1 About this manual

1.1 Purpose

BrokerVerse is an out-of-the-box insurance broking platform from iorta TechNXT. It runs the whole broking cycle of a Philippine non-life broker in one place: prospects, quotations, policies, billing and collection, commission, remittance to insurers, direct-bill commission debit notes, endorsements, claims, renewals, reinsurance, incentives and reports.

This manual explains how to use every module, step by step. It also explains what happens behind each step: the numbers the system issues, the ledger entries it posts, the approvals it asks for and the reports that pick the transaction up.

1.2 Who this manual is for

Reader	Use this manual to
Agents / referrers and sales staff	Capture leads, prepare quotations, convert accepted quotations into policies and follow renewals.
Underwriters	Review quotations, price renewals, maintain rating and underwriting rules, work reinsurance.
Customer services	Answer client questions, raise endorsements, follow open items and payments.
Claims officers	Register, adjust and settle claims with a second officer as checker.
Finance and accounts	Post receipts, pay commission, remit premium to insurers, bill direct-bill commission, keep the ledger.
Business administrators	Maintain products, rates, taxes, commission and the other business masters.
IT and user access administrators	Manage users, roles, system settings, schedules and the audit trail.

Chapter 20 has a one-page quick guide for each persona. Read it first, then go to the module chapters for the detail.

1.3 Conventions

Convention	Meaning
Operations > Quotation	A menu path. Choose the first item in the sidebar, then the next one.
Create Quote	A button, tab, field or other text that you see on the screen.
<code>limits.quote_validity_days</code>	A configuration key. You find it on Master > Configuration .
QT-2026-00006	An example record from the sample data shown in the screenshots.

Convention	Meaning
₱ 28,569.53	Amounts are in Philippine pesos with Philippine digit grouping.
29/09/2026	Dates use the configured format DD/MM/YYYY.
Maker / checker	The maker enters a transaction. A different user, the checker, approves it.

Tip: Screenshots were taken from a BrokerVerse system loaded with sample data on 29 September 2026. Your screens show your own data, your own logo and name if your administrator has set them in System Settings, and your menu shows only the items your role may open.

Note: Numbered steps tell you exactly what to do. Text after a step tells you what the system does in return.

1.4 Signing in

You sign in with your own user ID and password. Never share a user ID. Every action is recorded against it in the audit trail.

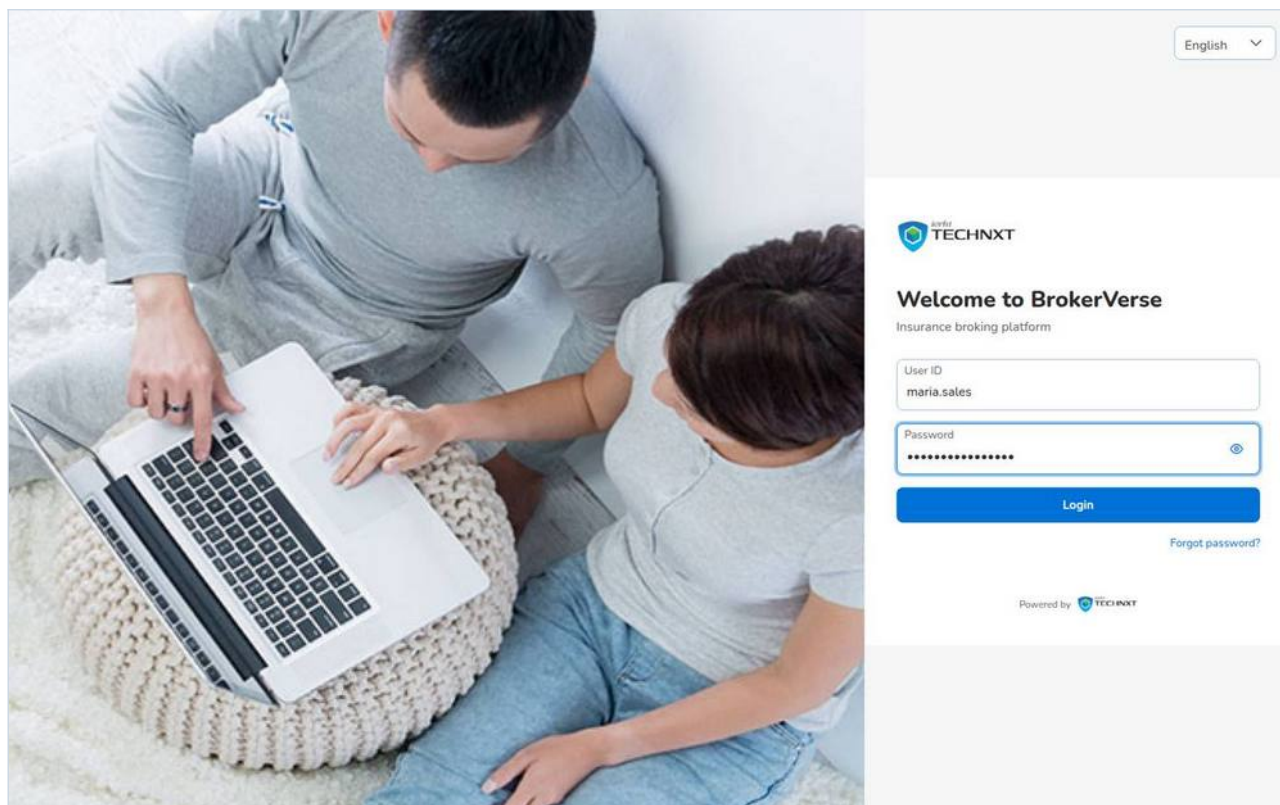

Figure 1. The sign-in page, with the user ID filled in and the password hidden

1. Open the BrokerVerse address that your administrator gave you in a web browser (Chrome, Edge or Firefox).
2. Optional: choose your language in the list at the top right (**English** or ภาษาไทย).
3. In **User ID**, type your user name, for example `maria.sales`.
4. In **Password**, type your password. The password is hidden; select the eye icon to show it while you type, and select it again to hide it.
5. Select **Login**.

The system opens your landing screen. Administrators land on the Executive Dashboard. Other roles land on their own home screen or on the first screen their role may open.

Depending on your account, one more step can follow the password:

Step	When it appears	See
Two-step verification	Two-factor authentication is on for your user.	<i>Two-factor authentication</i> below
Set up two-step verification	Your role requires two-factor authentication and you have not set it up yet.	<i>Two-factor authentication</i> below
Change password	You sign in for the first time with a temporary password, an administrator has reset your password, or your password is older than 90 days.	<i>Change your password</i> below

Password rules

Rule	Value	Where it is set
Minimum length	8 characters	<code>security.password_min_length</code>
Must contain	an upper-case letter, a lower-case letter, a digit and a symbol	<code>security.password_require_*</code>
Password history	the last 5 passwords cannot be reused	<code>security.password_history_count</code>
Maximum age	90 days; after that you must choose a new password when you sign in	<code>security.password_max_age_days</code>

Every screen where you choose a password lists these rules under the new password and ticks each rule as soon as your new password meets it.

Change your password

A new user receives a temporary password from the User Access Administrator. At the first sign-in with it, the system asks for a new password before anything else. The same happens after an administrator resets your password and when your password is older than the maximum age.

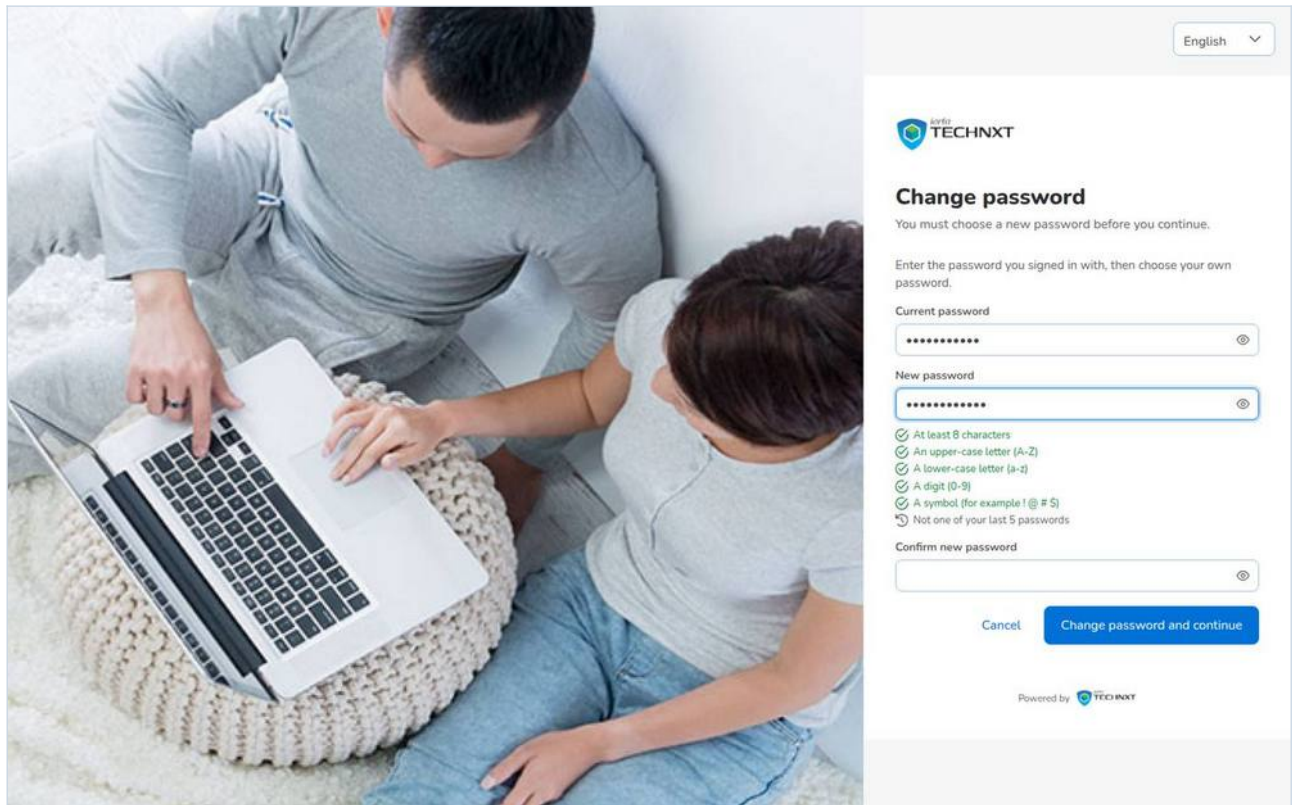

Figure 2. Change password at sign-in: the rules are ticked as the new password meets them (example values)

1. In **Current password**, type the password you signed in with.
2. In **New password**, type your new password and check that every rule is ticked.
3. In **Confirm new password**, type the new password again.
4. Select **Change password and continue**. You are signed in.

To change your password at any other time:

1. Select your initials at the top right, then **Change password**.
2. Fill in **Current password**, **New password** and **Confirm new password**.
3. Select **Change password**.

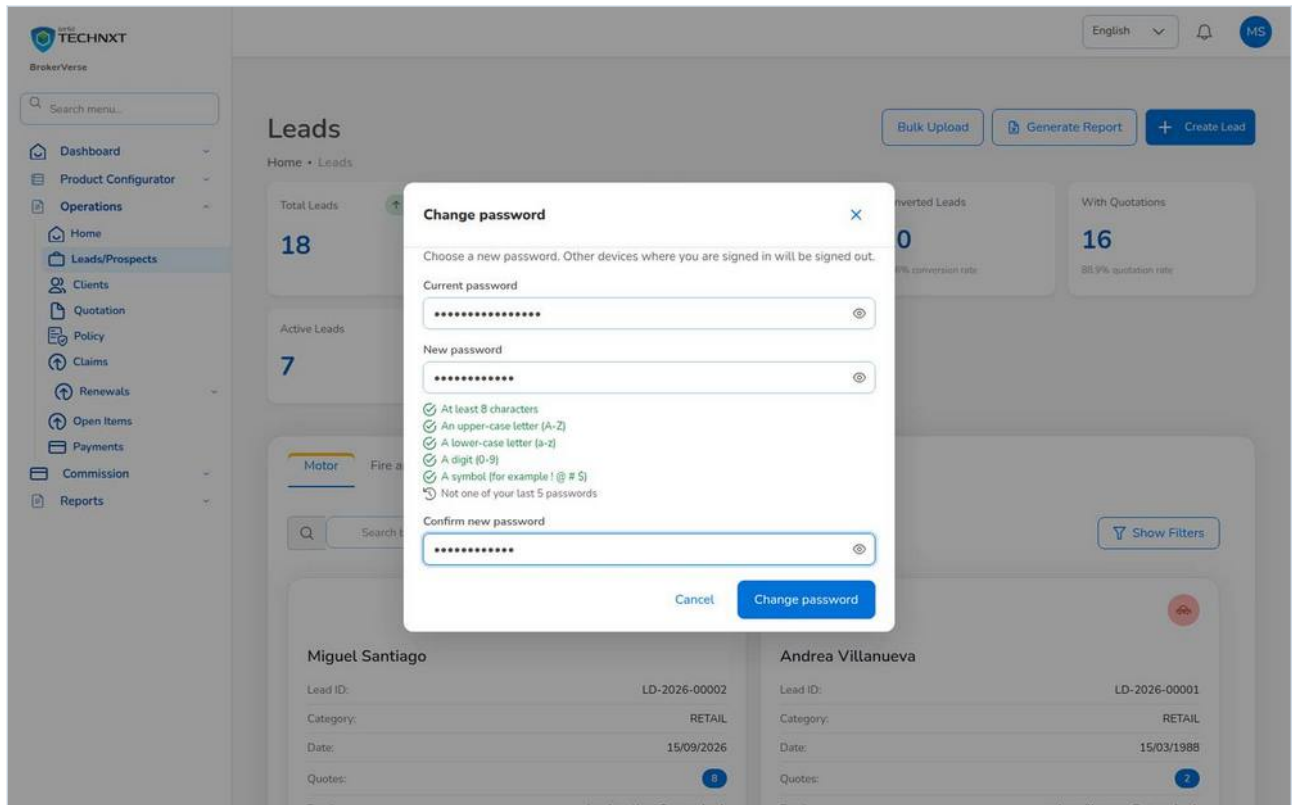

Figure 3. Profile menu > Change password (example values)

The system signs you out on every other computer or browser where you are signed in. Your current session continues.

Forgot your password

1. On the sign-in page, select **Forgot password?**.
2. Type your **User ID or e-mail address** and select **Send code**. If the account exists and has an e-mail address, the system e-mails a 6-digit verification code to it. The message is the same whether or not the account exists.
3. Type the **Verification code (from the e-mail)**, the **New password** and **Confirm new password**, then select **Reset password**.
4. Select **Back to sign in** and sign in with the new password.

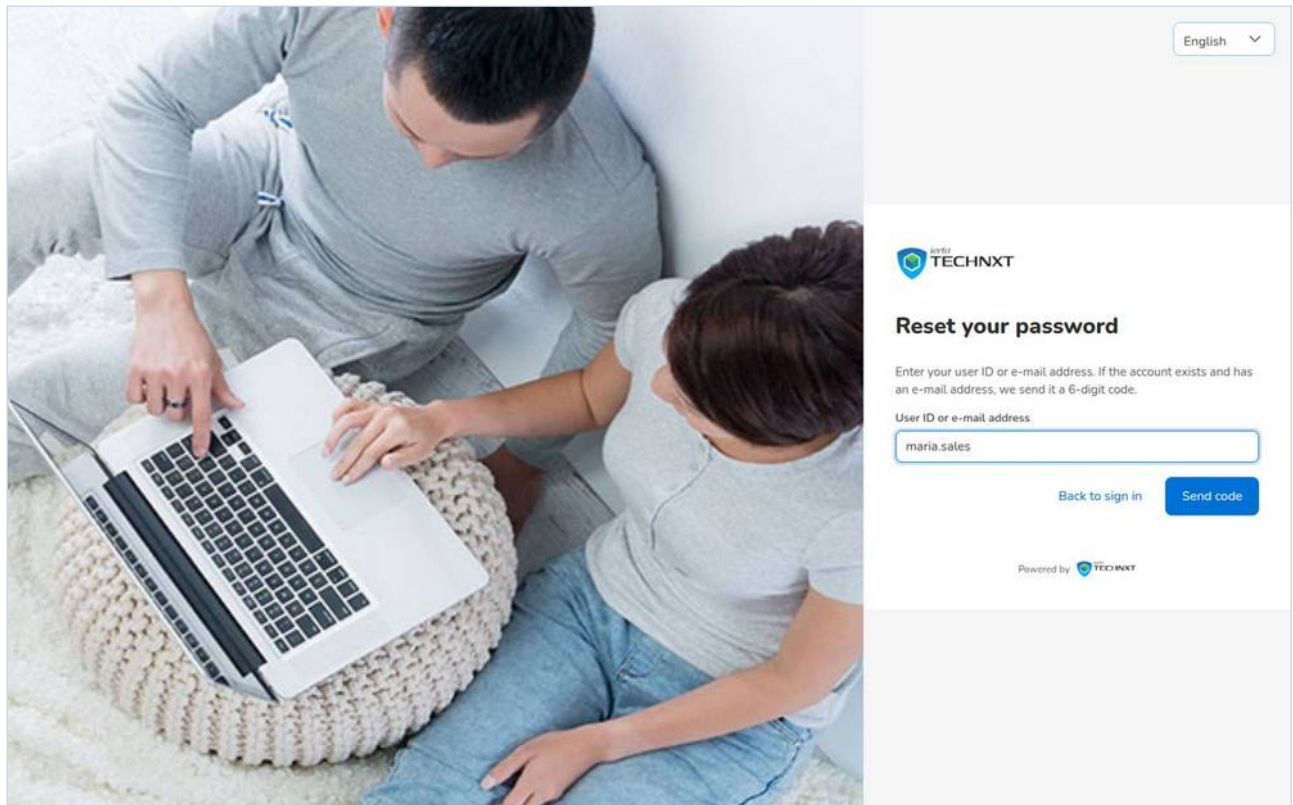

Figure 4. Forgot password: request a code

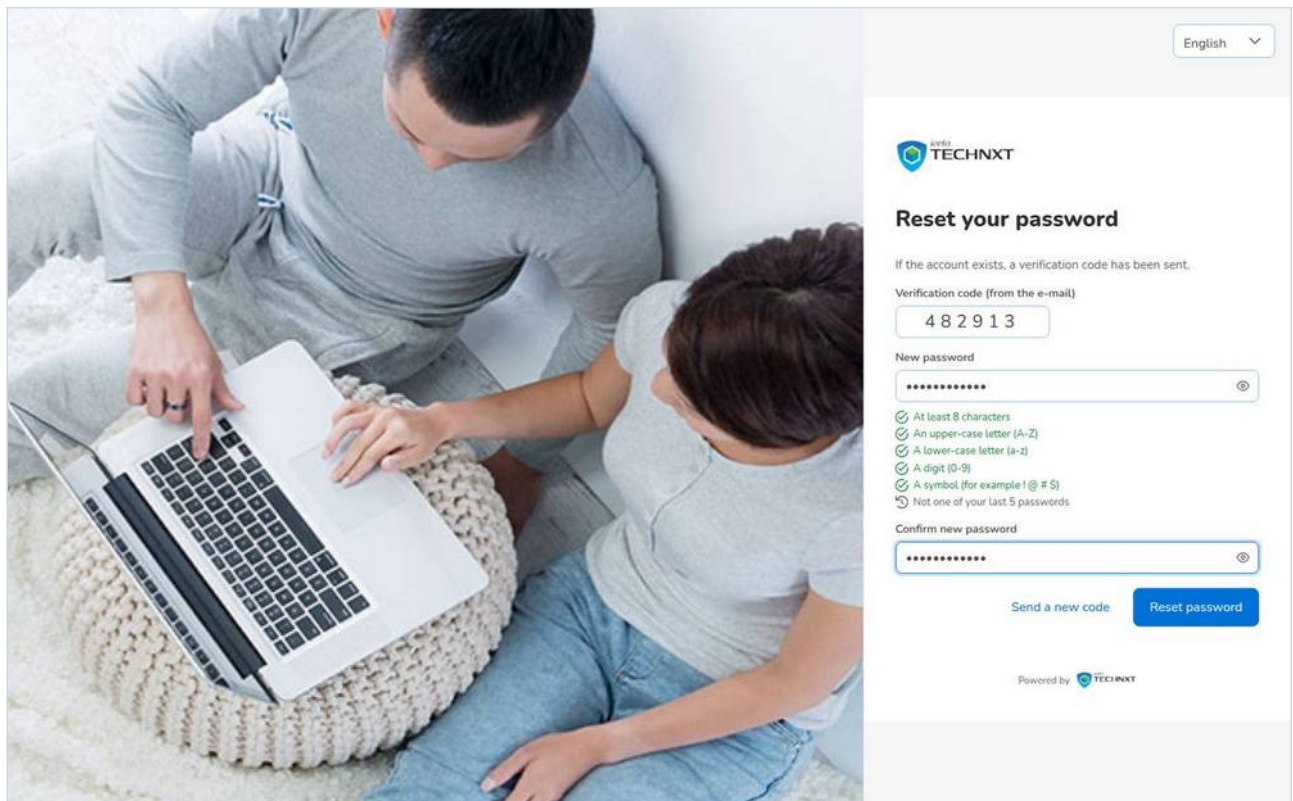

Figure 5. Forgot password: code and new password (example values)

- The code is valid for 15 minutes (`security.reset_code_minutes`). A new code replaces the previous one; use **Send a new code** if the code has expired.
- After 5 wrong codes the code is withdrawn (`security.reset_code_max_attempts`). Request a new one.

- Resetting the password signs you out everywhere.
- If your user has no e-mail address, ask a User Access Administrator to reset your password (Chapter 18).

Failed sign-ins and locked accounts

- A wrong user ID or password shows a message under the **Login** button. Check Caps Lock and try again.
- After 5 failed attempts in a row the account is locked (`limits.max_login_attempts`). The message reads **Account locked. Contact the administrator**.
- The system also limits sign-in attempts to 10 in 5 minutes from one computer and for one user name (`security.login_rate_limit`). Wait five minutes before you try again.
- A User Access Administrator unlocks your account with the **Unlock** action on the user list (Chapter 18).

Two-factor authentication

Two-factor authentication (two-step verification) adds a 6-digit code from an authenticator app on your phone, for example Google Authenticator or Microsoft Authenticator, to the password. You can turn it on for your own user. The IT Administrator can make it compulsory for roles (`security.require_2fa_roles`; no role requires it in the standard configuration).

Turn on two-factor authentication

1. Select your initials at the top right, then **Two-factor authentication**. The dialog shows whether two-step verification is on or off.
2. Select **Turn on**.
3. Install an authenticator app on your phone if you do not have one.
4. In the app, add an account and type the **setup key** shown on the screen (the copy icon copies it). On the phone itself you can instead open the link **open the key in the authenticator app**.
5. Type the 6-digit code that the app now shows in **Authentication code** and select **Turn on**.

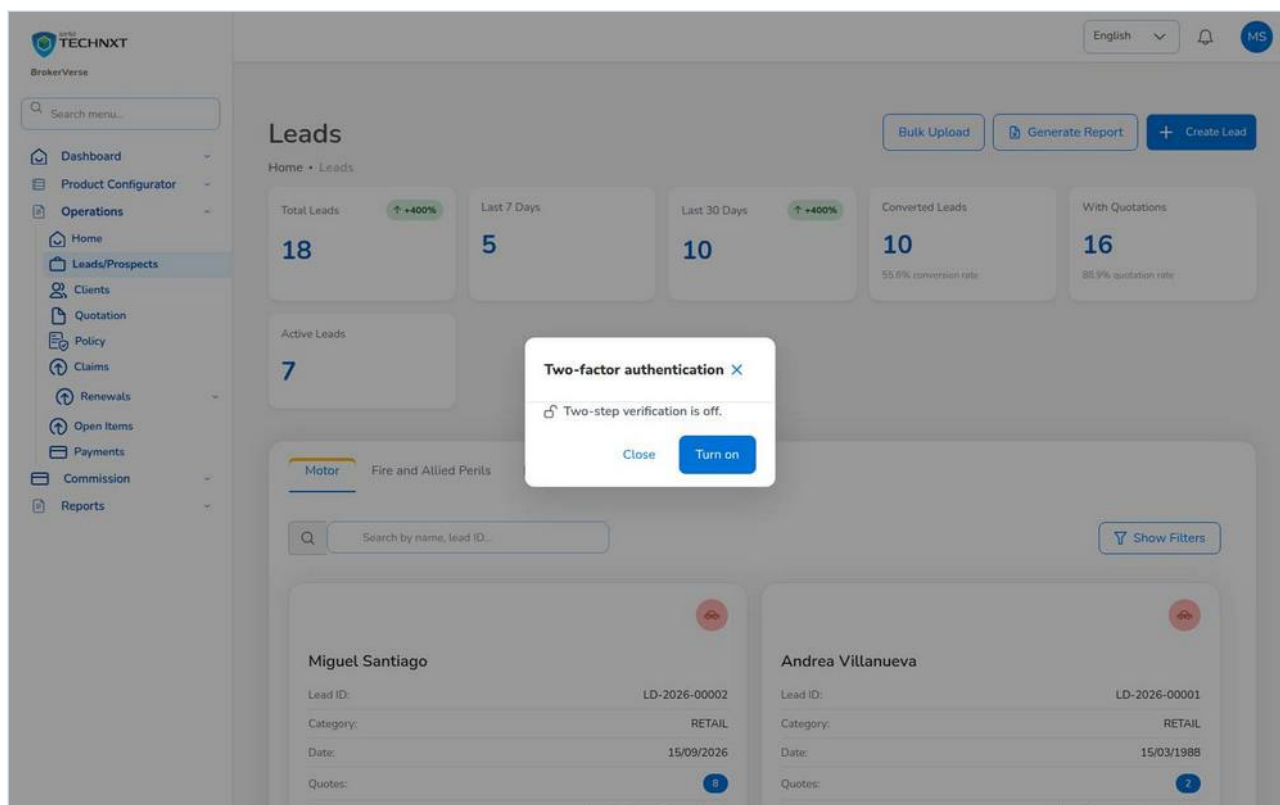

Figure 6. Profile menu > Two-factor authentication: status

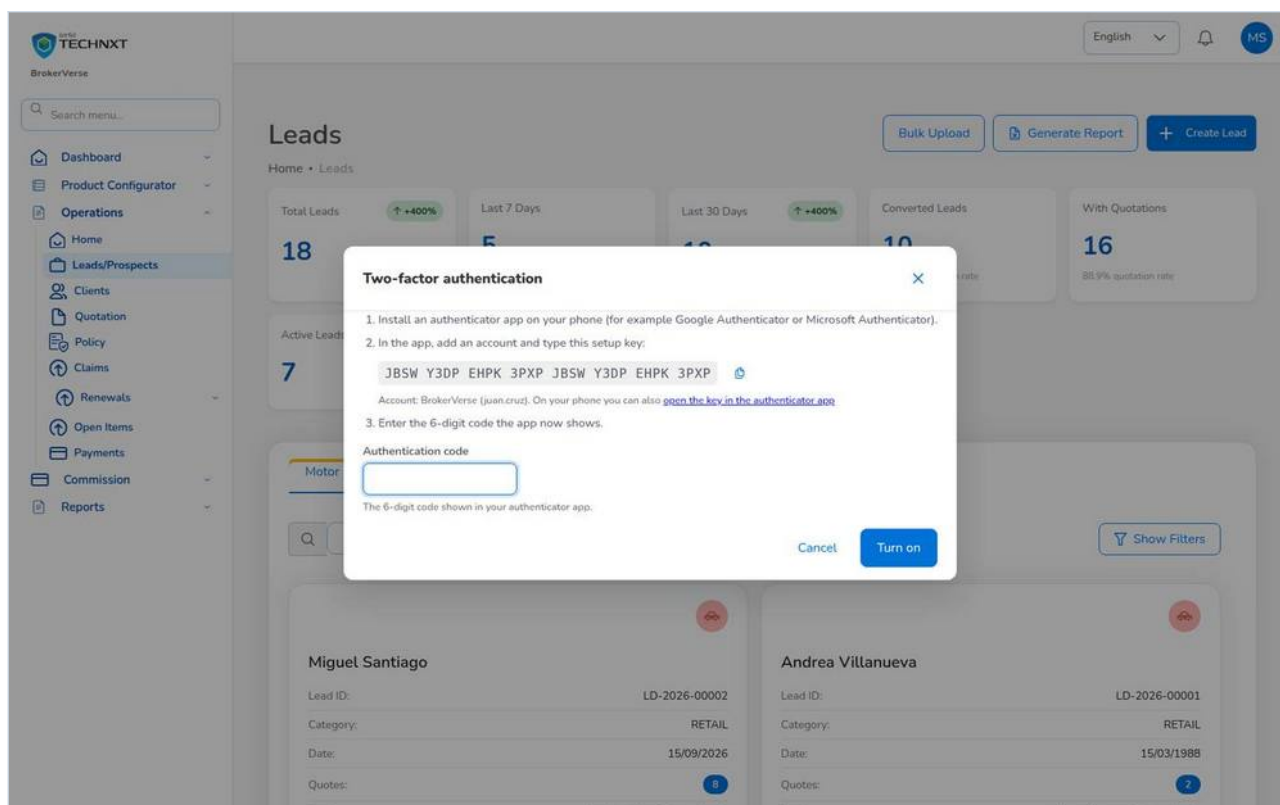

Figure 7. Turning on two-factor authentication: setup key and code (example key)

Note: BrokerVerse does not show a QR code. Type the setup key into the app, or open the link on the phone.

Sign in with two-factor authentication

After the password, the sign-in page asks for the **Authentication code**. Open the authenticator app, type the current 6-digit code and select **Verify**. The code changes every 30 seconds; the page waits 5 minutes for it (`security.two_factor_challenge_minutes`). Select **Back to sign in** to start again.

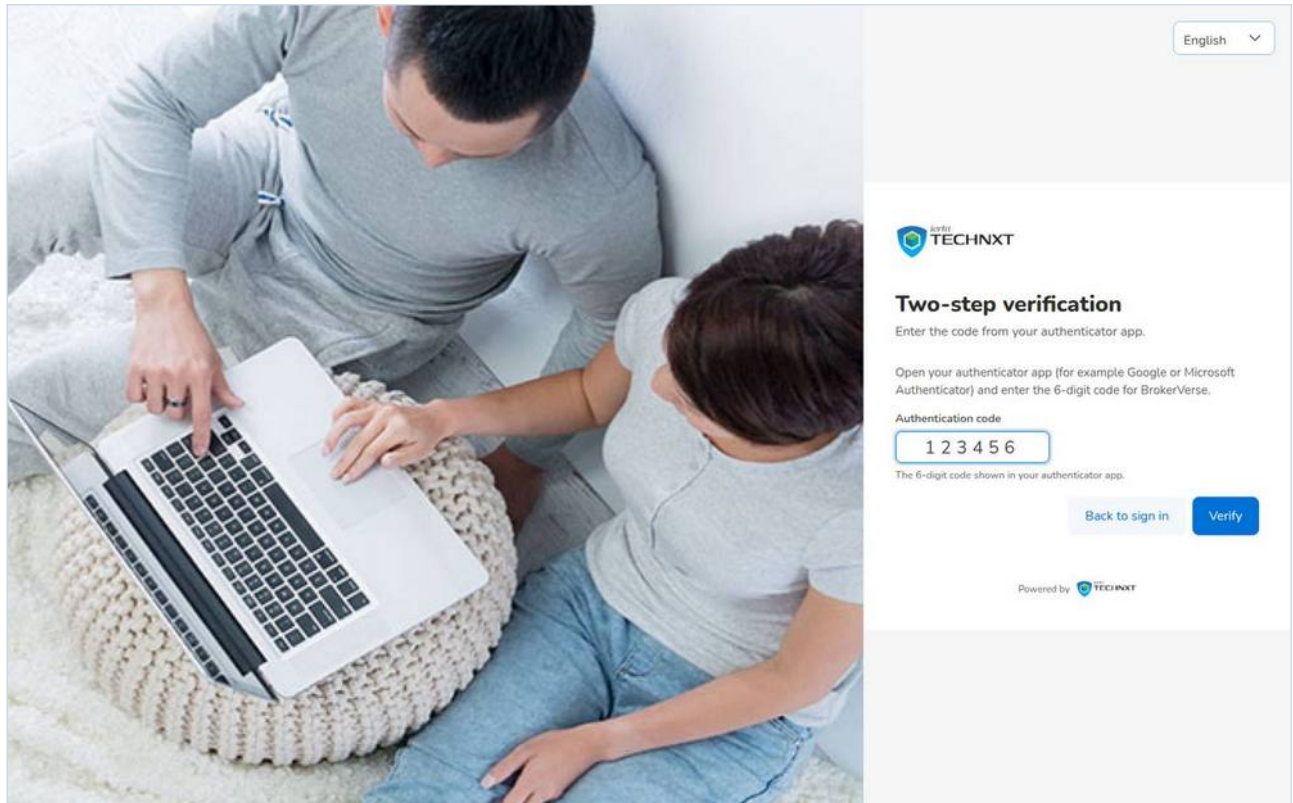

Figure 8. Sign-in: two-step verification code (example code)

If your role requires two-factor authentication and you have not set it up, the sign-in page shows **Set up two-step verification** after the password. Follow the same steps as above; when the code is accepted you are signed in.

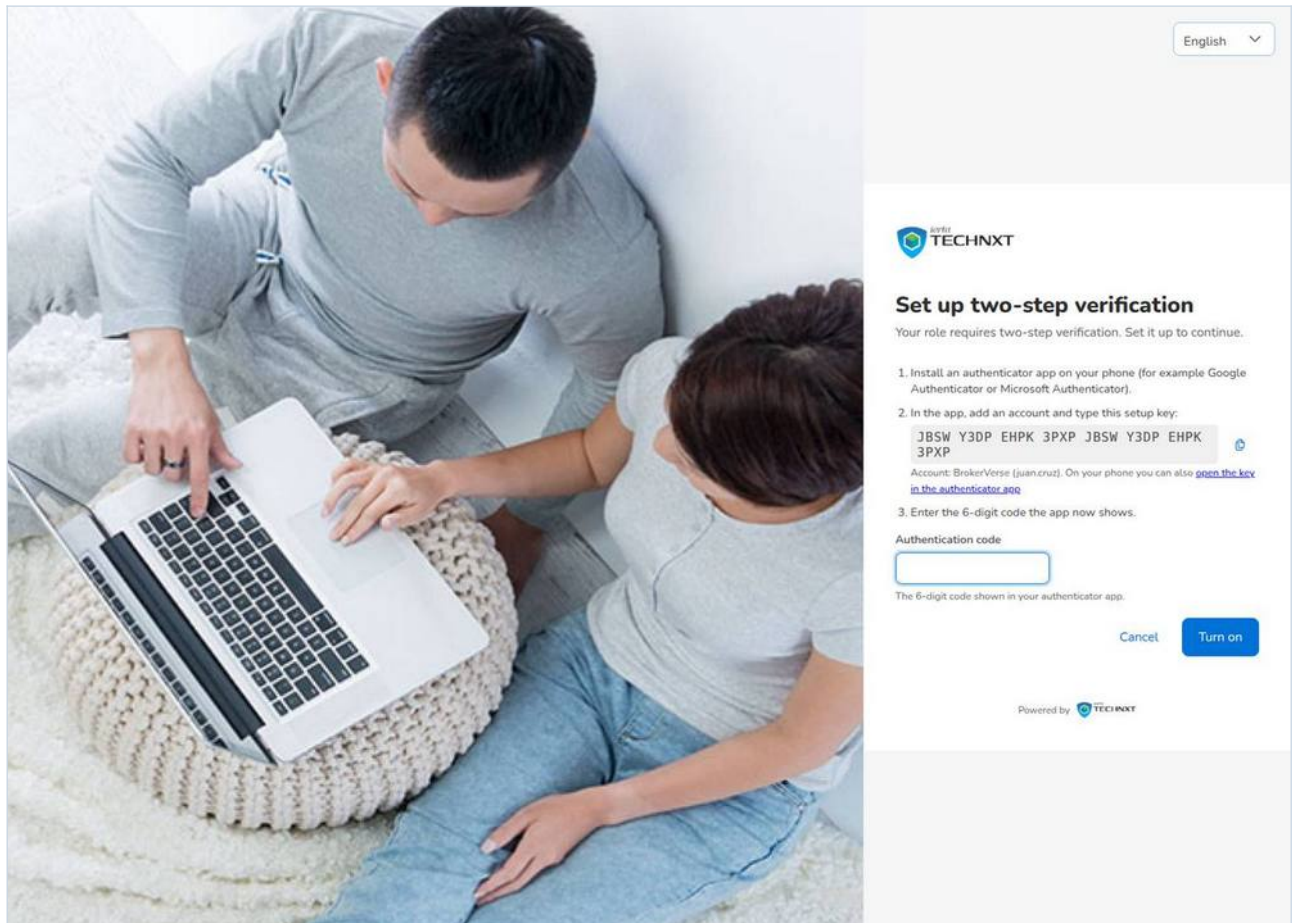

Figure 9. Sign-in: required set-up of two-step verification (example key)

To turn two-factor authentication off, open **Two-factor authentication** from the profile menu, select **Turn off** and enter a current code. A role that requires it cannot turn it off. If you lose your phone, ask a User Access Administrator to turn two-step verification off for your user; you then set it up again.

Automatic sign-out

If you do nothing for 30 minutes, the system signs you out (`limits.session_idle_minutes`). One minute before, a warning appears at the top of the screen. Move the mouse or press a key to stay signed in. Unsaved entries on the screen are lost when you are signed out, so save your work before you leave your desk.

While you work, the system renews your session in the background. Your session also ends when your password is changed or reset, when your user is deactivated, or when your roles change. The sign-in page then says *Your session has ended ... Please sign in again.*

Signing out

1. Select your initials at the top right of the screen.
2. Select **Logout**.

1.5 The screen layout

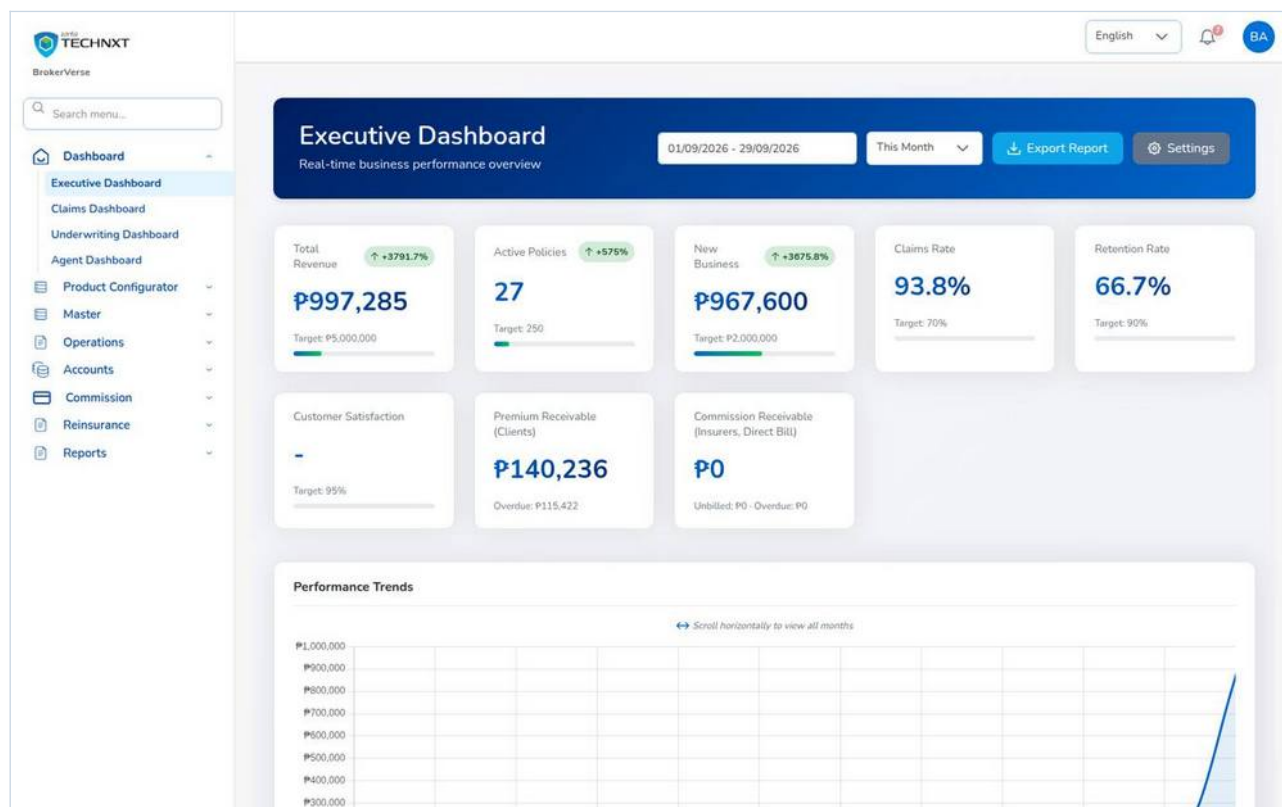

Figure 10. Screen layout: sidebar menu on the left, top bar with language, notifications and profile, work area on the right

Area	What it does
Logo and system name	The logo and name set in Master > System Settings . The standard installation shows the iorta TechNXT logo and the name BrokerVerse.
Search menu...	Type part of a screen name, for example <i>receipt</i> . The list shows every matching screen with its menu path. Select one to open it.
Sidebar menu	The modules your role may use. Select a module to open its items. Items with an arrow open a further list.
Language	Switch the screen language between English and Thai (the languages configured in System Settings that have a translation).
Notification bell	The number shows unread notifications. Select the bell to see the latest ones.
Profile (your initials)	Profile, Change password, Two-factor authentication, Help and Logout.
Work area	The screen you opened, with its title and breadcrumb (for example <i>Home • Policy</i>).

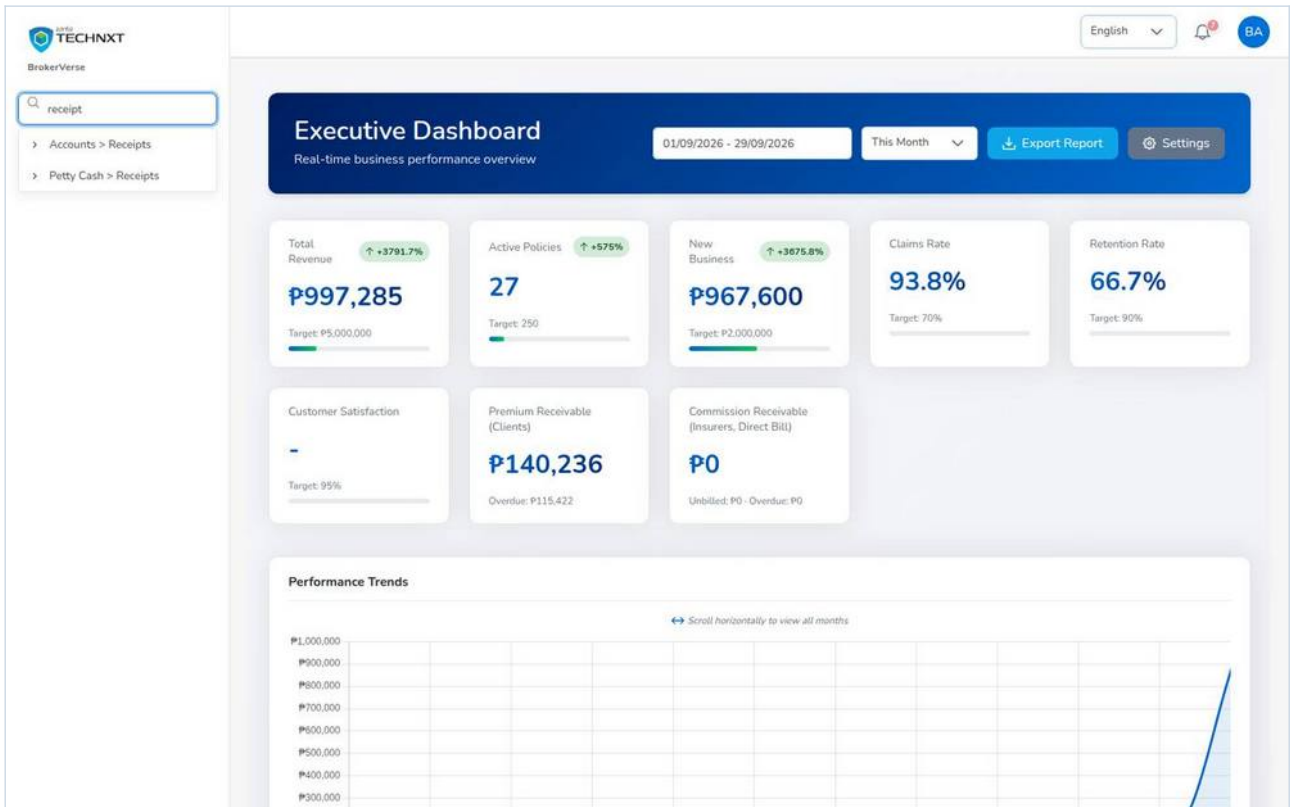

Figure 11. Menu search: typing "receipt" lists every screen with that word

Notifications

The system sends you a notification when something needs your attention: a quotation to review, a claim registered on your policy, an approval waiting for you, a premium overdue, a renewal notice sent. Approval requests go only to the users who may approve them (for example journal vouchers to finance), and amounts are shown in pesos, for example ₱ 85,000.00.

The screenshot shows the BrokerVerse interface. On the left is a sidebar menu with options like Dashboard, Operations, Accounts, Collections, Accounting Query, All Clients Accounting, Open Entry Matching, Open Entry Un-Matching, Disbursement, Petty Cash, Journal Voucher, Correction JV, Reversal JV, Remittance, Incentive, Commission, Reinsurance, and Reports. The main area displays a table of client data with columns: Client Name, Policy No., Outstanding, Current, 1-30 Days, 31-60 Days, and 61-90 Days. The table lists clients: Carlo Bautista, Jose Reyes, Bianca Lorenzo, Paolo Fernandez, and Angela Ramos. A notification panel is open on the right, showing a list of notifications with details like 'Journal voucher JV-2026-00117 approved', 'Debit note approved', and 'Commission debit note awaiting approval'. Each notification has a close button (X) and a 'See More' link at the bottom.

Client Name	Policy No.	Outstanding	Current	1-30 Days	31-60 Days	61-90 Days
Carlo Bautista	POL-2025-90016	P35,650.00	P0.00	P0.00	P0.00	P0.00
Jose Reyes	POL-2026-90003	P30,380.00	P0.00	P0.00	P0.00	P0.00
Bianca Lorenzo	POL-2026-95005	P23,766.19	P0.00	P0.00	P23,766.19	P0.00
Paolo Fernandez	POL-2026-95007	P25,626.15	P0.00	P25,626.15	P0.00	P0.00
Angela Ramos	POL-2026-95008	P24,813.75	P24,813.75	P0.00	P0.00	P0.00

Figure 12. Notification panel opened from the bell

1. Select the bell. The panel shows the latest notifications with their type (Approval, Reminder, Notification) and time.
2. Select **See More** to open the full list on the **Notification** page. Every role may open it.
3. Select the **X** on a notification to remove it from the panel.

The screenshot shows the BrokerVerse interface with the Notification page open. The page title is 'Notification' and it displays 'No notifications found.' The sidebar menu is visible on the left, and the top right corner shows the language dropdown (English) and a user profile icon (MS).

Figure 13. The Notification page

Your profile

Select your initials, then **Profile**, to see your name, e-mail address and contact details. Select **Edit Profile** to correct them. The same menu holds **Change password** and **Two-factor authentication** (see *Signing in*).

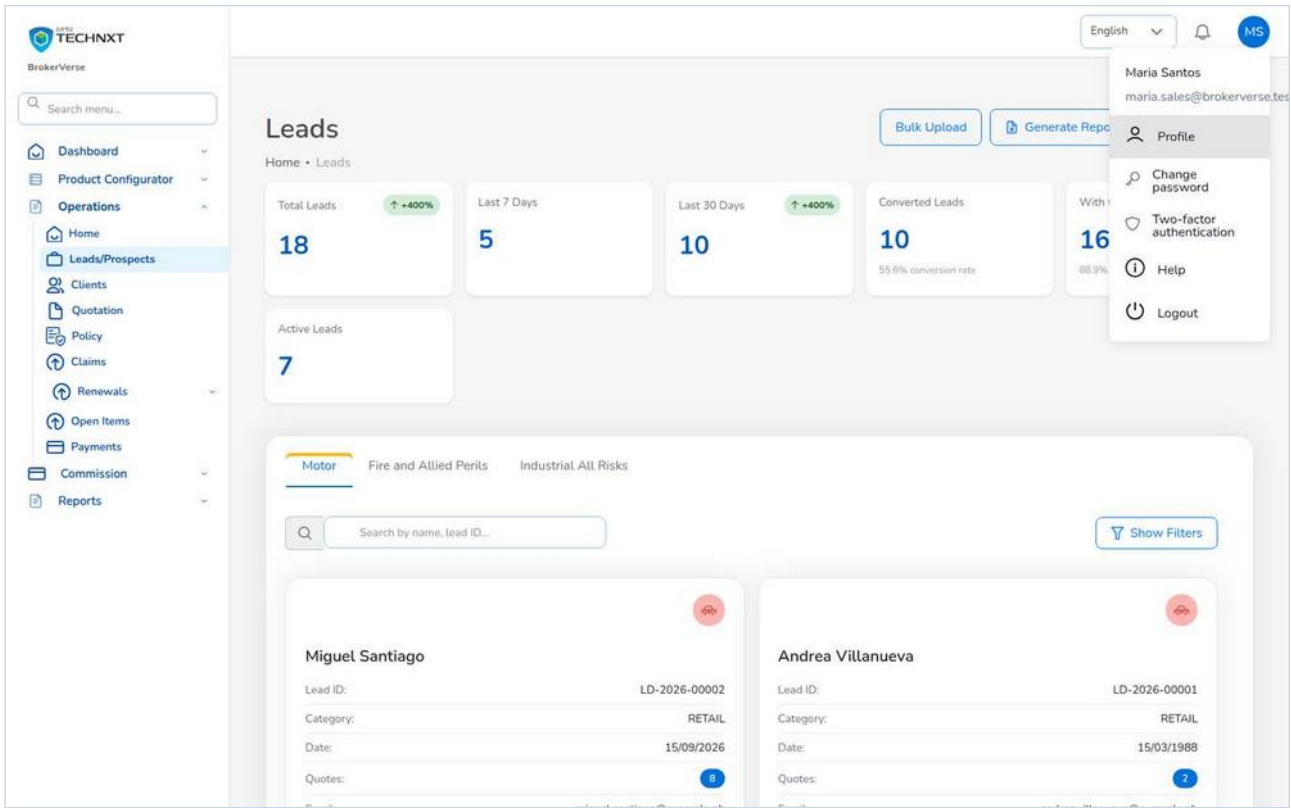

Figure 14. The profile menu

Working with lists

Most screens open with a list. The lists work the same way everywhere:

- Type in **Search** to filter the list. Some lists have a field selector next to the search box (for example **Policy Number**).
- Select **Show Filters** to filter by status, dates, insurer or amount.
- Use the arrows at the bottom to page through the list, and **Rows per page** to show more rows.
- Row actions are icons at the end of the row: the arrow or eye opens the record, the pencil edits it, the three dots (...) open more actions.
- Status badges are coloured: green for completed or active, amber for pending, red for rejected or overdue.

1.6 Roles and what each persona sees

Your role decides which menus you see and which screens you may open. The server applies the same rules to every request, so a screen you cannot see is also refused if someone types its address.

Persona	Role (code)	Menus	Maker / checker duties
IT Administrator (BrokerVerse)	IT Administrator (it-admin)	All menus	Settings, schedules and integrations. Cannot approve own transactions.

Persona	Role (code)	Menus	Maker / checker duties
Business Administrator (bea.admin)	Business Administrator (ba)	All menus	Products, rates, masters, treaties, incentive programmes.
Sales / Relationship Manager (maria.sales)	sales	Dashboard (Executive, Agent), Product Configurator (Dashboard, Templates), Operations (all), Commission Dashboard, Reports (All Reports, Operational Reports)	Maker for quotations; earns commission on own production.
Agent / Referrer (ramon.agent)	agent	Agent Dashboard, Operations (Home, Leads, Clients, Quotation, Policy, Claims, Renewals > Renewal Policy), Commission Dashboard	Sees only own book. Maker for quotations.
Underwriter (jose.uw)	underwriting	Underwriting and Executive Dashboards, Product Configurator (all), Operations (all), Reinsurance (all), Reports (All Reports, Operational Reports)	Notified of quotations sent for approval; checker for renewal terms.
Customer Services (ana.cs)	customer-services	Executive Dashboard, Product Configurator (Dashboard, Templates), Operations (all), Reports (All Reports, Operational Reports)	Endorsements; can capture leads and quotations.
Claims Officer (carlo.claims, lisa.claims2)	claims	Claims Dashboard, Operations (Home, Clients, Policy, Claims), Reinsurance > Claims Recovery, Reports (All Reports, Operational Reports)	One officer submits a settlement, another approves it.
Finance / Accounts (liza.finance, fe.approver)	finance	Executive Dashboard, Operations (Open Items, Payments), Accounts (all, including Incentive), Commission (all), Reinsurance > Reconciliation, Reports (All Reports, Financial Reports, Operational Reports > Remittance and Broker Commission)	One user makes vouchers, JVs, remittances, debit notes and incentive calculations; another approves them.
User Access Administrator (carmela.morfe)	user-access-admin	Master > User Management and Audit Trail only	Users, roles and access reviews; no business data.

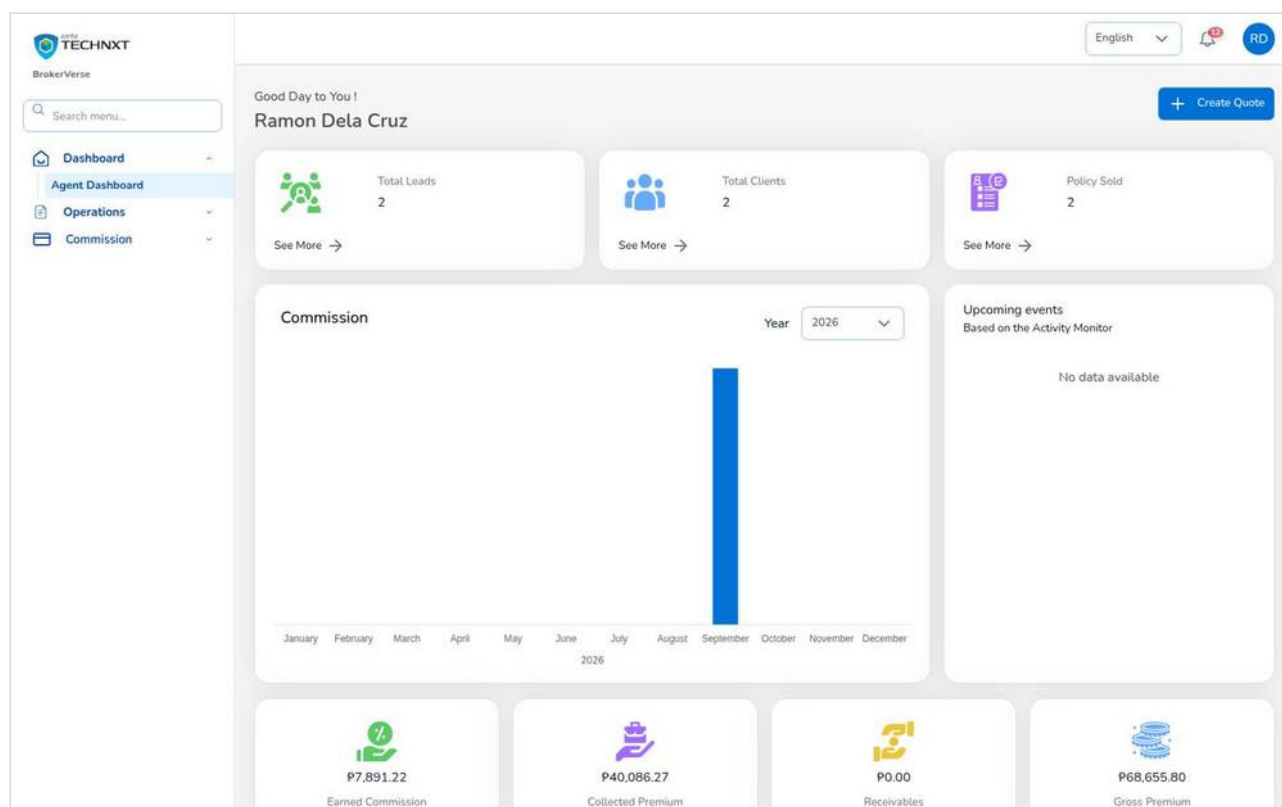

Figure 15. A menu reduced to the role: the Agent / Referrer sidebar

If you type the address of a screen your role may not open, the system shows **Not authorised**. Choose a screen from your menu instead. Buttons that lead to a screen your role may not open (for example **Create Lead** for claims officers) are not shown.

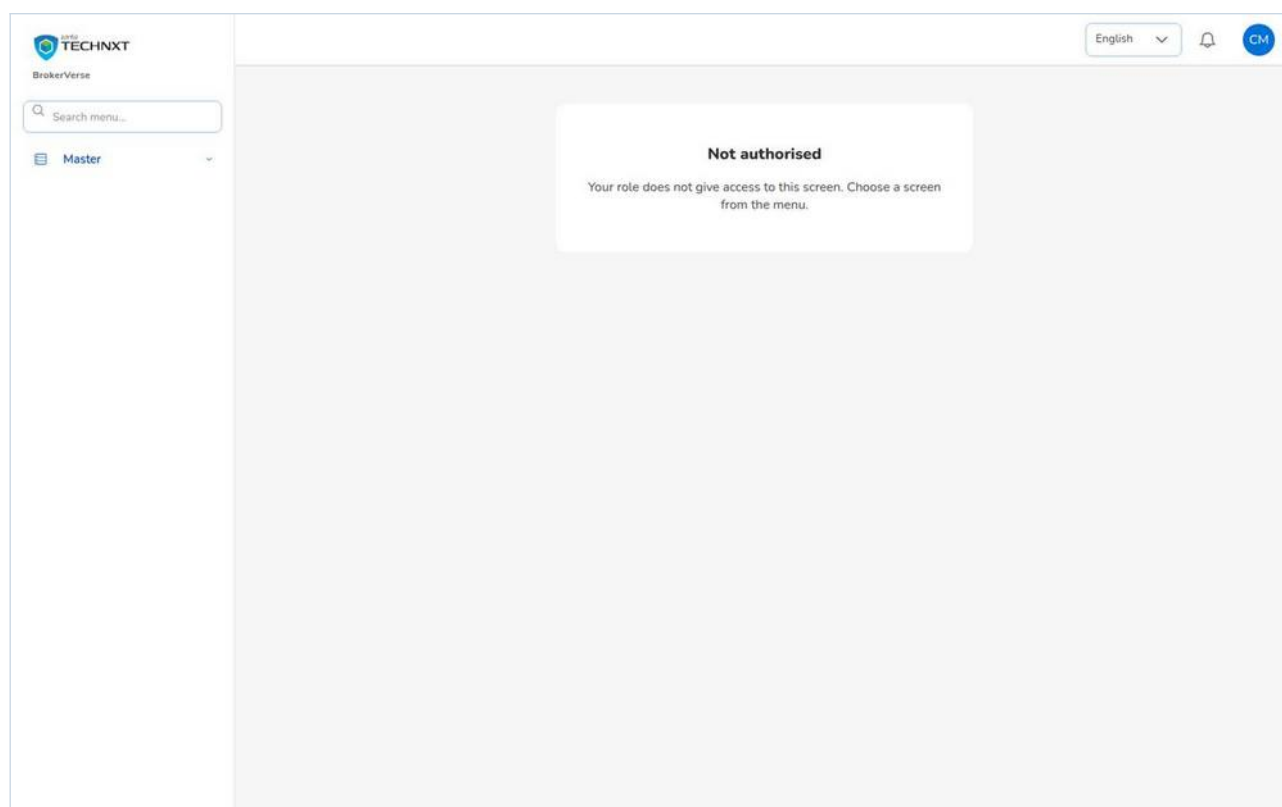

Figure 16. Not authorised: a User Access Administrator opening Accounts > Receipts

Note: Agents see only their own book: the leads, clients, quotations and policies they created or own (`security.scoped_roles`).

1.7 Numbers, dates and Philippine formats

Item	Format and rule
Currency	Philippine peso (PHP, ₱) with two decimals and Philippine grouping, for example ₱ 1,450,000.00.
Dates	DD/MM/YYYY, for example 29/09/2026 (<code>general.date_format</code>). Time zone Asia/Manila.
Mobile numbers	Philippine mobile numbers. Type 0917 123 4567, +63 917 123 4567 or 9171234567. The system stores 09171234567.
ZIP code	4 digits, for example 1226 (Makati).
Date of birth	Must be a past date. The age must be within the configured range (18 to 100 years by default).
TIN	Required for corporate prospects (Tax Identification Number of the company).
Government ID (KYC)	PhilSys ID, UMID, Passport, Driver's License, PRC ID, SSS ID, GSIS ID, TIN ID, Postal ID, Voter's ID or Senior Citizen ID (<code>policy.kyc_id_types</code>).
Taxes on premium	VAT 12%, documentary stamp tax (DST) 12.5%, local government tax (LGT) 0.75%; fire service tax (FST) 2% for fire and IAR (<code>tax.*</code> , <code>premium.taxes_by_lob</code>). Screens and the server use the same configured rates.
Withholding tax	5% on agent commission (individual), 10% for external / company referrers; the insurer withholds 10% expanded withholding tax on direct-bill commission (BIR Form 2307).

2 The end-to-end business flow

2.1 Overview

A policy passes through the same steps every time. Each step is done by a different person, on a different screen, and each one leaves a numbered document behind.

#	Step	What happens	Who	Screen
1	Lead	The prospect is recorded with contact details and address. Number LD-.	Agent, sales, customer services	Operations > Leads/Prospects
2	Quotation	Vehicle, cover and insurer are chosen; the system prices the premium and taxes. Number QT-.	Agent, sales, underwriter	Operations > Leads/Prospects > Create Quote
3	Customer approval	The client receives an e-mail link and accepts the quotation online. Underwriting is notified.	Client; underwriter informed	Public approval page
4	Policy issue	KYC, vehicle identifiers and photos are recorded; the billing mode (broker billed or direct bill) is chosen on the Send to Insurance Company step; the insurer's policy is uploaded. Number POL-, client code CL-.	Agent, sales, underwriter	Convert Policy, Upload Policy
5	Billing	Broker billed: a premium bill INV- with its booking journal and a collection item. Direct bill: commission receivable from the insurer. Commission is accrued for the referrer.	System	Automatic at issue
6	Payment capture	The client's payment is recorded (pay later, bank transfer, cheque, online, cash) for finance to verify.	Agent, sales, underwriter	Policy > Payment
7	Receipt	Finance posts the official receipt OR- against the open bill. The bill becomes Partial or Paid.	Finance	Accounts > Receipts
8	Commission payout	Commission lines become eligible when the premium is fully collected; they are approved and paid by voucher PV- less withholding tax.	Finance maker + checker	Commission > Agents/Referrer Accounts, Accounts > Disbursement
9	Remittance to insurer	Collected premium, net of commission, is remitted to the insurer (REM-), settled (SET-) and paid by cheque (PV-).	Finance maker + checker	Accounts > Remittance
9a	Direct-bill debit note	For direct-bill policies the broker bills its commission plus VAT to the insurer (DN-) and records the insurer's payments net of EWT (DNC-).	Finance maker + checker	Accounts > Remittance > Direct Bill Processing

#	Step	What happens	Who	Screen
10	Endorsement	A change to the policy (personal details, vehicle, cover, extension, cancellation) is recorded. Additional premium is billed. Number END-.	Customer services, agent, sales	Operations > Policy > ... > Endorsement
11	Claim	A loss is registered, adjusted and settled; a second claims officer approves the settlement. Number CLM-.	Claims officers	Operations > Policy > ... > Claim, Operations > Claims
12	Renewal	Policies enter the renewal pipeline 90 days before expiry; notices go out at 60, 30 and 15 days; a renewal quotation becomes the new term.	Underwriter, sales, agent; schedules	Operations > Renewals
13	Reports	Every step above appears in the dashboards and in the 19 catalogue reports.	Everyone, by role	Dashboard, Reports > All Reports

2.2 Maker-checker points

Maker-checker means that the person who enters a transaction cannot approve it. The system refuses the approval with a message when the maker tries.

Transaction	Maker	Checker	Setting
Quotation approval (status Approved)	Quotation creator	Another user (underwriting is notified)	<code>workflow.quote_maker_checker</code>
Claim settlement	Claims officer who submits	Another claims officer	<code>claims.settlement_maker_checker</code>
Journal voucher	Finance user who submits	Another finance user	<code>journal.require_approval</code> , <code>finance_maker_checker_enabled</code>
Payment voucher, cheque, commission payout	Finance maker	Another finance user	<code>finance_maker_checker_enabled</code>
Commission line approval	Finance maker	Another finance user	<code>finance_maker_checker_enabled</code>
Remittance, settlement, adjustment	Initiator	Another finance user (levels by amount)	<code>remittance.approval_levels</code>
Direct-bill debit note	Finance user who raises it	Another finance user	built-in
Renewal terms	Renewal maker	Underwriter	<code>renewals_maker_checker</code>
Reinsurance treaty	Creator	Another user	<code>reinsurance.treaty_requires_approval</code>
Incentive calculation batch	Finance user who calculates	Another finance user	built-in

2.3 The money trail of a broker-billed policy

This example follows policy POL-2026-00001 (MAPFRE, Toyota Rav4, client Andrea Villanueva, agent Ramon Dela Cruz). Every row is a document the system created and a balanced journal it posted.

Event	Document	Debit	Credit	Amount (P)
Policy issued	Bill INV-2026-00001, journal JV-2026-00100	Premium receivable 35,076.27	Payable to insurer 30,875.52; commission income 4,200.75	35,076.27
Premium received	OR-2026-00019, JV-2026-00101	Cash in bank	Premium receivable	35,076.27
Commission to the agent	PV-2026-00022, JV-2026-00103	Commission payable 4,200.75	Cash 3,990.71; withholding tax payable 210.04	4,200.75
Premium remitted to MAPFRE	REM-2026-00018, SET-2026-00002, PV-2026-00023, JV-2026-00104	Premium payable	Cash in bank	30,875.52
Cover increased by endorsement	END-2026-00003, INV-2026-00002, JV-2026-00105	Premium receivable 5,010.00	Payable to insurer 4,410.00; commission income 600.00	5,010.00
Endorsement premium received	OR-2026-00020 (partial), OR-2026-00021 (balance)	Cash in bank	Premium receivable	2,000.00 + 3,010.00

At the end the premium receivable and the premium payable for the policy are both nil, the agent has been paid, and the trial balance is balanced.

2.4 The money trail of a direct-bill policy

In direct bill the client pays the premium to the insurer. The broker does not collect premium. It bills its commission, plus VAT, to the insurer with a commission debit note. The insurer pays the commission net of 10% expanded withholding tax and sends BIR Form 2307.

Example: POL-2026-00003 (Malayan, Honda City, client Miguel Santiago), commission 4,105.80.

Event	Document	Debit	Credit	Amount (P)
Policy issued as direct bill	JV at issue	Commission receivable – insurers 4,598.50	Commission income 4,105.80; output VAT 492.70	4,598.50
Debit note raised and approved	DN-2026-00001	–	–	4,598.50
Insurer pays part	DNC collection, JV	Cash 2,000.00; creditable WHT 205.29	Commission receivable	2,205.29
Insurer pays the balance	DNC collection, JV	Cash 2,187.92; creditable WHT 205.29	Commission receivable	2,393.21

No premium bill, no collection reminder and no remittance is created for a direct-bill policy.

2.5 Key business rules at a glance

- The server prices every quotation again with the configured rates and taxes. A premium changed in the browser is refused.
- CTPL is the Insurance Commission tariff premium for the vehicle class, inclusive of taxes and fees. It is added to the gross premium outside the taxed net premium and is never discounted.
- Auto Passenger Personal Accident (APPA) cover is the limit per person × seats (driver and passengers) × 0.1%.
- A policy cannot be issued without the government ID (type, number and image), chassis number, motor number and plate or MV file number (motor).
- A claim is refused when the date of loss is outside the policy period or in the future, or while premium is unpaid (`claims.block_unpaid_premium`).
- Commission becomes eligible for payout only when the premium is fully collected, and only for referrers with a bank account on file.
- Only finance users post official receipts. Other roles record a payment for finance to verify.

3 Dashboards

3.1 Purpose

Dashboards show live figures from the policies, bills, claims and commission lines in the system. They move as soon as a transaction is saved: a new policy adds to active policies and premium at once, a receipt reduces the receivable, a settled claim changes the claims figures.

Dashboard	Menu	Who uses it
Executive Dashboard	Dashboard > Executive Dashboard	Administrators, sales, underwriters, customer services, finance
Claims Dashboard	Dashboard > Claims Dashboard	Claims officers, administrators
Underwriting Dashboard	Dashboard > Underwriting Dashboard	Underwriters, administrators
Agent Dashboard (Operations Home)	Dashboard > Agent Dashboard, Operations > Home	Agents, sales, administrators
Commission Dashboard	Commission > Commission Dashboard	Finance, sales, agents, administrators (see Chapter 13)

3.2 Executive Dashboard

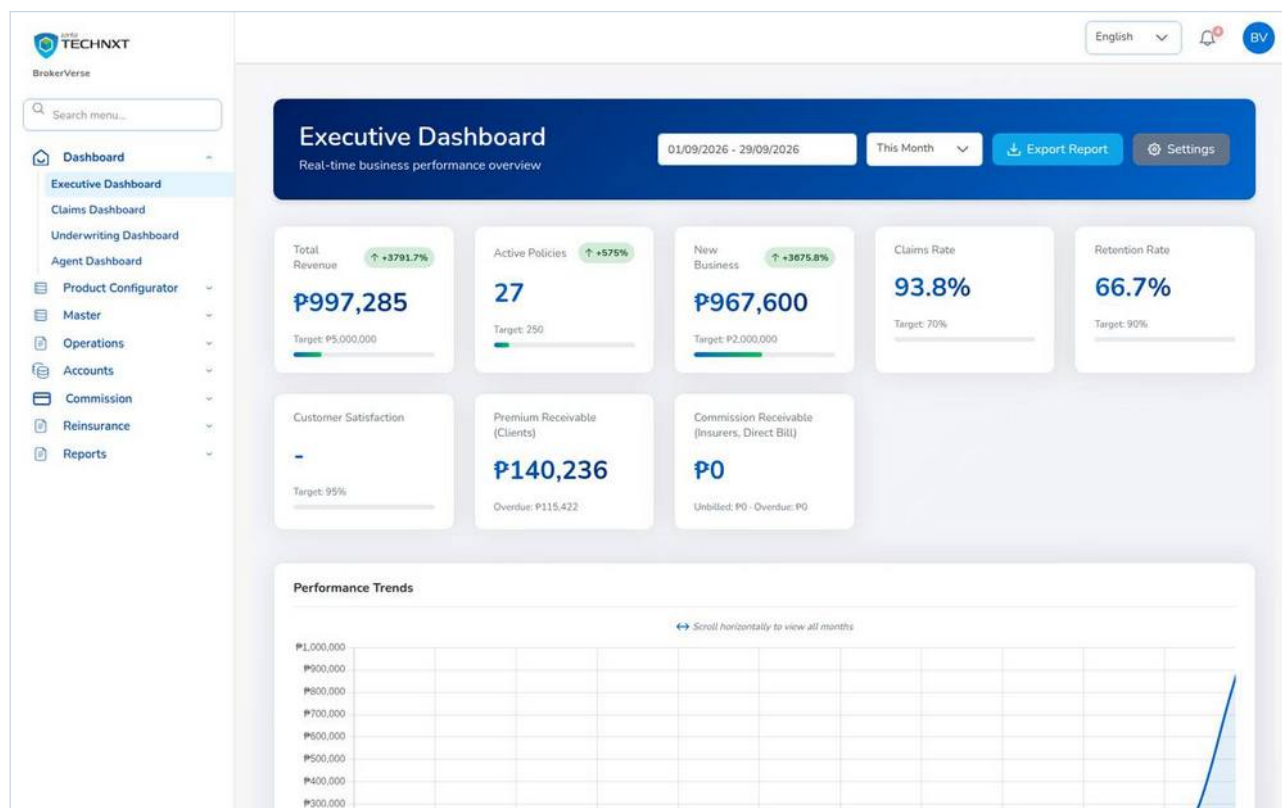

Figure 17. Executive Dashboard: key figures against target

The top of the dashboard shows the key performance indicators against the targets set in **Master > Configuration** (`dashboard.targets`).

Card	What it shows
Total Revenue	Gross written premium in the period, with the change against the previous period.
Active Policies	Policies in force.
New Business	Premium of new (not renewed) policies in the period.
Claims Rate	Claims incurred as a percentage of premium.
Retention Rate	Renewals retained as a percentage of renewals due.
Customer Satisfaction	Shown as "-" until satisfaction scores are recorded.
Premium Receivable (Clients)	Premium billed to clients and not yet collected, with the overdue part.
Commission Receivable (Insurers, Direct Bill)	Commission billed or to be billed to insurers on direct-bill policies, with the unbilled and overdue parts.

To use the dashboard:

1. Choose **Dashboard > Executive Dashboard**.
2. In the period list, choose **This Month**, **This Quarter** or **This Year**. The figures and charts refresh, and the date field shows the period, for example 01/09/2026 - 29/09/2026.
3. To download the Production Register for a date range, choose the dates in the date field, then select **Export Report**. The file downloads as Excel (XLSX).
4. Scroll down for the charts and tables.

The periods are calendar periods in Philippine time: **This Month** runs from the 1st of the month to today, **This Quarter** from the first day of the calendar quarter, **This Year** from 1 January. The change shown on each card compares the period with the whole previous period (for example the whole of August). Figures described as "last N days" stay rolling.

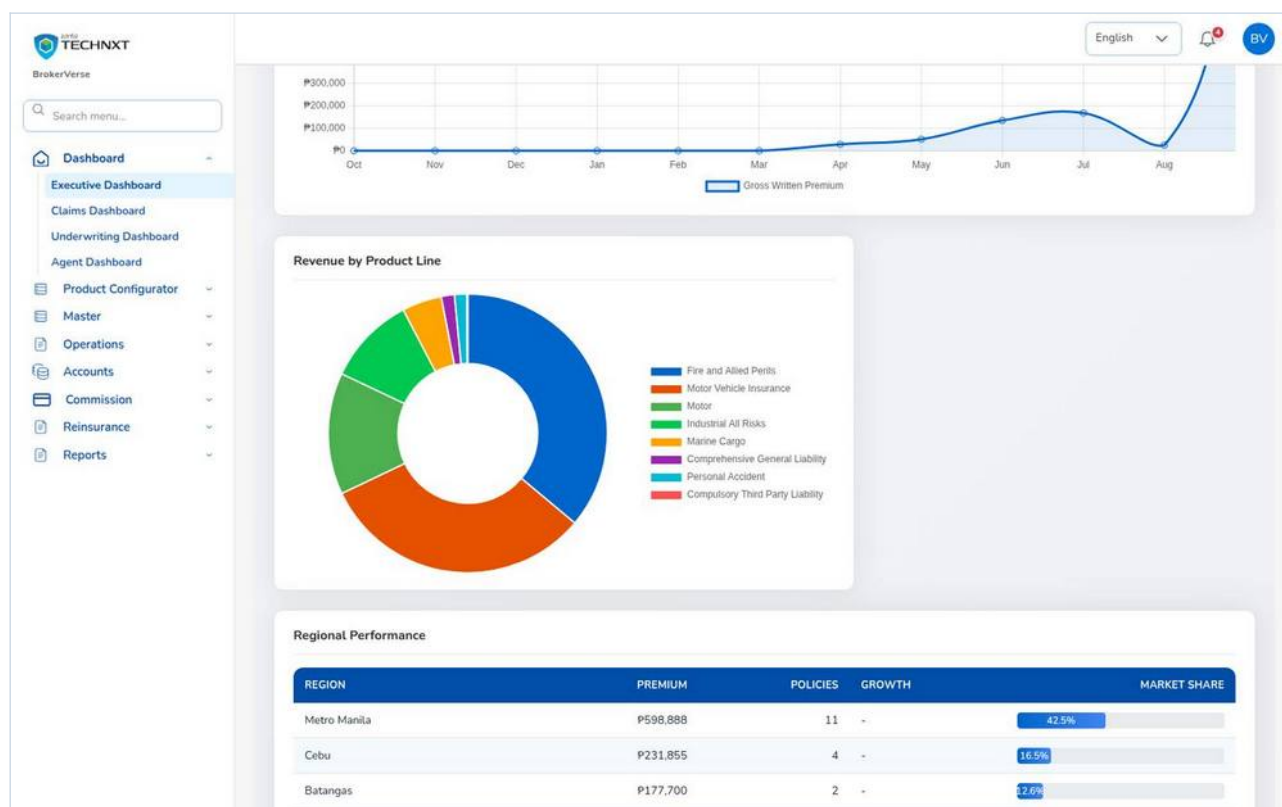

Figure 18. Executive Dashboard: trends, product lines, regions, products and agents

Section	What it shows
Performance Trends	Gross written premium by month (scroll sideways for more months).
Revenue by Product Line	Premium split by line of business.
Regional Performance	Premium, policies and market share by province.
Top Performing Products	Premium, number of policies and claim ratio by product.
Top Agents Performance	Premium, conversion rate and policies by agent.
Claims Status Distribution, Customer Segmentation	Claims by status and clients by segment.
Quick Actions	Shortcuts to screens your role may open (for example New Quote, Policies, Reports).

The **Settings** button on the dashboard header opens **Master > System Settings**; it is shown only to roles that may open that screen. Targets are maintained in **Master > Configuration**, group *Dashboard*.

3.3 Claims Dashboard

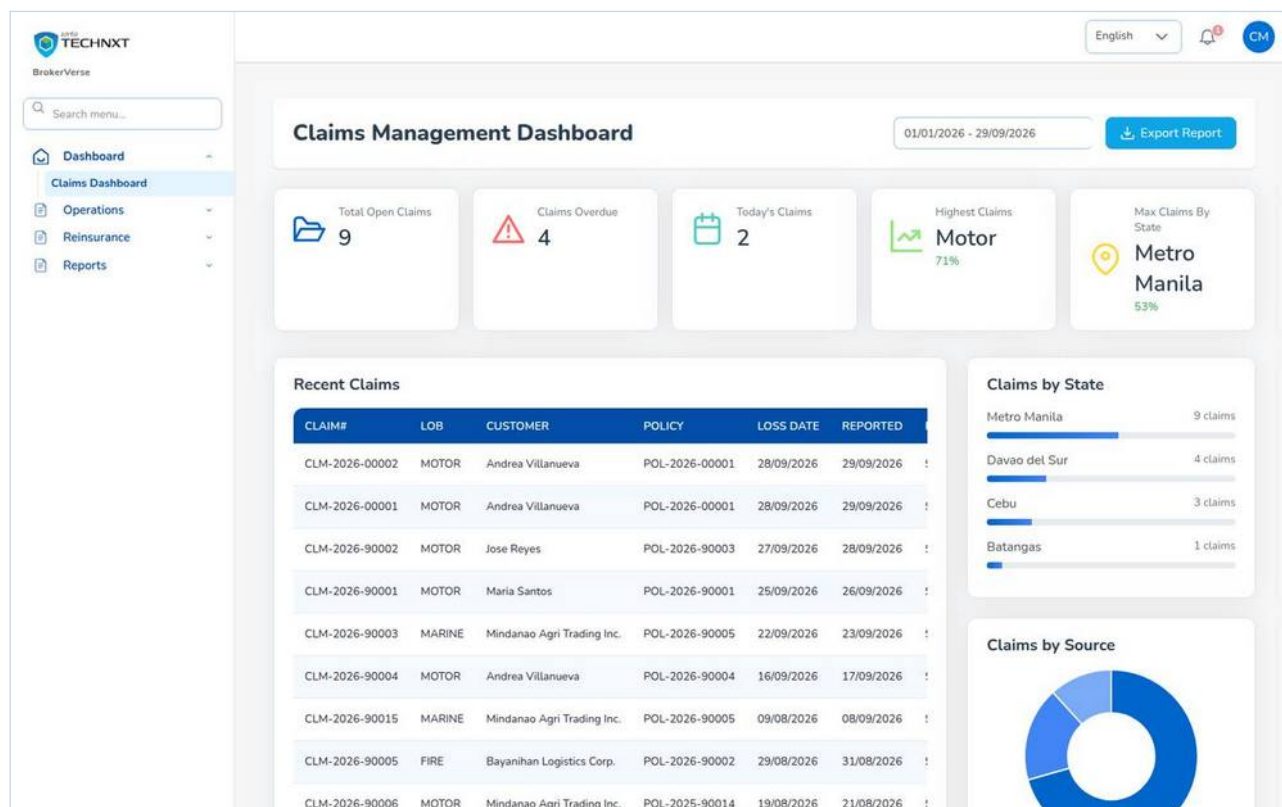

Figure 19. Claims Dashboard

1. Choose **Dashboard > Claims Dashboard**.
 2. Read the cards: **Total Open Claims**, **Claims Overdue** (past the handling SLA of 20 days), **Today's Claims**, **Highest Claims** (line of business with the most claims) and **Max Claims By State**.
 3. Use **Recent Claims** to open a claim. The table shows the line, customer, policy, loss and report dates, priority, status and amount.
 4. Choose a date range and select **Export Report** to download the claims data as a spreadsheet.
- Further down the dashboard: claims trend, claims by province, claims by source and loss ratio by product.

3.4 Underwriting Dashboard

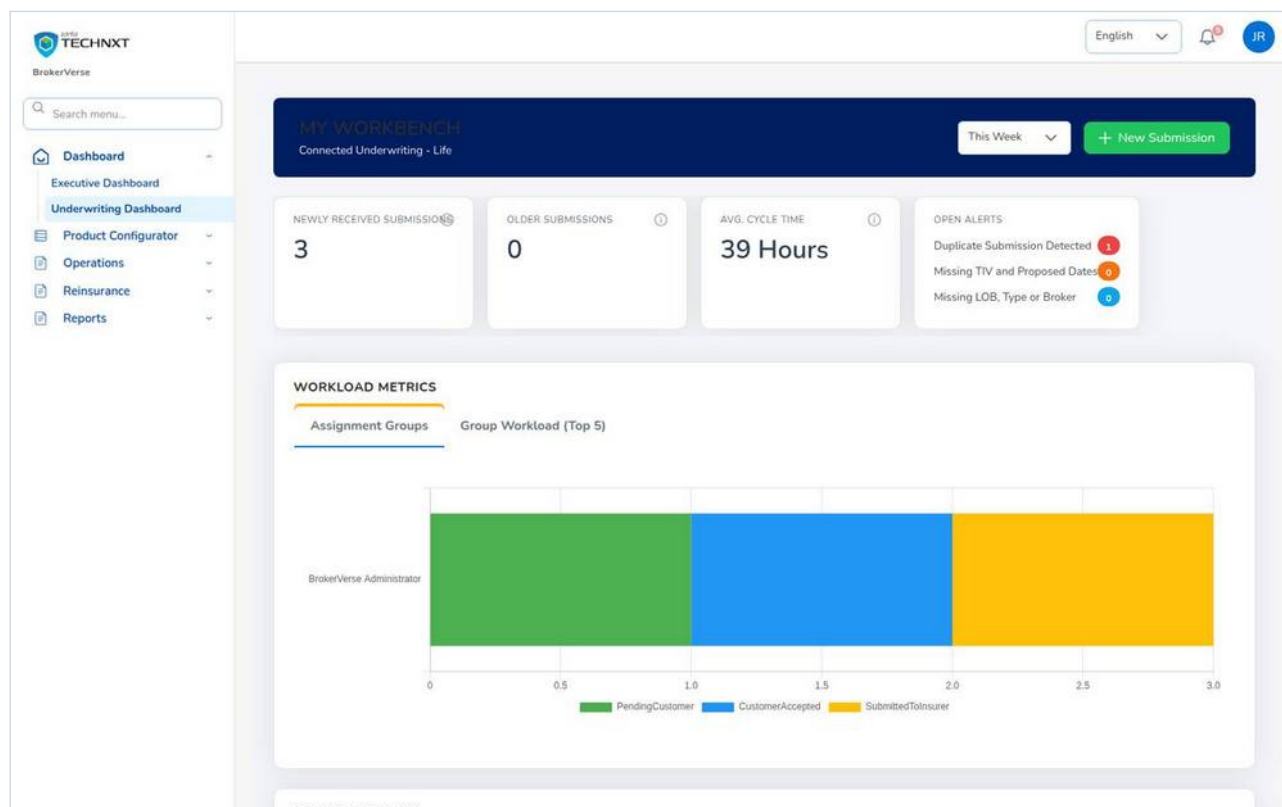

Figure 20. Underwriting Dashboard (My Workbench)

The underwriting workbench lists quotations in progress as submissions.

Section	What it shows
Newly received / older submissions	Quotations waiting for action this week and older ones.
Avg. cycle time	Average hours from submission to decision.
Open alerts	Data-quality alerts: duplicate submissions, missing sums insured or dates, missing line of business or broker.
Workload metrics	Work by assignment group.
Submissions list	Case ID (quotation number), proposed insured, agent, sum insured (face amount), product, next requirement due, priority and status. High priority is set from ₪ 5,000,000 sum insured (dashboard.high_sum_insured).
Open tasks	The quotations assigned for follow-up, with their due dates.

Note: The workbench subtitle reads "Connected Underwriting - Life". BrokerVerse handles non-life business; read it as the underwriting workbench.

3.5 Agent Dashboard and Operations Home

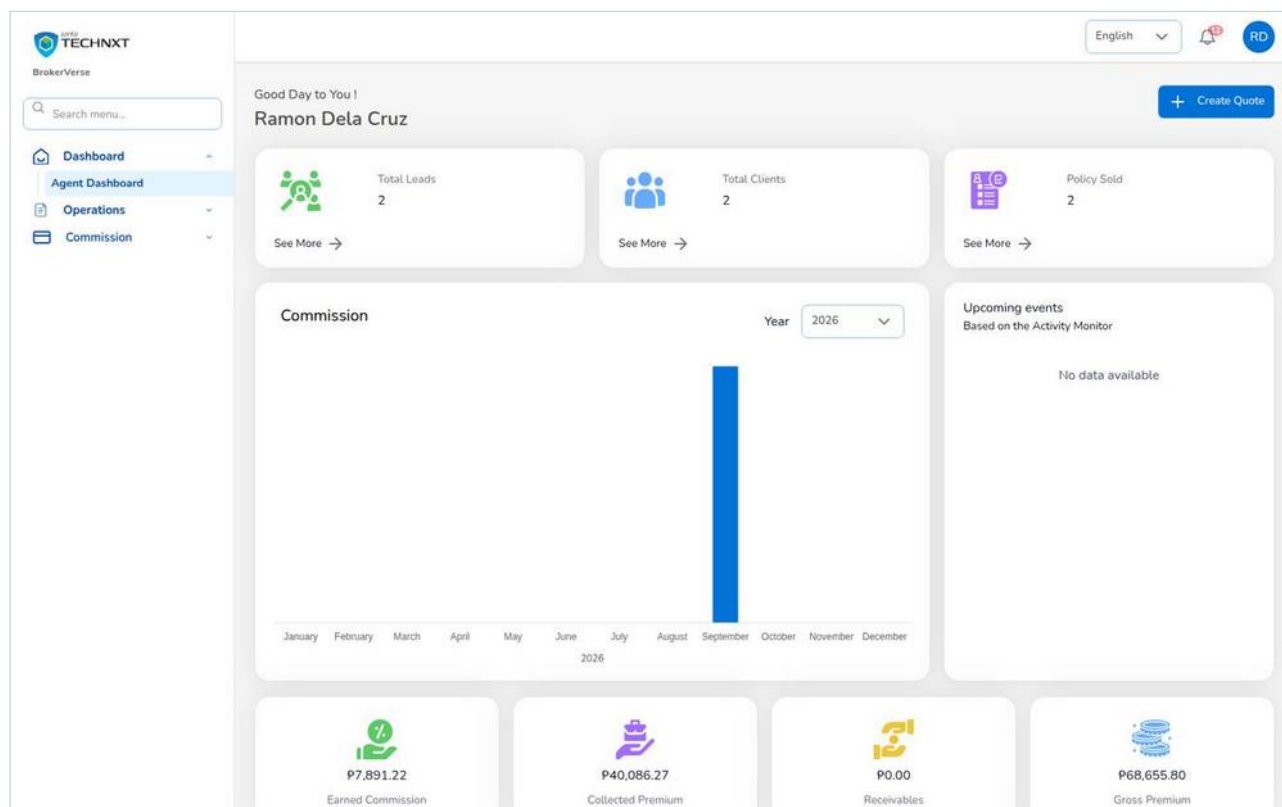

Figure 21. Agent Dashboard for Ramon Dela Cruz (own book only)

The Agent Dashboard is the home screen of agents and sales staff. For an agent it counts the same book as the lists: the leads, clients, quotations and policies the agent owns or created.

Item	What it shows
Create Quote	Starts a new quotation.
Total Leads, Total Clients, Policy Sold	Your counts. Select See More to open the list.
Commission (chart)	Commission by month for the year you choose.
Upcoming events	Your follow-ups from the activity monitor.
Earned Commission	Commission earned on your policies, net of withholding tax once paid.
Collected Premium, Receivables, Gross Premium	Premium billed on your policies: collected (posted receipts), still due, and total. Direct-bill policies are not included, because their premium is paid to the insurer.

4 Leads and prospects

4.1 Purpose

A lead is a prospect who may buy insurance. You record the lead first; the quotation, the client record and the policy all start from it. Each lead gets a number LD-YYYY-NNNNN.

Who uses it: agents, sales and customer services create and follow leads. Underwriters and administrators can see them.

4.2 The lead list

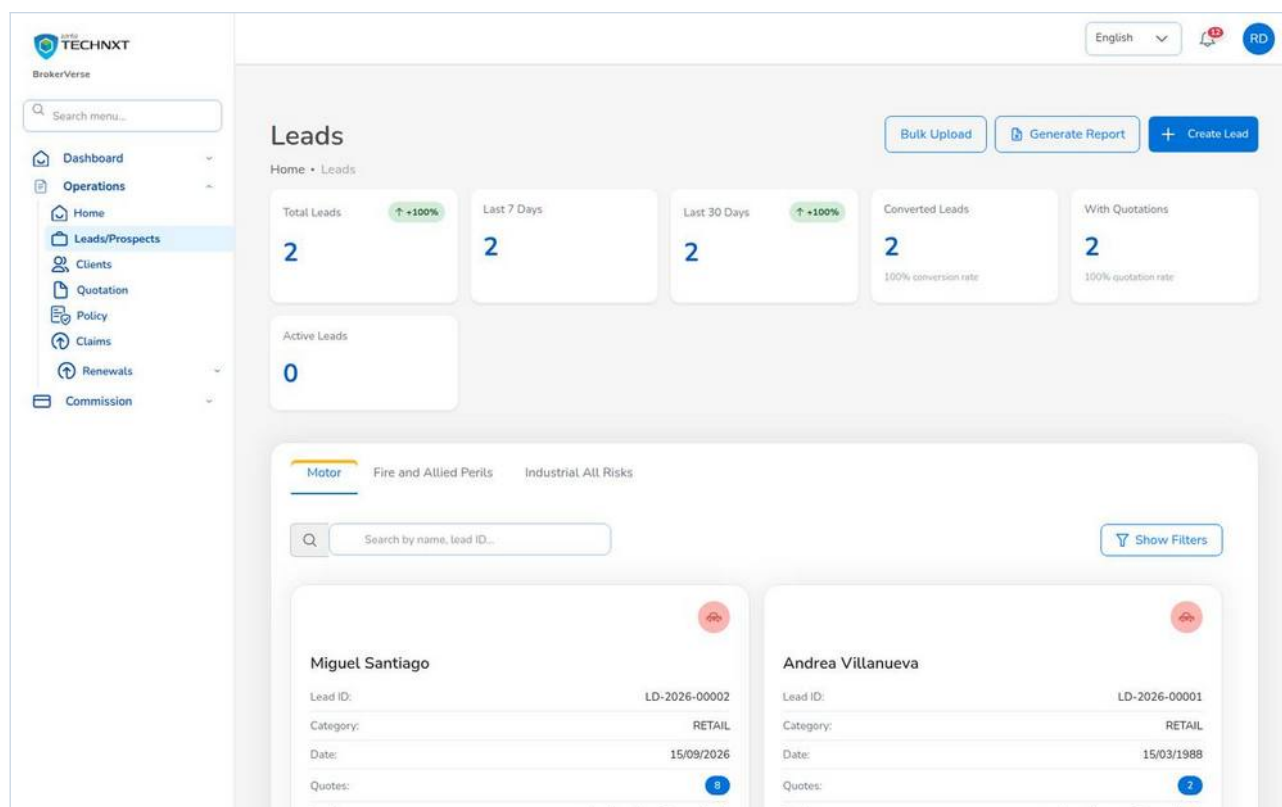

Figure 22. Operations > Leads/Prospects

Choose **Operations > Leads/Prospects**. The screen shows:

- Cards: **Total Leads**, **Last 7 Days**, **Last 30 Days**, **Converted Leads** (with the conversion rate), **With Quotations** and **Active Leads**.
- Tabs by line of business: **Motor**, **Fire and Allied Perils** and **Industrial All Risks**.
- One card per lead with its number, category, date, number of quotations, e-mail and phone, and the actions **View**, **Edit** and **Delete**.
- Buttons **Bulk Upload**, **Generate Report** and **Create Lead**.

Agents see only the leads they created.

4.3 Create a lead

1. Choose **Operations > Leads/Prospects**.
2. Select **Create Lead**, then choose the line of business: **Motor**, **Fire and Allied Perils**, **Industrial All Risks** or **Employee Benefit**.
3. Under **Select Category**, choose **Retail** (a person) or **Corporate** (a company).
4. Fill in the fields in the table below.
5. Select **Save & Continue**.

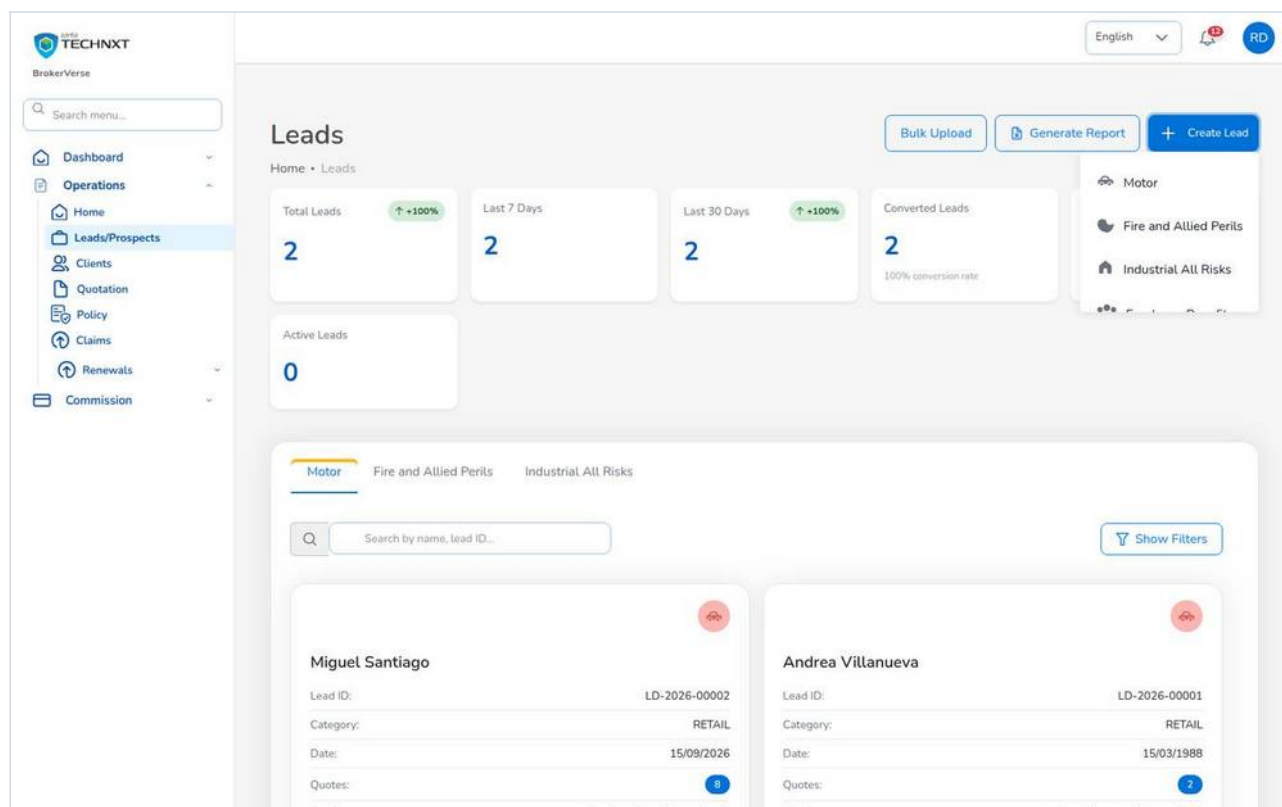

Figure 23. Create Lead: choose the line of business

Figure 24. Create Lead form for a Motor prospect (example values)

Field	Meaning	Required	Rules
Category	Retail (individual) or Corporate (company)	Yes	Corporate adds Company Name and TIN , both required.
First Name, Last Name	Name of the prospect or contact person	Yes	
Preferred Name	Name used in letters and e-mails	Yes	
Date of Birth	Date of birth of the prospect	Yes	DD/MM/YYYY; not in the future; age between 18 and 100 (leads.min_age_years, leads.max_age_years).
Gender	Male or Female	Yes	
Email ID	E-mail address; quotations and approval links are sent here	Yes	Must be a valid e-mail address.
Contact Number	Mobile number	Yes	Philippine mobile: 0917 123 4567, +63 917 123 4567 or 9171234567; stored as 09171234567.
Country, Province, City	Address; lists come from the location masters	Yes	Choose the country first, then the province, then the city.
ZIP Code	Postal code	Yes	4 digits.

Field	Meaning	Required	Rules
Barangay / Subd	Barangay or subdivision	Yes	
House No / Unit No / Street	Street address	Yes	

The system gives the lead its number, sets its status to **New** and adds it to your lead count on the Agent Dashboard. Fire and IAR leads also ask for the risk location (with latitude and longitude) and the sums insured.

Tip: If a field is wrong, the message appears under it in red, for example *Invalid mobile number (e.g. 0917 123 4567 or +63 917 123 4567)*. Correct it and select **Save & Continue** again.

4.4 View, edit or delete a lead

The screenshot displays the 'Lead Details' page in the BrokerVerse system. The page is divided into a sidebar and a main content area. The sidebar contains navigation links for 'Dashboard', 'Operations', and 'Commission'. The main content area is titled 'Lead Details' and features a search bar and a 'Search menu...' input. Below the search bar, there are four panels: 'Personal Information', 'Contact Information', 'Address Information', and 'System Information'. Each panel contains a list of fields and their corresponding values. At the top right of the 'Lead Details' section, there are four buttons: 'Create Quote', 'Edit', 'Delete', and 'Back'. The 'Personal Information' panel shows fields for Lead ID, Category, First Name, Last Name, Preferred Name, Date of Birth, and Gender. The 'Contact Information' panel shows fields for Email and Contact Number. The 'Address Information' panel shows fields for House No, Barangay, City, Province, Country, and ZIP Code. The 'System Information' panel shows fields for Created Date, Last Updated, and Number of Quotes.

Figure 25. Lead Details with Create Quote, Edit and Delete

1. On the lead card, select **View**. The **Lead Details** page shows personal, contact, address and system information and the number of quotations.
2. To change the lead, select **Edit**, correct the fields, then select **Update**.
3. To start a quotation for this lead, select **Create Quote** (see Chapter 6).
4. To remove a lead that was entered by mistake, select **Delete**. Leads with quotations should be kept.

4.5 Lead statuses

Status	Set when
New	The lead is created.
Contacted, Qualified	The lead is followed up.
QuoteGenerated	A quotation is saved for the lead.
Converted	A quotation of the lead becomes a policy; the lead becomes a client.
Lost	The prospect does not buy.

4.6 Lead report and bulk upload

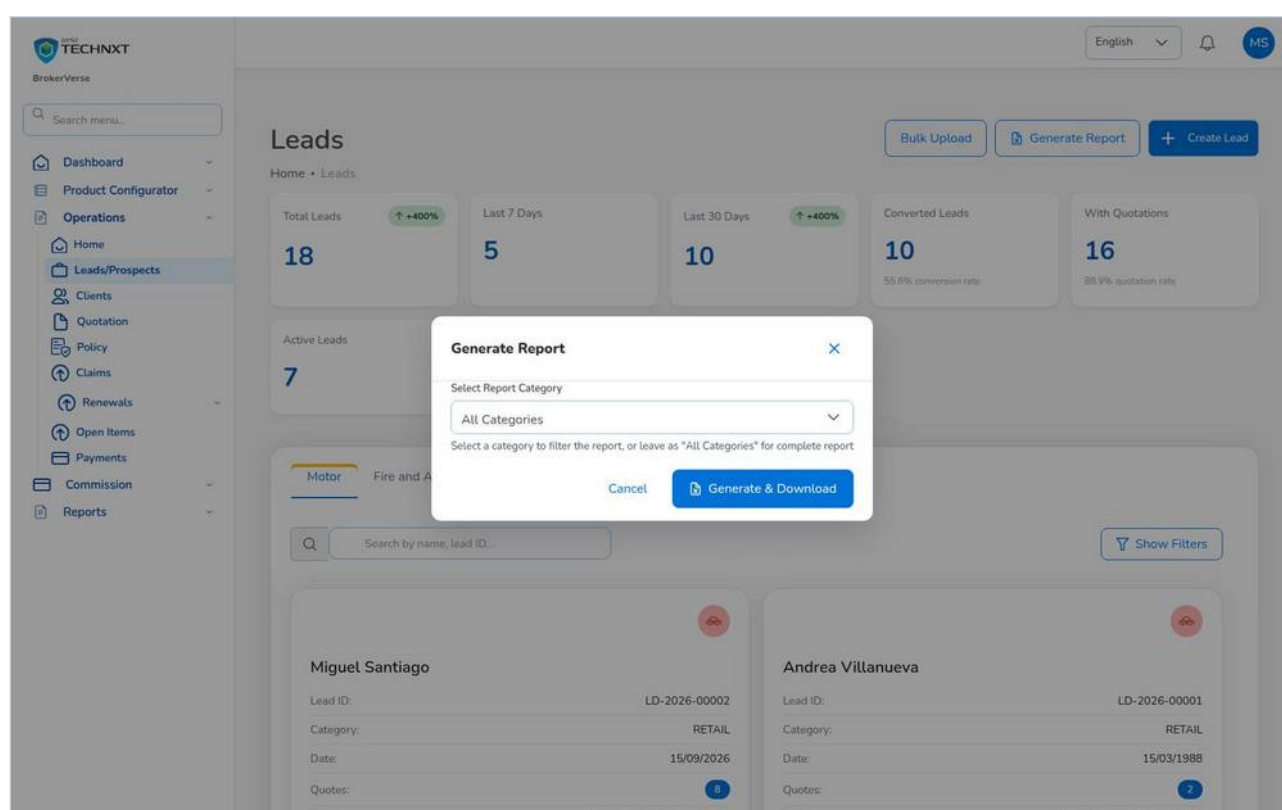

Figure 26. Generate Report dialog on the lead list

1. Select **Generate Report**.
2. In **Select Report Category**, choose a category or keep **All Categories**.
3. Select **Generate & Download**. The lead report downloads as a spreadsheet.

To load many leads at once:

1. Select **Bulk Upload**.
2. Select **Download Template** and fill in one lead per row in the Excel file.
3. Select the completed file (.xlsx or .csv, at most 10 MB). The system processes it and adds the leads.

5 Clients

5.1 Purpose

A client is a person or company that holds, or has held, a policy. The system creates the client, with a client code CL-YYYY-NNNNN, when a quotation is converted into a policy. The client record is the "360 view": policies, claims, renewals and endorsements in one place.

Who uses it: agents (own clients only), sales, customer services, claims officers, underwriters and administrators.

5.2 Find a client

The screenshot displays the 'Clients' page in the BrokerVerse system. The left sidebar contains a navigation menu with 'Clients' highlighted under the 'Operations' section. The main content area shows a table of clients with the following data:

Assured Name	Category	Client Since	Policies	Latest Policy Status	Actions
MIGUEL SANTIAGO Client Id :CL-2026-00002	INDIVIDUAL	29/09/2026	1	ACTIVE	⌵ ⌵
ANDREA VILLANUEVA Client Id :CL-2026-00001	INDIVIDUAL	28/09/2026	1	ACTIVE	⌵ ⌵
RAMON DELA CRUZ Client Id :CL-2026-90006	INDIVIDUAL	28/09/2026	1	ACTIVE	⌵ ⌵
TAAL LAKESIDE RESORTS INC. Client Id :CL-2026-90008	CORPORATE	28/09/2026	2	EXPIRED	⌵ ⌵
BAYANIHAN LOGISTICS CORP. Client Id :CL-2026-90002	CORPORATE	28/09/2026	2	ACTIVE	⌵ ⌵

At the bottom of the table, it indicates 'Rows per page: 5' and '1 - 5 of 10'.

Figure 27. Operations > Clients

1. Choose **Operations > Clients**.
2. Use the tabs **All**, **Individual** or **Corporate**, or type a name in the search box.
3. The list shows the name and client code, client type (Individual or Corporate), **Client Since** or date of birth, number of **Policies** and **Latest Policy Status**.
4. Select the arrow at the end of the row to open the client.

5.3 The client 360 view

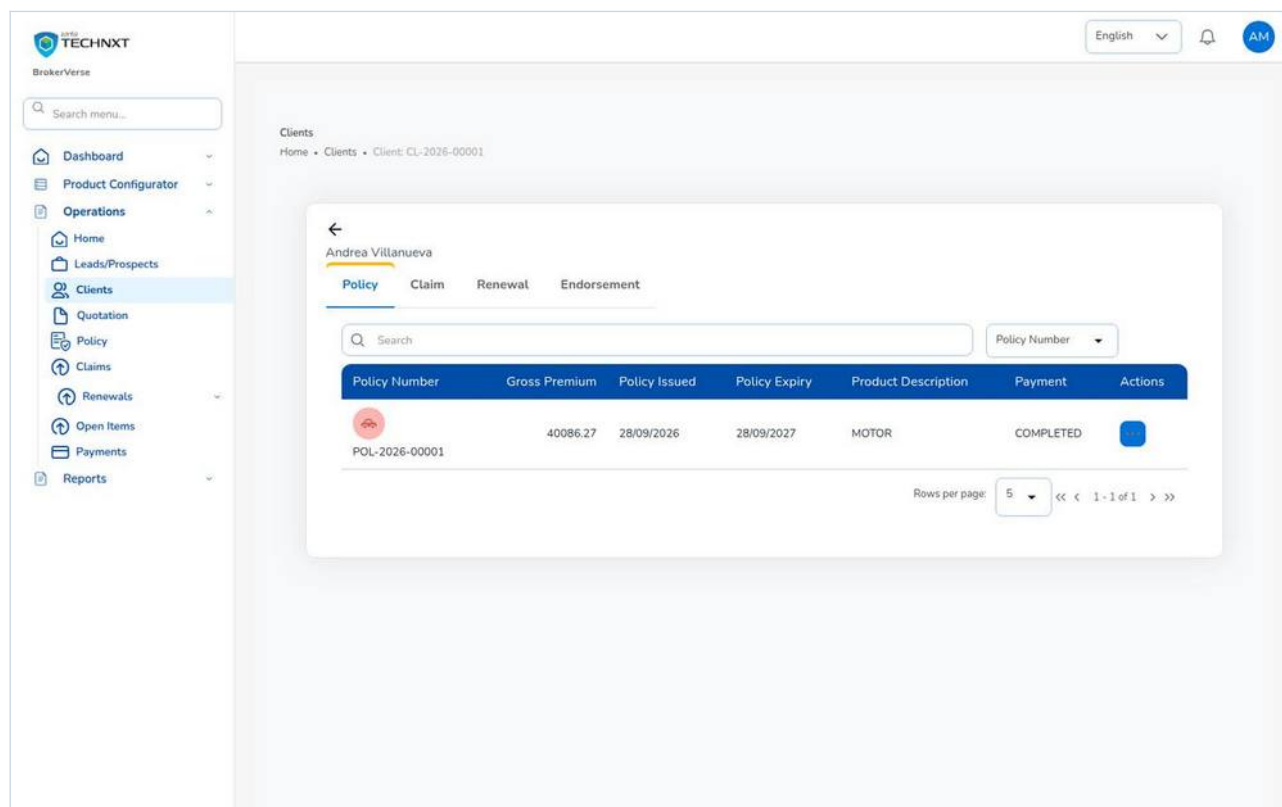

Figure 28. Client view with the Policy, Claim, Renewal and Endorsement tabs

The header shows the client code (CL-).

Tab	What you see and do
Policy	The client's policies with premium, dates, product and payment status. Open a policy, or use the row actions for a claim or an endorsement.
Claim	The client's claims with status.
Renewal	Renewals due and quoted.
Endorsement	The client's endorsements (END- numbers) with their type (for example Coverage Change), status and payment status.

To correct a client's name, address or contact details on an issued policy, use a **Personal Details Change** endorsement (Chapter 8). The change is then recorded against the policy and sent to the insurer.

6 Quotation

6.1 Purpose

A quotation prices the cover a prospect asks for, with one insurer. It shows the net premium, the taxes, CTPL, the gross premium, the broker's commission and the referrer's share. The client accepts it online; the accepted quotation becomes the policy. Each quotation gets a number QT-YYYY-NNNNN and stays valid for 30 days (`limits.quote_validity_days`).

Who uses it: agents, sales and customer services prepare quotations; underwriters are notified and review them; the client accepts them.

6.2 The quotation list

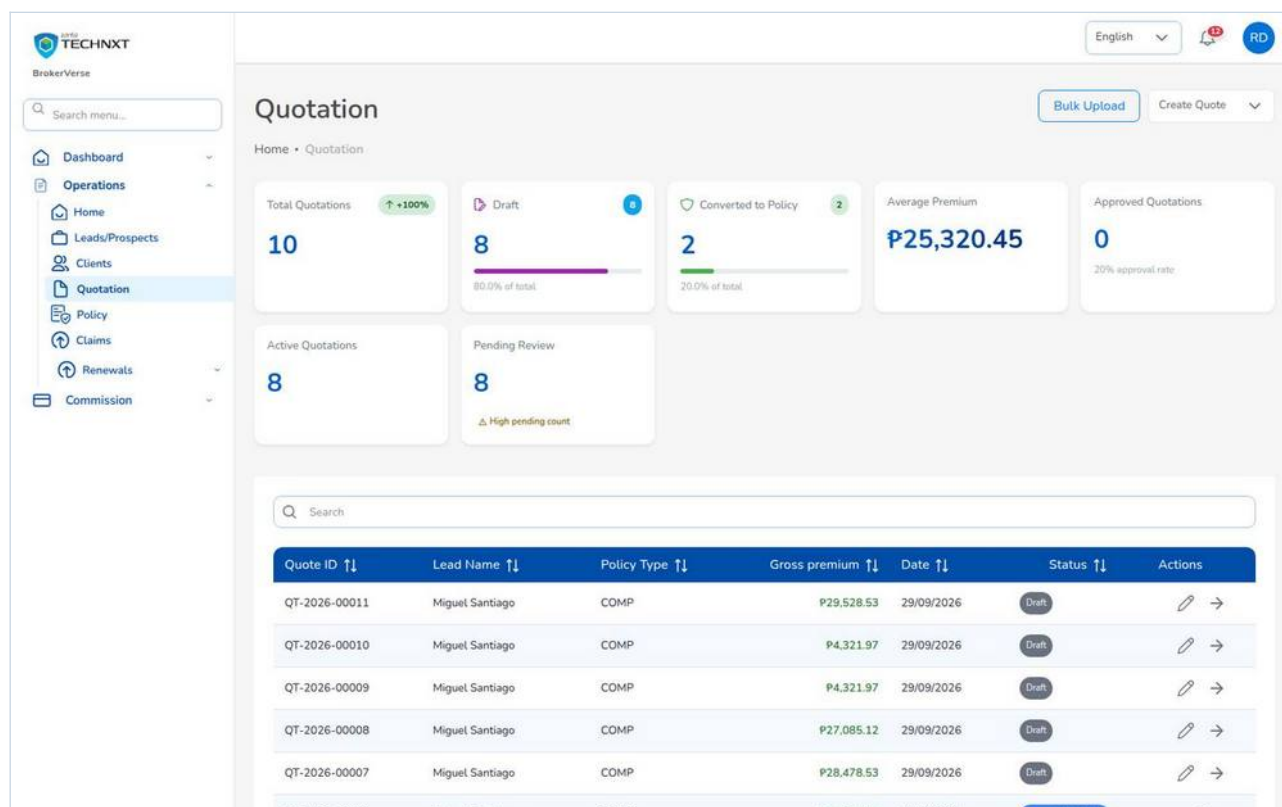

Figure 29. Operations > Quotation

Choose **Operations > Quotation**. The cards count quotations by status (Converted to Policy, Draft, Approved, Customer Accepted, Rejected, Pending Customer, Submitted to Insurer) and show the average premium. The table lists each quotation with its lead, policy type, gross premium, date and status. Use the pencil to edit a draft and the eye to open the quotation.

6.3 Quotation statuses

Status	Meaning	Next step
Draft	Saved, not yet sent. You can still edit it.	Send for Customer Approval

Status	Meaning	Next step
Pending Customer	The approval link has been e-mailed to the client. Underwriting is notified.	The client accepts, or you return it to Draft
Customer Accepted	The client accepted the quotation through the link.	Proceed to Policy
Submitted to Insurer	The quotation was sent to the insurer for its terms.	Approved or Rejected
Approved	Approved by a user other than the creator.	Proceed to Policy
Rejected, Dropped	Not taken up. Can be reopened as Draft.	–
Expired	Not converted within its validity (the Quotation expiry job runs every night at 00:30).	Reopen as Draft
Converted to Policy	The policy has been issued. The quotation can no longer be edited.	–

6.4 Create a motor quotation

A motor quotation has five steps. Nothing is saved until you select **Completed Quote** on the last step, so you can go back and forth with **Back** and **Next**.

1. Open the lead (**Operations > Leads/Prospects > View**) and select **Create Quote**.
2. Fill in **Policy Details** and **Insurance Vehicle Details**, then select **Next**.
3. Review the **Plan Recommendations**, then select **Next**.
4. Fill in **Coverage Details**, select **Calculate**, check the premium, then select **Next**.
5. Fill in **Accessories** and policy limits, then select **Next**.
6. Check the **Order Summary**, set the discount, the referrer and the signatory, then select **Completed Quote**.

The system saves the quotation as **Draft**, gives it its QT number, sets the lead to *QuoteGenerated* and opens the quotation.

Step 1: Policy details and vehicle

The screenshot shows the 'Create Quote' form in the BrokerVerse system. The form is titled 'Leads' and 'Lead ID: LD-2026-00002'. It is divided into two main sections: 'Policy Details' and 'Insurance Vehicle Details'.

Policy Details:

- Insurance Company Name:** Malayan Insurance Co., Inc.
- Insurance Policy Type:** Comprehensive
- Account Code:** Ramon Dela Cruz (Agent)
- Payment Type*:** Cash
- Co-Insurance:** (checkbox, unchecked)

Insurance Vehicle Details:

- Vehicle Type:** Private cars (including jeeps, AUVs and SUVs)
- Vehicle Brand:** Honda
- Model Year:** 2024
- Vehicle Model:** City
- Model Variant:** 1.5 S CVT
- Vehicle Color:** White
- Seating Capacity:** 5

Figure 30. Create Quote, step 1: policy and vehicle details (example values)

Field	Meaning	Required	Rules
Co-Insurance	Tick when more than one insurer shares the risk. A table appears for the co-insurers and their shares.	No	Shares must add up to 100%.
Insurance Company Name	The insurer that will issue the policy (Insurance Company master).	Yes	
Insurance Policy Type	Comprehensive, Own Damage / Theft or Third Party Liability.	Yes	
Account Code	The agent or referrer credited with the business. The commission share is paid to this referrer.	No	Active referrers only.
Payment Type	Cash or Credit.	Yes	
Vehicle Type	Insurance Commission vehicle class. Decides the CTPL tariff, the default seats and the own damage rate.	Yes	Classes come from the motor tariff in the Product Configurator.
Vehicle Brand, Vehicle Model, Model Variant	From the vehicle master. The model list follows the brand; the variant list follows the model.	Yes	
Model Year	Year of manufacture.	Yes	The last 20 years up to next year (<code>quote.model_year_span</code>).
Vehicle Color	Colour of the vehicle.	Yes	List from <code>quote.vehicle_colours</code> .

Field	Meaning	Required	Rules
Seating Capacity	Seats including the driver. Filled from the variant or the class default.	Yes	Whole number from 1 to 99. Used for Auto Passenger PA.

Step 2: Plan recommendations

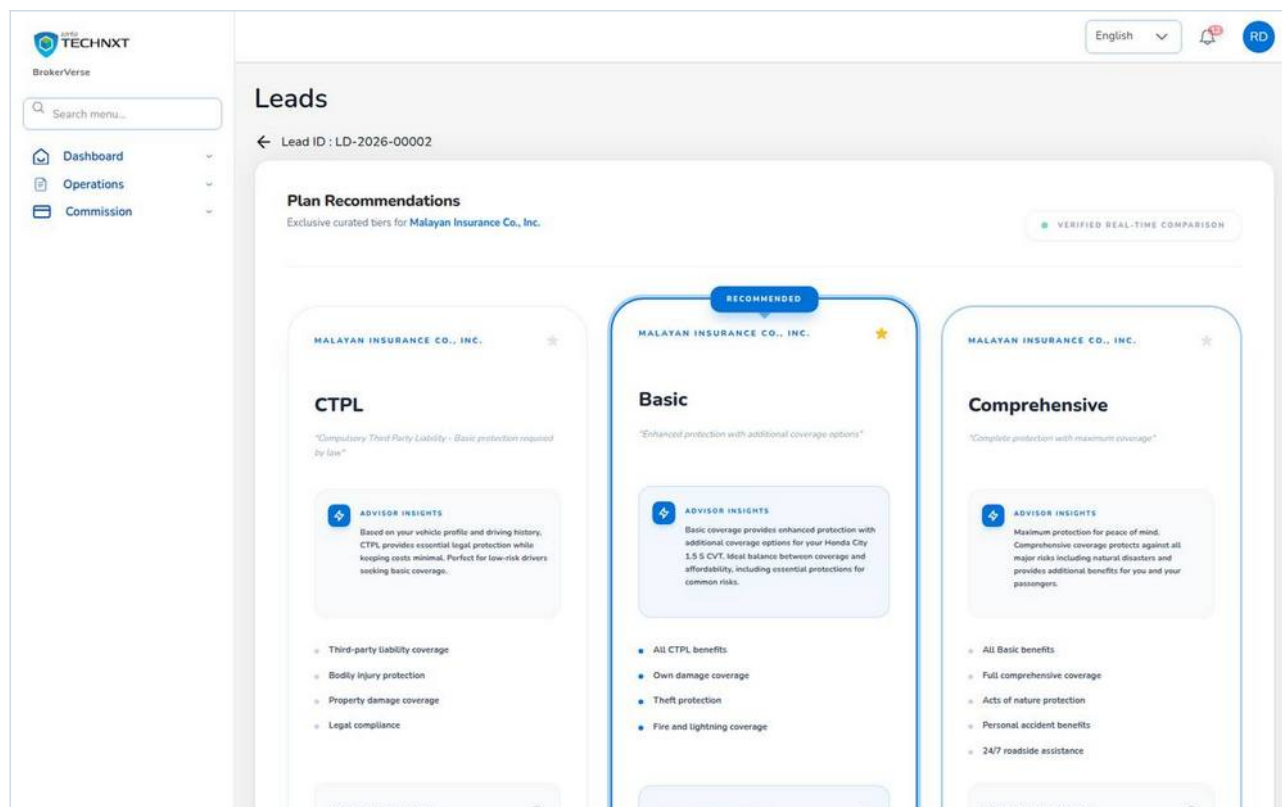

Figure 31. Create Quote, step 2: plan recommendations

The system shows three tiers for the chosen insurer: **CTPL**, **Basic** and **Comprehensive**. One tier is marked **RECOMMENDED**. The recommendation follows fixed rules on the vehicle class and policy type (for example, motorcycles get CTPL, public utility vehicles get Comprehensive). Select a plan or keep the recommended one, then select **Next**.

Note: The deductible and "estimated monthly" amounts on the plan cards are indicative only. The premium is calculated on the next step.

Calculate Override Back Next

Figure 32. Create Quote, step 3: coverage details after Calculate

Field	Meaning	Rules
Own Damage coverage	Sum insured for loss and damage to the vehicle (its market value).	Amount in pesos.
Own Damage coverage Rate	Rate in percent. Proposed from the motor tariff for the vehicle class.	Private cars 2%.
Own Damage coverage premium	Sum insured × rate.	Calculated.
Include CTPL	Adds Compulsory Third Party Liability at the Insurance Commission tariff for the vehicle class.	Read-only amount, inclusive of taxes and fees.
Brand-new vehicle: 3-year CTPL	For a brand-new vehicle registered for 3 years with LTO. Replaces the 1-year CTPL amount.	Offered only for classes with a 3-year tariff (private cars ₱ 1,660.40).
Include Acts of Nature Coverage	Adds acts of nature (typhoon, flood, earthquake) at the rate you enter.	Optional.

Field	Meaning	Rules
Include Roadside Assistance, Include Personal Accident Cover	Optional covers with their own rate and premium.	Optional.
Bodily Injury, Property Damage	Excess third-party liability limits and their premiums.	Choose from the list: ₱ 100,000 to ₱ 500,000 (quote.bodily_injury_limits, quote.property_damage_limits).
Auto Passenger PA - limit per person	Personal accident limit for each person in the vehicle.	₱ 25,000 to ₱ 200,000.
Seats covered	Driver and passengers, from Seating Capacity.	Read-only.
APPA Total Coverage, APPA Coverage Premium	Limit × seats, and total × 0.1%.	Read-only. Example: 50,000 × 5 = 250,000; premium 250.00.
Total Sum Insured	Own damage + bodily injury + property damage + APPA total.	Calculated.
Total Gross Premium	Net premium + VAT + DST + LGT + CTPL.	Calculated.

Select **Calculate** after every change. **Override** lets you type a cover premium by hand, for example the own damage premium the insurer quoted. CTPL and Auto Passenger PA are always priced by the system.

CTPL tariff by vehicle class (annual, inclusive of taxes and fees):

Vehicle class	CTPL 1 year (₱)	CTPL 3 years (₱)	Default seats
Private cars (including jeeps, AUVs and SUVs)	610.40	1,660.40	5
Light / medium trucks (own goods) not over 3,930 kg	660.40	–	3
Heavy trucks (own goods) and private buses over 3,930 kg	1,250.40	–	3
AC and tourist cars	790.40	–	5
Taxi, PUJ and mini bus	1,150.40	–	5
PUB and tourist bus	1,500.40	–	50
Motorcycles / tricycles / trailers	300.40	–	2

The tariff is maintained in **Product Configurator > Product Templates > MOT-003-2025 > CTPL & Auto PA** (Chapter 17).

Step 4: Accessories and policy limits

The screenshot shows the 'Create Quote' form in the BrokerVerse system. The left sidebar contains a navigation menu with options: Dashboard, Operations, Home, Leads/Prospects (selected), Clients, Quotation, Policy, Claims, Renewals, and Commission. The main content area is titled 'Leads' and shows a breadcrumb trail: Miguel Santiago / Lead ID : LD-2026-00002. The form is titled 'Create Quote' and is divided into two sections: 'Accessories' and 'Policy Limits'. The 'Accessories' section has four input fields: 'Aircon', 'Stereo', 'Mag wheels', and 'Others'. The 'Policy Limits' section has three input fields: 'Deductible' (with a value of 3000), 'Towing', and 'Repair Limit'. At the bottom right of the form, there are 'Back' and 'Next' buttons.

Figure 33. Create Quote, step 4: accessories and policy limits

Enter the declared value of accessories that are to be covered (**Aircon, Stereo, Mag wheels, Others**) and the policy limits: **Deductible, Towing** and **Repair Limit**. These values are recorded on the quotation. Leave a field empty if it does not apply.

Step 5: Order summary, discount and commission

The screenshot shows the 'Create Quote' interface for a lead named Miguel Santiago (Lead ID: LD-2026-00002). The interface is divided into a sidebar with navigation options (Dashboard, Operations, Home, Leads/Prospects, Clients, Quotation, Policy, Claims, Renewals, Commission) and a main content area. The main content area has a 'Leads' header and a 'Create Quote' section. The 'Order Summary' table lists various components of the quote, including NET Premium, Value Added Tax, Others (Acc. premium), Documentary Stamp Tax, Local Gov't Tax, CTPL (Insurance Commission tariff), Discount, Total Sum Insured, and Total Premium (Gross Premium). The 'Commission & Referral' section shows a 'COMMISSION & REFERRAL' summary with a 'PRIMARY' dropdown set to 'Ramon Dela Cruz' and a 'COMSUB' rate of 8%. It also displays a breakdown of the commission: BROKERAGE (P4,005.00), COMSUB (GROSS) (P1,780.00), DISCOUNT (P0.00), and MARGIN (P2,225.00). The 'Authorized Signature' field is set to 'Ana Patricia Lim'. The interface includes a 'Back' button and a 'Completed Quote' button.

Line	How it is calculated
NET Premium	Sum of the cover premiums, without CTPL.
Value Added Tax	12% of the net premium (tax.vat_rate).
Documentary Stamp Tax	12.5% of the net premium (tax.dst_rate).
Local Gov't Tax	0.75% of the net premium (tax.lgt_rate).
Others (Acc. premium)	Accessory premium, if any.
CTPL	Tariff amount, not taxed again and not discounted.
Discount	The discount you give the client.
Total Premium (Gross Premium)	Net + taxes + others + CTPL – discount.

Figure 34. Create Quote, step 5: order summary with commission and referral

The order summary shows the premium the client pays:

Line	How it is calculated
NET Premium	Sum of the cover premiums, without CTPL.
Value Added Tax	12% of the net premium (tax.vat_rate).
Documentary Stamp Tax	12.5% of the net premium (tax.dst_rate).
Local Gov't Tax	0.75% of the net premium (tax.lgt_rate).
Others (Acc. premium)	Accessory premium, if any.
CTPL	Tariff amount, not taxed again and not discounted.
Discount	The discount you give the client.
Total Premium (Gross Premium)	Net + taxes + others + CTPL – discount.

Example (QT-2026-00007): net 22,250.00 + VAT 2,670.00 + DST 2,781.25 + LGT 166.88 + CTPL 610.40 = gross ₪ 28,478.53.

To finish the order summary:

1. Optional: set **Discount (Optional)** with – and + (0% to 30%). The discount comes out of the broker's commission, not the referrer's share.
2. Under **COMMISSION & REFERRAL**, choose the primary referrer in the list, or keep **Direct — broker's own lead**. Choose the referrer level (L1 or L2). The comsub rate fills in from the commission rule (L1 8%, L2 5%) and you can adjust it.
3. Optional: select + **Add referrer (chain)** to add a second referrer who shares the commission.
4. Check the four boxes: **BROKERAGE** (the broker's income from the insurer, for example 18% of net), **COMSUB (GROSS)** (payable to the referrers), **DISCOUNT** and **MARGIN** (brokerage – comsub – discount).
5. Choose the **Authorized Signature** (from the Signatories master).
6. Select **Completed Quote**.

Withholding tax on the comsub is deducted when the commission is paid, at the referrer's rate (individual agents 5%). In the example the comsub of 1,780.00 gives a net payable of 1,691.00 after 89.00 withholding tax.

Important: The server calculates the premium again from the covers, the rates and the configured taxes when the quotation is saved. The amounts on the saved quotation are the ones that count.

6.5 Send the quotation to the client

Figure 35. Quotation detail of a draft, with Share and Send for Customer Approval

1. Open the quotation (**Operations > Quotation**, eye icon).
2. Check the policy, assured, vehicle, coverage and payment details.
3. Select **Send for Customer Approval**.

The system e-mails the client a secure approval link, valid for 7 days (`quotations.approval_link_ttl_hours`), sets the status to **Pending Customer** and notifies the underwriters (`quotations.approval_notify_roles`). The lead must have an e-mail address.

To send the quotation by other means, select **Share**:

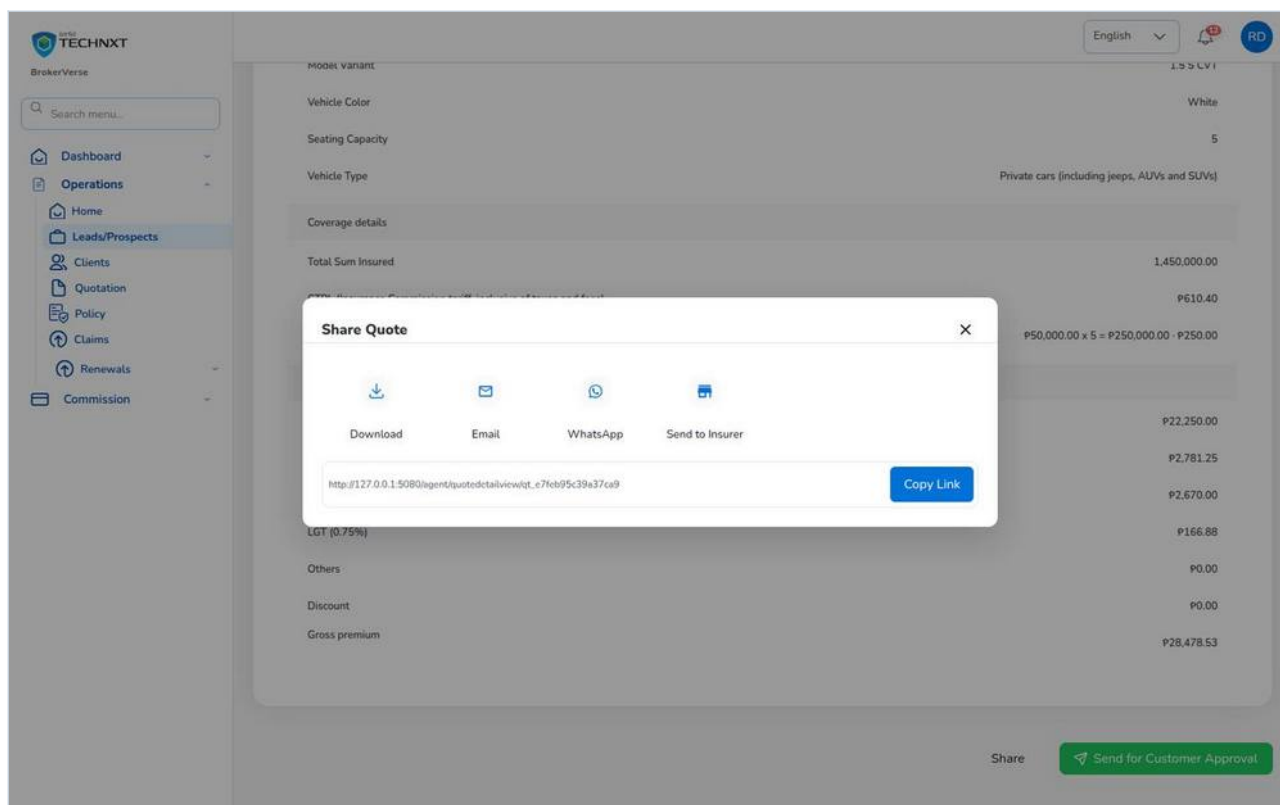

Figure 36. Share Quote: download, e-mail, WhatsApp, send to insurer or copy the link

Option	What it does
Download	Saves the quotation as a document.
Email	Opens an e-mail with the quotation for any recipient.
WhatsApp	Opens WhatsApp with the quotation link.
Send to Insurer	E-mails the quotation to the insurers you choose (placement e-mail from the Insurance Company master).
Copy Link	Copies the link of the quotation.

6.6 The client accepts the quotation

The client opens the link in the e-mail. No sign-in is needed. The page shows the quotation, customer, vehicle, coverage and premium breakdown. The client selects **Approve Quote**.

Approve Insurance Quote

Please review your quote details carefully before approving.

Figure 38. Quotation audit trail

6.8 Tips and common errors

- *The lead has no e-mail address; add one before sending the quotation:* edit the lead, add the e-mail, then send again.
- *Only Draft quotations can be sent for approval:* the quotation was already sent. Wait for the client or reopen it as Draft.
- *A ConvertedToPolicy quotation cannot be edited:* create an endorsement on the policy instead.
- CTPL shows "-": choose the **Vehicle Type** on step 1.
- The premium on the saved quotation differs from what you typed: the server priced it with the configured rates. Check the rates with the Business Administrator.

7 Policy issuance and servicing

7.1 Purpose

When the client accepts the quotation, you convert it into a policy. You record the client's identity (KYC), the vehicle identifiers and photos, choose how the premium is billed, upload the insurer's policy and record how the client pays. The system then issues the policy number POL-YYYY-NNNNN, creates the client (CL-), bills the premium and accrues the commission.

Who uses it: agents, sales and underwriters convert quotations; customer services and claims officers view policies; finance verifies payments.

7.2 Convert a quotation into a policy

1. Open the accepted quotation and select **Proceed to Policy**.
2. Complete **Customer Information** and select **Next**.
3. Upload the five vehicle photos and select **Next**.
4. Review the details, choose the **Billing** mode and select **Send to Insurance Company**. The policy is issued.
5. On **Upload Policy**, check the dates, upload the insurer's policy document and choose **Pay Later** or **Proceed to payment**.
6. If the client has paid, record the payment (see *Record the client's payment*).

The required fields come from `policy.kyc_required_fields`. The server refuses to issue a motor policy without them.

Vehicle photos

The screenshot displays the 'Convert Policy' interface in the BrokerVerse application. On the left is a sidebar with a search bar and a menu containing: Dashboard, Operations, Leads/Prospects (highlighted), Clients, Quotation, Policy, Claims, Renewals, and Commission. The main area is titled 'Leads' and shows the lead name 'Miguel Santiago / Lead ID: LD-2026-00002' and 'Quote ID: QT-2026-00006'. Below this is a section titled 'Convert Policy' with the sub-header 'Upload Vehicle Photos'. This section contains five upload areas, each with a 'Choose Files' button and a confirmation message: 'Photo uploaded successfully'. The areas are: Vehicle Left Side Photo, Vehicle Right Side Photo, Vehicle Front Photo, Vehicle Rear Photo, and Vehicle Interior Photo. At the bottom right of the upload section are 'Back' and 'Next' buttons.

Broker billed: the client pays the premium to the broker, who remits it to the insurer net of commission

Direct bill: the client pays the premium to the insurer; the broker raises a commission debit note to the insurer

Back

Send to Insurance Company

Figure 41. Coverage Details Review with the billing mode

The review page repeats the policy, assured, vehicle, photos, coverage and premium details. At the bottom, next to **Send to Insurance Company**, choose the **Billing** mode. The default comes from `direct_bill.default_billing_mode` (broker billed):

Billing mode	Meaning	What the system does
Broker billed (default)	The client pays the premium to the broker, who remits it to the insurer net of commission.	Premium bill INV- with its journal (Dr premium receivable / Cr premium payable to insurer and commission income) and a collection item.
Direct bill	The client pays the premium to the insurer. The broker bills its commission to the insurer with a debit note.	No premium bill. Journal Dr commission receivable – insurers / Cr commission income and output VAT. The commission appears in Direct Bill Processing.

Select **Send to Insurance Company**. The system issues the policy number, creates the client from the lead, sets the quotation to *Converted to Policy*, accrues the referrer's commission (status *Accrued*), e-mails the client that the policy was issued, and updates the dashboards and the Production Register.

Upload the insurer's policy

The screenshot shows the 'Upload Policy' form within the BrokerVerse interface. The left sidebar contains the 'TECHNXT BrokerVerse' logo and a navigation menu with 'Dashboard', 'Operations', and 'Commission'. The main header shows 'Leads' with a back arrow, 'Lead ID: LD-2026-00002', and 'Quote ID: QT-2026-00006'. The form itself is titled 'Upload Policy' and contains a table with the following data:

Participant Name	SI Currency	Premium Currency	Share %
Malayan Insurance Co., Inc.	PHP	PHP	100

Below the table, there are four input fields: 'Policy Number*' (POL-2026-00003), 'Insurance Company*' (Malayan Insurance Co., Inc.), 'Production*' (29/09/2026), and 'Inception*' (29/09/2026). Below these are two more fields: 'Issued Date*' (29/09/2026) and 'Expiry*' (29/09/2027). A section titled 'Upload Policy Document*' instructs the user to upload a policy document (PDF, PNG, JPG, or JPEG) with a maximum file size of 10MB. A 'Choose Files' button is provided. At the bottom right, there are three buttons: 'Back', 'Pay Later', and 'Proceed to payment'.

Figure 42. Upload Policy

1. Check **Policy Number**, **Insurance Company**, **Production**, **Inception**, **Issued Date** and **Expiry** (DD/MM/YYYY). The default term is 12 months.
2. Under **Upload Policy Document**, select **Choose Files** and choose the insurer's policy (PDF, PNG, JPG or JPEG, at most 10 MB).
3. Select **Pay Later** if the client has not paid yet, or **Proceed to payment** to record the payment now.

7.3 Record the client's payment

Only finance posts official receipts. Everyone else records how the client paid, and finance verifies it.

Files upload as soon as you choose them.

ⓘ The payment is recorded for finance to verify. The official receipt is issued once finance confirms it.

Cancel [Record payment](#)

Figure 43. Payment Confirmation: recording a bank transfer (example values)

1. Open the policy and select **Proceed to Payment** (or continue from Upload Policy).
2. Under **How does the client pay?**, choose **Pay later**, **Bank transfer**, **Cheque**, **Online payment** or **Cash**.
3. For a payment, fill in the reference (bank or transaction reference, or cheque number and bank), **Amount paid**, **Payment date**, **Remarks** and, if you have it, the proof of payment (deposit slip, cheque image or screenshot).
4. Select **Record payment** (or **Confirm pay later**).

With **Pay later** nothing is posted and the bill stays open.

The payment is saved as a capture waiting for verification; the policy payment status becomes **Reviewing** and finance receives the notification *Premium payment to verify*. The bill stays open until finance confirms.

Finance: verify a captured payment

1. Open the notification *Premium payment to verify*, or open the policy and select **Proceed to Payment**.
2. Check the reference, amount and date against the bank statement.
3. Select **Confirm**. The system posts the official receipt OR- (Dr cash in bank / Cr premium receivable), marks the bill Paid or Partial and closes the collection item when fully paid.
4. If the money has not arrived, select **Reject** and give the reason, for example *no matching credit in the bank statement*. The bill stays open.

Finance users see the button **Record payment and issue receipt** and can post the receipt directly.

Direct-bill policies

For a direct-bill policy the payment page shows that the client pays the insurer directly and that the commission (with VAT) is billed to the insurer by finance. There is nothing to record. The policy details page shows a *Direct bill* note instead of a payment request, and **Operations > Payments** lists the cancelled premium bill with the status **DIRECT BILL**.

The screenshot displays the 'Payment Confirmation' page for a client named Miguel Santiago (Client ID: CL-2026-00002). The page is titled 'Payment Confirmation' and shows a table of payment details. The table includes the following items:

Item	Amount
NET Premium	P22,810.00
DST	P2,851.25
VAT	P2,737.20
LGT	P171.08
Others	P0.00
Discount	- P0.00
Gross premium	P28,569.53

The page also shows a status 'POL-2026-00003 · Pending' and a note 'How does the client pay? Outstanding P0.00'. A blue box contains the following text:

Direct bill: the client pays the premium directly to the insurer. No premium is collected by the broker; our commission of P4,598.50 (with VAT) is billed to the insurer by finance (Remittance > Direct Bill Processing).

Figure 44. Payment page of a direct-bill policy

7.4 The policy list

The screenshot shows the 'Policies' page in the BrokerVerse application. The left sidebar contains a navigation menu with 'Operations' expanded and 'Policy' selected. The main content area has a 'Policies' header with 'Home · Policy' breadcrumb. Below the header is a search bar and a 'Policy Number' dropdown. A 'Show Filters' link is visible. The table below lists five policies with their details and payment status.

Policy Number	Client Id	Client Name	Gross Premium	Policy Issued	Policy Expiry	Product Description	Payment	Actions
POL-2026-00003	CL-2026-00002	MIGUEL SANTIAGO	P28,569.53	29/09/2026	29/09/2027	MOTOR	Pending	→ ...

At the bottom right of the table, it says 'Rows per page: 5' and '1 - 5 of 31'.

Figure 45. Operations > Policy

Choose **Operations > Policy**. The list shows the policy number, client code and name, gross premium, issue and expiry dates, product and payment status. Use **Search** with the field selector, or **Show Filters** for payment status, dates, insurer, premium and product. **Create Policy** (which opens Leads, where a policy is issued from a lead's quotation) and **Bulk Upload** are shown only to roles that may use them.

Row actions:

- The arrow opens the policy details.
- The three dots (...) open **Claim**, **Endorsement** and **Reminder**. They are disabled while the payment is Pending or Reviewing. **Endorsement** is not offered for expired, lapsed, cancelled or renewed policies.

Showing 1 to 10 of 16 entries

Figure 49. Premium accounting entries of POL-2026-00001

7.6 Policy and payment statuses

Policy status	Meaning
Active	In force.
Expired	Past its expiry date (the Policy expiry job runs every night at 00:15).
Renewed	Replaced by a new term.
Lapsed	Not renewed within the 30-day grace period.
Cancelled	Cancelled by endorsement.

Payment status	Meaning
Pending	Premium due, nothing received.
Reviewing	A payment was recorded and is waiting for finance to verify it.
Partial	Part of the premium was receipted.
Completed	Fully paid.
Refunded	Premium returned to the client.

7.7 Tips and common errors

- *Issuance refused: ID type, ID number, ID image, chassis, motor and plate or MV file number are required: go back to Customer Information and complete them.*

- The **Claim** and **Endorsement** actions are greyed out: the premium is still Pending or Reviewing.
- A payment you recorded does not show as paid: finance has not confirmed it yet.

8 Endorsements

8.1 Purpose

An endorsement changes an issued policy: the client's details, the vehicle, the cover, the period, or cancels the policy. The system records the change with a number END-YYYY-NNNNN, sends it to the insurer, and bills any additional premium. A change of cover is priced again with the configured rates.

Who uses it: customer services mainly; agents and sales for their own policies. Finance receipts the additional premium.

8.2 Endorsement types

Line	Type	What you can change
Motor	Personal Details Change	Name, preferred name, contact number and address of the insured.
Motor	Motor Details Change	Vehicle details and identifiers.
Motor	Coverage Change	Own damage sum insured and rate, acts of nature, bodily injury, property damage, Auto Passenger PA limit. The premium is recalculated.
Motor	Policy Extend	The policy period.
Motor	Policy Cancel	Cancels the policy.
Fire and Allied Perils	Regular / Premium Change	Risk, cover or premium (sum insured, address, VAT).
Fire and Allied Perils	Policy Cancellation	Full, partial, pro-rata or pro-rata partial cancellation.

8.3 Raise an endorsement

1. Choose **Operations > Policy** (or open the client and use the **Policy** tab).
2. On the policy row, select ..., then **Endorsement**.
3. Tick one or more endorsement types. **Proceed** stays disabled until you tick one.
4. Select **Proceed**. The **Endorsement Request** page opens with one section per type you ticked.
5. Enter the changes (see the sections below).
6. Select **Save & Next**. The system saves the endorsement and opens its summary.
7. Check the summary and select **Send to Insurance Company**. Confirm when asked.

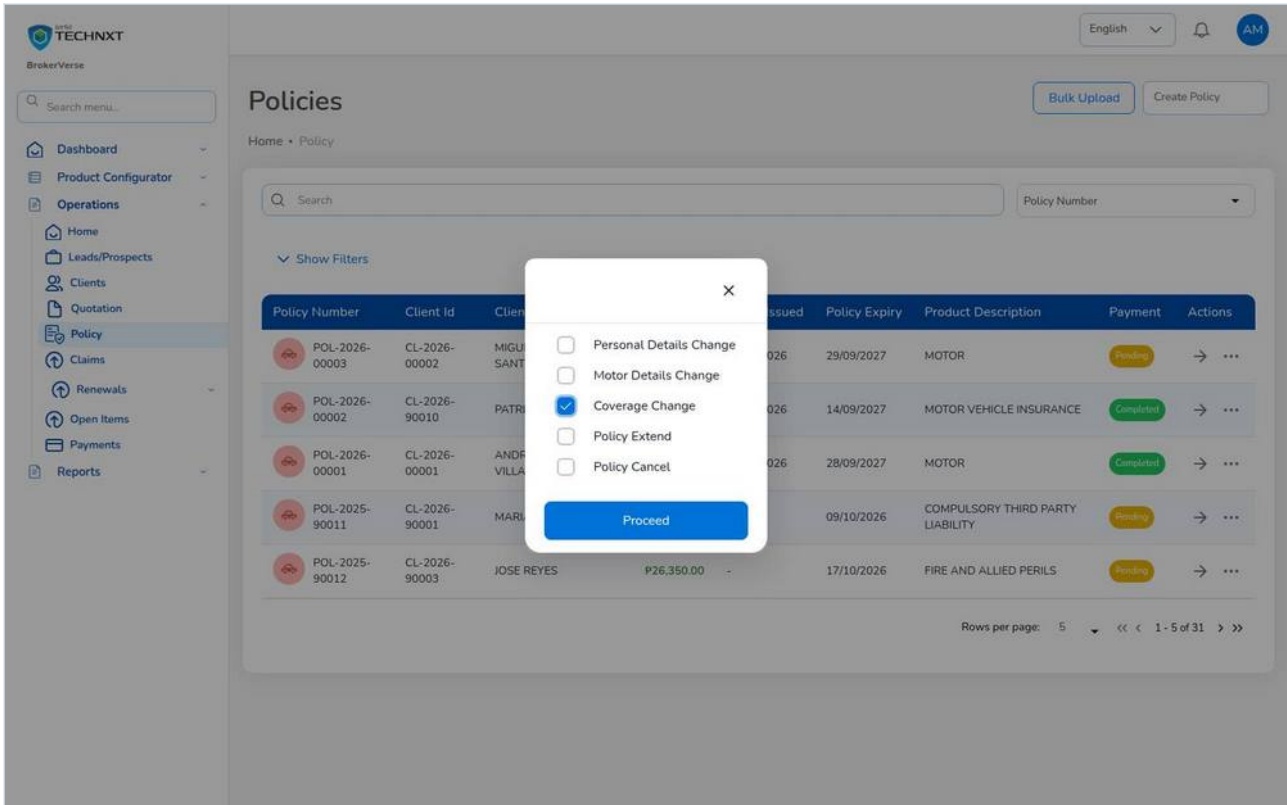

Figure 50. Choosing the endorsement type

Endorsement is offered only for policies in force whose premium is not Pending or Reviewing.

Personal details change

The screenshot shows the 'Endorsement Request' form for 'Personal Details Change' in the BrokerVerse system. The form is titled 'Clients' and shows the client's name 'Andrea Villanueva' and ID 'CL-2026-00001'. The form fields are as follows:

Endorsement Request	
Personal Details Change	
First name Andrea	Last name Villanueva
Preferred name Andrea Villanueva	Contact number 9171234567
House no. street 45 Ayala Avenue, Unit 1203	Barangay subd Bel-Air
Country Philippines	Province Metro Manila
City Makati	Zip code 1209

A 'Save & Next' button is located at the bottom right of the form.

Figure 51. Endorsement request: personal details change

The form opens with the client's current details (including earlier endorsements). Correct the fields that changed: **First name**, **Last name**, **Preferred name**, **Contact number**, **House no. street**, **Barangay subd**, **Country**, **Province**, **City** and **Zip code**. The contact number must be a valid Philippine mobile number and the ZIP code must have 4 digits. When the endorsement is completed, the client record is updated.

Endorsement Request

Coverage change

Own damage coverage 1400000	
Own damage coverage rate 2	Own damage coverage premium 28,000.00
Acts of nature rate	Acts of nature premium 0.00
CTPL premium (as issued)	
Bodily injury 200,000	Bodily injury coverage premium 2,000.00
Property damage 200,000	Property damage coverage premium 2,000.00
Auto passenger personal accident 50,000	
Appa total coverage 1000	APPA coverage premium 5.00
Total Sum Insured	1,601,000
Net premium 32,005	Value Added Tax (12%) 3,360.6
Others(Acc. premium)	Documentary Stamp Tax (12.5%) 3,500.63
Local Gov't Tax (0.75%) 210.04	Discount
Others	Gross premium 40,086.27
Premium change	

Figure 52. Endorsement request: coverage change re-priced

1. Change the cover, for example **Own damage coverage** from 1,200,000 to 1,400,000, or a higher **Auto passenger personal accident** limit. Bodily injury and property damage offer the same limits as the quotation.
2. The premium boxes recalculate: net premium, VAT (12%), DST (12.5%), LGT (0.75%), gross premium and **Premium change**.
3. CTPL stays as issued (**CTPL premium (as issued)**).

Example: END-2026-00003 raised own damage on POL-2026-00001 to 1,400,000. The gross premium became 40,086.27 and the premium change was +5,010.00. The system billed it as INV-2026-00002 (journal Dr premium receivable 5,010.00 / Cr payable to insurer 4,410.00 and commission income 600.00) and added a collection item. The server checks the premium change against its own calculation.

8.4 After sending to the insurer

1. The endorsement waits for the insurer (**Waiting for Update**).
2. When the insurer has issued its endorsement, select **Proceed** and upload the insurer's endorsement document with the endorsement number and dates. Select **Complete**.
3. The system applies the change to the policy and the client, and notifies the policy owner.
4. If there is additional premium, the endorsement view shows *Additional premium is due: proceed to payment*. Select **Proceed to payment** and record the client's payment as for a policy (Chapter 7). A return premium is refunded by finance with a client refund voucher.

The screenshot shows the 'Clients' section of the BrokerVerse interface. The left sidebar contains a search bar and a menu with items: Dashboard, Product Configurator, Operations, Home, Leads/Prospects, Clients (highlighted), Quotation, Policy, Claims, Renewals, Open Items, Payments, and Reports. The main content area is titled 'Clients' and shows a breadcrumb 'Client / Client ID : end_8bad81c846a64eac'. Below this is the 'Endorsement' form. The form has a 'Personal Details Change' section with fields for Policy Number (POL-2026-00001), Endorsement Number (END-2026-00003), Production (28/09/2026), Inception (28/09/2026), Issued Date (28/09/2026), Expiry (28/09/2027), and Premium change (+P5,010.00). A message 'Additional premium is due: proceed to payment.' is displayed. Below the form is a 'Document' section with a link to 'Endorsement Slip' and a 'View' button. A 'Proceed to payment' button is located at the bottom right of the form.

Figure 53. A completed endorsement with additional premium due

The client's **Endorsement** tab lists all endorsements with their status and payment status.

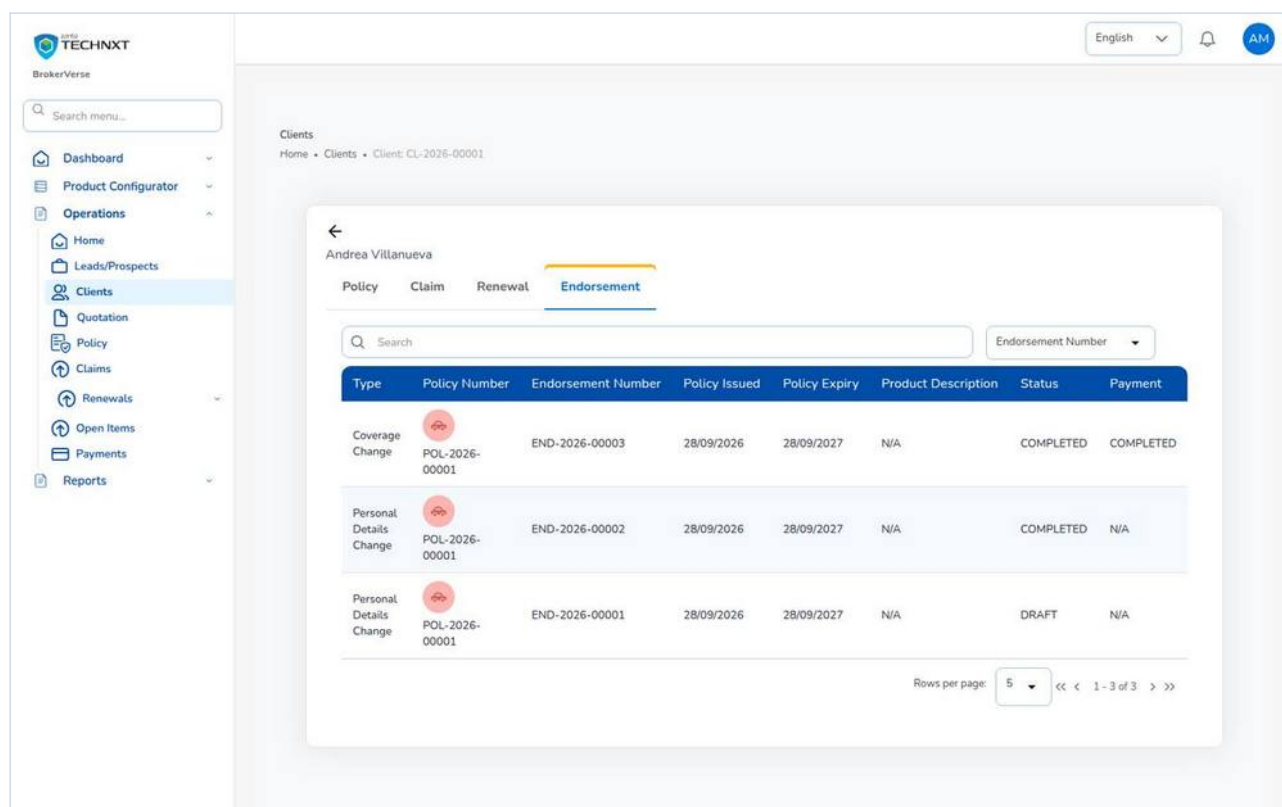

Figure 54. Client view: Endorsement tab

8.5 Endorsement statuses

Status	Meaning
Draft	Saved, not yet sent.
Pending Customer	Sent to the insurer and the client; waiting for the insurer's endorsement.
Completed	The change is applied to the policy.
Initiate Cancel / Cancelled	A cancellation in progress / done.
Rejected	Refused by the insurer.

8.6 Tips and common errors

- If the premium did not change, check that you changed a cover that is priced (a sum insured or a limit), then look at **Premium change**.
- Endorsement is not offered on an expired policy. Renew the policy instead (Chapter 10).
- A direct-bill policy's additional premium is billed to the insurer as commission, not to the client.

9 Claims

9.1 Purpose

The claims module records a loss under a policy, follows it with the insurer and the adjuster, and settles it. A settlement needs a second claims officer to approve it. Each claim gets a number CLM-YYYY-NNNNN.

Who uses it: claims officers (carlo.claims as maker, lisa.claims2 as checker). Agents can raise a claim notice on their own policies. Reinsurance recoveries are in Chapter 15.

9.2 The claims list

Claim Number	Client Name	Policy Number	Policy Issued	Product Description	Status	Actions
CLM-2026-00002	Andrea Villanueva	POL-2026-00001	28/09/2026	MOTOR	SETTLED	Information, Eye, History
CLM-2026-00001	Andrea Villanueva	POL-2026-00001	28/09/2026	MOTOR	PENDING	Information, Eye, History
CLM-2026-90002	Jose Reyes	POL-2026-90003	01/05/2026	MOTOR	PENDING	Information, Eye, History
CLM-2026-90001	Maria Santos	POL-2026-90001	21/01/2026	MOTOR	PENDING	Information, Eye, History
CLM-2026-90003	Mindanao Agri Trading Inc.	POL-2026-90005	31/05/2026	MARINE	PENDING	Information, Eye, History

Figure 55. Operations > Claims

Choose **Operations > Claims**. Each row shows the claim number, client, policy, issue date, product and status. The three icons at the end of the row are:

Icon	Opens
Information	Claim Details: all the data of the claim.
Eye	The next step for the claim's status: <i>Waiting for Update</i> for a Pending or Processing claim, <i>Waiting for Settlement</i> for a claim Pending Approval, the documents for a settled claim.
History	Claim Audit Trail.

9.3 Claim statuses

Status	Meaning	Next step
Pending	Registered; the Preliminary Loss Advice was sent to the insurer.	Proceed when the insurer assigns an adjuster
Processing	Adjuster details and documents are being gathered.	Submit the settlement
Pending Approval	Settlement submitted; waiting for a second claims officer.	Approve or return
Approved	Settlement approved.	Settled automatically (<code>claims.auto_settle_on_approval</code>)
Settled	Settlement released.	Close
Rejected	Refused by the insurer.	—
Closed	File closed.	—

9.4 Register a claim

1. Choose **Operations > Policy**, select ... on the policy row, then **Claim**. You can also select **Claim** on the policy details page.
2. Check the insurer, policy and policy holder (filled from the policy and the client record).
3. Fill in the **Incident Details** and the driver (see the table).
4. Fill in **Third Party Details (If Applicable)**.
5. Select **Next**, attach the documents, then select **Send**.

House No / Unit No / Street

Third Party Details (If Applicable)

Name

Contact Number

Figure 56. Claim Request

Field	Meaning	Required	Rules
Insurance Company Name	Insurer of the policy.	Yes	From the policy.
Date of Incident	Date of loss.	Yes	Not in the future; inside the policy period. The reported date cannot be before it.
Time of Incident	Time of loss.	No	
Address of Incident / Loss Location	Where the loss happened.	Yes	
City, Province	Place of loss.	No	

Field	Meaning	Required	Rules
Type of Incident / Cause of Loss	Collision, theft, fire, flood and so on.	Yes	
Estimated Claim Amount	First estimate of the loss.	No	Pesos.
Insurance Company Claim Number	The insurer's claim reference, when known.	No	
Same as Policy Holder	Tick when the insured was driving; copies the holder's address.	No	
Driver's name and address	Person driving at the time of loss.	Name yes	
Third Party Details	Name, contact number, plate number, unit, shop and insurer of the other party.	No	
Documents	Police report, photos, estimates.	No	PNG, JPEG or PDF, at most 2 MB each. The file content is checked, not only its name.

The system checks the claim before saving it:

- *Date of loss ... is outside the policy period ...*: the loss date is before inception or after expiry. The claim is refused.
- The claim is refused while the policy premium is unpaid (`claims.block_unpaid_premium`).

When the claim is registered, the system issues the claim number, sets the status to **Pending**, e-mails the Preliminary Loss Advice to the insurer's claims e-mail (`claims.pla_enabled`) and notifies every claims officer and the policy owner. The Claims Dashboard and the Claims Position report include it at once.

9.5 Follow the claim with the insurer

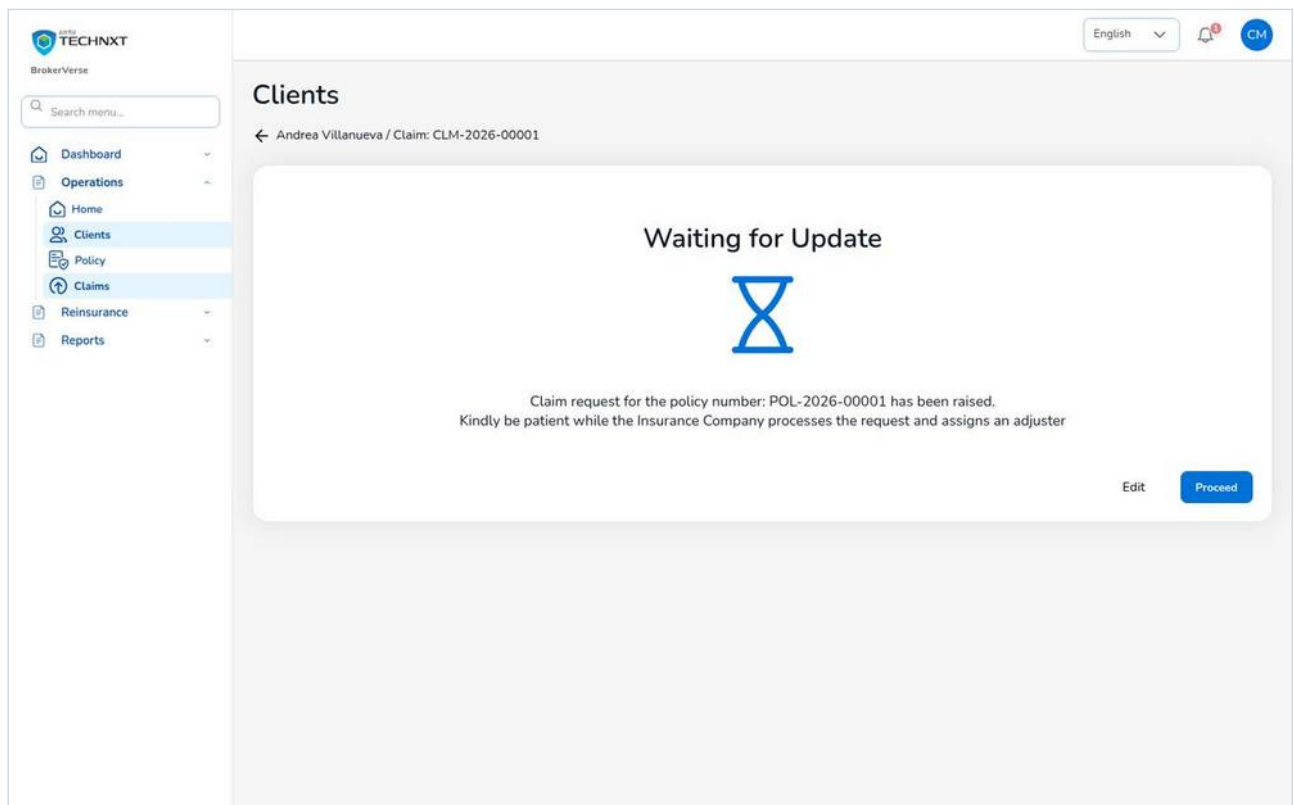

Figure 57. *Waiting for Update: the claim is with the insurer*

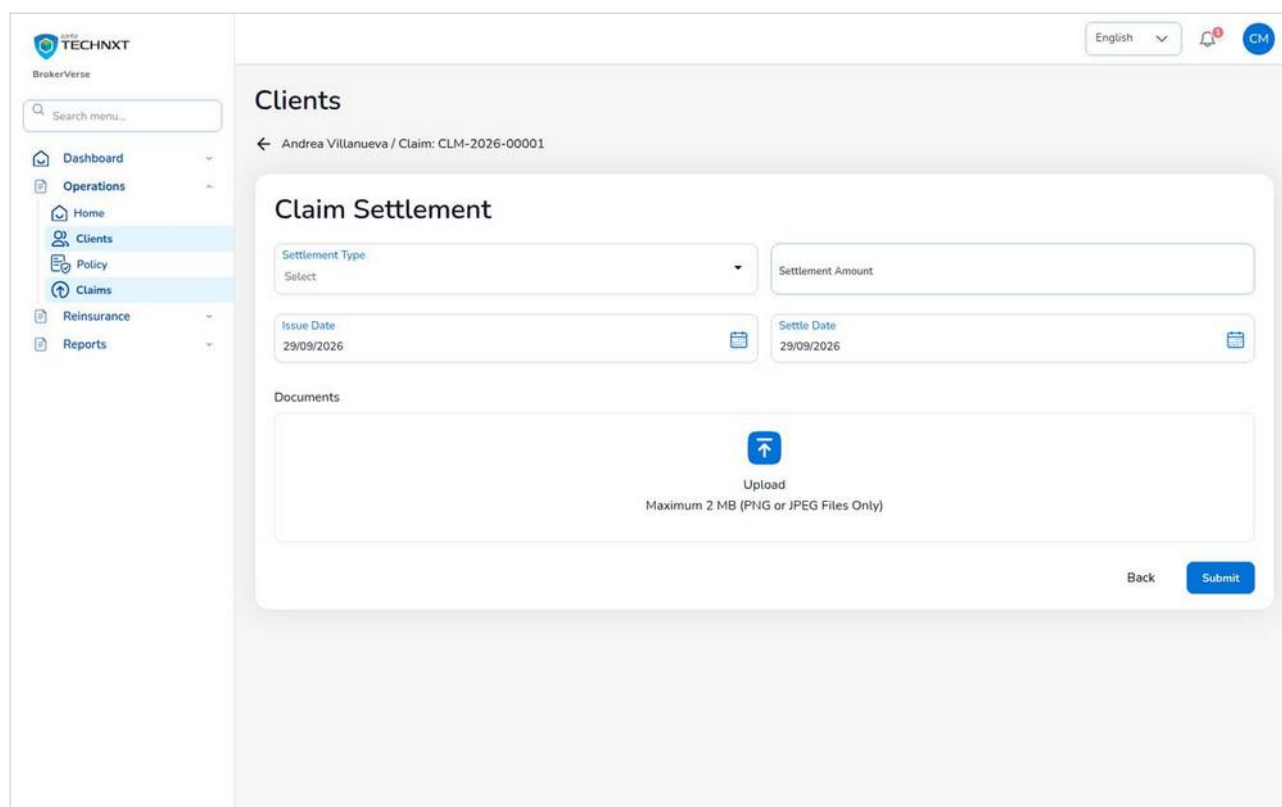

1. Open the claim with the eye icon. The page shows **Waiting for Update**.
2. Select **Edit** to correct the claim request, or **Proceed** when the insurer has assigned an adjuster.
3. On the adjuster page, enter the **Adjuster Name**, the **Insurance Company Claim Number**, the dates, place of accident, driver and address, third party details and upload the proof of documents (PNG, JPEG or PDF, at most 2 MB).
4. Select **Next**. The status becomes **Processing**.

The screenshot shows the 'Claim Request' form in the BrokerVerse application. The left sidebar contains a navigation menu with options: Dashboard, Operations, Home, Clients, Policy, Claims, Reinsurance, and Reports. The 'Claims' option is currently selected. The main content area is titled 'Clients' and shows the client's name 'Andrea Villanueva / Claim: CLM-2026-00001'. Below this, the 'Claim Request' form is displayed. The form has two columns of input fields. The first column includes: Adjuster Name*, Insurance Company Claim Number, Date of Loss* (28/09/2026), Driver's name* (Andrea Villanueva), Barangay / Subd* (San Lorenzo), Province* (Metro Manila), and ZIP Code* (1226). The second column includes: Claim Number* (CLM-2026-00001), Date of Reported* (29/09/2026), Place of Accident* (12 Amorsolo St.), House No / Unit No / Street* (12 Amorsolo St.), Country* (Philippines), and City* (Makati). Below these fields is a section for 'Third Party Details (If Applicable)' with fields for Name, Contact Number, Plate Number, Unit, Shop, and Insurance Company Name (MAPFRE Insurance Corporation). At the bottom of the form is a section for 'Proof of Documents'.

Figure 58. Adjuster details

9.6 Settle the claim (maker)

1. Open the claim and continue to **Claim Settlement**.
2. Choose the **Settlement Type** (Cash, Card or Cheque), enter the **Settlement Amount**, the **Issue Date** and the **Settle Date**, and upload the settlement documents (PNG or JPEG, at most 2 MB).
3. Select **Submit**.

The screenshot shows the 'Claim Settlement' form within the BrokerVerse application. The left sidebar contains a navigation menu with options: Dashboard, Operations, Home, Clients, Policy, Claims, Reinsurance, and Reports. The 'Claims' option is currently selected. The main content area is titled 'Clients' and shows a breadcrumb trail: 'Andrea Villanueva / Claim: CLM-2026-00001'. Below this, the 'Claim Settlement' form is displayed. It includes a 'Settlement Type' dropdown menu (currently set to 'Select'), a 'Settlement Amount' input field, an 'Issue Date' field (set to 29/09/2026), and a 'Settle Date' field (set to 29/09/2026). There is a 'Documents' section with an 'Upload' button and a note: 'Maximum 2 MB (PNG or JPEG Files Only)'. At the bottom right of the form are 'Back' and 'Submit' buttons.

Figure 59. Claim Settlement form

The system checks that the type, amount (greater than zero) and dates are given. The claim goes to **Pending Approval**; the message says *A second claims user must approve it before the claim is settled*. The other claims officers are notified.

9.7 Approve the settlement (checker)

1. Open the notification, or choose **Operations > Claims** and select the eye icon of the claim in **Pending Approval**.
2. The page shows **Waiting for Settlement**. Check the claim details and the settlement.
3. Select **Approve Settlement**, or **Return** to send it back to the maker.

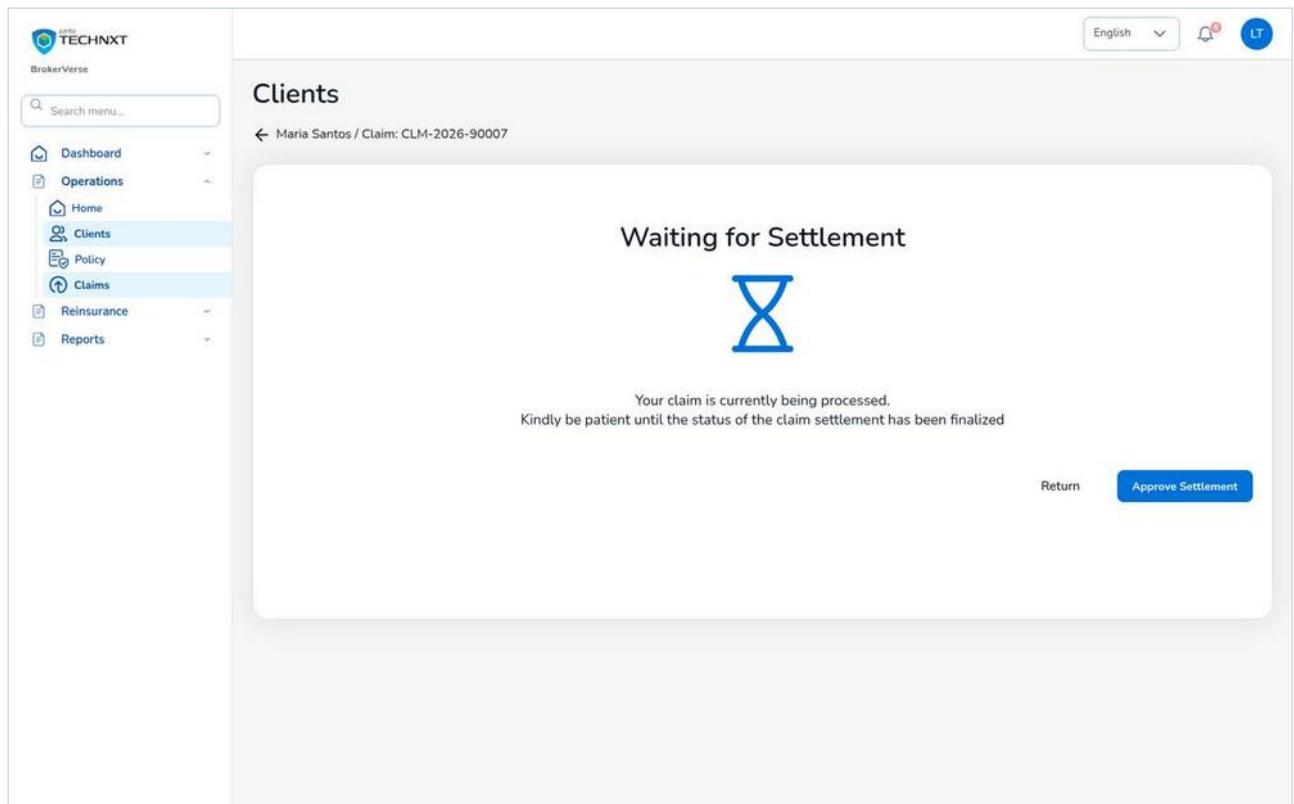

Figure 60. *Waiting for Settlement: the checker's view*

The maker cannot approve his or her own settlement; the system refuses it. After approval the claim is **Settled** (example: CLM-2026-00002, estimate 85,000, settled 78,500), the maker is notified and the dashboard and reports are updated.

9.8 Claim details, documents and audit trail

Figure 61. Claim Details

Claim Details shows the claim, incident, driver, policy, third party and system information, including the insurer's claim number and the claim due date (20 days after reporting, `claims.sla_days`).

For a settled claim the eye icon opens **Claim Settlement** with the documents the system produces: Acknowledgment letter, Claims Discharge Voucher, Claims Data sheet and the FIR (first information report). Select **View** to open each one. The claim pages always show the claim number and holder in their header, even when opened directly by address.

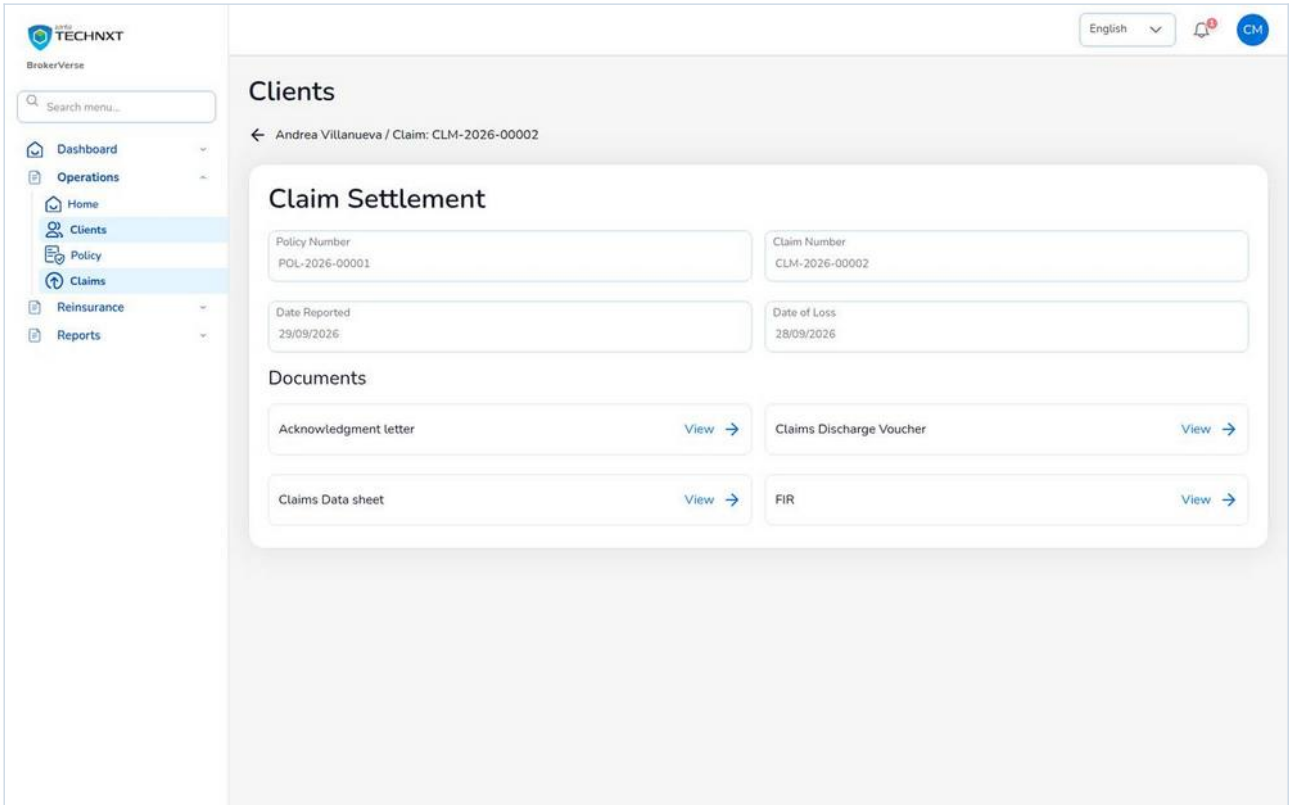

Figure 62. Claim documents

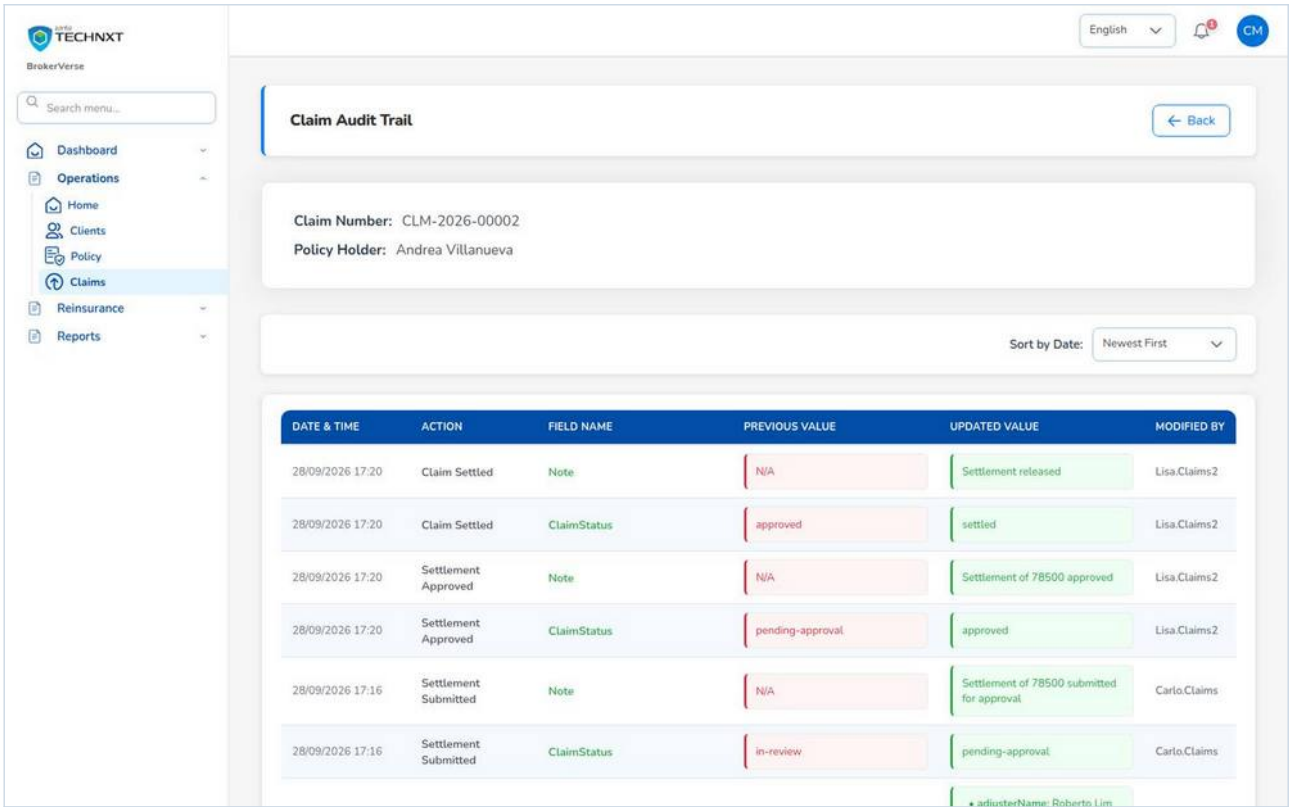

Figure 63. Claim Audit Trail: every status change with the user and time

10 Renewals

10.1 Purpose

Renewals keep the book. The system puts every policy into the renewal pipeline 90 days before expiry, sends renewal notices at 60, 30 and 15 days, prices the renewal and turns the accepted renewal quotation into the next policy term. A policy not renewed within 30 days after expiry lapses.

Who uses it: underwriters, sales and customer services work the renewals; agents renew their own expiring policies from **Renewal Policy** (the only Renewals screen in the agent menu); the schedules run the notices every day.

Menu (Operations > Renewals)	Use it to
Renewal Policy	See active, expiring (0–5 days) and expired policies and start a renewal.
Renewal Batch	Group many policies and send their notices together.
Renewal Queue	Work the policies due for renewal: days to expiry, status, risk, agent, attempts.
Retention Analytics	Renewed, lapsed and open renewals, retention rate and trends.
At-Risk Policies	Policies with a high retention risk score and the recommended actions.
Negotiations	Record contacts and updates with the client and request approval of terms.
Lapse Management	Lapsed policies and policies in the grace period; win-back campaigns.
Performance	Renewal rate, premium retention and cycle time against target.

10.2 Renewal timetable

When	What happens	Setting
90 days before expiry	The policy enters the renewal pipeline (status Pending).	<code>renewals.pipeline_days</code>
60, 30 and 15 days before expiry	First, second and final notice e-mailed to the client; the owner is notified. Notices go out in order.	<code>limits.renewal_notice_days</code> , <code>renewals.enforce_notice_order</code>
Expiry date	The policy becomes Expired (night job at 00:15).	–
30 days after expiry	An unrenewed policy lapses.	<code>renewals.grace_period_days</code>
Up to 90 days after lapse	A lapsed renewal can be reinstated.	<code>renewals.reinstatement_days</code>

10.3 Renew a policy

1. Choose **Operations > Renewals > Renewal Policy**.
2. On the policy row, select **...**, then **Renewal**.
3. The renewal quotation opens, linked to the expiring policy, the client and the insurer. The covers of the expiring term are filled in and the own damage rate comes from the motor tariff.
4. Check the coverage, select **Calculate**, then **Next**.
5. Check accessories and the order summary (taxes, discount, commission), then select **Completed Quote**. A quotation QT- linked to the policy is saved.
6. Send it for customer approval (Chapter 6). When the client accepts, select **Proceed to Policy** and complete KYC and the vehicle identifiers of the new term (they are taken from the expiring policy when available).

Expired & Expiring Policies

Home • Expired Policies

Active Policies: 27 (More than 5 days until expiry)

Expiring Soon: 0 (0-5 days until expiry)

Expired Policies: 4 (Past expiry date)

Policy Number	Client Id	Client Name	Gross Premium	Policy Issued	Policy Expiry	Product Description	Actions
POL-2025-90022	CL-2026-90009	CARLO BAUTISTA	P11,200.00	-	08/08/2026 EXPIRED	FIRE AND ALLIED PERILS	→ ...

POL-2025-90021	CL-2026-90010	PATRICIA GARCIA	P40,300.00	-	13/09/2026 EXPIRED	MOTOR VEHICLE INSURANCE	→ ...

Rows per page: 5 | 1 - 4 of 4

Figure 64. Renewal Policy: expired and expiring policies

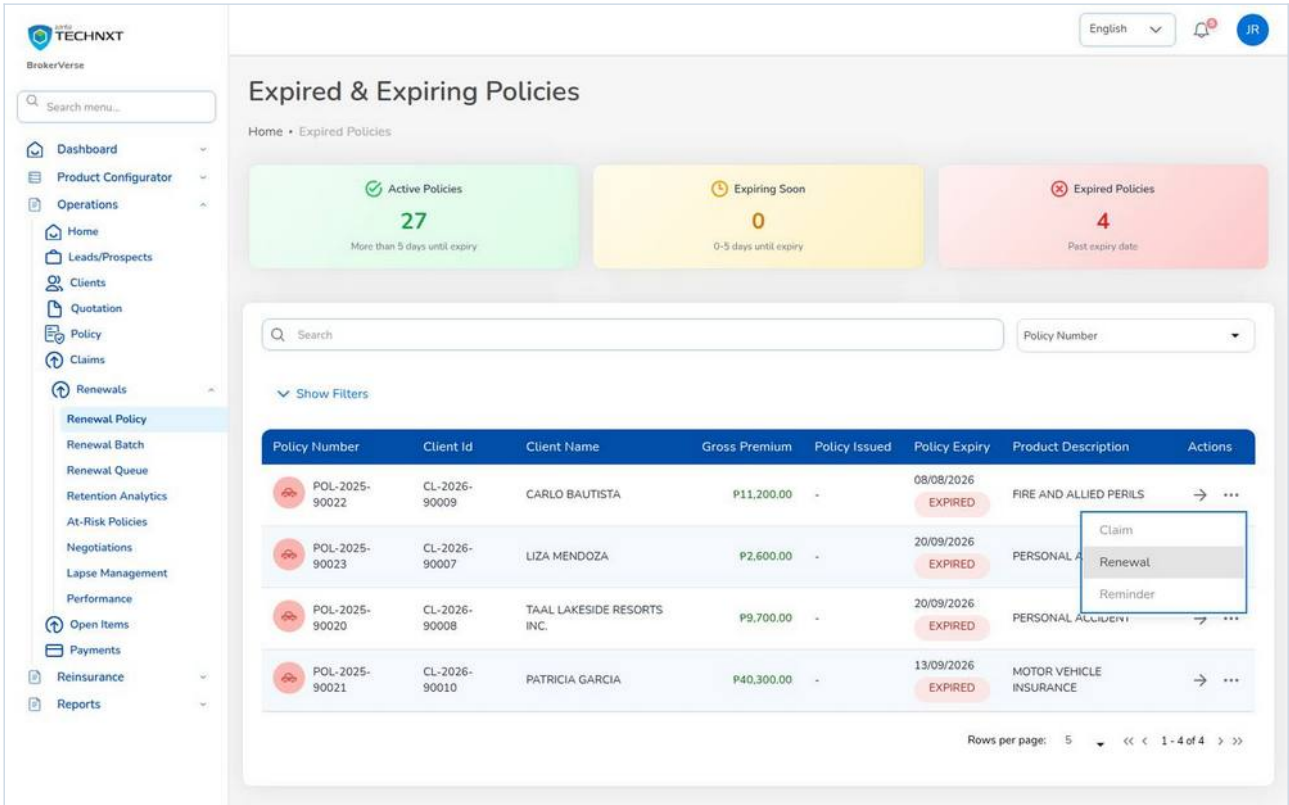

Figure 65. Row actions on an expired policy: Claim, Renewal, Reminder

The system issues the new term (for example POL-2026-00002, 14/09/2026 to 14/09/2027), marks the old policy **Renewed**, bills the premium and accrues the commission to the original referrer.

Renewal terms are maker-checker (`renewals.maker_checker`): the underwriter is notified to approve renewal terms submitted from the renewal workspace.

10.4 Renewal queue and follow-up

Renewal Queue

> Renewals > Queue Management

Policy/Insured Name: Status: Risk Level: Agent: Expiry Date Range:

12 Total Policies | 4 Due Soon (30 days) | 2 At Risk | 1 In Grace Period

Policies Due for Renewal

Policy Number	Insured Name	Product	Insurer	Days to Expiry	Premium	Status	Risk	Agent	Attempts
POL-2025-90020	Taal Lakeside Resorts Inc.	Personal Accident	FPG Insurance Co., Inc.	9 days overdue	P9,700.00	In Grace Period	Low	BA BrokerVerse Administrator	5/5
POL-2025-90019	Ramon Dela Cruz	Motor Vehicle Insurance	Mercantile Insurance Co., Inc.	6 days	P23,560.00	Final Notice Sent	Low	BA BrokerVerse Administrator	3/3
POL-2025-90011	Maria Santos	Compulsory Third Party Liability	MAPFRE Insurance Corporation	10 days	P1,650.00	Pending	Medium	BA BrokerVerse Administrator	0/5
POL-2025-90012	Jose Reyes	Fire and Allied Perils	Malayan Insurance Co., Inc.	18 days	P26,350.00	First Notice Sent	Medium	BA BrokerVerse Administrator	0/5
POL-2025-90013	Andrea Villanueva	Personal Accident	Pioneer Insurance & Surety	26 days	P4,850.00	Second Notice Sent	Low	BA BrokerVerse Administrator	5/5

Figure 66. Renewal Queue

The queue lists the policies due for renewal with days to expiry (red when overdue), premium, renewal status (First Notice Sent, Second Notice Sent, Final Notice Sent, Quote Sent, Pending Approval, Approved, Renewed, Lapsed), risk level and the number of contact attempts. Filter by status, risk level, agent or expiry dates.

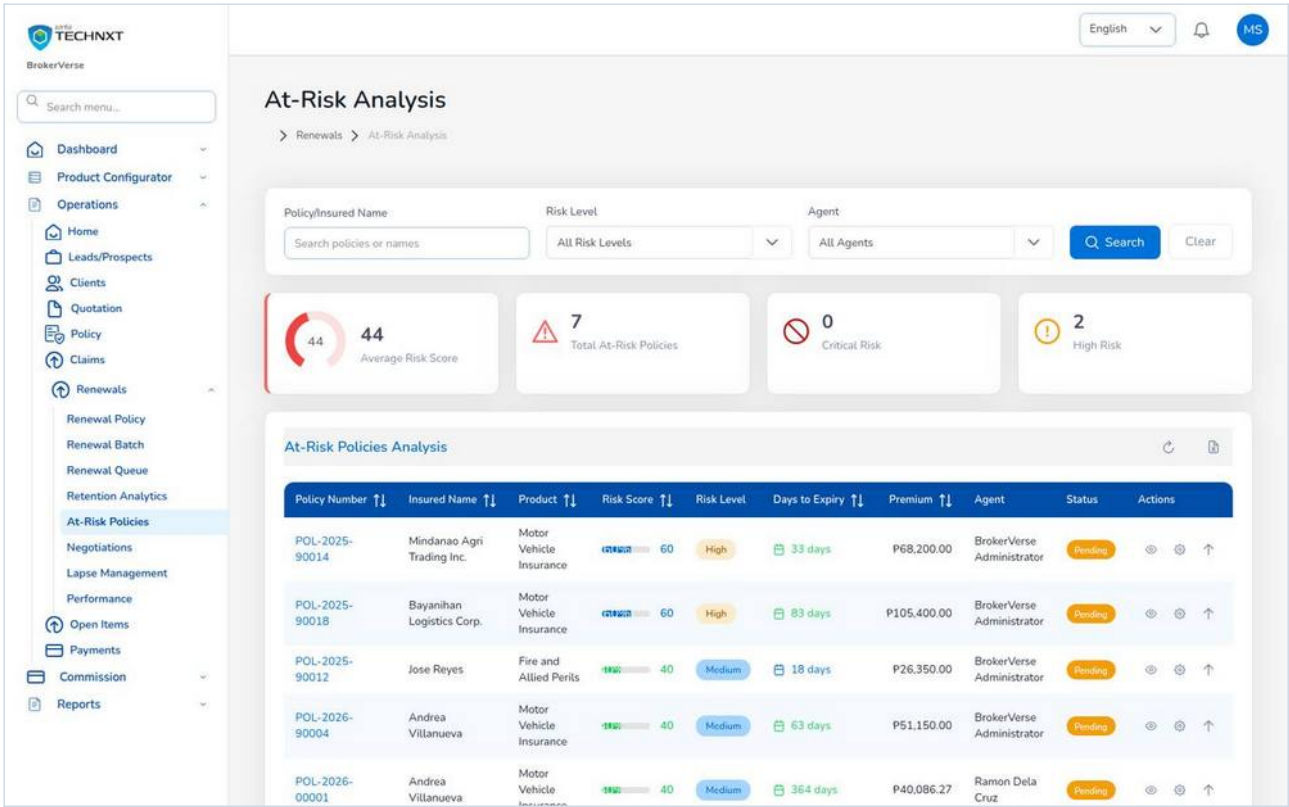

Figure 67. At-Risk Analysis

The risk score adds weights for claims in the term, unpaid premium, expiry within 30 days, a premium increase, no contact yet and a first renewal (`renewals.risk_weights`). Bands: Low from 0, Medium from 30, High from 55, Critical from 75. The recommended actions follow `renewals.risk_actions`, for example *Collect outstanding premium before renewal*.

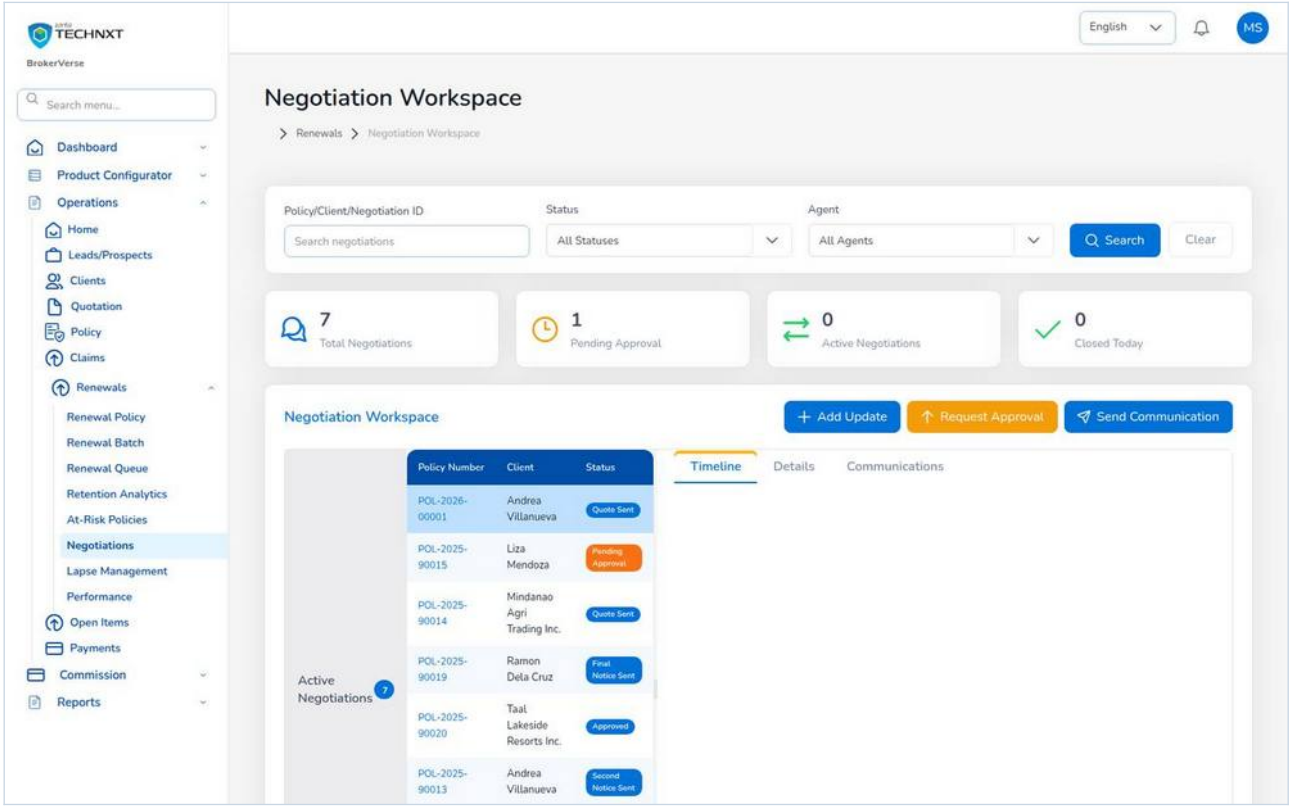

Figure 68. Negotiation Workspace

Use **Add Update** to record a call or meeting, **Request Approval** to send renewal terms to the underwriter and **Send Communication** to write to the client.

Figure 70. Batch Renewal

A batch groups up to 500 policies (`renewals.batch_max_policies`). Select **Create Batch**, choose the policies, and send the notices of the whole batch. The batch shows how many were processed.

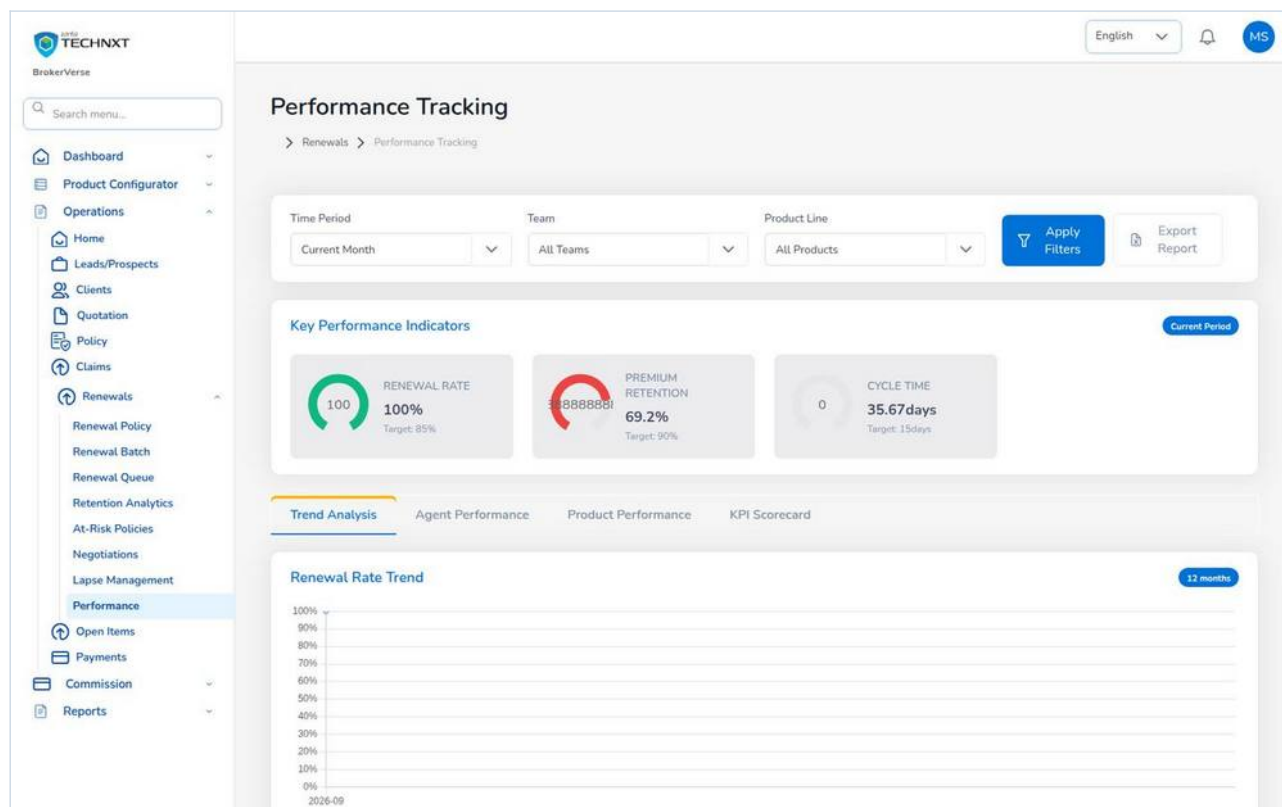

Figure 71. Performance Tracking

Performance compares the renewal rate, premium retention and cycle time of the period with their targets, by agent and product.

Note: The *Performance Insights & Recommendations* texts at the foot of the Performance screen are examples, not calculated from your data. Use the figures and the Renewal Retention report.

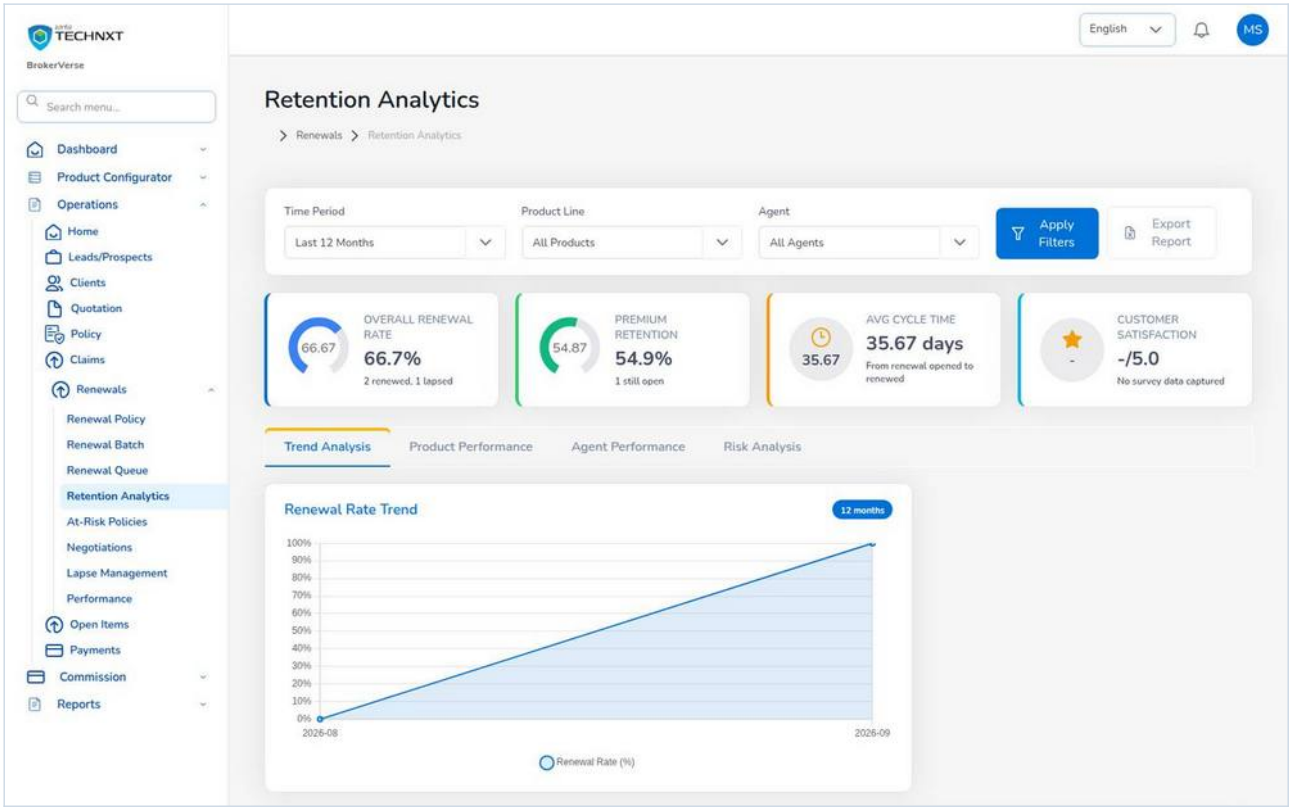

Figure 72. Retention Analytics

Retention Analytics shows the renewed, lapsed and open renewals of the period with the retention rate. Customer satisfaction is shown only when survey data is recorded.

11 Open items and payments

11.1 Open Items

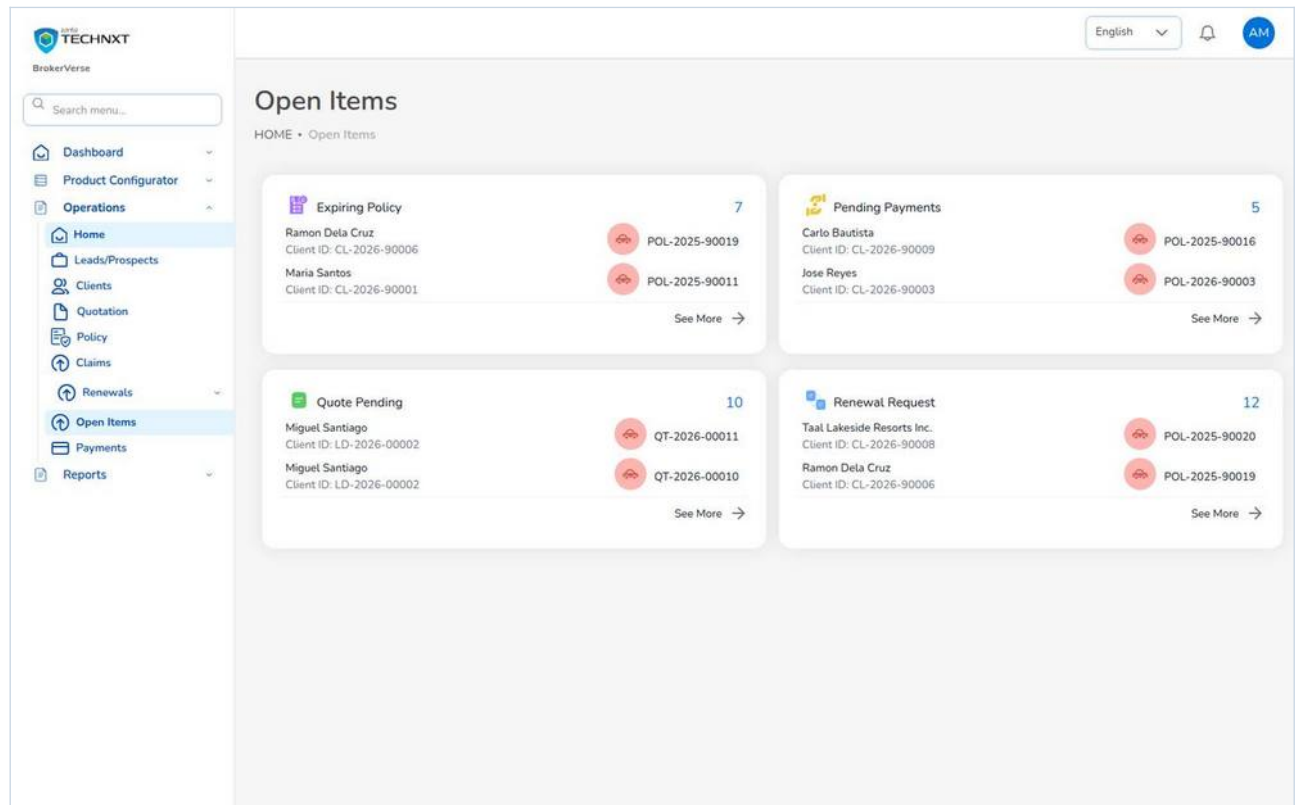

Figure 73. Operations > Open Items

Operations > Open Items is the daily worklist of customer services and finance. It has four boxes, each with a count and the first records:

Box	Content
Expiring Policy	Policies close to expiry.
Pending Payments	Policies with premium due.
Quote Pending	Quotations waiting for the client.
Renewal Request	Renewals due.

Select **See More** to open the full list of a box, or select a record to open it.

11.2 Payments

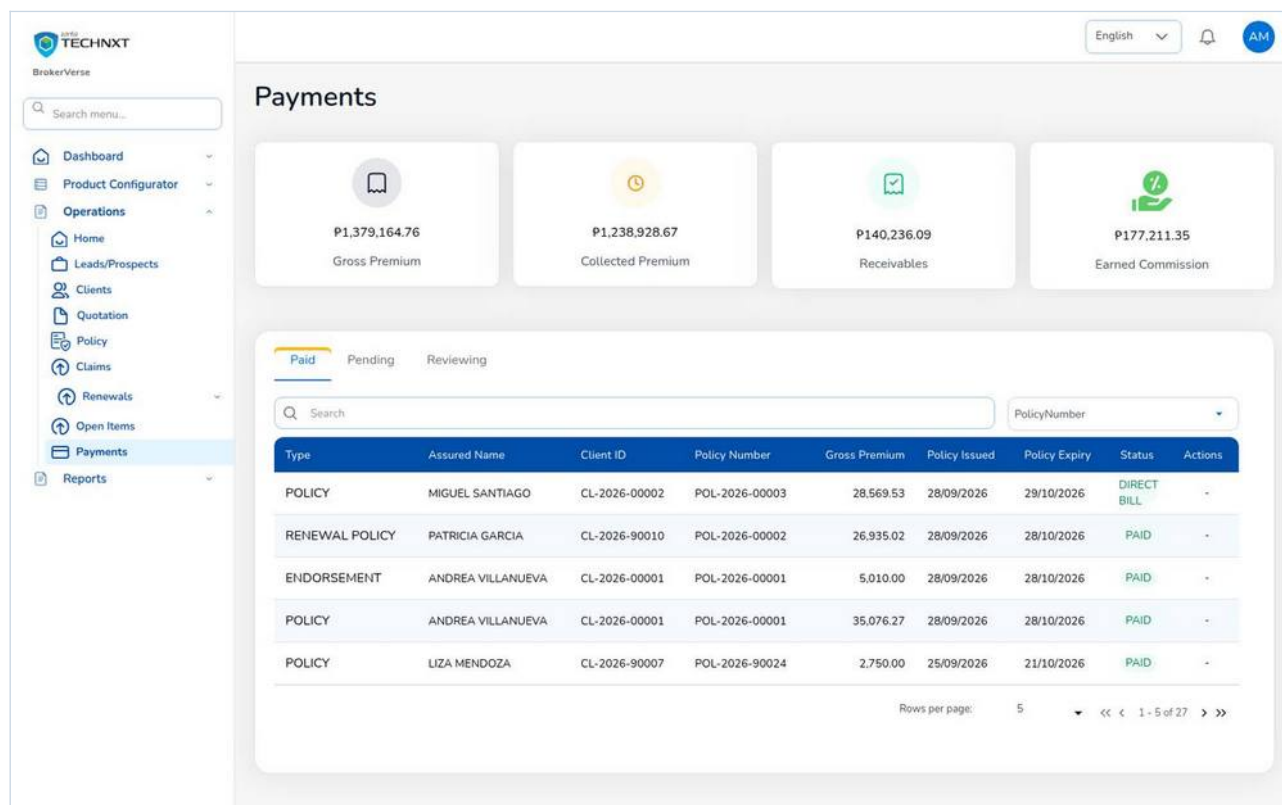

Figure 74. Operations > Payments

Operations > Payments shows gross premium, collected premium, receivables and earned commission, with a list of bills by tab **Paid**, **Pending** and **Reviewing**. The **Type** column tells whether the bill is for a policy, a renewal policy or an endorsement. A premium bill cancelled because the policy is direct bill shows **DIRECT BILL** (listed with Paid); other cancelled bills show **CANCELLED**. Receipts are posted by finance; this screen shows the result.

12 Accounts: receipts, collections and the ledger

12.1 Purpose

The Accounts menu is where finance collects premium, pays out money and keeps the general ledger. Every screen here posts balanced journals to the chart of accounts, and most payments need a second finance user to approve them.

Who uses it: finance and accounts (liza.finance as maker, fe.approver as checker), business and IT administrators.

Menu (Accounts)	Use it to
Receipts	Post official receipts (OR) against open bills.
Collections	Follow outstanding premium by ageing bucket and send reminders.
Accounting Query, All Clients Accounting	Search the accounting entries; see each client's debits, credits and balance.
Open Entry Matching / Un-Matching	Match open debit and credit entries of a sub account, or undo a match.
Disbursement	Payment vouchers (PV) and cheques to insurers, agents, clients and suppliers.
Petty Cash	Initiate funds, request, disburse, receive and replenish petty cash.
Journal Voucher, Correction JV, Reversal JV	Manual journals, corrections and reversals, with approval.
Remittance	Remittances to insurers, settlements and direct-bill debit notes (Chapter 14).
Incentive	Incentive calculations, approvals and statements; finance calculates and a second finance user approves (Chapter 16).

12.2 Receipts

The screenshot shows the 'Accounts > Receipts' interface. On the left is a sidebar with a search menu and a list of navigation items. The main area has a 'Receipts' header with 'Accounts > Receipts' breadcrumb and buttons for 'Bulk Print', 'Bulk Upload', and '+ Receipt'. Below this is a search bar 'Search by Customer Code' and a 'Search by' dropdown. The 'Receipts history' table contains the following data:

Receipt Number	Transaction Code	Transaction Number	Policy Number	Name	Customer Code	Date	Amount
OR-2026-00023	PAYMENT	RT-2026-00028	POL-2026-00003	MIGUEL SANTIAGO	CL-2026-00002	28/09/2026	P28,569
OR-2026-00022	PAYMENT	RT-2026-00027	POL-2026-00002	PATRICIA GARCIA	CL-2026-90010	28/09/2026	P26,935
OR-2026-00021	OR	RT-2026-00026	POL-2026-00001	ANDREA VILLANUEVA	CL-2026-00001	28/09/2026	P3,010
OR-2026-00020	OR	RT-2026-00025	POL-2026-00001	ANDREA VILLANUEVA	CL-2026-00001	28/09/2026	P5,010

At the bottom of the table, there is a 'Row count' dropdown set to 10 and pagination controls showing '1 - 10 of 28'.

Figure 75. Accounts > Receipts

The receipts list shows each official receipt with its transaction code, transaction number (RT-), policy, client, customer code, date, amount, paid and unpaid amounts and status. Use **Bulk Print** to print receipts for a customer and date range, and **Bulk Upload** to post many receipts from a spreadsheet (.xlsx or .csv, at most 1,000 rows).

Post a receipt

1. Choose **Accounts > Receipts** and select **+ Receipt**.
2. Check the **Receipt Date** and keep **Receipt Type** = *Payment* (choose *Refund* for money returned).
3. Choose the **Branch Code** and, if used, the **Department Code**.
4. In **Customer Code**, choose the client. The list shows only clients with open bills, with the amount open.
5. In **Policy Number**, choose the policy. The list shows the number of open bills and the amount.
6. Keep **Currency Code** PHP and **Transaction Code** *OR – Official Receipt*.
7. Choose the **Receipt Mode** and type the **Reference No.** (bank reference, cheque number).
8. In **Open bills for policy ...**, select the bill to pay.
9. Enter the **Amount received**, or select **Pay full balance**.
10. Add **Remarks** if needed and select **Record payment**.

Accounts • Receipts • Add Receipts

Receipt Date: 29/09/2026

Receipt Number: Auto-generated
Receipt Type: Payment
Branch Code: Head Office
Department Code: Select

Customer Code: CL-2026-90003 - Jose Reyes (open P30,380.00)
Customer Name: Jose Reyes
Policy Number: POL-2026-90003 - 1 open bill, P30,380.00

Currency Code: PHP
Transaction Code: OR - Official Receipt
Receipt Mode: Direct Credit/Transfer to Account

Reference No. (Optional): Enter

Remarks (Optional): Enter

Open bills for policy POL-2026-90003

Bill number	Type	Bill amount	Paid	Balance	Due date	Status
INV-2026-90003	Policy premium	P30,380.00	P0.00	P30,380.00	31/05/2026	Open

Amount received: P30,380.00
Outstanding balance: P30,380.00. A partial payment leaves the rest open.

Pay full balance

Record payment

Figure 76. Add Receipts with the open bill of POL-2026-90003 (example values)

Field	Meaning	Rules
Receipt Number	Official receipt number OR-YYYY-NNNNN.	Auto-generated.
Receipt Mode	Dollar/Peso, Direct Credit/Transfer to Account, Cheque, Authority to Debit, Telegraphic Transfer, Managers Check/Demand Draft, Credit Ticket-Inter Office, Online Banking.	Required. Decides the cash account debited.
Amount received	Money received for the selected bill.	Cannot exceed the bill balance. A smaller amount leaves the rest open.

What the system does:

- Posts the receipt journal: Dr cash in bank (or cash on hand, e-wallet clearing, by mode) / Cr premium receivable.
- Sets the bill to **Partial** or **Paid** and the policy payment status to *Partial* or *Completed*.
- Closes the collection item when the bill is fully paid.
- Makes the referrer's commission lines eligible for payout when the premium is fully collected.
- Adds the receipt to the Receipts Register, the SOA and the Collection Report.

Example: bill INV-2026-00002 of 5,010.00 was paid with OR-2026-00020 (2,000.00, bill Partial with 3,010.00 open) and OR-2026-00021 (3,010.00, bill Paid). A receipt of 4,000.00 on the 3,010.00 balance was refused.

12.3 Collections and ageing

Client Name	Policy No.	Outstanding	Current	1-30 Days	31-60 Days	61-90 Days	Over 90 Days	Due Date	Status	Days Overdue
Carlo Bautista	POL-2025-90016	P35,650.00	P0.00	P0.00	P0.00	P0.00	P35,650.00	22/12/2025	OVERDUE	28
Jose Reyes	POL-2026-90003	P30,380.00	P0.00	P0.00	P0.00	P0.00	P30,380.00	31/05/2026	OVERDUE	11
Bianca Lorenzo	POL-2026-95005	P23,766.19	P0.00	P0.00	P23,766.19	P0.00	P0.00	04/08/2026	OVERDUE	54
Paolo Fernandez	POL-2026-95007	P25,626.15	P0.00	P25,626.15	P0.00	P0.00	P0.00	23/09/2026	COMMITTED	6
Angela Ramos	POL-2026-95008	P24,813.75	P24,813.75	P0.00	P0.00	P0.00	P0.00	17/10/2026	PENDING	0

Figure 77. Accounts > Collections

Accounts > Collections lists every open premium with the client, policy, outstanding amount spread over the ageing buckets (Current, 1–30, 31–60, 61–90 and over 90 days), due date, status (Pending, Committed, Overdue) and days overdue. Filter by status and overdue level. Select **View** to open the item.

- Premium falls due 30 days after inception (`receivables.due_days`).
- Items due within 7 days show as Current (`collections.current_window_days`).
- Overdue level 1 is up to 30 days, level 2 up to 60 days, level 3 beyond (`collections.overdue_levels`).
- Reminders are e-mailed to clients 7 days before the due date and then every 7 days by the *Collection reminders* job at 08:00. **Send Payment Reminders Now** at the top of the screen sends the reminders at once.

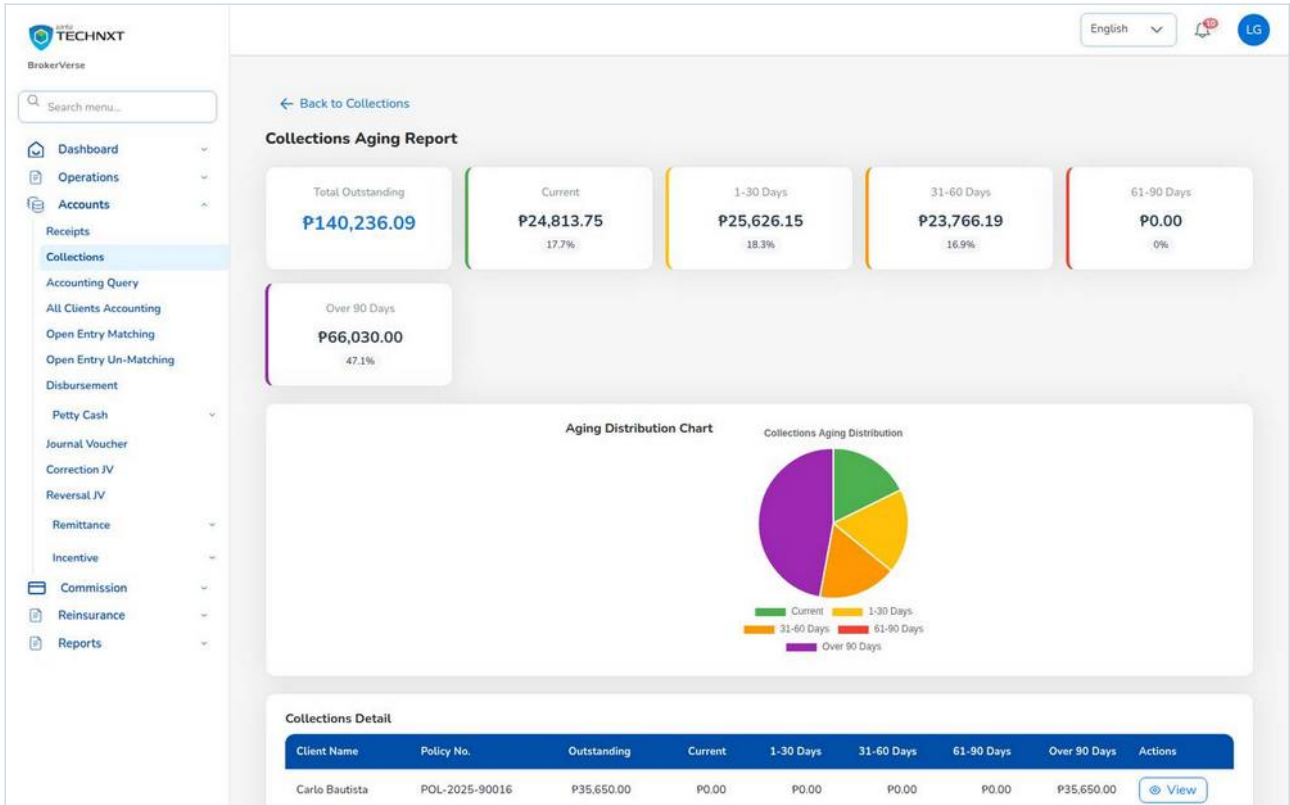

Figure 78. Collections Aging Report

The **Aging Report** (from Collections) shows the total outstanding, the amount and share per bucket, a chart and the detail by client.

12.4 Accounting query and client accounting

Accounting Entries Query

Search and filter accounting entries across all policies and clients

Policy ID / Number (Optional):

Client ID:

Client Name:

Entry Type:

Reference Type:

Status:

Start Date:

End Date:

GL Code:

[Search](#) [Export](#) [Reset](#)

No entries found. Use the search form above to query accounting entries.

Figure 79. Accounting Entries Query

Use **Accounting Query** to search the accounting entries by policy, client, entry type, reference type, status, dates or GL code. Select **Search**; **Export** downloads the result as CSV.

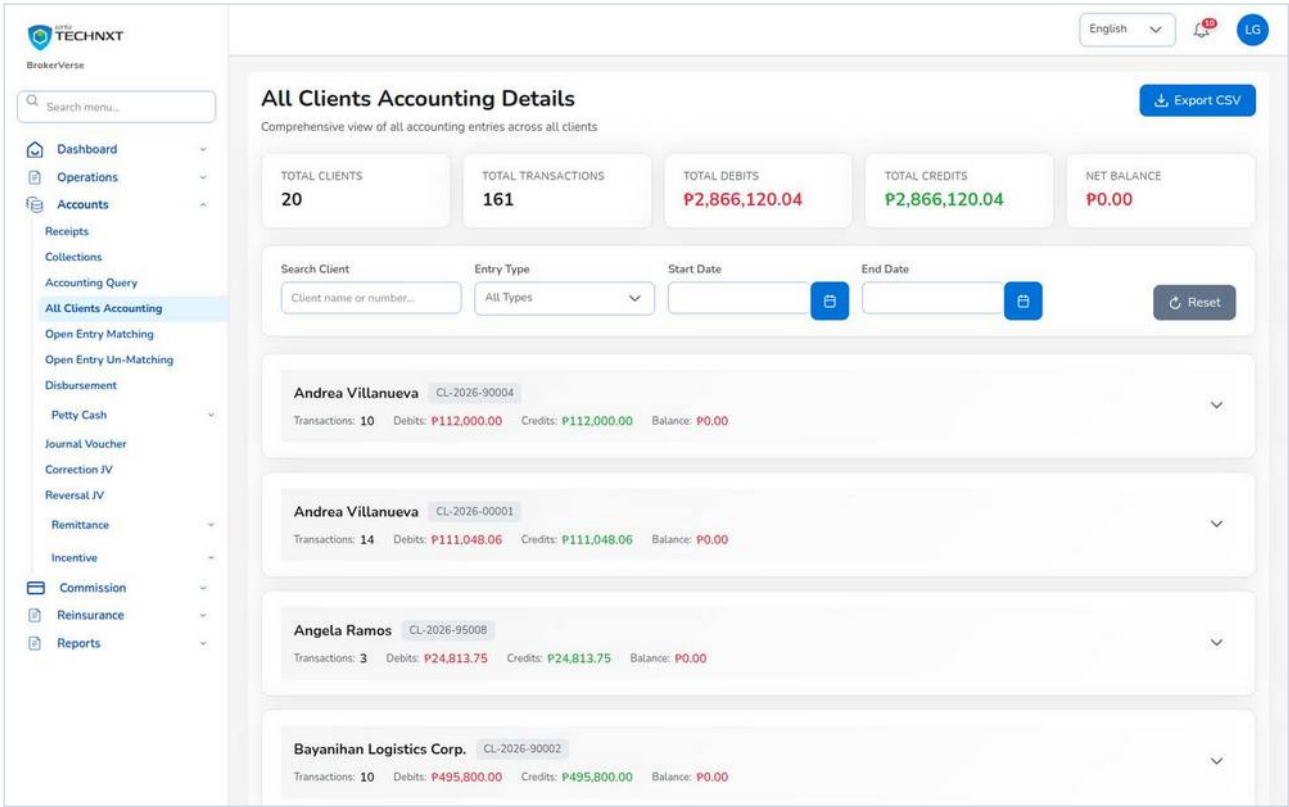

Figure 80. All Clients Accounting Details

All Clients Accounting shows, for every client, the number of transactions, total debits, total credits and balance. Open a client to see the entries. **Export CSV** downloads the list.

12.5 Open entry matching

Open Entry Matching

Accounts • Open Entry Matching

Sub Account Code: Division:

Department:

Anyly Code 1: Anyly Code 2:

Currency Code:

Pull **Match** Pull By Criteria ☒ Debit ☐ Credit ☐ Select All? **Cash Discount**

Debit Entries

	Document No	Doc Dt	Due Dt	FC Amount	LC Amount	Balance FC Amt	Balance LC Amt	Adjustment Amt	Cr	Ok
No results found										
Total:				P0.00		P0.00		P0.00		P0.00

Figure 81. Open Entry Matching

Open entry matching settles open debit and credit entries of the same sub account against each other, for example a receipt against a bill posted without reference.

1. Choose the **Sub Account Code** and, if needed, division, department, analysis codes and currency.
2. Select **Pull**, or **Pull By Criteria** with **Debit** or **Credit**.
3. Tick the entries to match, check the totals and any adjustment or write-off, then select **Match**.

Use **Open Entry Un-Matching** to undo a match.

12.6 Disbursement: payment vouchers and cheques

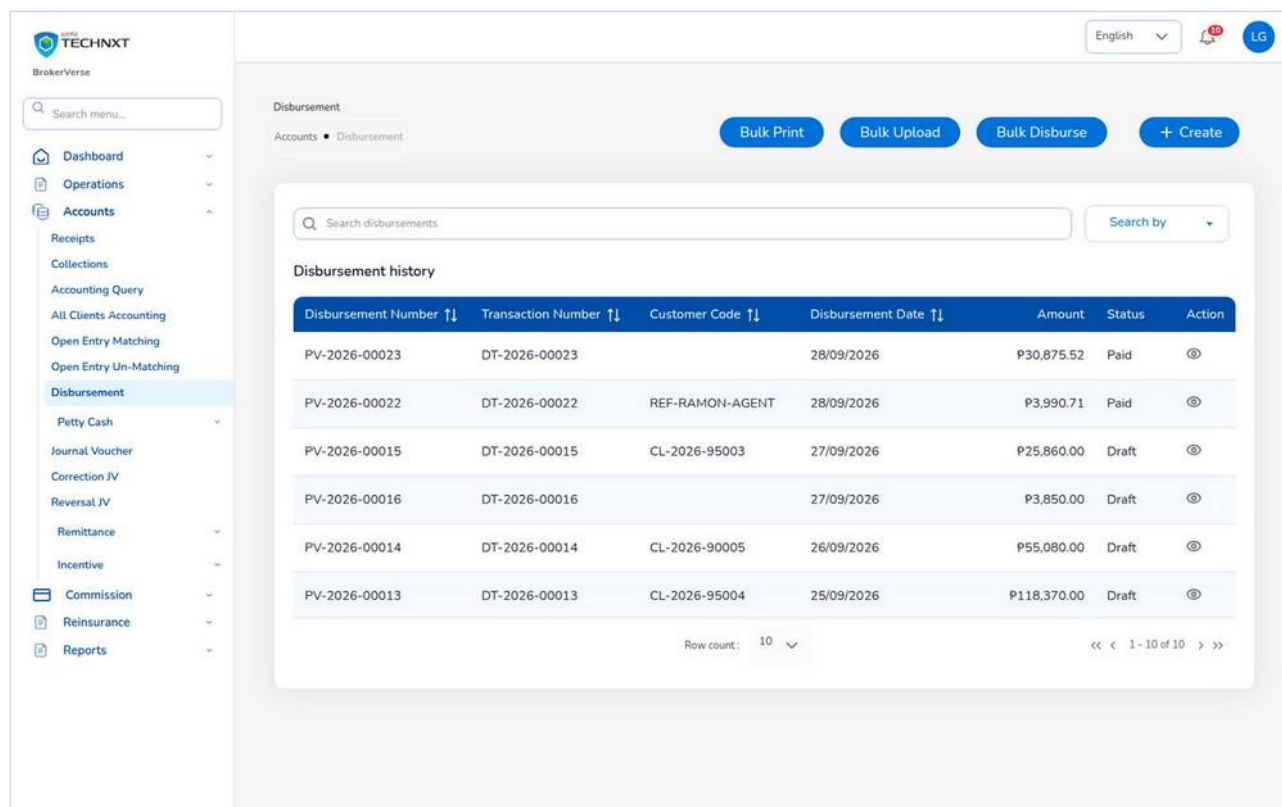

Figure 82. Accounts > Disbursement

A payment voucher PV-YYYY-NNNNN pays an insurer, an agent or referrer, a client or a supplier. The list shows the voucher, transaction number (DT-), customer code, date, amount and status.

Status	Meaning
Draft	Prepared; amounts may still change.
For approval	Waiting for a second finance user.
Approved	Approved; the cheque can be printed.
Paid	Paid: journal Dr payable / Cr cash posted.
Cancelled	Cancelled before payment.

Create a voucher

1. Choose **Accounts > Disbursement** and select **+ Create**.
2. Fill in the header (table below) and select **Next**.
3. On the **Invoice List**, tick the payables to pay (premium to remit, commission lines, refunds). The list shows the amount, balance, comsub, VAT and WHT. Select **Next**.
4. On the bank page, choose the bank account and cheque book; the total is filled from the selected lines. Save the voucher; it goes for approval.

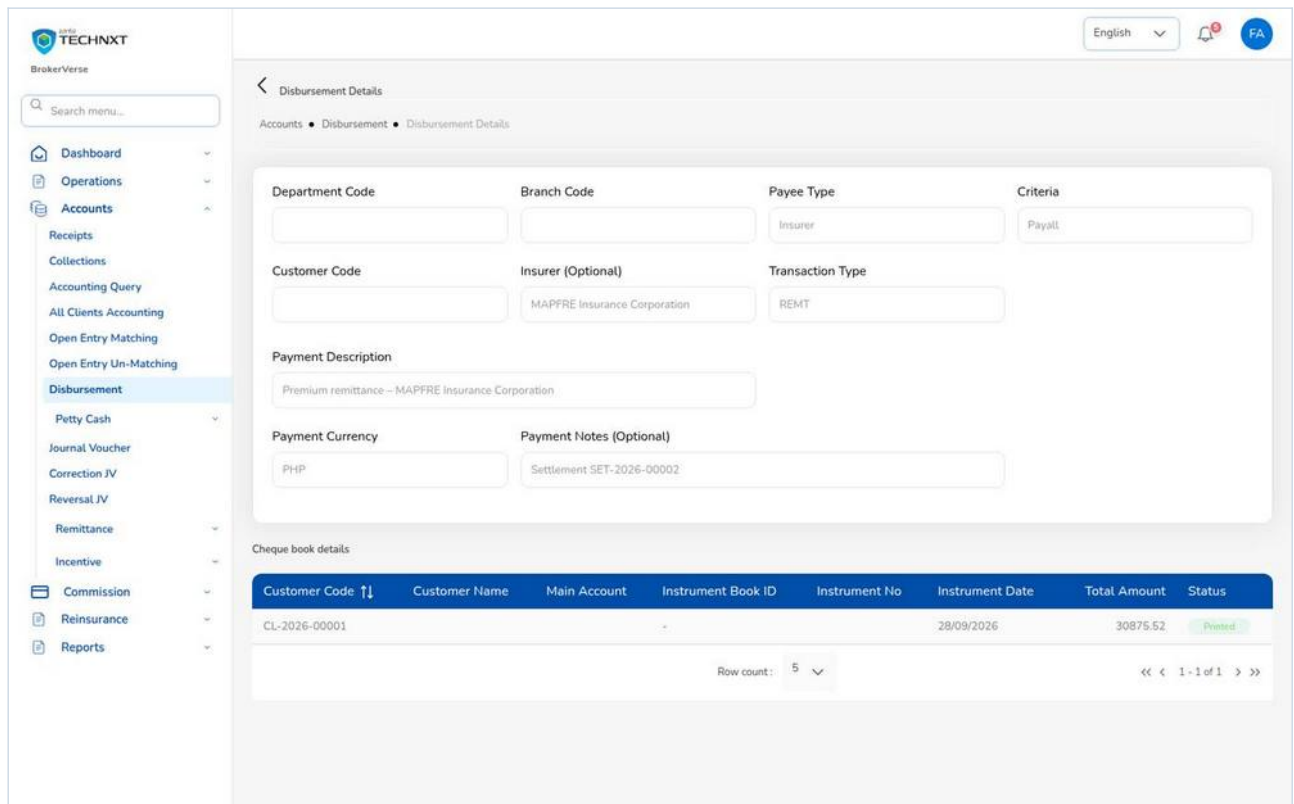

The screenshot shows the 'Create Disbursement' form in the BrokerVerse system. The form is titled 'Create Disbursement' and is part of the 'Accounts > Disbursement' path. It contains several fields: Disbursement Date (29/09/2026), Department Code, Branch Code, Payee Type, Criteria, Customer Code, Customer Name, Policy Number (Optional), Transaction Type, Payment Description, Payment Currency, and Payment Notes (Optional). A 'Next' button is located at the bottom right.

Figure 83. Create Disbursement

Field	Meaning	Rules
Disbursement Date	Date of the voucher.	Default today.
Department Code, Branch Code	Cost centre.	Required.
Payee Type	Customer, Insurer, Agent/Referrer or Supplier.	Decides the payable account settled (for example Insurer → 2201001 Premiums payable).
Criteria	<i>Specific</i> (chosen lines) or <i>Payall</i> (every open line of the payee).	Required.
Customer Code, Customer Name	The payee.	Optional for an agent payout.
Policy Number	Restricts the lines to one policy.	Optional.
Transaction Type, Payment Description, Payment Currency, Payment Notes	Description of the payment.	Currency PHP.

Approve and pay (checker)

1. The checker opens the voucher (**Accounts > Disbursement**, eye icon, or the notification).
2. The checker reviews the **Cheque book details** and approves the cheque. The system posts the payment journal (for example Dr premium payable / Cr cash in bank).
3. Select **Print** for the approved cheque. The voucher becomes **Paid**.

Figure 84. Disbursement Details of the insurer voucher PV-2026-00023 with its printed cheque

The maker cannot approve his or her own voucher or cheque (`finance.maker_checker_enabled`). The message explains the refusal.

Bulk Disburse creates one payout voucher, for approval, per selected referrer with approved commission lines.

12.7 Petty cash

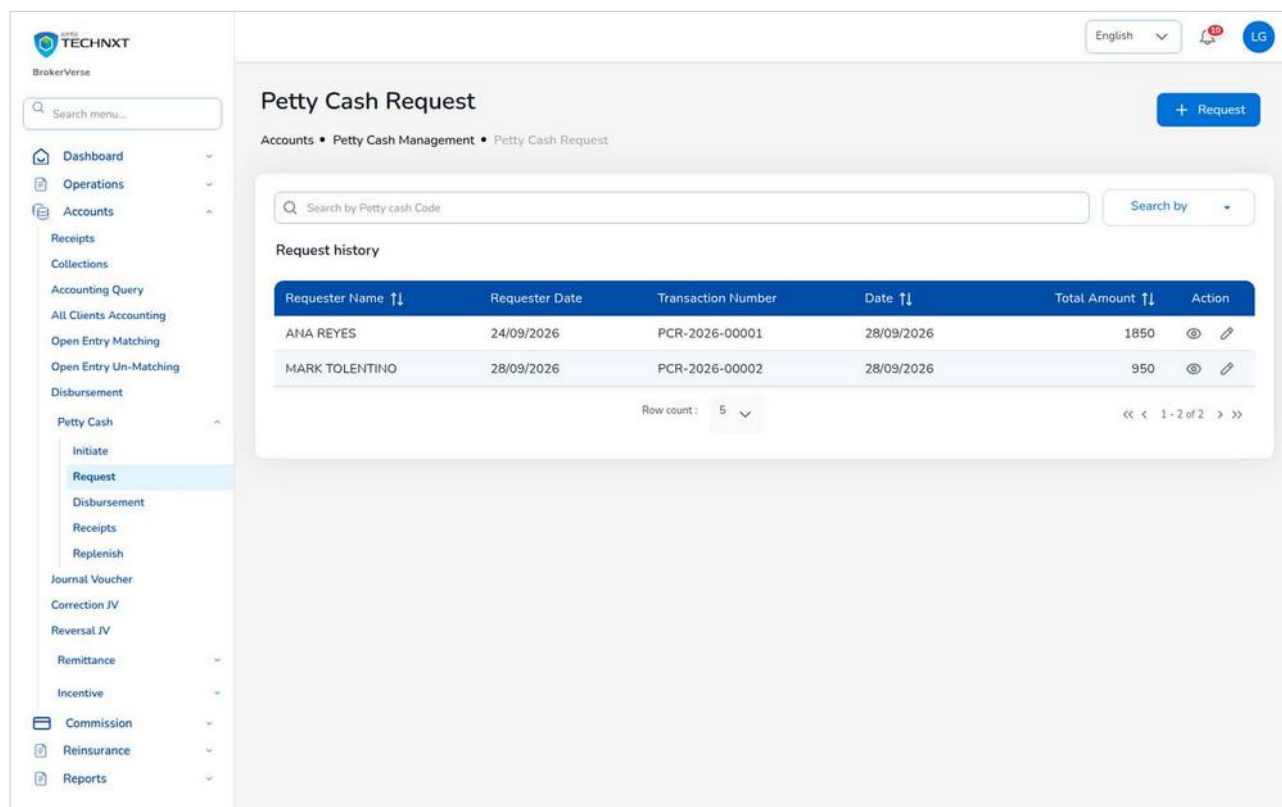

Figure 85. Petty Cash Request

Screen (Accounts > Petty Cash)	Use it to
Initiate	Open a petty cash fund (code, size, maximum per transaction, branch, department).
Request	Record a request for petty cash (requester, date, lines, total).
Disbursement	Pay out an approved request from the fund.
Receipts	Record money returned to the fund.
Replenish	Top the fund back up from the bank.

The funds are defined in **Master > Finance > Petty cash** (for example Head Office petty cash of ₱ 50,000 with a ₱ 10,000 minimum). The custodian is notified when a fund drops below its minimum. Requests are maker-checker.

Figure 87. Accounts > Journal Voucher

The journal voucher list shows the transaction code, number (JV-), date, description and status (Draft, Awaiting approval, Posted, Rejected).

Enter a journal voucher (maker)

1. Choose **Accounts > Journal Voucher** and select **+ Voucher**.
2. Choose the **Transaction Code** (JV, CM credit memo, DM debit memo, ...), type the **Transaction Description** (the narration) and check the **Date**.
3. Select **Add Data**. Choose the **Main Account**, the **Sub Account** if the account has sub accounts, the **Entry Type** (Debit or Credit), branch, department, currency and **Amount**. Save the line.
4. Repeat for every line. **Total Debit** must equal **Total credit**; **Net** must be 0.
5. Select **Submit for approval**.

The screenshot shows the 'Add Journal Voucher' form in the BrokerVerse system. The sidebar menu on the left has 'Journal Voucher' selected. The main form area contains the following elements:

- Transaction Code:** A dropdown menu with 'Select' as the current value.
- Transaction Description:** A text input field.
- Date:** A date picker showing '29/09/2026'.
- Data Table:** A table with columns: Main A/c, Sub A/c, Remarks, Foreign Amount, Currency, Local Amount, Entry, and Action. The table is currently empty.
- Row count:** A dropdown menu showing '5'.
- Summary Fields:** Three input fields for 'Total credit', 'Total Debit', and 'Net', all showing '0'.
- Buttons:** '+ Add Data' and 'Submit for approval'.

Figure 90. Journal Voucher Details of JV-2026-00117 (office rent)

Example: JV-2026-00117 October 2026 office rent, Makati: Dr 4402001 Rent Expense 85,000 / Cr 1102001 Cash in Bank – Operating Account 85,000, submitted by liza.finance and posted by fe.approver.

Correction and reversal

The screenshot shows the 'Correction JV Details' form in the BrokerVerse application. The left sidebar contains a navigation menu with options like Dashboard, Operations, Accounts, Receipts, Collections, Accounting Query, All Clients Accounting, Open Entry Matching, Open Entry Un-Matching, Disbursement, Petty Cash, Journal Voucher, Correction JV (highlighted), Reversal JV, Remittance, Incentive, Commission, Reinsurance, and Reports. The main form area has a breadcrumb trail: 'Accounts > Corrections JV > Corrections JV Details'. The form contains two rows of input fields. The first row has 'Transaction Code' (a dropdown menu with 'Select' as the current value), 'Transaction Description' (a text input field), and 'Transaction Number' (a text input field with a placeholder 'Enter'). The second row has 'Corrections JV Transaction Code' (a dropdown menu with 'Select' as the current value) and 'Correction Description' (a text input field). A blue 'Next' button is located at the bottom right of the form area. The top right of the interface shows a language dropdown set to 'English', a notification icon, and a user profile icon labeled 'LG'.

Figure 91. Correction JV

- **Correction JV:** choose the transaction code and number of a posted voucher, enter the correction code and description, select **Next** and enter the corrected lines. The system reverses the original and posts the corrected entries after approval.
- **Reversal JV:** choose the posted voucher and a reversal code and description. The system posts the opposite entries after approval.

12.9 Trial balance

Run the trial balance from **Reports > Financial Reports > Trial Balance** or **Reports > All Reports** (Chapter 19). It lists, per account, the opening balance, the period debits and credits and the closing balance, grouped by account type and statement group. Only approved and posted journals are counted (`reports.trial_balance_statuses`). Total debits always equal total credits.

13 Commission

13.1 Purpose

The broker earns brokerage commission from the insurer on every policy. Part of it, the *comsub*, is paid to the agent or referrer who brought the business. BrokerVerse accrues the commission at policy issue, makes it payable when the premium is collected, and pays it by voucher less withholding tax.

Who uses it: finance runs the payouts; agents and sales follow their commission on the Commission Dashboard; administrators maintain the rates (Master > Generals > Commission).

13.2 Commission line lifecycle

Status	Set when	Who
Accrued	The policy is issued (or an endorsement adds premium).	System
Eligible	The premium is fully collected (<code>commission.auto_eligible_on_full_payment</code>), or finance marks it.	System / finance
Approved	A finance user approves the line; the comsub accrual is posted (Dr commission expense / Cr commission payable).	Finance, not the maker
Paid	The payout voucher is approved; Dr commission payable / Cr cash / Cr withholding tax payable.	Finance checker
Reversed	The line is reversed; a clawback journal is posted if it was already paid.	Finance

Only agents and sales users earn commission on the policies they produce (`commission.eligible_roles`). A referrer needs a bank account on file before commission can be approved or paid (`commission.require_bank_account`).

13.3 Commission Dashboard

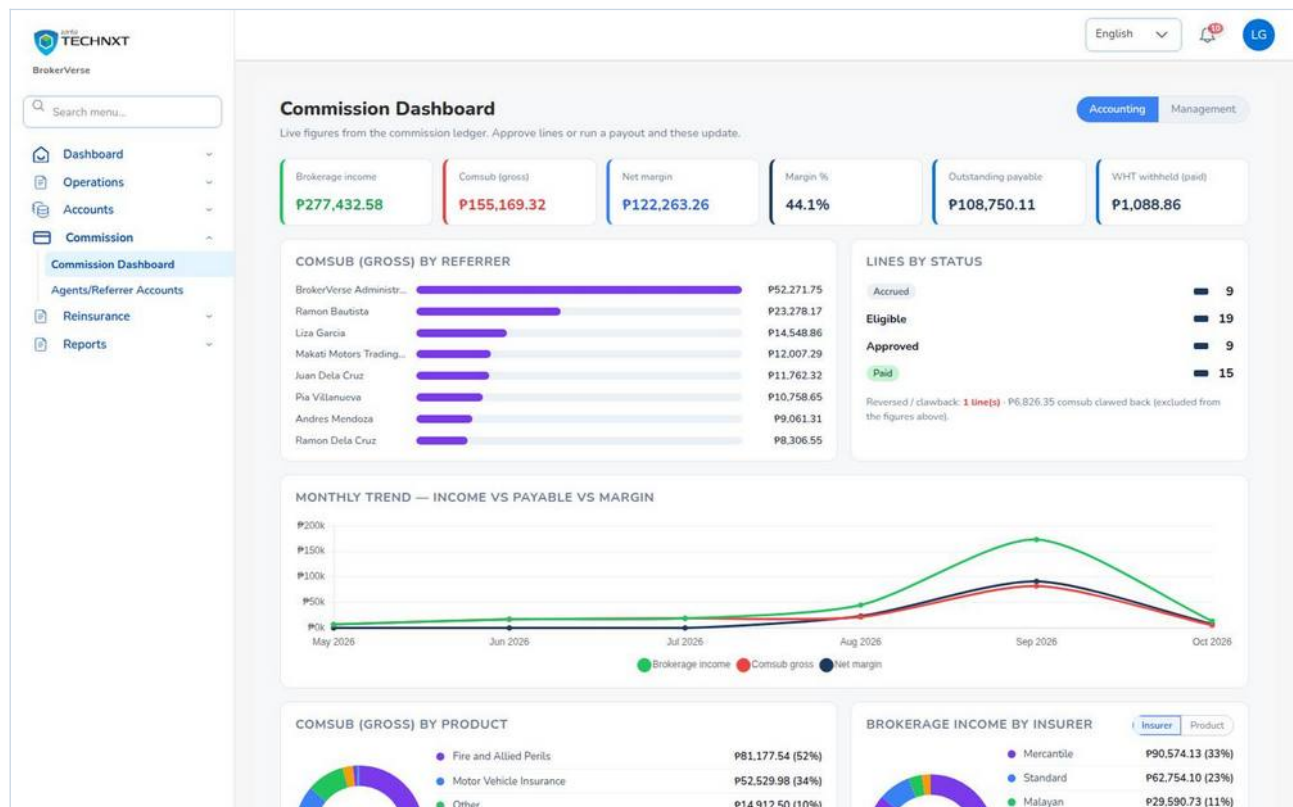

Figure 92. Commission > Commission Dashboard

The dashboard shows brokerage income, comsub (gross), net margin and margin %, the outstanding payable and the WHT withheld. Below: comsub by referrer, lines by status, the monthly trend of income, payable and margin, comsub by product and brokerage income by insurer. Switch between the **Accounting** and **Management** views at the top right.

13.4 Agents / referrer accounts

Agents / Referrer Accounts

Click a referrer to open their account — policies split by payment cycle (current / future / past). Run the lifecycle (mark eligible → approve → generate payout) and override per-policy rates from inside the account. Identity only — **no fixed rate** (rates live on each policy line).

Due this cycle (Sep 2026) **P70,623.70** Ready to pay **P21,779.74**

REFERRER	TYPE	LEVEL	POLICIES	NET PAYABLE (OPEN)	WHT TYPE	BANK ACCOUNT	STATUS
Andres Mendoza	Agent	L1	5	P2,351.30	Individual 5%	Metrobank ***5519	Active
Cebu Prime Realty Inc.	External	—	5	P3,541.53	Not applied	Chinabank ***3310	Active

Ramon Bautista	Agent	L1	5	P20,632.26	Individual 5%	BPI ***8830	Active
Ramon Dela Cruz	Agent	L1	2	P3,900.51	Individual 5%		Active

Figure 93. Commission > Agents/Referrer Accounts

The list shows every referrer with type (Agent, Sub-agent, External), level (L1, L2), number of policies, net payable, WHT type and bank account. The header shows the amount due this cycle and the amount ready to pay.

Pay commission to a referrer

1. Choose **Commission > Agents/Referrer Accounts** and select the referrer.
2. Check **Apply WHT**: ticked when withholding tax applies (individual agents 5%, companies 10%, `commission.wht_rate_by_type`).
3. Under **Current cycle**, check the eligible lines: policy, product and insurer, comsub and rate, WHT and net.
4. Select **Approve**. Another finance user must approve if you prepared the lines.
5. Select **Generate payout**. The system creates a draft payout voucher with the approved lines and opens it in Disbursement.
6. Complete the bank details; the total is the net of the selected lines. Submit the voucher.
7. A second finance user approves the payout. The lines become **Paid**.

Referrers

POLICY	PRODUCT • INSURER	CYCLE	COMSUB	WHT	NET	STATUS
--------	-------------------	-------	--------	-----	-----	--------

Figure 94. Referrer account of Ramon Dela Cruz

Example: POL-2026-00001: comsub 4,200.75, WHT 5% 210.04, net paid 3,990.71 by PV-2026-00022.

Future cycles (Accrued, not yet payable) and the paid history are listed below the current cycle. **Mark eligible** makes accrued lines eligible when their premium is collected. Select a line to override its comsub rate before approval.

Important: The warning ... *has no bank account on file* blocks approval and payout. Add the bank name and account number to the referrer first.

14 Remittance and direct bill

14.1 Purpose

The Remittance menu pays the insurers. For broker-billed policies, finance remits the collected premium, net of the broker's commission, to each insurer. For direct-bill policies, where the client paid the insurer, finance bills the broker's commission to the insurer with a debit note and records the insurer's payment.

Who uses it: finance (maker and checker).

Menu (Accounts > Remittance)	Use it to
Automated Processing	Generate draft remittances per insurer from the collected, unremitted premium.
Tracking	Follow every remittance and submit drafts for approval.
Statements	Generate remittance statements for insurers.
Settlement	Settle approved remittances with an insurer; raises the insurer payment voucher.
Reconciliation	Match bank transactions with remittances.
Bulk Processing	Upload remittance files.
Scheduling	Scheduled remittance runs.
Electronic Transfer	InstaPay, PESONet, RTGS and wire transfers with limits.
Approval Workflow	Approve or reject remittances, settlements, transfers and adjustments.
Exception Management	Amount mismatches, duplicates, missing documents.
Agency Bill Processing	Bill agencies for the premium they collected.
Direct Bill Processing	Commission debit notes to insurers for direct-bill policies.
Adjustments, Notifications, History, Analytics	Adjustments with approval, messages, audit history and KPIs.

14.2 Remit premium to an insurer

1. **Automated Processing:** tick the insurers that are *Ready* (collected premium not yet remitted, above the minimum), select **Validate**, then **Process Selected**. Draft remittances REM- are created. You can also create remittances with Agency Bill Processing.
2. **Tracking:** find the draft remittance and select **Process**. It goes for approval in a batch BLK-.
3. **Approval Workflow:** a second finance user approves it. The approval level depends on the amount (level 1 up to ₱ 100,000, level 2 up to ₱ 1,000,000, level 3 above). The initiator cannot approve.
4. **Settlement:** choose the **Insurer code**, select **Add policies** to pick the lines of approved remittances, select **Calculate** (premium – commission – tax ± adjustments = net settlement) and **Submit for approval**.
5. The checker approves the settlement (SET-). The system raises the insurer payment voucher for the net amount in Disbursement.
6. In Disbursement, issue the cheque; the checker approves it (journal Dr premium payable / Cr cash) and you print it. The voucher becomes Paid and the remittance Completed.

Figure 97. Approval workflow: pending approvals with SLA and level

Figure 98. Insurer settlement

Example: REM-2026-00018 to MAPFRE: gross 35,076.27, commission 4,200.75, net 30,875.52; settlement SET-2026-00002; voucher PV-2026-00023 paid by cheque.

Remittance status	Meaning
Draft	Created, not submitted.
Pending Approval	Submitted, waiting for the checker.
Approved	Approved; ready for settlement.
Completed	Settled and paid to the insurer.
Rejected, Cancelled	Refused or withdrawn.

When you reject, resolve or reverse an item on the remittance screens, an in-app dialog asks for the reason; the reason is recorded. The approval queue shows an SLA per priority: urgent 4 hours (from ₱ 1,000,000), high 12 hours (from ₱ 250,000), normal 24 hours (from ₱ 20,000), low 48 hours (`remittance.priority_sla_hours`).

14.3 Direct bill processing

Figure 99. Direct Bill Processing: raise a debit note

The cards at the top show the unbilled commission, the billed and outstanding amount, the overdue amount and the total receivable from insurers.

Raise a commission debit note (maker)

1. Choose **Accounts > Remittance > Direct Bill Processing**, tab **1. Raise Debit Note**.
2. Choose the **Insurer**, the **Issued from** and **Issued to** dates and, if needed, the **Line of business**. Select **Load policies**.
3. The list shows each unbilled direct-bill policy (or endorsement) with insured, product, gross premium (paid to the insurer), commission rate, commission, VAT, total due, EWT and the journal it was booked in. Tick the policies to bill.
4. Check the totals: commission, output VAT (12%), total due from the insurer, tax withheld (EWT 10% of commission) and net cash expected.
5. Check the **Debit note date**; the **Due date** is 30 days later (`direct_bill.debit_note_due_days`).
6. Select **Raise debit note and submit for approval** (or **Save draft**).

The system numbers the debit note DN-YYYY-NNNNN and sends it for approval.

Approve and send (checker)

1. Open tab **2. Debit Notes** and filter by status *Pending Approval*.
2. Open the debit note and approve it, or reject it with a reason (its commission becomes unbilled again). The maker cannot approve it.
3. **Print** the approved debit note (broker letterhead, title *Commission Debit Note*) and e-mail it to the insurer. The e-mail asks the insurer to pay net of EWT and to send BIR Form 2307.

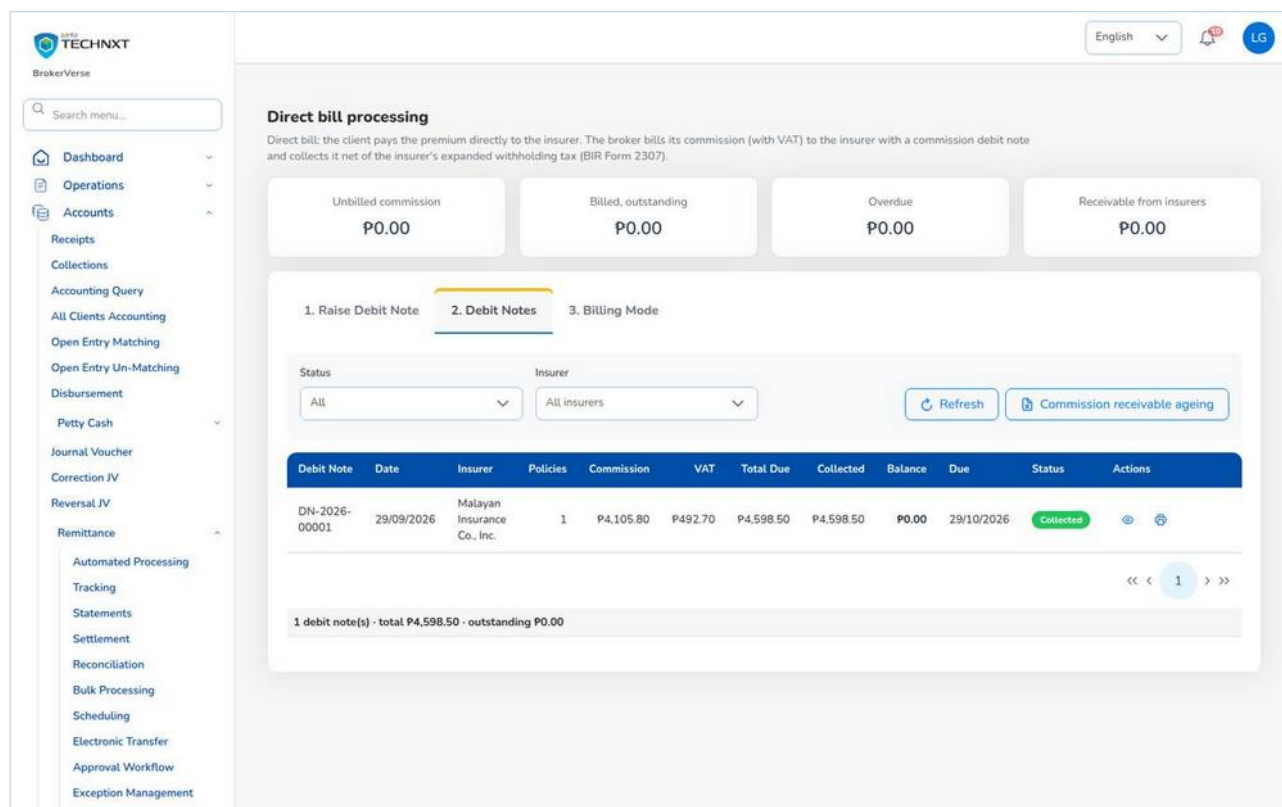

Figure 100. Debit notes: DN-2026-00001 collected

Record the insurer's payment

1. On tab **2. Debit Notes**, open the debit note and choose **Collections**.
2. Enter the date, the **Cash** received, the **Tax withheld (EWT)**, the **Payment mode** and the **Reference (bank / cheque)**. Partial payments are allowed.
3. Select **Post collection**.

The system posts Dr cash in bank and Dr creditable withholding tax 1302001 / Cr commission receivable – insurers 1203001, numbers the collection DNC-, and sets the debit note to **Partially Collected** or **Collected**. A collection entered by mistake can be reversed.

Debit note status	Meaning
Draft	Saved, not submitted.
Pending Approval	Waiting for the checker.
Open	Approved and sent; nothing collected yet.
Partially Collected	Part of the total due received.
Collected	Fully received (cash + EWT = total due).
Rejected, Cancelled	Refused or withdrawn.

Commission receivable ageing downloads the Commission Receivable – Direct Bill report.

Change the billing mode of a policy

Direct bill processing

Direct bill: the client pays the premium directly to the insurer. The broker bills its commission (with VAT) to the insurer with a commission debit note and collects it net of the insurer's expanded withholding tax (BIR Form 2307).

Unbilled commission	Billed, outstanding	Overdue	Receivable from insurers
P0.00	P0.00	P0.00	P0.00

1. Raise Debit Note 2. Debit Notes **3. Billing Mode**

Mark an issued policy as direct bill (the client pays the insurer) or return it to broker billing. Direct bill cancels the premium bill and books the commission due from the insurer; the change is refused once premium was collected or remitted, or once the commission is on a debit note. New policies take their billing mode from the payment step at issue (default in System Settings, `direct_bill.default_billing_mode`).

Policy number *

Billing mode ☒ Direct bill ☐ Broker billed

Reason

[Change billing mode](#)

Figure 101. Direct Bill Processing: billing mode

1. Open tab **3. Billing Mode**.
2. Type the **Policy number**, choose **Direct bill** or **Broker billed** and give the **Reason**.
3. Select **Change billing mode**.

Switching to direct bill cancels the premium bill, reverses its booking and books the commission due from the insurer. The change is refused once premium was collected or remitted, or once the commission is on a debit note.

14.4 Other remittance screens

The screenshot displays the 'Remittance history audit trail' interface. On the left is a sidebar menu with options like Dashboard, Operations, Accounts, Receipts, Collections, Accounting Query, All Clients Accounting, Open Entry Matching, Open Entry Un-Matching, Disbursement, Petty Cash, Journal Voucher, Correction JV, Reversal JV, and Remittance. The Remittance section is expanded, showing sub-options like Automated Processing, Tracking, Statements, Settlement, Reconciliation, Bulk Processing, Scheduling, Electronic Transfer, Approval Workflow, and Exception Management. The main content area has a top bar with 'English' and 'LG' user icons, and a 'Back to Master' button. Below this are four summary cards: '28 Total Records', '27 This Month', '0 Archived Data', and '7% Data Integrity'. A section with 'Export History' and 'Refresh' buttons is followed by tabs for 'Transaction History' (selected), 'Audit Trails', 'System Logs', 'Archive History', and 'Data Lineage'. The 'Transaction History' tab shows a table with columns: Reference No, Type, Policy No, Client, Amount, Status, Created By, Created, Version, Audit, and Actions. The table lists several transactions, including Agency Bills and Insurer Remittances, with statuses like 'Completed', 'Draft', and 'Approved'.

Figure 102. Remittance history audit trail

The screenshot shows the 'Electronic transfer management' screen. The sidebar menu is identical to the previous screen, with 'Electronic Transfer' highlighted under the Remittance section. The main content area features a top bar with 'English' and 'LG' user icons. Below this are four summary cards: 'Todays transfers' (0, Total: P0.00), 'Pending Approval' (1, Amount: P125,000.00), 'Processing' (1, Amount: P87,500.00), and 'Daily limit used' (0%, P0.00 of P750,000.00). A 'Pending transfers' section includes buttons for '+ New transfer', 'Batch process', and 'Export', followed by a table with columns: Beneficiary, Amount, Method, Date, Status, and Actions. The table lists two pending transfers: one to 'Malayan Insurance Co., Inc.' for P125,000.00 via PESONet, and another to 'Pioneer Insurance & Surety Corp.' for P87,500.00 via RTGS. A 'Transfer history' section below shows a table with columns: Reference, Beneficiary, Amount, Method, Date, and Status. It lists two completed transfers: one to 'FPG Insurance Co., Inc.' for P156,000.00 via Wire, and another to 'Standard Insurance Co., Inc.' for P34,500.00 via InstaPay.

Figure 103. Electronic transfer management

Electronic transfers have limits per method: InstaPay up to ₱ 50,000, PESONet up to ₱ 10,000,000, and RTGS and wire for larger amounts (`remittance.transfer_methods`).

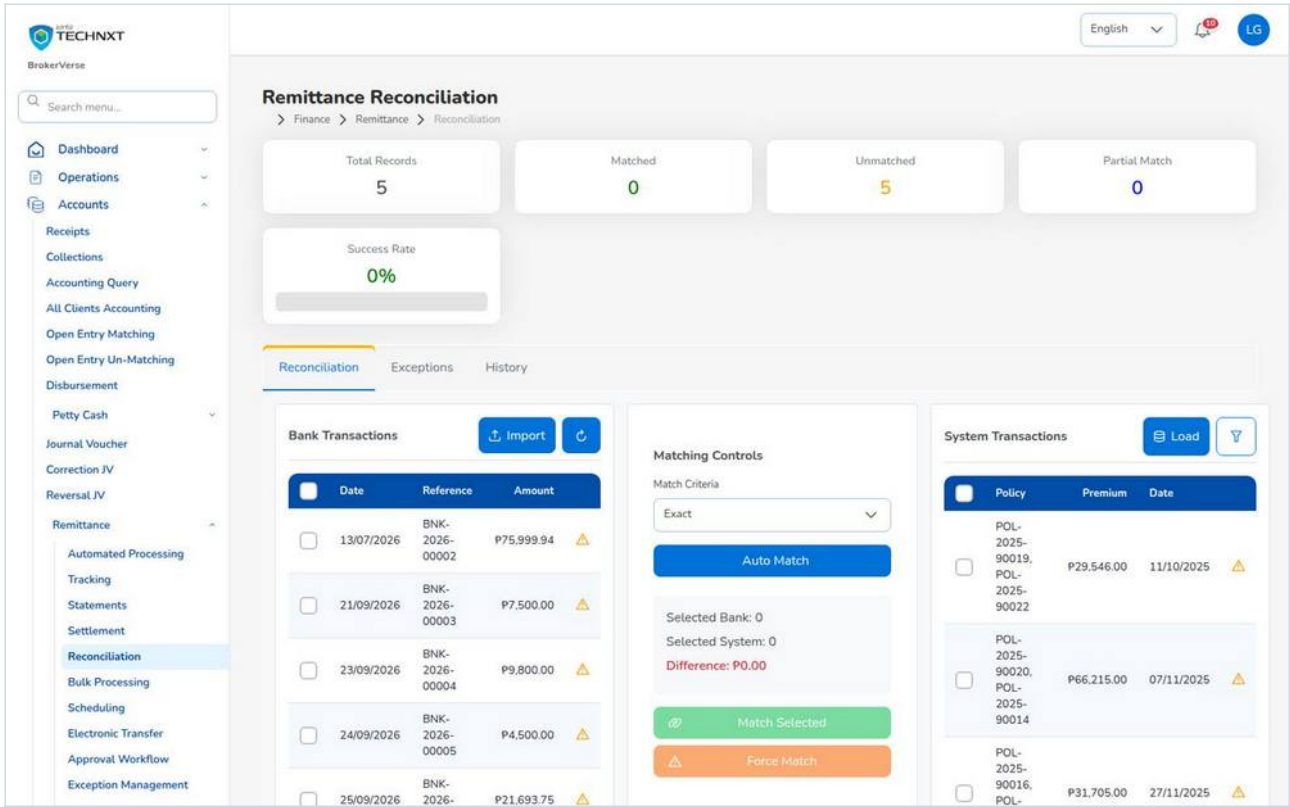

Figure 104. Remittance Reconciliation

Reconciliation matches imported bank transactions (BNK-) with system transactions, exactly or within ₱ 0.50 (`remittance.reconciliation_tolerance`). Select **Auto Match**, or tick one of each and select **Match Selected**.

15 Reinsurance

15.1 Purpose

The reinsurance screens record the treaties that protect large risks, the cessions made under them, the recoveries on claims and the reconciliation of reinsurer statements.

Who uses it: underwriters (all screens except the treaty master), claims officers (Claims Recovery), finance (Reconciliation of reinsurer statements), business and IT administrators (treaty master; **Add Treaty** on the Treaty Dashboard opens the treaty form for them).

Menu	Use it to
Master > Reinsurance Treaty	Add and maintain treaties: quota share, surplus, excess of loss, stop loss; reinsurers, shares, period. New treaties need a second user's approval (<code>reinsurance.treaty_requires_approval</code>).
Reinsurance > Treaty Dashboard	Active treaties, total and available capacity, utilization, premium ceded and claims recovered.
Reinsurance > Cession Tracking	Policies ceded per treaty with cession %, ceded premium and commission; Process Cession and Generate Bordereau .
Reinsurance > Claims Recovery	Recoverable amounts on claims under treaties; Register Recovery .
Reinsurance > Reconciliation	Compare our amounts with the reinsurer's statement; variances above 1% need review (<code>reinsurance.reconciliation_tolerance_percent</code>).
Reinsurance > Analytics	Treaty utilization, loss ratio trend, retention against the 65% target, recovery performance, catastrophe exposure.

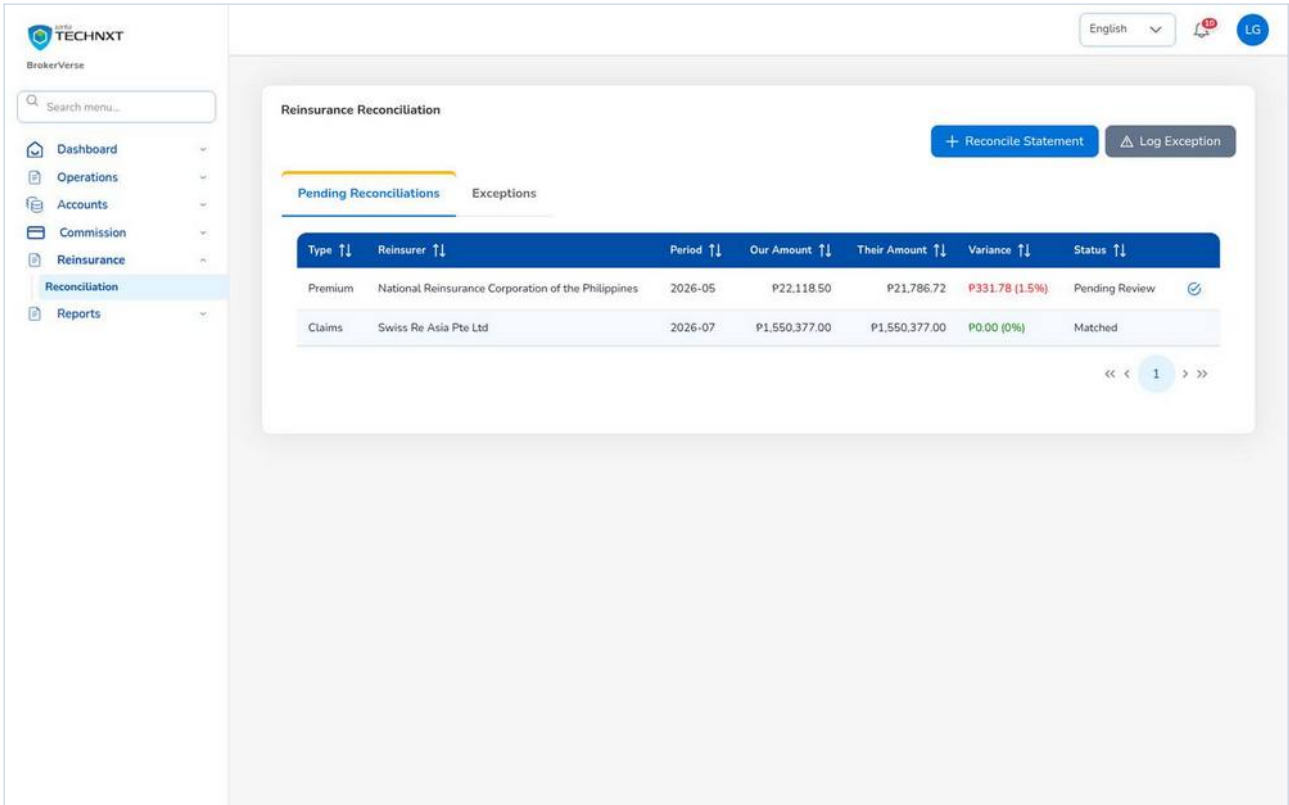

Figure 113. Reinsurance Reconciliation

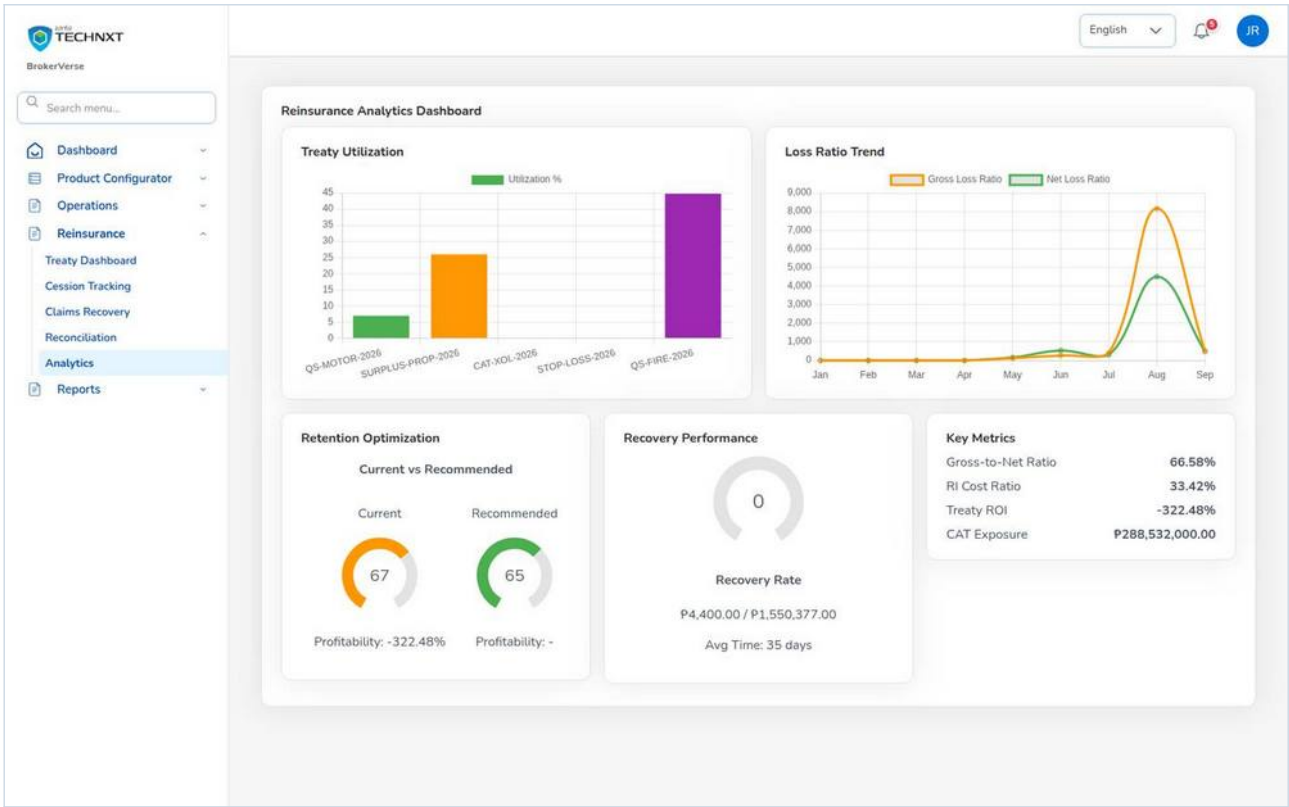

Figure 114. Reinsurance Analytics

Reinsurers must meet the minimum security rating A- (`reinsurance.min_security_rating`). Bordereaux fall due 30 days after the period end. The Reinsurance Cession Register report lists the cessions of a period.

16 Incentives

16.1 Purpose

Incentive programmes reward agents for reaching targets: premium volume, policy count, renewal rate or conversion. Programmes are master data set up by the business or IT administrator. Finance calculates the results, a second finance user approves them (maker-checker), finance pays them, and the agents see their statements. Finance cannot change the programmes it pays.

Screen	Use it to
Master > Incentive Programs	Add a programme: code (INC-), name, type (Target Based, Commission Based, Hybrid, Contest), target metric, base target, frequency (Monthly, Quarterly, Semi-Annual, Annual), start and end dates.
Accounts > Incentive > My Programs	An agent's programmes with target, achievement and potential earning.
Accounts > Incentive > Calculations	New Calculation for a period creates a batch CALC- with the amount per agent, sent for approval.
Accounts > Incentive > Approvals	Approve, reject or Bulk Approve calculation batches (not your own).
Accounts > Incentive > Statement	Statement per agent and month: earnings, year-to-date, pending and last payment, programme breakdown. Finance and administrators choose the agent; an agent sees his own statement.

Figure 117. Incentive Approvals

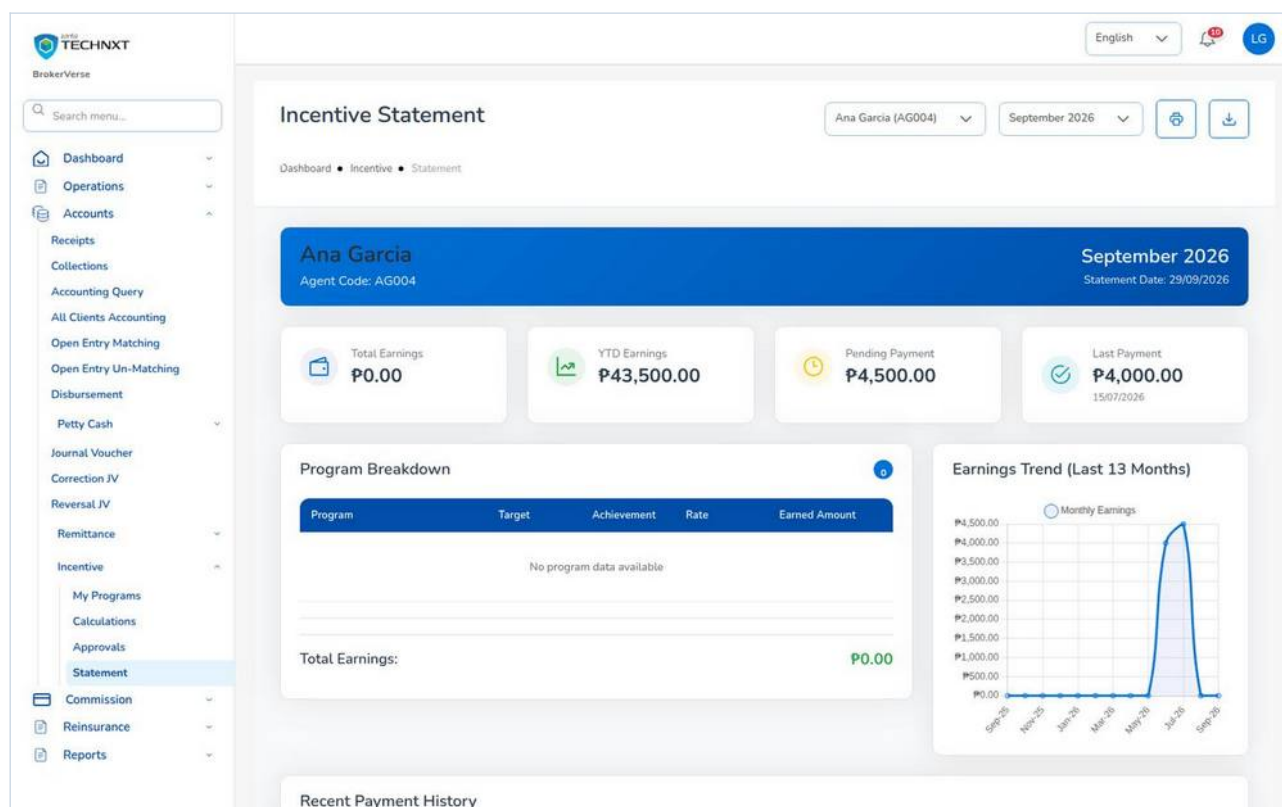

Figure 118. Incentive Statement

Only agents and sales users take part (`incentive.eligible_roles`). The Incentive Results report lists target, achievement and payout per agent.

To run incentives for a period:

1. Finance (maker): **Accounts > Incentive > Calculations, New Calculation**, choose the programme and period. The batch CALC- is created with the amount per agent and sent for approval.
2. A second finance user: **Accounts > Incentive > Approvals**, open the batch and approve or reject it with a reason. The maker cannot approve his or her own batch.
3. The approved amounts appear on each agent's **Statement** and in the Incentive Results report.

Note: The payment schedule and the contact details printed at the foot of the Incentive Statement are standard sample text. Tell agents your own incentive contact.

17 Product Configurator

17.1 Purpose

The Product Configurator holds the products the broker sells and the rules that price them: templates, coverages, rating factors, underwriting rules, documents, approval workflows and insurer mappings. The motor tariff that prices every motor quotation (vehicle classes, CTPL and Auto Passenger PA) is maintained here.

Who uses it: business administrators and underwriters maintain it; sales and customer services can view the dashboard and templates.

Screen	Use it to
Dashboard	See active products, total premium, average loss ratio and commission; open templates; quick actions.
Product Templates	Create, version and edit product templates (the motor tariff lives in template MOT-003-2025).
Coverage Builder	Define coverages: code, name, mandatory or optional, deductible, premium impact.
Rating Engine	Rating factors (vehicle age, driver age, no claim bonus, use, region, fleet, deductible, brand) with their rules; Test Calculator .
Underwriting Rules	Acceptance, validation and loading rules.
Document Manager	Document templates per stage (quotation, policy issuance): policy schedule, CTPL certificate, enrolment form.
Approval Workflows	Sequential or parallel approval steps with SLAs, for example New Product Approval and Rate Change Approval.
Market Mapping	Products mapped to insurers with commission, override and targets.
Risk Mapping	Product definitions by line; Industrial All Risks is defined by risk sections.
Product Analytics	Policies, premium, loss ratio and margin by product.

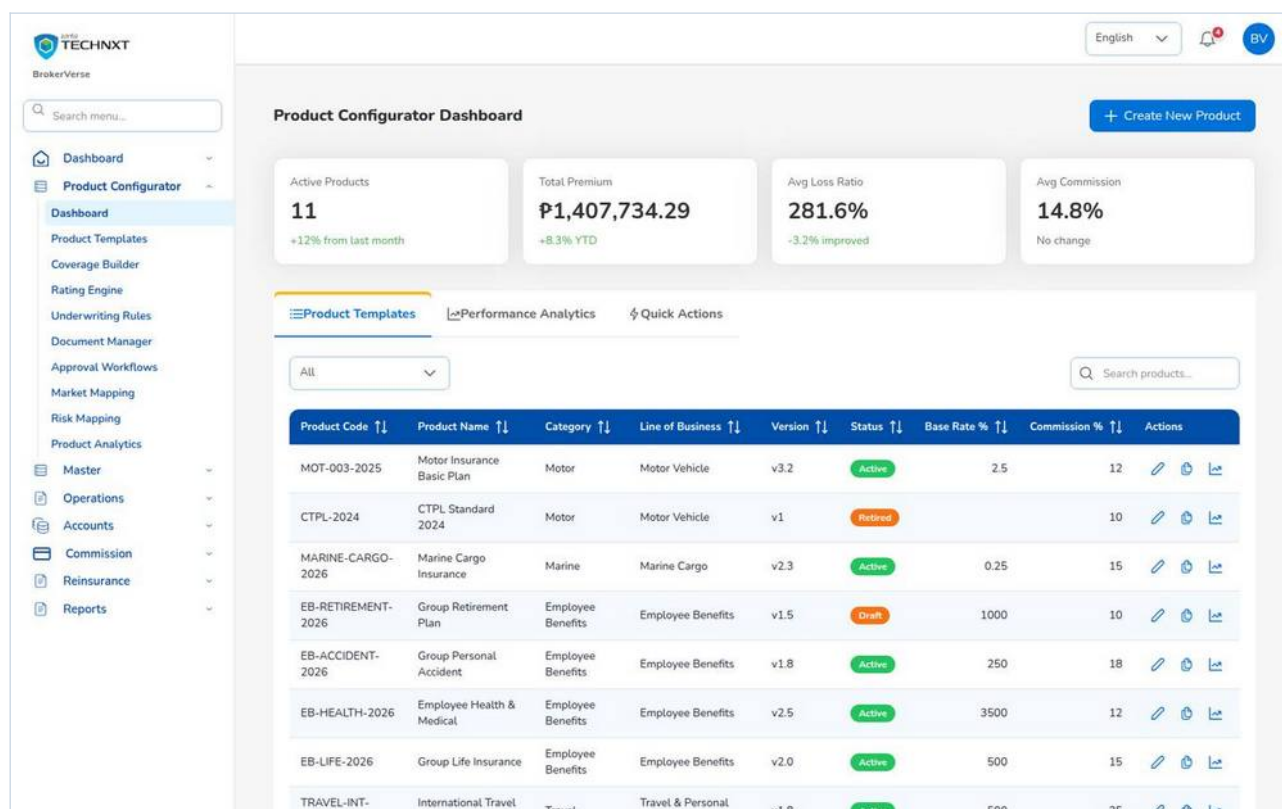

Figure 119. Product Configurator Dashboard

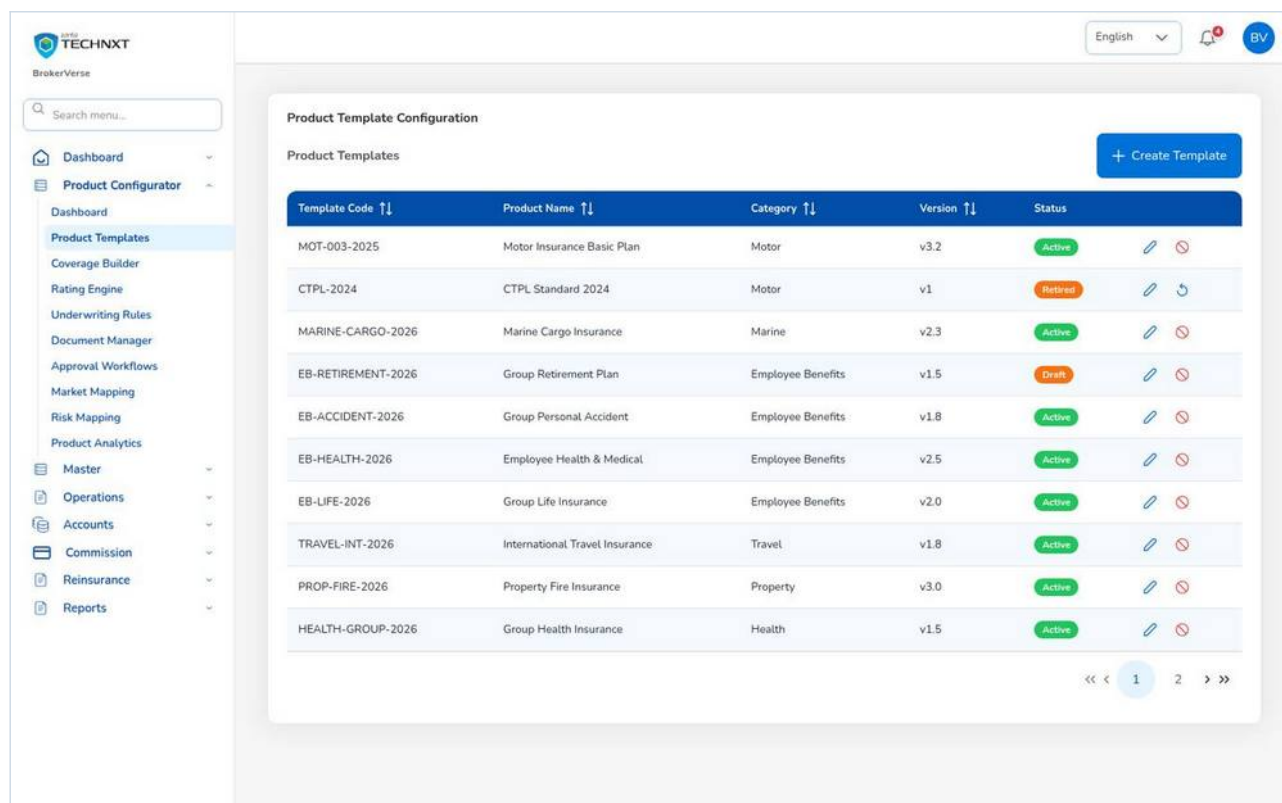

Figure 120. Product Templates

Template statuses: **Draft**, **Active**, **Inactive** and **Retired** (`product.template_statuses`). Only active templates are used by the quotation screens. Use the pencil to edit a template and the arrow icon to reactivate a retired one.

17.2 Maintain the motor tariff (CTPL and Auto Passenger PA)

The template named in `motor.pricing_template_code` (MOT-003-2025) holds the motor tariff.

1. Choose **Product Configurator > Product Templates**.
2. Select the pencil on **MOT-003-2025 Motor Insurance Basic Plan**.
3. Open the **CTPL & Auto PA** tab.
4. For each **Vehicle class**, check the name, **Code**, default **Seats**, **CTPL 1 year (P)** and **CTPL 3 years (P)**. Leave the 3-year amount blank when the 3-year CTPL is not offered for the class.
5. Select **+ Add vehicle class** to add a class, or the bin icon to remove one.
6. Under **Auto Passenger Personal Accident**, set the **Rate (% of limit per seat)** and the **Limits per person offered** (separated by commas).
7. Select **Save Template**.

Product Template Configuration

Important: Quotations are taxed with one set of rates: **Master > Configuration**, group Taxes (VAT 12%, DST 12.5%, LGT 0.75%, FST 2%), applied per line of business by `premium.taxes_by_lob`. The template's **Taxes and fees** tab shows these rates read-only, and the Taxation master keeps its linked records in step. Change a tax rate in Configuration only.

17.3 Coverages, rating and rules

The screenshot shows the 'Coverage Configuration Builder' interface. On the left is a sidebar with navigation options: Dashboard, Product Configurator (selected), Rating Engine, Underwriting Rules, Document Manager, Approval Workflows, Market Mapping, Risk Mapping, Product Analytics, Operations, Reinsurance, and Reports. The main panel is titled 'Insurance Coverage Management' and features a table of coverages. A '+ Add Coverage' button is in the top right. The table has columns for Code, Coverage Name, Type, Deductible, Premium Impact, and Actions. The coverages listed are: OD (Own Damage, Mandatory, P3,000.00, Base), THEFT (Theft, Mandatory, P3,000.00, Base), CTPL (Compulsory Third Party Liability, Mandatory, P0.00, Base), AOG (Acts of Nature, Optional, P5,000.00, +0.5%), VTPL-BI (Excess Bodily Injury, Optional, P0.00, +0.5%), VTPL-PD (Property Damage, Optional, P0.00, +0.5%), APA (Auto Personal Accident, Optional, P0.00, +0.5%), CTPL (CTPL (Compulsory Third Party Liability), Mandatory, P0.00, Base), AOG (Acts of God, Optional, P5,000.00, +0.5%), and HOSP (Hospitalization Benefit, Mandatory, P0.00, Base). Each row has edit, delete, and duplicate icons in the Actions column. A pagination bar at the bottom shows page 1 of 1.

Code	Coverage Name	Type	Deductible	Premium Impact	Actions

Figure 124. Coverage Configuration Builder

The screenshot shows the 'Rating Engine Configuration' interface. The sidebar is the same as in Figure 124, with 'Rating Engine' selected under 'Product Configurator'. The main panel is titled 'Rating Factors & Calculation Rules' and includes a 'Test Calculator' button and a '+ Add Factor' button. It contains a table with columns: Factor Code, Factor Name, Type, Status, Rules Count, and Actions. The factors listed are: VEH_AGE (Vehicle Age, Multiplicative, Active, 1 rule), DRV_AGE (Driver Age, Multiplicative, Active, 1 rule), NCB (No Claim Bonus, Discount, Active, 1 rule), USE (Vehicle Use, Multiplicative, Active, 1 rule), REGION (Garaging Region, Multiplicative, Active, 1 rule), FLEET (Fleet Size, Discount, Active, 1 rule), DED (Voluntary Deductible, Discount, Active, 1 rule), BRAND (Brand Risk Group, Multiplicative, Active, 1 rule), VEH_AGE (Vehicle Age, Multiplicative, Active, 4 rules), and DRV_AGE (Driver Age, Multiplicative, Active, 3 rules). Each row has edit, delete, and duplicate icons in the Actions column. A pagination bar at the bottom shows page 1 of 2.

Factor Code	Factor Name	Type	Status	Rules Count	Actions
> VEH_AGE	Vehicle Age	Multiplicative	Active	1	[Edit] [Delete] [Duplicate]
> DRV_AGE	Driver Age	Multiplicative	Active	1	[Edit] [Delete] [Duplicate]
> NCB	No Claim Bonus	Discount	Active	1	[Edit] [Delete] [Duplicate]
> USE	Vehicle Use	Multiplicative	Active	1	[Edit] [Delete] [Duplicate]
> REGION	Garaging Region	Multiplicative	Active	1	[Edit] [Delete] [Duplicate]
> FLEET	Fleet Size	Discount	Active	1	[Edit] [Delete] [Duplicate]
> DED	Voluntary Deductible	Discount	Active	1	[Edit] [Delete] [Duplicate]
> BRAND	Brand Risk Group	Multiplicative	Active	1	[Edit] [Delete] [Duplicate]
> VEH_AGE	Vehicle Age	Multiplicative	Active	4	[Edit] [Delete] [Duplicate]
> DRV_AGE	Driver Age	Multiplicative	Active	3	[Edit] [Delete] [Duplicate]

Figure 125. Rating Engine Configuration

Select **Test Calculator** on the Rating Engine to try a premium before you activate a change. Select the arrow on a factor to see its rules.

18 Master data and administration

18.1 General masters

The masters hold the reference data that the operational screens offer in their lists. Each master screen works the same way: a list with search, + **Add, Upload** (where offered) for many records at once, the eye to view, the pencil to edit and a status switch to deactivate a record. Records are not deleted; deactivated records disappear from the lists.

Master (Master > Generals)	Holds	Used by
Organization > Company, Branch	The broker company, its licence and its branches (Head Office, Cebu, Davao).	Receipts, vouchers, reports
Insurance Management > Insurance Company	Insurers: code, name, placement e-mail, phone.	Quotations, policies, remittance, claims (loss advice e-mail)
Insurance Management > Line of Business	Motor, Fire, Marine, Casualty, Accident, Engineering, Employee Benefits.	Products, reports
Insurance Management > Product	Products with line of business and commission code.	Policies, commission, reports
Insurance Management > Cover	Covers (own damage, CTPL, acts of nature, auto PA, ...).	Commission rules, coverage
Insurance Management > Signatories	Authorised signatories of quotations.	Order summary
Insurance Management > Vehicle	Vehicle brand, model, variant and seating.	Quotation vehicle lists
Location > Country, State, City Master	Address lists (province = State).	Leads, clients, claims
Commission	Brokerage per insurer, product and cover with effective dates.	Quotation commission, accrual
Employee Management > Hierarchy, Designation, Employee	Staff structure and designations.	Reference
User Management > User, Role	Users and roles (see <i>Users and roles</i>).	Sign-in and access
Incentive Programs, Reinsurance Treaty	Chapters 16 and 15.	

The screenshot shows the 'Insurance Company' master data page. The left sidebar contains a navigation menu with categories like Dashboard, Product Configurator, Master, System Settings, Configuration, Schedules, Audit Trail, and various management sections. The main content area is titled 'Insurance Company' and includes a search bar, an 'Upload' button, and an 'Add' button. Below these is a table listing insurance companies with columns for Company Code, Company Name, E-mail, Phone Number, Modified By, Modified On, Status, and Actions. The table contains five entries: APEX, EVERSAFE, FPG, GOLDEN HORIZON, and INTEGRITY. At the bottom, it shows 'Row count: 5' and pagination '1 - 5 of 13'.

Company Code	Company Name	E-mail	Phone Number	Modified By	Modified On	Status	Actions
APEX	APEX ASSURANCE	placement@apexassurance.example	+63 2 8888 0000		28/09/2026	Active	
EVERSAFE	EVERSAFE INSURE	placement@eversafe.example	+63 2 8888 0000		28/09/2026	Active	
FPG	FPG INSURANCE CO., INC.	uw@fpg.example	+63 2 8888 0000		28/09/2026	Active	
GOLDENHORIZON	GOLDEN HORIZON ASSURANCE	placement@goldenhorizon.example	+63 2 8888 0000		28/09/2026	Active	
INTEGRITY	INTEGRITY INSURANCE CO.	placement@integrity.example	+63 2 8888 0000		28/09/2026	Active	

Figure 129. Master > Insurance Company

The screenshot shows the 'Product Master' data page. The layout is similar to the previous one, with a search bar, 'Add' button, and a table of products. The table has columns for Product Code, Product Name, Line of Business, Commission Code, Modified by, Modified On, status, and Action. It lists five products: CGL, CTPL, FIRE, EB, and MARINE. The bottom shows 'Row count: 5' and pagination '1 - 5 of 8'.

Product Code	Product Name	Line of Business	Commission Code	Modified by	Modified On	status	Action
CGL	COMPREHENSIVE GENERAL LIABILITY	CASUALTY			28/09/2026	Active	
CTPL	COMPULSORY THIRD PARTY LIABILITY	MOTOR			28/09/2026	Active

18.2 Finance masters

Master (Master > Finance)	Holds
Premium, Miscellaneous, Customer and RI-Claims Account Setup	Account determination ranges (company, office, department, business type, product, cover, document type → GL accounts).
Transaction code	Codes used on receipts, vouchers and journals: OR, PV, JV, CM, DM, RM.
Currency, Exchange Rate	PHP, USD, EUR, JPY, SGD and monthly rates to PHP. The currency lists on receipts, bank accounts and other forms come from this master.
Bank	Banks with branch, SWIFT code, e-mail and phone; bank accounts and cheque books.
Account Category	Asset, Liability, Equity, Income, Expense.
Main Account, Sub Account	The chart of accounts (below).
Taxation	Tax codes and rates for reference, kept in step with the configured tax rates.
Petty cash	Petty cash funds with size, minimum cash box and transaction limit.
Remittance Master	The 16 remittance configuration types (adjustment types, agency and direct bill set-ups, approval, schedules, templates ...).

Figure 138. Main Account Master – Chart of Accounts

Master > Finance > Main Account is the chart of accounts: a Philippine broker chart grouped by account type and financial statement group (128 accounts). For each account you see the code, name, statement group, category, normal balance (debit or credit), whether it is an open-item account, whether manual journals may use it, its system use and status. Filter by account type, statement group or status.

Sub Account holds the sub-ledgers of a main account, for example 4401003001 *Audit Fees – Statutory* under 4401003 *Professional Fees*.

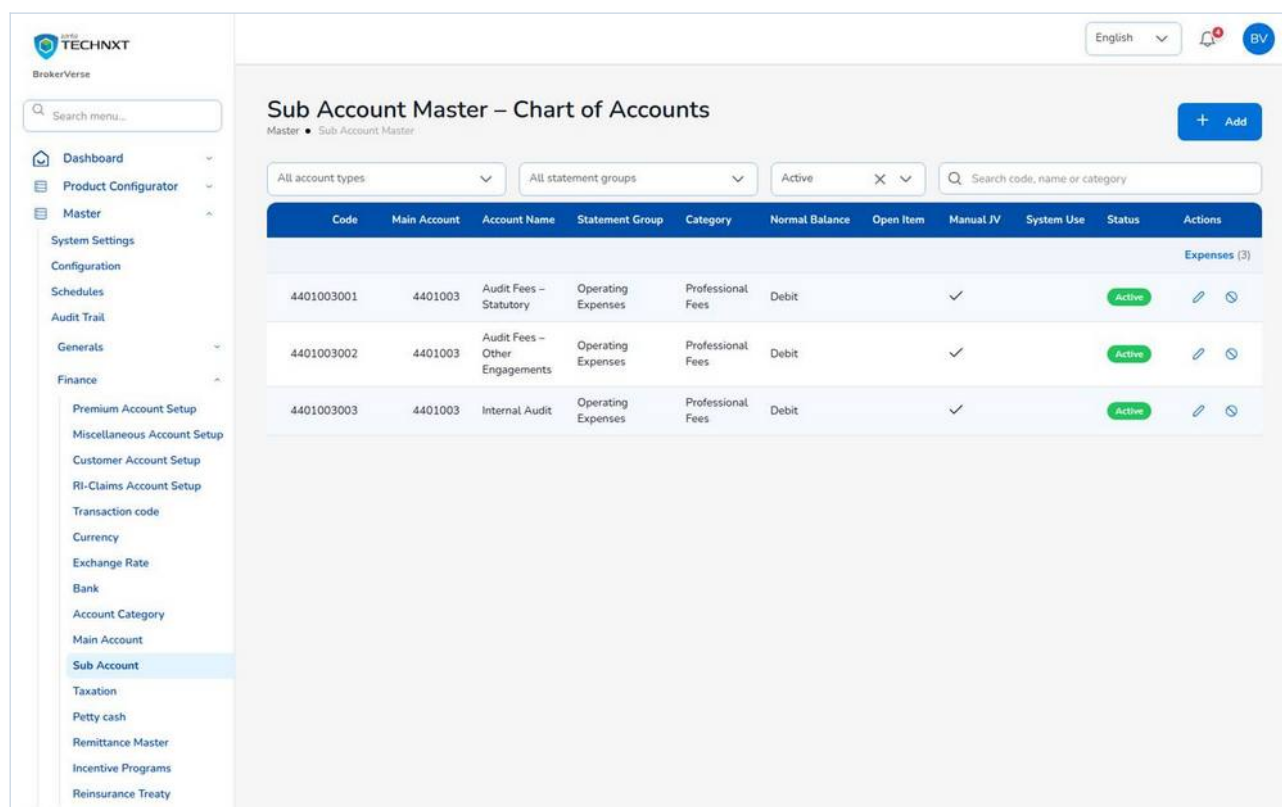

Figure 139. Sub Account Master

To add an account:

1. Select **+ Add**.
2. Enter the code, name, type, statement group, category and normal balance.
3. Tick **Open Item** for receivable or payable accounts matched item by item, and **Manual JV** if journal vouchers may post to it.
4. Save.

Accounts marked for system use (cash, receivables, payables, commission, VAT, withholding tax) are protected: the system posts to them automatically. Their codes are set in **Master > Configuration**, group *accounting*.

Key accounts used by the system:

Code	Account	Posted by
1101001	Cash on Hand	Cash receipts
1102001	Cash in Bank – Operating Account	Receipts by transfer and cheque, vouchers
1102002	Cash in Bank – E-wallet Clearing (GCash)	Online and GCash receipts
1202001	Premiums Receivable – Direct Clients	Policy and endorsement bills, receipts
1203001	Commission Receivable – Insurers (Direct Bill)	Direct-bill issue, debit note collections
1302001	Creditable Withholding Tax (BIR 2307)	Insurer EWT on direct-bill commission
2201001	Premiums Payable to Insurers	Bills, remittance vouchers
2203001	Commission Payable – Agents and Referrers (Comsub)	Commission approval and payout
2204001	Withholding Tax Payable	Commission payout

Code	Account	Posted by
2204003	Output VAT Payable	VAT on direct-bill commission
3201001	Brokerage Commission Income	Policy issue, endorsements
4401010	Commission Expense – Agents and Referrers (Comsub)	Commission approval

18.4 Users and roles

User Access Administrators and IT Administrators manage users on **Master > Generals > User Management**.

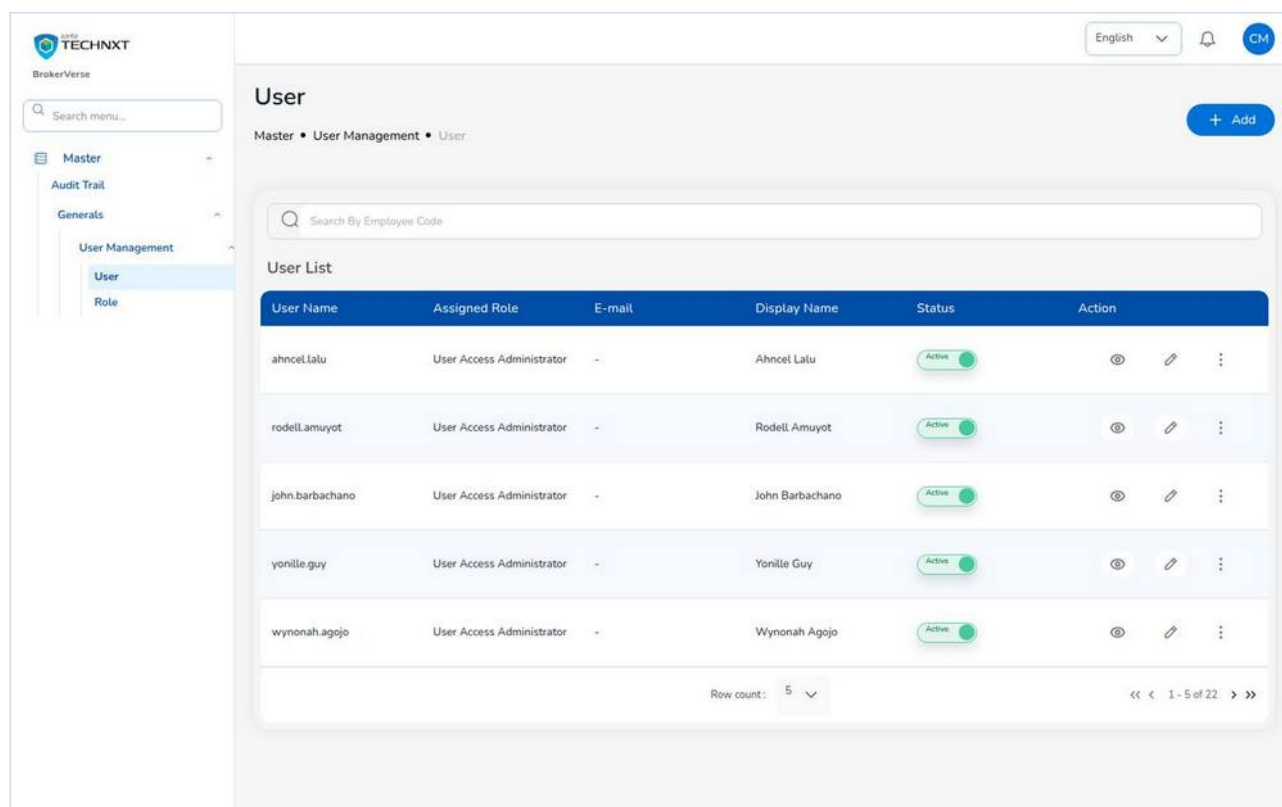

Figure 140. Master > User Management > User

Add a user

1. Choose **Master > Generals > User Management > User** and select **+ Add**.
2. Enter the **Username** (the user ID for signing in), **E-mail** and **Display Name**. All three are required; the e-mail address is where **Forgot password?** sends its code.
3. Leave **Password** empty (*Leave empty for a temporary password*). The system then generates a temporary password.
4. Tick one or more **Roles**. At least one role is required. Only an IT Administrator can give the IT Administrator or Business Administrator role.
5. Select **Save**. **Save** stays disabled until the required fields are filled.
6. The **Temporary password** dialog shows the password once. Copy it and give it to the user in person or by phone, then select **Done**.

The screenshot shows the 'Add User' interface. On the left is a sidebar with navigation links: Master, Audit Trail, Generals, User Management, User, and Role. The main area is titled 'Add User' and contains a breadcrumb 'Master > User Management > Add User'. The form has four input fields: Username (juan.cruz), E-mail (juan.cruz@brokerverse.example), Display Name (Juan Cruz), and Password (empty). Below the fields is a 'Roles' section with checkboxes for various roles. The 'Sales / Relationship Manager' role is selected. A 'Save' button is located at the bottom right of the form.

Figure 141. Add User (example values)

At the first sign-in the user must choose a new password (Chapter 1). If you type a password instead of leaving the field empty, it must follow the password rules and the user must still change it at the first sign-in. A duplicate username is refused. The creation is recorded in the audit trail.

Tip: Users created without an e-mail address in earlier versions show "-" in the E-mail column and cannot use **Forgot password?**. Add their e-mail address with the pencil.

Unlock, reset a password, turn off two-step verification

The three-dot button at the end of a user row opens the account actions:

Action	Use it when	What the system does
Unlock (locked users only; the list shows a Locked tag)	The user was locked after 5 failed sign-ins.	Unlocks the account and clears the failed attempts.
Reset password	The user forgot the password and cannot use Forgot password.	Generates a temporary password, shows it once, ends all the user's sessions; the user must choose a new password at the next sign-in.
Turn off two-step verification (users with two-factor on)	The user lost the phone with the authenticator app.	Turns two-factor off; the user sets it up again.
Sign-in history	Access reviews and investigations.	Lists the user's sign-in attempts, newest first: date and time, result, detail (for example <i>Wrong password</i> , <i>Account locked</i>), method, IP address and browser.

Each action asks for confirmation and is recorded in the audit trail. Only an IT Administrator may act on IT or Business Administrator accounts or on his or her own account; the server applies the same rule.

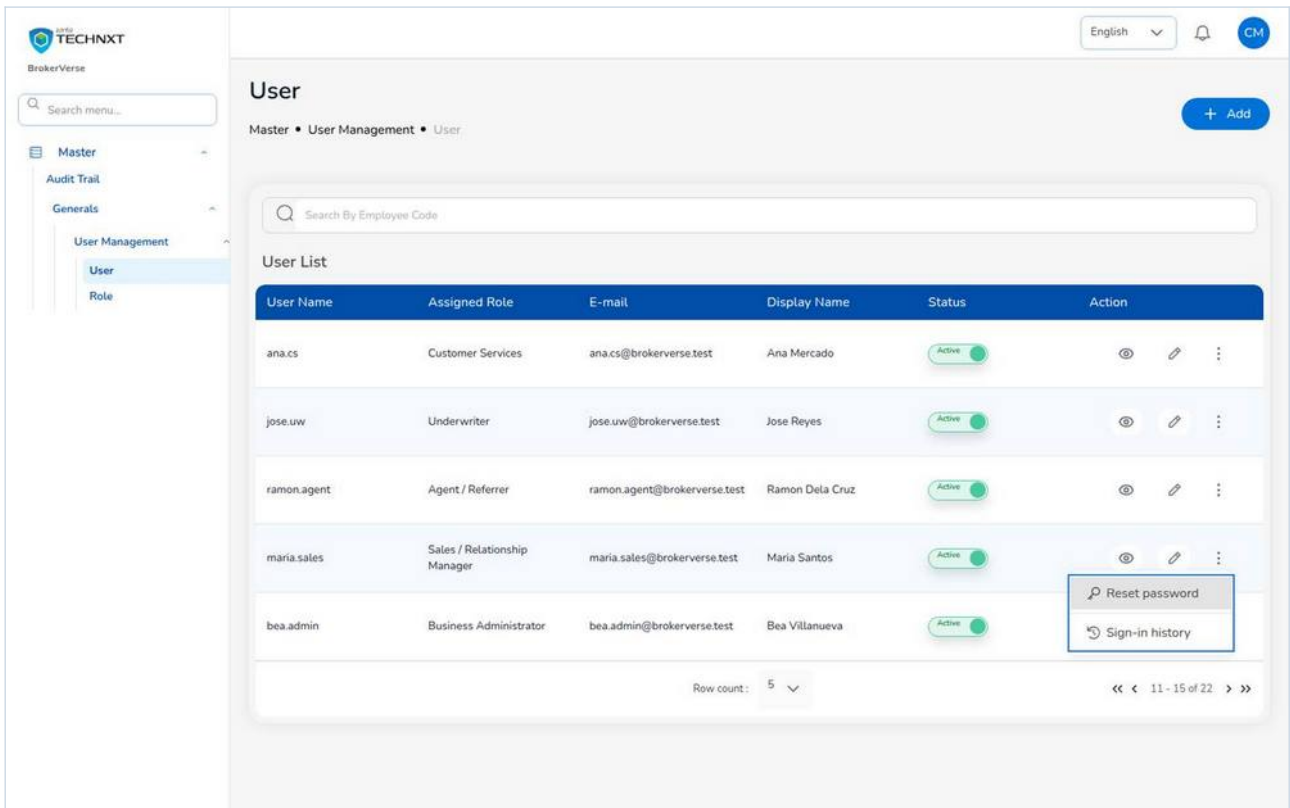

Figure 142. Account actions of a user

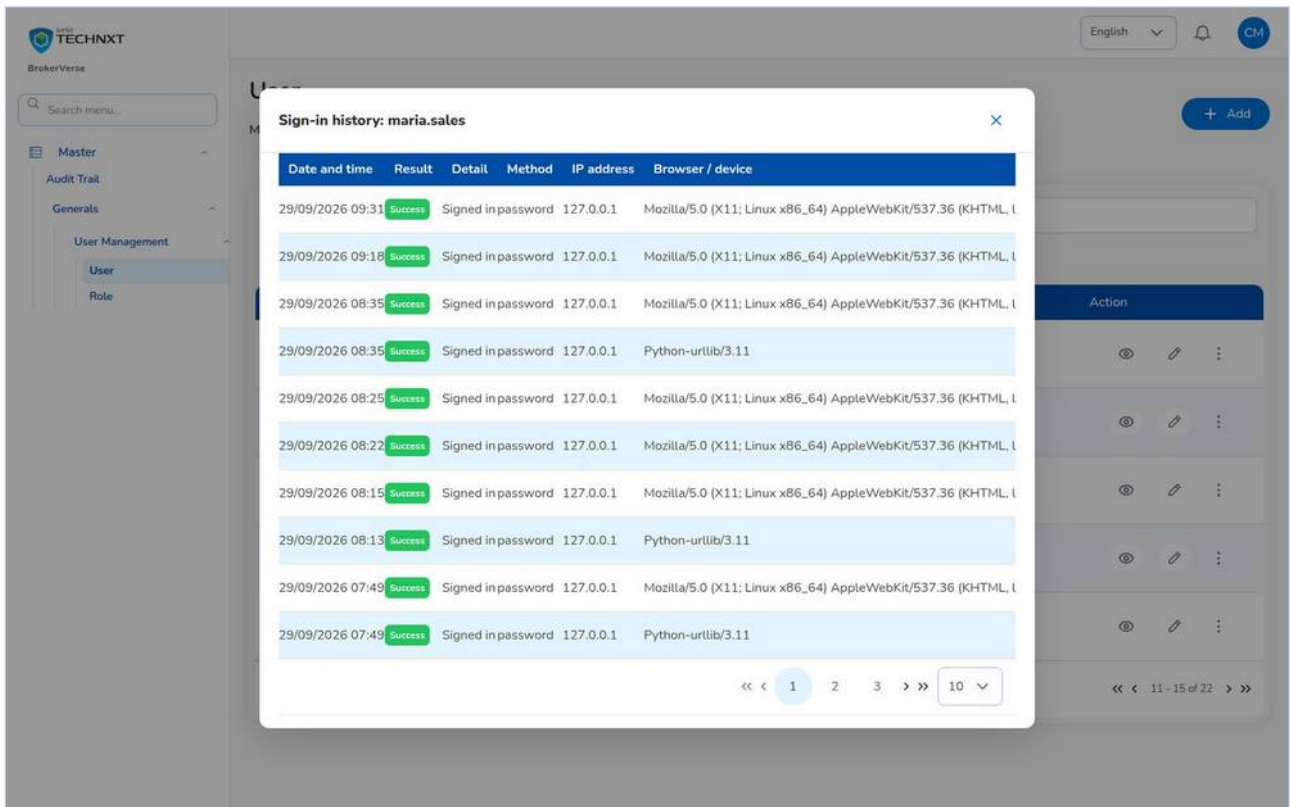

Figure 143. Sign-in history of a user

Change and deactivate users

- Select the pencil on a user to change the display name, e-mail or roles. A change of roles takes effect at once: the user's open sessions end.
- Use the **Status** switch to deactivate a leaver (the history is kept and the user's sessions end) or to reactivate a user.
- Give each person one user of their own. Keep maker and checker duties on different people.

Roles

Role Code	Role Name	Modified By	Modified On	Status	Action
IT-ADMIN	IT ADMINISTRATOR		28/09/2026	Active	
BA	BUSINESS ADMINISTRATOR		28/09/2026	Active	
SALES	SALES / RELATIONSHIP MANAGER		28/09/2026	Active	
UNDERWRITING	UNDERWRITER		28/09/2026	Active	
CUSTOMER-SERVICES	CUSTOMER SERVICES		28/09/2026	Active	

Row count: 5

Navigation: << < 1 - 5 of 5 >> >>

Figure 144. Master > User Management > Role

The nine roles are listed in Chapter 1. Open a role to see its permissions: read and write rights per module (for example `read:receipts`, `write:journal-vouchers`). The server checks these permissions on every request. System roles cannot be deleted, and a role with users cannot be deleted.

18.5 System Settings

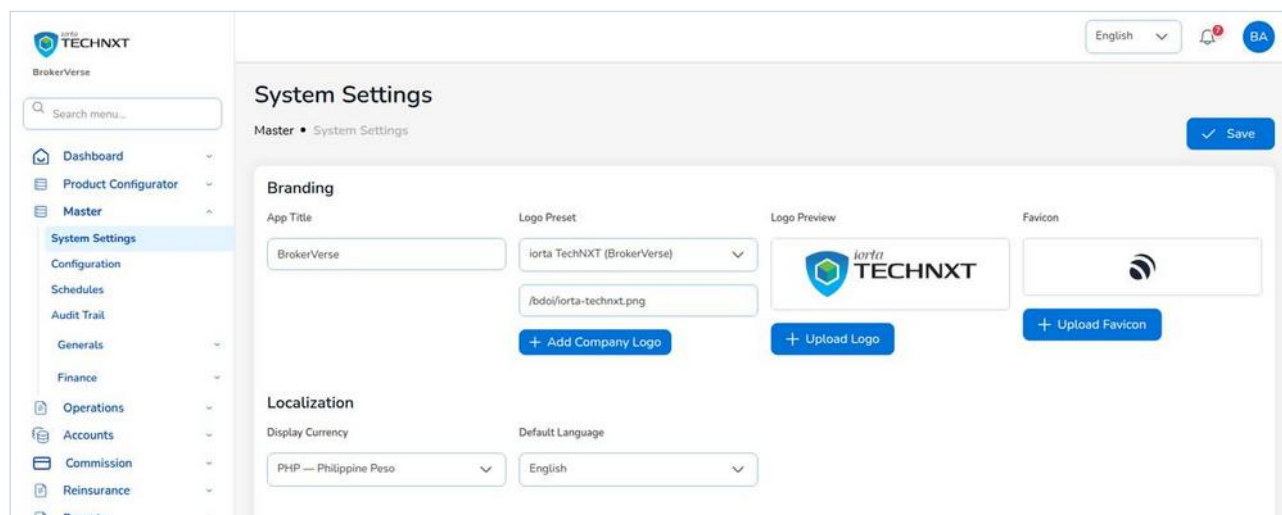

Figure 145. Master > System Settings

Master > System Settings (IT and business administrators) controls the look of the system:

Section	Settings
Branding	App Title (browser tab and system name), Logo Preset (standard: <i>iorta TechNXT (BrokerVerse)</i>), Add Company Logo , Upload Logo , Upload Favicon (images up to 2 MB). Your own logo replaces the iorta TechNXT logo in the sidebar and on the sign-in page.
Localization	Display Currency (PHP — Philippine Peso) and Default Language .
Theme	Primary Color (#0072d8) and Secondary Color (#004ea8), chosen from the presets or typed as a hex code, with Theme preview .

Select **Save**. The settings apply to every user, including the sign-in page.

18.6 Configuration

The screenshot shows the 'Master > Configuration' interface. On the left is a sidebar with a search bar and a menu including Dashboard, Product Configurator, Master, System Settings, Configuration (highlighted), Schedules, Audit Trail, Generals, Finance, Operations, Accounts, Commission, Reinsurance, and Reports. The main area has a breadcrumb 'Master > Configuration' and a 'Save changes' button. Below is a tabbed interface with tabs: General, Accounting, Branding, Claims, Collections, Commission, Currency, Dashboard, Direct bill, and Document number. The 'General' tab is selected, showing a form with the following fields:

- Application title (browser tab and header): BrokerVerse
- Company name: BrokerVerse
- Date format: DD/MM/YYYY
- Default language: en
- Front-end base URL (links in e-mails, e.g. quotation approval): http://localhost:3000
- Available languages: A table with columns 'Code' and 'Label'. It lists 'en' (English), 'th' (Thai), and 'fil' (Filipino), each with a delete icon.
- Mobile number hint shown on forms: 0917 123 4567 or +63 917 123 4567
- Mobile number pattern (national number without the leading 0 or country code): ^9\d{9}\$
- Phone country code: +63
- System name: BrokerVerse
- Time zone: Asia/Manila

At the bottom of the available languages section is a '+ Add row' button.

Figure 146. Master > Configuration

Master > Configuration holds every business parameter, grouped in tabs with plain names (for example *Accounting*, *Claims*, *Collections*, *Commission*, *Dashboard*, *Direct bill*, *General*, *Quotations*, *Renewals*, *Reports*, *Security*, *Taxes*). Each setting shows its label; point at the label to see the technical key. Business values that the system uses (tax rates, limits, windows, e-mail texts, lists offered on the screens) are all kept here, not in the program.

1. Choose the tab. Scroll the tab strip sideways for more tabs.
2. Change the value. The editor follows the kind of value (see the table).
3. Select **Save changes**. The change applies at once and is recorded in the audit trail with the old and new value.

Kind of value	How you edit it
Number, text, switch	Type the value or use the switch.
Simple list	Values separated by commas, for example 30, 60, 90, 120.
List of records	A small table: edit the cells, add or remove rows (for example the available languages with their code and label).
E-mail template	A multi-line box; keep the {{placeholders}}, for example {{code}} or {{companyName}}.
Other structures	Indented text (JSON).

The screenshot shows the 'Configuration' page in the BrokerVerse system, specifically the 'Security' tab. The left sidebar contains a navigation menu with options like Dashboard, Product Configurator, Master, System Settings, Schedules, Audit Trail, Generals, Finance, Operations, Accounts, Commission, Reinsurance, and Reports. The main content area is titled 'Configuration' and includes a 'Save changes' button. The 'Security' tab is active, displaying various security parameters in a grid layout. These parameters include API rate limits, sign-in/forgot-password rate limits, password requirements (length, complexity, age), two-factor authentication settings, and email templates for password resets. Each parameter has a corresponding input field or toggle switch.

Configuration
Business parameters used by the system. Changes apply immediately and are recorded in the audit trail.

Security

- API rate limit per signed-in user (or per IP without sign-in): max requests in windowSeconds (max 0 = off)

```
{
  "max": 600,
  "windowSeconds": 60
}
```
- Sign-in / forgot-password rate limit per IP and per username (max attempts in windowSeconds)

```
{
  "max": 10,
  "windowSeconds": 300
}
```
- Refuse the last N passwords (0 = off)
- Password maximum age in days before a change is required (0 = never)
- Minimum password length
- Password must contain a digit
 ☒
- Password must contain a lower-case letter
 ☒
- Password must contain a symbol
 ☒
- Password must contain an upper-case letter
 ☒
- Roles that must enrol in two-factor authentication
- Wrong entries allowed for one password reset code before it is withdrawn
- Minutes a password reset code stays valid
- Password reset e-mail body (HTML: {{code}}, {{minutes}}, {{companyName}})

<p>Your verification code is {{code}}. It expires in {{minutes}} minutes. If you did not ask for it, ignore this e-mail.</p>
- Password reset e-mail subject {{{companyName}}}
- Minutes a restricted sign-in (forced password change, two-step enrolment) stays valid
- Roles that only see their own book (records they own or of clients they own)
- Minutes allowed to enter the two-factor code after the password
- Issuer name shown in the authenticator app

Figure 147. Configuration: security settings

The screenshot shows the 'Configuration' page in the BrokerVerse system, specifically the 'Direct bill' tab. The left sidebar is the same as in Figure 147. The main content area is titled 'Configuration' and includes a 'Save changes' button. The 'Direct bill' tab is active, displaying various direct billing parameters in a grid layout. These parameters include VAT registration status, commission amounts, VAT rate on direct-bill commission, days after the debit note date that the commission falls due, default billing mode, expanded withholding tax, and email templates for commission debit notes. Each parameter has a corresponding input field or toggle switch.

Configuration
Business parameters used by the system. Changes apply immediately and are recorded in the audit trail.

Direct bill

- Broker is VAT-registered (output VAT is charged on direct-bill commission)
 ☒
- Commission amounts already include VAT (VAT is extracted) instead of VAT being added on top
 ☐
- VAT rate on direct-bill commission
- Days after the debit note date that the commission falls due
- Payment instructions printed on the commission debit note

Please settle the amount due net of the expanded withholding tax on the commission and send BIR Form 2307 for the tax withheld.
- Title printed on the commission debit note
- Default billing mode when a policy is issued: broker (client pays the broker) or direct (client pays the insurer; the broker bills its commission with a debit note)
- Debit note e-mail body (HTML with placeholders)

<p>Dear {{{insurerName}}}</p><p>Please find our commission debit note {{dnNumber}} for {{{amount}}}, due on {{{dueDate}}}</p><p>Kindly settle the amount net of the expanded withholding tax on the commission and send BIR Form 2307 for the tax withheld.</p><p>{{{companyName}}}</p>
- Debit note e-mail subject {{{dnNumber}}, {{{insurerName}}}, {{{amount}}}, {{{dueDate}}}, {{{companyName}}}
- Expanded withholding tax the insurer deducts from the commission (creditable, BIR Form 2307)
- Commission debit note {{{dnNumber}}} - {{{companyName}}}

18.7 Schedules

Schedules
Jobs run automatically on the timetable below (server time). Run a job now to test it.

Job	What it does	Schedule	Enabled	Last run	Last status
Renewal notices	Create renewal reminders and notifications for policies expiring within the configured notice windows	Daily at 06:00	Yes	29/09/2026 06:00	success
Policy expiry	Mark policies past their expiry date as expired	Daily at 00:15	Yes	29/09/2026 00:15	success
Quotation expiry	Expire quotations older than the configured validity	Daily at 00:30	Yes	29/09/2026 00:30	success
Receivable ageing	Recompute ageing buckets for open receivables and notify collections	Daily at 07:00	Yes	29/09/2026 07:00	success
Daily reports	Generate the scheduled daily reports (production register, collections, claims position)	Daily at 05:00	Yes	29/09/2026 05:00	success
E-mail outbox	Deliver queued e-mails	Every 5 minutes	Yes	29/09/2026 09:40	success
Renewal notice queue	Send queued renewal notices and retry stale jobs	Every minute	Yes	29/09/2026 09:44	success
Renewal pipeline	Enrol policies expiring within the pipeline window and lapse renewals past the grace period	Daily at 05:30	Yes	29/09/2026 05:30	success
Collection reminders	E-mail and notify clients about premiums falling due	Daily at 08:00	Yes	29/09/2026 08:00	success

Figure 150. Master > Schedules

Master > Schedules lists the jobs the system runs by itself (business time, Asia/Manila). When several API servers run, each scheduled run happens once. For each job you see what it does, the schedule in plain words, whether it is enabled, the last run and its status.

Icon	Action
Run (▶)	Run the job now, for example after changing a setting. The result shows, for example <i>Updated: 5</i> .
History	The past runs with their results.
Pencil	Change the timetable or enable / disable the job.

The jobs are listed in Appendix D.

18.8 Audit trail

Audit Trail
Every create, update, approval and sign-in, newest first.

Figure 151. Master > Audit Trail

Master > Audit Trail lists every create, update, approval, report run and sign-in, newest first: when, user, record type, record ID, action and the change (before and after values).

1. Enter a **Record type** (for example *session* for sign-ins, *policy*, *receipt*, *journal-voucher*), a **Record ID** or a **User**.
2. Select **Search**.

Use the audit trail for investigations, access reviews and to prove that maker and checker were different people.

19 Reports

19.1 How to run a report

BrokerVerse has 19 reports. Every report opens on the same report screen, with the filters that report uses. You reach it in two ways:

- **Reports > All Reports** lists every report your role may run, grouped into **Operational Reports** and **Financial Reports**, with a short description. Type in **Search reports** to find one, then select the report.
- **Reports > Operational Reports** and **Reports > Financial Reports** hold shortcuts to the most used reports (Production, Claims, Renewal, Remittance, Broker Commission; SOA / Premium Receivable, Collection Report, Payables, Journal, Trial Balance).

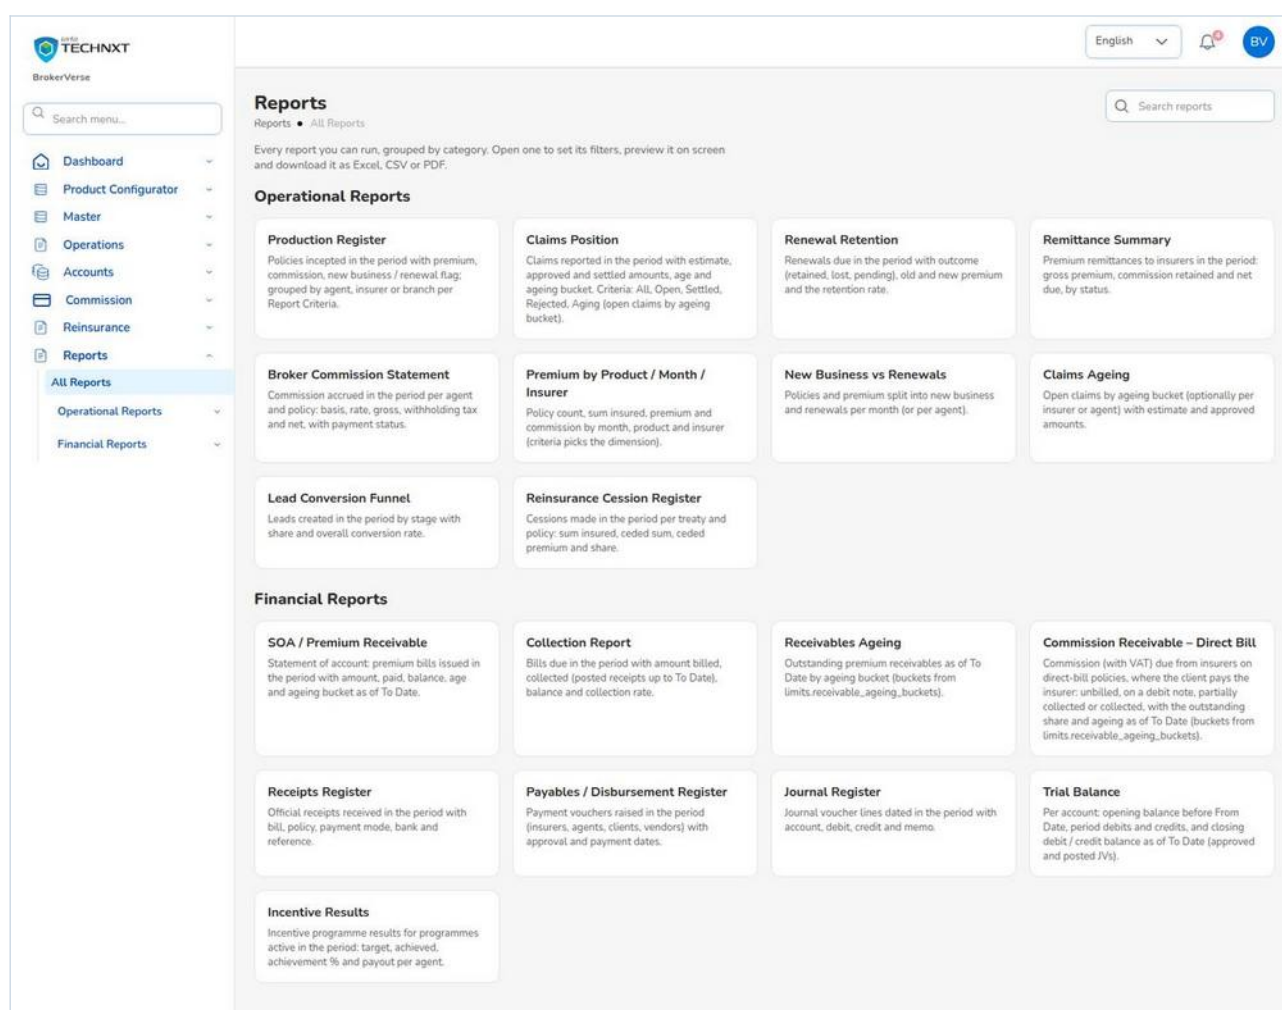

Figure 152. Reports > All Reports (Business Administrator: all 19 reports)

To run a report:

1. Open the report.
2. Choose the **Report Criteria**, for example *Overall*, *Agent*, *Principal Insurer* or *Branch*. The filters that the criteria uses become available; the others show *Used with criteria ...* and stay disabled.
3. Check the **From Date** and **To Date** (DD/MM/YYYY). They start with the current month.
4. Choose the **Agent**, **Company (principal insurer)**, **Branch**, **Client**, **Product** or status if you need them.
5. Select **Preview** to see the first page of the report on screen (up to 50 rows, amounts right-aligned). The title shows how many rows the report has.
6. Choose the **File format**: **CSV**, **Excel (XLSX)** or **PDF**, then select **Generate**. The file is created on the server and downloads.

Figure 154. Reports > Operational Reports > Production, with the criteria list open

- Files hold up to 50,000 rows (`reports.max_rows`). Download links stay valid for 72 hours; generated files are kept for 90 days.
- Every generated file is recorded in the audit trail.
- The IT Administrator can set up report schedules, which e-mail a report on a timetable to a list of recipients.
- The *Daily reports* job generates the Production Register, the Collection Report and the Claims Position every morning at 05:00.

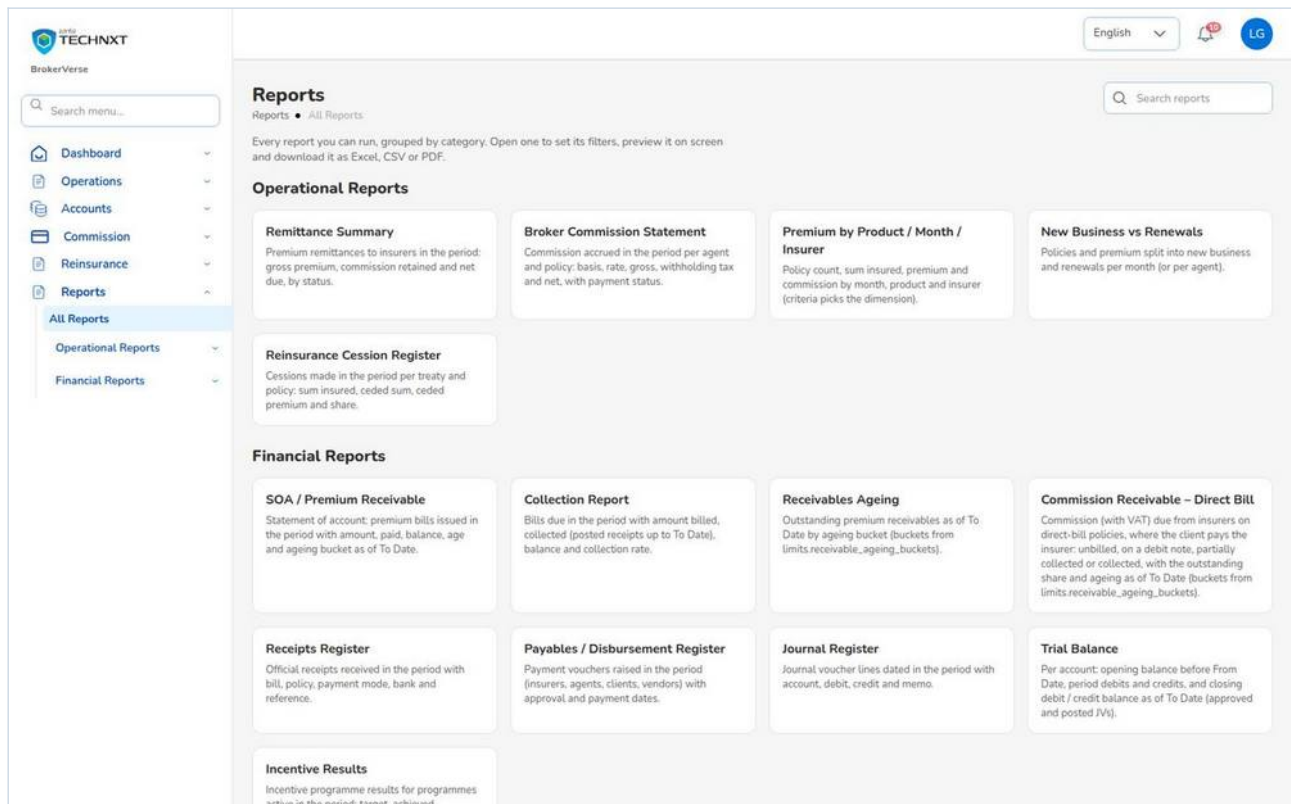

Figure 155. Finance: Reports > All Reports shows the reports of the finance role

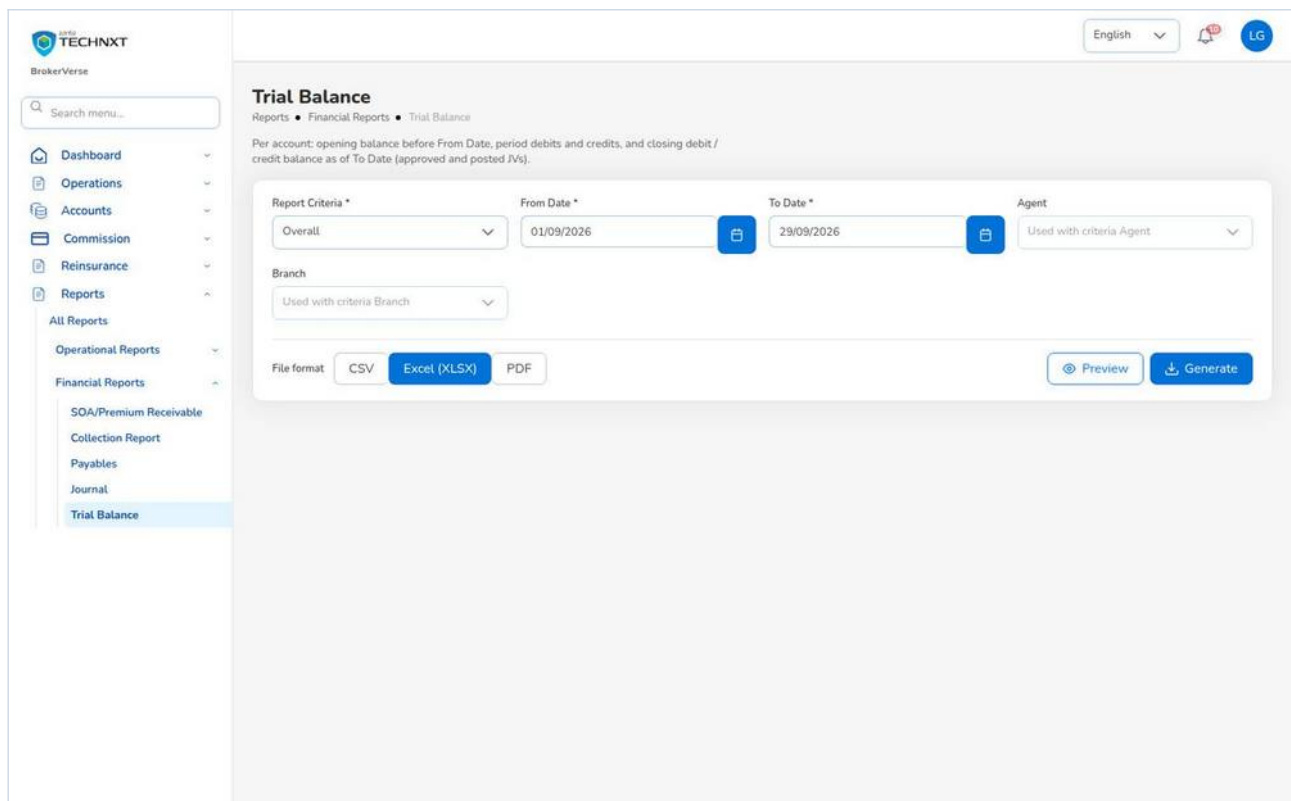

Figure 156. Reports > Financial Reports > Trial Balance

19.2 The report catalogue

Report	What it shows	Roles (besides administrators)
Production Register	Policies incepted in the period: premium, commission, new business or renewal, billing mode; by agent, insurer, branch or billing mode. Also Export Report on the Executive Dashboard.	Sales, underwriting, customer services, claims
Claims Position	Claims reported: estimate, approved, settled, age and bucket. Criteria All, Open, Settled, Rejected, Aging.	Sales, underwriting, customer services, claims
Renewal Retention	Renewals due: retained, lost or pending, old and new premium, retention rate.	Sales, underwriting, customer services, claims
Remittance Summary	Remittances to insurers: gross premium, commission retained, net due, status.	Sales, underwriting, customer services, claims, finance
Broker Commission Statement	Commission per agent and policy: basis, rate, gross, WHT, net, paid status, billing mode.	Sales, underwriting, customer services, claims, finance
Premium by Product / Month / Insurer	Policy count, sum insured, premium and commission by month, product or insurer.	Sales, underwriting, customer services, claims, finance
New Business vs Renewals	Policies and premium split into new business and renewals by month or agent.	Sales, underwriting, customer services, claims, finance
Claims Ageing	Open claims by ageing bucket (30/60/90/180 days) with estimate and approved amount.	Sales, underwriting, customer services, claims
Lead Conversion Funnel	Leads by stage (new to converted or lost) with share and conversion rate.	Sales, underwriting, customer services
Reinsurance Cession Register	Cessions per treaty and policy: sum insured, ceded sum and premium, share.	Underwriting, finance
SOA / Premium Receivable	Bills issued: amount, paid, balance, age and bucket as of the To Date.	Finance, sales
Collection Report	Bills due: billed, collected, balance and collection rate.	Finance
Receivables Ageing	Outstanding receivables by bucket (30/60/90/120 days). Also on screen: Accounts > Collections > Aging Report.	Finance, sales
Commission Receivable – Direct Bill	Commission and VAT due from insurers on direct-bill policies: unbilled, on a debit note, partly or fully collected, with ageing. Also from Direct Bill Processing.	Finance
Receipts Register	Official receipts: bill, policy, payment mode, bank, reference.	Finance
Payables / Disbursement Register	Payment vouchers to insurers, agents, clients and suppliers with approval and paid dates.	Finance
Journal Register	Journal lines: account, debit, credit, memo, status.	Finance
Trial Balance	Opening balance, period debits and credits and closing balance per account, by account type and statement group.	Finance

Report	What it shows	Roles (besides administrators)
Incentive Results	Programme target, achieved, achievement % and payout per agent.	Finance, sales

Agents and User Access Administrators have no Reports menu. An agent asks finance for his Broker Commission Statement.

19.3 Other exports

Screen	Export
Executive Dashboard	Export Report: Production Register (XLSX) for the chosen dates.
Claims Dashboard	Export Report: claims data for the chosen dates (spreadsheet).
Leads	Generate Report: the lead list by category (spreadsheet).
Accounting Query, All Clients Accounting	Export / Export CSV.
Remittance screens	Export and print buttons on history, exceptions and statements.

20 Persona quick guides

Each page below is a one-page summary for one persona: where you land, your daily tasks and where to find them, the approvals you give or need, and the reports you use. The module chapters give the detail.

20.1 IT Administrator (BrokerVerse)

Role: IT Administrator (it-admin). **Menus:** all. **Landing:** Executive Dashboard.

Task	Where
Check that the system is up and the jobs ran	Master > Schedules (last run and status)
Change a business parameter (with the owner's agreement)	Master > Configuration > tab > Save changes
Branding, logo, colours, language	Master > System Settings
Create users and assign roles (or support the User Access Administrators)	Master > Generals > User Management > User
Make two-factor authentication compulsory for a role	Master > Configuration > Security (security.require_2fa_roles)
Review sign-ins and changes	User list > ... > Sign-in history ; Master > Audit Trail (record type <i>session</i>)
Run a job now after a change	Master > Schedules > Run
Reports in CSV, XLSX or PDF; report schedules	Reports > All Reports; report schedules (/api/reports)

- Keep the administrator user for administration. Use persona users for business work, so that commission and maker-checker work as intended.
- Before go-live: e-mail (SMTP), time zone Asia/Manila on the application and the database servers, your logo and name in System Settings, GL accounts, numbering prefixes, password of the administrator.
- You cannot approve a transaction you entered yourself.

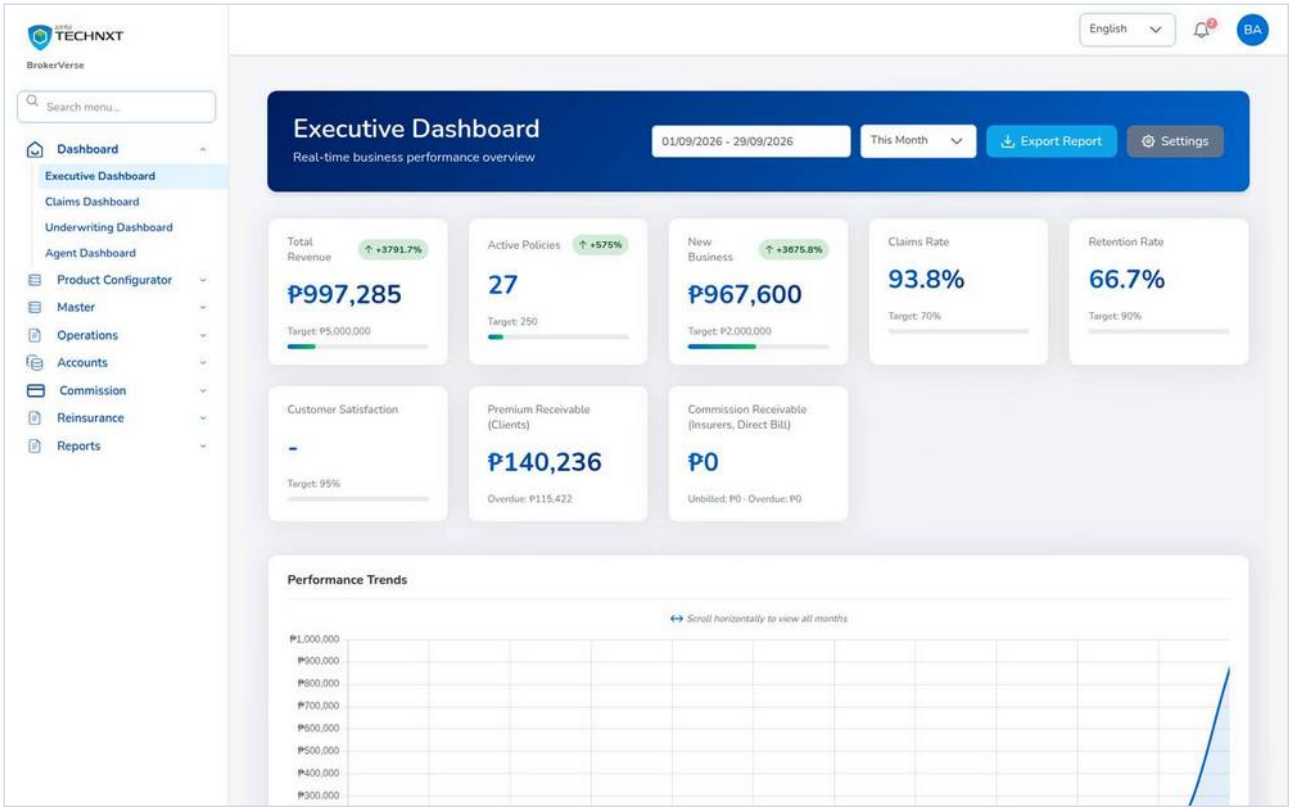

Figure 157. Landing page of the IT Administrator: Executive Dashboard with every menu

20.2 Business Administrator (bea.admin)

Role: Business Administrator (ba). **Menus:** all. **Landing:** Executive Dashboard.

Task	Where
Maintain products and templates	Product Configurator > Product Templates
Update the CTPL tariff, vehicle classes, seats, Auto Passenger PA	Product Configurator > Product Templates > MOT-003-2025 > CTPL & Auto PA
Maintain coverages, rating factors, underwriting rules	Product Configurator > Coverage Builder, Rating Engine, Underwriting Rules
Maintain insurers, products, covers, signatories, vehicles	Master > Generals > Insurance Management
Maintain commission rates	Master > Generals > Commission
Maintain the chart of accounts (with Finance)	Master > Finance > Main Account, Sub Account
Set up incentive programmes and reinsurance treaties	Master > Incentive Programs, Master > Reinsurance Treaty
Keep business values current (limits, windows, lists, e-mail texts)	Master > Configuration
Follow the business	Dashboard > Executive Dashboard; Reports > All Reports (all 19)

- Change rates with the agreement of Finance and test them with the Rating Engine's **Test Calculator** or a draft quotation.
- New treaties need a second user's approval. Incentive batches are calculated and approved by finance.

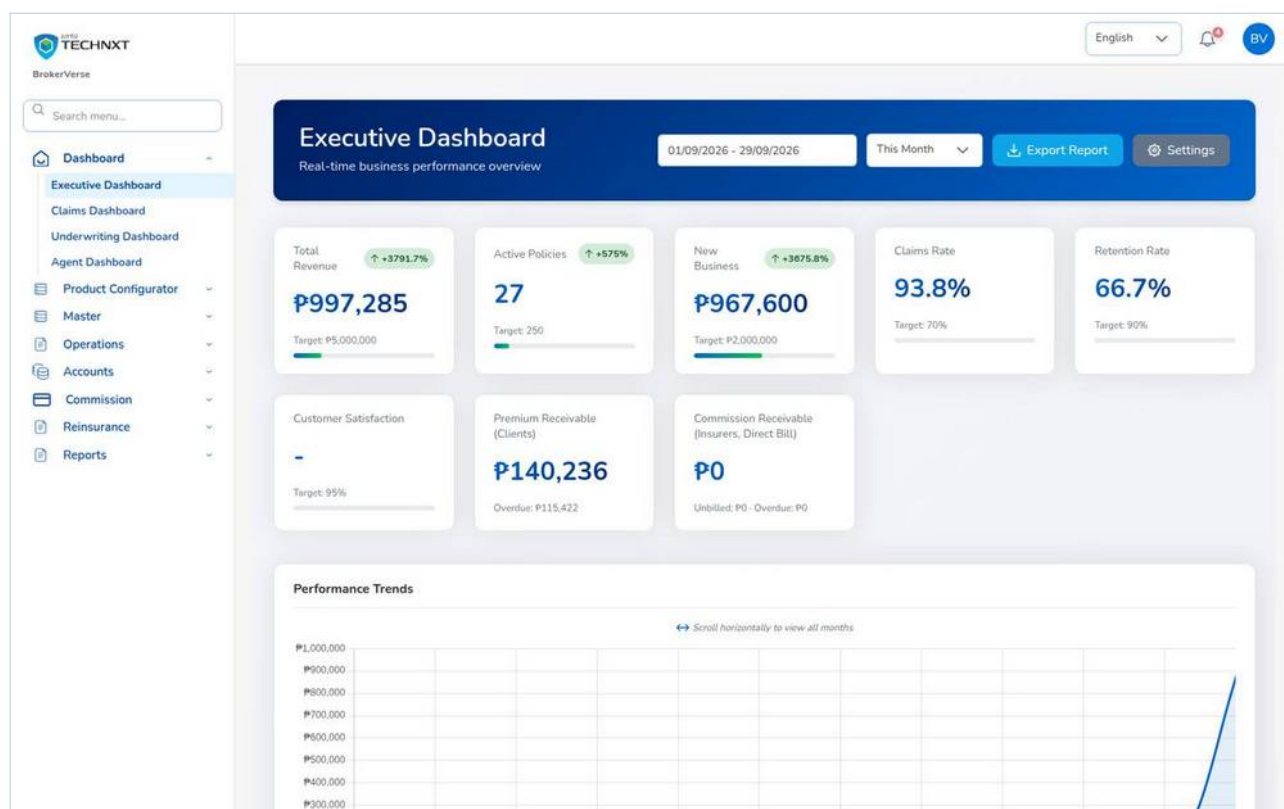

Figure 158. Landing page of the Business Administrator

20.3 Sales / Relationship Manager (maria.sales)

Role: sales. **Landing:** Executive Dashboard. Your own figures are on Dashboard > Agent Dashboard.

Task	Where
Capture a prospect	Operations > Leads/Prospects > Create Lead
Prepare and send a quotation	Lead > Create Quote ... Completed Quote > Send for Customer Approval
Convert an accepted quotation	Quotation > Proceed to Policy (KYC, photos, billing mode, upload policy)
Record the client's payment for finance	Policy > Proceed to Payment > Record payment
Work renewals	Operations > Renewals > Renewal Queue, At-Risk Policies, Negotiations
Follow your commission	Commission > Commission Dashboard
Reports	Reports > All Reports (12 reports, including SOA, Receivables Ageing and Incentive Results); Reports > Operational Reports

Notifications you receive: customer accepted quotation, policy issued, renewal notice sent, renewal approved or returned, policy lapsed.

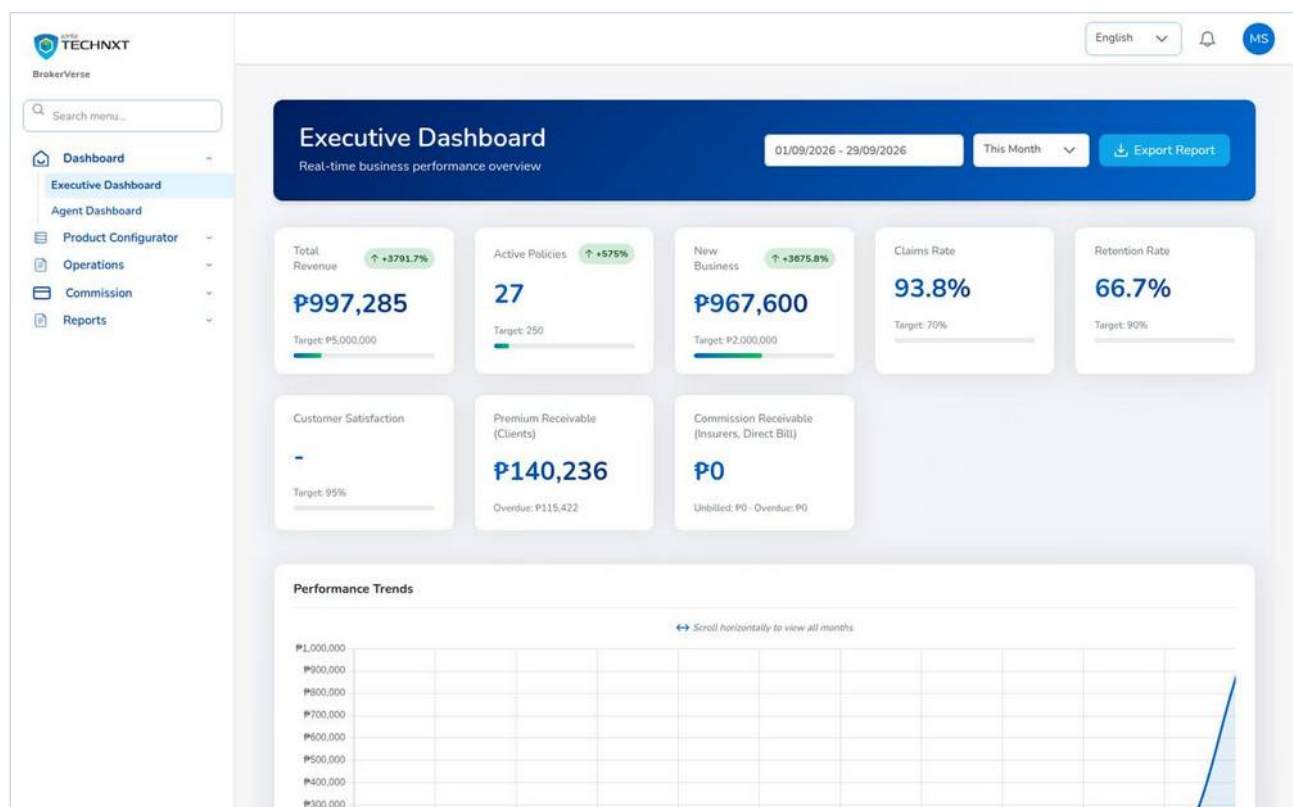

Figure 159. Landing page of Sales: Executive Dashboard with the sales menu

20.4 Agent / Referrer (ramon.agent)

Role: agent. **Landing:** Agent Dashboard (Operations > Home). You see only your own leads, clients, quotations and policies.

Task	Where
Start the day	Dashboard > Agent Dashboard: leads, clients, policies sold, commission, receivables
Capture a prospect	Operations > Leads/Prospects > Create Lead
Quote	Lead > Create Quote (5 steps) > Completed Quote > Send for Customer Approval
Issue the policy after the client accepts	Operations > Quotation > quotation > Proceed to Policy
Record how the client paid	Policy > Proceed to Payment
Raise a claim notice	Operations > Policy > ... > Claim
Follow expiring policies	Operations > Renewals > Renewal Policy
Follow commission	Commission > Commission Dashboard

- Put yourself as the referrer (Account Code, Commission & Referral) so the commission is credited to you.
- Keep your bank details with Finance; payouts are blocked without them.
- You have no Reports menu; ask Finance for your Broker Commission Statement.
- Your Renewals menu holds **Renewal Policy** only: renew your own expiring policies from there. The renewal workspace (queue, batches, at-risk, negotiations, lapse, performance) is run by sales and underwriting.

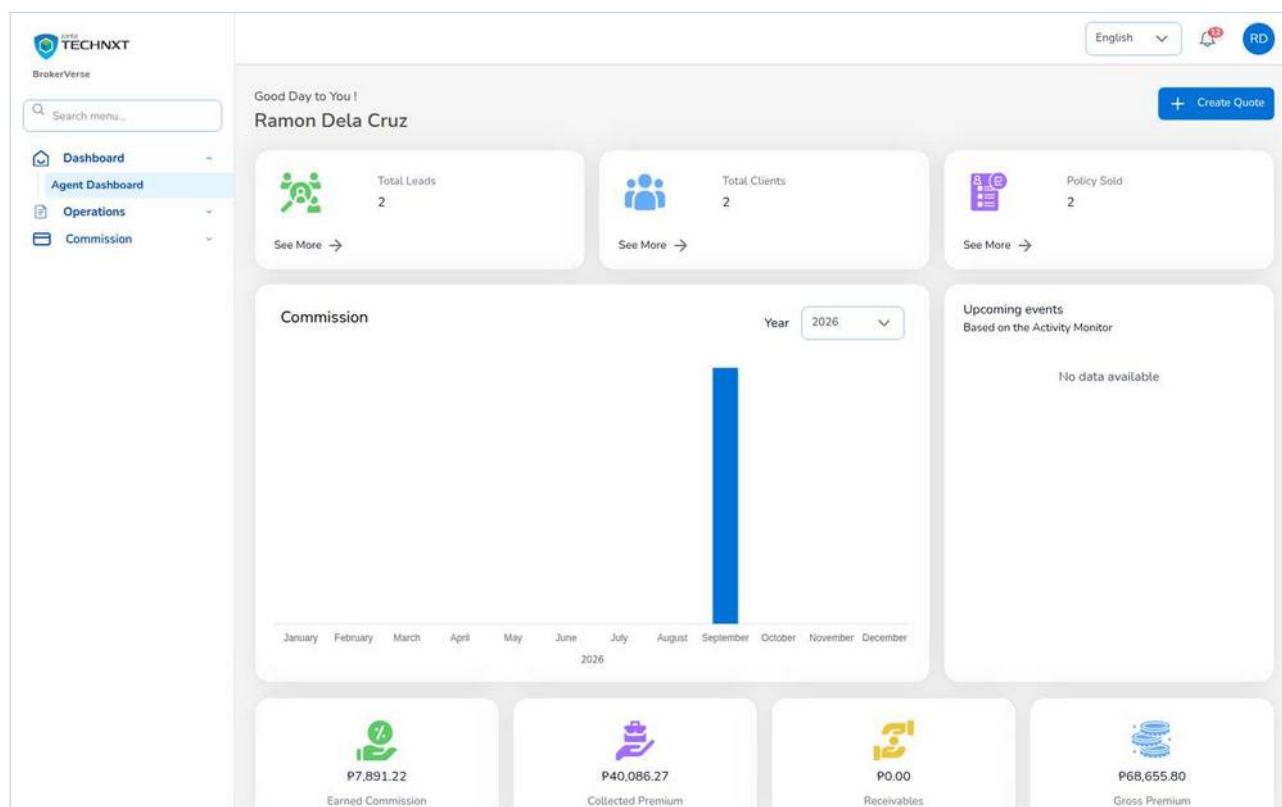

Figure 160. Landing page of the Agent: Agent Dashboard, own book only

20.5 Underwriter (jose.uw)

Role: underwriting. **Landing:** Executive Dashboard; your workbench is Dashboard > Underwriting Dashboard.

Task	Where
Review quotations sent for approval	Notification <i>Quotation sent for approval</i> ; Operations > Quotation
Monitor submissions and alerts	Dashboard > Underwriting Dashboard
Price and approve renewals	Operations > Renewals > Renewal Policy, Renewal Queue, Negotiations
Maintain coverages, rating and underwriting rules	Product Configurator
Reinsurance: treaties, cessions, recoveries, reconciliation	Reinsurance menu
Reports	Reports > All Reports (10 reports, including the Reinsurance Cession Register); Reports > Operational Reports

- You are notified of every quotation sent to a client (`quotations.approval_notify_roles`) and are the checker for renewal terms (`renewals.approver_roles`).
- Quotations expire after 30 days; renewal quotations after 30 days.

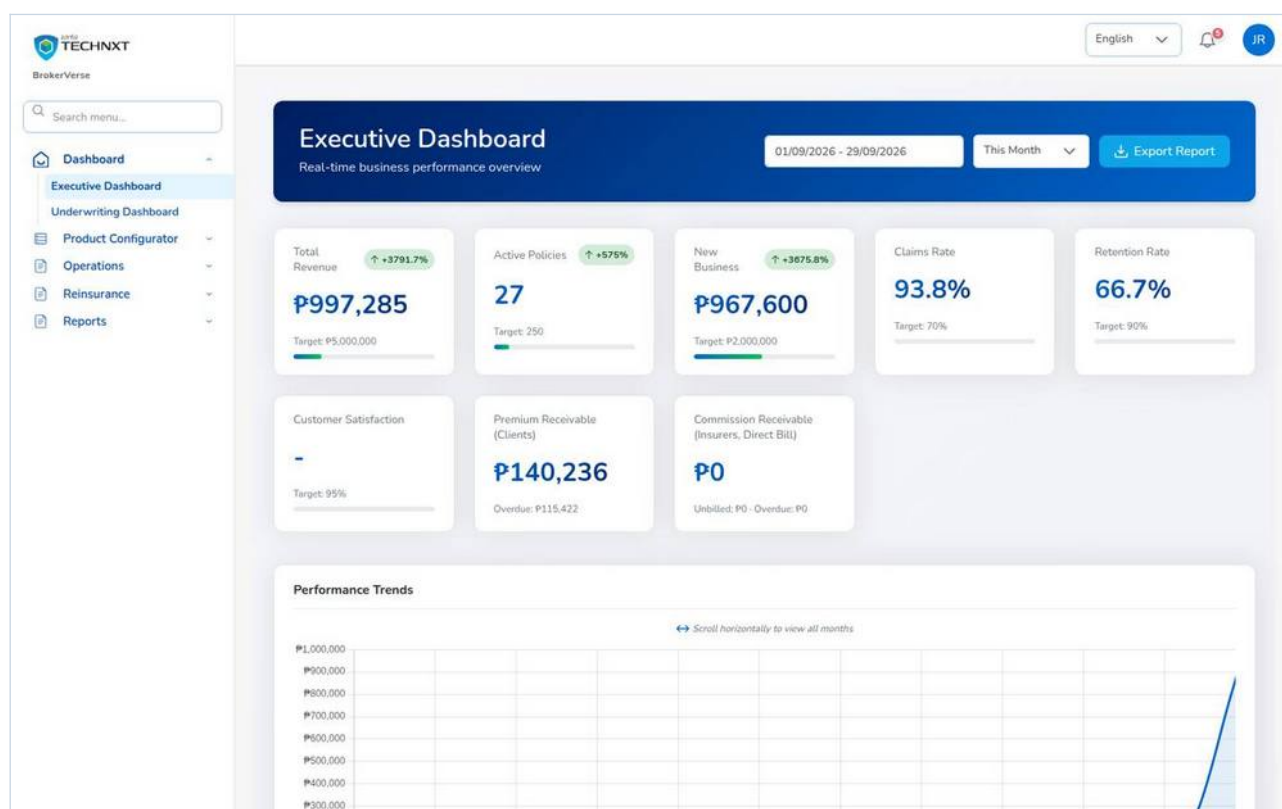

Figure 161. Landing page of the Underwriter

20.6 Customer Services (ana.cs)

Role: customer-services. **Landing:** Executive Dashboard.

Task	Where
Start the day	Operations > Open Items (expiring policies, pending payments, pending quotes, renewal requests)
Answer a client	Operations > Clients > client (Policy, Claim, Renewal, Endorsement tabs)
Change a policy	Operations > Policy > ... > Endorsement
Follow payments	Operations > Payments
Capture leads and quotations for sales	Operations > Leads/Prospects
Follow expiring policies	Operations > Renewals > Renewal Policy
Reports	Reports > All Reports (9 operational reports); Reports > Operational Reports

- Choose the endorsement type before **Proceed**; check the summary before **Send to Insurance Company**.
- Additional premium from an endorsement is billed automatically; finance posts the receipt.

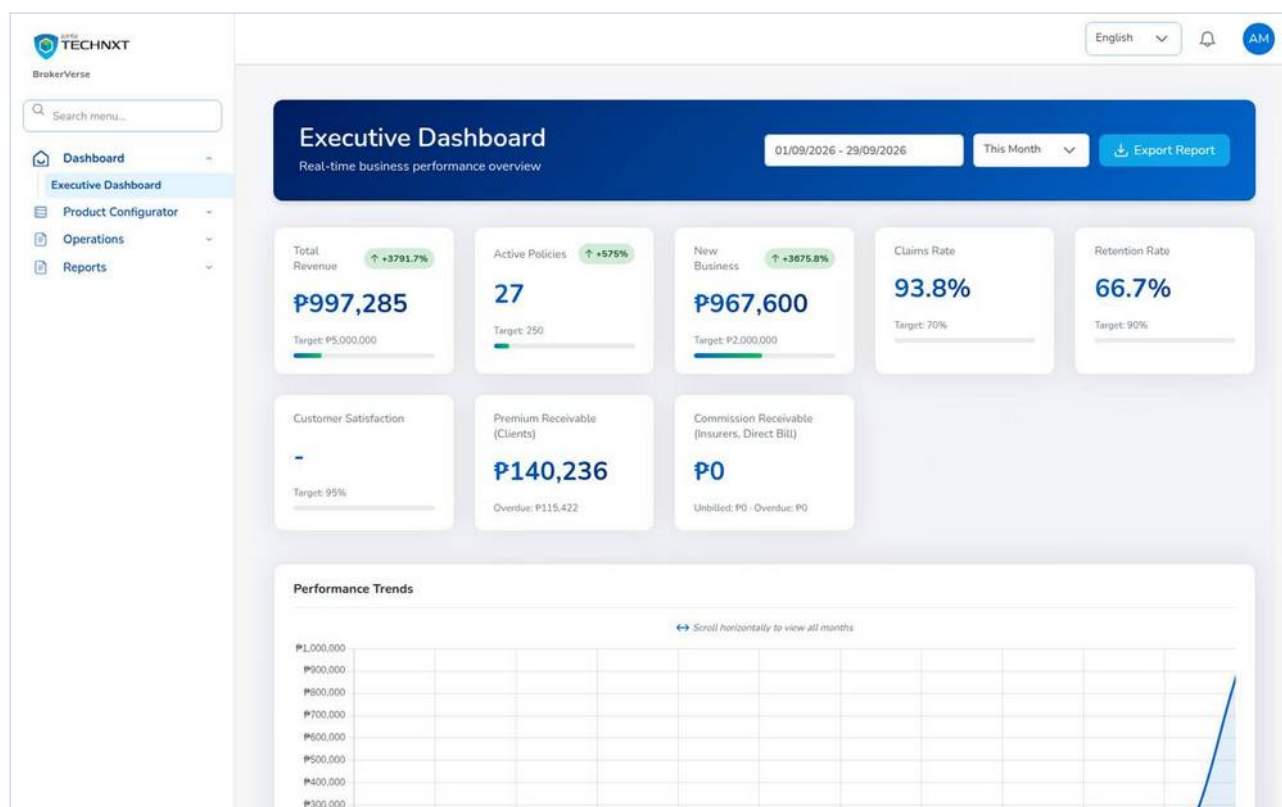

Figure 162. Landing page of Customer Services

20.7 Claims Officer – maker (carlo.claims)

Role: claims. **Landing:** Claims Dashboard.

Task	Where
See open and overdue claims	Dashboard > Claims Dashboard
Register a claim	Operations > Policy > ... > Claim
Follow a claim with the insurer	Operations > Claims > eye icon > Proceed (adjuster details)
Submit a settlement	Claim > Claim Settlement > Submit
Check the history	Operations > Claims > history icon (audit trail)
Reinsurance recoveries	Reinsurance > Claims Recovery
Reports	Reports > All Reports (8 reports, including Claims Position and Claims Ageing); Reports > Operational Reports > Claims

- The date of loss must be inside the policy period; unpaid premium blocks a claim.
- Attach documents (PNG, JPEG, PDF up to 2 MB) when you register.

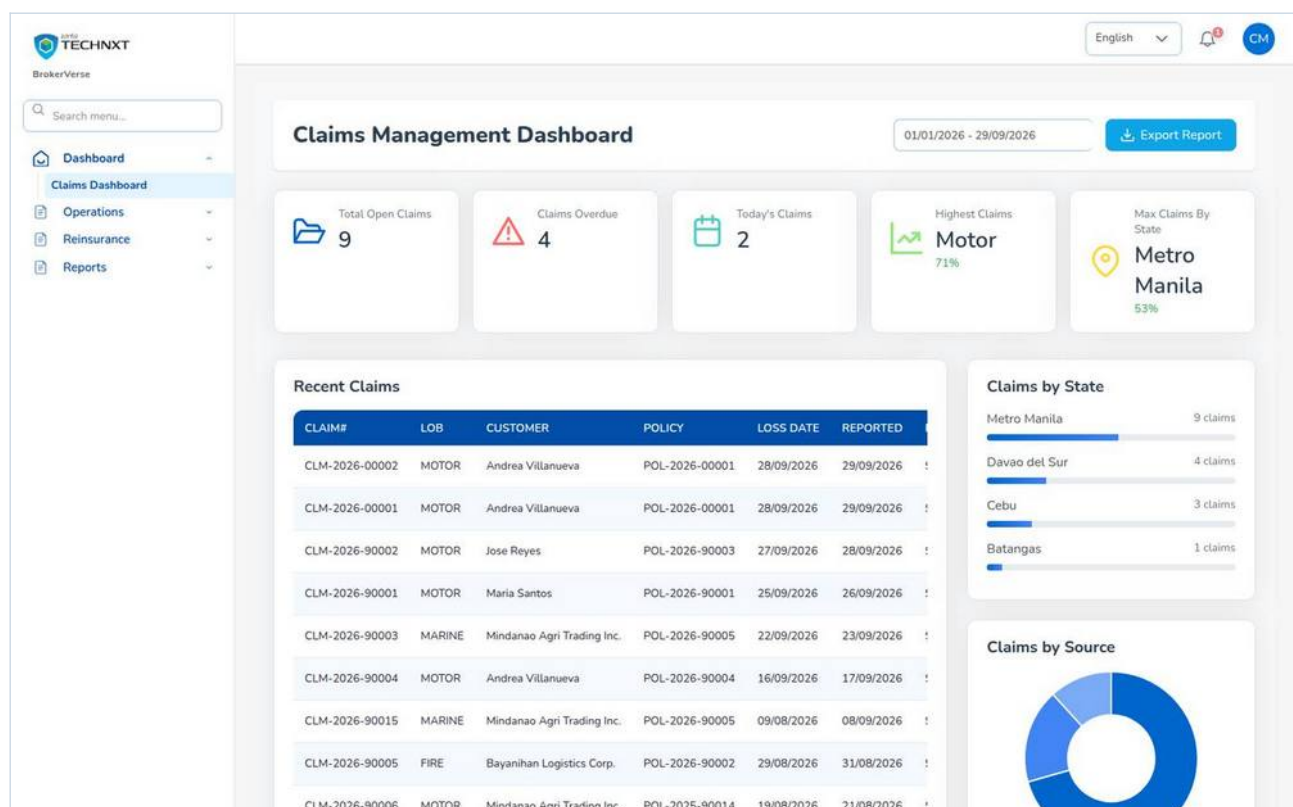

Figure 163. Landing page of the Claims Officer: Claims Dashboard

20.8 Claims Officer – checker (lisa.claims2)

Role: claims. **Landing:** Claims Dashboard.

Task	Where
See settlements waiting for you	Notification <i>Settlement approval</i> ; Operations > Claims (status Pending Approval)
Review and approve a settlement	Claims > eye icon > Waiting for Settlement > Approve Settlement or Return
Check the claim before approving	Claims > information icon (Claim Details), history icon (audit trail)

- You cannot approve a settlement you submitted yourself.
- After approval the claim is Settled and the maker is notified.

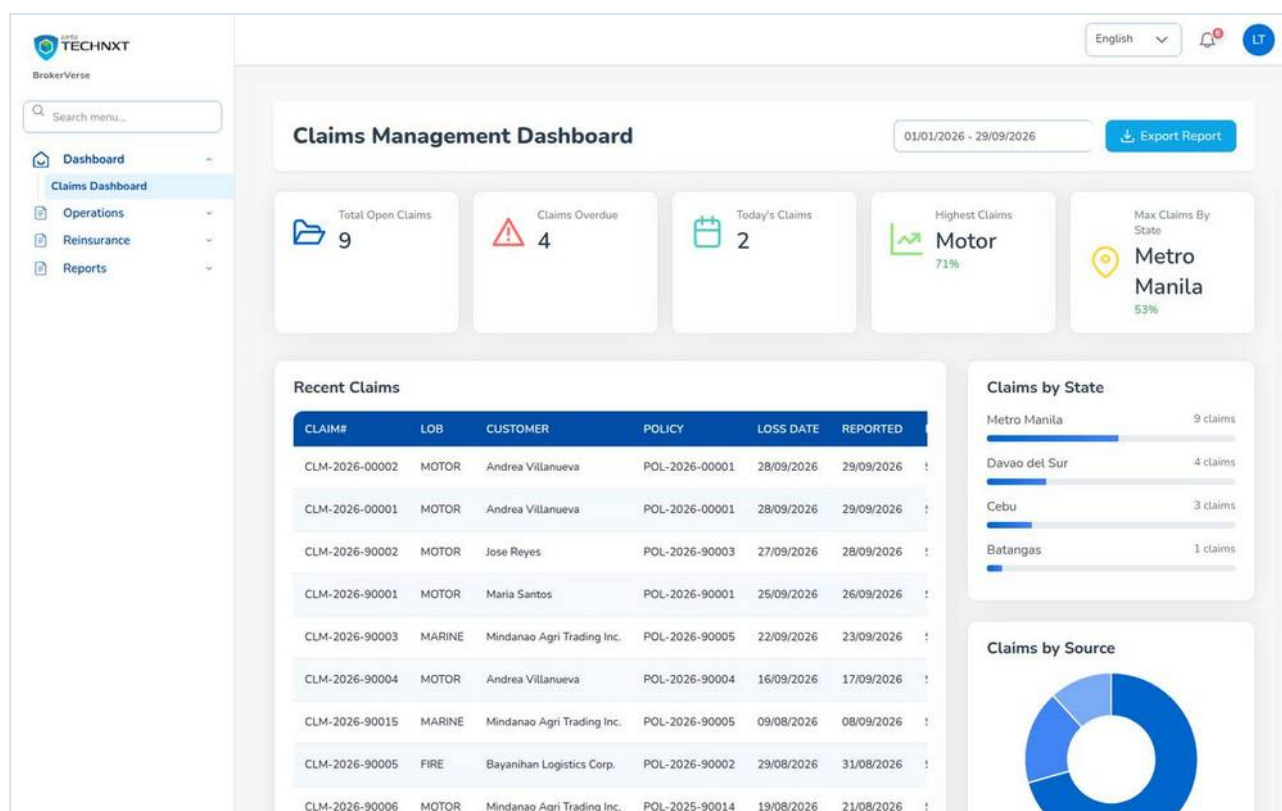

Figure 164. Landing page of the claims checker

20.9 Finance / Accounts – maker (liza.finance)

Role: finance. **Landing:** Executive Dashboard.

Task	Where
Verify payments recorded by agents and sales	Notification <i>Premium payment to verify</i> > Confirm / Reject
Post official receipts	Accounts > Receipts > + Receipt
Chase overdue premium	Accounts > Collections, Aging Report
Pay commission	Commission > Agents/Referrer Accounts > Approve > Generate payout
Remit premium to insurers	Accounts > Remittance > Automated Processing, Tracking, Settlement
Bill direct-bill commission	Accounts > Remittance > Direct Bill Processing
Journals	Accounts > Journal Voucher > + Voucher > Submit for approval
Pay suppliers and refunds	Accounts > Disbursement > + Create
Calculate agent incentives	Accounts > Incentive > Calculations > New Calculation
Reconcile reinsurer statements	Reinsurance > Reconciliation
Reports	Reports > All Reports (14 reports); Reports > Financial Reports; Operational Reports > Remittance, Broker Commission

- Always select the bill when you post a receipt.
- Ask the checker to approve the same day; approvals show an SLA.

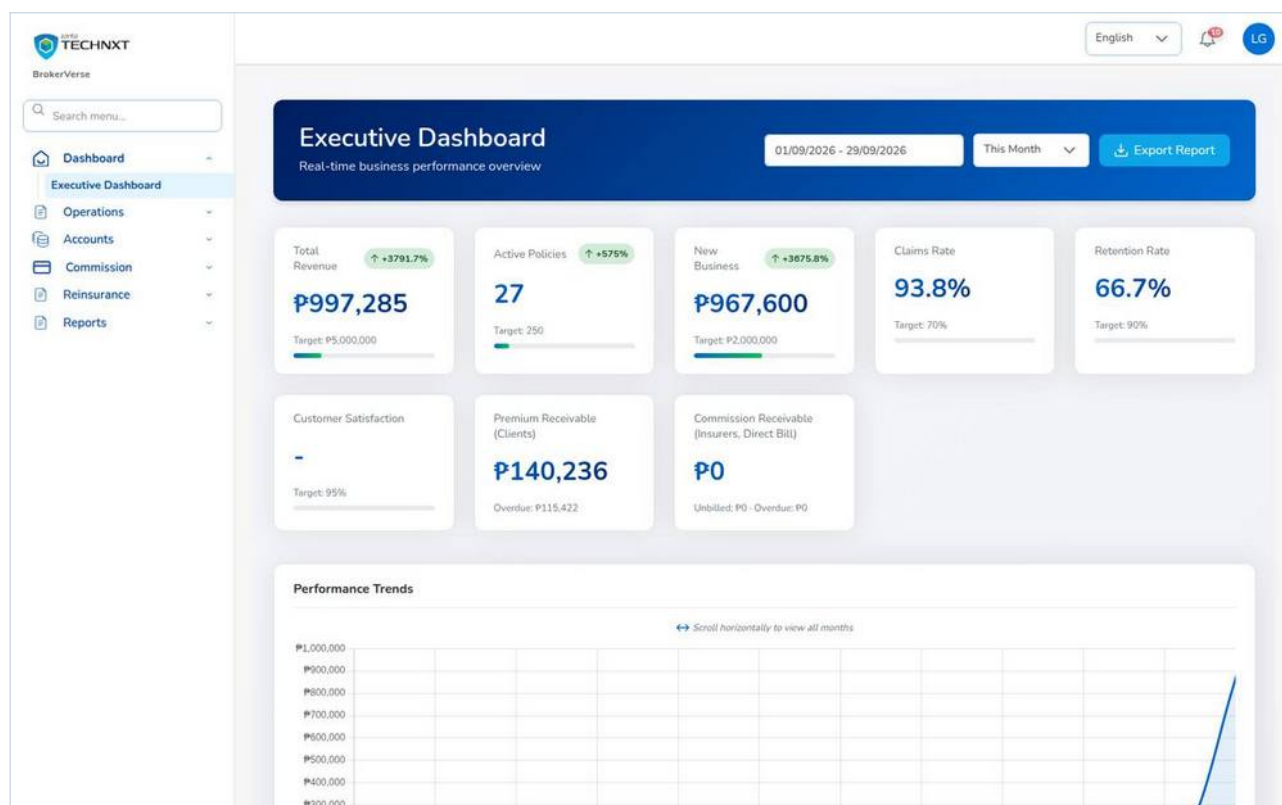

Figure 165. Landing page of Finance

20.10 Finance / Accounts – checker (fe.approver)

Role: finance. **Landing:** Executive Dashboard.

Approval	Where
Journal vouchers	Notification <i>Journal voucher ... awaiting approval</i> ; Accounts > Journal Voucher
Payment vouchers, cheques and commission payouts	Accounts > Disbursement > voucher
Commission lines	Commission > Agents/Referrer Accounts > referrer > Approve
Remittances, settlements, transfers, adjustments	Accounts > Remittance > Approval Workflow
Commission debit notes	Accounts > Remittance > Direct Bill Processing > 2. Debit Notes
Incentive calculation batches	Accounts > Incentive > Approvals
Petty cash requests	Accounts > Petty Cash > Request

- You cannot approve what you entered. Check amounts, accounts and supporting documents before approving.
- Print approved cheques so that vouchers become Paid.
- Run the trial balance after each posting day.

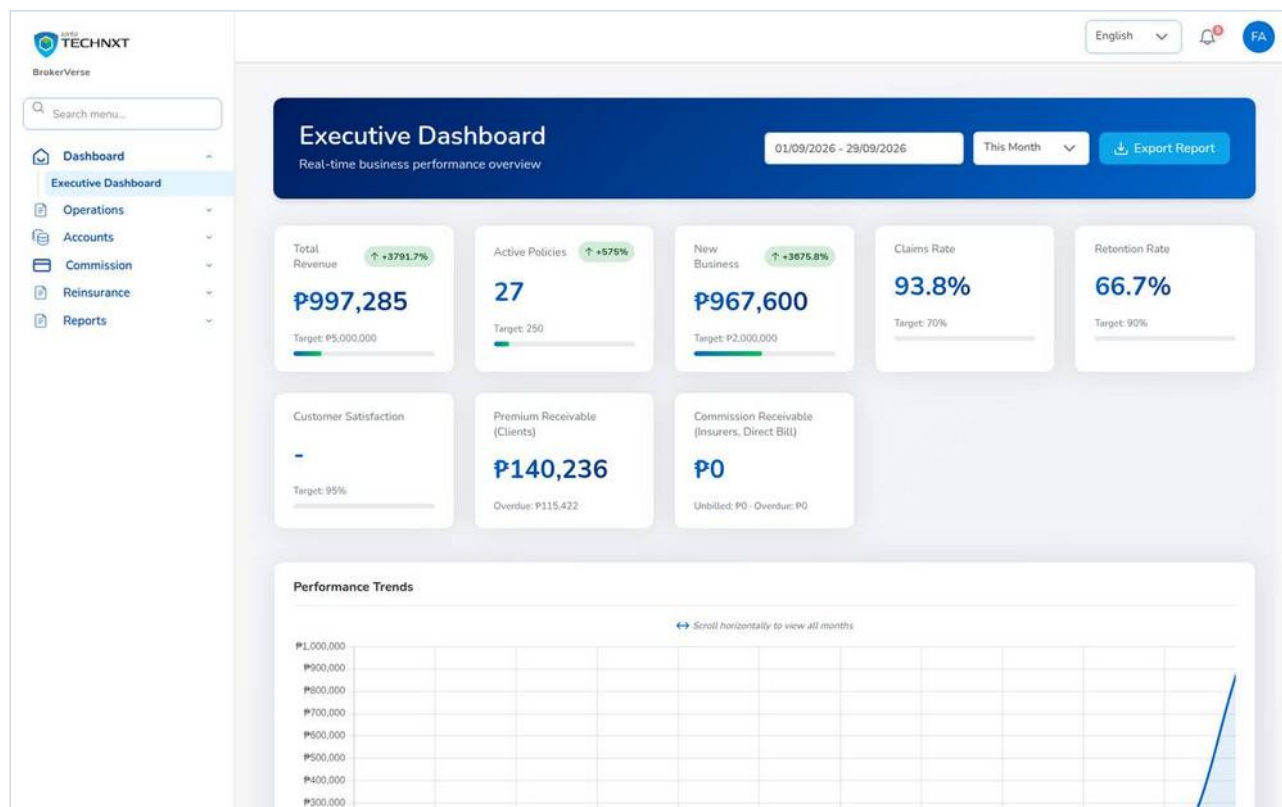

Figure 166. Landing page of the finance checker

20.11 User Access Administrator (carmela.morfe)

Role: user-access-admin. **Menus:** Master > User Management (User, Role) and Audit Trail. **Landing:** Audit Trail.

Task	Where
Create a user after the manager approves the request	Master > Generals > User Management > User > + Add (leave the password empty; give the temporary password to the user)
Change roles	User > pencil
Unlock a locked user	User > ... > Unlock
Reset a password	User > ... > Reset password (temporary password shown once)
Lost phone: turn off two-step verification	User > ... > Turn off two-step verification
Deactivate a leaver	User > Status switch
Review a user's sign-ins	User > ... > Sign-in history ; Master > Audit Trail (record type session)
Review roles and permissions	Master > Generals > User Management > Role

- You cannot open business screens, reports or settings; they show **Not authorised**.
- You cannot act on IT or Business Administrator accounts; ask the IT Administrator.
- Give each person the smallest role that does the job, and keep maker and checker on different people.
- Review users with the line managers every quarter.

Appendix B. Number series

Numbers are issued by the system as PREFIX-YYYY-NNNNN (for example POL-2026-00001). The prefixes are set in Master > Configuration, group *numbering*.

Prefix	Document	Issued when
LD	Lead	A lead is saved
QT	Quotation	Completed Quote
CL	Client code	The first policy of a client is issued
POL	Policy	Send to Insurance Company

Prefix	Document	Issued when
INV	Premium bill (invoice)	Policy issue, endorsement or renewal with premium
OR	Official receipt	A receipt is posted or a payment confirmed
RT	Receipt transaction	With each receipt
PV	Payment voucher	A voucher, payout or insurer payment is created
DT	Voucher transaction	With each voucher
JV	Journal voucher	Every journal (manual or system)
REM	Remittance to insurer	Automated processing or agency bill
BLK	Remittance batch	Remittances submitted for approval
SET	Settlement	Settlement saved
END	Endorsement	Endorsement saved
CLM	Claim	Claim registered
DN	Commission debit note	Debit note raised
DNC	Debit note collection	Insurer payment posted
ADJ, EXC, TRF, STMT, NTF, SCH, BIL	Remittance adjustment, exception, transfer, statement, notification, schedule, bill	On the remittance screens
RN, RB, RQ, WB	Renewal, renewal batch, renewal quote, win-back campaign	On the renewal screens
CES, RCL, REC, BDX, TRT, RE	Cession, recovery claim, reconciliation, bordereau, treaty, reinsurer	On the reinsurance screens
PC, PCR, PCRC	Petty cash transaction, request, receipt	On the petty cash screens
INC, CALC	Incentive programme, calculation batch	On the incentive screens

Appendix C. Key configuration settings

All settings are on **Master > Configuration** unless noted. Changes apply at once and are audited.

Setting (key)	Value	Effect
<code>tax.vat_rate</code> , <code>tax.dst_rate</code> , <code>tax.lgt_rate</code> , <code>tax.fst_rate</code>	12%, 12.5%, 0.75%, 2%	Taxes on the net premium.
<code>premium.taxes_by_lob</code>	Motor: VAT, DST, LGT; Fire and IAR: + FST	Which taxes apply per line.
<code>motor.pricing_template_code</code>	MOT-003-2025	Template holding the CTPL tariff and Auto Passenger PA (Product Configurator).
<code>limits.quote_validity_days</code>	30	Quotation validity.
<code>quotations.approval_link_ttl_hours</code>	168	Validity of the client's approval link (7 days).
<code>quotations.approval_notify_roles</code>	underwriting	Roles notified of quotations sent to clients.
<code>workflow.quote_maker_checker</code>	on	A quotation cannot be approved by its creator.

Setting (key)	Value	Effect
policy.kyc_required_fields	Motor: ID type, number, image, chassis, motor, plate or MV file	Required to issue a policy.
policy.kyc_id_types	PhilSys ID ... Senior Citizen ID	Accepted government IDs.
policy.payment_capture_modes	bank transfer, cheque, online, cash	How a client can pay on the payment screen.
receivables.due_days	30	Days from inception to the bill due date.
direct_bill.default_billing_mode	broker	Default billing mode at issue.
direct_bill.commission_vat_rate / ..._inclusive	12%, added on top	VAT on direct-bill commission.
direct_bill.insurer_ewt_rate	10%	EWT withheld by the insurer (BIR 2307).
direct_bill.debit_note_due_days	30	Debit note due date.
commission.default_rate	15%	Brokerage when no rule applies.
commission.wht_rate_by_type	Agent 5%, Sub-agent 5%, External 10%	Withholding tax on comsub.
commission.comsub_rate_by_level	L1 8%, L2 5%	Default comsub rate.
commission.eligible_roles	agent, sales	Who earns commission.
commission.require_bank_account	on	Payout needs a bank account.
finance.maker_checker_enabled	on	Approver differs from maker (JVs, cheques, payouts, commission, petty cash).
journal.require_approval	on	Manual journals need approval.
claims.settlement_maker_checker	on	Settlement approved by a second user.
claims.validate_loss_date, claims.block_unpaid_premium	on	Claim checks at registration.
claims.sla_days	20	Claim handling SLA.
renewals.pipeline_days, limits.renewal_notice_days, renewals.grace_period_days	90; 60/30/15; 30	Renewal timetable.
renewals.maker_checker	on	Renewal terms need approval.
remittance.approval_levels	100,000 / 1,000,000 / above	Approval levels by amount.
limits.receivable_ageing_buckets	30, 60, 90, 120	Ageing buckets.
collections.reminder_days_before, ... repeat_days	7, 7	Collection reminders.
security.password_*, limits.max_login_attempts, limits.session_idle_minutes	see Chapter 1	Sign-in rules.
security.require_2fa_roles	none	Roles that must use two-factor authentication.
security.reset_code_minutes, security.reset_code_max_attempts	15 minutes, 5	Forgot-password code validity and wrong entries allowed.
security.login_rate_limit, security.api_rate_limit	10 per 5 minutes; 600 per minute	Sign-in attempts per computer and user name; requests per user.

Setting (key)	Value	Effect
quote.bodily_injury_limits, quote.property_damage_limits	100,000 to 500,000	Limits offered on quotations and endorsements.
dashboard.renewals_due_days, renewals.due_soon_days	60, 30	Renewals counted as due on the dashboards and as due soon in the queue.
security.scoped_roles	agent	Roles limited to their own book.
general.date_format, general.timezone,currency.default	DD/MM/YYYY, Asia/Manila, PHP	Formats.
notification.email_enabled	off in the test system	Sends queued e-mails through SMTP.
System Settings (screen)	name, logo, colours, currency, language	Look of the system (standard: BrokerVerse with the iorta TechNXT logo).
Product Configurator (screen)	CTPL tariff, APPA rate and limits, own damage rates	Motor pricing.

Appendix D. Scheduled jobs

Job	When (Manila time)	What it does
Policy expiry	Daily 00:15	Marks policies past their expiry date as Expired.
Quotation expiry	Daily 00:30	Expires quotations older than the validity.
Daily reports	Daily 05:00	Generates the Production Register, Collection Report and Claims Position.
Renewal pipeline	Daily 05:30	Enrols policies expiring within 90 days; lapses renewals past the grace period.
Renewal notices	Daily 06:00	Creates the 60/30/15-day renewal notices and notifications.
Receivable ageing	Daily 07:00	Recomputes ageing buckets of open receivables.
Collection reminders	Daily 08:00	E-mails and notifies clients about premium falling due.
E-mail outbox	Every 5 minutes	Sends queued e-mails.
Renewal notice queue	Every minute	Sends queued renewal notices and retries stale jobs.

Appendix E. Glossary

Term	Meaning
APPA	Auto Passenger Personal Accident: personal accident cover for the driver and passengers, priced per seat.

Term	Meaning
BIR Form 2307	Certificate of Creditable Tax Withheld at Source, given by the insurer for the EWT it withholds.
Billing mode	Broker billed (client pays the broker) or direct bill (client pays the insurer).
Brokerage	The commission the insurer pays the broker.
Comsub	Commission sub-share paid by the broker to an agent or referrer.
CTPL	Compulsory Third Party Liability: motor insurance required by law for LTO registration, at the Insurance Commission tariff.
Debit note (DN)	The broker's bill to an insurer for commission on direct-bill policies.
Direct bill	The client pays the premium to the insurer; the broker bills only its commission.
DST	Documentary Stamp Tax (12.5% of the premium).
Endorsement	A change to an issued policy.
EWT	Expanded Withholding Tax withheld from a payment and credited to the payee (BIR 2307).
FST	Fire Service Tax on fire and IAR premium.
IAR	Industrial All Risks.
KYC	Know Your Customer: verification of the client's identity with a government ID.
LGT	Local Government Tax (0.75% of the premium).
LTO / MV file number	Land Transportation Office; the MV file number identifies a vehicle before plates are issued.
Maker-checker	Four-eyes control: the maker enters, a different user (the checker) approves.
Net premium	Premium before taxes. Gross premium = net premium + taxes + CTPL – discount.
OR	Official Receipt.
PLA	Preliminary Loss Advice: the first notice of a claim to the insurer.
PV	Payment voucher.
Remittance	Payment of collected premium, net of commission, to the insurer.
SOA	Statement of Account.
Settlement	(Remittance) the payment of approved remittances to an insurer; (Claims) the payment of a claim.
TIN	Tax Identification Number.
TNVS	Transport Network Vehicle Service (ride-hailing).
VAT	Value Added Tax (12%).
WHT	Withholding tax on commission paid to agents and referrers.

Appendix F. Troubleshooting

Message or problem	What to do
Not authorised – "Your role does not give access to this screen"	The screen is not part of your role. Use your menu, or ask a User Access Administrator whether your role is right.
Wrong user ID or password	Check Caps Lock and the user ID. After 5 failures the account locks.

Message or problem	What to do
Account locked. Contact the administrator	Ask a User Access Administrator to unlock your user (Unlock).
Too many sign-in attempts	Wait 5 minutes, then sign in again.
Forgot password	Use Forgot password? on the sign-in page; the code is e-mailed to you. Without an e-mail address, ask a User Access Administrator for Reset password .
<i>Choose a new password to continue / Your password has expired</i>	Choose a new password that meets every rule (Chapter 1).
The authentication code is refused	Use the current code in the app; check that the phone's clock is set automatically. Lost phone: ask a User Access Administrator to turn two-step verification off.
You were signed out	30 minutes without activity. Sign in again; unsaved entries are lost.
<i>Your session has ended ...</i>	Your password was changed or reset, your user or roles were changed, or you signed in elsewhere. Sign in again.
<i>Too many requests</i>	You sent a very large number of requests in one minute. Wait a minute and try again.
<i>Requires permission: ...</i> at the top of a screen	Your role lacks a permission the screen needs. Report the screen and the message to the IT Administrator.
<i>This field is required, Invalid email address</i>	Fill in the field or correct the format shown in red under it.
<i>Invalid mobile number (e.g. 0917 123 4567 or +63 917 123 4567)</i>	Type a Philippine mobile number starting with 09, +639 or 9 (10 digits after the 0).
<i>Age must be between 18 and 100 years</i>	Check the date of birth (DD/MM/YYYY).
CTPL shows "-" on the quotation	Choose the Vehicle Type on step 1.
<i>The lead has no e-mail address</i>	Add the e-mail to the lead, then send the quotation.
Issuance refused for missing KYC or vehicle identifiers	Complete ID type, ID number, ID image, chassis, motor and plate or MV file number.
<i>Date of loss ... is outside the policy period</i>	Check the date of loss; register the claim on the policy in force on that date.
Receipt refused: amount above the balance	Enter at most the bill balance; use Pay full balance .
Journal voucher refused: <i>debit ... vs credit ...</i>	Correct the lines until total debit equals total credit.
Approval refused for the maker	Ask another user with the same role to approve.
Commission payout blocked: no bank account	Add the referrer's bank name and account number.
"Something went wrong on this screen"	Select Reload screen . If it persists, report the screen and the time to support.
E-mails are not received	E-mails wait in the outbox until SMTP is configured and <code>notification.email_enabled</code> is on.

Appendix G. Known limitations in this release

The items below are known limitations of this release. They are not defects in the business flows, but the IT Administrator should know them before go-live.

- **Session tokens in browser storage.** The sign-in session (access and refresh tokens) is kept in the browser's local storage. Anyone who can run scripts in the user's browser could read it. Sign out on shared computers, keep browsers up to date and do not install unknown browser extensions. Sessions end after 30 minutes without activity, and a password change ends the other sessions.
- **No QR code for two-factor set-up.** The set-up screen shows the setup key and a link for the authenticator app, but no QR code. Users type the key into the app or open the link on the phone.
- **Rate limits are counted per API server.** The sign-in limit (10 attempts in 5 minutes) and the request limit (600 per minute) are counted by each API server separately. With several API servers behind a load balancer, the effective limit is higher; add a limit at the load balancer or web application firewall if needed.
- **No Filipino translation.** Filipino is configured as a language ([general 1. languages](#)), but there is no Filipino translation of the screens yet, so the language list offers English and Thai only.
- **Database time zone.** Most business dates follow the configured time zone Asia/Manila. Some database queries use the database's own current date. Set the time zone of the PostgreSQL server (or of the database) to Asia/Manila, so that "today" is the Philippine date between midnight and 08:00.

Appendix H. Support

Need	Contact
Sign-in, locked account, new user, role change	Your User Access Administrator
Settings, schedules, e-mail, integration, errors on screen	IT Administrator (BrokerVerse)
Products, rates, commission, masters	Business Administrator
Receipts, payouts, remittance, ledger	Finance / Accounts
Service desk	[Service desk e-mail and telephone to be added]
Platform provider	iorta TechNXT – [support contact to be added]

When you report a problem, give the screen (menu path), the record number (for example QT-2026-00007), the time, your user ID and the message shown. Never send your password.
