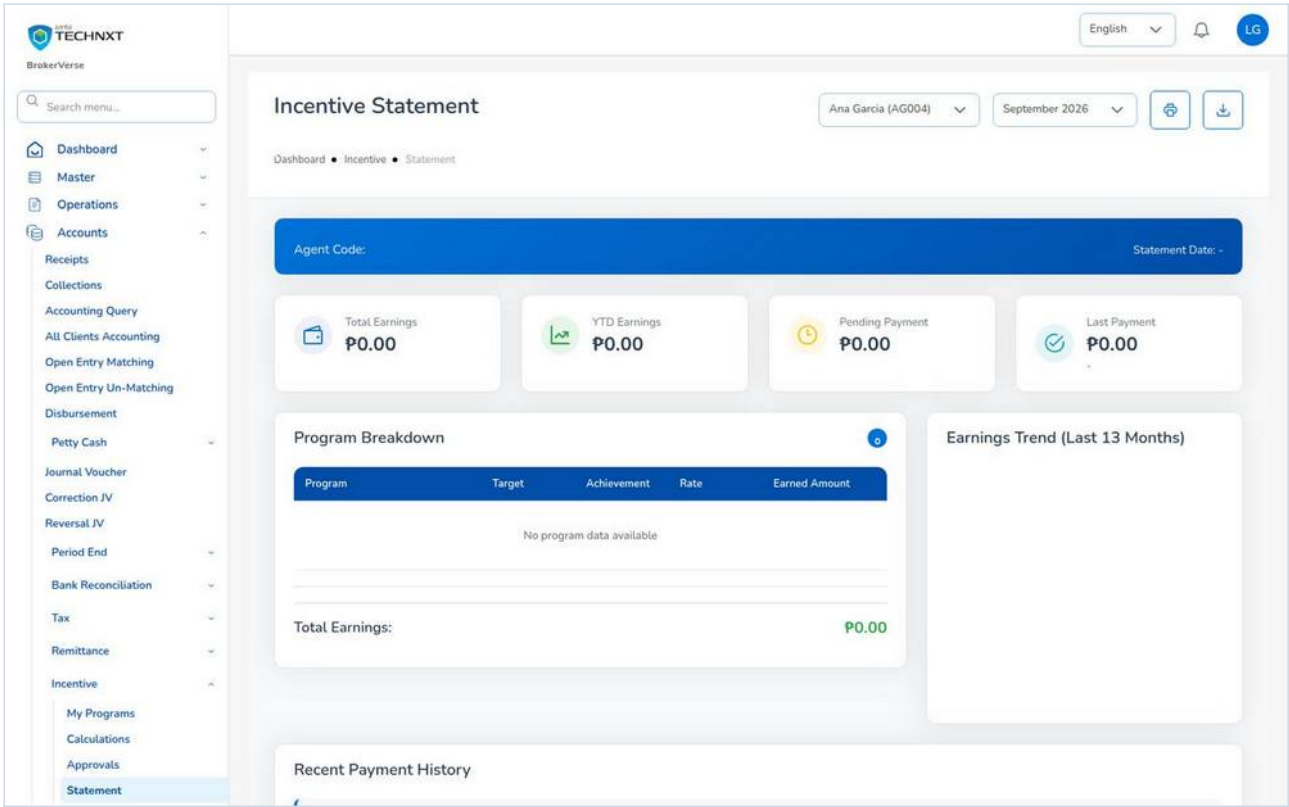

Figure 146. Incentive Statement

Only Sales & Marketing users take part (`incentive.eligible_roles`). The approved amounts are accrued and then paid through their posting rules, and appear in the Incentive Results report.

22 Product Configurator

22.1 Purpose

The Product Configurator holds the products the broker places and the rules that price them. The motor tariff that prices every motor quotation (vehicle classes, CTPL and Auto Passenger PA) is kept here. The Processing Team maintains it; Sales & Marketing and Operations can view the dashboard and templates.

Screen	Use it to
Dashboard	Active products, premium, loss ratio and commission; quick actions.
Product Templates	Create, version and edit product templates. The motor tariff is in template MOT-003-2025.
Coverage Builder	Coverages: code, name, mandatory or optional, deductible, premium impact.
Rating Engine	Rating factors and their rules, with a Test Calculator.
Acceptance Rules	Acceptance, validation and loading rules.
Document Manager	Document templates per stage.
Approval Workflows	Approval steps for product and rate changes.
Market Mapping, Risk Mapping	Products mapped to insurers; product definitions by line (IAR by risk section).
Product Analytics	Policies, premium, loss ratio and margin by product.

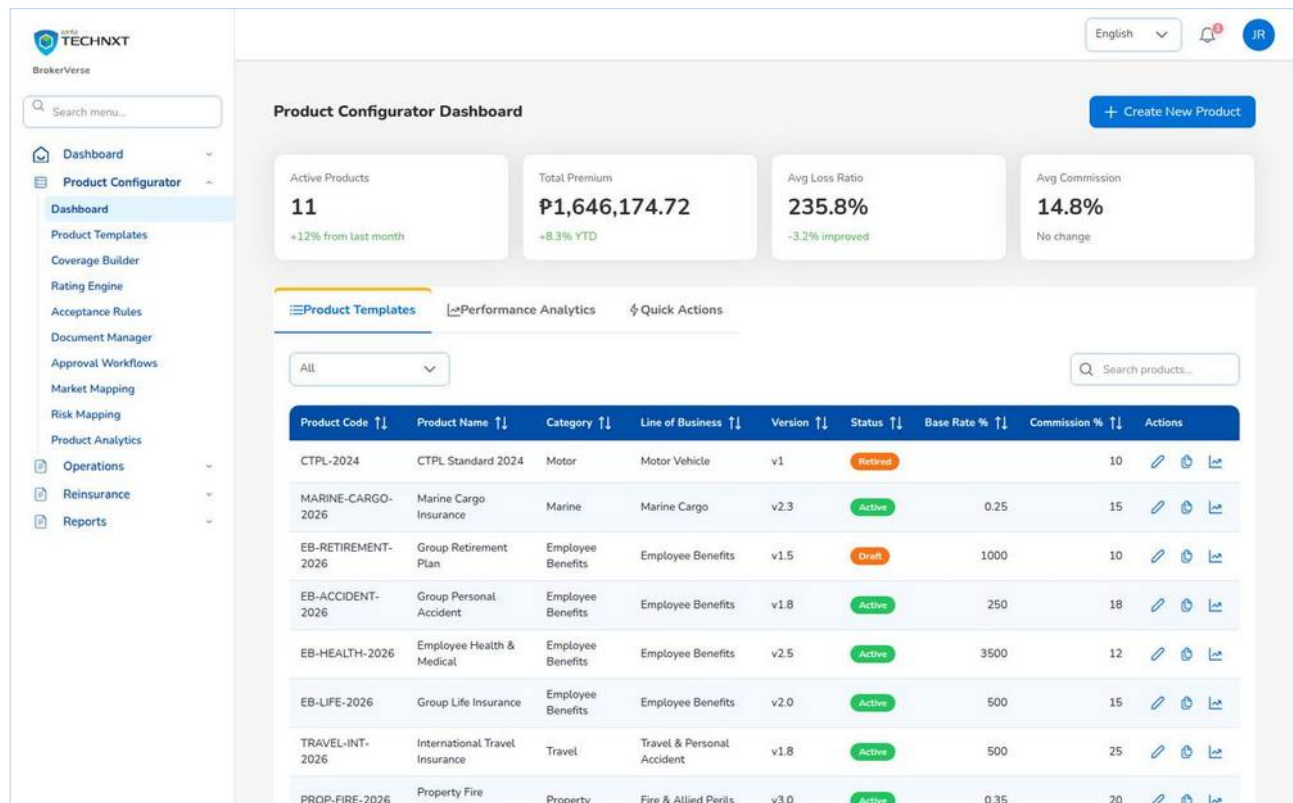

Figure 147. Product Configurator Dashboard

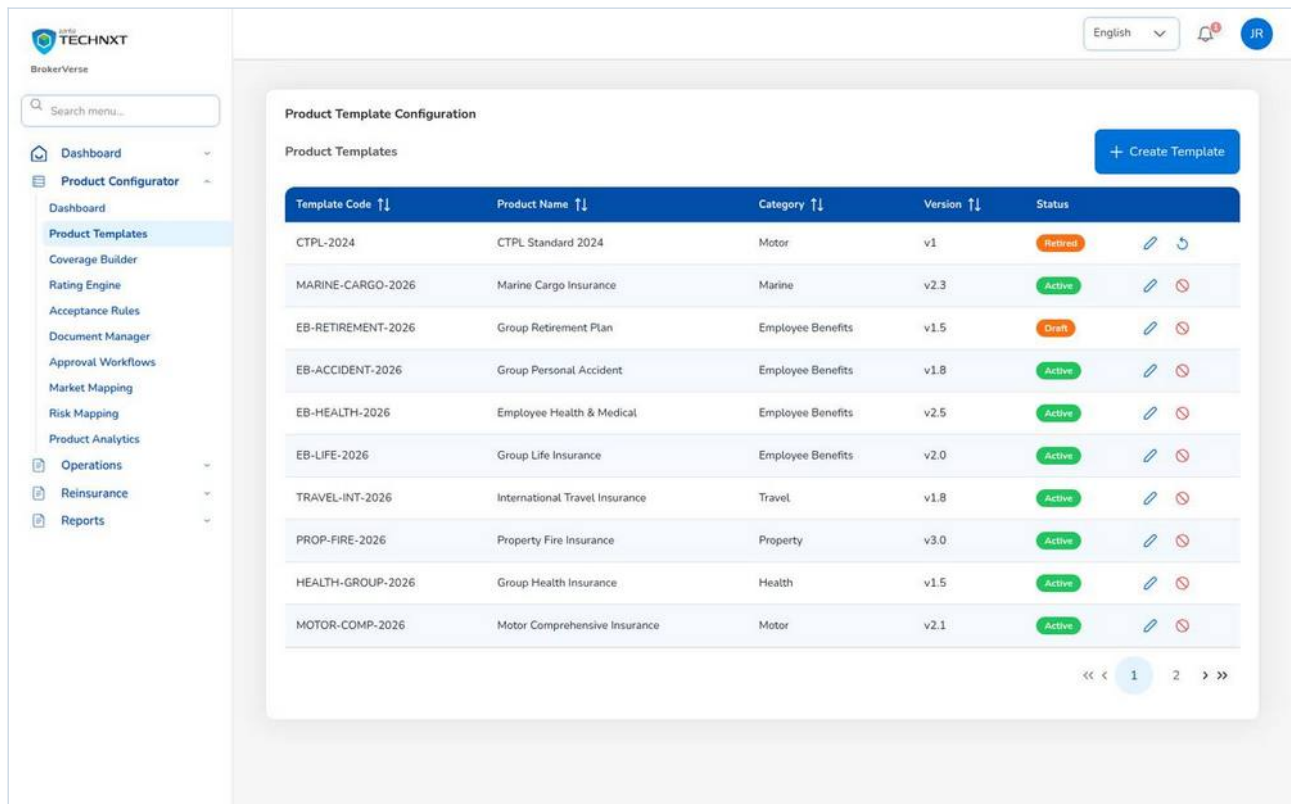

Figure 148. Product Templates

Template statuses are Draft, Active, Inactive and Retired. Only active templates are used by the quotation screens.

22.2 Maintain the motor tariff

1. Choose Product Configurator > Product Templates.
2. Select the pencil on MOT-003-2025 Motor Insurance Basic Plan and open the tab CTPL & Auto PA.
3. For each Vehicle class, check the name, Code, default Seats, CTPL 1 year (P) and CTPL 3 years (P). Leave the 3-year amount blank where it is not offered.
4. Select Add vehicle class to add a class, or the bin icon to remove one.
5. Under Auto Passenger Personal Accident, set the Rate (% of limit per seat) and the Limits per person offered.
6. Select Save Template.

23 Master data and administration

23.1 How the master screens work

The masters hold the reference data the other screens offer in their lists. Each master works the same way: a list with search, Add, Upload where offered, the eye to view, the pencil to edit and a status switch to deactivate. Records are not deleted; a deactivated record disappears from the lists.

Master (Master > Generals)	Holds
Organization > Company, Branch	The broker company with its letterhead, and its branches and departments.
Insurance Management > Insurance Company	Insurers with placement e-mail, TIN, default commission rate and credit terms.
Insurance Management > Line of Business, Product, Cover	Lines, products and covers.
Insurance Management > Signatories	Authorised signatories of quotations and documents.
Insurance Management > Vehicle	Vehicle brands, models, variants and seating.
Location > Country, State, City Master	Address lists (province is State).
Commission	Commission sharing with referrers by insurer, product and cover.
Employee Management > Hierarchy, Designation, Employee	Staff structure.
User Management > User, Role	Users and roles.

ITX	IORTA TECHNXT CORP.		Philippines	connect@iortatechnxt.com	Active	

Row count: 5

Navigation: << < 1 - 1 of 1 > >>

Figure 154. Master > Generals > Organization > Company

Every printed document and every report PDF (quotation, broker slip, placement slip, policy schedule, billing statement, official receipt, payment voucher, debit note, claim letters, BIR forms, reports) is

produced by one PDF engine and carries the letterhead of the primary company from the Company master: logo, company name, address, TIN, telephone, e-mail and web site.

Figure 155. Editing the company: name, licence, TIN, logo and Letterhead company

1. Choose Master > Generals > Organization > Company. Type part of the company name in the search box to list it, then select the pencil on the delivered company (iorta TechNXT Corp.) to edit it into your own.
2. Enter the Company Name, the License Number (Insurance Commission licence), Email ID, TIN (for example 000-123-456-000), Logo (printed on documents), Website link, the address lines, ZIP Code, City, State, Country, Phone Number and Fax.
3. Tick Letterhead company (used on documents and reports) for the company whose letterhead the documents use. Only one company can hold it.
4. Save, then print any billing statement or report as PDF to check the letterhead.

The application name and logo shown on the sign-in page and in the sidebar come from Master > System Settings, not from the Company master.

23.3 Insurance companies and credit terms

The screenshot shows the 'Insurance Company' management page in the BrokerVerse system. The left sidebar contains a navigation menu with options like Dashboard, Product Configurator, Master, System Settings, Configuration, Document Numbering, Schedules, Audit Trail, and a 'Generals' section with sub-items: Organization, Insurance Management, Insurance Company (selected), Line of Business, Product, Cover, Signatories, Vehicle, Location, Commission, Employee Management, and User Management. The main content area is titled 'Insurance Company' and includes a search bar 'Search By Insurance Company Code'. Below this is a table listing insurance companies.

Company Code	Company Name	E-mail	Phone Number	Modified By	Modified On	Status	Actions
APEX	APEX ASSURANCE	placement@apexassurance.example	+63 2 8888 0000		29/09/2026	Active

Row count: 5

Figure 156. Master > Generals > Insurance Management > Insurance Company

The screenshot shows the 'Edit Insurance Company' form in the BrokerVerse system. The left sidebar is the same as in Figure 156. The main content area is titled 'Edit Insurance Company' and contains a form with the following fields:

- Insurance Company Code: MALAYAN
- Insurance Company Name: Malayan Insurance Co., Inc.
- Insurance Company Description: Malayan Insurance Co., Inc. - non-life insurer
- Address Line 1: Ayala Avenue, Makati City
- Address Line 2: Enter
- Address Line 3: Enter
- City: Makati
- State: Metro Manila
- Country: Philippines
- Phone Number: +63 2 8888 0000
- Email ID: uw@malayan.example

Credit terms
 Premium warranty: days the client has to pay. Remittance terms: days after collection to remit to the insurer. Leave empty to use the system defaults (Master > Configuration).

Premium payment warranty (days)	Remittance terms (days)	Default billing mode	Modified By
System default	System default	System default	

Modified On: 2026-09-29

Figure 157. Editing an insurer: placement e-mail, default commission rate and credit terms

Each insurer has a code, name, description, address, phone number and Email ID. Requests for quotation, firm orders, loss advices and remittance advices go to that e-mail. The Credit terms section sets:

Field	Effect	When left empty
Premium payment warranty (days)	Days the client has to pay: the due date of the premium bill.	<code>collections.default_credit_days</code>
Remittance terms (days)	Days after collection within which the broker remits to the insurer: the due date of the remittance.	<code>remittance.default_due_days</code>
Default billing mode	Broker billed or direct bill for this insurer's new policies.	<code>direct_bill.default_billing_mode</code>

The insurer's default commission rate and TIN are loaded with the Insurance Company upload (columns Default Commission Rate, as a fraction such as 0.20 for 20%, and TIN). The default rate applies when the Commission Rate Matrix has no rate for the insurer.

23.4 Uploads and templates

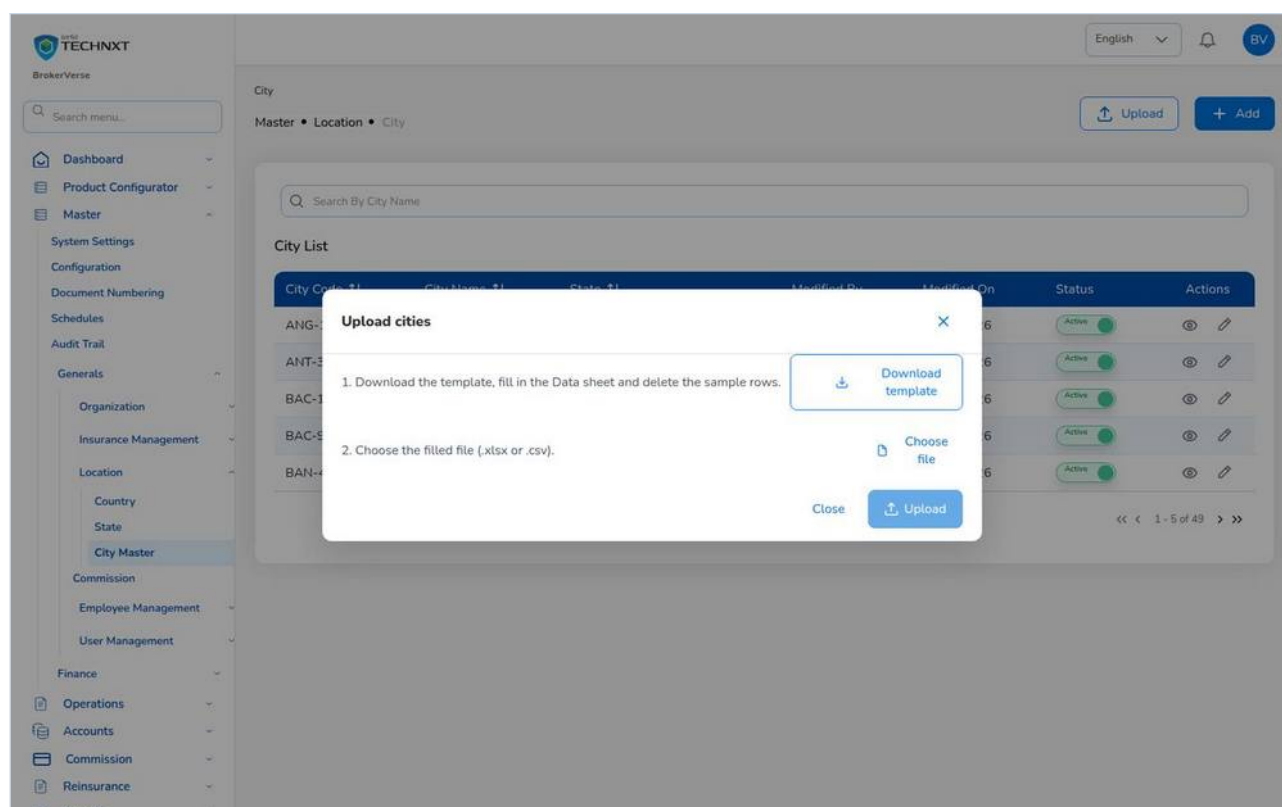

Figure 158. Upload dialog of a master with Download template

Masters with an Upload button take a spreadsheet:

1. Select Upload. Where a screen holds more than one record type (for example Vehicle: brands, models, variants, vehicles; Bank: banks or bank accounts), choose the type in Upload into.
2. Select Download template. The workbook has a Data sheet with the header row and one or two Philippine sample rows, a Columns sheet with the rules of each column and an Instructions sheet. Required columns have dark red headers.
3. Delete the sample rows, enter your data and save the file.
4. Choose the file and select Upload.

The result shows how many rows were created or updated and lists each failed row with its problem. Fix those rows and upload them again; an existing code updates the record. The same templates are delivered in [docs/templates](#).

Screen with Upload	Template
Insurance Company	Insurance_Company_Upload_Template.xlsx
Vehicle (brands, models, variants, vehicles)	Vehicle_Brand_..., Vehicle_Model_..., Vehicle_Variant_..., Vehicle_Upload_Template.xlsx
Country, State, City Master	Country_..., State_..., City_Upload_Template.xlsx
Bank (banks and bank accounts)	Bank_Upload_Template.xlsx, Bank_Account_Upload_Template.xlsx
Currency, Transaction code, Petty cash	Currency_..., Transaction_Code_..., Petty_Cash_Upload_Template.xlsx
Main Account and Sub Account (chart of accounts)	Chart_of_Accounts_Upload_Template.xlsx
Leads/Prospects, Quotation, Policy, Receipts, Disbursement	Leads_..., Quotations_..., Policies_..., Receipts_..., Disbursements_Upload_Template.xlsx
Collections (Import open items), Period Management (Import opening balances)	Open_Items_..., Opening_Balances_Upload_Template.xlsx
Bank Reconciliation (Import statement, GENERIC format)	Bank_Statement_Generic_Upload_Template.xlsx

Masters without an Upload button (Company, Branch, Department, Line of Business, Product, Policy type, Cover, Signatories, Exchange Rate, Commission, Hierarchy, Designation, Employee, Write-off reasons) also have a template in [docs/templates](#). The System Administrator loads those files through the API route written on the template's Instructions sheet, or the records are entered on the screen.

23.5 Document Numbering

Document Numbering

Number series for every document the system issues: prefix, format, sequence digits and when the counter restarts. Changes apply to the next number issued and are recorded in the audit trail.

52 SERIES 52 ACTIVE 11 MODULES

Search name, code or prefix: All modules All

SERIES ↑↓	MODULE ↑↓	PREFIX ↑↓	FORMAT	COUNTER RESET	LAST ISSUED	NEXT NUMBER
BIR Form 2307 bir_2307	Accounting	CWT	{PREFIX}-{YYYY}-{SEQ}	Yearly	None yet	CWT-2026-00001
Bank Reconciliation bank_reconciliation	Accounting	BRC	{PREFIX}-{YYYY}-{SEQ}	Yearly	1	BRC-2026-00002
Bank Statement bank_statement	Accounting	BST	{PREFIX}-{YYYY}-{SEQ}	Yearly	1	BST-2026-00002
Journal Voucher journal	Accounting	JV	{PREFIX}-{YYYY}-{SEQ}	Yearly	89	JV-2026-00090
Month-end Close period_close	Accounting	MEC	{PREFIX}-{YYYY}-{SEQ}	Yearly	1	MEC-2026-00002
Recurring Journal recurring_journal	Accounting	RJV	{PREFIX}-{YYYY}-{SEQ}	Yearly	1	RJV-2026-00002
Year-end Close year_end_close	Accounting	YEC	{PREFIX}-{YYYY}-{SEQ}	Yearly	None yet	YEC-2026-00001
Claim claim	Claims	CLM	{PREFIX}-{YYYY}-{SEQ}	Yearly	None yet	CLM-2026-00001
Commission Debit Note commission_debit_note	Finance	DN	{PREFIX}-{YYYY}-{SEQ}	Yearly	None yet	DN-2026-00001
Debit Note Collection de_collection	Finance	DNC	{PREFIX}-{YYYY}-{SEQ}	Yearly	None yet	DNC-2026-00001

Figure 159. Master > Document Numbering

Every number the system issues comes from a series on Master > Document Numbering: policy, quotation, Broker Slip, Placement Slip, official receipt, invoice, payment voucher, journal voucher, claim, endorsement, debit note, month-end close, bank reconciliation, BIR Form 2307 and the others (52 series in 11 modules). The list shows each series with its module, prefix, format, counter reset, last number issued and the next number.

To change a series, select the pencil on its row:

1. Change the Name, Description, Prefix or Format. Insert tokens by clicking them: {PREFIX}, {YYYY} (2026), {YY} (26), {MM} (09), {FY} (fiscal year), {BRANCH}, {LOB} and {SEQ}. {BRANCH} and {LOB} are filled by the transaction; when empty they are left out with their separator.
2. Set the Sequence digits (5 gives 00001) and the Counter reset: Every calendar year, Every fiscal year, Every month or Never. Start number (new period) is where the counter starts after a reset.
3. Check the Next number preview and save.

The change applies to the next number issued and is recorded in the audit trail. A prefix used by another active series is refused.

To continue the numbering of the old system, select Set next number (the double arrow on the row) and enter the last number used plus one. The counter can only move forward. Your BIR-registered official receipt series must match the Authority to Print.

23.6 Commission Rate Matrix

Commission Rate Matrix

Brokerage commission rates by insurer, product, line of business and policy type. The most specific active rate on the policy date applies; without one, the insurer's default rate and then the system default apply.

Search: Any insurer Policy type Active

Precedence: insurer + product, insurer + line of business, insurer, product, line of business; an exact policy type before Any; then the insurer default rate and the system default.

INSURER	PRODUCT	LINE OF BUSINESS	POLICY TYPE	RATE (%)	EFFECTIVE FROM	EFFECTIVE TO	APPLIES AT	ACTIVE
No commission rates yet: the insurer default rates apply								

Test rate

Find the rate that applies to a placement.

Insurer: Any insurer Product: Any product Line of business: Any line of business Policy type: New business Date: 09/29/2026

Find rate

Figure 160. Master > Finance > Commission Rate Matrix

The Commission Rate Matrix holds the brokerage rates the broker earns, by insurer, product, line of business and policy type (New business, Renewal or Any), with effective dates. The most specific active rate on the policy date applies, in this order: insurer and product, insurer and line of business, insurer, product, line of business; an exact policy type before Any. Without a matching rate, the insurer's Default Commission Rate applies, then the system default (`commission.default_rate`, 15%).

1. Select Add rate.
2. Choose the Insurer, Product and Line of business (at least one), and the Policy type.
3. Enter the Rate (%), Effective from and, if the rate ends, Effective to (or leave it Open-ended). Add Remarks, for example the reference of the insurer's agreement.
4. Save.

Use Test rate to check which rate a placement would get: choose the insurer, product, line, policy type and date, and select Find rate. The result names the source: Commission Rate Matrix, Insurer default rate or System default rate. The Commission master under Master > Generals holds the sharing of commission with referrers, which is a separate matter.

23.7 Posting Rules

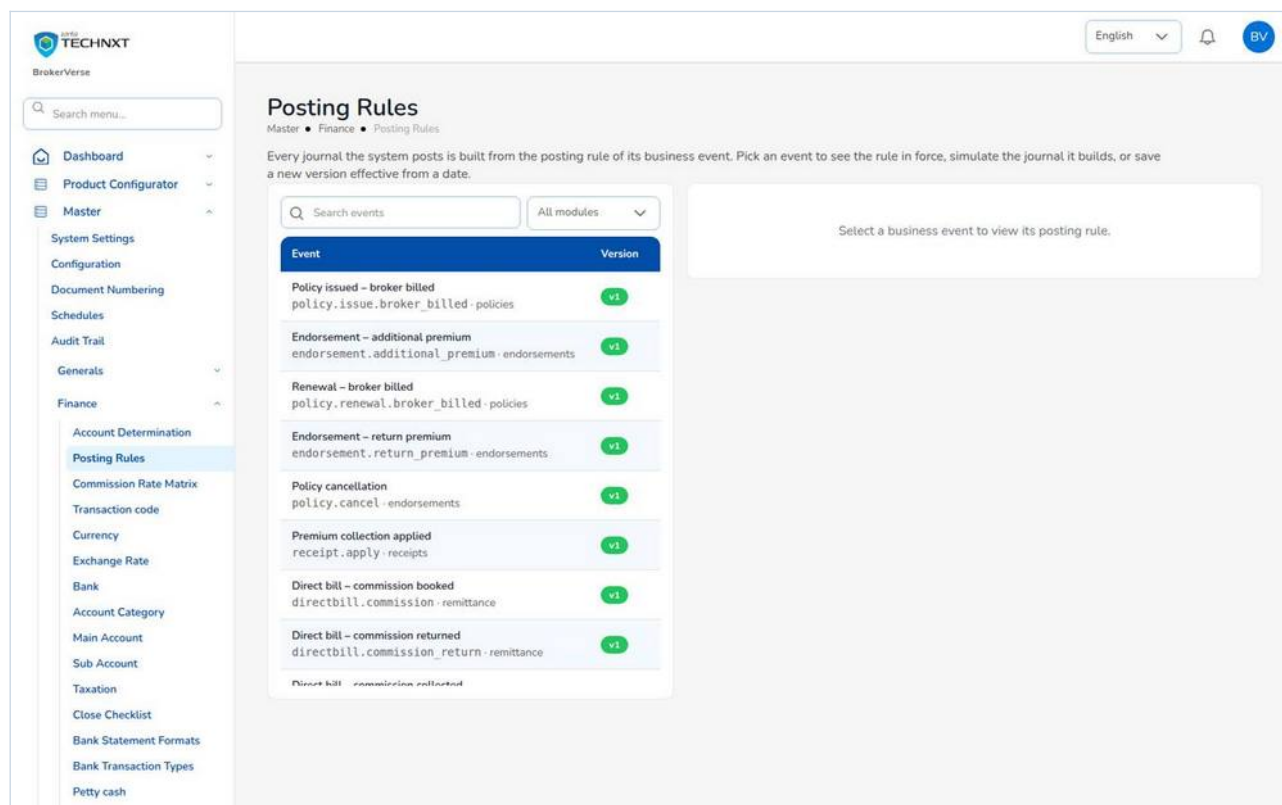

Figure 161. Master > Finance > Posting Rules

Every journal the system posts is built from the posting rule of its business event: policy issued (broker billed), endorsement additional and return premium, renewal, cancellation, premium collection applied, direct-bill commission booked, returned and collected, comsub approved, paid and clawed back, payment voucher paid, petty cash, write-offs, claim settled through the broker, claim funds received, claim paid to claimant, remittance settlement and adjustments, insurer refunds, reinsurance cessions and recoveries, and incentives.

Posting Rules
Master • Finance • Posting Rules

Every journal the system posts is built from the posting rule of its business event. Pick an event to see the rule in force, simulate the journal it builds, or save a new version effective from a date.

Search events: All modules: ▼

Event	Version
Policy issued – broker billed policy.issue.broker_billed - policies	v1
Endorsement – additional premium endorsement.additional_premium - endorsements	v1
Renewal – broker billed policy.renewal.broker_billed - policies	v1
Endorsement – return premium endorsement.return_premium - endorsements	v1
Policy cancellation policy.cancel - endorsements	v1

Simulate Co-insured sample Deactivate History

Figure 162. The posting rule of Policy issued - broker billed, with its simulation

Select an event to see the rule in force: each line with its side (debit or credit), account (an account role, a fixed GL account, a resolver or an account supplied by the operation), amount, narration and whether it is split Per co-insurer. The rule also sets the journal narration and the branch or cost centre.

- Simulate builds the journal the rule would post with sample amounts, including a Co-insured sample, and shows whether debits equal credits. Use it before you save a change.
- New version saves a changed rule effective from a date, with a change note. Journals dated before that date keep using the earlier version.
- History lists every version and change.

Caution: Change posting rules only with the Accounting Manager. A wrong rule posts wrong journals from its effective date. Simulate first.

23.8 Account Determination and write-off reasons

Account Determination
Master > Finance > Account Determination

The GL account behind every account role the posting rules use, the payable account per payee type, the cash account per payment mode and the write-off reasons. What this screen shows is what posting uses.

% VAT, DST and LGT on premium are booked in their own accounts

Account role	GL account	Used by
Brokerage commission income commission_income	3201001 - Brokerage Commission Income	directbill.commission, directbill.commission_return, endorsement.additional_premium, endorsement.return_premium, policy.cancel, policy.issue.broker_billed, policy.renewal.broker_billed
Commission receivable from insurers (direct billed) commission_receivable	1203001 - Commission Receivable - Insurers (Direct Bill)	directbill.collection, directbill.commission, directbill.commission_return

Premium payable to insurers due to insurer due_to_insurer	2201001 - Premiums Payable to Insurers	endorsement.additional_premium, endorsement.return_premium, insurer.refund_applied, insurer.refund_due, policy.cancel, policy.issue.broker_billed, policy.renewal.broker_billed
Refunds due from insurers (return premium on premium already remitted) insurer_refund_receivable	1203002 - Due from Insurers	insurer.refund_applied, insurer.refund_due
Output VAT payable (VAT on commission) output_vat	2204003 - Output VAT Payable	directbill.commission, directbill.commission_return, disbursement.payment, endorsement.additional_premium

Figure 163. Master > Finance > Account Determination

Account Determination shows the GL account behind every account role the posting rules use, grouped in the tabs Premium, Customer, Miscellaneous, RI-Claims and Other, with the events that use each role. For example Brokerage commission income posts to 3201001 and Premium payable to insurers to 2201001. To change the account of a role, choose the new GL account; the message confirms which account the role now posts to. The change applies to postings from then on.

The tab Payee & payment mode holds the Payable account per payee type (Insurer, Agent/Referrer, Client, Supplier) and the Cash account per payment mode (cash, cheque, transfer, e-wallet). The line at the top says whether VAT, DST and LGT on premium are booked in their own accounts (`accounting.split_premium_taxes`).

The screenshot shows the 'Account Determination' screen with the 'Write-off reasons' tab selected. The left sidebar contains a navigation menu with options like Dashboard, Product Configurator, Master, System Settings, Configuration, Document Numbering, Schedules, Audit Trail, Generals, and Finance. The 'Finance' section is expanded, showing 'Account Determination' as the active item. The main content area has a breadcrumb trail: Master > Finance > Account Determination. Below this, a descriptive text states: 'The GL account behind every account role the posting rules use, the payable account per payee type, the cash account per payment mode and the write-off reasons. What this screen shows is what posting uses.' A green note indicates: '% VAT, DST and LST on premium are booked in their own accounts.' The 'Write-off reasons' tab is active, showing a table with columns: Code, Reason, GL account, Maximum amount, and Status. There are four rows of data, each with an 'active' status and an edit icon. An '+ Add reason' button is in the top right corner.

Code	Reason	GL account	Maximum amount	Status
BAD_DEBT	Uncollectible premium (bad debt)	4401009 Bad Debts Written Off	—	active
FX_DIFFERENCE	Foreign exchange difference	4501002 Foreign Exchange Loss	—	active
SMALL_BALANCE	Small balance difference	4409001 Miscellaneous Expense	100.00	active
SMALL_CREDIT	Small credit balance taken to income	3302001 Other Income	100.00	active

Figure 164. Account Determination, tab Write-off reasons

The tab Write-off reasons lists the reasons offered on Open Entry Matching (Chapter 14) with their Code, Reason, GL account, Maximum amount and Status. Select Add reason to add one.

23.9 Chart of accounts

The screenshot shows the 'Main Account Master - Chart of Accounts' screen. The left sidebar is the same as in Figure 164, with 'Main Account' selected under the 'Finance' section. The main content area has a breadcrumb trail: Master > Main Account Master. There are 'Upload' and 'Add' buttons in the top right. Below the breadcrumb, there are filters for 'All account types', 'All statement groups', and 'Active'. A search bar is labeled 'Search code, name or category'. The main table has columns: Code, Account Name, Statement Group, Category, Normal Balance, Open Item, Manual JV, System Use, Status, and Actions. The table lists several accounts, all with a 'Debit' normal balance and 'Active' status. The 'Assets (46)' group is highlighted. The accounts listed are: 1101001 Cash on Hand, 1101002 Cash on Hand - Undeposited Cheques, 1102001 Cash in Bank - Operating Account, 1102002 Cash in Bank - E-wallet Clearing (GCash), 1102003 Cash in Bank - Premium Trust Account (Clients' Money), 1102004 Cash in Bank - Payroll Account, 1103001 Petty Cash Fund, and 1104001 Short-term Placements (Time Deposits).

Code	Account Name	Statement Group	Category	Normal Balance	Open Item	Manual JV	System Use	Status	Actions
1101001	Cash on Hand	Current Assets	Cash and Cash Equivalents	Debit		✓	cash on hand cash:cash	Active	✎ ⌛
1101002	Cash on Hand - Undeposited Cheques	Current Assets	Cash and Cash Equivalents	Debit		✓		Active	✎ ⌛
1102001	Cash in Bank - Operating Account	Current Assets	Cash and Cash Equivalents	Debit		✓	cash in bank cash:card cash:check cash:bank-transfer	Active	✎ ⌛
1102002	Cash in Bank - E-wallet Clearing (GCash)	Current Assets	Cash and Cash Equivalents	Debit		✓	cash:gcash cash:online	Active	✎ ⌛
1102003	Cash in Bank - Premium Trust Account (Clients' Money)	Current Assets	Cash and Cash Equivalents	Debit		✓		Active	✎ ⌛
1102004	Cash in Bank - Payroll Account	Current Assets	Cash and Cash Equivalents	Debit		✓		Active	✎ ⌛
1103001	Petty Cash Fund	Current Assets	Cash and Cash Equivalents	Debit		✓	petty cash fund	Active	✎ ⌛
1104001	Short-term Placements (Time Deposits)	Current Assets	Cash and Cash Equivalents	Debit		✓		Active	✎ ⌛

Figure 165. Master > Finance > Main Account: the chart of accounts

Master > Finance > Main Account is the chart of accounts, a Philippine broker chart grouped by account type and statement group. Sub Account holds sub-ledgers of a main account. For each account you see code, name, statement group, category, normal balance, whether it is an open-item account, whether manual journal vouchers may use it, its system use and status. Accounts that account roles point to cannot be deactivated; change the role on Account Determination first. Upload loads accounts from [Chart_of_Accounts_Upload_Template.xlsx](#); put a main account before its sub accounts.

Code	Account	Posted by
1102001	Cash in Bank - Operating Account	Receipts, vouchers
1202001	Premiums Receivable - Direct Clients	Bills, receipts
1203001	Commission Receivable - Insurers (Direct Bill)	Direct-bill commission, debit note collections
1203002	Due from Insurers	Refunds of return premium already remitted
1302001	Creditable Withholding Tax (BIR Form 2307)	Tax withheld by insurers
1901001	Suspense	Unidentified bank credits
2201001	Premiums Payable to Insurers	Bills, remittances
2203001	Commission Payable - Agents and Referrers	Commission approval and payout
2204003	Output VAT Payable	VAT on commission
3201001	Brokerage Commission Income	Policy issue, endorsements
4401010	Commission Expense - Agents and Referrers	Commission approval

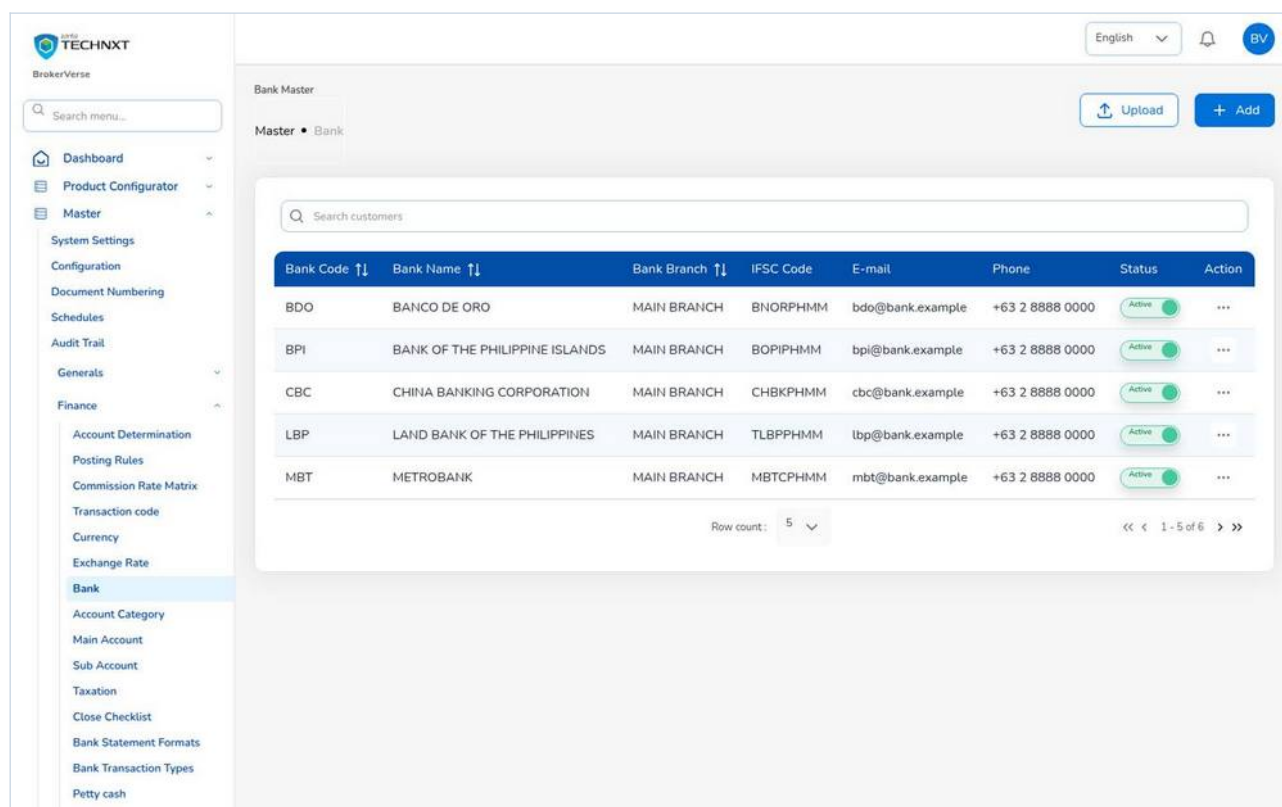

Figure 166. Master > Finance > Bank

23.10 Users and roles

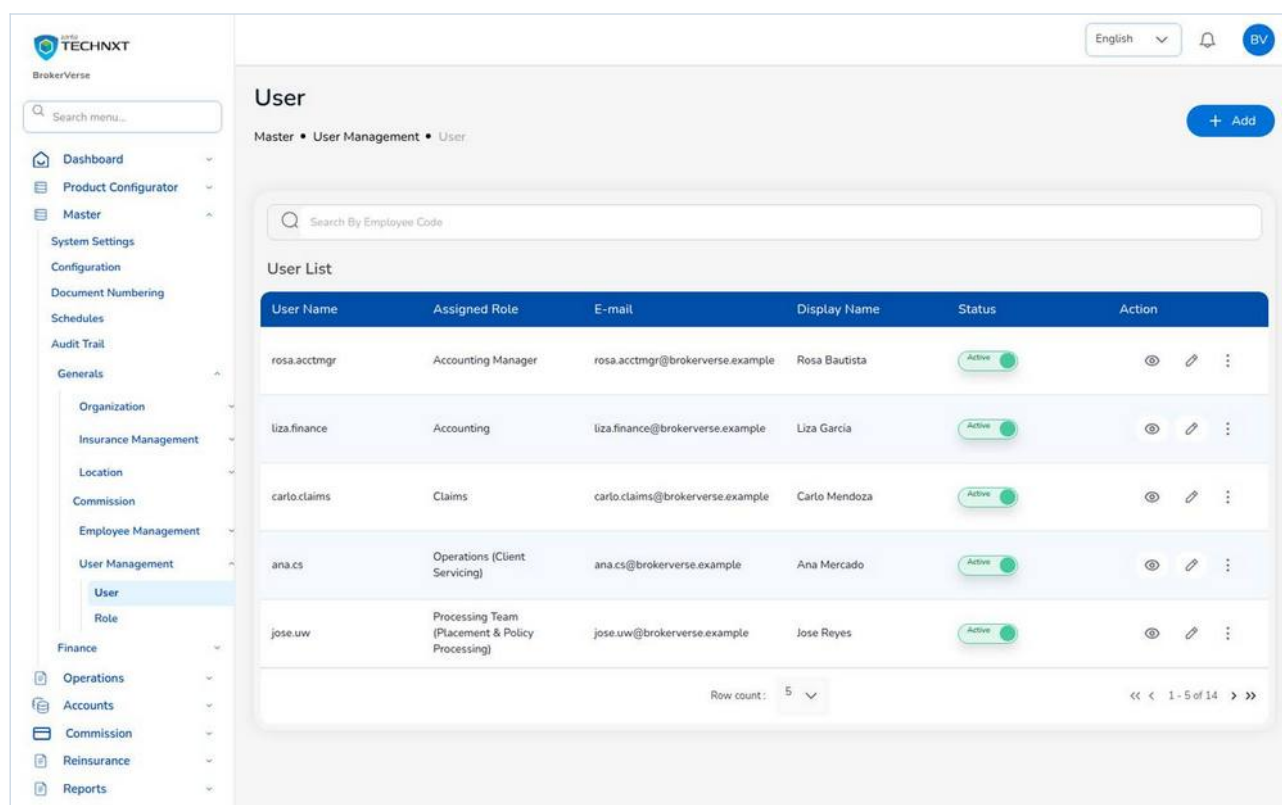

Figure 167. Master > Generals > User Management > User

The System Administrator manages users on Master > Generals > User Management > User.

To add a user:

1. Select Add.
2. Enter the Username (the user ID), E-mail and Display Name. The e-mail is where Forgot password? sends its code.
3. Leave Password empty. The system then generates a temporary password.
4. Choose the role. Give each person one role; give the System Administrator role to as few people as possible.
5. Select Save. The Temporary password dialog shows the password once. Hand it to the user privately, then select Done.

Figure 168. Add User (example values)

The user must choose a new password at the first sign-in. A duplicate username is refused. For many users at once, the System Administrator runs the provisioning script on the server with `Users_Provisioning_Template.xlsx`; the file holds initial passwords, so keep it outside any shared folder and delete it after use.

The three-dot button on a user row opens the account actions:

Action	Use it when
Unlock	The user was locked after 5 failed sign-ins. The list shows a Locked tag.
Reset password	The user forgot the password and cannot use Forgot password?. A temporary password is shown once and every session of the user ends.
Turn off two-step verification	The user lost the phone with the authenticator app.

Action	Use it when
Sign-in history	Access reviews: every sign-in attempt with date, result, method, IP address and browser.

The screenshot displays the 'User' management page in the BrokerVerse system. The left sidebar contains a navigation menu with categories like Dashboard, Product Configurator, Master, System Settings, Configuration, Document Numbering, Schedules, Audit Trail, Generals, Organization, Insurance Management, Location, Commission, Employee Management, User Management, Role, Finance, Operations, Accounts, Commission, Reinsurance, and Reports. The 'User Management' section is active, showing a 'User List' table. The table has columns: User Name, Assigned Role, E-mail, Display Name, Status, and Action. Five users are listed, all with 'Active' status. A context menu is open for the user 'bea.admin', showing options for 'Reset password' and 'Sign-in history'. The bottom of the table shows a row count of 5 and a pagination indicator for 6 - 10 of 14 rows.

User Name	Assigned Role	E-mail	Display Name	Status	Action
maria.sales	Sales & Marketing (Account Executive)	maria.sales@brokerverse.example	Maria Santos	Active	Reset password, Sign-in history, Edit, Delete
bea.admin	System Administrator (Super Admin Access)	bea.admin@brokerverse.example	Bea Villanueva	Active	Reset password, Sign-in history, Edit, Delete
agent.preyes	Sales & Marketing (Account Executive)	pedro.reyes@agents.example	Pedro Reyes	Active	Edit, Delete
agent.msantos	Sales & Marketing (Account Executive)	maria.santos@agents.example	Maria Santos	Active	Edit, Delete
agent.jdelacruz	Sales & Marketing (Account Executive)	juan.delacruz@agents.example	Juan Dela Cruz	Active	Edit, Delete

Figure 169. Account actions of a user

Select the pencil to change the display name, e-mail or role; a role change ends the user's open sessions. Use the Status switch to deactivate a leaver. The history is kept.

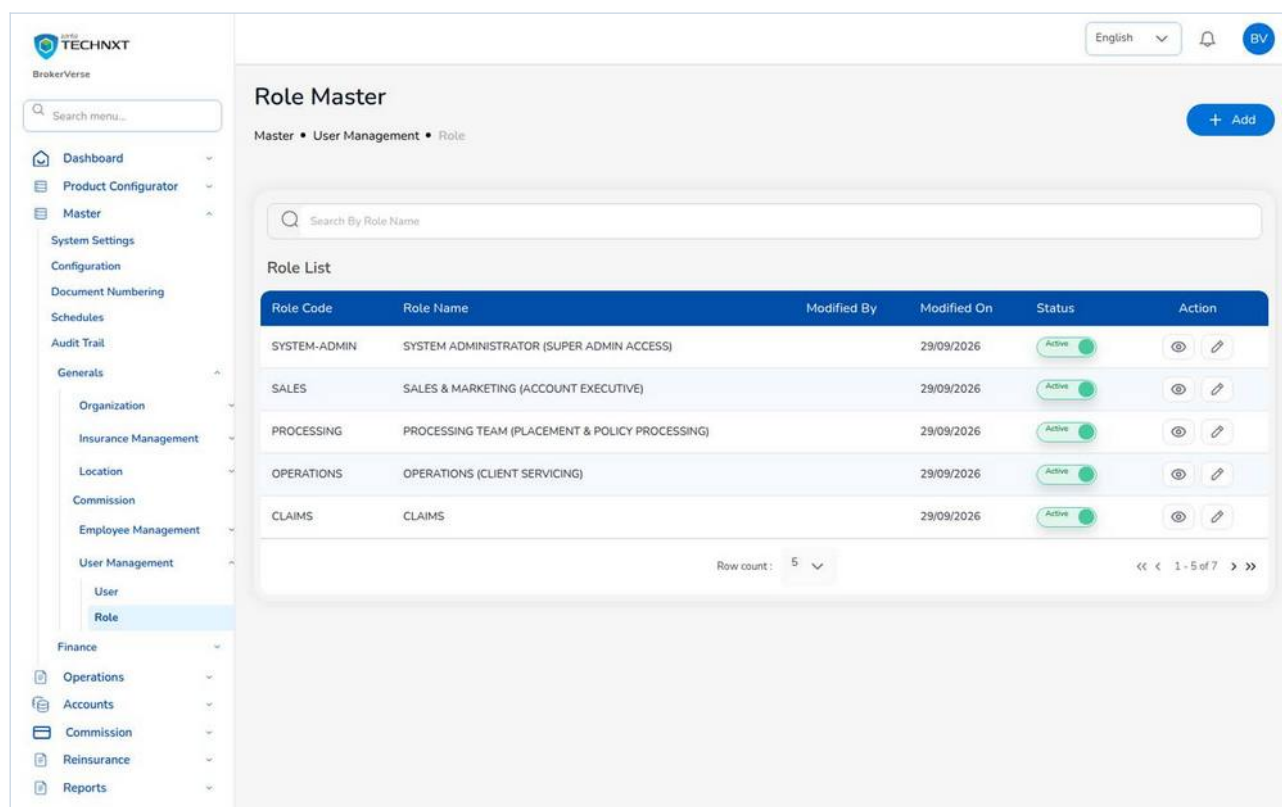

Figure 170. Master > User Management > Role

The seven roles are fixed. Open a role to see its read and write permissions per module (for example read:receipts, write:bank-reconciliation) and the approval permissions of the Accounting Manager (approve:period-end, approve:bank-reconciliation). The Accounting Manager role includes the Accounting role.

23.11 System Settings

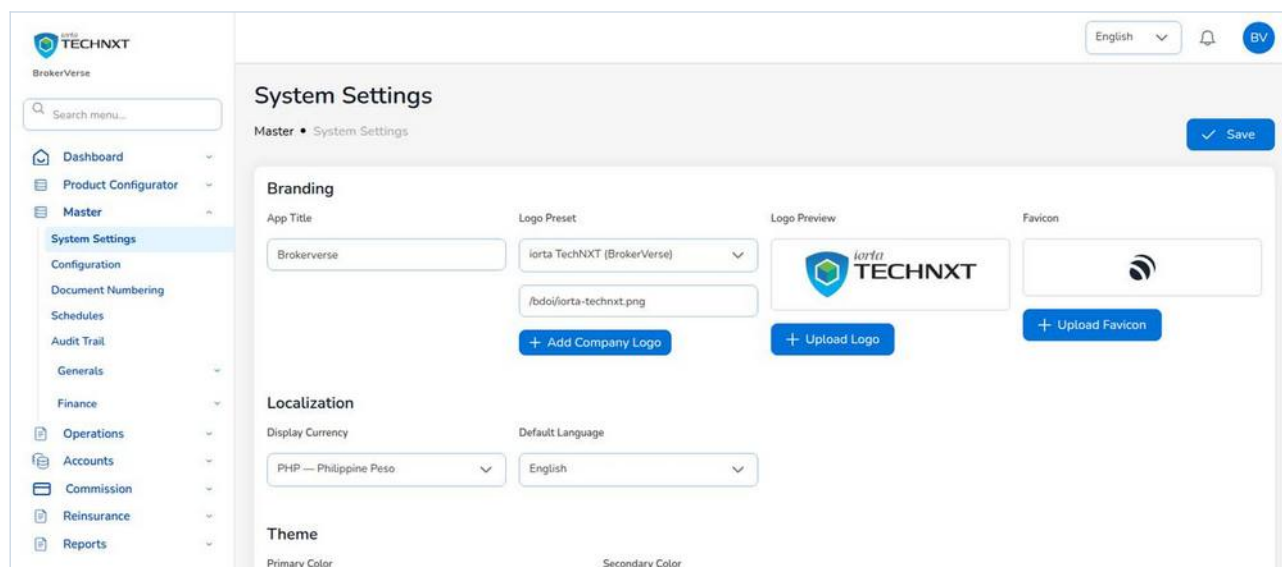

Figure 171. Master > System Settings

Master > System Settings controls the look of the system: App Title, logo and favicon (the delivered system shows the iorta TechNXT logo and the name BrokerVerse), display currency, default language and theme colours. Select Save; the settings apply to every user, including the sign-in page.

23.12 Configuration

The screenshot displays the 'Master > Configuration' interface. On the left is a sidebar with navigation options: Dashboard, Product Configurator, Master (expanded), System Settings, Configuration (selected), Document Numbering, Schedules, Audit Trail, Generals, Finance, Operations, Accounts, Commission, Reinsurance, and Reports. The main content area is titled 'Configuration' and includes a 'Save changes' button. Below the title is a note about document number prefixes and a link to 'Open Document Numbering'. A horizontal tab bar contains: General, Accounting, Bank reconciliation, Bir, Branding, Claims, Collections, Commission, Currency, and Dashboard. The 'General' tab is active, showing the following configuration fields:

- Application title (browser tab and header):** BrokerVerse
- Company name (fallback: documents, reports and e-mails use the primary company of the Company master):** Iorta TechNXT Corp.
- Date format:** DD/MM/YYYY
- Default language:** en
- Front-end base URL (links in e-mails, e.g. quotation approval):** http://localhost:3000
- Available languages:** A table with columns 'Code' and 'Label'. It lists 'en' (English), 'th' (Thai), and 'fil' (Filipino), each with a delete icon.
- Mobile number hint shown on forms:** 0917 123 4567 or +63 917 123 4567
- Mobile number pattern (national number without the leading 0 or country code):** ^91\d{9}\$
- Phone country code:** +63
- System name:** BrokerVerse
- Time zone:** Asia/Manila

Figure 172. Master > Configuration

Master > Configuration holds every business parameter in tabs with plain names (Accounting, BIR, Claims, Collections, Commission, Dashboard, Direct bill, General, Placement, Quotations, Renewals, Reports, Security, Taxes and others). Point at a label to see its key.

1. Choose the tab.
2. Change the value. Numbers, text and switches are typed or switched; lists are values separated by commas; lists of records are edited as a small table; e-mail templates are a text box where you keep the {{placeholders}}.
3. Select Save changes. The change applies at once, on every server, and is recorded in the audit trail with the old and new value.

Configuration
Business parameters used by the system. Changes apply immediately and are recorded in the audit trail.

Document number prefixes and formats are maintained on Master > Document Numbering [Open Document Numbering](#)

Placement

Insurer codes approached by default on a new broker slip (empty: chosen per slip)

Default days from submission to the market response due date: 7

Placement journey per line of business or product type (key: product type, LOB code or "default"). Steps brokerSlip, quotationSlip, placementSlip, directPolicy: required | optional | skip

Apply the placement journey to renewal quotations (false: a renewal quotation converts directly): ☐

Placement slip statuses in which the participants and premium can still be edited: draft, declined

Keywords in a product name that identify its line of business for the placement journey (motor, fire, IAR and EB are recognised already)

Security

API rate limit per signed-in user (or per IP without sign-in): max requests in windowSeconds (max 0 = off)

Sign-in / forgot-password rate limit per IP and per username (max attempts in windowSeconds)

Refuse the last N passwords (0 = off): 5

Password maximum age in days before a change is required (0 = never): 90

Minimum password length: 8

Password must contain a digit: ☒

Password must contain a lower-case letter: ☒

Password must contain a symbol: ☒

Password must contain an upper-case letter: ☒

Roles that must enrol in two-factor authentication:

Wrong entries allowed for one password reset code before it is withdrawn: 5

Minutes a password reset code stays valid: 15

Password reset e-mail body (HTML: {{code}}, {{minutes}}, {{companyName}}):

Password reset e-mail subject ({{companyName}}): Your {{companyName}} password reset code

Minutes a restricted sign-in (forced password change, two-step enrolment) stays valid: 15

Roles that only see their own book (records they own or of clients they own):

Minutes allowed to enter the two-factor code after the password: 5

Issuer name shown in the authenticator app: BrokerVerse

Figure 174. Configuration: security settings

The business time zone is `general.timezone` (Asia/Manila). Dates of transactions, the "today" of reports and the schedules follow it.

Caution: Change GL accounts, tax rates and maker-checker switches only with the agreement of the

Accounting Manager. See Appendix C for the key settings.

23.13 Schedules

Job	What it does	Schedule (Asia/Manila)	Enabled	Next run	Last run	Last status
Bank reconciliation auto-match	Run the automatic matching rules on every bank account with unmatched statement lines	Daily at 05:45	No	-	-	-
Month-end close reminder	Notify finance a configurable number of days before the accounting period ends, and about ended periods still open	Daily at 08:00	No	-	-	-
Recurring journals	Post recurring journal templates whose next run date has arrived	Daily at 01:15	No	-	-	-
Accrual auto-reversal	Reverse accruals, commission deferrals and FX revaluations on day 1 of the next period	Monthly on day 1 at 00:30	No	-	-	-
Period auto soft-close	Soft-close ended periods after a grace period when no blocking month-end check fails	Daily at 02:00	No	-	-	-
Renewal notices	Create renewal reminders and notifications for policies expiring within the configured notice windows	Daily at 06:00	Yes	-	-	-
Policy expiry	Mark policies past their expiry date as expired	Daily at 00:15	Yes	-	-	-
Quotation expiry	Expire quotations older than the configured validity	Daily at 00:30	Yes	-	-	-
Receivable ageing	Recompute ageing buckets for open receivables and notify collections	Daily at 07:00	Yes	-	-	-
Daily reports	Generate the scheduled daily reports (production register, collections, claims position)	Daily at 05:00	Yes	-	-	-
E-mail outbox	Deliver queued e-mails	Every 5 minutes	Yes	-	-	-
Renewal notice queue	Send queued renewal notices and retry stale jobs	Every minute	Yes	-	-	-

Figure 175. Master > Schedules

Master > Schedules lists the jobs the system runs by itself, with the schedule in the business time zone (Asia/Manila, from System Settings > General). For each job you see what it does, the schedule in plain words, whether it is enabled, the next run, the last run and its status.

- Run now runs the job at once, for example after a change of settings. The result is shown, for example Updated: 5.
- The pencil changes the timetable, the job parameters (for example the days before period end of the month-end reminder) and enables or disables the job.
- History lists past runs with their results.

When several application servers run, each scheduled run happens once. The jobs are listed in Appendix D.

23.14 Audit Trail

Audit Trail
Every create, update, approval and sign-in, newest first.

Record type: Record ID: User: From date: To date:

Figure 176. Master > Audit Trail

Master > Audit Trail lists every create, update, approval, report run and sign-in, newest first: when, user, record type, record ID, action and the change with before and after values.

1. Enter a Record type (for example session for sign-ins, policy, receipt, placement, period-close-run), a Record ID or a User.
2. Enter a From date and To date to limit the period.
3. Select Search.

Use the audit trail for investigations, access reviews and to show that maker and checker were different people. Audit entries are kept for good (`housekeeping.audit_log_days` is 0).

24 Reports

24.1 How to run a report

BrokerVerse has 40 reports. Every report opens on the same report screen with the filters it uses.

- Reports > All Reports lists every report your role may run, grouped into Operational Reports and Financial Reports, with a short description. Type in Search reports to find one.
- Reports > Operational Reports and Reports > Financial Reports hold shortcuts to the most used reports. The Tax reports are also under Accounts > Tax and the bank reports under Accounts > Bank Reconciliation.

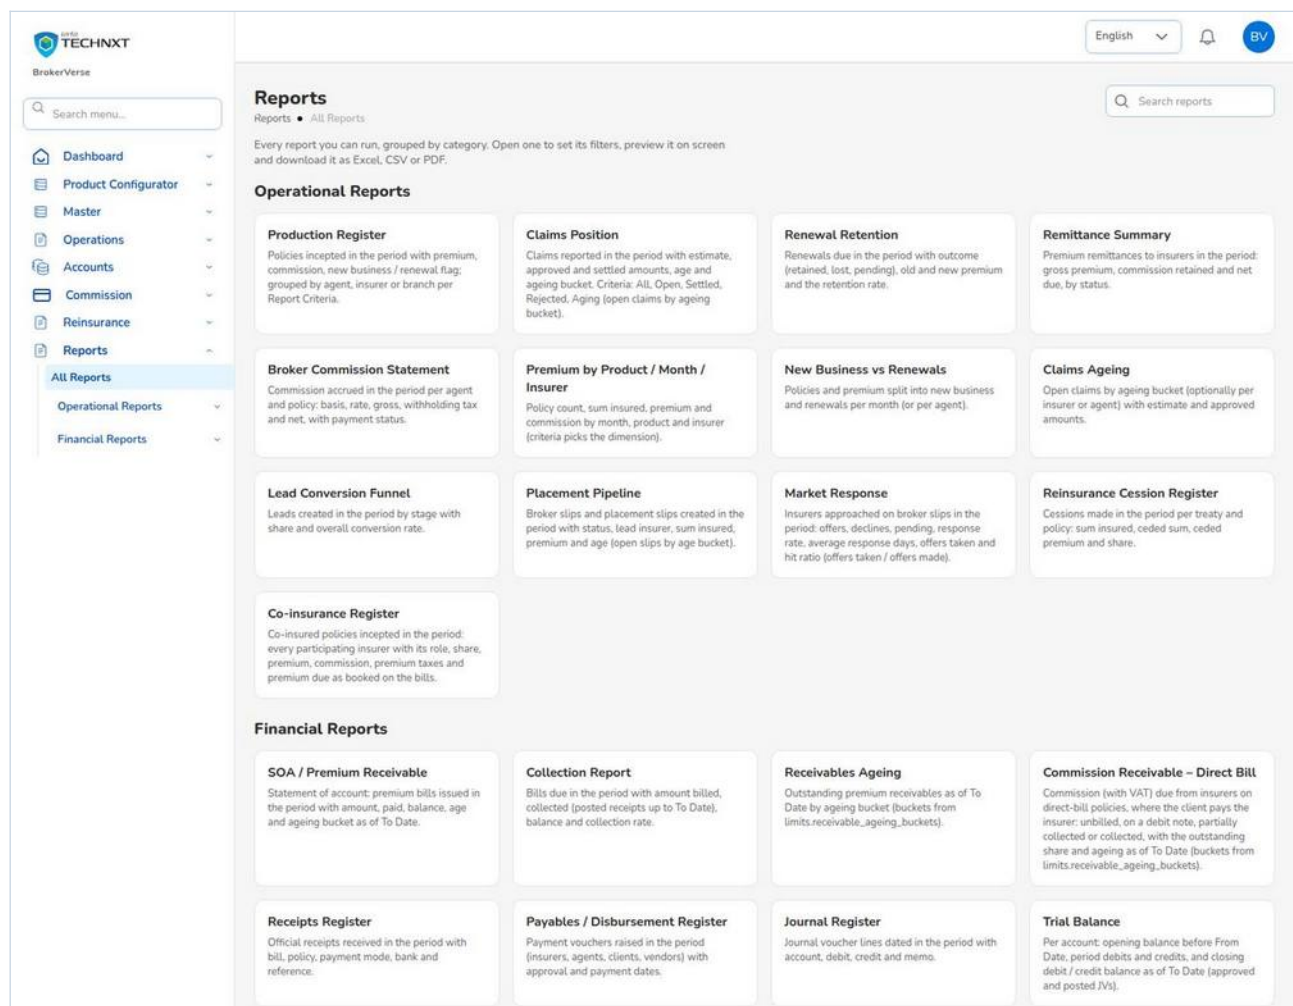

Figure 177. Reports > All Reports (System Administrator: every report)

1. Open the report.
2. Choose the Report Criteria, for example Overall, Agent, Principal Insurer or Branch. The filters the criteria uses become available.
3. Check the From Date and To Date.
4. Choose the other filters you need: agent, insurer, branch, client, product, bank account or status.
5. Select Preview to see the first rows on screen. The title shows how many rows the report has.
6. Choose the File format, CSV, Excel (XLSX) or PDF, and select Generate. The file downloads.

Files hold up to 50,000 rows (`reports.max_rows`). PDF reports print on the company letterhead with their summary figures. Download links stay valid for 72 hours and generated files are kept for 90 days. Every generated file is recorded in the audit trail. The Daily reports job produces the Production Register, the Collection Report and the Claims Position every morning at 05:00.

24.2 The report catalogue

Report	What it shows	Roles besides the System Administrator
Production Register	Policies incepted in the period: premium, commission, new or renewal, billing mode; by agent, insurer, branch or billing mode.	Sales, Processing, Operations, Claims
Premium by Product / Month / Insurer	Policy count, sum insured, premium and commission.	Sales, Processing, Operations, Claims, Accounting
New Business vs Renewals	New business and renewals by month or agent.	Sales, Processing, Operations, Claims, Accounting
Lead Conversion Funnel	Leads by stage with conversion rate.	Sales, Processing, Operations
Placement Pipeline	Broker Slips and Placement Slips created in the period with status, lead insurer, sum insured, premium and age.	Sales, Processing, Operations
Market Response	Insurers approached on Broker Slips: offers, declines, pending, response rate, average response days and hit ratio.	Sales, Processing, Operations
Co-insurance Register	Co-insured policies with each participant's share, premium and commission.	Sales, Processing, Accounting
Claims Position	Claims reported: estimate, approved, settled, age.	Sales, Processing, Operations, Claims

Report	What it shows	Roles besides the System Administrator
Claims Ageing	Open claims by ageing bucket.	Sales, Processing, Operations, Claims
Renewal Retention	Renewals due: retained, lost or pending, retention rate.	Sales, Processing, Operations, Claims
Remittance Summary	Remittances to insurers: gross premium, commission, net due, status.	Sales, Processing, Operations, Claims, Accounting
Broker Commission Statement	Commission per agent and policy: basis, rate, gross, WHT, net, paid status.	Sales, Processing, Operations, Claims, Accounting
Reinsurance Cession Register	Cessions per treaty and policy.	Processing, Accounting
SOA / Premium Receivable	Bills issued: amount, paid, balance, age.	Accounting, Sales
Receivables Ageing	Outstanding receivables by bucket.	Accounting, Sales
Collection Report	Bills due: billed, collected, balance, collection rate.	Accounting
Receipts Register	Official receipts with bill, policy, mode, bank, reference.	Accounting
Payables / Disbursement Register	Payment vouchers with approval and paid dates.	Accounting
Commission Receivable - Direct Bill	Commission and VAT due from insurers on direct-bill policies, with ageing.	Accounting
Due to Insurers by Co-insurer	Premium due to each insurer on bills of the period, split per participant: due, collected, remitted and still held.	Accounting
Aged Payables to Insurers	Premium payable to insurers not yet remitted, aged from the payable date.	Accounting
Journal Register	Journal lines with account, debit, credit, memo, status.	Accounting
Trial Balance, Trial Balance (Opening / Movement / Closing)	Balances per account.	Accounting
General Ledger Detail	Every line of an account with running balance.	Accounting
Income Statement, Balance Sheet	Financial statements with year to date and prior year.	Accounting
Month-End Close Status	Each period's close run and checklist result.	Accounting
VAT Summary, SAWT, QAP, SLSP Sales, SLSP Purchases	BIR working papers and alphalists (Chapter 18).	Accounting
Bank Reconciliation Statement, Outstanding Cheques, Deposits in Transit, Unmatched Bank Lines, Bank Book	Bank reports (Chapter 19).	Accounting
Incentive Results	Programme target, achieved, payout per person.	Accounting, Sales

Income Statement
Reports • Financial Reports • Income Statement

Revenue and expenses for the period and fiscal year to date (from the fiscal year start of To Date), with the same periods of the prior year. Year-end closing entries are left out; net income is in the summary.

25 Role quick guides

Each section below is a one-page summary for one role: where you land, your daily work and where to find it, the approvals you give or need, and the reports you use. The module chapters give the detail. A separate slide deck for each role is delivered with this manual.

25.1 Sales & Marketing (Account Executive)

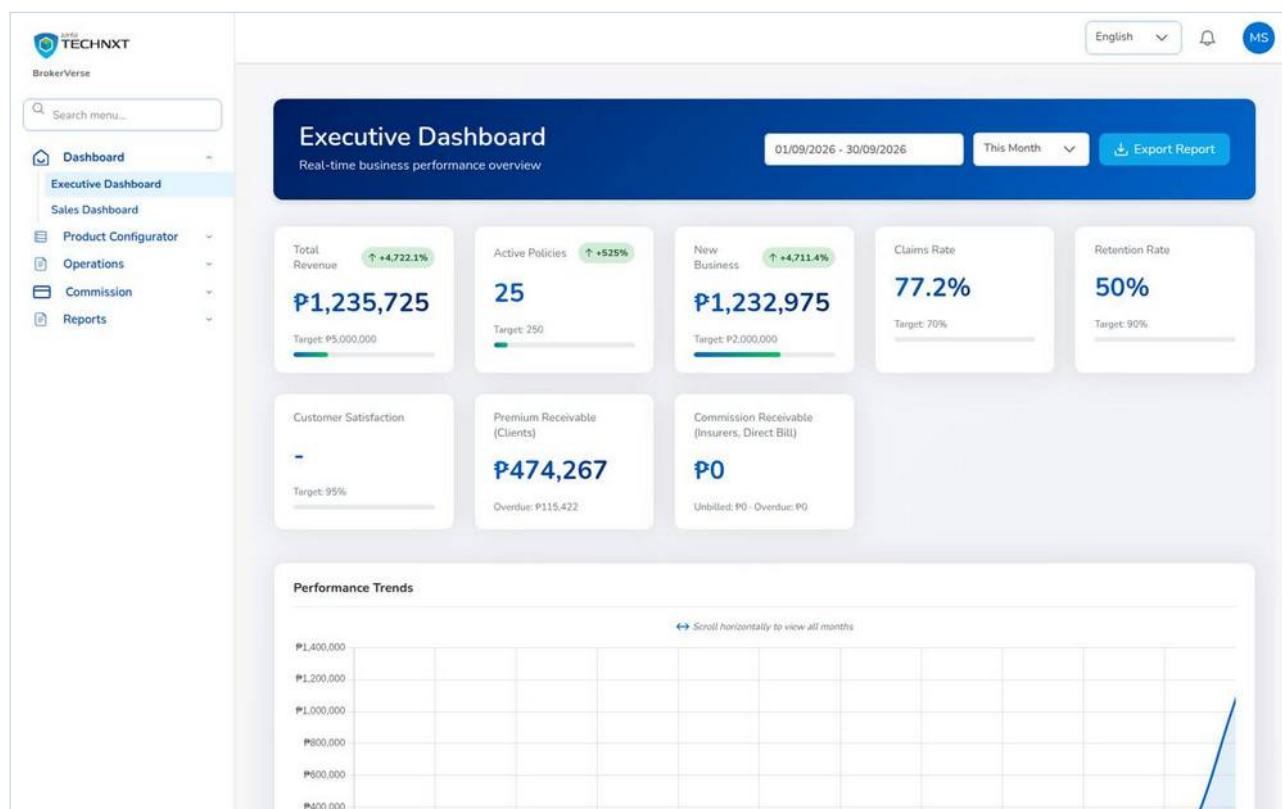

Figure 183. Landing page of Sales & Marketing (maria.sales)

You land on the Executive Dashboard. Your own figures are on Dashboard > Sales Dashboard.

Task	Where	Chapter
Record a prospect	Operations > Leads/Prospects > Create Lead	5
Load many prospects	Leads/Prospects > Bulk Upload	5
Quote a motor risk	Lead > Create Quote	8
Ask the Processing Team to market a commercial risk	Agree the risk details; the Processing Team prepares the Broker Slip	7
Send a quotation to the client	Quotation > Send for Customer Approval	8
Record the client's payment	Policy > Proceed to Payment	9
Follow renewals	Operations > Renewals > Renewal Queue, At-Risk Policies, Negotiations	12
Check your commission	Commission > Commission Dashboard	15

Approvals: your quotations are approved by another user, and your renewal terms by the Processing Team. You do not post receipts. Reports: Production Register, Premium by Product, New Business vs Renewals, Lead Conversion Funnel, Placement Pipeline, SOA / Premium Receivable, Receivables Ageing, Incentive Results.

25.2 Processing Team (Placement & Policy Processing)

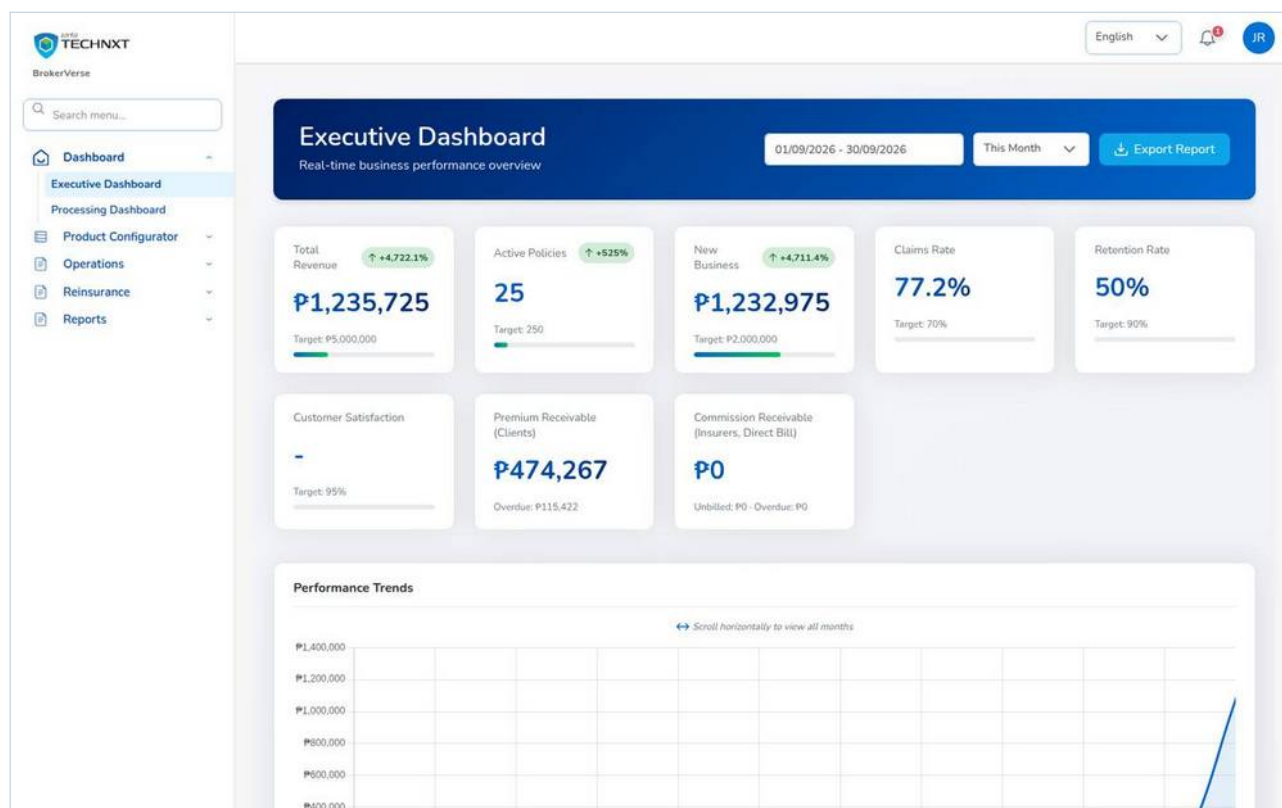

Figure 184. Landing page of the Processing Team (jose.uw)

You land on the Executive Dashboard. Your workbench is Dashboard > Processing Dashboard.

Task	Where	Chapter
Market a risk	Operations > Broker Slips > New Broker Slip, Submit to market	7
Record offers and declines	Broker Slip > Market responses > Record response	7
Compare and choose the security	Broker Slip > Compare offers	7
Prepare the Quotation Slip	Compare offers > Prepare Quotation Slip	7, 8
Send the firm order and record confirmations	Placement Slip > Send to insurer(s), Confirm	7
Issue the policy	Placement Slip > Issue Policy, or Quotation > Proceed to Policy	7, 9
Record a policy the insurer issued	Placement Slips > Record Issued Policy	7
Complete endorsements	Endorsement > Proceed > Complete	10

Task	Where	Chapter
Approve renewal terms	Notification, Renewals > Negotiations	12
Keep the motor tariff	Product Configurator > Product Templates	22
Treaties and cessions	Reinsurance	20

Reports: Placement Pipeline, Market Response, Co-insurance Register, Production Register, Claims Position, Renewal Retention, Reinsurance Cession Register.

25.3 Operations (Client Servicing)

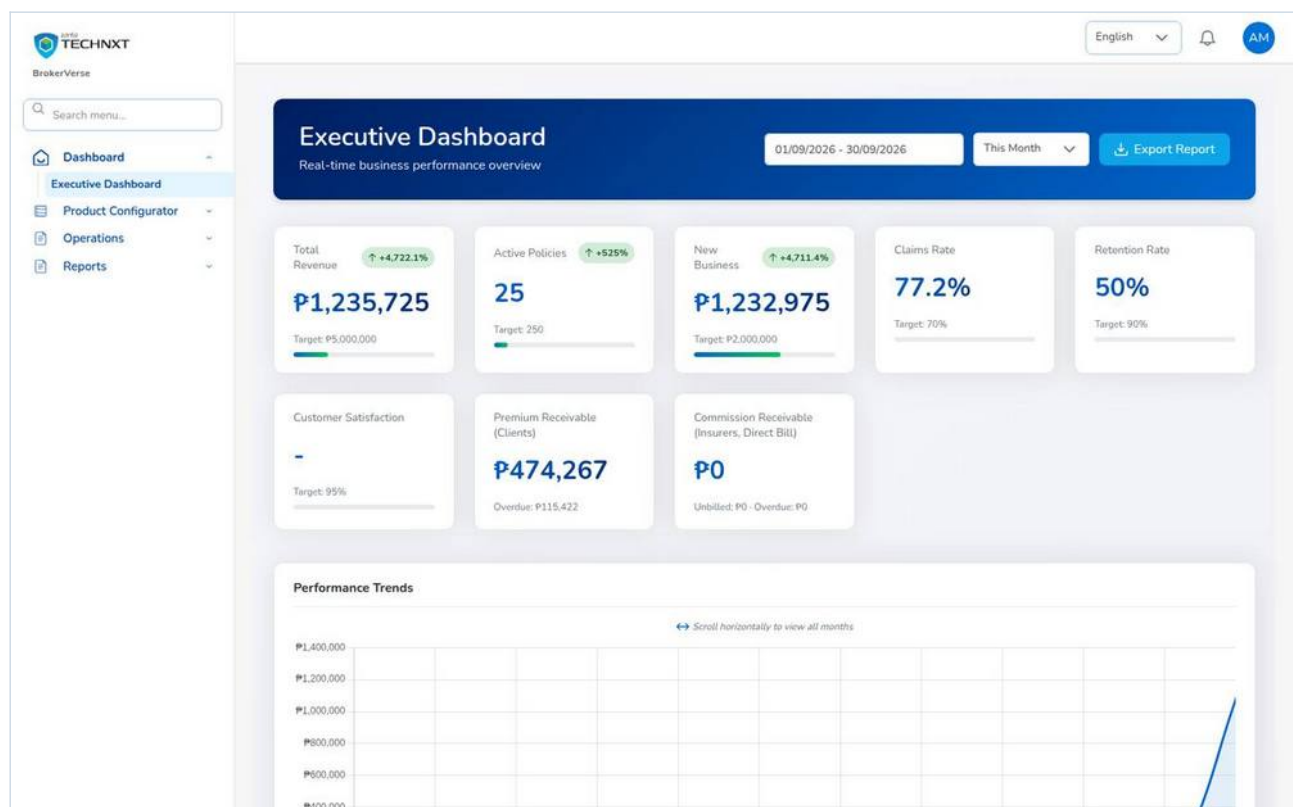

Figure 185. Landing page of Operations (ana.cs)

You land on the Executive Dashboard. Your daily worklist is Operations > Open Items.

Task	Where	Chapter
Find a client and its policies	Operations > Clients	6
Raise an endorsement request	Policy > three dots > Endorsement	10
Record the client's payment	Policy > Proceed to Payment	9
Work expiring policies and pending payments	Operations > Open Items	13
Renew a policy	Operations > Renewals > Renewal Policy	12
Send documents to the client	Policy details > Documents & Billing	9

Approvals: endorsements are completed by the Processing Team with the insurer's document; payments are verified by Accounting. Reports: Production Register, Claims Position, Renewal Retention, Remittance Summary, Broker Commission Statement.

25.4 Claims

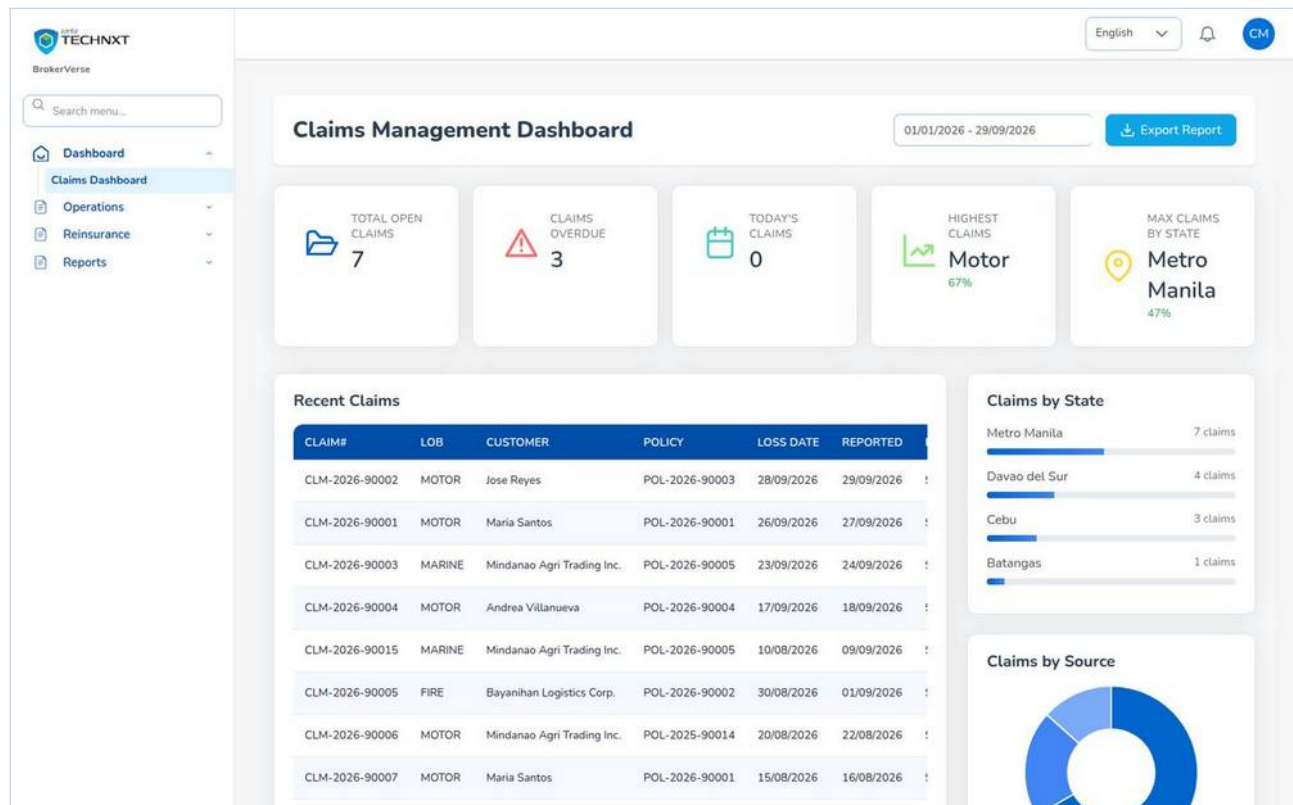

Figure 186. Landing page of Claims (carlo.claims)

You land on the Claims Dashboard.

Task	Where	Chapter
Register a claim	Policy > three dots > Claim	11
Follow up the insurer and adjuster	Claims > eye icon > Proceed	11
Submit a settlement (maker)	Claim Settlement > Submit	11
Approve a settlement (checker)	Waiting for Settlement > Proceed	11
Print claim letters	Claim Settlement > documents	11
Register a reinsurance recovery	Reinsurance > Claims Recovery	20

A second Claims user approves every settlement; you cannot approve your own. For settlements paid through the broker, tell Accounting when the insurer's funds are due, so the funds received and the payment to the claimant are recorded. Reports: Claims Position, Claims Ageing.

25.5 Accounting

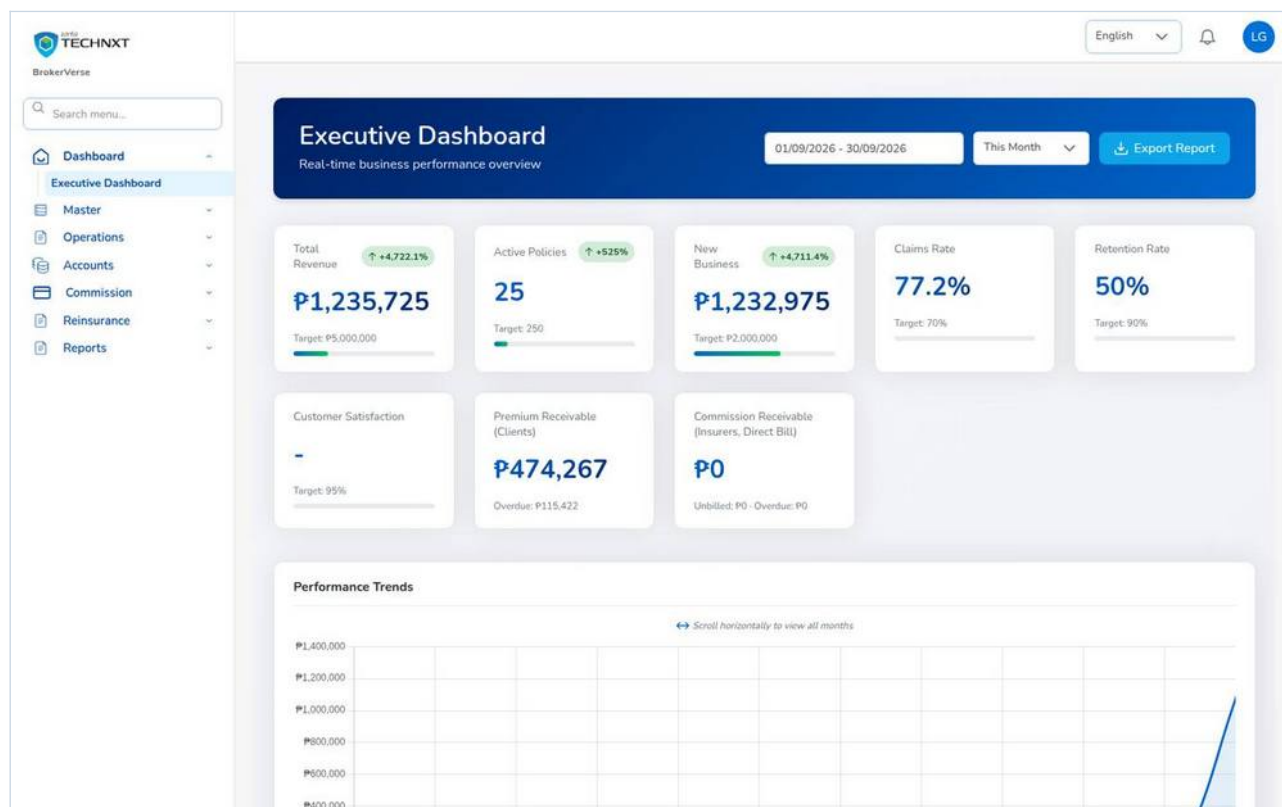

Figure 187. Landing page of Accounting (liza.finance)

You land on the Executive Dashboard.

Task	Where	Chapter
Verify payments and post official receipts	Notification, Accounts > Receipts	9, 14
Follow collections	Accounts > Collections	14
Pay commission	Commission > Agents/Referrer Accounts	15
Remit premium to insurers	Accounts > Remittance	16
Bill direct-bill commission	Accounts > Remittance > Direct Bill Processing	16
Journal vouchers and write-offs	Accounts > Journal Voucher, Open Entry Matching	14
Bank reconciliation	Accounts > Bank Reconciliation	19
Month-end close (prepare)	Accounts > Period End > Month-End Close	17
BIR reports and Form 2307	Accounts > Tax	18
Incentive calculations	Accounts > Incentive > Calculations	21

Maker-checker: another Accounting user approves your vouchers, journal vouchers, remittances, settlements, debit notes and incentive batches; the Accounting Manager approves your close runs and

bank reconciliations. Reports: every financial report, Remittance Summary and Broker Commission Statement.

25.6 Accounting Manager

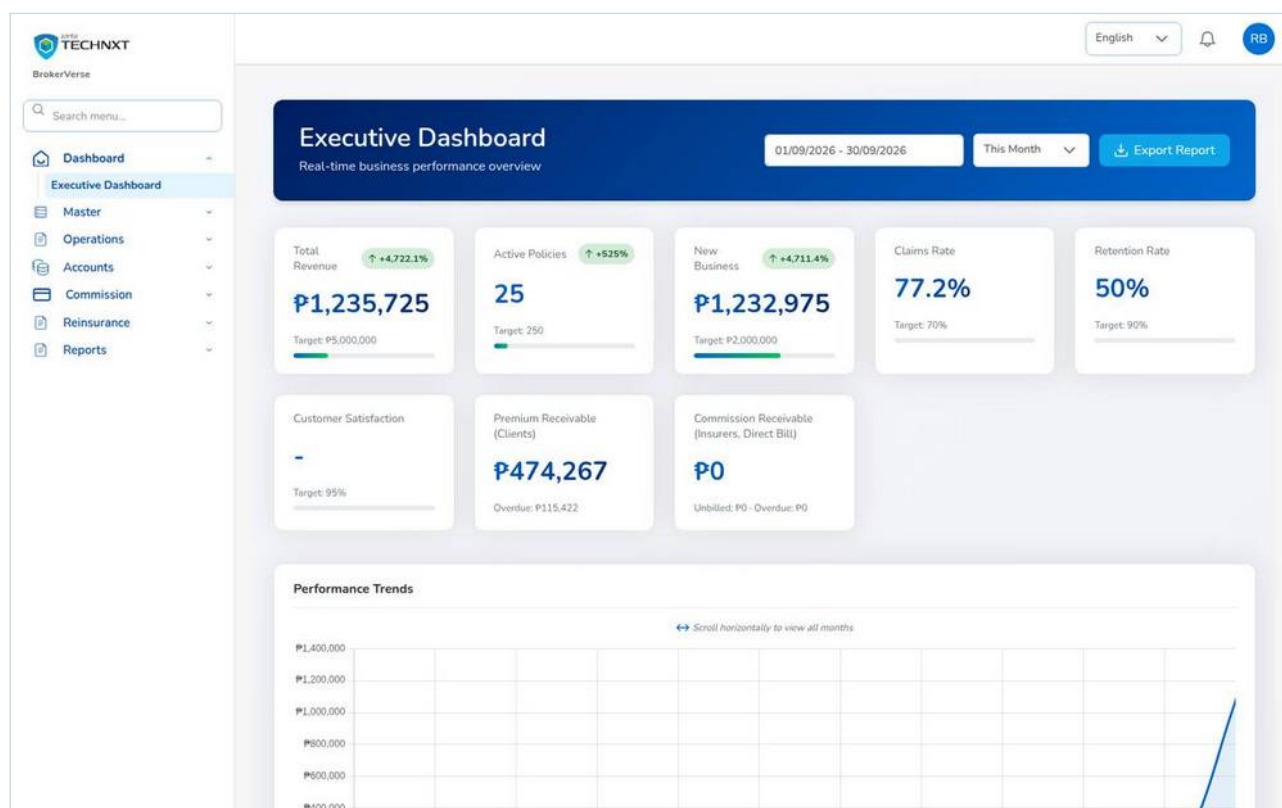

Figure 188. Landing page of the Accounting Manager (rosa.acctmgr)

The Accounting Manager has the menus of Accounting and does the same work, plus these approvals:

Approval	Where	Chapter
Approve or reject a month-end close	Accounts > Period End > Month-End Close > run > Approve	17
Close the year and reverse a year-end close	Accounts > Period End > Year-End Close	17
Reopen a closed period, soft-close and close periods	Accounts > Period End > Period Management	17
Post into a soft-closed period	Any posting screen	17
Approve or reopen a bank reconciliation	Accounts > Bank Reconciliation > Reconciliations	19
Approve vouchers, journals, remittances and incentive batches of other users	The approval screens of each module	14, 16, 21

You cannot approve what you prepared yourself. Review the Month-End Close Status report and the reconciliation statements before you approve.

25.7 System Administrator (Super Admin Access)

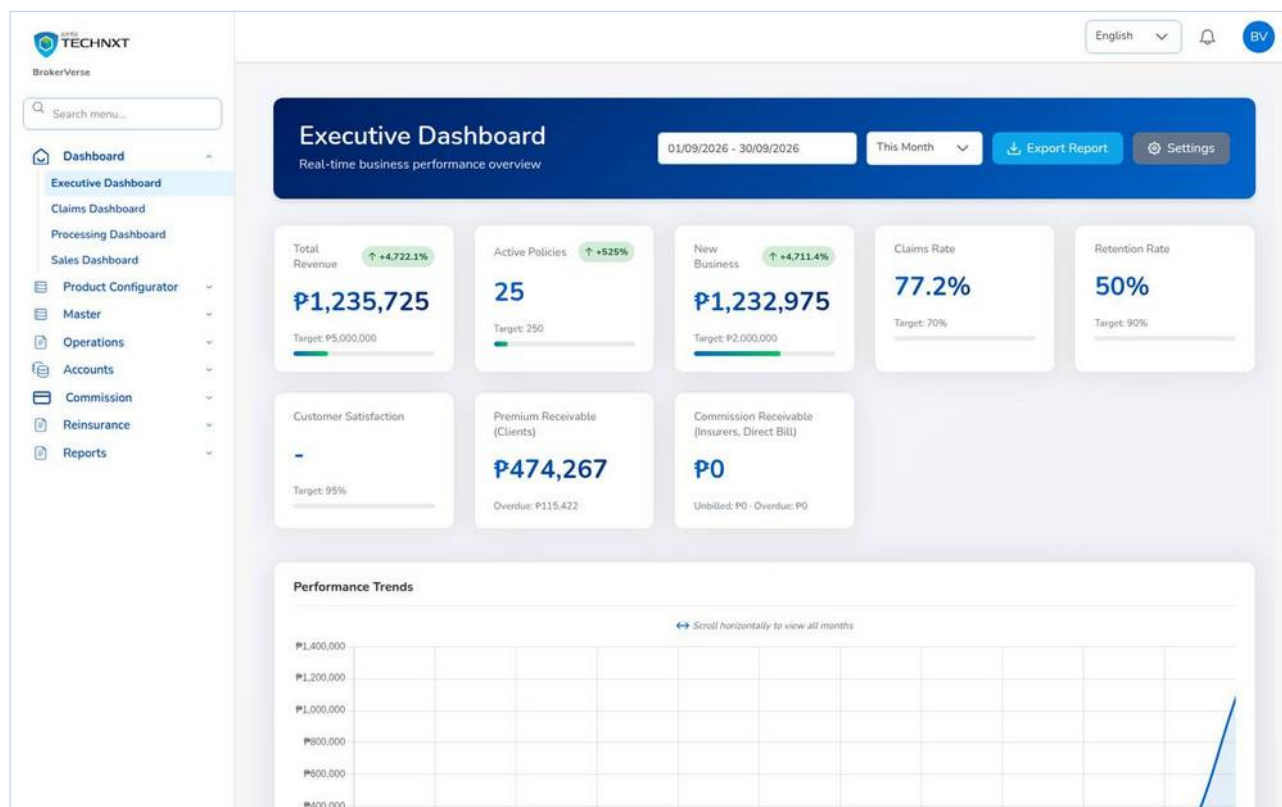

Figure 189. Landing page of the System Administrator (bea.admin)

You see every menu. Keep this role for administration and use a business role for daily work.

Task	Where	Chapter
Users, roles, unlock, reset password	Master > Generals > User Management	23
Company and letterhead	Master > Generals > Organization > Company	23
Insurers and credit terms	Master > Generals > Insurance Management > Insurance Company	23
Master uploads	The Upload button of each master; templates in docs/templates	23
Document numbering	Master > Document Numbering	23
Commission rates	Master > Finance > Commission Rate Matrix	23
Posting rules and account determination	Master > Finance > Posting Rules, Account Determination	23
Business settings	Master > Configuration	23
Schedules	Master > Schedules	23
Audit	Master > Audit Trail	23

Before go-live: set the company and letterhead, the SMTP mailbox (Office 365), the numbering of official receipts to match the Authority to Print, the security settings and the roles that must use two-factor authentication.

26 Appendices

Appendix A. Status reference

Record	Statuses in order
Lead	New, Contacted, Qualified, QuoteGenerated, Converted; Lost
Broker Slip	Draft, Submitted, Responses in, Closed; Cancelled
Insurer offer	Pending, Offered, Declined
Quotation	Draft, Pending Customer, Customer Accepted, (Submitted to Insurer, Approved), Converted to Policy; Rejected, Dropped, Expired
Placement Slip	Draft, Sent to insurer, Bound, Policy issued; Declined, Cancelled
Policy	Active, then Expired, Renewed, Lapsed or Cancelled
Policy payment	Pending, Reviewing, Partial, Completed; Refunded
Endorsement	Draft, Pending Customer, Completed; Initiate Cancel, Cancelled, Rejected
Claim	Pending, Processing, Pending Approval, Approved, Settled, Closed; Rejected
Commission line	Accrued, Eligible, Approved, Paid; Reversed
Payment voucher	Draft, For approval, Approved, Paid; Cancelled
Journal voucher	Draft, Awaiting approval, Posted; Rejected
Remittance	Draft, Pending Approval, Approved, Completed; Rejected, Cancelled
Debit note	Draft, Pending Approval, Open, Partially Collected, Collected; Rejected, Cancelled
Accounting period	Open, Soft-closed, Closed, Locked
Month-end close run	Draft, In Progress, Submitted, Approved (period closed); Rejected, Cancelled
Bank reconciliation	Draft, Prepared, Approved; Reopened
User	Active, Inactive, Locked

Appendix B. Number series

Numbers follow the format of their series on Master > Document Numbering. The delivered format is {PREFIX}-{YYYY}-{SEQ} with five digits, for example POL-2026-00001, restarting every calendar year.

Prefix	Document	Issued when
LD	Lead	A lead is saved
BS, OFR	Broker Slip, insurer offer	A Broker Slip is saved; an insurer is added to it
QT	Quotation	Completed Quote, or Prepare Quotation Slip

Prefix	Document	Issued when
PS	Placement Slip	A Placement Slip is prepared or created
POL	Policy	The policy is issued or recorded
CL	Client code	The first policy of a client is issued
INV	Invoice / bill	Policy issue, endorsement or renewal with premium
OR, RT	Official receipt, receipt transaction	A receipt is posted or a payment confirmed
PV, DT, IL	Payment voucher, disbursement transaction, payable	A voucher, payout or insurer payment is created
JV	Journal voucher	Every journal, manual or system
END	Endorsement	An endorsement is saved
CLM	Claim	A claim is registered
REM, BLK, SET	Remittance, remittance batch, settlement	On the remittance screens
DN, DNC	Commission debit note, debit note collection	Direct bill processing
MEC, YEC, RJV	Month-end close, year-end close, recurring journal	Period end
BST, BRC	Bank statement, bank reconciliation	Bank reconciliation
CWT	BIR Form 2307	A certificate is issued
RN, RB, RQ, WB	Renewal, renewal batch, renewal quotation, win-back campaign	Renewal screens
CES, RCL, REC, BDX, TRT, RE	Reinsurance cession, recovery, reconciliation, bordereau, treaty, reinsurer	Reinsurance screens
PC, PCR, PCRC	Petty cash transaction, request, receipt	Petty cash screens
INC, CALC	Incentive programme, calculation batch	Incentive screens
ADJ, BIL, BNK, EXC, NTF, RPT, SCH, STMT, TRF	Remittance adjustment, bill, bank transaction, exception, notification, report, schedule, statement, transfer	Remittance screens
TPL	Product template	Product Configurator

Appendix C. Key configuration settings

All settings are on Master > Configuration unless noted. Changes apply at once and are audited.

Setting	Delivered value	Effect
<code>general.timezone, general.date_format</code>	Asia/Manila, DD/MM/YYYY	Business time zone and date format.
<code>placement.journey</code>	see Chapter 3	Steps each line must, may or does not use.
<code>placement.offer_validity_days</code>	30	Default validity of an insurer offer.
<code>placement.journey_applies_to_renewals</code>	off	Whether renewals follow the placement journey.

Setting	Delivered value	Effect
tax.vat_rate, tax.dst_rate, tax.lgt_rate, tax.fst_rate	12%, 12.5%, 0.75%, 2%	Taxes on the net premium.
premium.taxes_by_lob	Motor: VAT, DST, LGT; Fire and IAR add FST	Which taxes apply per line.
limits.quote_validity_days	30	Quotation validity.
quotations.approval_link_ttl_hours	168	Validity of the client's approval link.
quotations.approval_notify_roles	processing	Roles notified of quotations sent to clients.
workflow.quote_maker_checker	on	A quotation cannot be approved by its creator.
commission.default_rate	15%	Brokerage when neither the matrix nor the insurer has a rate.
commission.wht_rate_by_type	Agent 5%, Sub-agent 5%, External 10%	Withholding tax on comsub.
commission.eligible_roles, incentive.eligible_roles	sales	Who earns commission and incentives.
commission.require_full_payment, commission.require_bank_account	on	When commission can be paid.
direct_bill.default_billing_mode	broker	Default billing mode.
collections.default_credit_days, remittance.default_due_days	30, 30	Credit terms when the insurer has none.
finance.maker_checker_enabled, journal.require_approval	on	Approver differs from maker; manual journals need approval.
accounting.period_close_requires_approval	on	The Accounting Manager approves the month-end close.
accounting.fiscal_year_start_month	1	First month of the fiscal year.
accounting.split_premium_taxes	on	VAT, DST and LGT on premium in their own accounts.
bank_reconciliation.date_window_days	5	Date window of the amount and date matching rule.
bank_reconciliation.stale_cheque_days	180	Age of a stale cheque.
bank_reconciliation.require_balanced_statement, bank_reconciliation.auto_match_on_import	on, on	Statement import checks.
bir.withholding_agent_tin, bir.registered_name, bir.registered_address, bir.zip_code	empty	Broker details on the BIR forms. Fill in before the first filing.
claims.settlement_maker_checker, claims.block_unpaid_premium, claims.sla_days	on, on, 20	Claims controls.
renewals.pipeline_days, limits.renewal_notice_days, renewals.grace_period_days	90; 60, 30, 15; 30	Renewal timetable.
remittance.approval_levels	100,000; 1,000,000; above	Approval levels by amount.
limits.receivable_ageing_buckets	30, 60, 90, 120	Ageing buckets.

Setting	Delivered value	Effect
<code>security.password_min_length</code> , <code>security.password_history_count</code> , <code>security.password_max_age_days</code>	8, 5, 90	Password rules.
<code>limits.max_login_attempts</code> , <code>limits.session_idle_minutes</code>	5, 30	Lockout and idle sign-out.
<code>security.require_2fa_roles</code>	none	Roles that must use two-factor authentication.
<code>notification.email_enabled</code>	as set at go-live	Sends queued e-mails through the Office 365 mailbox.
<code>housekeeping.*</code>	see Appendix D	Retention of logs and queues.

Appendix D. Scheduled jobs

Times are Manila time (`general.timezone`).

Job	When	What it does
Policy expiry	Daily 00:15	Marks policies past their expiry date as Expired.
Quotation expiry	Daily 00:30	Expires quotations older than their validity.
Accrual auto-reversal	Day 1 of the month, 00:30 (off)	Reverses accruals, commission deferrals and FX revaluations of the previous period.
Recurring journals	Daily 01:15 (off)	Posts recurring journal templates whose next run date has come.
Period auto soft-close	Daily 02:00 (off)	Soft-closes ended periods after a grace period when no blocking check fails.
Housekeeping	Daily 02:45	Deletes expired sign-in tokens and reset codes and old job runs, read notifications, sent e-mails and sign-in history after their retention days (<code>housekeeping.*</code>). The audit trail is kept.
Daily reports	Daily 05:00	Produces the Production Register, Collection Report and Claims Position.
Renewal pipeline	Daily 05:30	Enrols policies expiring within 90 days; lapses renewals past the grace period.
Bank reconciliation auto-match	Daily 05:45 (off)	Runs the matching rules on every bank account with unmatched lines.
Renewal notices	Daily 06:00	Creates the 60, 30 and 15-day renewal notices.
Receivable ageing	Daily 07:00	Recomputes the ageing buckets of open receivables.
Collection reminders	Daily 08:00	Reminds clients of premium falling due.
Month-end close reminder	Daily 08:00 (off)	Reminds Accounting before a period ends and about ended periods still open.
E-mail outbox	Every 5 minutes	Sends queued e-mails.
Renewal notice queue	Every minute	Sends queued renewal notices.

Jobs marked off are delivered switched off. Switch on those Accounting wants on Master > Schedules.

Appendix E. Glossary

Term	Meaning
Account role	A name for the purpose of an account (for example commission income) that a posting rule uses. Account Determination maps each role to a GL account.
APPA	Auto Passenger Personal Accident: personal accident cover for the driver and passengers, priced per seat.
ATC	Alphanumeric Tax Code of the BIR, for example WI139.
BIR Form 2307	Certificate of Creditable Tax Withheld at Source.
Billing mode	Broker billed (the client pays the broker) or direct bill (the client pays the insurer).
Bound	All insurers of a Placement Slip have confirmed their shares.
Broker Slip	The risk presented to several insurers with a request for quotation.
Brokerage	The commission the insurer pays the broker.
Co-insurance	Several insurers share one risk, each for a percentage, under one lead insurer.
Comsub	Commission share paid by the broker to an agent or referrer.
CTPL	Compulsory Third Party Liability, required for LTO registration, at the Insurance Commission tariff.
Debit note	The broker's bill to an insurer for commission on direct-bill policies.
DST, LGT, FST	Documentary stamp tax, local government tax, fire service tax.
EWT	Expanded withholding tax.
IAR	Industrial All Risks.
KYC	Know Your Customer: verification of the client's identity with a government ID.
Lead insurer	The insurer that leads a co-insurance and whose terms apply.
Maker-checker	The maker enters, a different user approves.
Placement Slip	The firm order to the lead insurer and co-insurers.
Posting rule	The recipe that turns a business event into journal lines.
QAP, SAWT, SLSP	BIR alphalists: Quarterly Alphalist of Payees, Summary Alphalist of Withholding Taxes, Summary List of Sales and Purchases.
Quotation Slip	The terms offered to the client, priced with taxes and commission.
Remittance	Payment of collected premium, net of commission, to the insurer.
Soft-closed	A period that accepts postings only from the Accounting Manager.
Stale cheque	A cheque not cleared within 180 days of issue.
TIN	Tax Identification Number.

Appendix F. Troubleshooting

Message or problem	What to do
Not authorised	The screen is not part of your role. Use your menu, or ask the System Administrator whether your role is right.
Account locked. Contact the administrator	Ask the System Administrator to unlock your user.

Message or problem	What to do
Too many sign-in attempts	Wait 5 minutes, then sign in again.
The authentication code is refused	Use the current code; check that the phone's clock is set automatically.
You were signed out	30 minutes without activity. Sign in again.
The journey of the line does not allow this step	The line requires another step (Chapter 3). For fire and IAR, create the Placement Slip before issuing.
Shares must total exactly 100%	Correct the shares of the participants, with exactly one lead.
The policy cannot be issued from the Placement Slip	An insurer has not confirmed yet, or your role cannot issue policies.
Issuance refused for missing KYC or vehicle identifiers	Complete ID type, number and image, chassis, motor and plate or MV file number.
Date of loss ... is outside the policy period	Check the date of loss and the policy.
Accounting period ... is soft-closed	Date the entry in an open period, or ask the Accounting Manager.
Accounting period ... is closed	Ask the Accounting Manager to reopen the period, with remarks.
Journal voucher refused: debit ... vs credit ...	Correct the lines until they balance.
Approval refused for the maker	Ask another user to approve.
This file was already imported	The bank statement was imported before. Delete the wrong statement first if needed.
Opening balances refused: journals already posted	Choose a go-live date before any posting in that fiscal year, or ask support.
Commission payout blocked: no bank account	Add the referrer's bank details.
E-mails are not received	Check that "Send e-mails" is on (Master > Configuration > Notification) and the E-mail outbox job ran.
Something went wrong on this screen	Select Reload screen. If it persists, report the screen, the time and the request ID to support.

Appendix G. Known limitations in this release

- The sign-in session is kept in the browser's local storage. Sign out on shared computers and keep the browser up to date.
- Two-factor set-up shows a setup key and an app link but no QR code. Type the key into the authenticator app.
- Filipino is configured as a language but has no translation of the screens yet.
- Sign-in and request limits are counted per application server. With several servers, add a limit at the load balancer.
- Some database queries use the database's own date. The database time zone must be Asia/Manila.
- Several masters have no Upload button yet (Company, Branch, Department, Line of Business, Product, Cover, Signatories, Exchange Rate, Commission, Employee Management, Write-off

reasons). Their templates are loaded by the System Administrator through the API route on the template.

- The BIR reports give the figures in the BIR column order; check them against the current BIR format before filing.
- The Settlement cash panel of a claim paid through the broker is on the claim screens, which are not in the Accounting menu. Until the menu is extended, the System Administrator records the funds received and the payment to the claimant.
- The Company master list opens with one empty row. Type in the search box to list the companies; view and edit work from the search result.
- A settlement is marked as paid through the broker by its settlement type or through the API; the settlement form offers Cash, Card and Cheque only.

Appendix H. Support

Level	Who	For
First line	The key user of your team	How-to questions; checking that a role or setting is not the cause.
Second line	Your System Administrator	Users, roles, passwords, two-step verification resets, settings and master data.
Third line	iorta TechNXT production support	Anything else, raised by the System Administrator through the channel in the support agreement.

When you report a problem, give the menu path, the record number (for example PS-2026-00001), the time to the minute, your user ID, the message and the request ID shown in the error. Never send a password or a two-step code.
