

CLIENT PRESENTATION

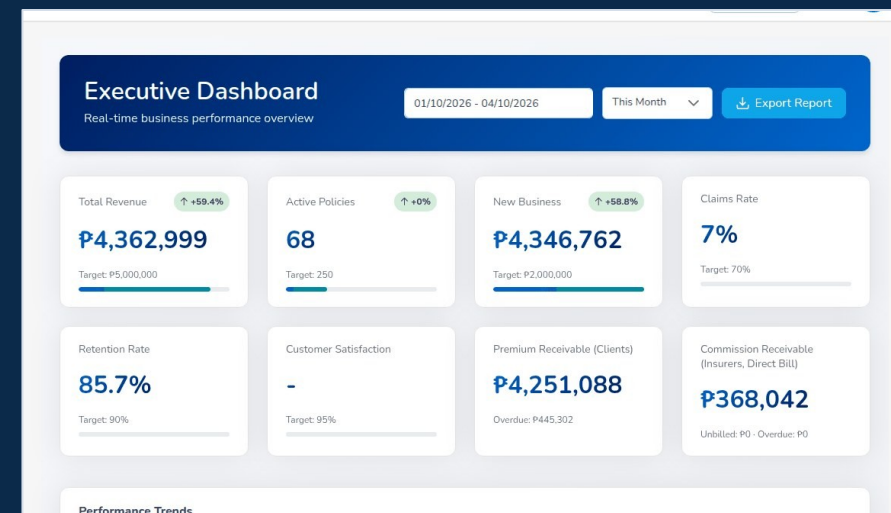

iNXT BrokerVerse

The insurance broking platform for Philippine non-life brokers,
from prospect to renewal to month-end close

Out-of-the-box (OOTB) version

Prepared for: [Client name]

Date: [03 October 2026]

Executive Dashboard: premium, active policies, new business, claims rate, retention and receivables, live from the transactions

Agenda

1

Who we are

iorta TechNXT and iNXT BrokerVerse

2

What a Philippine broker has to handle

Market, regulation and the daily work

3

The platform

Module map and the end-to-end journey

4

Module walk-through

From sales and placement to accounting, BIR tax and reinsurance

5

Controls, data privacy and security

Maker-checker, authority limits, approval notifications

6

Who does what

The seven delivered roles

7

Delivery

Technology, deployment, implementation timeline, support

8

Commercials and next steps

Perpetual or subscription, then demo, workshop, proposal

About iorta TechNXT

Who we are

- Insurance technology company and publisher of iNXT BrokerVerse
- Founded: [to confirm]
- Head office and Philippine presence: [to confirm]
- Team size and delivery centres: [to confirm]

What we deliver

- The iNXT BrokerVerse platform, OOTB version for Philippine non-life brokers
- Implementation: configuration, data load, training, UAT, go-live and hypercare
- Production support: L2 application support and L3 engineering
- Optional hosting on AWS, Azure or with a local partner

How we work

- Configure, do not customise: the broker is fitted to the product through masters and settings
- Written acceptance at the end of each phase
- One service desk, severity targets, monthly service report
- Changes priced openly at published day rates

References

- Client references that may be named: [to confirm]
- Other insurance products of iorta TechNXT: [to confirm]
- Certifications held: [to confirm]
- Contact: [account manager, mobile, e-mail]

What a Philippine non-life broker has to handle

The market

About 67

licensed insurance brokers (IC key data 2024, preliminary)

PHP 20 million

minimum paid-up capital for a broker, PHP 50 million for an insurance and reinsurance broker

PHP 149.11 billion

non-life gross premiums written in 2025; the top three insurers hold about a third

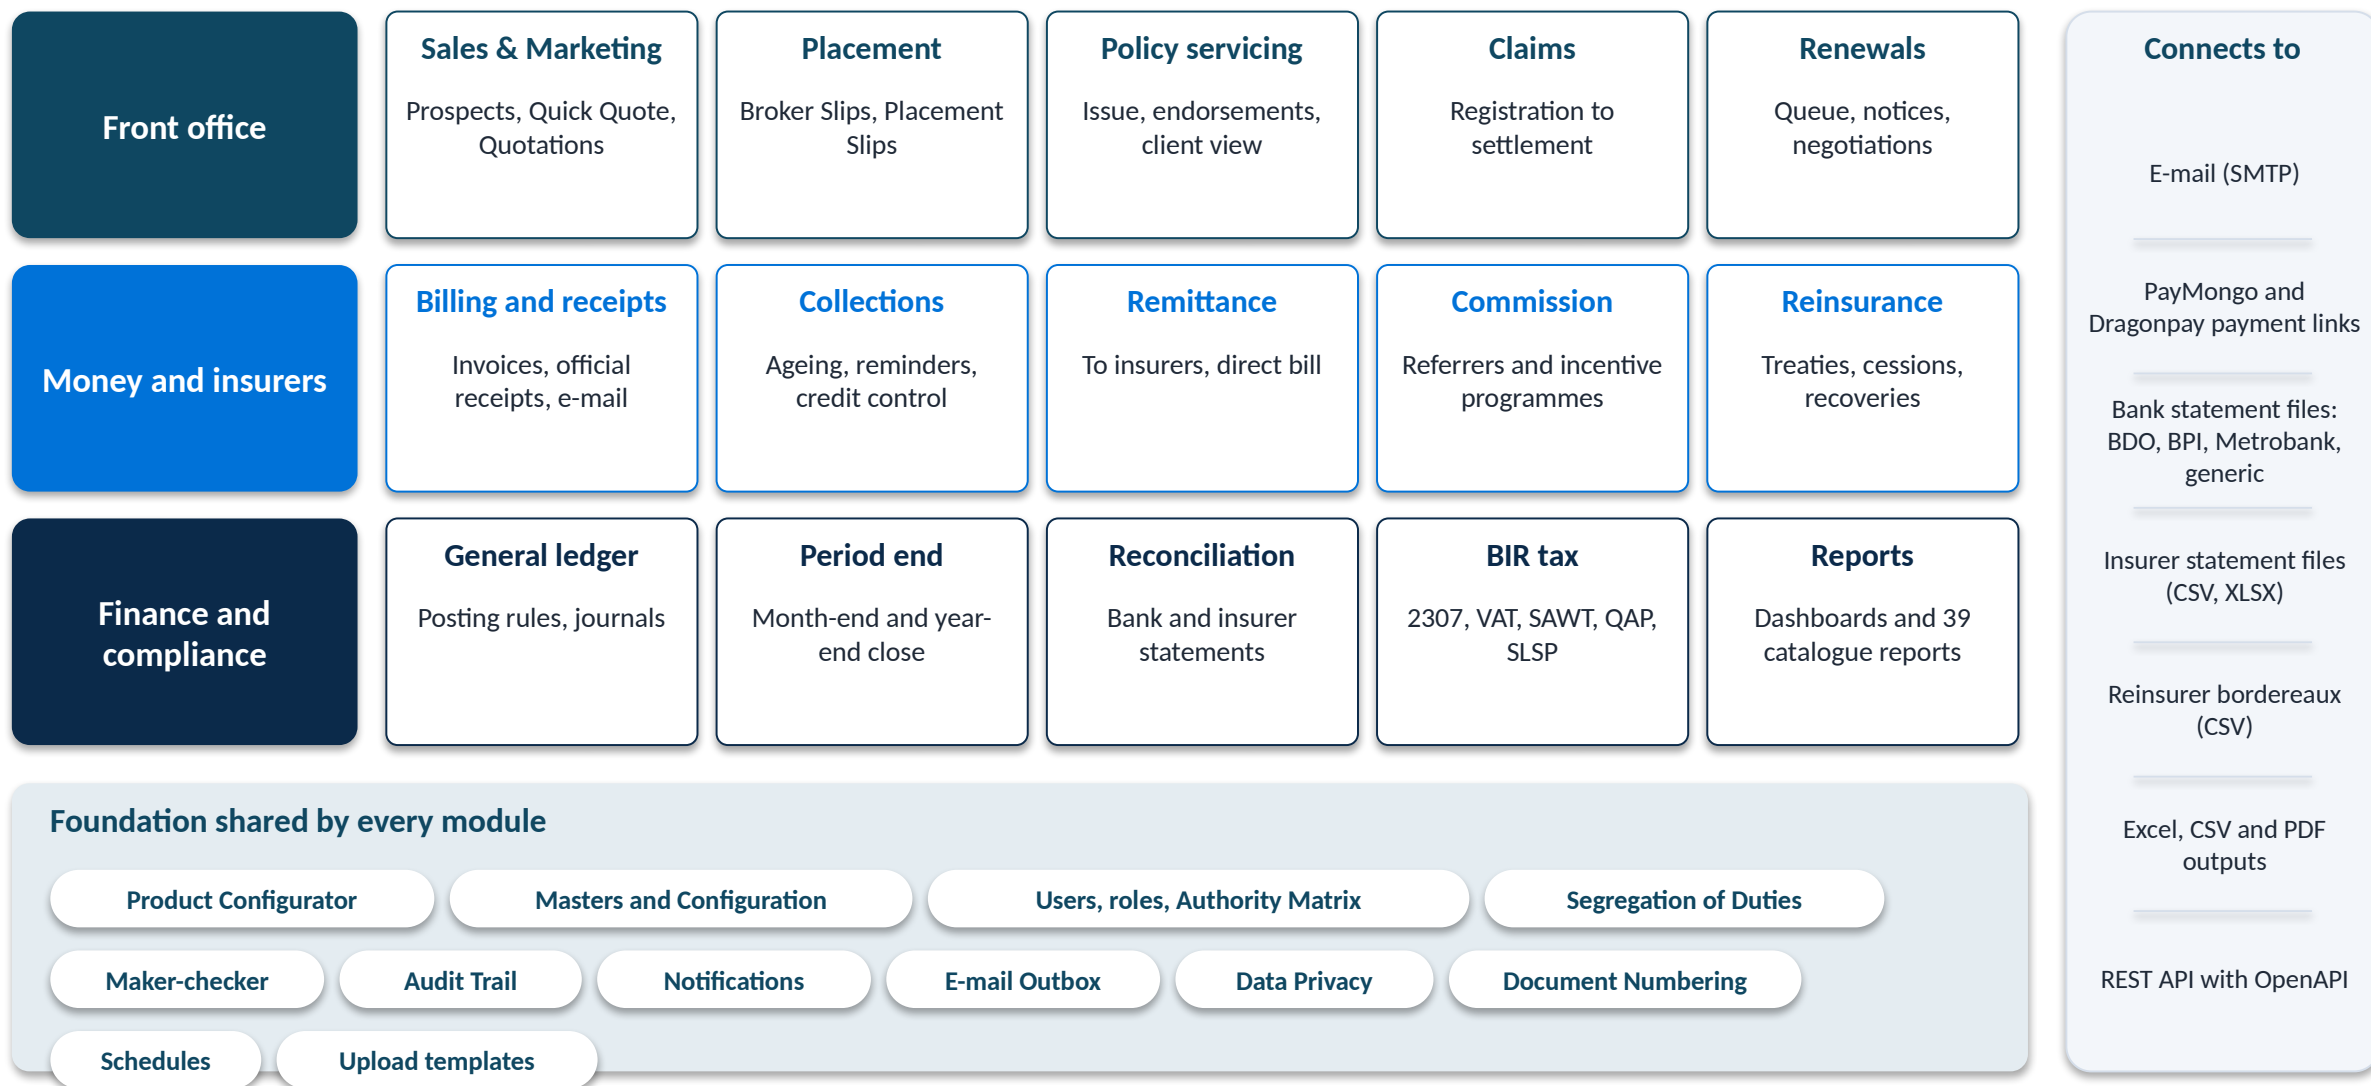

Under PHP 100 million

commission income of most brokers; three earn more than PHP 2 billion each

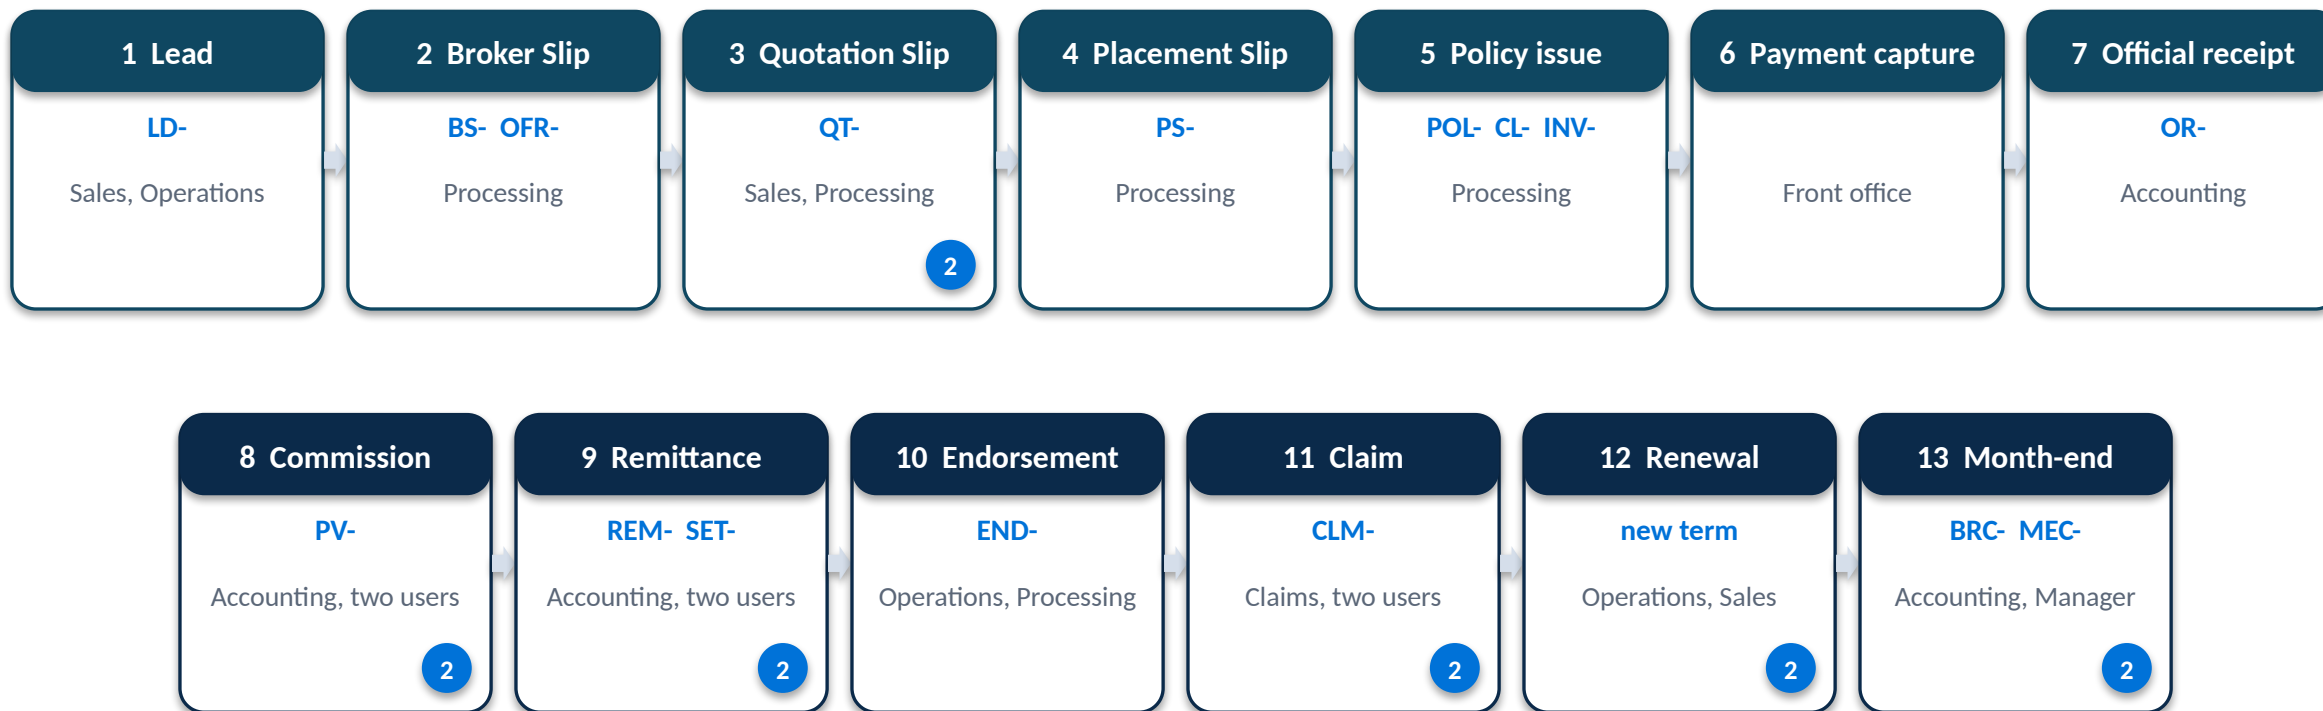

What the system has to get right every day

Many insurers per risk	Offers from several insurers, co-insurance shares that total 100%, a lead insurer, confirmations
Premium taxes	VAT 12%, documentary stamp tax 12.5%, local government tax by city or municipality, fire service tax 2%
Client money	Collect premium, issue the official receipt, remit to each insurer on its terms, watch the premium warranty
Commission	Broker-billed and direct-bill business, debit notes to insurers, BIR Form 2307 received, referrer payouts net of EWT
BIR and the books	Form 2307, VAT Summary, SAWT, QAP and SLSP; month-end close, bank and insurer reconciliation
Controls	Maker-checker on money and configuration, signing authority, segregation of duties, audit trail
Data Privacy Act	Consent per purpose, data subject requests on time, breach notice within 72 hours

The platform at a glance

The end-to-end journey: prospect to renewal to month-end

2 marks a step that a second user approves (maker-checker).

Placement journey by line. Motor: quotation straight to policy. Fire, IAR, Marine, Casualty, Engineering: Placement Slip required. Set per line in Master > Configuration.

One trail. Every step posts to the ledger by posting rule and is kept in the Audit Trail, so a policy can be followed from lead to remittance and claim.

Sales and quotation

Who

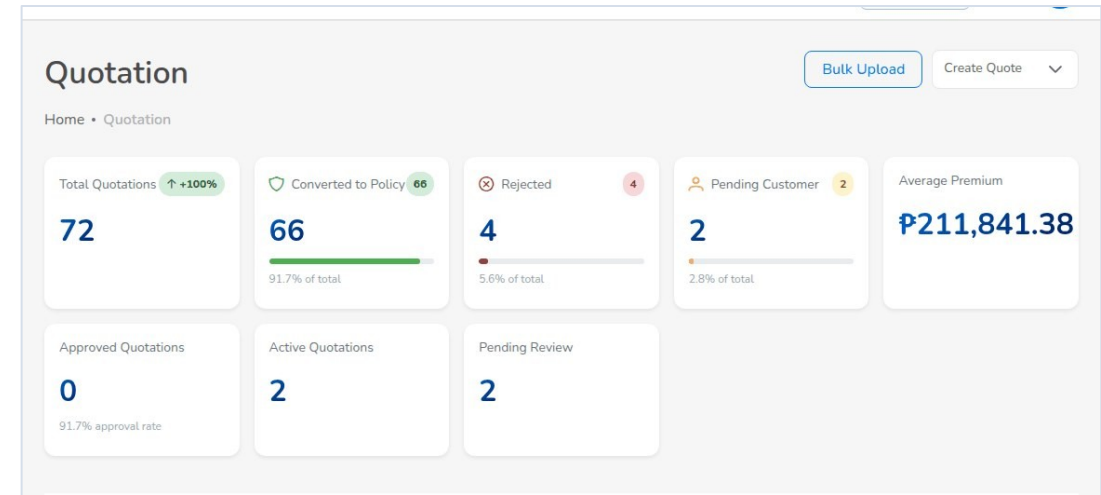

Sales & Marketing

Operations

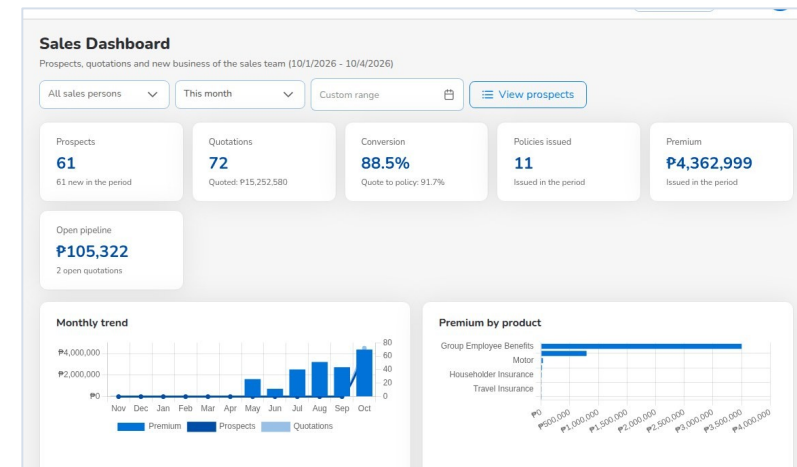

Processing Team

- **Prospects** individual or corporate (TIN required for corporate), one by one or by Excel upload
- **Quick Quote and Compare Insurers** prices a package from each insurer's rate table and prints a comparison without commission
- **Motor quotation in five steps** vehicle, plan, covers including CTPL and Auto Passenger PA, accessories, discount and commission
- **Server-side pricing** every quotation is priced again from the configured rates and taxes; a premium changed in the browser is refused
- **Client approval online** a signed link valid for 168 hours; the client accepts and the Processing Team is told
- **Payment links** PayMongo or Dragonpay; a paid link creates the official receipt
- **Sales Dashboard** prospects, quotations, conversion, policies issued and premium per account executive

Outputs Quotation PDF, insurer comparison, Lead Conversion Funnel report

Operations > Quotation: status of every quotation

Dashboard > Sales Dashboard

Placement with insurers

Who

Processing Team

- **Broker Slip (Request for Quotation)** presents one risk to several insurers; each offer or decline is recorded
- **Compare offers** side by side: gross premium, rate, deductibles, difference to the best offer; choose the security
- **Placement Slip** the firm order to the lead and the co-insurers; each confirms its share with its policy or certificate number
- **Co-insurance** shares must total exactly 100% with one lead; premium, commission, remittance and claims follow the shares
- **Journey per line** a line that requires a Placement Slip cannot be issued until every insurer has confirmed
- **Record Issued Policy and direct placement** for business the insurer has already issued

Outputs Broker Slip and Placement Slip PDFs, Placement Pipeline, Market Response (hit ratio), Co-insurance Register

Broker Slip: Compare offers

Operations > Placement Slips: draft, sent, bound, issued

Policy servicing, endorsements and claims

Who

Operations

Processing Team

Claims

- **Policy issue** from the Placement Slip, or Convert Policy for motor; client record and premium bill created
- **Motor KYC** government ID (type, number and image), chassis, motor and plate or MV file number before issue
- **Policy detail** policy schedule PDF, invoice, accounting entries, documents and related records in one place
- **Endorsements** personal details, motor details, coverage change, extension, cancellation; extra or return premium billed
- **Claims** registration checks the loss date against the policy period and unpaid premium
 - Preliminary Loss Advice e-mail to the insurer; acknowledgement letter, claims data sheet, discharge voucher
 - settlement approved by a second Claims user; settlement cash through the broker tracked by insurer share
- **Claims Dashboard** open and overdue claims, claims by line and region

Outputs Policy schedule, endorsement, claim documents, Claims Position and Claims Ageing reports

Operations > Policy: policy detail

Operations > Claims: claim detail

Renewals

Who

Operations

Sales & Marketing

Processing Team

- **Pipeline** every policy enters the renewal pipeline 90 days before expiry
- **Notices** first, second and final notice at 60, 30 and 15 days, in order
- **Renewal Queue** days to expiry, status, risk level, owner and contact attempts
- **Renewal Batch** notices for up to 500 policies at once
- **Negotiations** contacts with the client recorded; renewal terms approved by the Processing Team
- **At-Risk Policies and Lapse Management** retention risk score, grace period, win-back campaigns
- **Renewal issue** the accepted renewal quotation becomes the next term; commission accrues to the original referrer
- **Retention Analytics and Performance** renewal rate, premium retention and cycle time against target

Outputs Renewal notices, Renewal Retention report, retention rate on the Executive Dashboard

Renewal Queue

> Renewals > Queue Management

Search filters: Policy/Insured Name, Status (All Statuses), Risk Level (All Risk Levels), Sales person (All sales persons), Expiry Date Range (Select date). [Search] [Clear]

Operations > Renewals > Negotiations

Billing, official receipts and collections

Who

Accounting

Front office

- **Billing** the bill is raised when the policy, endorsement or renewal is issued; billing statement PDF with payment instructions
- **Payment capture and official receipt** front office records the payment; only Accounting posts the official receipt
- **New: documents by e-mail** E-mail receipt and E-mail invoice send the PDF as an attachment, with To, Cc and a note
 - optional automatic e-mail when a receipt is recorded or a bill is issued (off until switched on)
 - attachment size guard; attachment names shown in the E-mail Outbox
- **Collections** ageing by bucket, payment reminders before the due date and then on repeat
- **Credit Control** Instalment Plans, Premium Warranty Monitor, Client Credit Limits, Remittance Ageing
- **Open entry matching** match, unmatch and write off small differences

Outputs Official receipt, premium invoice, SOA / Premium Receivable, Receivables Ageing, Collection Report

Remittance to insurers and direct bill

Who

Accounting

Second approver

- **Automated Processing** draft remittances per insurer from collected, unremitted premium, net of commission, by share
- **Due dates** from each insurer's remittance terms (days after collection)
- **Approval Workflow** remittances, settlements, transfers and adjustments approved by another user, levels by amount
- **Settlement** raises the insurer payment voucher; bank result of the transfer recorded
- **Statements and reconciliation** remittance statements for insurers; matching with the bank
- **Direct bill** the client pays the insurer; the broker bills commission plus 12% VAT on a debit note
 - the insurer pays net of 10% EWT and issues BIR Form 2307; the debit note e-mail carries the PDF

Outputs Remittance statement, Remittance Summary, Due to Insurers by Co-insurer, Aged Payables to Insurers, Commission Receivable (Direct Bill)

Remittance Tracking

> Finance > Remittance > Tracking

Accounts > Remittance > Direct Bill Processing > Debit Notes

Commission and incentives

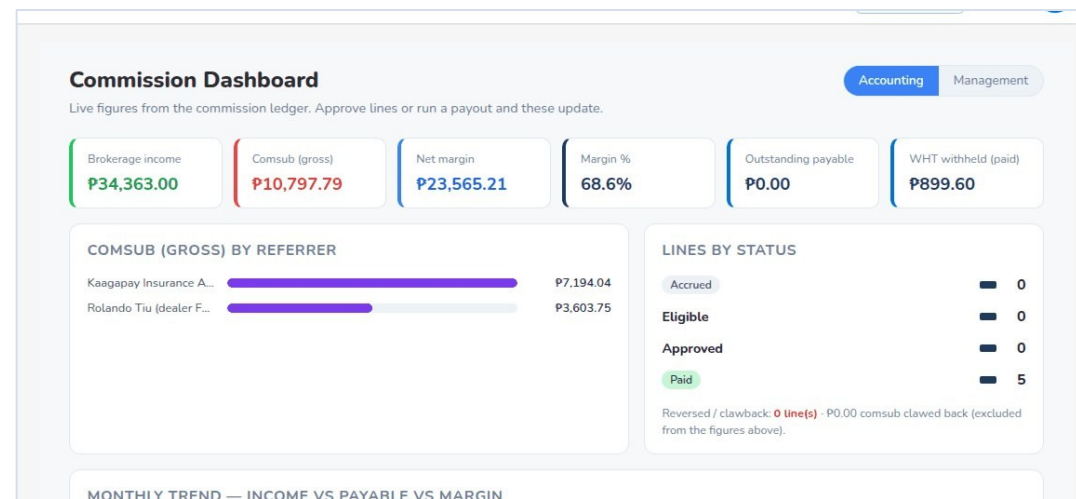

Who

Accounting

Sales & Marketing

- **Commission Rate Matrix** commission rates by insurer and product, with referrer sharing
- **Commission Dashboard** brokerage income, commission to referrers, net margin, outstanding payable, WHT
- **Referrer payouts** payable only when the premium is fully collected and the referrer has a bank account on file
 - paid by payment voucher less EWT (5% individual, 10% corporate), approved by a second user
- **Referrers do not sign in** Sales & Marketing enter their business; they are paid from the referrer master
- **Incentive programmes** premium volume, policy count, renewal rate or conversion targets for account executives
 - Accounting calculates, a second Accounting user approves; Accounting cannot change the programmes it pays

Outputs Broker Commission Statement, Incentive Results, BIR Form 2307 for payees

Commission > Commission Dashboard

Incentive Calculations

Dashboard • Incentive • Calculations

Accounts > Incentive > Calculations

Accounting, period end and reconciliation

- **Posting rules and account determination** each business event posts by its rule; changes approved in Configuration Approvals
- **Journals** journal vouchers, correction and reversal JVs, recurring journals, all with maker-checker
- **Month-End Close** one run per period: accruals, recurring journals, commission deferral, FX revaluation, then the close checklist
- **Period control** soft close, close and lock; postings into a soft-closed period only by the Accounting Manager
- **Year-End Close** income and expense to retained earnings in adjustment period 13; financial statements
- **Bank Reconciliation** statement import (BDO, BPI, Metrobank, generic formats), auto-match, bank items, stale cheques
- **Insurer Reconciliation** insurer statements of account imported and matched to the broker's remittances
- **Go-live balances** opening trial balance and open items imported with templates

Bank Reconciliation
Accounts • Bank Reconciliation • Reconciliation Workspace

Match the bank statement lines with the book entries of the bank account's GL cash account, post the bank items not yet in the books, then prepare the reconciliation for approval.

Reconciliations Bank account setup

- **Audit Trail** user, record, action, before and after values, IP and time
- **Sign-in history** every attempt with result and reason
- **E-mail Outbox** every e-mail queued and sent, with attachments
- **User Access Matrix** roles, status, last sign-in, two-factor, downloadable

Data privacy and security

Data privacy: new in this release

Consent	per purpose: processing, marketing, sharing with insurers; channel, notice version, evidence; withdrawals kept in the history
Consent Register	consents given, refused and withdrawn across clients and prospects
Data Subject Requests	access, rectification, erasure or blocking, objection, portability, withdrawal of consent; numbered, due date, assignee
Export personal data	everything held about a client or prospect, as JSON or Excel, noted on the request
Anonymise	personal fields overwritten in the party, its policies, quotations, claims and slips; refused while records must be kept

A data subject request in the system

Overdue requests reminded daily. Retention years, due days and notice version are settings for the broker's DPO.

Security

- **Named users only** no shared or referrer sign-in
- **Passwords** 8+ characters, mixed case, digit and symbol, history of 5, 90-day age; lockout after 5 tries
- **Two-factor** TOTP authenticator app, compulsory per role when set
- **Sessions** 30-minute access token, idle sign-out, sessions ended on password or role change
- **Permissions** checked by the server on every request, not only hidden in the menu
- **Encryption** TLS in transit; storage encryption of database, files and backups recommended on every option
- **Application** controls mapped to the OWASP Top 10; signed, expiring file links
- **Breach support** facts from logs and audit data so the DPO can notify within 72 hours

Who does what: the seven delivered roles

Role	Daily work in iNXT BrokerVerse	Approves
System Administrator	Users and roles, masters, configuration, document numbering, schedules, data privacy	Authority limits (second admin), configuration
Sales & Marketing	Prospects, quotations, payment capture, referrer business, renewal follow-up	Takes part in incentive programmes
Processing Team	Broker Slips, Placement Slips, policy issue, endorsements, reinsurance, product configurator	Quotations, renewal terms, treaties
Operations	Client servicing, endorsements, renewals, payment capture, data subject requests	-
Claims	Claim registration, follow-up with insurers, settlement, reinsurance recoveries	Settlements of another Claims user
Accounting	Receipts, collections, disbursements, remittance, commission, journals, reconciliation, BIR	Vouchers, JVs, remittances, debit notes, incentives
Accounting Manager	Everything Accounting does, plus period control	Month-end and year-end close, bank and insurer reconciliation, credit control, posting rules

Each role lands on its own dashboard. Roles can be added or adjusted in Master > Generals > User Management, with Role Permissions and the User Access Matrix for review.

Technology and deployment options

Technology

Web application

React 18 single-page application in the browser; no client install

API

Node.js 22 with Express; stateless REST API, OpenAPI and Postman collection

Database

PostgreSQL 16, time zone Asia/Manila; file store for documents

Scheduler

built-in jobs in Manila time: expiries, notices, reminders, e-mail, reports

Run as

containers (Docker) or Node.js with a process manager

Every option separate UAT and production environments, HTTPS, daily backups with point-in-time restore, monitoring, and production with two API instances and a standby database.

Deployment options

AWS

Singapore region

ECS Fargate, RDS PostgreSQL Multi-AZ, S3 and CloudFront, WAF

Microsoft Azure

Southeast Asia (Singapore)

Container Apps, PostgreSQL Flexible Server, Front Door

Local partner

Data held in the Philippines

VMs with a Philippine hosting partner, second site for DR

On-premise

Broker's data centre

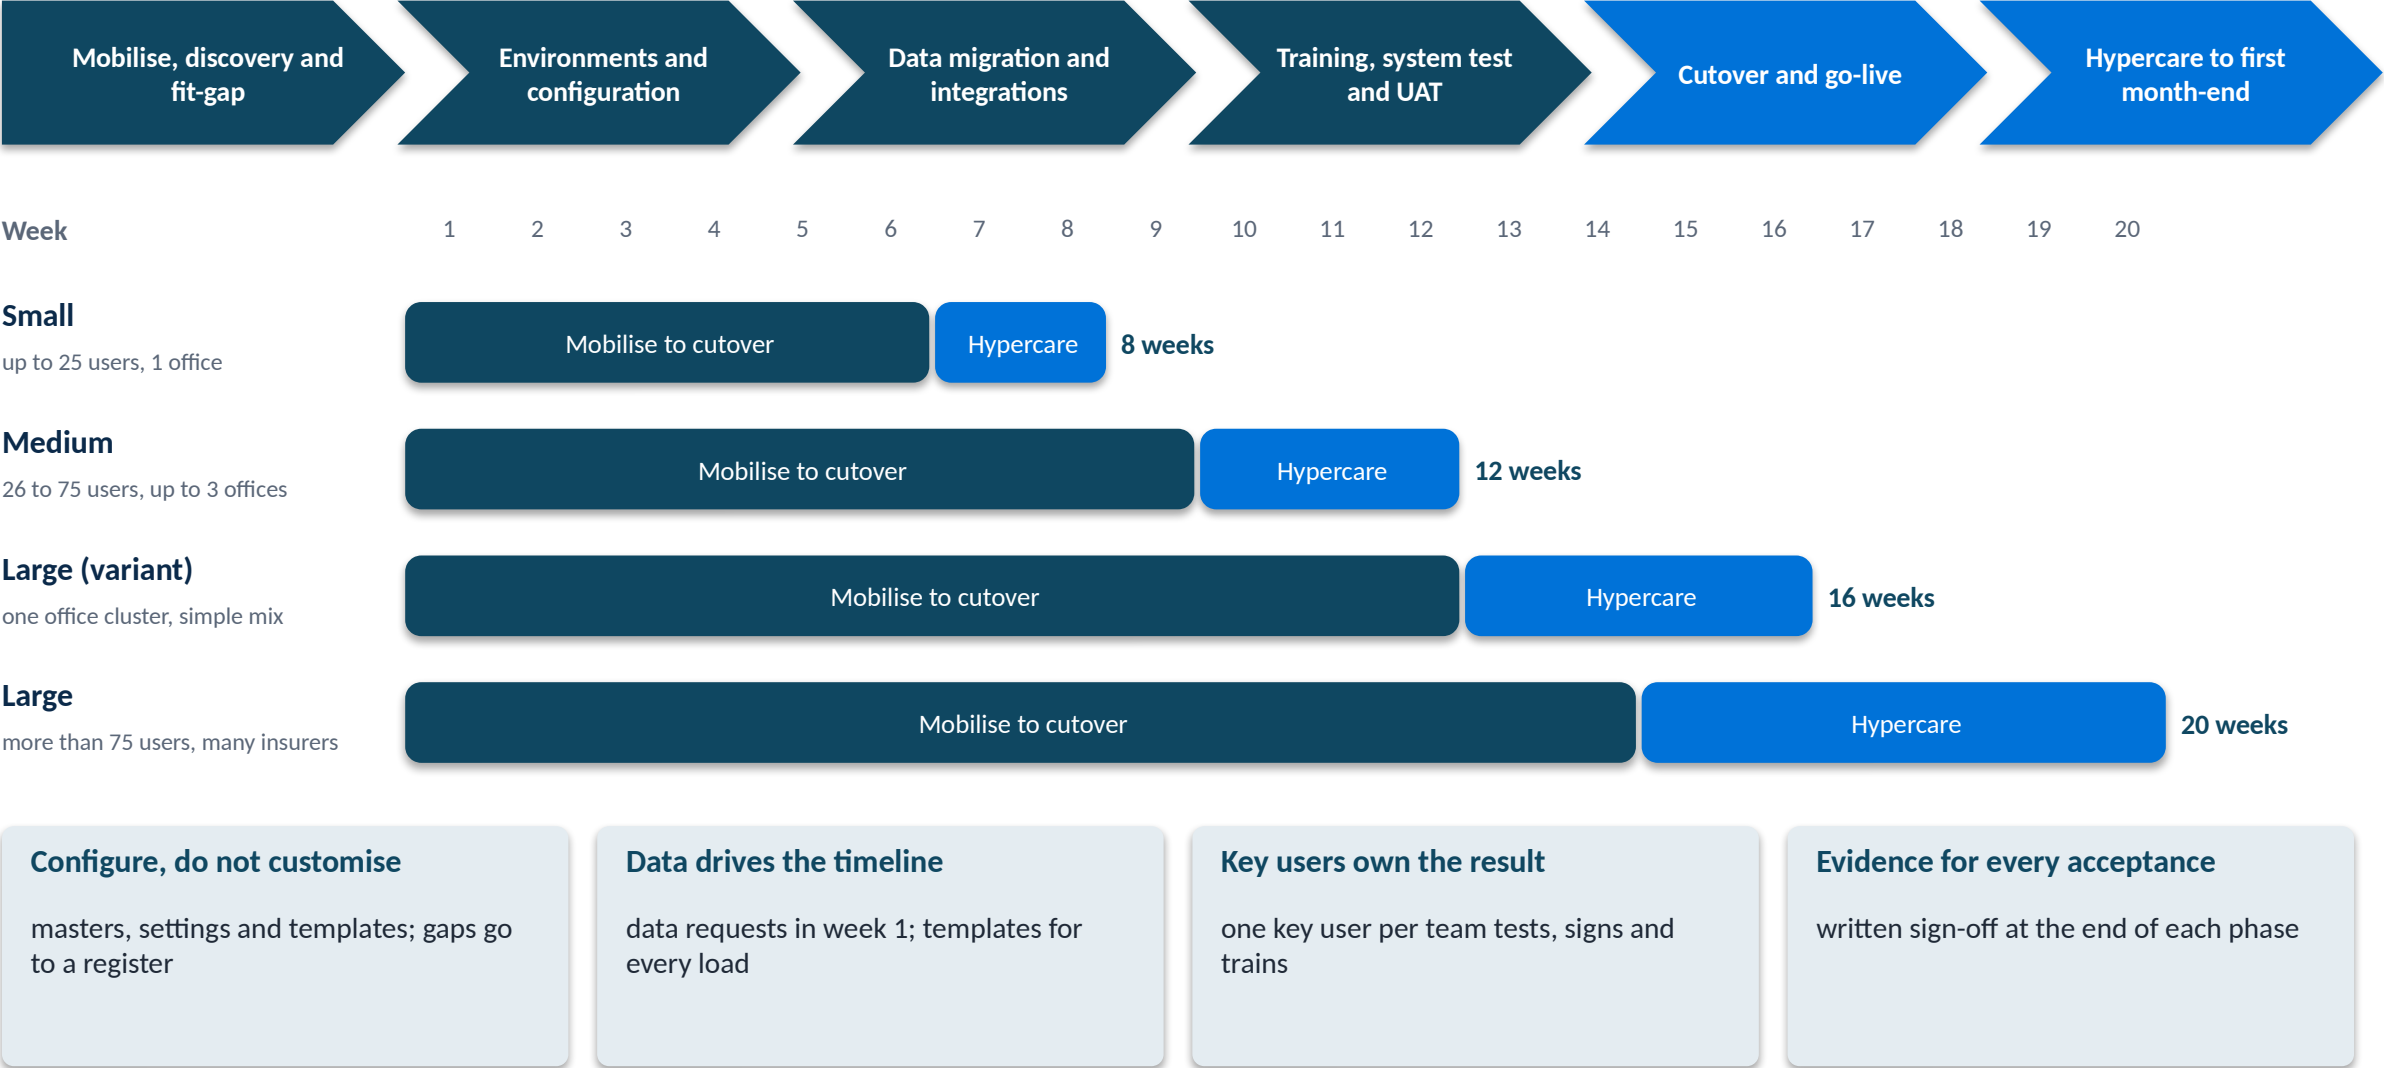

Broker hosts at no fee; deployment guide and set-up support

Indicative hosting price per month (optional, PHP, excl. VAT, estimates)

Tier (named users)	AWS	Azure	Local partner
Small (1 to 25)	30,000.00	31,000.00	28,000.00
Medium (26 to 100)	62,000.00	65,000.00	59,000.00
Large (101 to 300)	112,000.00	118,000.00	107,000.00
Enterprise (above 300)	244,000.00	256,000.00	232,000.00

Production, one UAT environment, daily backups, monitoring, patching and certificates included. Self-hosting has no hosting fee.

Implementation approach and timeline

Support model

L1

Broker key users and System Administrator

How-to, users and roles, password and two-factor resets, settings, master data, ticket with evidence

L2

iorta TechNXT application support

Triage, reproduction, configuration and data corrections under change control, workarounds, known errors

L3

iorta TechNXT engineering

Code defects, performance, infrastructure, security incidents, root cause, fixes and releases

Service hours

- **Standard** 8:00 to 18:00 Manila time, Monday to Friday, except Philippine regular holidays
- **Optional** 24x7 for Severity 1, reported by telephone
- **Maintenance window** agreed with the broker; default Saturday 20:00 to Sunday 06:00

Severity levels and targets (standard proposal)

Severity	First response	Restore or workaround	Update
P1 Critical	30 minutes	4 service hours	Every hour
P2 High	2 service hours	2 business days	Every 4 hours
P3 Medium	1 business day	5 business days	Every 3 days
P4 Low	2 business days	Planned	Weekly

- **P1 examples** nobody can sign in, official receipts cannot be issued, journals post wrong amounts
- **One service desk** support portal or mailbox for all tickets, telephone for P1
- **Monthly service report** tickets, targets met, problems, releases, backups and DR drills
- **Releases** tested in UAT with a regression run before production
- **Covered by AMC or subscription** corrections, OOTB updates, regulatory form updates, standard support

Commercial models

Model A: perpetual licence with AMC

One-time licence per named user, payable on go-live

Tier	Licence per user	Implementation, reference
Small (1 to 25)	PHP 90,000.00	PHP 1,130,000.00 (5 lines)
Medium (26 to 100)	PHP 78,000.00	PHP 2,090,000.00 (8 lines)
Large (101 to 300)	PHP 66,000.00	PHP 3,700,000.00 (12 lines)
Enterprise (above 300)	PHP 54,000.00	PHP 5,800,000.00 (16 lines)

- AMC 22% of the licence fee a year, from Year 2 (12-month warranty)
- AMC increases 5% each year
- Lowest cost over five years: 13% to 18% below subscription

Model B: subscription

Per named user per month, billed monthly in advance

Tier	Per user per month	Minimum billable users
Small (1 to 25)	PHP 3,200.00	10
Medium (26 to 100)	PHP 2,800.00	26
Large (101 to 300)	PHP 2,400.00	101
Enterprise (above 300)	PHP 2,000.00	301

- Increases 5% at each contract anniversary
- Onboarding fee equal to the implementation fee
- Lower Year 1 cash; break-even with perpetual in Year 4

Implementation

Base man-days by tier plus 6 per extra line of business, at PHP 16,100.00 a day. Payable 40% signing, 40% UAT sign-off, 20% go-live.

Infrastructure

Optional and quoted separately: AWS, Azure or local partner.
Self-hosting has no fee.

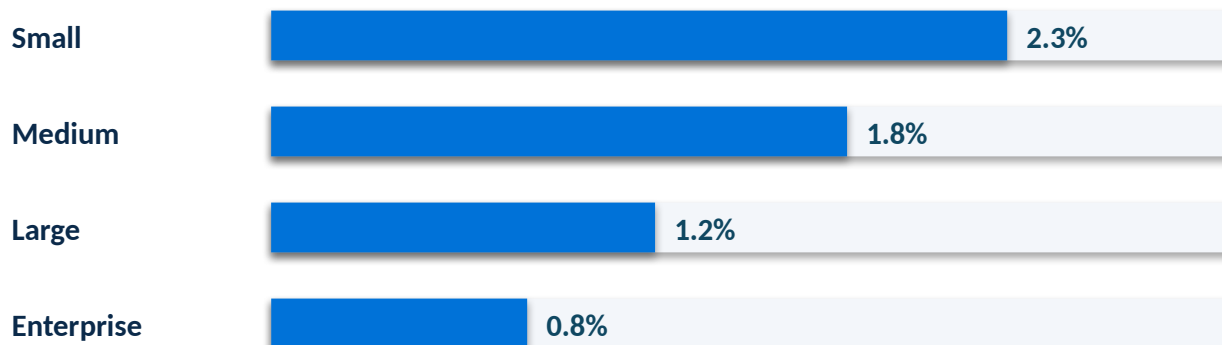

Change requests

Day rates: BA PHP 18,000.00, developer PHP 16,000.00, QA PHP 12,000.00, PM PHP 22,000.00. Example: 5 days, PHP 81,050.00.

Indicative investment for reference brokers

Reference broker	Perpetual, 5 years	Subscription, 5 years	Break-even
Small: 15 users, 5 lines	PHP 3,760,107.00	PHP 4,312,764.00	Year 4
Medium: 60 users, 8 lines	PHP 11,792,173.00	PHP 13,892,748.00	Year 4
Large: 180 users, 12 lines	PHP 29,767,284.00	PHP 35,660,251.00	Year 4
Enterprise: 400 users, 16 lines	PHP 57,817,674.00	PHP 70,118,348.00	Year 4

Year 1 subscription as a share of estimated commission income

Prices in PHP, excluding 12% VAT. Totals include implementation or onboarding and exclude hosting and optional services. Valid 90 days. Income per tier is an estimate.

Our recommendation

Small and Medium brokers

Subscription: lower Year 1 cash, no capital approval, about 2% of commission income.

Large and Enterprise brokers

Perpetual: 13% to 18% lower cost over five years for the reference user counts.

Every broker

Infrastructure quoted separately, with self-hosting always shown, so the software price stays comparable.

Your figures

We run the pricing workbook with your user count and lines of business for the proposal.

Why iorta TechNXT and iNXT BrokerVerse

1 Built for the Philippines

VAT, DST, LGT by city, fire service tax, BIR 2307, VAT Summary, SAWT, QAP and SLSP; BDO, BPI and Metrobank statement formats; PayMongo and Dragonpay; Data Privacy Act functions

2 One system, one ledger

Prospect, placement, policy, claims and renewals in the same system as billing, remittance, commission, the general ledger and the month-end close

3 Controls in the product

Maker-checker on money and configuration, Authority Matrix, segregation of duties, access reviews, approval notifications, audit trail

4 Predictable delivery

Configure, do not customise; 8, 12 or 16 to 20 weeks; written acceptance per phase; hypercare through the first month-end close

5 Open pricing

Published per-user prices on graduated slabs, perpetual or subscription, AMC terms and day rates for change requests

6 Ready to hand over

497 test cases for this release; user manual and role guides for seven roles; about 40 upload templates; reports book and data dictionary

Next steps

What we ask from you for the demo and workshop

- Two or three recent policies, one claim and one remittance to use as examples
- The teams and number of users per team
- Lines of business and insurers you place with
